Chapter 1

Application

1.1 Application

1.1.1

FCA **PRA**

G

There is no overall application statement for *GENPRU*. Each chapter or section has its own application statement.

1.1.2

FCA **PRA**

G

Broadly speaking however, *GENPRU* applies to:

- (1) an *insurer*;
- (2) a *bank*;
- (3) a *building society*;
- (4) a *BIPRU investment firm*; and
- (5) groups containing such *firms*.

1.1.2A

FCA **PRA**

G

A firm should refer to ■ GEN 2.2.13A R (cross-references in the Handbook) and ■ GEN 2.2.23 R to ■ GEN 2.2.25 G (cutover: application of provisions made by both the *FCA* and the *PRA*) when applying the rules and guidance in *GENPRU*. In particular, many rules in *GENPRU* are made by both the *PRA* (in relation to *PRA-authorised persons*) and by the *FCA* (in relation to *BIPRU investment firms* that are *FCA-authorised persons*).

1.1.2B

FCA

G

As the *FCA* does not have the power to impose prudential rules and guidance on *PRA-authorised persons*, references to *PRA-authorised persons* or *PRA rules* that are included in *FCA GENPRU* provisions will not be relevant in the *FCA*'s application of that provision, unless otherwise stated.

Scope

1.1.3

FCA **PRA**

R

GENPRU applies to a *firm* in relation to the whole of its business, except where a particular provision provides for a narrower scope.

1.2 Adequacy of financial resources

Application

1.2.1

R

This section applies to:

FCA PRA

- (1) a *BIPRU firm*; and
- (2) an *insurer*, unless it is:
 - (a) a *non-directive friendly society*; or
 - (b) a *Swiss general insurer*; or
 - (c) an *EEA-deposit insurer*; or
 - (d) an *incoming EEA firm*; or
 - (e) an *incoming Treaty firm* .
- (3) [deleted]

1.2.2

R

[deleted]

1.2.2A

R

In relation to any provision in this section which applies to a *BIPRU firm*, a reference in that provision to "financial resources" does not constitute a reference to "liquidity resources".

FCA PRA

1.2.3

R

[deleted]

1.2.3A

G

In relation to:

FCA PRA

- (1) a *BIPRU firm*;
- (2) an *incoming EEA firm* which:
 - (a) is a *full BCD credit institution*; and
 - (b) has a *branch* in the *United Kingdom*; and
- (3) a *third country BIPRU firm* which:
 - (a) is a *bank*; and

(b) has a *branch* in the *United Kingdom*;

■ BIPRU 12 contains *rules* and *guidance* in relation to the adequacy of that *firm's* liquidity resources.

1.2.4 R [deleted]

1.2.5 R [deleted]

1.2.6 R If an *insurer* carries on:

PRA

(1) *long-term insurance business*; and

(2) *general insurance business*;

This section applies separately to each type of business.

1.2.7 G The *guidance* in this section is drafted with respect to a *firm* to which this section and the other provisions of *GENPRU* and *BIPRU* (except ■ BIPRU 12) referred to in this section apply in full.

FCA PRA

1.2.8 G [deleted]

1.2.9 G [deleted]

1.2.10 G The scope of application of this section is not restricted to *insurers* that are subject to the relevant *EU* Directives.

PRA

1.2.11 G The adequacy of a *firm's* financial resources needs to be assessed in relation to all the activities of the *firm* and the risks to which they give rise and so this section applies to a *firm* in relation to the whole of its business. In the case of a *UCITS investment firm* this means that this section is not limited to *designated investment business* excluding *scheme management activity*. It also applies to *scheme management activity* and to activities that are not *designated investment business*.

FCA PRA

Purpose

1.2.12 G Adequate financial resources and adequate systems and controls are necessary for the effective management of prudential risks. This section therefore has requirements relating to both of these topics.

FCA PRA

1.2.13 G This section amplifies *Principle 4*, under which a *firm* must maintain adequate financial resources. It is concerned with the adequacy of the financial resources that a *firm* needs to hold in order to be able to meet its liabilities as they fall due. These resources include both capital and liquidity resources. As noted in ■ GENPRU 1.2.3A G, however, the *appropriate regulator's rules* and *guidance* in relation to the adequacy of the liquidity resources of a *BIPRU firm* are set out in ■ BIPRU 12.

FCA PRA

1.2.14 FCA PRA G In the case of a *bank* or *building society* this section implements Article 123 and (in part) Annex XI of the *Banking Consolidation Directive*. In the case of a *BIPRU investment firm* this section implements Article 34 of the *Capital Adequacy Directive* so far as that Article applies Article 123 of the *Banking Consolidation Directive*.

1.2.15 FCA PRA G This section also has *rules* requiring a *firm* to identify and assess risks to its being able to meet its liabilities as they fall due, how it intends to deal with those risks, and the amount and nature of financial resources that the *firm* considers necessary. ■ GENPRU 1.2.60 R provides that a *firm* should document that assessment. The *appropriate regulator* will review that assessment as part of its own assessment of the adequacy of a *firm's* capital under its *supervisory review and evaluation process (SREP)*. When forming a view of any *individual capital guidance* to be given to the *firm*, the *appropriate regulator* will also review the regulator's risk assessment and any other issues arising from day-to-day supervision.

1.2.16 FCA PRA G This section also has *rules* requiring a *firm* to carry out appropriate stress tests and scenario analyses for the risks it has previously identified and to establish the amount of financial resources needed in each of the circumstances and events considered in carrying out the stress tests and scenario analyses. In the case of a *BIPRU firm*, the *appropriate regulator* will consider as part of its *SREP* whether the *BIPRU firm* should hold a *capital planning buffer* and, in such a case, the amount and quality of that buffer. The *capital planning buffer* is an amount separate, though related to, the *individual capital guidance*, insofar as its purpose is to ensure that a *BIPRU firm* is able to continue to meet the *overall financial adequacy rule* throughout the relevant capital planning period in the face of adverse circumstances, after allowing for realistic management actions. Therefore, when forming its view on a *BIPRU firm's capital planning buffer*, the *appropriate regulator* will take into account the assessment made in relation to the *firm's ICG*.

1.2.17 FCA PRA G The basic requirements in this section are drafted to apply to a *firm* on a solo basis. This section then goes on to describe when its requirements do and do not apply on a solo basis and on a consolidated basis (see ■ GENPRU 1.2.45 R to ■ GENPRU 1.2.47 R and ■ GENPRU 1.2.57 R to ■ GENPRU 1.2.58 R). It also sets out some details about how the solo requirements are adjusted when they are applied on a consolidated basis (see ■ GENPRU 1.2.48 R to ■ GENPRU 1.2.56 G and ■ GENPRU 1.2.29 G).

Outline of other related provisions

1.2.18 FCA PRA G ■ GENPRU 2.1 sets out the minimum *capital resources requirements* for a *firm*. ■ GENPRU 2.2 sets out how *capital resources* are defined and measured for the purpose of meeting the requirements of ■ GENPRU 2.1.

1.2.19 FCA PRA G

- (1) ■ BIPRU 2.2 (Internal capital adequacy standards) and ■ INSPRU 7.1 (Individual capital assessment) set out detailed *guidance* on how a *firm* should carry out the assessment referred to in ■ GENPRU 1.2.15 G. The more thorough, objective, and prudent a *firm's* assessment is, and can be demonstrated as being, the more reliance the *appropriate regulator* will be able to place on the results of that assessment.
- (2) ■ BIPRU 2.2 and ■ INSPRU 7.1 also have information on how the *appropriate regulator* will review and respond to the assessments referred to in ■ GENPRU 1.2.15 G and, in the case of *BIPRU firms*, in ■ GENPRU 1.2.16 G. In particular they deal with the giving of *individual capital guidance* to a *firm*,

which is *guidance* about the amount and quality of capital resources that the *appropriate regulator* thinks a *firm* should hold at all times under the *overall financial adequacy rule* as it applies on a solo level and a consolidated level. ■ BIPRU 2.2. also deals with the giving of a *capital planning buffer* to a BIPRU *firm* on a solo level and a consolidated level.

1.2.20
FCA PRA

G

SYSC sets out general *rules* and *guidance* on the establishment and maintenance of systems and controls.

1.2.21
FCA PRA

G

- (1) ■ SYSC 11 sets out material on systems and controls that apply specifically to *liquidity risk* as that concept relates to an *insurer*.
- (2) [deleted]
- (2A) ■ BIPRU 12 sets out material on systems and controls that apply specifically to *liquidity risk* in relation to a BIPRU *firm*, a *branch* of an *incoming EEA firm* that is a *full BCD credit institution* and a *branch* of a *third country BIPRU firm* that is a *bank*.
- (3) [deleted]
- (4) ■ SYSC 11.1.21 E is an *evidential provision* relating to the *general stress and scenario testing rule* concerning stress testing and scenario analyses.
■ SYSC 11.1.24 E is an *evidential provision* relating to the *overall Pillar 2 rule* about *contingency funding plans*. Both of these *evidential provisions* apply only to an *insurer* to which that section of SYSC applies.
- (5) ■ GENPRU 2.2 (Adequacy of financial resources) requires certain BIPRU *investment firms* to deduct *illiquid assets* when calculating their *capital resources*.

1.2.22
FCA PRA

G

■ BIPRU 2.3 contains *rules* and *guidance* on interest rate risk in the *non-trading book*. That material elaborates on the general obligation in the *overall Pillar 2 rule*.

1.2.23
FCA PRA

G

For a BIPRU *firm* using a *VaR model* ■ BIPRU 7.10.72 R (Risk management standards: Stress testing) sets out certain stress tests that the *firm* should carry out.

1.2.24
FCA PRA

G

■ BIPRU 10.2.22 R (Stress testing of credit risk concentrations) sets out further stress tests that a *firm* should carry out if it uses certain approaches to collateral for the purposes of the *rules* about *large exposures*.

1.2.25
FCA PRA

G

For a BIPRU *firm* using the *IRB approach* ■ BIPRU 4.3.39 R to ■ BIPRU 4.3.40 R set out a recession credit rating migration stress test that the *firm* should carry out. Further *rules* and *guidance* on such stress tests are set out in ■ BIPRU 2.2 (Internal capital adequacy standards).

Requirement to have adequate financial resources

1.2.26

FCA PRA

R

A *firm* must at all times maintain overall financial resources, including *capital resources* and liquidity resources, which are adequate, both as to amount and quality, to ensure that there is no significant risk that its liabilities cannot be met as they fall due.

1.2.26A

FCA PRA

G

■ BIPRU 12 contains *rules* and *guidance* in relation to the adequacy of a *BIPRU firm's* liquidity resources. Consistent with ■ GENPRU 1.2.2A R, in assessing the adequacy of its liquidity resources, a *BIPRU firm* should do so by reference to the *overall liquidity adequacy rule*, rather than the *overall financial adequacy rule*.

1.2.27

FCA PRA

G

The liabilities referred to in the *overall financial adequacy rule* include a *firm's* contingent and prospective liabilities. They exclude liabilities that might arise from transactions that a *firm* has not entered into and which it could avoid, for example, by taking realistic management actions such as ceasing to transact new business after a suitable period of time has elapsed. They include liabilities or costs that arise both in scenarios where the *firm* is a going concern and those where the *firm* ceases to be a going concern. They also include claims that could be made against a *firm*, which ought to be paid in accordance with fair treatment of *customers*, even if such claims could not be legally enforced.

1.2.28

FCA PRA

G

A *firm* should therefore make its assessment of adequate financial resources on realistic valuation bases for assets and liabilities taking into account the actual amounts and timing of cash flows under realistic adverse projections.

1.2.29

FCA PRA

G

Risks may be addressed through holding capital to absorb losses that unexpectedly materialise. The ability to pay liabilities as they fall due also requires liquidity. Therefore, in assessing the adequacy of a *firm's* financial resources, both capital and liquidity needs should be considered. A *firm* should also consider the quality of its financial resources such as the loss-absorbency of different types of capital and the time required to liquidate different types of asset. ■ SYSC 11.1.24 E is an *evidential provision* relating to the *overall financial adequacy rule* concerning *contingency funding plans*.

Systems, strategies, processes and reviews

1.2.30

FCA PRA

R

A *firm* must have in place sound, effective and complete processes, strategies and systems:

- (1) to assess and maintain on an ongoing basis the amounts, types and distribution of financial resources, *capital resources* and internal capital that it considers adequate to cover:
 - (a) the nature and level of the risks to which it is or might be exposed;
 - (b) the risk in the *overall financial adequacy rule*; and
 - (c) the risk that the *firm* might not be able to meet its *CRR* in the future; and
- (2) that enable it to identify and manage the major sources of risks referred to in (1), including the major sources of risk in each of

the following categories where they are relevant to the *firm* given the nature and scale of its business:

- (a) credit risk;
- (b) *market risk*;
- (c) *liquidity risk*;
- (d) *operational risk*;
- (e) insurance risk;
- (f) concentration risk;
- (g) residual risk;
- (h) *securitisation risk*;
- (i) business risk;
- (j) interest rate risk (including, in the case of a *BIPRU firm*, interest rate risk in the *non-trading book*);
- (k) pension obligation risk ; and
- (l) group risk.

1.2.31

FCA PRA

R

- (1) This *rule* defines some of the terms used in the *overall Pillar 2 rule*.
- (2) Residual risk means the risk that *credit risk mitigation* techniques used by the *firm* prove less effective than expected.
- (3) *Securitisation risk* includes the risk that the *capital resources* held by a *firm* in respect of assets which it has *securitised* are inadequate having regard to the economic substance of the transaction, including the degree of risk transfer achieved.
- (4) Business risk means any risk to a *firm* arising from changes in its business, including the risk that the *firm* may not be able to carry out its business plan and its desired strategy. It also includes risks arising from a *firm's remuneration policy* (see also the *Remuneration Code* which applies to *BIPRU firms* and the detailed application of which is set out in ■ SYSC 19A.1) .
- (5) Pension obligation risk is the risk to a *firm* caused by its contractual or other liabilities to or with respect to a pension scheme (whether established for its employees or those of a related *company* or otherwise). It also means the risk that the *firm* will make payments or other contribution to or with respect to a pension scheme because of a moral obligation or because the *firm* considers that it needs to do so for some other reason.

1.2.32

FCA PRA

G

- (1) This paragraph gives *guidance* on some of the terms used in the *overall Pillar 2 rule*.
- (2) Insurance risk refers to the inherent uncertainties as to the occurrence, amount and timing of insurance liabilities.
- (3) Interest rate risk in the *non-trading book* is explained in ■ BIPRU 2.3 (Interest rate risk in the non-trading book).
- (4) In a narrow sense, business risk is the risk to a *firm* that it suffers losses because its income falls or is volatile relative to its fixed cost base. However, in a broader sense, it is exposure to a wide range of macro-economic, geopolitical, industry, regulatory and other external risks that might deflect a *firm* from its desired strategy and business plan. ■ GENPRU 1.2.73 G provides further *guidance* on business risk.
- (5) Further material on pension obligation risk can be found in ■ GENPRU 1.2.79 G - ■ GENPRU 1.2.86 G.
- (6) Group risk is the risk that the financial position of a *firm* may be adversely affected by its relationships (financial or non-financial) with other entities in the same *group* or by risks which may affect the financial position of the whole *group*, for example reputational contagion. Further *guidance* on group risk can be found in ■ GENPRU 1.2.87 G to ■ GENPRU 1.2.91 G.

1.2.33

FCA PRA

R

- (1) This *rule* amplifies some of the obligations in the *overall Pillar 2 rule*.
- (2) In the case of a *BIPRU firm* the processes, strategies and systems relating to concentration risk must include those necessary to ensure compliance with ■ BIPRU 10 (*Large exposures* requirements).
- (3) As part of its obligations in respect of *market risk*, a *BIPRU firm* must consider whether the value adjustments and provisions taken for *positions* and portfolios in the *trading book* enable the *firm* to sell or hedge out its *positions* within a short period without incurring material losses under normal market conditions.
- (4) The processes, strategies and systems required by the *overall Pillar 2 rule* must take into account stress tests and scenario analyses that the *firm* is required to carry out under any other provision of the *Handbook*.

1.2.34

FCA PRA

G

In the *overall Pillar 2 rule*, internal capital refers to the financial resources of a *firm* which it treats as being held against the risks listed in the *overall Pillar 2 rule*. The obligation in that *rule* to assess the distribution of such capital refers, in relation to a *firm* making an assessment on a solo basis, for example, to the need to take account of circumstances where part of a *firm's* financial resources are held by a *branch* of that *firm* which are subject to restrictions on its ability to transfer that capital. An assessment of internal capital distribution might also take account of such of a *firm's* financial resources as may be ring-fenced in the event of its insolvency.

- 1.2.35** **R** The processes, strategies and systems required by the *overall Pillar 2 rule* must be comprehensive and proportionate to the nature, scale and complexity of the *firm's* activities.
FCA **PRA**
- 1.2.36** **R** As part of its obligations under **■ GENPRU 1.2.30 R (1)** (Main requirement relating to risk processes, strategies and systems), a *firm* must identify separately the amount of *tier one capital*, *tier two capital*, *tier three capital*, other capital eligible to form part of its *capital resources* and each category of capital (if any) that is not eligible to form part of its *capital resources* which it considers adequate for the purposes described in **■ GENPRU 1.2.30 R (1)**.
FCA **PRA**
- 1.2.37** **R** The processes and systems required by the *overall Pillar 2 rule* must:
FCA **PRA**
- (1) include an assessment of how the *firm* intends to deal with each of the major sources of risk identified in accordance with **■ GENPRU 1.2.30 R (2)**;
 - (2) take into account the impact of diversification effects and how such effects are factored into the *firm's* systems for measuring and managing risks; and
 - (3) include an assessment of the *firm-wide* impact of the risks identified in accordance with **■ GENPRU 1.2.30 R (2)**, to which end a *firm* must aggregate the risks across its various business lines and units, making appropriate allowance for the correlation between risks.
- 1.2.38** **G** Certain risks such as systems and controls weaknesses may not be adequately addressed by, for example, holding additional capital and a more appropriate response would be to rectify the weakness. In such circumstances, the amount of financial resources required to address these risks might be zero. However, a *firm* should consider whether holding additional capital might be an appropriate response until the identified weaknesses are rectified. A *firm*, should, in accordance with **■ GENPRU 1.2.60 R** (Documentation of risk assessments), document the approaches taken to manage these risks.
FCA **PRA**
- 1.2.39** **R** A *firm* must:
FCA **PRA**
- (1) carry out regularly the assessments required by the *overall Pillar 2 rule*; and
 - (2) carry out regularly assessments of the processes, strategies and systems required by the *overall Pillar 2 rule* to ensure that they remain compliant with **■ GENPRU 1.2.35 R**.
- 1.2.40** **G** A *firm* should carry out assessments of the sort described in the *overall Pillar 2 rule* and **■ GENPRU 1.2.39 R** at least annually, or more frequently if changes in the business, strategy, nature or scale of its activities or operational environment suggest that the current level of financial resources is no longer adequate. The appropriateness of the
FCA **PRA**

internal process, and the degree of involvement of senior management in the process, will be taken into account by the *appropriate regulator* when reviewing a *firm's* assessment as part of the *appropriate regulator's* own assessment of the adequacy of a *firm's* financial resources. The processes and systems should ensure that the assessment of the adequacy of a *firm's* financial resources is reported to its senior management as often as is necessary.

1.2.41

PRA

G

The assessments undertaken by *firms in run-off* may not need to be as comprehensive or frequent compared to a *firm* not in run off since this may better reflect the reduced nature and complexity of its business and reduced access to new capital. Whilst a *firm in run-off* will still need to carefully monitor the progress of the run off, a more comprehensive assessment may only be appropriate on commencement of the run off or when considering a reduction in capital through the payment of a dividend or other capital distribution or if the *firm's* circumstances change materially.

Stress and scenario tests

1.2.42

FCA PRA

R

- (1) As part of its obligation under the *overall Pillar 2 rule*, a *firm* must, for the major sources of risk identified in accordance with ■ GENPRU 1.2.30 R (2), carry out stress tests and scenario analyses that are appropriate to the nature, scale and complexity of those major sources of risk and to the nature, scale and complexity of the *firm's* business.
 - (a) [deleted]
 - (b) [deleted]
 - (i) [deleted]
 - (ii) [deleted]
 - (iii) [deleted]
 - (iv) [deleted]
- (2) In carrying out the stress tests and scenario analyses in (1), a *firm* must identify an appropriate range of adverse circumstances of varying nature, severity and duration relevant to its business and risk profile and consider the exposure of the *firm* to those circumstances, including:
 - (a) circumstances and events occurring over a protracted period of time;
 - (b) sudden and severe events, such as market shocks or other similar events; and
 - (c) some combination of the circumstances and events described in (a) and (b), which may include a sudden and severe market event followed by an economic recession.
- (3) In carrying out the stress tests and scenario analyses in (1), the *firm* must estimate the financial resources that it would need in

order to continue to meet the *overall financial adequacy rule* and the *CRR* in the adverse circumstances being considered.

- (4) In carrying out the stress tests and scenario analyses in (1), the *firm* must assess how risks aggregate across business lines or units, any material non-linear or contingent risks and how risk correlations may increase in stressed conditions.
- (5) As part of its obligation under the *overall Pillar 2 rule*, a *BIPRU firm* must also incorporate and take into account any stress tests and scenario analyses that it is required to carry out under *BIPRU*. In particular, a *BIPRU firm* with an *IRB permission* must incorporate and take into account the stress test required to be carried out under ■ BIPRU 4.3.40 R (2).

1.2.42A

FCA PRA

G

In order to comply with the *general stress and scenario testing rule*, a *firm* should undertake a broad range of stress tests which reflect a variety of perspectives, including sensitivity analysis, scenario analysis and stress testing on an individual portfolio as well as a *firm-wide* level.

1.2.42B

FCA PRA

G

A *BIPRU firm* with an *IRB permission* which has any material credit *exposures* excluded from its *IRB* models should also include these *exposures* in its stress and scenario testing to meet its obligations under the *general stress and scenario testing rule*. A *BIPRU firm* without an *IRB permission*, or an *insurer* that has any material credit and counterparty credit risk exposures, should conduct analyses to assess risks to the credit quality of its counterparties, including any protection sellers, considering both on and off-balance sheet exposures.

1.2.42C

PRA

G

An *insurer* may choose to carry out its *ICA* through the use of stress testing and scenario analyses (see ■ INSPRU 7.1.10 G and ■ INSPRU 7.1.68 G). If it does so, in carrying out the stress tests and scenario analyses referred to in ■ GENPRU 1.2.42 R, an *insurer* should take into account the stress tests it uses for its *ICA*.

1.2.42D

FCA PRA

G

In carrying out the stress tests and scenario analyses required by ■ GENPRU 1.2.42R (1), a *firm* should also consider any impact of the adverse circumstances on its *capital resources*. In particular, a *firm* should consider the *capital resources gearing rules* where its *tier one capital* is eroded by the event.

1.2.42E

FCA PRA

G

A *firm* should assign adequate resources, including IT systems, to stress testing and scenario analysis, taking into account the stress testing techniques employed, so as to be able to accommodate different and changing stress tests at an appropriate level of granularity.

1.2.42F

FCA PRA

G

■ GENPRU 1.2.63 G to ■ GENPRU 1.2.78 G provide additional *guidance* on stress testing and scenario analyses. In particular, ■ GENPRU 1.2.73A G provides specific *guidance* on capital planning.

1.2.43

FCA PRA

G

Stress tests and scenario analyses should be carried out at least annually. A *firm* should, however, consider whether the nature of the major sources of risks identified by it in accordance with ■ GENPRU 1.2.30 R (2) (Main requirement relating to risk processes, strategies and systems) and their possible impact on its financial resources suggest that such tests and analyses should be carried out more frequently. For instance, a sudden change in the economic outlook may prompt a *firm* to revise the parameters of some of its stress tests and scenario analyses. Similarly, if a *firm* has recently become exposed to a particular sectoral concentration, it may wish to add some stress tests and scenario analyses in order to reflect that concentration. ■ SYSC 11.1.21 E is an *evidential provision* relating to the *general stress and scenario testing rule* concerning scenario analysis in relation to *liquidity risk*.

Application of this section on a solo and consolidated basis: General

1.2.44

FCA PRA

G

- (1) ■ GENPRU 1.2.45 R - ■ GENPRU 1.2.56 G explain when the *ICAAP rules* apply on a solo basis and when they apply on a consolidated basis. This material also explains how the *ICAAP rules* are adjusted to apply on a consolidated basis.
- (2) ■ GENPRU 1.2.57 R - ■ GENPRU 1.2.59 R provide that the *overall financial adequacy rule* always applies on a solo basis. They also explain when and how it applies on a consolidated basis.

Application of this section on a solo and consolidated basis: Processes and tests

1.2.45

PRA

R

If an *insurer* is a member of an *insurance group* and ■ INSPRU 6.1.9 R, ■ INSPRU 6.1.10 R or ■ INSPRU 6.1.15 R (Requirement to maintain group capital) apply to it with respect to that *insurance group* the *ICAAP rules*:

- (1) apply to that *insurer* on a consolidated basis; and
- (2) do not apply to it on a solo basis.

1.2.46

FCA PRA

R

The *ICAAP rules* do not apply on a solo basis to a *BIPRU firm* to which the *ICAAP rules*:

- (1) apply on a consolidated basis under ■ BIPRU 8.2.1 R (Basic consolidation rule for a UK consolidation group); or
- (2) apply on a sub-consolidated basis under ■ BIPRU 8.3.1 R (Basic consolidation rule for a non-EEA sub-group).

1.2.47

FCA PRA

R

The *ICAAP rules* apply on a solo basis:

- (1) to an *insurer* to which those *rules* do not apply on a consolidated basis under ■ GENPRU 1.2.45 R;
- (2) to a *BIPRU firm* to which those *rules* do not apply on a consolidated or sub-consolidated basis as referred to in ■ GENPRU 1.2.46 R (including a *BIPRU investment firm* with an *investment firm consolidation waiver*); and

1.2.48

FCA PRA

R

The requirements of the *ICAAP rules* as they apply on a consolidated basis must be carried out on the basis of the consolidated position of:

- (3) a *firm* referred to in ■ GENPRU 1.2.2 R (Application of this section to certain non-EEA firms).
- (1) (if ■ GENPRU 1.2.45 R applies) that *insurance group*;
 - (2) (if ■ BIPRU 8.2.1 R (Basic consolidation rule for a UK consolidation group) applies) the *UK consolidation group* of which the *firm* is a member; and
 - (3) (if ■ BIPRU 8.3.1 R (Basic consolidation rule for a non-EEA sub-group) applies) the non-EEA *sub-group* of which the *firm* is a member.

1.2.49

FCA PRA

R

- (1) In accordance with the general principles in ■ GENPRU 1.2.48 R and ■ BIPRU 8 (Group risk - consolidation), for the purpose of the *ICAAP rules* as they apply on a consolidated basis:
 - (a) the *firm* must ensure that the relevant group as defined in (2) have the processes, strategies and systems required by the *overall Pillar 2 rule*;
 - (b) the risks to which the *overall Pillar 2 rule* and the *general stress and scenario testing rule* refer are those risks as they apply to each member of the relevant group;
 - (c) the reference in the *overall Pillar 2 rule* to amounts and types of financial resources, *capital resources* and internal capital (referred to in this *rule* as resources) must be read as being to the amounts and types that the *firm* considers should be held by the members of the relevant group as defined in (2);
 - (d) other references to resources must be read as being to resources of the members of the relevant group as defined in (2);
 - (e) references to the *CRR* are to the consolidated capital requirements applicable to the relevant group under ■ BIPRU 8 (Group risk - consolidation) or, as the case may be, ■ INSPRU 6 (Group risk: Insurance groups);
 - (f) the reference in the *overall Pillar 2 rule* to the distribution of resources must be read as including a reference to the distribution between members of the relevant group as defined in (2); and
 - (g) the reference in the *overall Pillar 2 rule* to the *overall financial adequacy rule* must be read as being to that *rule*

as adjusted under ■ GENPRU 1.2.59 R (Application of the *overall financial adequacy rule* on a consolidated basis).

- (2) For the purpose of this *rule* the relevant group is the group referred to in ■ GENPRU 1.2.48 R and the members of that group are those *undertakings* that are included in the scope of consolidation with respect to the *insurance group, UK consolidation group* or, as the case may be, *non-EEA sub-group* in question.

1.2.50

FCA PRA

G

■ GENPRU 1.2.49 R means that non-financial members of the *firm's* group are excluded from the *group* assessment. Notwithstanding the scope of ■ GENPRU 1.2.49 R, a *firm* should nevertheless take account of risks arising from the activities of those excluded members in its overall assessment of risk.

1.2.51

FCA PRA

R

- (1) This *rule* relates to the assessment of the amounts, types and distribution of financial resources, *capital resources* and internal capital (referred to in this *rule* as "resources") under the *overall Pillar 2 rule* as applied on a consolidated basis and to the assessment of diversification effects as referred to in ■ GENPRU 1.2.37 R (2) as applied on a consolidated basis.

- (2) A *firm* must be able to explain how it has aggregated the risks referred to in the *overall Pillar 2 rule* and the resources required by each member of the relevant group as referred to in ■ GENPRU 1.2.49 R (2) and how it has taken into account any diversification benefits with respect to the group in question.

- (3) In particular, to the extent that the transferability of resources affects the assessment in (2), a *firm* must be able to explain how it has satisfied itself that resources are transferable between members of the group in question in the stressed cases and the scenarios referred to in the *general stress and scenario testing rule*.

1.2.52

FCA PRA

R

- (1) A *firm* must allocate the total amount of financial resources, *capital resources* and internal capital identified as necessary under the *overall Pillar 2 rule* (as applied on a consolidated basis) between different parts of the relevant group (as defined in ■ GENPRU 1.2.49 R). ■ GENPRU 1.2.36 R (Identifying different tiers of capital) does not apply to this allocation.

- (2) The *firm* must carry out the allocation in (1) in a way that adequately reflects the nature, level and distribution of the risks to which the group is subject and the effect of any diversification benefits.

1.2.53

FCA PRA

R

A *firm* must also allocate the total amount of financial resources, *capital resources* and internal capital (referred to in this *rule* as "resources") identified as necessary under the *overall Pillar 2 rule* as applied on a

consolidated basis between each *firm* which is a member of the relevant group (as defined in ■ GENPRU 1.2.49 R) on the following basis:

- (1) the amount allocated to each *firm* must be decided on the basis of the principles in ■ GENPRU 1.2.52 R (2); and
- (2) if the process in (1) were carried out for each group member, the total so allocated would equal the total amount of resources identified as necessary under the *overall Pillar 2 rule* as applied on a consolidated basis.

1.2.54

FCA PRA

G

A *firm* to which the *ICAAP rules* apply on a consolidated basis need not prepare a consolidated basis assessment if such an assessment has been prepared by another member of its *group*. Where that is the case, a *firm* may adopt such an assessment as its own. A *firm* nevertheless remains responsible for the assessment.

1.2.55

FCA PRA

G

The purpose of ■ GENPRU 1.2.51 R - ■ GENPRU 1.2.53 R is to enable the *appropriate regulator* to assess the extent, if any, to which a *firm's* assessment, calculated on a consolidated basis, is lower than it would be if each separate legal entity were to assess the amount of capital it would require to mitigate its risks (to the same level of confidence) were it not part of a group subject to consolidated supervision under ■ BIPRU 8 (Group risk - consolidation) or ■ INSPRU 6.1 (Group risk: Insurance groups). The reason the *appropriate regulator* wishes to make this assessment is so that individual capital *guidance* which it gives is fair and comparable as between different *firms* and groups. Group diversification benefits which a *firm* might assert exist can be a material consideration in a capital adequacy assessment. Understanding the methods used to aggregate the different risks (for example, the correlation assumptions) is crucial to a proper evaluation of such benefits.

1.2.56

FCA PRA

G

Whereas a single legal entity can generally use its capital to absorb losses wherever they arise, there are often practical and legal restrictions on the ability of a group to do so. For instance:

- (1) capital which is held by overseas regulated *firms* may not be capable of being remitted to a *firm* in the *UK* which has suffered a loss;
- (2) a *firm* which is insolvent or likely to become so may be obliged to look to the interests of its creditors first before transferring capital to other group *companies*; and
- (3) a parent *company* may have to balance the interests of its shareholders against the protection of the creditors of a *subsidiary undertaking* which is or might become insolvent and may, rationally, conclude that a *subsidiary undertaking* should be allowed to fail rather than provide capital to support it.

Application of this section on a solo and consolidated basis: Adequacy of resources

1.2.57

FCA PRA

R

The *overall financial adequacy rule* applies to a *firm* on a solo basis whether or not it also applies to the *firm* on a consolidated basis.

1.2.58

FCA PRA

R

The *overall financial adequacy rule* applies to a *firm* on a consolidated basis if the *ICAAP rules* apply to it on a consolidated basis.

1.2.59

FCA PRA

R

- (1) When the *overall financial adequacy rule* applies on a consolidated basis, the *firm* must ensure that at all times its group maintains overall financial resources, including capital resources and liquidity resources, which are adequate, both as to amount and quality, to ensure that there is no significant risk that the liabilities of any members of its group cannot be met as they fall due.
- (2) The group referred to in (1) is the relevant group as defined in ■ GENPRU 1.2.49 R.
- (3) The members of the group referred to in (1) must be identified in accordance with ■ GENPRU 1.2.49 R.

Documentation of risk assessments

1.2.60

FCA PRA

R

A *firm* must make a written record of the assessments required under this section. These assessments include assessments carried out on a consolidated basis and on a solo basis. In particular it must make a written record of:

- (1) the major sources of risk identified in accordance with ■ GENPRU 1.2.30 R (2) (Main requirement relating to risk processes, strategies and systems);
- (2) how it intends to deal with those risks; and
- (3) details of the stress tests and scenario analyses carried out, including any assumptions made in relation to scenario design, and the resulting financial resources estimated to be required in accordance with the *general stress and scenario testing rule*.

1.2.61

FCA PRA

R

A *firm* must retain the records of its assessments referred to in ■ GENPRU 1.2.60 R for at least three years.

1.2.62

FCA PRA

G

Where a *firm* assesses the adequacy of its *CRR* in its particular circumstances in accordance with ■ BIPRU 2.2 (Internal capital adequacy standards) and ■ INSPRU 7.1 (Individual capital assessment) as a basis for deciding what financial resources are adequate, it should include this in the documentation produced in accordance with ■ GENPRU 1.2.60 R.

Additional guidance on stress tests and scenario analyses

1.2.63

FCA PRA

G

The *general stress and scenario testing rule* requires a *firm* to carry out stress tests and scenario analyses as part of its obligations under the *overall Pillar 2 rule*. Both stress tests and scenario analyses are undertaken by a *firm* to further a better understanding of the vulnerabilities that it faces under adverse conditions. They are based on the analysis of the impact of a range of events of varying nature, severity and duration . These events can be financial, operational or legal or relate to any other risk that might have an economic impact on the *firm*.

<p>1.2.64 FCA PRA</p>	<p>G</p>	<p>Stress testing typically refers to shifting the values of individual parameters that affect the financial position of a <i>firm</i> and determining the effect on the <i>firm's</i> financial position.</p>
<p>1.2.65 FCA PRA</p>	<p>G</p>	<p>Scenario analysis typically refers to a wider range of parameters being varied at the same time. Scenario analyses often examine the impact of adverse events on the <i>firm's</i> financial position, for example, simultaneous movements in a number of risk categories affecting all of a <i>firm's</i> business operations, such as business volumes, investment values and interest rate movements.</p>
<p>1.2.66 FCA PRA</p>	<p>G</p>	<p>There are three broad purposes of stress testing and scenario analysis. Firstly, it can be used as a means of quantifying how much capital might be absorbed if an adverse event or events occurred. As such it represents a simple 'what if' approach to estimating exposure to risks. This might be a proportionate approach to risk management for an unsophisticated business. Secondly, it can be used to provide a check on the outputs and accuracy of risk models; particularly, in identifying non-linear effects when aggregating risks. Thirdly, it can be used to explore the sensitivities in longer term business plans and how capital needs might change over time.</p>
<p>1.2.67</p>	<p>G</p>	<p>[deleted]</p>
<p>1.2.68 FCA PRA</p>	<p>G</p>	<p>Subject to ■ GENPRU 1.2.76 G, the purpose of stress tests and scenario analyses under the <i>general stress and scenario testing rule</i> is to test the adequacy of overall financial resources. Scenarios need only be identified, and their impact assessed, in so far as this facilitates that purpose. In particular, the nature, depth and detail of the analysis depend, in part, upon the <i>firm's</i> capital strength and the robustness of its risk prevention and risk mitigation measures.</p>
<p>1.2.69 FCA PRA</p>	<p>G</p>	<p>Both stress testing and scenario analyses are forward-looking analysis techniques, which seek to anticipate possible losses that might occur if an identified risk crystallises. In applying them, a <i>firm</i> should decide how far forward to look. This should depend upon:</p> <ol style="list-style-type: none"> (1) how quickly it would be able to identify events or changes in circumstances that might lead to a risk crystallising resulting in a loss; and (2) after it has identified the event or circumstance, how quickly and effectively it could act to prevent or mitigate any loss resulting from the risk crystallising and to reduce exposure to any further adverse event or change in circumstance.
<p>1.2.70 FCA PRA</p>	<p>G</p>	<p>Where a firm is exposed to <i>market risk</i>, the time horizon over which stress tests and scenario analyses should be carried out will depend on, among other things, the maturity and liquidity of the <i>positions</i> stressed. For example, for the <i>market risk</i> arising from the holding of investments, this will depend upon:</p> <ol style="list-style-type: none"> (1) the extent to which there is a regular, open and transparent market in those assets, which would allow fluctuations in the value of the investment to be more readily and quickly identified; and

- (2) the extent to which the market in those assets is sufficiently liquid (and would remain liquid in the changed circumstances contemplated in the stress test or scenario analysis) to allow the *firm*, if needed, to sell, hedge or otherwise mitigate the risks relating to its holding so as to prevent or reduce exposure to future price fluctuations. In devising stress tests and scenario analyses for *market risk*, a *BIPRU firm* should also take into account ■ BIPRU 7.1.17 R to ■ BIPRU 7.1.20 G.

1.2.71

FCA PRA

G

In identifying scenarios, and assessing their impact, a *firm* should take into account, where material, how changes in circumstances might impact upon:

- (1) the nature, scale and mix of its future activities; and
- (2) the behaviour of *counterparties*, and of the *firm* itself, including the exercise of choices (for example, options embedded in financial instruments or *contracts of insurance*).

1.2.72

FCA PRA

G

In determining whether it would have adequate financial resources in the event of each identified realistic adverse scenario, a *firm* should:

- (1) only include financial resources that could reasonably be relied upon as being available in the circumstances of the identified scenario; and
- (2) take account of any legal or other restriction on the use of financial resources.

1.2.73

G

- (1A) [deleted]
- (2) [deleted]
- (3) [deleted]
- (4) [deleted]
- (5) [deleted]

Capital planning

1.2.73A

FCA PRA

G

- (1) In identifying an appropriate range of adverse circumstances and events in accordance with ■ GENPRU 1.2.42R (2):
 - (a) a *firm* will need to consider the cycles it is most exposed to and whether these are general economic cycles or specific to particular markets, sectors or industries;
 - (b) for the purposes of ■ GENPRU 1.2.42R (2)(a), the amplitude and duration of the relevant cycle should include a severe downturn scenario based on forward looking hypothetical events, calibrated against the most adverse movements in individual risk drivers experienced over a long historical period;
 - (c) the adverse scenarios considered should in general be acyclical and, accordingly, the scenario should not become more severe during a downturn

- and less severe during an upturn. However, the *appropriate regulator* does expect scenarios to be updated with relevant new economic data on a pragmatic basis to ensure that the scenario continues to be relevant; and
- (d) the adverse scenarios considered should reflect a *firm's* risk tolerance of the adverse conditions through which it expects to remain a going concern.
- (2) In making the estimate required by ■ GENPRU 1.2.42R (3), a *firm* should project both its *capital resources* and its required *capital resources* over a time horizon of 3 to 5 years, taking account of its business plan and the impact of relevant adverse scenarios. In making the estimate, the *firm* should consider both the *capital resources* required to meet its *CRR* and the *capital resources* needed to meet the *overall financial adequacy rule*. The *firm* should make these projections in a manner consistent with its risk management processes and systems as set out in ■ GENPRU 1.2.37 R.
- (3) In projecting its financial position over the relevant time horizon, the *firm* should:
- (a) reflect how its business plan would "flex" in response to the adverse events being considered, taking into account factors such as changing consumer demand and changes to new business assumptions;
- (b) consider the potential impact on its stress testing of dynamic feedback effects and second order effects of the major sources of risk identified in accordance with ■ GENPRU 1.2.30R (2);
- (c) estimate the effects on the *firm's* financial position of the adverse event without adjusting for management actions;
- (d) separately, identify any realistic management actions that the *firm* could and would take to mitigate the adverse effects of the stress scenario; and
- (e) estimate the effects of the stress scenario on the *firm's* financial position after taking account of realistic management actions.
- (4) A *firm* should identify any realistic management actions intended to maintain or restore its capital adequacy. These could include ceasing to transact new business after a suitable period has elapsed, balance sheet shrinkage, restricting distribution of profits or raising additional capital. A *firm* should reflect management actions in its projections only where it could and would take such actions, taking account of factors such as market conditions in the stress scenario and any effects upon the *firm's* reputation with its counterparties and investors. The combined effect on capital and retained earnings should be estimated. In order to assess whether prospective management actions in a stress scenario would be realistic and to determine which actions the *firm* would and could take, the *firm* should take into account any preconditions that might affect the value of management actions as risk mitigants and analyse the difference between the estimates in (3)(c) and (3)(e) in sufficient detail to understand the implications of taking different management actions at different times, particularly where they represent a significant divergence from the *firm's* business plan.
- (5) The *firm* should document its stress testing and scenario analysis policies and procedures, as well as the results of its tests in accordance with

■ GENPRU 1.2.60 R. These records should be included within the *firm's ICAAP* or *ICA* submission document.

- (6) The *appropriate regulator* will review the *firm's* records referred to in (5) as part of its *SREP*. The purpose of examining these is to enable the *appropriate regulator* to judge whether a *firm* will be able to continue to meet its *CRR* and the *overall financial adequacy rule* throughout the projection period.
- (7) If, after taking account of realistic management actions, a *firm's* stress testing management plan shows that the *firm's* projected *capital resources* are less than those required to continue to meet its *CRR* or less than those needed to continue to meet the *overall financial adequacy rule* over the projection period, the *appropriate regulator* may require the *firm* to set out additional countervailing measures and off-setting actions to reduce such difference or to restore the *firm's* capital adequacy after the stress event.
- (8) The *firm's* senior management or *governing body* should be actively involved and engaged in all relevant stages of the *firm's* stress testing and scenario analysis programme. This would include establishing an appropriate stress testing programme, reviewing the programme's implementation (including the design of scenarios) and challenging, approving and actioning the results of the stress tests.
- (9) [deleted]

1.2.73B

FCA PRA

G

The *appropriate regulator* may formulate macroeconomic and financial market scenarios which a *firm* may use as an additional input to its *ICAAP* or *ICA* submission. In addition, the *appropriate regulator* may also ask a *firm* to apply specific scenarios directly in its *ICAAP* or *ICA* submission.

1.2.73C

FCA PRA

G

For an *insurer*:

- (1) the treatment of new business when making capital projections is likely to be different from its *ICA*. In projecting its financial position, an *insurer* should take account of new business based on the *firm's* business plan, but flexed to take account of potential changes in trading conditions and strategy. When assessing its current capital adequacy under its *ICA*, an *insurer* should take account of the effects of closure to new business (see , and and to). Also, an *insurer* may use methods that are more approximate than used for its *ICA* (for example, in projecting the *with-profits insurance capital component* for *realistic basis life firms* and the *capital resources* needed to meet the *overall financial adequacy rule*); and
- (2) where management discretion is exercised as a normal part of an *insurer's* business (for example, in changing bonus rates or *surrender values* in accordance with the *PPFM* for *with-profits business*), under ■ GENPRU 1.2.73AG (3)(c) the *insurer* does not need to estimate the effect of an adverse event on its financial position without adjusting for such changes. However, the effect on the financial position of varying such actions should be estimated and understood.

1.2.74

FCA PRA

G

A *firm* may consider scenarios in which expected future profits will provide capital reserves against future risks. However, it would only be appropriate to take into account profits that can be foreseen with a reasonable degree of certainty as arising before the risk against

which they are being held could possibly arise. In estimating future reserves, a *firm* should deduct future dividend payment estimates from projections of future profits.

1.2.75

FCA PRA

G

- (1) [deleted]
- (2) Stress and scenario analyses should, in the first instance, be aligned with the risk appetite of the *firm*, as well as the nature, scale and complexity of its business and of the risks that it bears. The calibration of the stress and scenario analyses should be reconciled to a clear statement setting out the premise upon which the *firm's* internal capital assessment under the *overall Pillar 2 rule* is based.
- (3) [deleted]
- (4) In identifying adverse circumstances and events in accordance with ■ GENPRU 1.2.42R (2), a *firm* should consider the results of any reverse stress testing conducted in accordance with ■ SYSC 20. Reverse stress testing may be expected to provide useful information about the *firm's* vulnerabilities and variations around the most likely ruin scenarios for the purpose of meeting the *firm's* obligations under ■ GENPRU 1.2.42 R. In addition, such a comparison may help a *firm* to assess the sensitivity of its financial position to different stress calibrations.

1.2.76

FCA PRA

G

A *firm* should use the results of its stress testing and scenario analysis not only to assess capital needs, but also to decide if measures should be put in place to minimise the adverse effect on the *firm* if the risk covered by the stress or scenario test actually materialises. Such measures might be a contingency plan or might be more concrete risk mitigation steps.

1.2.77

FCA PRA

G

Additional *guidance* on stress tests and scenario analyses for the assessment of *capital resources* is available in ■ BIPRU 2.2 (Internal capital adequacy standards) and ■ INSPRU 7.1 (Individual capital assessment).

1.2.78

FCA PRA

G

Additional *guidance* in relation to stress tests and scenario analysis for *liquidity risk* as that concept relates to an *insurer* is available in ■ SYSC 11 (Liquidity risk systems and controls). ■ BIPRU 12 sets out the main *Handbook* provisions in relation to *liquidity risk* for a *BIPRU firm*.

Pension obligation risk

1.2.79

FCA PRA

G

■ GENPRU 1.2.80 G to ■ GENPRU 1.2.86 G contain *guidance* on the assessment required by ■ GENPRU 1.2.30 R (2)(k) for a *firm* exposed to pension obligation risk as defined in ■ GENPRU 1.2.31R (5).

1.2.80

FCA PRA

G

The pension scheme itself (i.e. the scheme's assets and liabilities) is not the focus of the risk assessment but rather the *firm's* obligations towards the pension scheme. A *firm* should include in its estimate of financial resources both its expected obligations to the pension scheme and any increase in obligations that may arise in a stress scenario.

1.2.81

FCA PRA

G

If a *firm* has a current funding obligation in excess of normal contributions or there is a risk that such a funding obligation will arise then, when calculating available capital resources, it should reverse out any accounting deficit and replace this in its capital adequacy assessment with its best estimate, calculated in discussion with the scheme's actuaries or trustees, of the cash that will need to be paid into the scheme in addition to normal contributions over the foreseeable future. This may differ from the approach taken in assessing pension scheme risks for the purposes of calculating resources to meet the CRR, where a *firm* may not need to consider funding obligations beyond the next five years.

1.2.82

FCA PRA

G

A *firm* should also assess the risks that may increase its current funding obligations towards the pension scheme and that might lead to the *firm* not being able to pay its other liabilities as they fall due.

1.2.83

FCA PRA

G

A *firm* may wish to consider the following scenarios:

- (1) one in which the *firm* gets into difficulties with an effect on its ability to fund the pension scheme; and
- (2) one in which the pension scheme position deteriorates (for example, because investment returns fall below expected returns or because of increases in life expectancy) with an effect on the *firm's* funding obligations; taking into account the management actions the *firm* could and would take.

1.2.83A

FCA PRA

G

A *firm* is expected to determine where the scope of any stress test impacts upon its pension obligation risk and estimate how the relevant measure of pension obligation risk will change in the scenario in question. For example, in carrying out stress tests under ■ GENPRU 1.2.42 R a *firm* must consider how a stress scenario, such as an economic recession, would impact on the *firm's* current obligations towards its pension scheme and any potential increase in those obligations. Risks such as interest rate risk or reduced investment returns may have a direct impact on a *firm's* financial position as well as an indirect impact resulting from an increase in the *firm's* pension scheme obligations. Both effects should be taken into account in a *firm's* estimate of financial resources under

■ GENPRU 1.2.30 R.

1.2.84

FCA PRA

G

Scenarios in which a *firm's* employees suffer a loss or members of a pension scheme suffer a loss do not necessarily affect the *firm's* ability to pay its liabilities as they fall due.

1.2.85

FCA PRA

G

A *firm* should consider issues such as:

- (1) the extent to which trustees of the pension scheme or a pension regulator (such as the one created under the Pensions Act 2004) can compel a certain level of contributions or a one-off payment in adverse financial situations or in order to meet the minimum legal requirements under the scheme's trust deed and rules or under the applicable laws relating to the pension scheme;
- (2) whether the valuation bases used to set pension scheme contribution rates are consistent with the *firm's* current business plans and anticipated changes in the workforce; and
- (3) which valuation basis is appropriate given the expected investment return on scheme assets and actions the *firm* can take if those returns do not materialise.

1.2.86
FCA PRA

G

A *firm* should carry out analyses only to a degree of sophistication and complexity which is commensurate with the materiality of its pension risks.

Group risk

1.2.87
FCA PRA

G

■ GENPRU 1.2.88G to ■ GENPRU 1.2.91G contain additional *guidance* on the assessment required by ■ GENPRU 1.2.30R (2)(i) (Group risk).

1.2.88
FCA PRA

G

A *firm* should include in the written record referred to in ■ GENPRU 1.2.60 R a description of the broad business strategy of the *insurance group*, the *UK consolidation group* or the *non-EEA sub-group* of which it is a member, the group's view of its principal risks and its approach to measuring, managing and controlling the risks. This description should include the role of stress testing, scenario analysis and contingency planning in managing risk at the solo and consolidated level.

1.2.89
FCA PRA

G

A *firm* should satisfy itself that the systems (including IT) of the *insurance group*, the *UK consolidation group* or the *non-EEA sub-group* of which it is a member are sufficiently sound to support the effective management and, where applicable, the quantification of the risks that could affect the *insurance group*, the *UK consolidation group* or the *non-EEA sub-group*, as the case may be.

1.2.90
FCA PRA

G

In performing stress tests and scenario analyses, a *firm* should take into account the risk that its *group* may have to bring back on to its consolidated balance sheet the assets and liabilities of off-balance sheet entities as a result of reputational contagion, notwithstanding the appearance of legal risk transfer.

1.2.91
FCA PRA

G

A *firm* should carry out stress tests and scenario analyses to a degree of sophistication which is commensurate with the complexity of its group and the nature of its *group* risk.

1.3 Valuation

Application

1.3.1

R

FCA PRA

- (1) This section of the *Handbook* applies to an *insurer*, unless it is:
- non-directive friendly society*;
 - an *incoming EEA firm*; or
 - an *incoming Treaty firm*.
- (2) This section of the *Handbook* applies to a *BIPRU firm*.
- (3) This section of the *Handbook* applies to a *UK ISPV*.

Purpose

1.3.2

G

FCA PRA

This section sets out, for the purposes of *GENPRU*, *BIPRU* and *INSPRU*, *rules* and *guidance* as to how a *firm* should recognise and value assets, liabilities, *exposures*, equity and income statement items.

1.3.3

G

FCA PRA

- (1) In the case of a *BIPRU firm*, this section implements Article 74 of the *Banking Consolidation Directive*, Articles 64(4) and 64(5) of the *Banking Consolidation Directive* (Own funds) and Article 33 and Part B of Annex VII of the *Capital Adequacy Directive*.
- (2) In the case of an *insurer*, ■ GENPRU 1.3.4 R implements the requirements of Articles 23.3(viii) and 24.2(iv) of the *Consolidated Life Directive*.

General requirements: Accounting principles to be applied

1.3.4

R

FCA PRA

Subject to ■ GENPRU 1.3.9 R to ■ GENPRU 1.3.10 R and ■ GENPRU 1.3.36 R, except where a *rule* in *GENPRU*, *BIPRU* or *INSPRU* provides for a different method of recognition or valuation, whenever a *rule* in *GENPRU*, *BIPRU* or *INSPRU* refers to an asset, liability, *exposure*, equity or income statement item, a *firm* must, for the purpose of that *rule*, recognise the asset, liability, *exposure*, equity or income statement item and measure its value in accordance with whichever of the following are applicable:

- (1) the *insurance accounts rules*, or the Friendly Societies (Accounts and Related Provisions) Regulations 1994;

- (2) Financial Reporting Standards and Statements of Standard Accounting Practice issued or adopted by the Accounting Standards Board;
- (3) Statements of Recommended Practice, issued by industry or sectoral bodies recognised for this purpose by the Accounting Standards Board;
- (4) the Building Societies (Accounts and Related Provisions) Regulation 1998;
- (5) *international accounting standards*;
- (6) the Companies Act 1985; and
- (7) the Companies Act 2006;

as applicable to the *firm* for the purpose of its external financial reporting (or as would be applicable if the *firm* was a company with its head office in the *United Kingdom*).

1.3.5

FCA PRA

G

Except where a *rule* in *GENPRU*, *BIPRU* or *INSPRU* makes different provision, ■ GENPRU 1.3.4 R applies whenever a *rule* in *GENPRU*, *BIPRU* or *INSPRU* refers to the value or amount of an asset, liability, *exposure*, equity or income statement item, including:

- (1) whether, and when, to recognise or de-recognise an asset or liability;
- (2) the amount at which to value an asset, liability, *exposure*, equity or income statement item; and
- (3) which description to place on an asset, liability, *exposure*, equity or income statement item.

1.3.6

FCA PRA

G

In particular, unless an exception applies, ■ GENPRU 1.3.4 R should be applied for the purposes of *GENPRU*, *BIPRU* or *INSPRU* to determine how to account for:

- (1) netting of amounts due to or from the *firm*;
- (2) the securitisation of assets and liabilities (see also ■ GENPRU 1.3.7 G);
- (3) leased tangible assets;
- (4) assets transferred or received under a sale and repurchase or *stock lending* transaction; and
- (5) assets transferred or received by way of initial or variation margin under a *derivative* or similar transaction.

1.3.7

PRA

G

In the case of an *insurer* or a *UK ISPV*, where assets or liabilities are securitised, ■ GENPRU 1.3.4 R only permits de-recognition where Financial Reporting Standards (or, where applicable, International Accounting Standards) permit either de-recognition or the linked presentation. However, the *PRA* will consider granting a *waiver* to permit de-recognition in other circumstances provided that the *firm* can demonstrate that securitisation has effectively transferred risk

1.3.8

PRA

G

Articles 23.3(viii) and 24.2(iv) of the *Consolidated Life Directive* require assets of an *insurer* that are managed on its behalf by a *subsidiary undertaking* to be taken into account for the purposes of determining the *insurer's admissible assets* and its assets in excess of concentration limits. The application of ■ GENPRU 1.3.4 R will result in such assets remaining on the balance sheet of the *insurer*.

General requirements: Adjustments to accounting values

1.3.9

FCA PRA

R

For the purposes of *GENPRU*, *BIPRU* or *INSPRU*, except where a *rule* in *GENPRU*, *BIPRU* or *INSPRU* provides for a different method of recognition or valuation:

- (1) when a *firm*, upon initial recognition, designates its liabilities as at fair value through profit or loss, it must always adjust any value calculated in accordance with ■ GENPRU 1.3.4 R by subtracting any unrealised gains or adding back in any unrealised losses which are not attributable to changes in a benchmark interest rate;
- (2) in respect of a *defined benefit occupational pension scheme*:
 - (a) a *firm* must derecognise any *defined benefit asset*;
 - (b) a *firm* may substitute for a *defined benefit liability* the *firm's deficit reduction amount*.

1.3.10

FCA PRA

R

An election made under ■ GENPRU 1.3.9 R (2) must be applied consistently for the purposes of *GENPRU*, *BIPRU* or *INSPRU* in respect of any one financial year.

1.3.11

FCA PRA

G

A *firm* should keep a record of and be ready to explain to its supervisory contacts in the *appropriate regulator* the reasons for any difference between the *deficit reduction amount* and any commitment the *firm* has made in any public document to provide funding in respect of a *defined benefit occupational pension scheme*.

1.3.12

FCA PRA

G

The provisions of ■ GENPRU 1.3.9 R to ■ GENPRU 1.3.10 R and ■ GENPRU 1.3.36 R apply only to the extent that the items referred to in those paragraphs would otherwise be recognised under the accounting requirements applicable to the *firm*. Some of those requirements may only be relevant to a *firm* subject to *international accounting standards*.

General requirements: Methods of valuation and systems and controls

1.3.13

FCA PRA

R

- (1) Except to the extent that *GENPRU*, *BIPRU* or *INSPRU* provide for another method of valuation, ■ GENPRU 1.3.14 R to ■ GENPRU 1.3.34 R (Marking to market, Marking to model,

Independent price verification, Valuation adjustments or, in the case of an insurer or a UK ISPV, valuation adjustments or reserves) apply:

- (a) for the purposes set out in ■ GENPRU 1.3.41 R;
- (b) for the purposes set out in ■ GENPRU 1.3.39 R; and
- (c) to any balance sheet position measured at market value or fair value.

(2) A *firm* must establish and maintain systems and controls sufficient to provide prudent and reliable valuation estimates.

(3) Systems and controls under (2) must include at least the following elements:

- (a) documented policies and procedures for the process of valuation, including clearly defined responsibilities of the various areas involved in the determination of the valuation, sources of market information and review of their appropriateness, frequency of independent valuation, timing of closing prices, procedures for adjusting valuations, month-end and ad-hoc verification procedures, and, in the case of a *BIPRU firm*, guidelines for the use of unobservable inputs reflecting the *firm's* assumptions of what market participants would use in pricing the *position*; and
- (b) reporting lines for the department accountable for the valuation process that are:
 - (i) clear and independent of the front office; and
 - (ii) ultimately to a main board executive director.

General requirements: Marking to market

1.3.14
FCA PRA

R

Wherever possible, a *firm* must use mark to market in order to measure the value of the investments and positions to which this *rule* applies under ■ GENPRU 1.3.13 R and ■ GENPRU 1.3.38 R to ■ GENPRU 1.3.41 R. Marking to market is valuation (on at least a daily basis in the case of the *trading book* positions of a *BIPRU firm*) at readily available close out prices from independent sources.

1.3.15
FCA PRA

R

For the purposes of ■ GENPRU 1.3.14 R, examples of readily available close out prices include exchange prices, screen prices, or quotes from several independent reputable brokers.

1.3.16
FCA PRA

R

(1) When marking to market, a *firm* must use the more prudent side of bid/offer unless the *firm* is a significant market maker in a particular position type and it can close out at the mid-market price.

- (2) When calculating the current *exposure* value of a credit risk *exposure* for *counterparty credit risk* purposes:
 - (a) a *firm* must use the more prudent side of bid/offer or the mid-market price and the *firm* must be consistent in the basis it chooses; and
 - (b) where the difference between the more prudent side of bid/offer and the mid-market price is material, the *firm* must consider making adjustments or, in the case of an *insurer* or a *UK ISPV*, making adjustments or establishing reserves.

General requirements: Marking to model

1.3.17

FCA PRA

R

Where marking to market is not possible, a *firm* must (in the case of a *BIPRU firm*, conservatively) use mark to model in order to measure the value of the investments and positions to which this *rule* applies under ■ GENPRU 1.3.13 R and ■ GENPRU 1.3.38 R to ■ GENPRU 1.3.41 R. Marking to model is any valuation which has to be benchmarked, extrapolated or otherwise calculated from a market input. ■ GENPRU 1.3.18 R to ■ GENPRU 1.3.25 R apply when marking to model.

1.3.18

FCA PRA

R

When the model used is developed by the *firm*, that model must be:

- (1) based on appropriate assumptions which have been assessed and challenged by suitably qualified parties independent of the development process;
- (2) independently tested, including validation of the mathematics, assumptions, and software implementation; and
- (3) (in the case of a *BIPRU firm*) developed or approved independently of the front office.

1.3.19

FCA PRA

R

A *firm* must ensure that its senior management are aware of the positions which are subject to mark to model and understand the materiality of the uncertainty this creates in the reporting of the performance of the business of the *firm* and the risks to which it is subject.

1.3.20

FCA PRA

R

A *firm* must source market inputs in line with market prices so far as possible and assess the appropriateness of the market inputs for the position being valued and the parameters of the model on a frequent basis.

1.3.21

FCA PRA

R

A *firm* must use generally accepted valuation methodologies for particular products where these are available.

1.3.22

FCA PRA

R

A *firm* must establish formal change control procedures, hold a secure copy of the model, and periodically use that model to check valuations.

1.3.23 **R** A *firm* must ensure that its risk management functions are aware of the weaknesses of the models used and how best to reflect those in the valuation output.
FCA **PRA**

1.3.24 **R** A *firm* must periodically review the model to determine the accuracy of its performance.
FCA **PRA**

1.3.25 **R** Examples of periodical review are assessing the continued appropriateness of the assumptions, analysis of profit and loss versus risk factors and comparison of actual close out values to model outputs.
FCA **PRA**

General requirements: Independent price verification

1.3.26 **R** In addition to marking to market or marking to model, a *firm* must perform independent price verification. This is the process by which market prices or model inputs are regularly verified for accuracy and independence.
FCA **PRA**

1.3.27 **G** For independent price verification, where independent pricing sources are not available or pricing sources are more subjective (for example, only one available broker quote), prudent measures such as valuation adjustments may be appropriate.
FCA **PRA**

1.3.28 **R** In the case of the *trading book* positions of a *BIPRU firm*, while daily marking to market may be performed by dealers, verification of market prices and model inputs must be performed by a unit independent of the dealing room, at least monthly (or, depending on the nature of the market/trading activity, more frequently).
FCA **PRA**

General requirements: Valuation adjustments or, in the case of an insurer or a UK ISPV, valuation adjustments or reserves

1.3.29 **R** The recognition of any gains or losses arising from valuations subject to ■ GENPRU 1.3.13 R and ■ GENPRU 1.3.38 R to ■ GENPRU 1.3.41 R must be recognised for the purpose of calculating *capital resources* in accordance with ■ GENPRU 1.3.14 R to ■ GENPRU 1.3.34 R (Marking to market, Marking to model, Independent price verification, Valuation adjustments or, in the case of an insurer or a UK ISPV, valuation adjustments or reserves). However if *GENPRU*, *BIPRU* or *INSPRU* provide for another treatment of such gains or losses, that other treatment must be applied.
FCA **PRA**

1.3.30 **R** A *firm* must establish and maintain procedures for considering valuation adjustments or, in the case of an *insurer* or a *UK ISPV*, valuation adjustments or reserves. These procedures must be compliant with the requirements set out in ■ GENPRU 1.3.33 R.
FCA **PRA**

1.3.31 **R** A *firm* using third-party valuations, or marking to model, must consider whether valuation adjustments are necessary.
FCA **PRA**

1.3.32

FCA PRA

R

A *firm* must consider the need for making adjustments or, in the case of an *insurer* or a *UK ISPV*, establishing reserves for less liquid positions and, on an ongoing basis, review their continued appropriateness in accordance with the requirements set out in ■ GENPRU 1.3.33 R. Less liquid positions could arise from both market events and institution-related situations e.g. concentration positions and/or stale positions.

1.3.33

FCA PRA

R

- (1) This paragraph sets out the requirements referred to in ■ GENPRU 1.3.30 R and ■ GENPRU 1.3.32 R.
- (2) A *firm* must consider the following adjustments or, in the case of an *insurer* or a *UK ISPV*, adjustments or reserves: unearned credit spreads, close-out costs, operational risks, early termination, investing and funding costs, future administrative costs and, where appropriate, model risk.
- (3) (a) In the case of a *BIPRU firm*, a *firm* must establish and maintain procedures for calculating adjustments to the current valuation of less liquid positions. Those adjustments must, where necessary, be in addition to any changes to the value of the position required for financial reporting purposes and must be designed to reflect the illiquidity of the position.
- (b) A *firm* must consider several factors when determining whether a valuation adjustment or, in the case of an *insurer* or a *UK ISPV*, valuation adjustment or reserve is necessary for less liquid positions. These factors include the amount of time it would take to hedge out the position/risks within the position; the average and volatility of bid/offer spreads; the availability of market quotes (number and identity of market makers); the average and volatility of trading volumes; market concentrations; the ageing of positions; the extent to which valuation relies on marking to model and the impact of other model risks.
- (4) With regard to complex products including, but not limited to, *securitisation exposures* and *nth-to-default credit derivatives*, a *BIPRU firm* must explicitly consider the need for valuation adjustments for model risk arising from using a valuation which may be incorrect or the risk from using unobservable calibration parameters in the valuation model.

1.3.34

FCA PRA

R

If the result of making adjustments or, in the case of an *insurer* or a *UK ISPV*, making adjustments or establishing reserves under ■ GENPRU 1.3.29 R to ■ GENPRU 1.3.33 R is a valuation which differs from the fair value determined in accordance with ■ GENPRU 1.3.4 R, a *firm* must reconcile the two valuations.

1.3.35

FCA PRA

G

Reconciliation differences under ■ GENPRU 1.3.34 R should not be reflected in the valuations under ■ GENPRU 1.3 but should be disclosed to the *appropriate regulator* in prudential returns. *Firms* which are subject to the reporting requirement under ■ SUP 16.16 should disclose those reconciliation differences in the Prudent Valuation Return which they are required to submit to the *appropriate regulator* under ■ SUP 16.16.4 R.

1.3.35A

FCA PRA

G

UK banks and BIPRU 730k firms are reminded that they may, in respect of their prudent valuation assessments under ■ GENPRU 1.3.4 R and ■ GENPRU 1.3.14 R to ■ GENPRU 1.3.34 R, be subject to the requirement under ■ SUP 16.16.4 R to submit a Prudent Valuation Return to the *appropriate regulator*.

Specific requirements: BIPRU firms

1.3.36

FCA PRA

R

Adjustments to accounting values

- (1) For the purposes of *GENPRU* and *BIPRU*, the adjustments in (2) and (3) apply to values calculated pursuant to ■ GENPRU 1.3.4 R in addition to those required by ■ GENPRU 1.3.9 R to ■ GENPRU 1.3.10 R.
- (2) A *BIPRU firm* must not recognise either:
 - (a) the fair value reserves related to gains or losses on cash flow hedges of financial instruments measured at amortised cost; or
 - (b) any unrealised gains or losses on debt instruments held, or formerly held, in the available-for-sale category.
- (3) A *BIPRU investment firm* must deduct any asset in respect of deferred acquisition costs and add back in any liability in respect of deferred income (but exclude from the deduction or addition any asset or liability which will give rise to future cash flows), together with any associated deferred tax.
- (4) The items referred to in (2) and (3) must be excluded from *capital resources*.

1.3.37

FCA PRA

G

Provisions for equity instruments held in the available-for-sale category can be found in ■ GENPRU 2.2.185 R.

Trading book and other fair-valued positions, and revaluations

1.3.38

FCA PRA

R

■ GENPRU 1.3.39 R to ■ GENPRU 1.3.40 R apply only to a *BIPRU firm*.

1.3.39

FCA PRA

R

Both *trading book* positions and other fair-valued positions are subject to prudent valuation rules as specified in ■ GENPRU 1.3.14 R to ■ GENPRU 1.3.34 R (Marking to market, Marking to model, Independent price verification, Valuation adjustments or, in the case of an insurer or

a UK ISPV, valuation adjustments or reserves). In accordance with those *rules*, a *firm* must ensure that the value applied to each of its *trading book* positions and other fair-valued positions appropriately reflects the current market value. This value must contain an appropriate degree of certainty having regard to the dynamic nature of *trading book* positions, the demands of prudential soundness and the mode of operation and purpose of capital requirements in respect of *trading book* positions and other fair-valued positions.

1.3.40

FCA PRA

R

Trading book positions must be re-valued at least daily.

Specific requirements: firms carrying on insurance business

Investments, derivatives and quasi-derivatives

1.3.41

PRA

R

(1) For the purposes of *GENPRU* and *INSPRU*, an *insurer* or a UK *ISPV* must apply ■ GENPRU 1.3.14 R to ■ GENPRU 1.3.34 R (Marking to market, Marking to model, Independent price verification, Valuation adjustments or, in the case of an insurer or a UK ISPV, valuation adjustments or reserves) to account for:

- (a) investments that are, or amounts owed arising from the disposal of:
 - (i) *debt securities*, bonds and other money- and capital-market instruments;
 - (ii) loans;
 - (iii) *shares* and other variable yield participations;
 - (iv) *units* in *UCITS schemes*, *non-UCITS retail schemes*, *recognised schemes* and any other *collective investment scheme* falling within paragraph(1)(A)(d)(iv) of ■ GENPRU 2 Annex 7 R; and

(b) *derivatives* and *quasi-derivatives*

(2) In the case of an *insurer*, (1) is subject to ■ GENPRU 1.3.43 R.

Shares in and debts due from related undertakings

1.3.42

PRA

R

■ GENPRU 1.3.43 R to ■ GENPRU 1.3.57 R apply only to *insurers*.

1.3.43

PRA

R

■ GENPRU 1.3.13 R and ■ GENPRU 1.3.41 R do not apply to *shares* in, and debts due from a *related undertaking* that is:

- (1) a *regulated related undertaking*;
- (2) an *ancillary services undertaking*; or
- (3) any other *subsidiary undertaking*, the *shares* of which a *firm* elects to value in accordance with ■ GENPRU 1.3.47 R.

1.3.44

PRA

G

The effect of ■ GENPRU 1.3.43 R is that *shares* in, and debts due from, *related undertakings* of the types referred to are not valued on a mark to market basis by *insurers*. As a result, debts due from these *undertakings*, and *shares* in *related undertakings* which are *ancillary services undertakings*, are valued at their accounting book value in accordance with ■ GENPRU 1.3.4 R. *shares* in *related undertakings* referred to in ■ GENPRU 1.3.43 R (1) or ■ (3) are valued by *insurers* in accordance with ■ GENPRU 1.3.45 R to ■ GENPRU 1.3.50 R.

1.3.45

PRA

R

Except where the contrary is expressly stated in *GENPRU*, whenever a *rule* in *GENPRU* or *INSPRU* refers to *shares* held in, and debts due from, an *undertaking* referred to in ■ GENPRU 1.3.43 R (1) or ■ GENPRU 1.3.43 R (3), a *firm* must value the *shares* held in accordance with ■ GENPRU 1.3.47 R.

1.3.46

PRA

R

In relation to *shares* in, and debts due from, an *undertaking* referred to in ■ GENPRU 1.3.43 R (1), ■ GENPRU 1.3.45 R does not apply for the purposes of ■ GENPRU 2.2.256 R (Adjustments for regulated related undertakings other than insurance undertakings) and ■ INSPRU 6.1 (Group risk: Insurance groups).

1.3.47

PRA

R

For the purposes of ■ GENPRU 1.3.45 R, the value of the *shares* held in an *undertaking* referred to in ■ GENPRU 1.3.43 R (1) or ■ GENPRU 1.3.43 R (3) is the sum of:

- (1) the *regulatory surplus value* of that *undertaking*; less
- (2) for the purposes of ■ GENPRU 2.2.256 R (Adjustments for regulated related undertakings other than insurance undertakings), the book value of the total investments in the *tier one capital resources* and *tier two capital resources* of that *undertaking* by the *firm* and its *related undertakings*; or
- (3) for other purposes in *GENPRU* and *INSPRU*, the sum of:
 - (a) the book value of the investments by the *firm* and its *related undertakings* in the *tier two capital resources* of the *undertaking*; and
 - (b) if the *undertaking* is an *insurance undertaking*, its ineligible surplus capital and any restricted assets of the *undertaking* which have been excluded under ■ INSPRU 6.1.41 R (1).

1.3.48

PRA

R

For the purposes of ■ GENPRU 1.3.47 R (1), the regulatory surplus value of an *undertaking* referred to in ■ GENPRU 1.3.43 R (1) or ■ GENPRU 1.3.43 R (3) is, subject to ■ GENPRU 1.3.49 R, the sum of:

- (1) the total capital after deductions of the *undertaking*; less
- (2) the *individual capital resources requirement* of the *undertaking*.

1.3.49

PRA

R

- (1) Subject to ■ GENPRU 1.3.50 R, for the purposes of ■ GENPRU 1.3.48 R, only the relevant proportion of the:
 - (a) total capital after deductions of the *undertaking*; and
 - (b) *individual capital resources requirement* of the *undertaking*; is to be taken into account.
- (2) In (1), the relevant proportion is the proportion of the total number of *shares* issued by the *undertaking* held, directly or indirectly, by the *firm*.

1.3.50

PRA

R

If the *individual capital resources requirement* of an *undertaking* in ■ GENPRU 1.3.43 R (1) that is a *subsidiary undertaking* exceeds total capital after deductions, then the full amount of the items referred to in ■ GENPRU 1.3.49 R (1) must be taken into account for the purposes of ■ GENPRU 1.3.48 R.

1.3.51

PRA

R

For the purposes of ■ GENPRU 1.3.47 R to ■ GENPRU 1.3.50 R:

- (1) in relation to an *undertaking* referred to in ■ GENPRU 1.3.43 R (1):
 - (a) subject to (2), *individual capital resources requirement* has the meaning given by ■ INSPRU 6.1.34 R;
 - (b) total capital after deductions means:
 - (i) when used in relation to a *regulated related undertaking* that is subject to the *capital resources table*, the total capital after deductions (as calculated at stage M of the *capital resources table*) of the *undertaking*; and
 - (ii) when used in relation to a *regulated related undertaking* that is not subject to the *capital resources table*, the total capital after deductions calculated as if that *undertaking* were required to calculate its total capital after deductions in accordance with stage M of the calculation in the *capital resources table*, but with such adjustments being made to secure that the *undertaking's* calculation of its total capital after deductions complies with the relevant *sectoral rules* applicable to it; and
 - (c) ineligible surplus capital has the meaning given by ■ INSPRU 6.1.67 R;
- (2) in relation to an *undertaking* referred to in ■ GENPRU 1.3.43 R (3),
 - (a) the *individual capital resources requirement* is zero; and
 - (b) the total capital after deductions means the total capital after deductions of the *undertaking* calculated as if the *undertaking* were an *insurance holding company* required to calculate its

total capital resources in accordance with the *capital resources table* but with such adjustments being made to secure that the *undertaking's* calculation of its total capital after deductions complies with the *sectoral rules* for the *insurance sector*.

1.3.52

PRA

G

■ GENPRU 1.3.47 R to ■ GENPRU 1.3.51 R set out several different valuation bases for an *insurer's shares* in *related undertakings*. The *regulatory surplus value* (defined in ■ GENPRU 1.3.48 R) measures the *related undertaking's* own capital surplus or deficit. This is used: (i) in ■ GENPRU 1.3.47 R as a basis for calculating the impact on the firm's position of its investments in *related undertakings*; and (ii) in ■ INSPRU 6.1 as a starting point for the calculation of ineligible surplus capital.

1.3.53

PRA

G

■ GENPRU 1.3.47 R determines how, for the purposes of the solo capital adequacy calculation of an *insurer*, that *insurer's capital resources* should be adjusted to take into account its investments in *related undertakings*.

1.3.54

PRA

G

The *rules* that specify how, for the purposes of the adjusted solo capital calculation, an *insurer* should incorporate its *related undertakings* into its *capital resources* and *capital resources requirement* are set out in ■ INSPRU 6.1.

Insurance Special Purpose Vehicles

1.3.55

PRA

R

Except where a *rule* in *GENPRU* or *INSPRU* makes a different provision, an *insurer* must not place any value on amounts recoverable from an *ISPV* for the purposes of any *rule* in *GENPRU* or *INSPRU*.

1.3.56

PRA

G

An *insurer* may value amounts recoverable from an *ISPV* if it obtains a *waiver* of ■ GENPRU 1.3.55 R under section 138A of the *Act*. The conditions that will need to be met, in addition to the statutory tests under section 138A(4) of the *Act*, before the *PRA* will consider granting such a *waiver* are set out in ■ INSPRU 1.6.13 G to ■ INSPRU 1.6.18 G.

General insurance business: Community co-insurance operations -

1.3.57

PRA

R

Where a *relevant insurer* determines the amount of a liability in order to make provision for outstanding *claims* under a *Community co-insurance operation*, then, if the *leading insurer* has informed the *relevant insurer* of the amount of the provision made by the *leading insurer* for such *claims*, the amount determined by the *relevant insurer*:

- (1) must be at least as great as the amount of the provision made by the *leading insurer*; or
- (2) in a case where it is not the practice in the *United Kingdom* to make such provision separately, must be sufficient, when all liabilities are taken into account, to include provision at least as great as that made by the *leading insurer* for such *claims*,

due regard being had in either case to the proportion of the risk covered by the *relevant insurer* and by the *leading insurer* respectively.

1

1.4 Actions for damages

1.4.1

FCA

R

A contravention of the *rules* in GENPRU does not give rise to a right of action by a *private person* under section 138D of the *Act* (and each of those *rules* is specified under section 138D(3) of the *Act* as a provision giving rise to no such right of action).

1.5 Application of GENPRU 1 to Lloyd's

Application of GENPRU 1.2

1.5.1
PRA

R ■ GENPRU 1.2 applies to *managing agents* and to the *Society* in accordance with:

- (1) for *managing agents*, ■ INSPRU 8.1.4 R; and
- (2) for the *Society*, ■ INSPRU 8.1.2 R.

1.5.2
PRA

R ■ GENPRU 1.5.7 R applies to *members*, pursuant to the *insurance market direction* in ■ GENPRU 1.5.5 D.

Insurance market direction

1.5.3
PRA

G The *insurance market direction* in ■ GENPRU 1.5.5 D is given under section 316(1) of the *Act* (Direction by Authority) and applies to *members*.

1.5.4
PRA

G The purpose of the *insurance market direction* in ■ GENPRU 1.5.5 D is to enable the *PRA* to make the rule in ■ GENPRU 1.5.7 R applying to *members*, in order to:

- (1) protect *policyholders* against the risk that *members* may not have adequate financial resources to meet liabilities under or in respect of *contracts of insurance* as they fall due;
- (2) promote confidence in the market at Lloyd's by requiring *members* to maintain financial resources which are adequate to meet their liabilities.

1.5.5
PRA

D With effect from 1 January 2005, Part 9A of the *Act* (Rules and Guidance) applies to the *members* of the *Society* taken together in relation to the *insurance market activities* of *effecting* and *carrying out contracts of insurance* written at Lloyd's, for the purpose of applying the *rules* and *guidance* in ■ GENPRU 1.5.7 R to ■ GENPRU 1.5.9 G.

PAGE
39
1.5.6
PRA

G Part 9A of the *Act* is a *core provision* specified in section 317(1) of the *Act* (The core provisions). Section 317(2) provides that references in an applied *core provision* to an *authorised person* are to be read as references to a *person* in the class to which the *insurance market direction* applies. From 1 January 2005, references in Part 9A of the *Act* are to be read as references to *members* for the purposes of ■ GENPRU 1.5.7 R to ■ GENPRU 1.5.9 G.

1.5.7
PRA

R

Members' obligation to maintain adequate financial resources

The *members* taken together must at all times maintain overall financial resources, including capital and liquidity resources, that are adequate, both as to amount and quality, to ensure that there is no significant risk that liabilities under or in respect of *contracts of insurance* written at Lloyd's will not be met as they fall due.

1.5.8
PRA

G

Under GENPRU:

- (1) *managing agents* must ensure that adequate financial resources are available to support the *insurance business* carried on through each *syndicate* that they manage; and
- (2) the *Society* must, having regard to the availability and value of the *central assets*, ensure that the financial resources supporting the *insurance business* of each *member* are adequate at all times.

1.5.9
PRA

G

In practice, compliance with the requirements described in ■ GENPRU 1.5.8 G is likely to have the effect that *members* comply with ■ GENPRU 1.5.7 R.

Application of GENPRU 1.3

1.5.10
PRA

R

■ GENPRU 1.3 applies to *managing agents* and to the *Society* in accordance with:

- (1) for *managing agents*, ■ INSPRU 8.1.4 R; and
- (2) for the *Society*, ■ INSPRU 8.1.2 R.

Amounts receivable but not yet received

1.5.11
PRA

R

When recognising and valuing assets that are available to meet liabilities arising from a *member's insurance business*, neither the *Society* nor *managing agents* may attribute any value to any amounts receivable but not yet received from that *member* or another *member*, except for:

- (1) timing differences provided that a corresponding amount has been deducted from *syndicate assets* or *funds at Lloyd's*;
- (2) the *Society's callable contributions*, which are valued according to ■ GENPRU 1.5.17 R to ■ GENPRU 1.5.18 R; and
- (3) debts owed by a *member* to another *member* of the *Society* where the debt is a liability arising out of the *insurance business* he carries on at Lloyd's.

Letters of credit, guarantees and life assurance policies

1.5.12
PRA

R

When recognising and valuing assets held as *members' funds at Lloyd's* the *Society* may, if the conditions in ■ GENPRU 1.5.13 R are satisfied,

attribute a value to letters of credit and guarantees that it holds in respect of a *member's insurance business*.

1.5.13
PRA

R The conditions referred to in ■ GENPRU 1.5.12 R are that letters of credit and guarantees must be:

- (1) in the form prescribed by the *Society* from time to time and notified to the *PRA*; and
- (2) issued by a *credit institution* or an *insurance undertaking*.

1.5.14
PRA

R When recognising and valuing assets held as *members' funds at Lloyd's* the *Society* may attribute a value to verifiable sums arising out of life assurance policies.

1.5.15
PRA

R The *Society* must value any letter of credit, guarantee or life assurance policy at its net realisable value. The *Society* must make all appropriate deductions, including those in respect of:

- (1) the expenses of realisation; and
- (2) any reduction in value that would be likely to occur if the asset needed to be realised at short notice to meet liabilities falling due earlier than expected.

1.5.16
PRA

R If a *member* relies on a value attributed to a letter of credit or guarantee to meet any applicable *capital resources requirement* and that letter of credit or guarantee will expire in less than one month, the *Society* must take appropriate steps to ensure that the applicable *capital resources requirement* will continue to be met, including taking steps to ensure that sums due under the letter of credit or guarantee are drawn down when due and carried to the appropriate *Lloyd's trust fund*.

The Society's callable contributions

1.5.17
PRA

R For the purposes of ■ GENPRU 1.5.15 R (2), the amount assumed to be callable from a *member* must not exceed the lower of:

- (1) the maximum *callable contribution* that *member* is or may be liable to make in that *financial year*; and
- (2) the amount by which the *member's own capital resources* exceed the *member's own capital resources requirement*.

PAGE
41 1.5.18
PRA

R The *Society* must value *callable contributions* taking appropriate account of any legal, constructive or other limits on its ability to call for contributions from *members* or to realise the amount called.

- 1.5.19** **R** The *Society* must give the *PRA* adequate advance notice if it proposes to change the maximum amount of the *callable contribution* that *members* may be liable to make in any *financial year*.
PRA
- 1.5.20** **G** The *PRA* would normally expect not less than six months' notice under
PRA ■ GENPRU 1.5.19 R.
- Liabilities**
.....
- 1.5.21** **R** Subject to ■ GENPRU 1.5.22 R, the *Society* must recognise and value all of a *member's* liabilities in respect of its *insurance business*.
PRA
- 1.5.22** **R** The *Society* need not recognise or value a *member's* liabilities that are recognised and valued at *syndicate* level by *managing agents* in accordance with ■ GENPRU 1.3.
PRA
- 1.5.23** **R** For the purposes of calculating a *member's capital resources*, when valuing a *member's funds at Lloyd's* the *Society* must deduct the value of a *member's* liabilities determined under ■ GENPRU 1.5.21 R.
PRA
- 1.5.24** **G** The liabilities to be valued under ■ GENPRU 1.5.21 R and deducted under ■ GENPRU 1.5.23 R include:
PRA
- (1) amounts owing to *members' agents*;
 - (2) amounts owing to the *Society*;
 - (3) an appropriate accrual for tax payable on any profits;
 - (4) (where required under any applicable accounting principle in accordance with ■ GENPRU 1.3.4 R), any contingent liability relating to liabilities reinsured into Equitas Reinsurance Ltd; and
 - (5) amounts apportioned to *members* in respect of the *credit equalisation provision* in ■ INSPRU 1.4.
- 1.5.25** **R** In recognising and valuing a *member's* liabilities, the *Society* and *managing agents* may, to the extent permitted by applicable accounting principles, leave out of account the liabilities in respect of 1992 and prior *general insurance business* reinsured by Equitas Reinsurance Limited.
PRA
- 1.5.26** **G** There may be contingent liabilities associated with the reinsurance into Equitas. ■ GENPRU 1.3 requires *managing agents* and the *Society* to treat those contingent liabilities in accordance with applicable accounting principles: see ■ GENPRU 1.3.4 R. Depending on the circumstances, *managing agents* or the *Society* may need to disclose or account for such a liability.
PRA

Chapter 2

Capital

2.1 Calculation of capital resources requirements

Application

2.1.1

FCA PRA

R

This section applies to:

- (1) a *BIPRU firm*; and
- (2) an *insurer*, unless it is:
 - (a) a *non-directive friendly society*; or
 - (b) a *Swiss general insurer*; or
 - (c) an *EEA-deposit insurer*; or
 - (d) an *incoming EEA firm*; or
 - (e) an *incoming Treaty firm*.

2.1.2

FCA PRA

G

The scope of application of this section is not restricted to *firms* that are subject to the relevant *EU Directives*.

2.1.3

FCA PRA

R

- (1) This section applies to a *firm* in relation to the whole of its business, except where a particular provision provides for a narrower scope.
- (2) Where an *insurer* carries on both *long-term insurance business* and *general insurance business*, except where a particular provision provides otherwise, this section applies separately to each type of business.

2.1.4

FCA PRA

G

The adequacy of a *firm's capital resources* needs to be assessed in relation to all the activities of the *firm* and the risks to which they give rise.

2.1.5

FCA PRA

G

The requirements in this section apply to a *firm* on a solo basis.

2.1.6

FCA PRA

G

Purpose

Principle 4 requires a *firm* to maintain adequate financial resources. ■ GENPRU 2 sets out provisions that deal specifically with the adequacy of that part of a *firm's* financial

resources that consists of *capital resources*. The adequacy of a *firm's capital resources* needs to be assessed both by that *firm* and the *appropriate regulator*. Through its *rules*, the *appropriate regulator* sets minimum *capital resources requirements* for *firms*. It also reviews a *firm's* own assessment of its capital needs, and the processes and systems by which that assessment is made, in order to see if the minimum *capital resources requirements* are appropriate (see ■ GENPRU 1.2 (Adequacy of financial resources), ■ BIPRU 2.2 (Internal capital adequacy standards) and ■ INSPRU 7.1 (Individual capital assessment)).

2.1.7

FCA PRA

G

This section sets *capital resources requirements* for a *firm*. ■ GENPRU 2.2 (Capital resources) sets out how, for the purpose of meeting *capital resources requirements*, the amounts or values of capital, assets and liabilities are to be determined. More detailed *rules* relating to capital, assets and liabilities are set out in ■ GENPRU 1.3 (Valuation) and, for an *insurer*, INSPRU and, for a *BIPRU firm*, BIPRU.

2.1.8

FCA PRA

G

- (1) This section implements minimum EC standards for the *capital resources* required to be held by an *insurer* undertaking business that falls within the scope of the *Consolidated Life Directive* (2002/83/EC), the *Reinsurance Directive* (2005/68/EC) or the *First Non-Life Directive* (1973/239/EEC) as amended.
- (2) This section also implements provisions of the *Capital Adequacy Directive* and *Banking Consolidation Directive* concerning the level of *capital resources* which a *BIPRU firm* is required to hold. In particular it implements (in part) Articles 9, 10 and 75 of the *Banking Consolidation Directive* and Articles 5, 9, 10 and 18 of the *Capital Adequacy Directive*.
- (3) In the case of a *UCITS investment firm* this section implements (in part) Article 7 of the *UCITS Directive*.

Monitoring requirements

2.1.9

FCA PRA

R

A *firm* must at all times monitor whether it is complying with ■ GENPRU 2.1.13 R (the main capital adequacy rule for *insurer*) or the main *BIPRU firm Pillar 1 rules* and be able to demonstrate that it knows at all times whether it is complying with those *rules*.

2.1.10

FCA PRA

G

For the purposes of ■ GENPRU 2.1.9 R, a *firm* should have systems in place to enable it to be certain whether it has adequate *capital resources* to comply with ■ GENPRU 2.1.13 R and the main *BIPRU firm Pillar 1 rules* (as applicable) at all times. This does not necessarily mean that a *firm* needs to measure the precise amount of its *capital resources* and its *CRR* on a daily basis. A *firm* should, however, be able to demonstrate the adequacy of its *capital resources* at any particular time if asked to do so by the *appropriate regulator*.

2.1.11

FCA PRA

R

A *firm* must notify the *appropriate regulator* immediately of any breach, or expected breach, of ■ GENPRU 2.1.13 R (in the case of an *insurer*) or the main *BIPRU firm Pillar 1 rules* (in the case of a *BIPRU firm*).

Additional capital requirements

2.1.12

FCA PRA

G

The *appropriate regulator* may impose a higher capital requirement than the minimum requirement set out in this section as part of the *firm's Part 4A permission* (see

■ GENPRU 1.2 (Adequacy of financial resources), ■ BIPRU 2.2 (Internal capital adequacy standards) and ■ INSPRU 7.1 (Individual capital assessment)).

Main requirement: Insurers

2.1.13
PRA

R

- (1) Subject to (2), an *insurer* must maintain at all times *capital resources* equal to or in excess of its *capital resources requirement (CRR)*.
- (2) An *insurer* which is a *participating insurance undertaking* and, in relation to its own *group capital resources*, is in compliance with ■ INSPRU 6.1.9 R (Requirement to maintain group capital), is deemed to comply with this *rule*.

2.1.14
PRA

R

An *insurer* must comply with ■ GENPRU 2.1.13 R separately in respect of both its *long-term insurance business* and its *general insurance business* unless it is a *pure reinsurer* or a *captive reinsurer* which has a single MCR in respect of its entire business in accordance with ■ GENPRU 2.1.26 R.

2.1.15
PRA

G

In order to comply with ■ GENPRU 2.1.14 R, an *insurer* carrying on both *general insurance business* and *long-term insurance business* will need to allocate its *capital resources* between its *general insurance business* and *long-term insurance business* so that the *capital resources* allocated to its *general insurance business* are equal to or in excess of its CRR for its *general insurance business* and the *capital resources* allocated to its *long-term insurance business* are equal to or in excess of its CRR for its *long-term insurance business*. Whereas *long-term insurance assets* cannot be used towards meeting a *firm's* CRR for its *general insurance business*, surplus general insurance assets may be used towards meeting the CRR for its *long-term insurance business* (see ■ INSPRU 1.5.30 R to ■ INSPRU 1.5.32 G). ■ INSPRU 1.5 (Internal-contagion risk) sets out the detailed requirements for the separation of *long-term* and *general insurance business*.

2.1.16
PRA

G

Insurers commonly use different terminology for the various GENPRU requirements. For example, the MCR is traditionally known as the required minimum margin.

Calculation of the CRR for an insurer

2.1.17
PRA

R

The CRR for any *insurer* carrying on *general insurance business* is equal to the MCR in ■ GENPRU 2.1.24 R or, for a *pure reinsurer* or a *captive reinsurer* carrying on both *general insurance business* and *long-term insurance business*, in ■ GENPRU 2.1.26 R.

2.1.18
PRA

R

The CRR for any *insurer* to which this *rule* applies (see ■ GENPRU 2.1.19 R and ■ GENPRU 2.1.20 R) is the higher of:

- (1) the MCR in ■ GENPRU 2.1.24A R; and
- (2) the ECR in ■ GENPRU 2.1.38 R.

2.1.19

PRA

R

Subject to ■ GENPRU 2.1.20 R, ■ GENPRU 2.1.18 R applies to an *insurer* carrying on *long-term insurance business*, other than:

- (1) a *non-directive mutual*;
- (2) an *insurer* which has no *with-profits insurance liabilities*; and
- (3) an *insurer* which has *with-profits insurance liabilities* that are, and at all times since 31 December 2004 (the coming into force of ■ GENPRU 2.1.18 R) have remained, less than £500 million.

2.1.20

PRA

R

■ GENPRU 2.1.18 R also applies to an *insurer* of a type listed in ■ GENPRU 2.1.19 R (3) if:

- (1) the *insurer* makes an election that ■ GENPRU 2.1.18 R is to apply to it; and
- (2) that election is made by written notice given to the *appropriate regulator* in a way that complies with the requirements for written notice in ■ SUP 15.7 (Form and method of notification).

2.1.21

PRA

G

The effect of ■ GENPRU 2.1.19 R (3) is that an *insurer* to which ■ GENPRU 2.1.18 R applies because it has *with-profits insurance liabilities* of £500 million or more, will continue to be subject to ■ GENPRU 2.1.18 R even if its *with-profits insurance liabilities* fall below £500 million. However, if that happens, it may apply for a *waiver* from ■ GENPRU 2.1.18 R under section 138A of the *Act*. In exercising its discretion under section 138A of the *Act*, the *appropriate regulator* will have regard (among other factors) to whether there has been a material and permanent change to the *insurer's* business and to the prospects of it continuing to have *with-profits insurance liabilities* of less than £500 million.

2.1.22

PRA

G

An *insurer* that has always had *with-profits insurance liabilities* of less than £500 million since ■ GENPRU 2.1.18 R came into force may wish to "opt in" to ■ GENPRU 2.1.18 R and therefore become a *realistic basis life firm*. By doing so, it becomes obliged to calculate a *with-profits insurance capital component* (see ■ GENPRU 2.1.38 R and ■ INSPRU 1.3 (With-profits insurance capital component)), but it also becomes entitled to certain modifications to the way that a *firm* is required to calculate its *mathematical reserves* (see ■ INSPRU 1.2.46 R (Future net premiums: adjustment for deferred acquisition costs) and ■ INSPRU 1.2.76 R (Persistency assumptions)). The *firm* is also then required to report its liabilities on a realistic basis (see *IPRU(INS)* rule 9.31R(b)). In order to "opt in", the *insurer* must make an election under ■ GENPRU 2.1.20 R that ■ GENPRU 2.1.18 R is to apply to it. If an *insurer* that has elected to calculate and report its *with-profits insurance liabilities* on a realistic basis subsequently decides that it no longer wishes to do so, it may seek to "opt out" by applying for a *waiver* from ■ GENPRU 2.1.18 R under section 138A of the *Act*. In exercising its discretion under section 138A of the *Act*, the *appropriate regulator* will have regard (among other factors) to whether there has been a material and permanent change to the *firm's* business and to whether it continues to have *with-profits insurance liabilities* of less than £500 million.

2.1.23

PRA

R

The *CRR* for an *insurer* carrying on *long-term insurance business*, but to which ■ GENPRU 2.1.18 R does not apply, is equal to the *MCR* in

■ GENPRU 2.1.25 R or, for a *pure reinsurer* or a *captive reinsurer* carrying on both *general insurance business* and *long-term insurance business*, in ■ GENPRU 2.1.26 R.

Calculation of the MCR (Insurer only).....

2.1.24

PRA

R

Subject to ■ GENPRU 2.1.26 R, for an *insurer* carrying on *general insurance business* the MCR in respect of that business is the higher of:

- (1) the *base capital resources requirement* for *general insurance business* applicable to that *firm*; and
- (2) the *general insurance capital requirement*.

2.1.24A

PRA

R

Subject to ■ GENPRU 2.1.26 R, for an *insurer* carrying on *long-term insurance business* to which ■ GENPRU 2.1.18 R applies the MCR in respect of that business is the higher of:

- (1) the *base capital resources requirement* for *long-term insurance business* applicable to that *firm*; and
- (2) the *long-term insurance capital requirement*.

2.1.25

PRA

R

Subject to ■ GENPRU 2.1.26 R, for an *insurer* carrying on *long-term insurance business*, but to which ■ GENPRU 2.1.18 R does not apply, the MCR in respect of that business is the higher of:

- (1) the *base capital resources requirement* for *long-term insurance business* applicable to that *firm*; and
- (2) the sum of:
 - (a) the *long-term insurance capital requirement*; and
 - (b) the *resilience capital requirement*.

2.1.26

PRA

R

For a *pure reinsurer* or a *captive reinsurer* carrying on both *general insurance business* and *long-term insurance business*:

- (1) the MCR in respect of its *general insurance business* is the *general insurance capital requirement*; and
- (2) the MCR in respect of its *long-term insurance business* is the sum of:
 - (a) the *long-term insurance capital requirement*; and
 - (b) the *resilience capital requirement*;

unless the sum of:

- (3) the *general insurance capital requirement*; and
- (4) the sum of:
 - (a) the *long-term insurance capital requirement*; and
 - (b) the *resilience capital requirement*;

is lower than the *base capital resources requirement*, in which case the *firm* has a single MCR in respect of its entire business equal to the *base capital resources requirement*.

2.1.27
PRA

G The MCR gives effect to the EU Directive minimum requirements. For *general insurance business*, the EU Directive minimum is the higher of the *general insurance capital requirement* and the relevant *base capital resources requirement*. For *long-term insurance business*, the EU Directive minimum is the higher of the *long-term insurance capital requirement* and the *base capital resources requirement*. For *pure reinsurers* and *captive reinsurers* carrying on both *general insurance business* and *long-term insurance business*, however, the *base capital resources requirement* is the EU Directive required minimum only when it is higher than the sum of the *general insurance capital requirement* and the *long-term insurance capital requirement*. The *base capital resources requirement* is the minimum guarantee fund for the purposes of article 29(2) of the *Consolidated Life Directive* (2002/83/EC), article 17(2) of the *First Non-Life Directive* (1973/239/EEC) as amended and article 40(2) of the *Reinsurance Directive* (2005/68/EC). The *resilience capital requirement* is a PRA minimum requirement for *long-term insurance business* for *regulatory basis only life firms* that is additional to the EU minimum requirement for *long-term insurance business*.

2.1.28
PRA

G The calculation of the *resilience capital requirement* is set out in ■ INSPRU 3.1 (Market Risk in insurance).

Calculation of the base capital resources requirement for an insurer

2.1.29
PRA

R The amount of an *insurer's base capital resources requirement* is set out in the table in ■ GENPRU 2.1.30 R. If an *insurer* falls within one or more of the descriptions of type of *firm* set out in ■ GENPRU 2.1.30 R, its *base capital resources requirement* is the highest amount set out against the different types of *firm* within whose description it falls.

Table: Base capital resources requirement for an insurer

2.1.30
PRA

R This table belongs to ■ GENPRU 2.1.29 R

<i>Firm category</i>	Amount: Currency equivalent of
General insurance business	
Liability insurer (classes Directive mutual 10-15)	€ 2.775 million
<i>Non-directive insurer</i>	€ 350 ,000

<i>Firm category</i>	<i>Amount: Currency equivalent of</i>
Other insurer	Other (including mixed insurer but excluding pure reinsurer) € 3.7 million
	Directive mutual € 1.875 million
	Non-directive insurer (classes 1 to 8, 16 or 18) € 260 ,000
	Non-directive insurer (classes 9 or 17) €175 ,000
	Mixed insurer € 3.7 million
	Other (excluding pure reinsurer) € 2.5 million
Long-term insurance business	
Mutual	Directive € 2.775 million
	Non-directive mutual € 700 ,000
Any other insurer (including mixed insurer but excluding pure reinsurer)	€ 3.7 million
All business (general insurance business and long-term insurance business)	
Pure reinsurer excluding captive reinsurer	€ 3.7 million
Captive reinsurer	€ 1.2 million

2.1.31
PRA

G

- (1) Under the *Insurance Directives* the amount of the *base capital resources requirement* specified in the last column of the table in ■ GENPRU 2.1.30 R for an *insurer* which is not a *Non-directive insurer* is subject to annual review. The relevant amounts will be increased by the percentage change in the European index of consumer prices (comprising all EU member states, as published by Eurostat) from 20 March 2002, to the relevant review date, rounded up to a multiple of €100,000, provided that where the percentage change since the last increase is less than 5%, no increase will take place.
- (2) Similar provisions for the index-linking of the *base capital resources requirement* are included in the *Reinsurance Directive*, although in that case the index-linking starts from 10 December 2005. However, to ensure consistency as between all *firms* affected by the index-linking of the *base capital resources requirement* under the *Insurance Directives* and the *Reinsurance Directive*, the PRA intends, so far as possible, to amend the amounts in ■ GENPRU 2.1.30 R for all such *firms* (and ■ GENPRU 2.3.9 R for the *base capital resources requirements* applying to Lloyd's) when an index-linked increase is required by the *Insurance Directives*. The PRA may, however, have to depart from this approach where the result would be that the *base capital resources requirement* required for any type of *firm* under ■ GENPRU 2.1.30 R is less than the increased amount resulting from the operation of an index-linking provision to which it is subject.

2.1.32 **G** Any increases in the *base capital resources requirement* referred to in ■ GENPRU 2.1.31 G will be published on the PRA website.

PRA

2.1.33 **R** In the case of an *insurer* and for the purposes of the *base capital resources requirement*, the exchange rate from the Euro to the pound sterling for each year beginning on 31 December is the rate applicable on the last day of the preceding October for which the exchange rates for the currencies of all the European Union member states were published in the Official Journal of the European Union.

PRA

Calculation of the general insurance capital requirement (Insurer only).....

2.1.34 **R** An *insurer* must calculate its *general insurance capital requirement* as the highest of:

PRA

- (1) the *premiums amount*;
- (2) the *claims amount*; and
- (3) the *brought forward amount*.

2.1.35 **G** The calculation of each of the *premiums amount*, *claims amount* and *brought forward amount* is set out in ■ INSPRU 1.1 (Capital resources requirement and technical provisions for insurance business).

PRA

Calculation of the long-term insurance capital requirement (Insurer only).....

2.1.36 **R** An *insurer* must calculate its *long-term insurance capital requirement* as the sum of:

PRA

- (1) the *insurance death risk capital component*;
- (2) the *insurance health risk and life protection reinsurance capital component*;
- (3) the *insurance expense risk capital component*; and
- (4) the *insurance market risk capital component*.

2.1.37 **G** The calculation of each of the capital components is set out in ■ INSPRU 1.1 (Capital resources requirement and technical provisions for insurance business).

PRA

Calculation of the ECR (Insurer only).....

2.1.38 **R** For an *insurer* carrying on *long-term insurance business* the *ECR* in respect of that business is the sum of:

PRA

- (1) the *long-term insurance capital requirement*; and
- (2) the *with-profits insurance capital component*.

2.1.39 PRA G Details of the *resilience capital requirement* and the *with-profits insurance capital component* are set out in ■ INSPRU 3.1 (Market Risk in insurance) and ■ INSPRU 1.3 (With-profits insurance capital component) respectively.

Main requirement: BIPRU firms

2.1.40 FCA PRA R A *BIPRU firm* must maintain at all times *capital resources* equal to or in excess of the amount specified in the table in ■ GENPRU 2.1.45 R (Calculation of the variable capital requirement for a BIPRU firm).

2.1.41 FCA PRA R A *BIPRU firm* must maintain at all times *capital resources* equal to or in excess of the *base capital resources requirement* (see the table in ■ GENPRU 2.1.48 R).

2.1.42 FCA PRA R At the time that it first becomes a *bank, building society* or *BIPRU investment firm*, a *firm* must hold *initial capital* of not less than the *base capital resources requirement* applicable to that *firm*.

2.1.43 FCA PRA G The purpose of the *base capital resources requirement* for a *BIPRU firm* is to act as a minimum capital requirement or floor. It has been written as a separate requirement as there are restrictions in ■ GENPRU 2.2 (Capital resources) on the types of capital that a *BIPRU firm* may use to meet the *base capital resources requirement* which do not apply to some other parts of the capital requirement calculation. In order to preserve the *base capital resources requirement's* role as a floor rather than an additional requirement, ■ GENPRU 2.2.60 R allows a *BIPRU firm* to meet the *base capital resources requirement* with capital that is also used to meet the variable capital requirements in ■ GENPRU 2.1.40 R.

2.1.44 FCA PRA G The *base capital resources requirement* and the variable capital requirement in ■ GENPRU 2.1.40 R are together called the *capital resources requirement (CRR)* in the case of a *BIPRU firm*.

Calculation of the variable capital requirement for a BIPRU firm

2.1.45 FCA PRA R Table: Calculation of the variable capital requirement for a BIPRU firm

This table belongs to ■ GENPRU 2.1.40 R

<i>Firm category</i>	<i>Capital requirement</i>
<i>Bank, building society or full scope BIPRU investment firm</i>	the sum of the following: <ol style="list-style-type: none"> (1) the <i>credit risk capital requirement</i>; (2) the <i>market risk capital requirement</i>; and (3) the <i>operational risk capital requirement</i>.
<i>BIPRU limited activity firm</i>	the sum of the following: <ol style="list-style-type: none"> (1) the <i>credit risk capital requirement</i>; (2) the <i>market risk capital requirement</i>; and (3) the <i>fixed overheads requirement</i>.

BIPRU limited liability firm (including UCITS investment firm) the higher of (1) and (2):

(1) the sum of:

(a) the *credit risk capital requirement*; and

(b) the *market risk capital requirement*; and

(2) the *fixed overheads requirement*.

Adjustment of the variable capital requirement calculation for UCITS investment firms

2.1.46

FCA

R

When a *UCITS investment firm* calculates the *credit risk capital requirement* and the *market risk capital requirement* for the purpose of calculating the variable capital requirement under ■ GENPRU 2.1.40 R it must do so only in respect of *designated investment business*. For this purpose *scheme management activity* is excluded from *designated investment business*.

2.1.47

FCA PRA

R

Calculation of the base capital resources requirement for a BIPRU firm

The amount of a *BIPRU firm's base capital resources requirement* is set out in the table in ■ GENPRU 2.1.48 R.

2.1.48

FCA PRA

R

Table: Base capital resources requirement for a BIPRU firm

This table belongs to ■ GENPRU 2.1.47 R

<i>Firm category</i>	<i>Amount: Currency equivalent of</i>
<i>Bank</i>	€5 million
<i>Building society</i>	The higher of €1 million and £1 million
<i>BIPRU 730K firm</i>	€730,000
<i>BIPRU 125K firm</i>	€125,000
<i>BIPRU 50K firm</i>	€50,000
<i>UCITS investment firm</i>	€125,000 plus, if the <i>funds under management</i> exceed €250,000,000, 0.02% of the excess, subject to a maximum of €10,000,000.

Definition of BIPRU 730K firm, BIPRU 125K firm and BIPRU 50K firm

2.1.49

FCA PRA

G

The terms *BIPRU 730K firm*, *BIPRU 125K firm* and *BIPRU 50K firm* are defined in ■ BIPRU 1.1 (Application and purpose). However for convenience the table in ■ GENPRU 2.1.50 G briefly summarises them.

Table: Definition of BIPRU 730K firm, BIPRU 125K firm and BIPRU 50K firm

2.1.50

FCA PRA

G

This table belongs to ■ GENPRU 2.1.49 G

Category of BIPRU investment firm		Definition
<i>BIPRU 50K firm</i>	(1)	it does not deal in any <i>financial instruments</i> for its own account or underwrite issues of <i>financial instruments</i> on a firm commitment basis;
	(2)	it offers one or more of the following services: <ul style="list-style-type: none"> (a) reception and transmission of investors' orders for <i>financial instruments</i>; or (b) the execution of investors' orders for <i>financial instruments</i>; or (c) the management of individual portfolios of investments in <i>financial instruments</i>; and
	(3)	it does not hold clients' money and/or securities and it is not authorised to do so (it should have a <i>limitation</i> or <i>requirement</i> prohibiting the holding of client money and its <i>permission</i> should not include <i>safeguarding and administering investments</i>).
<i>BIPRU 125K firm</i>	(1)	it does not deal in any <i>financial instruments</i> for its own account or underwrite issues of <i>financial instruments</i> on a firm commitment basis;
	(2)	it offers one or more of the following services: <ul style="list-style-type: none"> (a) reception and transmission of investors' orders for <i>financial instruments</i>; or (b) the execution of investors' orders for <i>financial instruments</i>; or (c) the management of individual portfolios of investments in <i>financial instruments</i>; and
	(3)	it holds clients' money and/or securities or it is authorised to do so.
<i>BIPRU 730K firm</i>		is subject to the <i>Capital Adequacy Directive</i> and is neither a <i>BIPRU 50K firm</i> nor a <i>BIPRU 125K firm</i> .

Calculation of the credit risk capital requirement (BIPRU firm only)

2.1.51

FCA PRA

R

A *BIPRU firm* must calculate its *credit risk capital requirement* as the sum of:

- (1) the *credit risk capital component*;
- (2) the *counterparty risk capital component*; and
- (3) the *concentration risk capital component*.

Calculation of the market risk capital requirement (BIPRU firm only)

2.1.52

FCA PRA

R

- (1) A *BIPRU firm* must calculate its *market risk capital requirement* as the sum of:
- (a) the *interest rate PRR* (including the basic *interest rate PRR* for equity derivatives set out in ■ BIPRU 7.3 (Equity PRR and basic interest rate PRR for equity derivatives));
 - (b) the *equity PRR*;
 - (c) the *commodity PRR*;
 - (d) the *foreign currency PRR*;
 - (e) the *option PRR*; and
 - (f) the *collective investment undertaking PRR*.
- (2) Any amount calculated under ■ BIPRU 7.1.9 R - ■ BIPRU 7.1.13 R (Instruments for which no PRR treatment has been specified) must be allocated between the *PRR* charges in (1) in the most appropriate manner.

Calculation of the fixed overheads requirement (BIPRU investment firm only)

2.1.53

FCA

R

In relation to a *BIPRU investment firm* which is required to calculate a *fixed overheads requirement*, the amount of that requirement is equal to one quarter of the *firm's* relevant fixed expenditure calculated in accordance with ■ GENPRU 2.1.54 R.

2.1.54

FCA

R

For the purpose of ■ GENPRU 2.1.53 R, and subject to ■ GENPRU 2.1.55 R to ■ GENPRU 2.1.57 R, a *BIPRU investment firm's* relevant fixed expenditure is the amount described as total expenditure in its most recent audited *annual report and accounts*, less the following items (if they are included within such expenditure):

- (1) staff bonuses, except to the extent that they are guaranteed;
- (2) employees' and directors' shares in profits, except to the extent that they are guaranteed;
- (3) other appropriations of profits;
- (4) shared commission and fees payable which are directly related to commission and fees receivable, which are included within total revenue;
- (5) interest charges in respect of borrowings made to finance the acquisition of the *firm's readily realisable investments*;
- (6) interest paid to customers on *client money*;

- (7) interest paid to counterparties;
- (8) fees, brokerage and other charges paid to *clearing houses*, exchanges and *intermediate brokers* for the purposes of *executing*, registering or clearing transactions;
- (9) foreign exchange losses; and
- (10) other variable expenditure.

2.1.55

FCA

R

The relevant fixed expenditure of a *firm* in the following circumstances is:

- (1) where its most recent audited *annual report and accounts* do not represent a twelve month period, an amount calculated in accordance with ■ GENPRU 2.1.54 R, pro-rated so as to produce an equivalent annual amount; and
- (2) where it has not completed twelve months' trading, an amount based on forecast expenditure included in the budget for the first twelve months' trading, as submitted with its application for *authorisation*.

2.1.56

FCA

R

A *firm* must adjust its relevant fixed expenditure calculation so far as necessary if and to the extent that since the date covered by the most recent audited *annual report and accounts* or (if ■ GENPRU 2.1.55 R (2) applies) since the budget was prepared:

- (1) its level of fixed expenditure changes materially; or
- (2) its *regulated activities* comprised within its *permission* change.

2.1.57

FCA

R

If a *firm* has a material proportion of its expenditure incurred on its behalf by third parties and such expenditure is not fully recharged to that *firm* then the *firm* must adjust its relevant fixed expenditure calculation by adding back in the whole of the difference between the amount of the expenditure and the amount recharged.

2.1.58

FCA

G

For the purpose of ■ GENPRU 2.1.57 R, the FCA would consider as material 10% of a *firm's* expenditure incurred on its behalf by third parties.

2.1.59

FCA

G

For the purpose of ■ GENPRU 2.1.54 R to ■ 2.1.57 R, fixed expenditure is expenditure which is inelastic relative to fluctuations in a *firm's* levels of business. Fixed expenditure is likely to include most salaries and staff costs, office rent, payment for the rent or lease of office equipment, and insurance *premiums*. It may be viewed as the amount of funds which a *firm* would require to enable it to cease business in an orderly manner, should the need arise. This is not an exhaustive list of such expenditure and a *firm* will itself need to identify (taking appropriate advice where necessary) which costs amount to fixed expenditure.

Calculation of base capital resources requirement for banks authorised before 1993

2.1.60

PRA

R

- (1) This *rule* applies to a *bank* that meets the following conditions:
- (a) on 31 December 2006 it had the benefit of IPRU(BANK) rule 3.3.12 (Reduced minimum capital requirement for a *bank* that is a *credit institution* which immediately before 1 January 1993 was authorised under the Banking Act 1987);
 - (b) the relevant amount (as referred to in IPRU(BANK) rule 3.3.12) applicable to it was below €5 million as at 31 December 2006; and
 - (c) on 1 January 2007 it did not comply with the *base capital resources requirement* as set out in the table in
 - GENPRU 2.1.48 R (€5 million requirement).
- (2) Subject to (3), the applicable *base capital resources requirement* as at any time (the "relevant time") is the higher of:
- (a) the relevant amount applicable to it under IPRU(BANK) rule 3.3.12 as at 31 December 2006 as adjusted under
 - GENPRU 2.1.62 R (2); and
 - (b) the highest amount of eligible *capital resources* which that *bank* has held between 1 January 2007 and the relevant time.
- (3) This *rule* ceases to apply when:
- (a) that *bank's* eligible *capital resources* at any time since 1 January 2007 equal or exceed €5 million; or
 - (b) a *person* (other than an existing controller) becomes the *parent undertaking* of that *bank*.
- (4) If this *rule* ceases to apply under (3)(a) it continues not to apply if the *bank's* eligible *capital resources* later fall below €5 million.

2.1.61

PRA

G

Where two or more *banks* merge, all of which individually have the benefit of ■ GENPRU 2.1.60 R, the *PRA* may agree in certain circumstances that the *base capital resources requirement* for the *bank* resulting from the merger may be the sum of the aggregate *capital resources* of the merged *banks*, calculated at the time of the merger, provided this figure is less than €5 million.

2.1.62

PRA

R

For the purpose of ■ GENPRU 2.1.60 R:

- (1) an existing controller of a *bank* means:
- (a) a *person* who has been a *parent undertaking* of that *bank* since 31 December 2006 or earlier; or

- (b) a *person* who became a *parent undertaking* of that *bank* after 31 December 2006 but who, when he became a *parent undertaking* of that *bank*, was a *subsidiary undertaking* of an existing controller of that *bank*;
- (2) the relevant amount of capital as referred to in
- GENPRU 2.1.60 R (2)(a) is adjusted by identifying the time as of which the amount of capital it was obliged to hold under IPRU(BANK) rule 3.3.12 as referred to in
 - GENPRU 2.1.60 R (2)(a) was fixed and then recalculating the capital resources it held at that time in accordance with the definition of eligible *capital resources* (as defined in (3)); and
- (3) eligible *capital resources* mean *capital resources* eligible under
- GENPRU 2.2 (Capital resources) to be used to meet the *base capital resources requirement*.

2.2 Capital resources

Application

2.2.1

R

This section applies to:

FCA PRA

- (1) a *BIPRU firm*; and
- (2) an *insurer* unless it is:
 - (a) a *non-directive friendly society*; or
 - (b) a *Swiss general insurer*; or
 - (c) an *EEA-deposit insurer*; or
 - (d) an *incoming EEA firm*; or
 - (e) an *incoming Treaty firm*.

Purpose

2.2.2

G

■ GENPRU 2.1 (Calculation of capital resources requirement) sets out minimum *capital resources requirements* for a *firm*. This section (■ GENPRU 2.2) sets out how, for the purpose of these requirements, *capital resources* are defined and measured.

FCA PRA

2.2.3

G

This section implements minimum EC standards for the composition of *capital resources* required to be held by an *insurer* undertaking business that falls within the scope of the *Consolidated Life Directive* (2002/83/EC), the *First Non-Life Directive* (1973/239/EEC) as amended or the *Reinsurance Directive* (2005/68/EC).

PRA

2.2.4

G

This section also implements minimum EC standards for the composition of *capital resources* required to be held by a *BIPRU firm*. In particular it implements Articles 56 - 61, Articles 63 - 64, Article 66 and Articles 120 - 122 of the *Banking Consolidation Directive* (2006/48/EC) and Articles 12 - 16, Article 17 (in part), Article 22(1)(c) (in part) and paragraphs 13 - 15 of Part B of Annex VII of the *Capital Adequacy Directive* (2006/49/EC).

Simple capital issuers

2.2.7
FCA PRA

G

Parts of this section are irrelevant to a *BIPRU firm* whose *capital resources* consist of straightforward *capital instruments*.

Principles underlying the definition of capital resources

2.2.8
FCA PRA

G

The *appropriate regulator* has divided its definition of capital into categories, or tiers, reflecting differences in the extent to which the *capital instruments* concerned meet the purpose and conform to the characteristics of capital listed in ■ GENPRU 2.2.9 G. The *appropriate regulator* generally prefers a *firm* to hold higher quality capital that meets the characteristics of permanency and loss absorbency that are features of *tier one capital*. *Capital instruments* falling into *core tier one capital* can be included in a *firm's* regulatory capital without limit. Typically, other forms of capital are either subject to limits (see the *capital resources gearing rules*) or, in the case of some specialist types of capital, may only be included with the express consent of the *appropriate regulator* (which takes the form of a *waiver* under section 138A of the *Act*). Details of the individual components of capital are set out in the *capital resources table*.

Tier one capital

2.2.9
FCA PRA

G

Tier one capital typically has the following characteristics:

- (1) it is able to absorb losses;
- (2) it is permanent or (in the case of a *BIPRU firm*) available when required;
- (3) it ranks for repayment upon winding up, administration or similar procedure after all other debts and liabilities; and

- (4) it has no fixed costs, that is, there is no inescapable obligation to pay dividends or interest.

2.2.10

FCA PRA

G

The forms of capital that qualify for *Tier one capital* are set out in the *capital resources table* and include, for example, *share capital*, reserves, partnership and *sole trader capital*, verified interim net profits and, for a *mutual*, the *initial fund* plus permanent members' accounts. *Tier one capital* is divided into :

- (1) in the case of an *insurer*, *core tier one capital*, perpetual non-cumulative *preference shares* and *innovative tier one capital*; and
- (2) in the case of a *BIPRU firm*, *core tier one capital* and *hybrid capital*. *Hybrid capital* is further divided into the different stages B1, B2 and C of the calculation in the *capital resources table*.

Upper and lower tier two capital

2.2.11

FCA PRA

G

Tier two capital includes forms of capital that do not meet the requirements for permanency and absence of fixed servicing costs that apply to *tier one capital*. *Tier two capital* includes, for example:

- (1) capital which is perpetual (that is, has no fixed term) but cumulative (that is, servicing costs cannot be waived at the issuer's option, although they may be deferred - for example, cumulative *preference shares*); only perpetual *capital instruments* may be included in *upper tier two capital*;
- (2) capital which is not perpetual (that is, it has a fixed term) or which may have fixed servicing costs that cannot generally be either waived or deferred (for example, most subordinated debt); such capital should normally be of a medium to long-term maturity (that is, an original maturity of at least five years); dated *capital instruments* are included in *lower tier two capital*;
- (3) (for *BIPRU firms*) certain revaluation reserves such as reserves arising from the revaluation of land and buildings, including any net unrealised gains for the fair valuation of equities held in the available-for-sale financial assets category; and
- (4) (for *BIPRU firms*) general/collective provisions.

Tier three capital

2.2.12

FCA PRA

G

Tier three capital consists of forms of capital conforming least well to the characteristics of capital listed in ■ GENPRU 2.2.9 G: either subordinated debt of short maturity (*upper tier three capital*) or net *trading book* profits that have not been externally verified (*lower tier three capital*).

Non-standard capital instruments

2.2.13

FCA PRA

G

There may be examples of *capital instruments* that, although based on a standard form, contain structural features that make the *rules* in this section difficult to apply. In such circumstances, a *firm* may seek individual *guidance* on the application of those *rules* to the *capital instrument* in question. See SUP 9 (Individual guidance) for the process to be followed when seeking individual *guidance*.

Deductions from capital

2.2.14
FCA PRA

G

Deductions should be made at the relevant stage of the calculation of *capital resources* to reflect capital that may not be available to the *firm* or assets of uncertain value (for example, holdings of intangible assets and assets that are inadmissible for an *insurer*, or, in the case of a *bank* or *building society*, where that *firm* has made investments in a *subsidiary undertaking* or in another *financial institution* or in respect of *participations* that it holds).

2.2.15
FCA PRA

G

Deductions should also be made, in the case of certain *BIPRU investment firms* for *illiquid assets* (see ■ GENPRU 2.2.19 R).

2.2.16
FCA PRA

G

A full list of deductions from *capital resources* is shown in the *capital resources table* applicable to the *firm*.

Which method of calculating capital resources applies to which type of firm

2.2.17
FCA PRA

R

A *firm* must calculate its *capital resources* in accordance with the version of the *capital resources table* applicable to the *firm*, subject to the *capital resources gearing rules*. The version of the *capital resources table* that applies to a *firm* is specified in the table in ■ GENPRU 2.2.19 R.

2.2.18
FCA PRA

R

In the case of a *BIPRU firm* the *capital resources table* also sets out how the *capital resources requirement* is deducted from *capital resources* in order to decide whether its *capital resources* equal or exceed its *capital resources requirement*.

Table: Applicable capital resources calculation

2.2.19
FCA PRA

R

This table belongs to ■ GENPRU 2.2.17 R

Type of <i>firm</i>	Location of <i>rules</i>	Remarks
<i>Insurer</i>	GENPRU 2 Annex 1 R	
<i>Bank</i>	GENPRU 2 Annex 2 R	
<i>Building society</i>	GENPRU 2 Annex 3 R	
<i>BIPRU investment firm without an investment firm consolidation waiver</i>	GENPRU 2 Annex 4 R (Deducts <i>material holdings</i>)	Applies to a <i>BIPRU investment firm</i> not using GENPRU 2 Annex 5 R or GENPRU 2 Annex 6 R
<i>BIPRU investment firm without an investment firm consolidation waiver</i>	GENPRU 2 Annex 5 R (Deducts <i>illiquid assets</i>)	A <i>BIPRU investment firm</i> must give one <i>Month's</i> prior notice to the <i>appropriate regulator</i> before starting to use or stopping using this method

Type of <i>firm</i>	Location of <i>rules</i>	Remarks
<i>BIPRU investment firm with an investment firm consolidation waiver</i>	GENPRU 2 Annex 6 R (Deducts illiquid assets and material holdings)	A firm with an investment firm consolidation waiver must use this method. No other BIPRU investment firm may use it.

Calculation of capital resources: Which rules apply to BIPRU investment firms

2.2.20

FCA PRA

G

■ GENPRU 2.2.19 R sets out three different methods of calculating *capital resources* for *BIPRU investment firms*. The differences between the three methods relate to whether and how *material holdings* and *illiquid assets* are deducted when calculating *capital resources*. The method depends on whether a *firm* has an *investment firm consolidation waiver*. If a *firm* does have such a *waiver*, it should deduct *illiquid assets*, own *group material holdings* and certain contingent liabilities. If a *firm* does not have such a *waiver*, it should choose to deduct either *material holdings* or, subject to notifying the *appropriate regulator*, *illiquid assets*.

2.2.21

FCA PRA

G

A consequence of a *firm* deducting all of its *illiquid assets* under ■ GENPRU 2 Annex 5 R is that it is allowed a higher limit on short term subordinated debt under ■ GENPRU 2.2.49 R.

Calculation of capital resources: Insurers

2.2.22

PRA

G

Capital resources for an *insurer* can be calculated either as the total of eligible assets less foreseeable liabilities (which is the approach taken in the *Insurance Directives*) or by identifying the components of capital. Both calculations give the same result for the total amount of *capital resources*. The approach taken in this section has been to specify the components of capital and the relevant deductions. This is set out in the *capital resources table*. This approach is the same as that used for the calculation of *capital resources* for *banks*, *building societies* and *BIPRU investment firms*. A simple example, showing the reconciliation of the two methods, is given in the table in ■ GENPRU 2.2.23 G.

Table: Approaches to calculating capital resources

2.2.23

PRA

G

This table belongs to ■ GENPRU 2.2.22 G

Liabilities		Assets	
Borrowings	100	Admissible assets	350
Ordinary <i>shares</i>	200	Intangible assets	100

Limits on the use of different forms of capital: General

2.2.24 **G**
FCA PRA

As the various components of capital differ in the degree of protection that they offer the *firm* and its *customers* and *consumers*, restrictions are placed on the extent to which certain types of capital are eligible for inclusion in a *firm's capital resources*. These *rules* are called the *capital resources gearing rules*.

Limits on the use of different forms of capital: Use of higher tier capital in lower tiers

2.2.25 **R**
FCA PRA

A *firm* may include in a *lower stage of capital*, *capital resources* which are eligible for inclusion in a *higher stage of capital* if the *capital resources gearing rules* would prevent the use of that capital in that *higher stage of capital*. However:

- (1) the *capital resources gearing rules* applicable to that *lower stage of capital* apply to *higher stage of capital* included in that *lower stage of capital*; and
- (2) (subject to ■ GENPRU 2.2.26 R and ■ GENPRU 2.2.26A R) the *rules* in GENPRU governing the eligibility of capital in that *lower stage of capital* continue to apply.

2.2.26 **R**
FCA PRA

An item of *tier one capital* which is included in a *firm's tier two capital resources* under ■ GENPRU 2.2.25 R is not subject to the requirement to obtain a legal opinion in ■ GENPRU 2.2.159 R (12).

2.2.26A **R**
FCA PRA

A dated item of *tier one capital* which is included in a *BIPRU firm's tier two capital resources* under ■ GENPRU 2.2.25 R is not subject to the requirement to have no fixed maturity date in ■ GENPRU 2.2.177R (1).

2.2.27 **R**

[deleted]

2.2.28 FCA PRA R In the case of a *BIPRU firm*, the requirement to obtain a legal opinion in

- GENPRU 2.2.159 R (12) does not apply to *hybrid capital* treated under
- GENPRU 2.2.25 R but the requirements to obtain a legal opinion in
- GENPRU 2.2.118 R continue to apply.

Limits on the use of different forms of capital: Limits relating to tier one capital applicable to insurers

2.2.29 PRA R In relation to the *tier one capital resources* of an *insurer*, calculated at stage F of the calculation in the *capital resources table* (Total tier one capital after deductions), at least 50% must be accounted for by *core tier one capital*.

2.2.30 PRA R In relation to the *tier one capital resources* of an *insurer*, calculated at stage F of the calculation in the *capital resources table* (Total tier one capital after deductions), no more than 15% may be accounted for by *innovative tier one capital*.

Limits on the use of different forms of capital: Limits relating to tier one capital applicable to BIPRU firms

2.2.30A FCA PRA R In relation to the *tier one capital resources* of a *BIPRU firm*, calculated at stage F of the calculation in the *capital resources table* (Total tier one capital after deductions):

- (1) no more than 50% may be accounted for by *hybrid capital*;
- (2) no more than 35% may be accounted for by *hybrid capital* included at stages B2 and C of the calculation in the *capital resources table*; and
- (3) no more than 15% may be accounted for by *hybrid capital* included at stage C of the calculation in the *capital resources table*.

Limits on the use of different forms of capital: Limits relating to tier one capital: Purpose of the requirements

2.2.31 FCA PRA G The purpose of the requirements in ■ GENPRU 2.2.29 R and ■ GENPRU 2.2.30A R (1) is to ensure that the *firm's tier one capital resources* includes a minimum proportion of *core tier one capital* which provides the highest quality capital. Within the 50% limit on non-*core tier one capital*:

- (1) ■ GENPRU 2.2.30 R places a further sub-limit on the amount of *innovative tier one capital* that an *insurer* may include in its *tier one capital resources*; and
- (2) ■ GENPRU 2.2.30A R (2) and ■ GENPRU 2.2.30A R (3) place further sub-limits on the amounts of *hybrid capital* included at stages B2 and C of the calculation in the *capital resources table* that a *BIPRU firm* may include in its *tier one capital resources*.

These limits are necessary to ensure that most of a *firm's tier one capital* comprises items of capital of the highest quality.

Limits on the use of different forms of capital: Insurers

2.2.32

PRA

R

At least 50% of an *insurer's* MCR must be accounted for by the sum of:

- (1) the amount calculated at stage A of the calculation in the *capital resources table* (Core tier one capital); and
- (2) notwithstanding ■ GENPRU 2.2.29 R, the amount calculated at stage B of the calculation in the *capital resources table* (Perpetual non-cumulative preference shares);

less the amount calculated at stage E of the calculation in the *capital resources table* (Deductions from tier one capital).

2.2.33

PRA

R

Subject to ■ GENPRU 2.2.34A R, an *insurer* carrying on *long-term insurance business* must meet the higher of:

- (1) 1/3 of the *long-term insurance capital requirement*; and
- (2) the *base capital resources requirement*;

with the sum of the items listed at stages A (Core tier one capital), B (Perpetual non-cumulative preference shares), G (Upper tier two capital) and H (Lower tier two capital) in the *capital resources table* less the sum of the items listed at stage E in the *capital resources table* (Deductions from tier one capital).

2.2.34

PRA

R

Subject to ■ GENPRU 2.2.34A R, an *insurer* carrying on *general insurance business* must meet the higher of:

- (1) 1/3 of the *general insurance capital requirement*; and
- (2) the *base capital resources requirement*;

with the sum of the items listed at stages A (Core tier one capital), B (Perpetual non-cumulative preference shares), G (Upper tier two capital) and H (Lower tier two capital) in the *capital resources table* less the sum of the items listed at stage E (Deductions from tier one capital) in the *capital resources table*.

2.2.34A

PRA

R

A *pure reinsurer* carrying on both *long-term insurance business* and *general insurance business* must meet the higher of:

- (1) 1/3 of the sum of the *long-term insurance capital requirement* and the *general insurance capital requirement*; and
- (2) the *base capital resources requirement*;

with the sum of the items listed at stages A (Core tier one capital), B (Perpetual non-cumulative preference shares), G (Upper tier two capital) and H (Lower tier two capital) in the *capital resources table* less the

sum of the items listed at stage E (Deductions from tier one capital) in the *capital resources table*.

2.2.35

PRA

R

In ■ GENPRU 2.2.33 R , ■ GENPRU 2.2.34 R and ■ GENPRU 2.2.34A R :

- (1) items listed at stage B (Perpetual non-cumulative preference shares) in the *capital resources table* may be included notwithstanding ■ GENPRU 2.2.29 R;
- (2) *innovative tier one capital* that meets the conditions (other than ■ GENPRU 2.2.159 R (12) (Requirement for a legal opinion)) for it to be included as *upper tier two capital* at stage G (Upper tier two capital) in the *capital resources table* may be treated as an item listed at stage G; and
- (3) an *insurer* must exclude from the calculation the higher of the following:
 - (a) the amount (if any) by which the sum of the items listed at stages G (Upper tier two capital) and H (Lower tier two capital) in the *capital resources table* exceeds the total (net of deductions) of the remaining constituents of adjusted stage M; and
 - (b) the amount (if any) by which the sum of the items listed at stage H in the *capital resources table* exceeds one-third of the total (net of deductions) of the remaining constituents of adjusted stage M;

where adjusted stage M means the amount calculated at stage M of the calculation in the *capital resources table* (Total capital after deductions) less the amount of any *innovative tier one capital* that is not treated as *upper tier two capital* for the purpose of ■ GENPRU 2.2.33 R , ■ GENPRU 2.2.34 R or ■ GENPRU 2.2.34A R , as the case may be.

2.2.36

PRA

G

The purpose of the requirements in ■ GENPRU 2.2.33 R to ■ GENPRU 2.2.34A R is to comply with the requirements of the *Insurance Directives* and the *Reinsurance Directive* that an insurer must maintain a *guarantee fund* of higher quality *capital resources* items .

2.2.37

PRA

R

Subject to ■ GENPRU 2.2.38 R, an *insurer* must exclude from the calculation of its *capital resources* the following:

- (1) the amount (if any) by which *tier two capital resources* exceed the amount calculated at stage F (Total tier one capital after deductions) of the calculation in the *capital resources table*; and
- (2) the amount (if any) by which *lower tier two capital resources* exceed 50% of the amount calculated at stage F of the calculation in the *capital resources table*.

2.2.38 **R** At least 75% of an *insurer's MCR* must be accounted for by the sum of:
PRA

- (1) the amount calculated at stage A (Core tier one capital) plus, notwithstanding ■ GENPRU 2.2.29 R, the amount calculated at stage B (Perpetual non-cumulative preference shares) less the amount calculated at stage E (Deductions from tier one capital) of the calculation in the *capital resources table*; and
- (2) the amount calculated at stage G (Upper tier two capital) of the calculation in the *capital resources table*.

2.2.39 **G** In ■ GENPRU 2.2.38 R the amount of any *innovative tier one capital* that meets the conditions for it to be included as *upper tier two capital* at stage G (Upper tier two capital) in the *capital resources table* may be included in the amount calculated at stage G.
PRA

2.2.40 **G** ■ GENPRU 2.2.32 R, ■ GENPRU 2.2.37 R and ■ GENPRU 2.2.38 R give effect to the requirements of the *Insurance Directives* and the *Reinsurance Directive* that no more than 50% of the amount which is the lesser of the available solvency margin and the required solvency margin should consist of *tier two capital resources* and that no more than 25% of that amount should consist of *lower tier two capital resources*.
PRA

2.2.41 **R** An *insurer* (other than a *pure reinsurer*) that carries on both *long-term insurance business* and *general insurance business* must apply the relevant limits in ■ GENPRU 2.2.32 R to ■ GENPRU 2.2.38 R separately for each type of business.
PRA

2.2.42 **R** [deleted]

2.2.43 **G** [deleted]

Limits on the use of different kinds of capital: Purposes for which tier three capital may not be used (BIPRU firm only)

2.2.44 **R** *Tier one capital and tier two capital are the only type of capital resources that a BIPRU firm may use for the purpose of meeting:*
FCA PRA

- (1) the *credit risk capital component*;
- (2) the *operational risk capital requirement*;
- (3) the *counterparty risk capital component*; and
- (4) the *base capital resources requirement*.

2.2.45 **R** ■ GENPRU 2.2.44 R (and the *capital resources gearing rules* that relate to it) also applies for the purposes of any other requirement in the *Handbook* for which it is necessary to calculate the *capital resources* of
FCA PRA

a *BIPRU firm*, except for the purposes described in ■ GENPRU 2.2.47 R and except as may otherwise be stated in the relevant part of the *Handbook*.

Limits on the use of different kinds of capital: Tier two limits (BIPRU firm only)

2.2.46

FCA PRA

R

For the purpose of ■ GENPRU 2.2.44 R:

- (1) the amount of the items which may be included in a *BIPRU firm's tier two capital resources* must not exceed the amount calculated at stage F of the calculation in the *capital resources table* (Total tier one capital after deductions); and
- (2) the amount of the items which may be included in a *BIPRU firm's lower tier two capital resources* must not exceed 50% of the amount calculated at stage F of the calculation in the *capital resources table*.

Limits on the use of different kinds of capital: Purposes for which tier three capital may be used (BIPRU firm only)

2.2.47

FCA PRA

R

For the purposes of meeting:

- (1) the *market risk capital requirement*;
- (2) the *concentration risk capital component*; and
- (3) the *fixed overheads requirement* (where applicable);

a *BIPRU firm* may only use the following parts of its *capital resources*:

- (4) *tier one capital* to the extent that it is not required to meet the requirements in ■ GENPRU 2.2.44 R (■ GENPRU 2.2.48 R explains how to calculate how much *tier one capital* is required to meet the requirements in ■ GENPRU 2.2.44 R);
- (5) *tier two capital* to the extent that it:
 - (a) comes within the limits in ■ GENPRU 2.2.46 R (100% limit for *tier two capital resources* and 50% limit for *lower tier two capital resources*); and
 - (b) it is not required to meet the requirements in ■ GENPRU 2.2.44 R; (■ GENPRU 2.2.48 R explains how to calculate how much *tier two capital* is required to meet the requirements in ■ GENPRU 2.2.44 R);
- (6) *tier two capital* that cannot be used for the purposes in ■ GENPRU 2.2.44 R because it falls outside the limits in ■ GENPRU 2.2.46 R; and
- (7) *tier three capital*.

2.2.48

FCA PRA

R

The amount of *tier one capital* and *tier two capital* that is not used to meet the requirements in ■ GENPRU 2.2.44 R as referred to in ■ GENPRU 2.2.47 R (4) and ■ (5)(5) is equal to the amount calculated at stage N of the calculation in the *capital resources table* (Total tier one capital plus tier two capital after deductions) less the parts of the *capital resources requirement* deducted immediately after stage N of the *capital resources table* (the parts of the *capital resources requirements* listed in ■ GENPRU 2.2.44 R).

Limits on the use of different kinds of capital: Combined tier two and tier three limits (BIPRU firm only)

2.2.49

FCA PRA

R

For the purpose of meeting the requirements in ■ GENPRU 2.2.47 R (1) to ■ GENPRU 2.2.47 R (3) and subject to ■ GENPRU 2.2.50 R, a *BIPRU firm* must not include any item in either:

- (1) its *tier two capital resources* falling within ■ GENPRU 2.2.47 R (6) (excess *tier two capital*); or
- (2) its *upper tier three capital resources*;

to the extent that the sum of (1) and (2) would exceed 250% of the amount resulting from the following calculation:

- (3) calculate the amount at stage F of the calculation in the *capital resources table* (Total tier one capital after deductions); and
- (4) deduct from (3) those parts of the *firm's tier one capital* used to meet the requirements in ■ GENPRU 2.2.44 R (1) and ■ (2) as established by ■ GENPRU 2.2.48 R.

2.2.50

FCA PRA

R

In relation to a *BIPRU investment firm* which calculates its *capital resources* under ■ GENPRU 2 Annex 4 R (Capital resources table for a BIPRU investment firm deducting material holdings), the figure of 200% replaces that of 250% in ■ GENPRU 2.2.49 R.

Example of how the capital resources calculation for BIPRU firms works

2.2.51

FCA PRA

G

■ GENPRU 2.2.52 G to ■ GENPRU 2.2.59 G illustrate how to calculate a *BIPRU firm's capital resources* and how the *capital resources gearing rules* work. In this example the *BIPRU firm* has a combined credit, operational and counterparty risk requirement of £100 (of which £10 is due to counterparty risk) and a market risk requirement of £90, making a total capital requirement of £190. Its *capital resources* are as set out in the table in ■ GENPRU 2.2.52 G.

Table: Example of the calculation of the capital resources of a BIPRU firm

2.2.52

FCA PRA

G

This table belongs to ■ GENPRU 2.2.51 G

Description of the stage of the capital resources calculation	Stage in the <i>capital resources table</i>	Amount (£)
Total <i>tier one capital</i> after deductions	Stage F	80
Total <i>tier two capital</i>	Stage K	80
Deductions	Stage M	(20)
Total <i>tier one capital</i> and <i>tier two capital</i> after deductions	Stage N	140
<i>Upper tier three capital</i> (this example assumes the <i>firm</i> has no <i>lower tier three capital</i> (trading book profits))	Stage Q	50
Total <i>capital resources</i>	Stage T	190

2.2.53

G

[deleted]

2.2.54

FCA PRA

G

In the example in the table in ■ GENPRU 2.2.52 G the *firm* has total *tier one capital* after deductions of £80. Its *tier two capital* of £80 is therefore the maximum permitted under ■ GENPRU 2.2.46 R (Tier two limits), that is 100% of *tier one capital*.

2.2.55

FCA PRA

G

The combined credit, operational and counterparty risk capital requirement is deducted after stage N of the *capital resources table* and the market risk requirement following stage T of the *capital resources table*. These calculations are shown in the table in ■ GENPRU 2.2.56 G.

Table: Example of how capital resources of a BIPRU firm are measured against its capital resources requirement

2.2.56

FCA PRA

G

This table belongs to ■ GENPRU 2.2.55 G

Description of the stage of the capital resources calculation	Stage in the <i>capital resources table</i>	Amount (£)
Total <i>tier one capital</i> and <i>tier two capital</i> after deductions	Stage N	140
Credit, operational and counterparty risk requirement		(100)
<i>Tier one capital</i> and <i>tier two capital</i> available to meet market risk requirement		40
<i>Tier three capital</i>	Stage Q	50
Total capital available to meet market risk requirement		90
Market risk requirement		(90)
Market risk requirement met subject to meeting gearing limit set out in GENPRU 2.2.49 R - see GENPRU 2.2.57 G		

2.2.57
FCA PRA

G

The gearing limit in ■ GENPRU 2.2.49 R (Combined tier two and tier three limits) requires that the *upper tier three capital* used to meet the market risk requirement does not exceed 250% of the relevant *tier one capital*.

2.2.58
FCA PRA

G

In this example it is assumed that the maximum possible amount of *tier one capital* is carried forward to meet the market risk requirement. There are other options as to the allocation of *tier one capital* and *tier two capital* to the credit, operational and counterparty risk requirement.

In order to calculate the relevant *tier one capital* for the *upper tier three* gearing limit in accordance with ■ GENPRU 2.2.49 R it is first necessary to allocate *tier one capital* and *tier two capital* to the individual credit, operational and counterparty risk requirements. This allocation process underlies the calculation of the overall amount referred to in ■ GENPRU 2.2.48 R. The calculation in ■ GENPRU 2.2.49 R (3) and ■ GENPRU 2.2.49 R (4) then focuses on the *tier one* element of this earlier calculation.

In this worked example, if it is assumed that the counterparty risk requirement has been met by *tier one capital*, the relevant *tier one capital* for gearing is £50. This is because the deductions of £20 and the credit and operational risk requirements of £90 have been met by *tier two capital* in the first instance. However, the total sum of deductions and credit and operational risk requirements exceed the *tier two capital* amount of £80 by £30. Hence the £80 of *tier one capital* has been reduced by £30 to leave £50.

In practical terms, the same result is achieved for the relevant *tier one capital* for gearing by taking the amount carried forward to meet market risk of £40 and adding back the £10 in respect of the counterparty risk requirement. Again, there are other options as to the allocation to credit, operational and counterparty risk of the constituent elements of Stage N of the *capital resources table*.

The outcome of these calculations can be summarised as follows:

- (1) the relevant *tier one capital* for the gearing calculation is £50;
- (2) 250% of the relevant *tier one capital* is £125; and
- (3) the *upper tier three capital* used to meet market risk is £50.

2.2.59
FCA PRA

G

The 250% gearing limit is met as the limit of £125 is greater than the *upper tier three capital* of £50 used in this example.

Capital used to meet the base capital resources requirement (BIPRU firm only)

2.2.60
FCA PRA

R

A BIPRU firm may use the capital resources used to meet the base capital resources requirement to meet any other part of the capital resources requirement.

2.2.61
FCA PRA

G

The explanation for ■ GENPRU 2.2.60 R can be found in ■ GENPRU 2.1.43 G (Base capital resources requirement). In brief the reason is that the *base capital resources requirement* is not in practice meant to act as an additional capital resources requirement. It is meant to act as a floor to the *capital resources requirement*.

Notification of issuance of capital instruments

2.2.61A

FCA PRA

R

This section applies to a *firm* intending to issue a *capital instrument* on or after 1 March 2012 for inclusion in its *capital resources*.

2.2.61B

FCA PRA

R

A *firm* must notify the *appropriate regulator* in writing of its intention to issue a *capital instrument* which it intends to include within its *capital resources* at least one *month* before the intended date of issue, unless there are exceptional circumstances which make it impracticable to give such a period of notice, in which event the *firm* must give as much notice as is practicable in those circumstances. When giving notice, a *firm* must:

- (1) provide details of the amount of capital the *firm* is seeking to raise through the intended issue and whether the capital is intended to be issued to external investors or within its *group*;
- (2) identify the stage of the *capital resources table* the *capital instrument* is intended to fall within;
- (3) include confirmation from a *senior manager* of the *firm* responsible for authorising the intended issue that the *capital instrument* complies with the *rules* applicable to instruments included in the stage of the *capital resources table* identified in (2); and
- (4) provide a copy of the term sheet and details of any features of the *capital instrument* which are novel, unusual or different from a *capital instrument* of a similar nature previously issued by the *firm* or widely available in the market or not specifically contemplated by ■ GENPRU 2.2.

This *rule* does not apply to a *firm* which intends to issue a *capital instrument* listed in ■ GENPRU 2.2.61E R

2.2.61C

FCA PRA

R

A *firm* must provide a further notification to the *appropriate regulator* in writing including all the information required in ■ GENPRU 2.2.61BR (1) to ■ (4) as soon as it proposes any change to the intended date of issue, amount of issue, type of investors, stage of capital or any other feature of the *capital instrument* to that previously notified to the *appropriate regulator*.

2.2.61D

FCA PRA

R

If a *firm* proposes to establish a debt securities program for the issue of *capital instruments* for inclusion within its *capital resources*, it must:

- (1) notify the *appropriate regulator* of the establishment of the program; and
- (2) provide the information required by ■ GENPRU 2.2.61BR (1) to ■ (4)

at least one *month* before the first proposed drawdown. Any changes must be notified to the *appropriate regulator* in accordance with ■ GENPRU 2.2.61C R.

2.2.61E

FCA PRA

R

The *capital instruments* to which ■ GENPRU 2.2.61B R does not apply are:

- (1) ordinary *shares* which:
 - (a) are the most deeply subordinated *capital instrument* issued by the *firm*;
 - (b) meet the criteria set out in ■ GENPRU 2.2.83R (2) and ■ (3) and, for a *BIPRU firm*, ■ GENPRU 2.2.83A R; and
 - (c) are the same as ordinary *shares* previously issued by the *firm*;
- (2) debt instruments issued from a debt securities program, provided that program was notified to the *appropriate regulator* prior to its first drawdown, in accordance with ■ GENPRU 2.2.61D R; and
- (3) *capital instruments* which are not materially different in terms of their characteristics and eligibility for inclusion in a particular tier of capital to *capital instruments* previously issued by the *firm*.

2.2.61F

FCA PRA

R

A *firm* must notify the *appropriate regulator* in writing, no later than the date of issue, of its intention to issue a *capital instrument* listed in ■ GENPRU 2.2.61E R which it intends to include within its *capital resources*. When giving notice, a *firm* must:

- (1) provide the information set out at ■ GENPRU 2.2.61BR (1) to ■ (3); and
- (2) confirm that the terms of the *capital instrument* have not changed since the previous issue by the *firm* of that type of *capital instrument*.

2.2.61G

FCA PRA

G

■ GENPRU 2.2.61B R provides that, in exceptional circumstances, a *firm* may provide less than one *month's* notice of the intended issue. The *appropriate regulator* is unlikely to consider circumstances to be exceptional unless they are such that there is a risk of a *firm's capital resources* falling below its *capital resources requirement* if a one-month notification period is observed. In such circumstances, a *firm* should notify the *appropriate regulator* as soon as it has resolved to issue further capital, and provide details of its circumstances and why it is not possible to provide one *month's* notice of the intended issue.

2.2.61H

FCA PRA

G

Details of the notification to be provided by a *BIPRU firm* in relation to *capital instruments* issued by another *undertaking* in its *group* for inclusion in its *capital resources* or the *consolidated capital resources* of its *UK consolidation group* or *non-EEA sub-group* are set out in ■ BIPRU 8.6.1A R to ■ BIPRU 8.6.1F R. Details of the notification to be provided by an *insurer* in relation to *capital instruments* issued by

another *undertaking* in its *group* for inclusion in its *group capital resources* are set out in ■ INSPRU 6.1.43A R to ■ INSPRU 6.1.43F R.

Tier one capital: General

2.2.62

FCA PRA

R

A *firm* may not include a *capital instrument* in its *tier one capital resources* unless it complies with the following conditions:

- (1) it is included in one of the categories in ■ GENPRU 2.2.63 R;
- (2) it complies with the conditions set out in ■ GENPRU 2.2.64 R;
- (3) it is not excluded under ■ GENPRU 2.2.65 R (Connected transactions); and
- (4) it is not excluded by any of the *rules* in ■ GENPRU 2.2.

2.2.63

FCA PRA

R

The categories referred to in ■ GENPRU 2.2.62 R (1) are:

- (1) *permanent share capital*;
- (2) *eligible partnership capital*;
- (3) *eligible LLP members' capital*;
- (4) *sole trader capital*;
- (5) (in the case of an *insurer*) a perpetual non-cumulative *preference share*;
- (6) [deleted]
- (7) (in the case of an *insurer*) an *innovative tier one instrument*; and
- (8) (in the case of a *BIPRU firm*) *hybrid capital*.

General conditions for eligibility as tier one capital

2.2.64

FCA PRA

R

The conditions that an item of capital of a *firm* must comply with under ■ GENPRU 2.2.62 R (2) are as follows:

- (1) it is issued by the *firm*;
- (2) it is fully paid and the proceeds of issue are immediately and fully available to the *firm*;
- (3) it:
 - (a) cannot be redeemed at all or can only be redeemed on a winding up of the *firm*; or

- (b) complies with the conditions in ■ GENPRU 2.2.70 R (Basic requirements for redeemability) and ■ GENPRU 2.2.76 R (Redeemable instrument subject to a *step-up*);
- (4) the item of capital meets the following conditions in relation to any *coupon*:
- (a) the *firm* is under no obligation to pay a *coupon*; or
 - (b) (if the *firm* is obliged to pay the *coupon*) the *coupon* is payable in the form of an item of capital that is:
 - (i) in the case of a *BIPRU firm*, *core tier one capital*; and
 - (ii) in the case of an *insurer*, included in a *higher stage of capital* or the *same stage of capital* as that first item of capital;
- (5) any *coupon* is either:
- (a) non-cumulative; or
 - (b) (if it is cumulative) it must, if deferred, be paid by the *firm* in the form of *tier one capital* complying with (4)(b);
- (6) it is able to absorb losses to allow the *firm* to continue trading and :
- (a) in the case of an *insurer*, in particular it complies with ■ GENPRU 2.2.80 R to ■ GENPRU 2.2.81 R (Loss absorption) and, in the case of an *innovative tier one instrument*, ■ GENPRU 2.2.116 R to ■ GENPRU 2.2.118 R (Other tier one capital: loss absorption); and
 - (b) in the case of a *BIPRU firm*, it does not, through appropriate mechanisms, hinder the recapitalisation of the *firm*, and in particular it complies with:
 - (i) ■ GENPRU 2.2.80 R to ■ GENPRU 2.2.81 R (Loss absorption);
 - (ii) in the case of *core tier one capital*, ■ GENPRU 2.2.83A R (9) to ■ GENPRU 2.2.83A R (10) (General conditions for eligibility of capital instruments as core tier one capital (BIPRU firm only)); and
 - (iii) in the case of *hybrid capital*, ■ GENPRU 2.2.116 R to ■ GENPRU 2.2.118 R (Other tier one capital: loss absorption);

- (7) the amount of the item included must be net of any foreseeable tax charge at the moment of its calculation or must be suitably adjusted in so far as such tax charges reduce the amount up to which that item may be applied to cover risks or losses;
- (8) it is available to the *firm* for unrestricted and immediate use to cover risks and losses as soon as these occur;
- (9) it ranks for repayment upon winding up, administration or any other similar process:
 - (a) in the case of an *insurer*, no higher than a *share* of a company incorporated under the Companies Act 2006 (whether or not it is such a *share*); or
 - (b) in the case of a *BIPRU firm*, lower than any items of capital that are:
 - (i) eligible for inclusion within the *firm's tier two capital resources*; and
 - (ii) not eligible for inclusion within the *firm's tier one capital resources*; and
- (10) the description of its characteristics used in its marketing is consistent with the characteristics required to satisfy (1) to (9) and, where it applies, ■ GENPRU 2.2.271 R (Other requirements: insurers carrying on with-profits business (Insurer only)).

2.2.65

FCA PRA

R

An item of capital does not qualify for inclusion as *tier one capital* if the issue of that item of capital by the *firm* is connected with one or more other transactions which, when taken together with the issue of that item, could result in that item of capital no longer displaying all of the characteristics set out in ■ GENPRU 2.2.64 R (1) to ■ GENPRU 2.2.64 R (9).

Guidance on certain of the general conditions for eligibility as tier one capital

2.2.66

FCA PRA

G

■ GENPRU 2.2.65 R is an example of the general principle in ■ GEN 2.2.1 R (Purposive interpretation). Its purpose is to emphasise that an item of capital does not meet the conditions for inclusion in *tier one capital* if in isolation it does meet those requirements but it fails to meet those requirements when other transactions are taken into account. Examples of such connected transactions might include guarantees or any other side agreement provided to the holders of the *capital instrument* by the *firm* or a connected party or a related transaction designed, for example, to enhance their security or to achieve a tax benefit, but which may compromise the loss absorption capacity or permanence of the original capital item.

2.2.67

FCA PRA

G

■ GENPRU 2.2.64 R (2) is stricter than the Companies Act definition of fully paid, which only requires an undertaking to pay.

2.2.67A
FCA PRA

G

The purpose of ■ GENPRU 2.2.64 R (4) is to ensure that a *firm* retains flexibility over the payment of *coupons* and can preserve cash in times of financial stress. However, a *firm* may include, as part of the capital instrument terms, a right to make payments of a *coupon* mandatory if an item of capital becomes ineligible to form part of its *capital resources* (e.g. through a change in the relevant *rules*) and the *firm* has notified the *appropriate regulator* that the instrument is ineligible.

2.2.68
FCA PRA

G

The *appropriate regulator* considers that dividend pushers diminish the quality of capital by breaching the principle of complete discretion over *coupons* set out in ■ GENPRU 2.2.64 R (4). A dividend pusher operates so that, in a given period of time, payments must be made on senior securities if payments have previously been made on junior securities or securities ranking *pari passu*. As such, dividend pushers may not be included in the terms of *tier one capital*, unless the *firm* has the option to fund the "pushed payment" in stock.

2.2.68A
FCA PRA

R

A BIPRU firm must not include a *capital instrument* in its *tier one capital resources* if:

- (1) the *capital instrument* is affected by a dividend stopper; and
- (2) the dividend stopper operates in a way that hinders recapitalisation.

2.2.68B
FCA PRA

G

A dividend stopper prevents the *firm* from paying any *coupon* on more junior or *pari passu* instruments in a period in which the *firm* omits payments to the holder of the *capital instrument* containing the dividend stopper, and so may hinder the recapitalisation of the *firm* contrary to ■ GENPRU 2.2.64 R (6).

2.2.69
FCA PRA

G

An item of capital does not comply with ■ GENPRU 2.2.64 R (10) if it is marketed as a *capital instrument* that would only qualify for a lower level of capital or on the basis that investing in it is like investing in an instrument in a lower tier of capital. For example, an undated *capital instrument* should not be marketed as a dated *capital instrument* if the terms of the *capital instrument* include an option by the issuer to redeem the *capital instrument* at a specified date in the future.

Tier one capital: payment of coupons (BIPRU firm only).....

2.2.69A
FCA PRA

R

A BIPRU firm must not make a payment of a *coupon* on an item of *hybrid capital* if the *firm* has no distributable reserves.

2.2.69B
FCA PRA

R

A BIPRU firm must cancel the payment of a *coupon* on an item of *hybrid capital* if the BIPRU firm does not meet its *capital resources requirement* or if the payment of that *coupon* would cause it to breach its *capital resources requirement*.

2.2.69C
FCA PRA

R

A BIPRU firm must not pay a *coupon* on an item of *hybrid capital* in the form of *core tier one capital* in accordance with ■ GENPRU 2.2.64 R (4)(b) unless:

- (1) the *firm* meets its *capital resources requirement*; and

(2) such a substituted payment preserves the *firm's* financial resources.

2.2.69D

FCA PRA

G

The *appropriate regulator* considers that a *BIPRU firm's* financial resources are not preserved under ■ GENPRU 2.2.69C R (2) unless, among other things, the conditions of the substituted payment are that:

- (1) there is no decrease in the amount of the *firm's core tier one capital*;
- (2) the deferred *coupon* is satisfied without delay using newly issued *core tier one capital* that has an aggregate fair value no more than the amount of the *coupon*;
- (3) the *firm* is not obliged to find new investors for the newly issued instruments; and
- (4) if the holder of the newly issued instruments subsequently sells the instruments and the sale proceeds are less than the value of the *coupon*, the *firm* is not obliged to issue further new instruments to cover the loss incurred by the holder of the instruments.

2.2.69E

FCA PRA

R

A *BIPRU firm* must cancel the payment of a *coupon* if circumstances arise whereby the payment of the *coupon* by newly issued instruments, in accordance with ■ GENPRU 2.2.64 R (4)(b), does not comply with the requirements of ■ GENPRU 2.2.69C R.

2.2.69F

FCA PRA

G

- (1) In relation to the cancellation or deferral of the payment of a *coupon* in accordance with ■ GENPRU 2.2.64 R (4) and ■ GENPRU 2.2.64 R (5), ■ GENPRU 2.2.68A R, or ■ GENPRU 2.2.69B R, the *appropriate regulator* expects that situations where a *coupon* may need to be cancelled or deferred will be resolved through analysis and discussion between the *firm* and the *appropriate regulator*. If the *appropriate regulator* and the *firm* do not agree on the cancellation or deferral of the payment of a *coupon*, then the *appropriate regulator* may consider using its powers under 55J of the *Act* to, on its own initiative, vary a *firm's Part 4A permission* to require it to cancel or defer a *coupon* in accordance with the *appropriate regulator's* view of the financial and solvency situation of the *firm*.
- (2) In considering a *firm's* financial and solvency situation, the *appropriate regulator* will normally take into account, among other things, the following:
 - (a) the *firm's* financial and solvency position before and after the payment of the *coupon*, in particular whether that payment, or other foreseeable internal and external events or circumstances, may increase the risk of the *firm* breaching its *capital resources requirement* or the *overall financial adequacy rule*;
 - (b) an appropriately stressed capital plan, covering 3-5 years, which includes the effect of the proposed payment of the *coupon*; and
 - (c) an evaluation of the risks to which the *firm* is or might be exposed and whether the level of *tier one capital* ensures the coverage of those risks, including stress tests on the main risks showing potential loss under different scenarios.
- (3) If the *BIPRU firm* is required to cancel or defer the payment of a *coupon* by the *appropriate regulator*, it may still be able to pay the *coupon* by way of

newly issued *core tier one capital* in accordance with ■ GENPRU 2.2.64 R (4)(b) and ■ GENPRU 2.2.69C R. The *appropriate regulator* may consider using its powers under 55J of the *Act* to, on its own initiative, vary a *firm's Part 4A permission* to impose conditions on the use of such a mechanism or to require its cancellation, based on the factors outlined in this *guidance*.

Redemption of tier one instruments

2.2.70

FCA PRA

R

A *firm* may not include a *capital instrument* in its *tier one capital resources*, unless its contractual terms are such that:

- (1) (if it is redeemable other than in circumstances set out in ■ GENPRU 2.2.64 R (3)(a) (redemption on a winding up)) it is redeemable only at the option of the *firm* or, in the case of a *BIPRU firm*, on the date of maturity;
- (2) the *firm* cannot exercise that redemption right:
 - (a) before the fifth anniversary of its date of issue;
 - (b) unless it has given notice to the *appropriate regulator* in accordance with ■ GENPRU 2.2.74 R; and
 - (c) unless at the time of exercise of that right it complies with ■ GENPRU 2.1.13 R (the main capital adequacy rule for *insurers*) or the *main BIPRU firm Pillar 1 rules* and will continue to do so after redemption ;
- (3) (in the case of a *BIPRU firm* and if it is undated) if it provides for a moderate incentive for the *BIPRU firm* to redeem it, that incentive does not occur before the tenth anniversary of its date of issue; and
- (4) (in the case of a *BIPRU firm* and if it is dated):
 - (a) it has an original maturity date of at least 30 years after its date of issue; and
 - (b) it does not provide an incentive to redeem on any date other than its maturity date.

2.2.70A

FCA PRA

G

In the case of a *BIPRU firm*, an incentive to redeem is a feature of a *capital instrument* that would lead a reasonable market participant to have an expectation that the *firm* will redeem the instrument. The *appropriate regulator* considers that interest rate step-ups and principal stock settlements, in conjunction with a call option, are incentives to redeem. Only instruments with moderate incentives to redeem are permitted as *tier one capital*, in accordance with the limited conversion ratio in ■ GENPRU 2.2.138 R and the rule on step-ups in ■ GENPRU 2.2.147 R.

2.2.71

FCA PRA

R

A *firm* may include a term in a *tier one instrument* allowing the *firm* to redeem it before the date in ■ GENPRU 2.2.70 R (2)(a) if the following conditions are satisfied:

- (1) the other conditions in ■ GENPRU 2.2.70 R are met;
- (2) the circumstance that entitles the *firm* to exercise that right is:
 - (a) (in the case of an *insurer*) a change in law or regulation in any relevant jurisdiction or in the interpretation of such law or regulation by any court or authority entitled to do so; and
 - (b) (in the case of a *BIPRU firm*) a change in the applicable tax treatment or regulatory classification of those instruments;
- (3) (a) (in the case of an *insurer*) it would be reasonable for the *firm* to conclude that it is unlikely that that circumstance will occur, judged at the time of issue or, if later, at the time that the term is first included in the terms of the *tier one instrument*; and
 - (b) (in the case of a *BIPRU firm*) the circumstance that entitles the *firm* to exercise that right was not reasonably foreseeable at the date of issue of the *tier one instrument*; and
- (4) the *firm's* right is conditional on it obtaining the *appropriate regulator's* consent in the form of a *waiver* of ■ GENPRU 2.2.72 R.

2.2.72

FCA PRA

R

A *firm* must not redeem a *tier one instrument* in accordance with a term included under ■ GENPRU 2.2.71 R.

2.2.73

FCA PRA

G

The purpose of ■ GENPRU 2.2.71 R to ■ GENPRU 2.2.72 R is this. In general a *tier one instrument* should not be redeemable by the *firm* before its fifth anniversary. However there may be circumstances in which it would be reasonable for the *firm* to redeem it before then. ■ GENPRU 2.2.71 R allows the *firm* to include a right to redeem the instrument before the fifth anniversary in certain circumstances. A tax call is an example of a term that may be allowed. ■ GENPRU 2.2.71 R says that the terms of the *tier one instrument* should provide that the *firm* should not be able to exercise that right without the *appropriate regulator's* consent. Any such consent will be given in the form of a *waiver* allowing early repayment. Thus although a *firm* may include a right to redeem early in the terms of a *tier one instrument* without the need to apply for a *waiver* the actual exercise of that right will require a *waiver*.

2.2.74

FCA PRA

R

A *firm* must not redeem any *tier one instrument* that it has included in its *tier one capital resources* unless it has notified the *appropriate regulator* of its intention at least one month before it becomes committed to do so. When giving notice, the *firm* must provide details of its position after such redemption in order to show how it will:

- (1) meet its *capital resources requirement*;

- (2) have sufficient financial resources to meet the *overall financial adequacy rule* ; and
- (3) in the case of a *BIPRU firm*, not otherwise suffer any undue effects to its financial or solvency conditions.

2.2.74A

FCA PRA

G

The *appropriate regulator* considers that, in order to comply with ■ GENPRU 2.2.74 R, the *firm* should, at a minimum, provide the *appropriate regulator* with the following information:

- (1) a comprehensive explanation of the rationale for the redemption;
- (2) the *firm's* financial and solvency position before and after the redemption, in particular whether that redemption, or other foreseeable internal and external events or circumstances, may increase the risk of the *firm* breaching its *capital resources requirement*;
- (3) an appropriately stressed capital plan covering 3-5 years, which includes the effect of the proposed redemption; and
- (4) an evaluation of the risks to which the *firm* is or might be exposed and whether the level of *tier one capital* ensures the coverage of such risks including stress tests on the main risks showing potential loss under different scenarios.

2.2.74B

FCA PRA

R

If a *BIPRU firm* does not comply with its *capital resources requirement* or if the redemption of any dated *tier one instrument* would cause it to breach its *capital resources requirement*, it must suspend the redemption of its dated *tier one instruments*.

2.2.75

FCA PRA

R

If a *firm* gives notice of the redemption or repayment of any *tier one instrument*, the *firm* must no longer include that instrument in its *tier one capital resources*.

Step-ups and redeemable tier one instruments: Insurer only.....

2.2.76

PRA

R

In the case of an *insurer*, in relation to an *innovative tier one instrument* which is redeemable and which satisfies the following conditions:

- (1) it is or may become subject to a *step-up*; and
 - (2) a reasonable *person* would think that:
 - (a) the *firm* is likely to redeem it before the tenth anniversary of its date of issue; or
 - (b) the *firm* is likely to have an economic incentive to redeem it before the tenth anniversary of its date of issue;
- the redemption date in ■ GENPRU 2.2.70 R (2)(a) is amended by replacing "fifth anniversary" with "tenth anniversary".

Meaning of redemption

2.2.77

FCA PRA

R

- (1) This rule applies to a *tier one instrument*, *tier two instrument* or *tier three instrument* (instrument A) that under its terms is exchanged for or converted into another instrument or is subject to a similar process.
- (2) This rule also applies to instrument A if under its terms it is redeemed out of the proceeds of the issue of new securities.
- (3) If the instrument with which instrument A is replaced is included in the *same stage of capital* or a *higher stage of capital* as instrument A, instrument A is treated as not having been redeemed or repaid for the purposes of GENPRU 2.2.
- (4) (3) does not apply to ■ GENPRU 2.2.114 R (Redeemable instrument likely to be repaid etc), ■ GENPRU 2.2.74 R (Notice of redemption of *tier one instruments*), ■ GENPRU 2.2.174 R (Notice of redemption of *tier two instruments*) or ■ GENPRU 2.2.245 R (so far as it relates to notice of redemption of *tier three instruments*).
- (5) (3) only applies if it would be reasonable (taking into account the economic substance) to treat the original instruments as continuing in issue on the same or a more favourable basis. The question of whether that basis is more or less favourable must be judged from the point of view of the adequacy of the *firm's capital resources*.

2.2.78

FCA PRA

R

- (1) A *share* is not redeemable for the purposes of this section merely because the Companies Act 1985, the Companies (Northern Ireland) Order 1986 or the Companies Act 2006 allows the *firm* that issued it to purchase it.
- (2) A *capital instrument* is not redeemable for the purposes of this section merely because the *firm* that issued it has a right to purchase it similar to the right in (1).

2.2.79

FCA PRA

G

This section generally uses the term repay and redeem interchangeably.

Purchases of tier one instruments: BIPRU firm only

2.2.79A

FCA PRA

R

A BIPRU *firm* must not purchase a *tier one instrument* that it has included in its *tier one capital resources* unless:

- (1) the *firm* initiates the purchase;
- (2) [deleted]
- (3) the *firm* has given notice to the *appropriate regulator* in accordance with ■ GENPRU 2.2.79G R; and

- (4) (in the case of *hybrid capital*) it is on or after the fifth anniversary of the date of issue of the instrument.

2.2.79B

FCA PRA

G

In exceptional circumstances a *BIPRU firm* may apply for a *waiver* of ■ GENPRU 2.2.79AR (4) under section 138A (Modification or waiver of rules) of the *Act*.

2.2.79C

FCA PRA

R

■ GENPRU 2.2.79AR (4) does not apply if:

- (1) the *firm* replaces the *capital instrument* it intends to purchase with a *capital instrument* that is included in a *higher stage of capital* or the *same stage of capital*; and
- (2) the replacement *capital instrument* has already been issued.

2.2.79D

FCA PRA

R

■ GENPRU 2.2.79AR (4) does not apply if:

- (1) the *firm* intends to hold the purchased instrument for a temporary period as *market maker*; and
- (2) the purchased instruments held by the *firm* do not exceed the lower of:
 - (a) 10% of the relevant issuance; or
 - (b) 3% of the *firm's* total issued *hybrid capital*.

2.2.79E

FCA PRA

G

In the circumstances provided for in ■ GENPRU 2.2.79D R, a *firm* would purchase the instrument and, instead of cancelling it, the *firm* would hold the instrument for a temporary period. In that case a *firm* should have in place adequate policies to take into account any relevant regulations and *rules*, which include those relating to market abuse.

2.2.79F

FCA PRA

R

For the purposes of calculating its *tier one capital resources*, a *firm* must deduct the amount of any item of *hybrid capital* which it then holds.

2.2.79G

FCA PRA

R

A *BIPRU firm* must not purchase a *tier one instrument* in accordance with ■ GENPRU 2.2.79A R unless it has notified the *appropriate regulator* of its intention at least one month before it becomes committed to doing so. When giving notice, the *firm* must provide details of its position after the purchase in order to show how, over an appropriate timescale, adequately stressed, and without planned recourse to the capital markets, it will:

- (1) meet its *capital resources requirement*; and
- (2) have sufficient financial resources to meet the *overall financial adequacy rule*.

2.2.79H

FCA PRA

G

The *appropriate regulator* considers that:

- (1) in order to comply with ■ GENPRU 2.2.79G R, the *firm* should, at a minimum, provide the *appropriate regulator* with the following information:
 - (a) a comprehensive explanation of the rationale for the purchase;
 - (b) the *firm's* financial and solvency position before and after the purchase, in particular whether the purchase, or other foreseeable internal and external events or circumstances, may increase the risk of the *firm* breaching its *capital resources requirement* or the *overall financial adequacy rule*;
 - (c) an appropriately stressed capital plan covering 3-5 years, which includes the effect of the proposed purchase; and
 - (d) an evaluation of the risks to which the *firm* is or might be exposed and whether the level of *tier one capital* ensures the coverage of such risks including stress tests on the main risks showing potential loss under different scenarios; and
- (2) the proposed purchase should not be on the basis that the *firm* reduces capital on the date of the purchase and then plans to raise new external capital during the following 3-5 years to replace the purchased capital.

2.2.79I

FCA PRA

R

A *BIPRU firm* must not announce to the holders of a *tier one instrument* its intention to purchase that instrument unless it has notified that intention to the *appropriate regulator* in accordance with ■ GENPRU 2.2.79G R and it has not, during the period of one month from the date of giving notice, received an objection from the *appropriate regulator*.

2.2.79J

FCA PRA

R

If a *BIPRU firm* announces the purchase of any *tier one instrument*, the *firm* must no longer include that instrument in its *tier one capital resources*.

2.2.79K

FCA PRA

R

If a *BIPRU firm* does not comply with its *capital resources requirement*, or if the purchase of any *tier one instrument* would cause it to breach its *capital resources requirement*, it must suspend the purchase of *tier one instruments*.

2.2.79L

FCA PRA

G

A *firm* should continue to exclude from its *tier one capital resources* all *tier one instruments* that are the subject of a purchase notification under ■ GENPRU 2.2.79G R and for which the offer to purchase has been declined by the instrument holders unless the purchase offer period has expired.

Loss absorption

2.2.80

FCA PRA

R

A *firm* may not include a *share* in its *tier one capital resources* unless (in addition to complying with the other relevant *rules* in ■ GENPRU 2.2):

- (1) (in the case of a *firm* that is a company as defined in the Companies Act 2006 it is "called-up *share capital*" within the meaning given to that term in that Act ; or
- (2) (in the case of a *building society*) it is a *deferred share*; or

- (3) (in the case of any other *firm*) it is:
 - (a) in economic terms; and
 - (b) in its characteristics as capital (including loss absorbency, permanency, ranking for repayment and fixed costs);
 substantially the same as called-up *share* capital falling into (1).

2.2.81 **R**
FCA PRA

A *firm* may not include a *capital instrument* other than a *share* in its *tier one capital resources* unless it complies with ■ GENPRU 2.2.80 R (3).

2.2.82 **G**
FCA PRA

There are additional loss absorption requirements for (in the case of an *insurer*) *innovative tier one capital* and (in the case of a *BIPRU firm*) *hybrid capital* in ■ GENPRU 2.2.116 R to ■ GENPRU 2.2.118 R (Other tier one capital: loss absorption) and (in the case of a *BIPRU firm*) for *core tier one capital* in ■ GENPRU 2.2.83AR (9) to ■ (10) (General conditions for eligibility of capital instruments as core tier one capital (*BIPRU firm* only)).

Core tier one capital: permanent share capital

2.2.83 **R**
FCA PRA

Permanent share capital means an item of capital which (in addition to satisfying ■ GENPRU 2.2.64 R) meets the following conditions:

- (1) it is:
 - (a) an ordinary *share*; or
 - (b) a *members' contribution*; or
 - (c) part of the *initial fund* of a *mutual*; or
 - (d) a *deferred share*;
- (2) any *coupon* on it is not cumulative, the *firm* is under no obligation to pay a *coupon* in any circumstances and the *firm* has the right to choose the amount of any *coupon* that it pays;
- (3) the terms upon which it is issued do not permit redemption and it is otherwise incapable of being redeemed to at least the same degree as an ordinary *share* issued by a company incorporated under the Companies Act 2006 (whether or not it is such a *share*) ; and
- (4) (in the case of a *BIPRU firm*) it meets the conditions set out in ■ GENPRU 2.2.83A R (General conditions for eligibility of capital instruments as core tier one capital (*BIPRU firm* only)).

General conditions for eligibility of capital instruments as core tier one capital (BIPRU firm only)

2.2.83A **R**
FCA PRA

The conditions that a *BIPRU firm's permanent share capital* must comply with under ■ GENPRU 2.2.83A R (4) or that a *BIPRU firm's eligible*

partnership capital or *eligible LLP members' capital* must comply with under ■ GENPRU 2.2.95 R are as follows:

- (1) it is undated;
- (2) the terms upon which it is issued do not give the holder a preferential right to the payment of a *coupon*;
- (3) the terms upon which it is issued do not indicate the amount of any *coupon* that may be payable nor impose an upper limit on the amount of any *coupon* that may be payable;
- (4) the *firm's* obligations under the instrument do not constitute a liability (actual, contingent or prospective) under section 123(2) of the Insolvency Act 1986 and the holder has no right to petition for the winding up or administration of the *firm* or for any similar procedure in relation to the *firm* arising from the non-payment of a *coupon* or any other sums payable under the instrument;
- (5) there is no contractual or other obligation arising out of the terms upon which it is issued that requires the *firm* to repay capital to the holders other than on a liquidation of the *firm*;
- (6) the terms upon which it is issued do not include a dividend pusher or a dividend stopper;
- (7) the *firm* is under no obligation to issue *core tier one capital* or to make a payment in kind in lieu of making a *coupon* payment and non-payment of a *coupon* is not an event of default on the part of the *firm*;
- (8) it is simple and the terms upon which it is issued are clearly defined;
- (9) it is able to fully and unconditionally absorb losses on a non-discretionary basis as soon as they arise to allow the *firm* to continue trading, and it absorbs losses before all *capital instruments* that are not eligible for inclusion in stage A of the *capital resources table* and equally and proportionately with all *capital instruments* that are eligible for inclusion in stage A of the *capital resources table*;
- (10) it ranks for repayment on winding up, administration or any other similar process lower than all other items of capital, and on a liquidation of the *firm* the holders have a claim on the residual assets remaining after satisfaction of all prior claims that is proportional to their holding and do not have a priority claim or a fixed claim for the nominal amount of their holding;

- (11) the *firm* has not provided the holder with a direct or indirect financial contribution specifically to pay for the whole or a part of its subscription or purchase;
- (12) a reasonable person would not think that the *firm* is likely to redeem or purchase it because of the description of its characteristics used in its marketing and in its contractual terms of issue; and
- (13) its issue is not connected with one or more other transactions which, when taken together with its issue, could result in it no longer displaying all of the characteristics set out in
 - GENPRU 2.2.83R (2), ■ GENPRU 2.2.83AR (1) to ■ (12) and (in the case of *permanent share capital*) ■ GENPRU 2.2.83R (3).

2.2.83B
FCA PRA

R A *BIPRU firm* must not include in stage A of the *capital resources table* different classes of the same *share* type (for example "A ordinary shares" and "B ordinary shares") that meet the conditions in ■ GENPRU 2.2.83 R and ■ GENPRU 2.2.83A R but have differences in voting rights, unless it has notified the *appropriate regulator* of its intention at least one month before the *shares* are issued or (in the case of existing issued *shares*) the differences in voting rights take effect.

2.2.83C
FCA PRA

R A *BIPRU firm* must not pay a *coupon* on a *tier one instrument* included in stage A of the *capital resources table* if it has no distributable reserves.

2.2.83D
FCA PRA

G A *BIPRU firm* may disclose its dividend policy, provided that the policy only reflects the current intention of the *firm* and does not undermine the *firm's* right to choose the amount of any *coupon* that it pays.

Core tier one capital: exception to eligibility criteria (building societies only)

2.2.83E
PRA

R A *building society* may include in stage A of the *capital resources table* a *capital instrument* that includes in its terms of issue an upper limit on the amount of any *coupon* that may be payable and the prohibition on a *coupon* limit under ■ GENPRU 2.2.83AR (3) does not apply to that *capital instrument*, provided that:

- (1) the *capital instrument* satisfies all other conditions for eligibility as *core tier one capital* set out in ■ GENPRU 2.2.83 R to ■ GENPRU 2.2.83A R;
- (2) the *coupon* limit has been imposed by law or the constitutional documents of the *firm*;
- (3) the objective of the limit is to protect the capital reserves of the *firm*;

- (4) the *firm* continues to have the effective right to choose the amount of any *coupon* that it pays;
- (5) all other *capital instruments* issued by the *firm* and included in stage A of the *capital resources table*:
 - (a) meet the conditions set out in ■ GENPRU 2.2.83 R (2), ■ GENPRU 2.2.83 R (3) and ■ GENPRU 2.2.83A R (General conditions for eligibility of capital instruments as core tier one capital (BIPRU firm only)); and
 - (b) if subject to a *coupon* limit, are subject to the same *coupon* limit; and
- (6) any preferential *coupon* on a *capital instrument* included in stage A of the *capital resources table*, arising as a result of the inclusion of a *coupon* limit on another *capital instrument*, must be restricted to a fixed multiple of the *coupon* payment on the *capital instrument* that is subject to the *coupon* limit.

■ GENPRU 2.2.83A R (2) to ■ (3) do not prevent a *capital instrument* from being included in stage A of the *capital resources table* if the only reason for those prohibitions not being met is that a preferential *coupon* arises, and is restricted, in the manner referred to in this paragraph (6).

2.2.83F

PRA

R

A *building society* must not issue a *capital instrument* that includes a *coupon* limit in its terms of issue in accordance with ■ GENPRU 2.2.83E R unless it has notified the PRA of its intention to do so at least one month before the intended date of issue.

2.2.83G

PRA

G

Under ■ GENPRU 2.2.83E R (4), an effective right means that in practice the *firm* has, and exercises, full discretion to choose the amount of *coupon* that it pays (for example, it has not fettered that discretion by indicating to instrument holders that the *coupon* limit is the standard level of *coupon* they will receive).

2.2.83H

PRA

G

The purpose of ■ GENPRU 2.2.83E R (6) is to limit the potential preferential rights that may arise on *capital instruments* that are not subject to a *coupon* limit. The PRA considers that "preferential" refers to both priority of *coupon* payment and level of *coupon* payment. Therefore the PRA considers that:

- (1) a *coupon* arising on a *capital instrument* which is not subject to an explicit *coupon* limit within its terms of issue is likely to be preferential to a *coupon* on a *capital instrument* included in the *same stage of capital* which is subject to a *coupon* limit; and
- (2) the preference so arising should be restricted so that it is not an unlimited preference.

2.2.84

FCA PRA

G

Core tier one capital: additional information

In the case of an *insurer*, ■ GENPRU 2.2.83 R (2) and ■ GENPRU 2.2.83 R (3) have the effect that the *firm* should be under no obligation to make any payment in respect of a *tier one instrument* if it is to form part of its *permanent share capital* unless and until the *firm* is wound up. A *tier one instrument* that forms part of *permanent share capital* should not therefore count as a liability before the *firm* is wound up. The fact that relevant company law permits the *firm* to make earlier repayment does not mean that the *tier one instruments* are not eligible. However, the *firm* should not be required by any contractual or other obligation arising out of the terms of that capital to repay *permanent share capital*. Similarly a *tier one instrument* may still qualify if company law allows dividends to be paid on this capital, provided the *firm* is not contractually or otherwise obliged to pay them. There should therefore be no fixed costs.

■ GENPRU 2.2.83A R to ■ GENPRU 2.2.83F R impose more specific conditions on *coupon* payment and winding up which are applicable to *BIPRU firms*.

2.2.84A

FCA PRA

G

Under ■ GENPRU 2.2.83A R (13) a *tier one instrument* does not meet the conditions for inclusion as *core tier one capital* if in isolation it does meet those requirements but fails to meet those requirements when other transactions are taken into account. Examples of those transactions include guarantees, pledges of assets or other side agreements provided by the *firm* to the holder of a *tier one instrument* designed to enhance the legal or economic seniority of the *tier one instrument*.

Core tier one capital: profit and loss account and other reserves: Losses

2.2.85

FCA PRA

R

- (1) Negative amounts, including any interim net losses (but in the case of a *BIPRU investment firm*, only material interim net losses), must be deducted from profit and loss account and other reserves.
- (2) For these purposes material interim net losses mean unaudited interim losses arising from a *firm's trading book* and *non-trading book* business which exceed 10% of the sum of its *capital resources* calculated at stage A (Core tier one capital) in the *capital resources table*.
- (3) If interim losses as referred to in (2) exceed the 10% figure in (2) then a *BIPRU investment firm* must deduct the whole amount of those losses and not just the excess.

Core tier one capital: profit and loss account and other reserves: Losses arising from valuation adjustments (BIPRU firm only)

2.2.86

FCA PRA

R

- (1) This *rule* applies to *trading book* valuation adjustments or reserves referred to in ■ GENPRU 1.3.29 R to ■ GENPRU 1.3.35A G (Valuation adjustments and reserves). It applies to a *BIPRU firm*.
- (2) When valuation adjustments or reserves give rise to losses of the current financial year, a *firm* must treat them in accordance with ■ GENPRU 2.2.85 R.

- (3) Valuation adjustments or reserves which exceed those made under the accounting framework to which a *firm* is subject must be treated in accordance with (2) if they give rise to losses and under ■ GENPRU 2.2.248 R (Net interim *trading book* profits) otherwise.

Core tier one capital: profit and loss account and other reserves: Dividends

2.2.87
FCA PRA

R

Dividends must be deducted from reserves as soon as they are foreseeable

2.2.87A
FCA PRA

G

Each *firm* must assess for itself when, in its particular circumstances, dividends are foreseeable. A dividend is foreseeable at the latest:

- (1) in the case of an interim dividend, when it is declared by the *directors*; or
- (2) in the case of a final dividend, when the *directors* approve the dividend to be proposed at the annual general meeting.

Core tier one capital: profit and loss account and other reserves: Capital contributions

2.2.88
FCA PRA

R

A *firm* must account for a capital contribution as an increase in reserves and may, notwithstanding ■ GENPRU 2.2.63 R, count that increase in reserves as *core tier one capital*.

2.2.89
FCA PRA

G

An item of capital qualifies as a capital contribution if it is a gift of capital (and, as such, is not repayable) and a *coupon* is not payable on it.

Core tier one capital: profit and loss account and other reserves: Securitisation (BIPRU firm only)

2.2.90
FCA PRA

R

In the case of a *BIPRU firm* which is the *originator* of a *securitisation*, net gains arising from the capitalisation of future income from the *securitised* assets and providing *credit enhancement* to *positions* in the *securitisation* must be excluded from profit and loss account and other reserves.

Core tier one capital: profit and loss account and other reserves: Valuation

2.2.91
FCA PRA

G

Profit and loss account and other reserves should be valued in accordance with the *rules* in ■ GENPRU 1.3 (Valuation).

Core tier one capital: profit and loss account and other reserves: Revaluation reserves (BIPRU firm only)

2.2.92
FCA PRA

G

A revaluation reserve is not included as part of a *BIPRU firm's* profit and loss account and other reserves. It is dealt with separately and forms part of a *BIPRU firm's upper tier two capital*.

2.2.93

FCA PRA

R

Core tier one capital: partnership capital account (BIPRU firm only)*Eligible partnership capital* means a partners' account:

- (1) into which capital contributed by the partners is paid; and
- (2) from which under the terms of the partnership agreement an amount representing capital may be withdrawn by a partner only if:
 - (a) he ceases to be a partner and an equal amount is transferred to another such account by his former partners or any *person* replacing him as their partner;
 - (b) the partnership is wound up or otherwise dissolved; or
 - (c) the *BIPRU firm* has ceased to be *authorised* or no longer has a *Part 4A permission* .

2.2.94

FCA PRA

R

Core tier one capital: Eligible LLP members' capital (BIPRU firm only)*Eligible LLP members' capital* means a members' account:

- (1) into which capital contributed by the members is paid; and
- (2) from which under the terms of the *limited liability partnership* agreement an amount representing capital may be withdrawn by a member only if:
 - (a) he ceases to be a member and an equal amount is transferred to another such account by his former fellow members or any *person* replacing him as a member;
 - (b) the *limited liability partnership* is wound up or otherwise dissolved; or
 - (c) the *BIPRU firm* has ceased to be *authorised* or no longer has a *Part 4A permission* .

Core tier one capital: Eligible LLP members' and partnership capital accounts (BIPRU firm only)

2.2.95

FCA PRA

R

A *BIPRU firm* that is a partnership or a *limited liability partnership* may not include *eligible partnership capital* or *eligible LLP members' capital* in its *tier one capital resources* unless (in addition to ■ GENPRU 2.2.62 R (General conditions relating to *tier one capital*)) it complies with ■ GENPRU 2.2.83 R (2) (Coupons should not be cumulative or mandatory) and ■ GENPRU 2.2.83A R to ■ GENPRU 2.2.83C R (General conditions for eligibility of capital instruments as core tier one capital (BIPRU firm only)). However, ■ GENPRU 2.2.64 R (3) (Redemption), ■ GENPRU 2.2.83A R (5) (Capital repayment) and ■ GENPRU 2.2.83A R (12) (Characteristics in contract) are replaced by ■ GENPRU 2.2.93 R or ■ GENPRU 2.2.94 R.

2.2.96

FCA PRA

G

If a *firm* has surplus *eligible partnership capital* or *eligible LLP members' capital* that it wishes to repay in circumstances other than those set out in ■ GENPRU 2.2.93 R or ■ GENPRU 2.2.94 R it may apply to the *appropriate regulator* for a *waiver* to allow it to do so. If a *firm* applies for such a *waiver* the information that the *firm* supplies with the application might include:

- (1) a demonstration that the *firm* would have sufficient *capital resources* to meet its *capital resources requirement* immediately after the repayment;
- (2) a demonstration that the *firm* would have sufficient financial resources to meet any *individual capital guidance* and the *firm's* latest assessment under the *overall Pillar 2 rule* immediately after the repayment; and
- (3) a two to three year capital plan demonstrating that the *firm* would be able to meet the requirements in (1) and (2) at all times without needing further capital injections.

Core tier one capital: Other capital items for limited liability partnerships and partnerships (BIPRU firm only)

2.2.97

FCA PRA

R

The items *permanent share capital* and *share premium account* (which form part of *core tier one capital*) do not apply to a *BIPRU firm* that is a partnership or a *limited liability partnership*.

2.2.98

FCA PRA

R

Without prejudice to ■ GENPRU 2.2.62 R (Tier one capital: General), the item other reserves (which forms part of the item profit and loss and other reserves) applies to a *BIPRU firm* that is a partnership or a *limited liability partnership* to the extent the reserves correspond to reserves that are eligible for inclusion as other reserves in the case of a *BIPRU firm* that is incorporated under the Companies Act 2006 .

2.2.99

FCA PRA

G

A *BIPRU firm* that is a partnership or a *limited liability partnership* should include profit and loss (taking into account interim losses or material interim net losses) in its *core tier one capital*.

Core tier one capital: partnership and limited liability partnership excess drawings (BIPRU firm only)

2.2.100

FCA PRA

R

A *BIPRU firm* which is a partnership or *limited liability partnership* must deduct at stage E of the calculation in the *capital resources table* (Deductions from tier one capital) the amount by which the aggregate of the amounts withdrawn by its partners or members exceeds the profits of that *firm*. Amounts of *eligible partnership capital* or *eligible LLP members' capital* repaid in accordance with ■ GENPRU 2.2.93 R or ■ GENPRU 2.2.94 R are not included in this calculation.

Core tier one capital: Share premium account

2.2.101

FCA PRA

R

- (1) A *firm* must include *share premium account* relating to the issue of a *share* forming part of its *core tier one capital* in its *core tier one capital*.

- (2) A *firm* must include *share* premium account relating to the issue of a *share* forming part of another tier of capital in that other tier.
- (3) A *firm* that is incorporated under the Companies Act 2006 may include its *share* premium account as *core tier one capital* notwithstanding (2) to the extent that the terms of issue of the *share* concerned provide that any premium is not repayable on redemption.
- (4) Paragraph (3) applies to a *firm* that is not incorporated under the Companies Act 2006 if its *share* premium account is subject to substantially the same or greater restraints on use than a *share* premium account falling into (3).

Core tier one capital: externally verified interim net profits

2.2.102

FCA PRA

R

Externally verified interim net profits are interim profits which have been verified by a *firm's* external auditors after deduction of tax, foreseeable dividends and other appropriations.

2.2.103

FCA PRA

G

A *firm* may include interim profits before a formal decision has been taken only if these profits have been verified, in accordance with the relevant Auditing Practices Board's Practice Note, by *persons* responsible for the auditing of the accounts.

Core tier one capital: valuation differences (insurer only)

2.2.104

PRA

R

■ GENPRU 2.2.104 R to ■ GENPRU 2.2.107 R only apply to an *insurer*.

2.2.105

PRA

R

Valuation differences are all differences between the valuation of assets and liabilities as valued in *GENPRU* and the valuation that the *insurer* uses for its external financial reporting purposes, except valuation differences which are dealt with elsewhere in the *capital resources table*. The sum of these valuation differences must either be added to (if positive) or deducted from (if negative) an *insurer's capital resources* in accordance with the *capital resources table*.

2.2.106

PRA

G

Additions to and deductions from *capital resources* will arise from the application of asset and liability valuation and admissibility rules (see ■ GENPRU 1.3 (Valuation), ■ GENPRU 2.2.251 R (Deductions from total capital: Inadmissible assets) and ■ GENPRU 2 Annex 7 R (Admissible assets in insurance)). Downward adjustments include *discounting of technical provisions* for *general insurance business* (which is optional for financial reporting but not permitted for regulatory valuation - see ■ GENPRU 2.2.107 R) and derecognition of any *defined benefit asset* in respect of a *defined benefit occupational pension scheme* (see ■ GENPRU 1.3.9 R (2) (General requirements: Adjustments to accounting values)). Details of valuation differences relating to *technical provisions* and liability adjustments for *long-term insurance business* are set out in ■ INSPRU 1.2 (Mathematical reserves). In particular, contingent loans or other arrangements which are not valued as a liability under ■ INSPRU 1.2.79 R (2) (Reinsurance) result in a positive valuation difference.

2.2.107

PRA

R

- (1) Subject to (3), this *rule* applies to an *insurer* that carries on *general insurance business* and which *discounts* or reduces its *technical provisions* for *claims* outstanding.
- (2) An *insurer* of a kind referred to in (1) must deduct from its *capital resources* the difference between the undiscounted *technical provisions* or *technical provisions* before deductions, and the discounted *technical provisions* or *technical provisions* after deductions. This adjustment must be made for all *general insurance business classes*, except for risks listed under *classes 1 and 2*. For *classes* other than 1 and 2, no adjustment needs to be made in respect of the discounting of annuities included in *technical provisions*. For *classes 1 and 2* (other than annuities), if the expected average interval between the settlement date of the *claims* being discounted and the accounting date is not at least four years, the *insurer* must deduct:
 - (a) the difference between the undiscounted *technical provisions* and the discounted *technical provisions*; or
 - (b) where it can identify a subset of *claims* such that the expected average interval between the settlement date of the *claims* and the accounting date is at least four years, the difference between the undiscounted *technical provisions* and the discounted *technical provisions* for the other claims.
- (3) This *rule* does not apply to a *pure reinsurer* which became a *firm in run-off* before 31 December 2006 and whose *Part 4A permission* has not subsequently been varied to add back the *regulated activity of effecting contracts of insurance*.

Core tier one capital: fund for future appropriations (insurer only)

2.2.108

PRA

R

In relation to an *insurer* the fund for future appropriations means the fund of the same name required by the *insurance accounts rules*, comprising all funds the allocation of which either to *policyholders* or to shareholders has not been determined by the end of the *financial year*, or the balance sheet items under *international accounting standards* which in aggregate represent as nearly as possible that fund.

Core tier one capital: deferred shares (building society only)

2.2.108A

PRA

R

A *building society* may include a *deferred share* at stage A of the calculation in the *capital resources table* if (in addition to satisfying all the other requirements in relation to *tier one capital*) it is *permanent share capital* and is otherwise equivalent to an ordinary *share* in terms of its capital qualities, taking into account the specific constitution of *building societies* under the Building Societies Act 1986.

2.2.108B

PRA

G

The other main provisions relevant to inclusion of a *deferred share* in *tier one capital* are ■ GENPRU 2.2.62 R (Tier one capital: General), ■ GENPRU 2.2.64 R (General conditions for

eligibility as tier one capital), ■ GENPRU 2.2.65 R (Connected transactions) and ■ GENPRU 2.2.80 R (Loss absorption).

Other tier one capital: perpetual non-cumulative preference shares (insurer only)

2.2.109 **R** In the case of an *insurer*, a perpetual non-cumulative *preference share* **PRA** may be included at stage B of the calculation in the *capital resources table* if (in addition to satisfying all the other requirements in relation to *tier one capital*) it satisfies the following conditions:

- (1) any *coupon* on it is not cumulative, and the *firm* is under no obligation to pay a *coupon* in any circumstances; and
- (2) it is not an *innovative tier one instrument*.

2.2.110 **G** The other main provisions relevant to the eligibility of a perpetual non-cumulative *preference share* for inclusion by an *insurer* in *tier one capital* are ■ GENPRU 2.2.62 R **PRA** (Tier one capital: General), ■ GENPRU 2.2.64 R (General conditions for eligibility as tier one capital), ■ GENPRU 2.2.65 R (Connected transactions), ■ GENPRU 2.2.70 R to ■ GENPRU 2.2.75 R (Redemption of *tier one instruments*) and ■ GENPRU 2.2.80 R (Loss absorption). The *rules* about *innovative tier one capital* are also relevant as they may result in perpetual non-cumulative *preference shares* being treated as *innovative tier one capital*. Perpetual non-cumulative *preference shares* should be perpetual and redeemable only at the *firm's* option. Perpetual *preference shares* should be non-cumulative if they are to be included at stage B of the calculation in the *capital resources table*. Any feature that, in conjunction with a call, would make a *firm* more likely to redeem perpetual non-cumulative *preference shares* would normally result in classification as an *innovative tier one instrument*. Such features would include, but not be limited to, a *step-up*, bonus *coupon* on redemption or redemption at a premium to the original issue price of the *share*.

2.2.111 **R** [deleted]

2.2.112 **G** [deleted]

Other tier one capital: innovative tier one capital: general (insurer only)

2.2.113 **R** If, in the case of an *insurer*, an item of capital is stated to be an *innovative tier one instrument* by the *rules* in ■ GENPRU 2.2, it cannot **PRA** be included in stages A (Core tier one capital) or B (Perpetual non-cumulative preference shares) of the calculation in the *capital resources table*.

Other tier one capital: innovative tier one capital: redemption (insurer only)

2.2.114 **R** If, in the case of an *insurer*, a *tier one instrument* : **PRA**

- (1) is redeemable; and

- (2) a reasonable *person* would think that:
 - (a) the *firm* is likely to redeem it; or
 - (b) the *firm* is likely to have an economic incentive to redeem it;

that *tier one instrument* is an *innovative tier one instrument*.

2.2.115

PRA

G

Any feature that in conjunction with a call would make an *insurer* more likely to redeem a *tier one instrument* would normally result in classification as *innovative tier one capital resources*. *Innovative tier one instruments* include but are not limited to those incorporating a *step-up* or principal stock settlement.

Other tier one capital: conditions for eligibility for hybrid capital to be included at the different stages B1, B2 and C of the calculation in the capital resources table (BIPRU firm only)

2.2.115A

FCA PRA

R

A *BIPRU firm* must not include a *capital instrument* at stage B1 of the calculation in the *capital resources table* unless (in addition to satisfying all the other requirements in relation to *tier one capital* and *hybrid capital*) its contractual terms are such that:

- (1) it cannot be redeemed in cash but can only be converted into *core tier one capital*;
- (2) it must be converted into *core tier one capital* by the *firm* during emergency situations;
- (3) the emergency situations referred to in (2):
 - (a) are clearly defined within the terms of the *capital instrument*, legally certain and transparent; and
 - (b) occur at the latest, and include, when the *BIPRU firm* does not meet its *capital resources requirement*;
- (4) the *appropriate regulator* may require its conversion into *core tier one capital* when the appropriate regulator considers it necessary;
- (5) it may be converted into *core tier one capital* by the *firm* or the holder of the instrument at any time; and
- (6) the maximum number of *capital instruments* which are *core tier one capital* into which it may be converted must:
 - (a) be determined at the date of its issue;
 - (b) be determined on the basis of the market value of those other instruments at the date of its issue;
 - (c) have an aggregate value equal to its par value; and
 - (d) not increase if the price of those other instruments decreases.

- 2.2.115B** FCA PRA G The intention of ■ GENPRU 2.2.115A R is to ensure that *capital instruments* included in stage B1 of the calculation in the *capital resources table* have the same permanence as *core tier one capital*; the presence of a call option for these instruments may reduce their permanence.
- 2.2.115C** FCA PRA G
- (1) In respect of ■ GENPRU 2.2.115A R (4), the *appropriate regulator* may require the *firm* to convert the instrument into *core tier one capital* based on its financial and solvency situation. The *appropriate regulator* will take into account, among other things, the factors identified at ■ GENPRU 2.2.69F G (2), adjusted to take into account the effects of a conversion rather than payment of a *coupon*.
 - (2) Even if a *firm* meets its *capital resources requirement*, the *appropriate regulator* may consider the amount or composition of the *firm's tier one capital* as inadequate to cover the financial and solvency risks of the *firm* in which event the *appropriate regulator* may require the *firm* to convert the instrument into *core tier one capital*.
- 2.2.115D** FCA PRA R A *BIPRU firm* may include a *capital instrument* at stage B2 of the calculation in the *capital resources table* if (while satisfying all the other requirements in relation to *tier one capital* and *hybrid capital*) it cannot be included at stage B1 of that calculation as it does not satisfy the requirements of ■ GENPRU 2.2.115A R.
- 2.2.115E** FCA PRA G
- (1) The other main provisions relevant to the eligibility of a *capital instrument* to be included at stages B1 and B2 of the calculation in the *capital resources table* are ■ GENPRU 2.2.62 R (Tier one capital: General), ■ GENPRU 2.2.64 R (General conditions for eligibility as tier one capital), ■ GENPRU 2.2.65 R (Connected transactions), ■ GENPRU 2.2.68A R (Dividend stoppers), ■ GENPRU 2.2.70 R to ■ GENPRU 2.2.75 R (Redemption of tier one instruments), ■ GENPRU 2.2.80 R (Loss absorption) and ■ GENPRU 2.2.116 R to ■ GENPRU 2.2.118 R (Other tier one capital: loss absorption).
 - (2) The *rule* about *hybrid capital* included at stage C of the calculation in the *capital resources table* in ■ GENPRU 2.2.115F R is also relevant. *Capital instruments* that would otherwise qualify for inclusion at stages B1 or B2 of the calculation in the *capital resources table* may only be eligible for inclusion at stage C of that calculation.
- 2.2.115F** FCA PRA R A *BIPRU firm* may include a *capital instrument* at stage C of the calculation in the *capital resources table*, and must not include it in stage B1 or B2 of that calculation, if (in addition to satisfying all the other requirements in relation to *tier one capital* and *hybrid capital*) it either:
- (1) is dated; or
 - (2) provides an incentive for the *firm* to redeem it, as assessed at the date of its issue.

2.2.115G

FCA PRA

G

An incentive to redeem is a feature of a *capital instrument* that would lead a reasonable market participant to have an expectation that the *firm* will redeem the instrument. The effect of ■ GENPRU 2.2.115F R (2) is that the classification of an instrument that provides an incentive to redeem is always assessed at the date of its issue, and it cannot be reclassified.

Other tier one capital: loss absorption

2.2.116

PRA

R

An *insurer* must not include a *capital instrument* that is not a *share* in its *innovative tier one capital resources* unless (in addition to satisfying all the other requirements in relation to *tier one capital* and *innovative tier one capital*) the *firm's* obligations under the instrument either:

- (1) do not constitute a liability (actual, contingent or prospective) under section 123(2) of the Insolvency Act 1986; or
- (2) do constitute such a liability but the terms of the instrument are such that:
 - (a) any such liability is not relevant for the purposes of deciding whether:
 - (i) the *firm* is, or is likely to become, unable to pay its debts; or
 - (ii) its liabilities exceed its assets;
 - (b) a *person* (including, but not limited to, a holder of the instrument) is not able to petition for the winding up or administration of the *firm* or for any similar procedure in relation to the *firm* on the grounds that the *firm* is or may become unable to pay any such liability; and
 - (c) the *firm* is not obliged to take into account such a liability for the purposes of deciding whether or not the *firm* is, or may become, insolvent for the purposes of section 214 of the Insolvency Act 1986 (wrongful trading).

2.2.116A

FCA PRA

R

A *BIPRU firm* must not include a *capital instrument* that is not a *share* at stage B1, B2 or C of the calculation in the *capital resources table* unless (in addition to satisfying all the other requirements in relation to *tier one capital* and *hybrid capital*) the *firm's* obligations under the instrument either:

- (1) do not constitute a liability (actual, contingent or prospective) under section 123(2) of the Insolvency Act 1986; or
- (2) do constitute such a liability but the terms of the instrument are such that:
 - (a) any such liability is not relevant for the purposes of deciding whether:

(i) the *firm* is, or is likely to become, unable to pay its debts;
or

(ii) its liabilities exceed its assets;

(b) a *person* (including, but not limited to, a holder of the instrument) is not able to petition for the winding up or administration of the *firm* or for any similar procedure in relation to the *firm* on the grounds that the *firm* is or may become unable to pay any such liability; and

(c) the *firm* is not obliged to take into account such a liability for the purposes of deciding whether or not the *firm* is, or may become, insolvent for the purposes of section 214 of the Insolvency Act 1986 (Wrongful trading).

2.2.117

FCA PRA

G

The effect of ■ GENPRU 2.2.116 R and ■ GENPRU 2.2.116A R is that if a *potential tier one instrument* does constitute a liability, this should only be the case when the *firm* is able to pay that liability but chooses not to do so. As *tier one capital resources* for an *insurer* should be undated, this will generally only be relevant on a solvent winding up of the *firm*. The holder should agree that the *firm* has no liability (including any contingent or prospective liability) to pay any amount to the extent to which that liability would cause the *firm* to become insolvent if it made the payment or to the extent that its liabilities exceed its assets or would do if the payment were made. The terms of the *capital instrument* should be such that the *directors* can continue to trade in the best interests of the senior creditors even if this prejudices the interests of the holders of the instrument.

2.2.117A

FCA PRA

R

A *BIPRU firm* must not include a *capital instrument* at stage B1, B2 or C of the calculation in the *capital resources table* unless (in addition to satisfying all the other requirements in relation to *tier one capital* and *hybrid capital*) its contractual terms provide for a mechanism within the instrument which:

(1) is clearly defined and legally certain;

(2) is disclosed and transparent to the market;

(3) makes the recapitalisation of the *firm* more likely by adequately reducing the potential future outflows to a holder of the *capital instrument* at certain trigger points;

(4) enables the *firm*, at and after the trigger points, to operate the mechanism; and

(5) when initiated, operates in one of the following ways:

(a) the principal of the instrument is written down permanently;
or

(b) the principal of the instrument is written down temporarily. During the write-down period any *coupon* payable on the

instrument must be cancelled and any related dividend stoppers and pushers must operate in a way that does not hinder recapitalisation; or

- (c) the instrument is converted into *core tier one capital*. The maximum number of *capital instruments* which are *core tier one capital* into which it must be converted must;
 - (i) be determined at the date of its issue;
 - (ii) be determined on the basis of the market value of those other instruments at the date of its issue;
 - (iii) have an aggregate value no more than 150% of its par value; and
 - (iv) not increase if the share price decreases; or
- (d) an alternative process applies which has the same or greater effect on the likelihood of recapitalisation as (a), (b), and (c).

2.2.117B

R

FCA PRA

The trigger points required by ■ GENPRU 2.2.117A R (3) must:

- (1) be clearly defined within the instrument and legally certain;
- (2) be disclosed and transparent to the market; and
- (3) be prudent and timely, and include trigger points which occur:
 - (a) before a breach of the *firm's capital resources requirement* and both:
 - (i) when the *firm's* losses lead to a significant reduction of the *firm's* retained earnings or other reserves which causes a significant deterioration of the *firm's* financial and solvency conditions; and
 - (ii) when it is reasonably foreseeable that the events described in (i) will occur; and
 - (b) when the *firm* is in breach of its *capital resources requirement*.

2.2.117C

G

FCA PRA

- (1) The effects of the mechanisms described in ■ GENPRU 2.2.117A R will be more meaningful if they happen immediately after losses cause a significant deterioration of the financial as well as the solvency situation and even before the reserves are exhausted.
- (2) If a *firm* does not operate the loss absorption mechanism in a prudent and timely way, then the *appropriate regulator* may consider using its powers under 55J of the *Act* to, on its own initiative, vary the *firm's Part 4A permission* to require it to operate the mechanism.

2.2.118 **R**
FCA PRA

- (1) An *insurer* may not include an *innovative tier one instrument*, unless it is a *preference share*, in its *tier one capital resources* unless it has obtained a properly reasoned independent legal opinion from an appropriately qualified individual confirming that the criteria in ■ GENPRU 2.2.64R (6) (loss absorption) and ■ GENPRU 2.2.80 R to ■ GENPRU 2.2.81 R (Loss absorption) are met.
- (2) A *BIPRU firm* may not include a *capital instrument* at stage B1, B2 or C of the calculation in the *capital resources table* unless it has obtained a properly reasoned independent legal opinion from an appropriately qualified individual confirming that the criteria in ■ GENPRU 2.2.62 R (Tier one capital: General), ■ GENPRU 2.2.64 R (1) to ■ GENPRU 2.2.64 R (9) (General conditions for eligibility as tier one capital) and ■ GENPRU 2.2.80 R to ■ GENPRU 2.2.81 R (Loss absorption) are met.

2.2.118A **G**
FCA PRA

For the purposes of ■ GENPRU 2.2.118R (2), the focus of the legal opinion in considering ■ GENPRU 2.2.64R (6)(b) should be on whether appropriate mechanisms exist and are designed to operate to ensure that the value of the *hybrid capital* instrument and the position of the *hybrid capital* holder are not enhanced by recapitalisation.

2.2.119 **G**
FCA PRA

For the purpose of ■ GENPRU 2.2.118 R, an independent legal opinion may be given by an *employee* of that *firm*, but if an *employee* does so he should not be part of the business unit responsible for the transaction (including the drafting of the issue documentation).

Other tier one capital: innovative tier one capital: coupons (insurer only)

2.2.120 **R**
PRA

In the case of an *insurer*, a *tier one instrument* with a cumulative or mandatory *coupon* is an *innovative tier one instrument*.

Other tier one capital: innovative tier one capital: step-ups (insurer only)

2.2.121 **R**
PRA

If, in the case of an insurer:

- (1) a *potential tier one instrument* is or may become subject to a *step-up*; and
- (2) that *potential tier one instrument* is redeemable at any time (whether before, at or after the time of the *step-up*);

that *potential tier one instrument* is an *innovative tier one instrument*.

2.2.122 **G**
PRA

See ■ GENPRU 2.2.146 R to ■ GENPRU 2.2.154 G for further *rules* and *guidance* on *step-ups*.

Other tier one capital: hybrid capital: indirectly issued tier one capital (BIPRU firm only)

2.2.123

R

FCA PRA

■ GENPRU 2.2.123 R to ■ GENPRU 2.2.137 R apply to a *BIPRU firm*.

2.2.124

R

FCA PRA

- (1) ■ GENPRU 2.2.123 R - ■ GENPRU 2.2.137 R apply to capital of a *firm* if:
- (a) either or both of the conditions in (2) are satisfied; and
 - (b) any of the *SPVs* referred to in (2) is a *subsidiary undertaking* of the *firm*.
- (2) The conditions referred to in (1) are:
- (a) that capital is issued to an *SPV*; or
 - (b) the subscription for the capital issued by the *firm* is funded directly or indirectly by an *SPV*.
- (3) A *BIPRU firm* may not include capital coming within this *rule* in its *capital resources* unless the requirements in the following *rules* are satisfied:
- (a) (if (2)(a) applies and (2)(b) does not) ■ GENPRU 2.2.127 R, ■ GENPRU 2.2.129 R and ■ GENPRU 2.2.132 R; or
 - (b) (in any other case) ■ GENPRU 2.2.133 R.

2.2.125

R

FCA PRA

A *BIPRU firm* may only count capital to which ■ GENPRU 2.2.124 R applies at stage C of the calculation in the *capital resources table*.

2.2.126

R

FCA PRA

For the purpose of ■ GENPRU 2.2, an *SPV* is, in relation to a *BIPRU firm*, any *undertaking* whose main activity is to raise funds for that *firm* or for a *group* to which that *BIPRU firm* belongs.

2.2.127

R

FCA PRA

The *SPV* referred to in ■ GENPRU 2.2.124 R (2)(a) must satisfy the following conditions:

- (1) it is controlled by the *firm* and may not operate independently of the *firm*;
- (2) the rights of investors in the *SPV* who do not belong to the *group* of the *BIPRU firm* in question are not such as to affect the ability of the *firm* to control the *SPV*;
- (3) all or virtually all of its *exposures* (calculated by reference to the amount) consist of *exposures* to the *firm* or to that *firm's group*; and

- (4) it is incorporated under, and governed by, the laws and jurisdiction of England and Wales, Scotland or Northern Ireland.

2.2.128

FCA PRA

G

An *SPV* could take the form of a limited partnership. In such an arrangement, holders of a *capital instrument* issued by the *SPV* which do not belong to the *group* of the *BIPRU firm* in question should have no right to participate in the management of the partnership, whether under the partnership's constitutional documents or the transaction documents. In general, this means that they should be treated as limited partners. It is expected that the general partner, having control of the *SPV*, would be the *firm*.

2.2.128A

FCA PRA

R

■ GENPRU 2.2.127 R (4) does not apply if the *firm* has conducted a properly reasoned analysis confirming that any potential risks, including legal and operational risks, associated with cross-border issues, which undermine the quality of the capital for the issuer, that arise from an *SPV* not being incorporated under or governed by the laws and jurisdiction of England and Wales, Scotland or Northern Ireland, are adequately mitigated.

2.2.128B

FCA PRA

R

The analysis must be set out in writing and dated before the date of issue of the *capital instrument* and the *firm* must be able to show that the analysis has been fully considered as part of its decision to proceed with the issue. The analysis must be conducted by a person or persons appropriately qualified to assess the relevant risks and that person may be an independent adviser or an employee of the *firm* who is not part of the business unit responsible for the transaction (including the drafting of the issue documentation).

2.2.129

FCA PRA

R

The *SPV* referred to in ■ GENPRU 2.2.124 R (2)(a) must fund its subscription for the capital issued by the *firm* by the issue of capital that satisfies the following conditions:

- (1) it must comply with the conditions for qualification as *tier one capital*, as amended by ■ GENPRU 2.2.130 R, as if the *SPV* was itself a *firm* seeking to include that capital in its *tier one capital resources*;
- (2) (a) its terms must include an obligation on the *firm* that, in the event of a collapse of the *SPV* structure, and if the mechanism contained within the instrument under ■ GENPRU 2.2.117A R is a conversion, the *firm* must substitute the *capital instrument* issued by the *SPV* with *core tier one capital* issued by the *firm*; and
 - (b) there must be no obstacle to the *firm's* issue of new securities;
- (3) the conversion ratio in respect of the substitution described in (2) must be fixed when the *SPV* issues the *capital instrument*;

- (4) to the extent that investors have the benefit of an obligation by a *person* other than the *SPV*:
- (a) that obligation must be one owed by a member of the *firm's group*; and
 - (b) the extent of that obligation must be no greater than would be permitted by *GENPRU* if that obligation formed part of the terms of a *capital instrument* issued by that member which complied with the *rules* in *GENPRU* relating to *tier one capital* included at stage C of the calculation in the *capital resources table*; and
- (5) if the *SPV* structure collapses, the holder of it has no better a claim against the *firm* than a holder of the same type of instrument directly issued by the *firm*.

2.2.130 **R** For the purpose of ■ GENPRU 2.2.129 R and ■ GENPRU 2.2.132 R, ■ GENPRU 2.2.118 R (Requirement to obtain a legal opinion) does not apply.

FCA PRA

2.2.131 **R** In relation to the obligation to substitute described in ■ GENPRU 2.2.129 R (2), a *firm* must take all reasonable steps to ensure that it has at all times authorised and unissued *capital instruments* which are *core tier one capital* (and the authority to issue them) sufficient to discharge its obligation to substitute.

FCA PRA

2.2.131A **G** ■ GENPRU 2.2.129 R (2) and ■ GENPRU 2.2.131 R allow a *firm* to replace the capital issued by the *SPV* with *capital instrument* which are *core tier one capital*.

FCA PRA

2.2.132 **R** The capital which the *firm* seeks to include in its *capital resources* under ■ GENPRU 2.2.124 R (3)(a) must satisfy the following conditions:

FCA PRA

- (1) it meets the conditions for inclusion in *tier one capital* (subject to ■ GENPRU 2.2.130 R);
- (2) its first call date (if any) must not arise before that on the instrument issued by the *SPV*; and
- (3) its terms relating to repayment must be the same as those of the instrument issued by the *SPV*.

2.2.133 **R** (1) This rule deals with any transaction:

FCA PRA

- (a) under which an *SPV* directly or indirectly funds the subscription for capital issued by the *firm* as described in ■ GENPRU 2.2.124 R; or
- (b) that is directly or indirectly funded by a transaction in (1)(a).

- (2) Each *undertaking* that is a party to a transaction to which this *rule* applies (other than the *firm*) must be a *subsidiary undertaking* of the *firm*.
- (3) Each *SPV* that is a party to a transaction to which this *rule* applies must comply with ■ GENPRU 2.2.127 R.
- (4) Any capital to which (1) applies (other than the capital that is to be included in the *firm's capital resources*) must be in the form of capital that complies with ■ GENPRU 2.2.129 R (1) and ■ GENPRU 2.2.129 R (4), whether or not issued by an *SPV*.
- (5) The obligations in ■ GENPRU 2.2.129 R (2) and ■ GENPRU 2.2.129 R (3) only apply to capital issued by an *SPV* at the end of the chain of transactions beginning with the issue of capital by the *firm* referred to in ■ GENPRU 2.2.124 R.
- (6) ■ GENPRU 2.2.132 R applies to the capital issued by the *firm* as referred to in ■ GENPRU 2.2.124 R. For these purposes references in ■ GENPRU 2.2.132 R to the instrument issued by the *SPV* are to the instrument referred to in (5).

2.2.134

FCA PRA

G

The purpose of ■ GENPRU 2.2.133 R is to deal with a capital-raising under which the capital raised by a special purpose vehicle is passed through a number of *undertakings* before it is invested in the *firm*. If the *capital resources* of the *firm* fall below, or are likely to fall below, its *capital resources requirement* the *firm* should replace the capital issued by that first special purpose vehicle with a *tier one instrument* directly issued by the *firm* which complies with ■ GENPRU 2.2.129 R (2) .

2.2.135

FCA PRA

R

A *firm* which satisfies the conditions for the inclusion of capital set out in ■ GENPRU 2.2.124 R, must, in addition, if that transaction is in any respect unusual, notify the *appropriate regulator* at least one *Month* in advance of the date on which the *firm* intends to include that capital in its *capital resources*.

2.2.136

FCA PRA

G

The *appropriate regulator* is likely to consider as unusual a transaction which involves the raising by the *firm* of *tier one capital* through a *subsidiary undertaking* of that *firm* that is not an *SPV*. The *appropriate regulator* would expect a *firm* to request individual *guidance* in such circumstances.

2.2.137

FCA PRA

R

A *firm* must ensure that, in relation to a transaction falling within ■ GENPRU 2.2.124 R:

- (1) the marketing document for the transaction contains all the information which a reasonable third party would require to understand the transaction fully and its effect on the financial position of the *firm* and its *group*; and

- (2) the information in (1) and the transaction are easily comprehensible without the need for additional information about the *firm* and its *group*.

Tier one capital: Conversion ratio

2.2.138

R

FCA PRA

- (1) This *rule* applies to a *potential tier one instrument* if:
- (a) it is redeemable by the *firm* (ignoring ■ GENPRU 2.2.77 R (Meaning of redemption));
 - (b) it provides that if the issuer does not exercise that right or does not do so in specified circumstances the issuer must or may have to redeem it in whole or in part through the issue of *shares* eligible for inclusion in the *firm's tier one capital resources* or the instrument converts or may convert into such *shares*; and
 - (c) ■ GENPRU 2.2.77 R means that the obligation in (1)(b) is treated as not being inconsistent with ■ GENPRU 2.2.70 R (1) (*Tier one capital* should not be redeemable at the option of the holder).
- (2) A *firm* must not include a *potential tier one instrument* to which this *rule* applies in its *tier one capital resources* if:
- (a) the conversion ratio as at the date of redemption may be greater than the conversion ratio as at the time of issue by more than:
 - (i) in the case of a *BIPRU firm*, 150%; and
 - (ii) in the case of an *insurer*, 200%; or
 - (b) the market price of the conversion instruments issued in relation to one unit of the original capital item (plus any cash element of the redemption) may be greater than the issue price of that original capital item.
- (3) All determinations under this *rule* are made as at the date of issue of the original capital item.

2.2.139

R

FCA PRA

In ■ GENPRU 2.2.138 R to ■ GENPRU 2.2.142 R:

- (1) the original capital item means the capital item that is being redeemed; and
- (2) the conversion instrument means the *tier one capital* to be issued on its redemption.

PAGE
67

2.2.140

R

FCA PRA

In ■ GENPRU 2.2.138 R to ■ GENPRU 2.2.142 R, the conversion ratio means the ratio of:

- (1) the number of units of the conversion instrument that the *firm* must issue to satisfy its redemption obligation (so far as it is to be

satisfied by the issue of conversion instruments) in respect of one unit of the original capital item; to

(2) one unit of the original capital item.

2.2.141

FCA PRA

R

In ■ GENPRU 2.2.138 R to ■ GENPRU 2.2.142 R, the conversion ratio as at the date of issue of the original capital item is calculated as if the original capital item were redeemable at that time.

2.2.142

FCA PRA

R

If the conversion instruments or the original capital item are subdivided or consolidated or subject to any other occurrence that would otherwise result in like not being compared with like, the conversion ratio calculation in ■ GENPRU 2.2.138 R must be adjusted accordingly.

2.2.143

FCA PRA

G

- (1) The significance of the limitations on conversion in ■ GENPRU 2.2.138 R (2) can be seen in the example in this paragraph, which uses the conversion ratio applicable to an *insurer*.
- (2) An *insurer* issues innovative notes with a par value of £100 each. The terms of the instrument provide that if the instrument is not called at par at the first call date the notes convert into a variable number of ordinary *shares*.
- (3) If the market price of the ordinary *shares* is 400 pence per share on the day of issue of the innovative notes then the maximum number of ordinary *shares* (M) that a single £100 par value innovative note can be converted into is calculated as follows:
 - (a) $M = \text{Par value of innovative instrument} * 200\% / \text{market value of ordinary share}$;
 - (b) $M = £100 * 2 / £4 = 50 \text{ shares}$.
- (4) The practical effect is that conversion will result in the holder of an innovative capital note receiving ordinary *shares* equal to the par value of that note only when the market price of the ordinary *shares* remains above half the market price of the *shares* at the date of issue of the notes.
- (5) If the market price of the ordinary *shares* fell by half to 200 pence, the maximum permitted number of *shares* (50) would have to be issued in order to give an investor in the innovative note ordinary *shares* with a market value equal to £100. If the market price of the ordinary *shares* fell below 200 pence, the issue of the maximum permitted number of ordinary *shares* would have a market value below £100.

2.2.144

FCA PRA

G

- (1) In addition to the maximum conversion ratios of 200% for an *insurer* and 150% for a *BIPRU firm*, ■ GENPRU 2.2.138 R (2)(b) does not permit a *firm* to issue *shares* that would have a market value that exceeds the issue price of the instrument being redeemed.
- (2) In the example in ■ GENPRU 2.2.143 G, if the market value of the ordinary *shares* was 250 pence at the conversion date, the maximum number of ordinary *shares* that may be issued to satisfy the redemption of one of the £100 par value innovative notes would be 40 (= £100 / £2.5).

2.2.145

FCA PRA

R

Tier one capital: Requirement to have sufficient unissued stock

- (1) This *rule* applies to a *potential tier one instrument* of a *firm* where either:
- (a) the redemption proceeds; or
 - (b) any *coupon* on that capital item;

can be satisfied by the issue of another *capital instrument*.

- (2) A *firm* may only include an item of capital to which this *rule* applies in its *tier one capital resources* if the *firm* has authorised and unissued *capital instruments* of the kind in question (and the authority to issue them):
- (a) that are sufficient to satisfy all such payments then due; and
 - (b) are of such amount as is prudent in respect of such payments that could become due in the future.

Step-ups: calculating the size of a step-up

2.2.146

FCA PRA

R

- (1) Where a *rule* in this section says that a particular treatment applies to an item of capital that is subject to a *step-up* of a specified amount, the question of whether that *rule* is satisfied must be judged by reference to the cumulative amount of all *step-ups* since the issue of that item of capital rather than just by reference to a particular *step-up*.
- (2) Where a *step-up* arises through a change from paying a *coupon* on a debt instrument to paying a dividend on a *share* issued in settlement of the *coupon*, any net cost to the *firm* arising from the different tax treatment of the dividend compared to the tax treatment of interest may be ignored for the purpose of assessing the effect of that *step-up*.

Step-ups: Limits on the amount of step-ups on tier one and two capital

2.2.147

FCA PRA

R

- (1) A *firm* may not include in its *tier one capital resources* a *tier one instrument* that is or may be subject to a *step-up* that does not meet the definition of moderate in the press release of the Basle Committee on Banking Supervision of 27th October 1998 called "Instruments eligible for inclusion in Tier 1 capital".
- (2) For the purpose of (1) the words in that press release "than, at national supervisory discretion, either" are replaced by "than the higher of the following two amounts".
- (3) The calculations required by this *rule* and ■ GENPRU 2.2.151 R must be carried out as at the date of issue of the relevant instrument.

- (4) A BIPRU firm may not include a capital instrument in its tier one capital resources if it is redeemable and subject to more than one step-up.

2.2.148

FCA PRA

G

The effect of ■ GENPRU 2.2.147 R is that for inclusion in tier one capital resources, step-ups in instruments should be moderate. A moderate step-up for these purposes is one which results in an increase over the initial rate that is no greater than the higher of the following two amounts:

- (1) 100 basis points, less the swap spread between the initial index basis and the stepped-up index basis; or
- (2) 50% of the initial credit spread, less the swap spread between the initial index basis and the stepped-up index basis.

2.2.149

FCA PRA

G

If a coupon paid on an item of capital is initially set at a specified spread above an index (the initial index basis), and the coupon moves to being set relative to another index (the stepped up index basis), there will be an implied step-up (positive or negative) even if the specified spread does not change. This is because each index may itself include a spread relative to the risk free rate and this spread may differ between the two indexes. The deduction of the swap spread in ■ GENPRU 2.2.148 G (1) and ■ (2) above adjusts for this difference.

2.2.150

FCA PRA

G

Where the step-up involves a conversion from fixed to floating (or vice versa), or a switch in basis index, the swap spread should be fixed at pricing date, reflecting the differential in pricing between indices at the time. The significance of deducting the swap spread can be seen by the following example:

- (1) the pricing date:
 - (a) 10 year gilts (G) = 5.5% (the initial index basis);
 - (b) 3 month LIBOR is the stepped up index basis and the 10 year mid swap rate (L) = 5.9%;
 - (c) initial fixed coupon rate = G + 200bp;
 - (d) swap spread = 0.4% (= 5.9% - 5.5%);
 - (e) initial fixed coupon rate = 7.5%;
 - (f) the swap spread shows that there is 40bps of spread in the stepped up index basis relative to the initial index basis; and
 - (g) the initial fixed coupon rate of 7.5% is equivalent to the mid swap rate + 160bp, or L + 200bp - the swap spread;
- (2) pricing of stepped-up rate at year 10 with step-up of 100bp without deducting swap spread:
 - (a) stepped-up floating rate = L + 200 + 100bp step-up = 8.9%; and
 - (b) effective step-up from initial fixed rate of 140bp (= 8.9% - 7.5%); and
- (3) pricing of stepped-up rate at year 10 with step-up of 100bp with deduction of the swap spread:

- (a) *stepped-up* floating *coupon* rate = L + 200 less 40bp swap spread (difference between 5.5% and 5.9%) + 100bp step-up = 8.5%
- (b) effective *step-up* from initial rate of 100bp (= 8.5% - 7.5%).

2.2.151

R

FCA PRA

- (1) Subject to (2), if a *tier two instrument* is or may be subject to a *step-up* that does not meet the definition of moderate in the press release of the Basle Committee on Banking Supervision referred to in ■ GENPRU 2.2.147 R (1) as adjusted under ■ GENPRU 2.2.147 R (2), the first date that a *step-up* can take effect is deemed to be its final maturity date if that date is before its actual maturity date.
- (2) If a *tier two instrument*:
 - (a) is or may be subject to a *step-up* during the period beginning on the fifth anniversary of the date of issue of that item and ending immediately before the tenth anniversary of the date of issue; and
 - (b) the *step-up* or possible *step-up* is one which may result in an increase over the initial rate that is greater than 50 basis points, less the swap spread between the initial index basis and the stepped-up index basis (all these terms must be interpreted in accordance with ■ GENPRU 2.2.147 R);

the first date that a *step-up* can take effect is deemed to be its final maturity date if that date is before its actual maturity date.

2.2.152

R

FCA PRA

An instrument does not breach ■ GENPRU 2.2.147 R or as the case may be, is not subject to a deemed maturity date under ■ GENPRU 2.2.151 R, even though it is or may be subject to a *step-up* that exceeds the amount specified in those *rules* if:

- (1) the instrument is fungible with other instruments (the "existing stock") that are included in the *firm's tier one capital resources* (in the case of ■ GENPRU 2.2.147 R) or *tier two capital resources* (in the case of ■ GENPRU 2.2.151 R);
- (2) (if there has been no more than one previous issue of the existing stock) the existing stock complied with those limits on its date of issue;
- (3) (if there has been more than one previous issue of the existing stock) the first such issue of the existing stock complied with those limits on its date of issue; and
- (4) the result of the *step-up* on the instrument to which this *rule* applies is that the *coupon* on that instrument and the *coupon* on the existing stock is the same.

2.2.153 **R**
FCA PRA

- (1) A *firm* must not include in its *tier one capital resources* a *potential tier one instrument* that is or may become subject to a *step-up* if that *step-up* can arise earlier than the tenth anniversary of the date of issue of that item of capital.
- (2) A *firm* must not include in its *tier two capital resources* a *capital instrument* that is or may become subject to a *step-up* if that *step-up* can arise earlier than the fifth anniversary of the date of issue of that item of capital.

2.2.154 **G**
FCA PRA

Debt instruments containing embedded options, e.g. issues containing options for the interest rate after the *step-up* to be at a margin over the higher of two (or more) reference rates, or for the interest rate in the previous period to act as a floor, may affect the funding costs of the borrower and imply a *step-up*. In such circumstances, a *firm* may wish to seek individual *guidance* on the application of the *rules* relating to *step-ups* to the *capital instrument* in question. See ■ SUP 9 (Individual guidance) for the process to be followed when seeking individual *guidance*.

Deductions from tier one: Intangible assets

2.2.155 **R**
FCA PRA

A *firm* must deduct from its *tier one capital resources* the value of intangible assets.

2.2.156 **G**
FCA PRA

Intangible assets include goodwill as defined in accordance with the requirements referred to in ■ GENPRU 1.3.4 R (General requirements: accounting principles to be applied) applicable to the *firm*. The treatment of deferred acquisition cost assets for *BIPRU investment firms* is dealt with in ■ GENPRU 1.3 (Valuation); they should not be deducted as an intangible asset.

Tier two capital: General

2.2.157 **G**
FCA PRA

Tier two capital resources are split into upper and lower tiers. A major distinction between *upper* and *lower tier two capital* is that, except as provided by ■ GENPRU 2.2.26A R for *BIPRU firms*, only perpetual instruments may be included in *upper tier two capital* whereas dated instruments, such as fixed term *preference shares* and dated subordinated debt, may be included in *lower tier two capital*.

2.2.158 **G**
FCA PRA

Tier two instruments are *capital instruments* that combine the features of debt and equity in that they are structured like debt, but exhibit some of the loss absorption and funding flexibility features of equity.

General conditions for eligibility as tier two capital instruments

2.2.159 **R**
FCA PRA

A *capital instrument* must not form part of the *tier two capital resources* of a *firm* unless it meets the following conditions:

- (1) the claims of the creditors must rank behind those of all unsubordinated creditors;
- (2) the only events of default must be non-payment of any amount falling due under the terms of the *capital instrument* or the

- winding-up of the *firm* and any such event of default must not prejudice the subordination in (1);
- (3) to the fullest extent permitted under the laws of the relevant jurisdictions, the remedies available to the subordinated creditor in the event of non-payment or other breach of the terms of the *capital instrument* must (subject to ■ GENPRU 2.2.161 R) be limited to petitioning for the winding-up of the *firm* or proving for the debt in the liquidation or administration;
 - (4) any:
 - (a) remedy permitted by (3);
 - (b) remedy that cannot be excluded under the laws of the relevant jurisdictions as referred to in (3);
 - (c) remedy permitted by ■ GENPRU 2.2.161 R; and
 - (d) terms about repayment as referred to in (5);must not prejudice the matters in (1) and (2) and in particular any damages permitted by (b) or (c) and repayment obligation must be subordinated in accordance with (1);
 - (5) without prejudice to (1), the debt must not become due and payable before its stated final maturity date (if any) except on an event of default complying with (2) or as permitted by ■ GENPRU 2.2.172 R (Repayment at the option of the issuer) or ■ GENPRU 2.2.194 R (2) (Repayment of *lower tier two capital* at the option of the holder) and any remedy described in (4)(a) to (c) must not prejudice this requirement;
 - (6) the debt agreement or terms of the *capital instrument* are governed by the law of England and Wales, or of Scotland or of Northern Ireland;
 - (7) to the fullest extent permitted under the laws of the relevant jurisdictions, creditors must waive their right to set off amounts they owe the *firm* against subordinated amounts included in the *firm's capital resources* owed to them by the *firm*;
 - (8) the terms of the *capital instrument* must be set out in a written agreement that contains terms that provide for the conditions set out in (1) to (7);
 - (9) the debt must be unsecured and fully paid up;
 - (10) the description of its characteristics used in its marketing is consistent with the characteristics required to satisfy (1) to (9) and, where it applies, ■ GENPRU 2.2.271 R (Other requirements: insurers carrying on with-profits business (Insurer only));

- (11) the amount of the item included must be net of any foreseeable tax charge at the moment of its calculation or must be suitably adjusted in so far as such tax charges reduce the amount up to which that item may be applied to cover risks or losses; and
- (12) the *firm* has obtained a properly reasoned independent legal opinion from an appropriately qualified individual stating that the requirements in (1) to (7) and (insofar as it relates to whether the *capital instrument* is unsecured) (9) have been met.

2.2.160

PRA

R

A holder of a non-deferred share of a *building society* must be treated as a senior unsecured creditor of that *building society* for the purpose of ■ GENPRU 2.2.159 R.

**General conditions for eligibility as tier two capital instruments:
Additional remedies**

2.2.161

FCA PRA

R

A *capital instrument* may be included in a *firm's tier two capital resources* even though the remedies available to the subordinated creditor go beyond those referred to in ■ GENPRU 2.2.159 R (3), if the following conditions are satisfied:

- (1) those remedies are not available for failure to pay any amount of principal, interest or expenses or in respect of any other payment obligation; and
- (2) those remedies do not in substance amount to remedies to recover payment of the amounts in (1).

2.2.162

FCA PRA

G

If damages are a remedy that cannot be excluded as referred to in ■ GENPRU 2.2.159 R (3) those damages should be subordinated in accordance with ■ GENPRU 2.2.159 R (1). Damages permitted by ■ GENPRU 2.2.161 R should also be subordinated in accordance with ■ GENPRU 2.2.159 R (1).

**General conditions for eligibility as tier two capital instruments:
Alternative governing laws**

2.2.163

FCA PRA

R

■ GENPRU 2.2.159 R (6) does not apply if the *firm* has obtained a properly reasoned independent legal opinion from an appropriately qualified individual confirming that the same degree of subordination has been achieved under the law that governs the debt and the agreement as that which would have been achieved under the laws of England and Wales, Scotland, or Northern Ireland.

General conditions for eligibility as tier two capital instruments: Standard form documentation

2.2.164

FCA PRA

G

The *appropriate regulator* is more concerned that the subordination provisions listed in ■ GENPRU 2.2.159 R should be effective than that they should follow a particular form. The *appropriate regulator* does not, therefore, prescribe that the loan agreement or *capital instrument* should be drawn up in a standard form.

Guidance on the general conditions for eligibility as tier two capital instruments

2.2.165
FCA PRA

G

For the purposes of ■ GENPRU 2.2.159 R (5) the debt agreement or terms of the instrument should not contain any clause which might require early repayment of the debt (e.g. cross default clauses, negative pledges and restrictive covenants). A cross default clause is a clause which says that the loan goes into default if any of the borrower's other loans go into default. It is intended to prevent one creditor being repaid before other creditors, e.g. obtaining full repayment through the courts. A negative pledge is a clause which puts the loan into default if the borrower gives any further charge over its assets. A restrictive covenant is a term of contract that directly, or indirectly, could lead to early repayment of the debt. Some covenants, e.g. relating to the provision of management information or ownership restrictions, are likely to comply with ■ GENPRU 2.2.159 R (3) as long as monetary redress is ruled out, or any payments are covered by the subordination clauses.

2.2.166
FCA PRA

G

■ GENPRU 2.2.159 R (3) allows a *capital instrument* to form part of the *tier two capital resources* even though the laws of the relevant jurisdiction do not allow remedies to be limited in the way described there. For example it is not possible to limit certain remedies in the case of an issue in the United States that is SEC-registered and subject to the provisions of the Trust Indenture Act.

2.2.167
FCA PRA

G

The purpose of ■ GENPRU 2.2.159 R (7) is to ensure that all of the *firm's* assets are available to *consumers* ahead of subordinated creditors. The waiver should apply both before and during liquidation or administration.

2.2.168
FCA PRA

G

The *guidance* in ■ GENPRU 2.2.119 G (Employee may give legal opinion) also applies for the purpose of ■ GENPRU 2.2.159 R (12) and ■ GENPRU 2.2.163 R.

Tier two capital instruments: Connected transactions

2.2.169
FCA PRA

R

An item of capital does not comply with ■ GENPRU 2.2.159 R (General conditions for eligibility as tier two *capital instruments*) or ■ GENPRU 2.2.177 R (Upper tier two capital: General) if the issue of that item of capital by the *firm* is connected with one or more other transactions which, when taken together with the issue of that item, could result in that item of capital no longer displaying all of the characteristics set out in whichever of those *rules* apply.

2.2.170
FCA PRA

G

■ GENPRU 2.2.66 G (*Guidance* on ■ GENPRU 2.2.65 R) applies to ■ GENPRU 2.2.169 R in the same way as it does to ■ GENPRU 2.2.65 R (The equivalent of ■ GENPRU 2.2.169 R in relation to *tier one capital*).

Amendment of tier two instruments

PAGE
75

2.2.171
FCA PRA

R

A *firm* must not amend the terms of the capital or the documents referred to in ■ GENPRU 2.2.159 R (8) unless:

- (1) at least one *Month* before the amendment is due to take effect, the *firm* has given the *appropriate regulator* notice in writing of the

proposed amendment and the *appropriate regulator* has not objected; and

- (2) that notice includes confirmation that the legal opinions referred to in ■ GENPRU 2.2.159 R (12) and, if applicable,
 - GENPRU 2.2.163 R (General conditions for eligibility as tier two *capital instruments*: Alternative governing laws) and
 - GENPRU 2.2.181 R (Legal opinions for *upper tier two instruments*), continue in full force and effect in relation to the terms of the debt and documents after any proposed amendment.

Redemption of tier two instruments

2.2.172
FCA PRA

R A *tier two instrument* may be redeemable at the option of the *firm*, but any term of the instrument providing for the *firm* to have the right to exercise such an option must not provide for that right to be exercisable earlier than the fifth anniversary of the date of issue of the instrument.

2.2.173
FCA PRA

R ■ GENPRU 2.2.71 R to ■ GENPRU 2.2.73 G (*Tier one instruments* may be redeemed by the issuer before the fifth anniversary in limited circumstances) apply to ■ GENPRU 2.2.172 R in the same way as they do to ■ GENPRU 2.2.70 R (The issuer should not redeem *tier one capital* before the fifth anniversary).

2.2.174
FCA PRA

R In relation to a *tier two instrument*, a *firm* must notify the *appropriate regulator*:

- (1) in the case of an *insurer*, six *Months*; and
- (2) in the case of a *BIPRU firm*, one *Month*;

before it becomes committed to the proposed repayment (unless that *firm* intends to repay an instrument on its final maturity date) . When giving notice, the *firm* must provide details of its position after such repayment in order to show how it will:

- (3) meet its *capital resources requirement*; and
- (4) have sufficient financial resources to meet the *overall financial adequacy rule*.

Tier two capital: step-ups

2.2.175
FCA PRA

G The *rules and guidance* in ■ GENPRU 2.2.146 R to ■ GENPRU 2.2.154 G on *step-ups* cover *tier two capital* as well as *tier one capital*.

Upper tier two capital: General

2.2.176
FCA PRA

G Examples of *capital instruments* which may be eligible to count in *upper tier two capital resources* include the following:

- (1) perpetual cumulative *preference shares*;

- (2) perpetual subordinated debt; and
- (3) other instruments that have the same economic characteristics as (1) or (2).

2.2.177

R

FCA PRA

A *capital instrument* must (in addition to meeting the requirements of the *rules* about eligibility for inclusion in *tier two capital*) meet the following conditions before it can be included in a *firm's upper tier two capital resources*:

- (1) it must have no fixed maturity date;
- (2) the terms of the instrument must provide for the *firm* to have the option to defer any *coupon* on the debt, except that the *firm* need not have that right in the case of a *coupon* payable in the form of an item of capital that is included in the *same stage of capital* or a *higher stage of capital* as that first item of capital;
- (3) the terms of the instrument must provide for the loss-absorption capacity of the *capital instrument* and unpaid *coupons*, whilst enabling the *firm* to continue its business;
- (4) it meets the conditions in ■ GENPRU 2.2.169 R (Connected transactions) and ■ GENPRU 2.2.180 R (Loss absorption); and
- (5) the terms of the instrument are such that either the instrument or debt is not redeemable or repayable or it is repayable or redeemable only at the option of the *firm*.

2.2.178

R

FCA PRA

If a *firm* gives notice of the redemption or repayment of an *upper tier two instrument*, the *firm* must no longer include it in its *upper tier two capital resources*.

2.2.179

G

FCA PRA

- (1) The purpose of ■ GENPRU 2.2.177 R (2) is to ensure that a *firm* which issues an item of capital with a *coupon* retains flexibility over the payments of such *coupon* and can preserve cash in times of financial stress. However, a *firm* may include, as part of the capital instrument terms, a right to make payments of a *coupon* mandatory if an item of capital becomes ineligible to form part of its *capital resources* (for example, through a change in the relevant *rules*) and the *firm* has notified the *appropriate regulator* that the instrument is ineligible.
- (2) For the purpose of ■ GENPRU 2.2.177 R (2), ■ GENPRU 2.2.68 G (Dividend pushers) applies equally in relation to the inclusion of an instrument in *upper tier two capital resources*.
- (3) ■ GENPRU 2.2.26A R provides an exception, in the case of a *BIPRU firm*, to the *rule* that instruments must have no fixed maturity date to be eligible for *upper tier two capital resources*.

2.2.180

FCA PRA

R

Upper tier two capital: Loss absorption

A *capital instrument* may only be included in *upper tier two capital resources* if a *firm's* obligations under the instrument either:

- (1) do not constitute a liability (actual, contingent or prospective) under section 123(2) of the Insolvency Act 1986; or
- (2) do constitute such a liability but the terms of the instrument are such that:
 - (a) any such liability is not relevant for the purposes of deciding whether:
 - (i) the *firm* is, or is likely to become, unable to pay its debts; or
 - (ii) its liabilities exceed its assets;
 - (b) a *person* (including but not limited to a holder of the instrument) is not able to petition for the winding up or administration of the *firm* or for any similar procedure in relation to the *firm* on the grounds that the *firm* is or may become unable to pay any such liability; and
 - (c) the *firm* is not obliged to take into account such a liability for the purposes of deciding whether or not the *firm* is, or may become, insolvent for the purposes of section 214 of the Insolvency Act 1986 (wrongful trading).

2.2.181

FCA PRA

R

Upper tier two capital: Legal opinions

A *firm* may not include an *upper tier two instrument* in its *upper tier two capital resources* unless it has obtained a properly reasoned independent legal opinion from an appropriately qualified individual confirming that the criteria in ■ GENPRU 2.2.177 R (3) and ■ GENPRU 2.2.180 R (Loss absorption) are met. This *rule* does not apply to a perpetual cumulative *preference share*.

2.2.182

FCA PRA

G

Upper tier two capital: Guidance

■ GENPRU 2.2.180 R is an example of the general principle in ■ GENPRU 2.2.177 R (3).

2.2.183

FCA PRA

G

The *guidance* in ■ GENPRU 2.2.117 G (There should be no liability to the extent that the *firm* would become insolvent, etc) also applies for the purpose of ■ GENPRU 2.2.180 R.

2.2.184

FCA PRA

G

The *guidance* in ■ GENPRU 2.2.119 G (Employee may give legal opinion) also applies for the purpose of ■ GENPRU 2.2.181 R.

Upper tier two capital: Revaluation reserves (BIPRU firm only)

2.2.185

R

FCA PRA

- (1) This *rule* applies to a *BIPRU firm*.
- (2) A *BIPRU firm* must, in relation to equities held in the available-for-sale financial assets category:
 - (a) deduct any net losses at stage E of the calculation in the *capital resources table* (Deductions from tier one capital); and
 - (b) include any net gains (after deduction of deferred tax) in revaluation reserves at stage G of the calculation in the *capital resources table* (Upper tier two capital).
- (3) A *BIPRU firm* must include any net gains, after deduction of deferred tax, on revaluation reserves of investment properties at stage G of the calculation in the *capital resources table*. A *firm* must include any losses on such revaluation reserves in profit and loss account and other reserves.
- (4) A *BIPRU firm* must include any net gains, after deduction of deferred tax, on revaluation reserves of land and buildings at stage G of the calculation in the *capital resources table*. A *firm* must include any losses on such revaluation reserves in profit and loss account and other reserves.
- (5) (2) only applies to a *firm* to the extent that the category of asset referred to in that paragraph exists under the accounting framework that applies to the *firm* as referred to in
 - GENPRU 1.3.4 R (General requirements: accounting principles to be applied).
- (6) (3) and (4) apply to a *firm* whatever the accounting treatment of those items is under the accounting framework that applies to the *firm* as referred to in ■ GENPRU 1.3.4 R.

2.2.186

G

FCA PRA

Subject to ■ GENPRU 2.2.185 R, a *BIPRU firm* should value its revaluation reserves in accordance with the *rules* in ■ GENPRU 1.3 (Valuation).

Upper tier two capital: General/collective provisions (BIPRU firm only)

2.2.187

R

FCA PRA

A *BIPRU firm* which adopts the *standardised approach* to credit risk may include general/collective provisions in its *tier two capital resources* only if:

- (1) they are freely available to the *firm*;
- (2) their existence is disclosed in internal accounting records; and
- (3) their amount is determined by the management of the *firm*, verified by independent auditors and notified to the *appropriate regulator*.

2.2.188 **R** The value of general/collective provisions which a *firm* may include in its *tier two capital resources* as referred to in ■ GENPRU 2.2.187 R may not exceed 1.25% of the sum of the following:

FCA PRA

- (1) the sum of the *market risk capital requirement* and the *operational risk capital requirement* (if applicable), multiplied by a factor of 12.5; and
- (2) the sum of *risk weighted assets* under the *standardised approach* for credit risk.

2.2.189 **R** Where a *firm* is unable to determine whether collective/general provisions relate only to *exposures* on either the *standardised approach* or the *IRB approach*, that *firm* must allocate them on a basis which is reasonable and consistent.

FCA PRA

Upper tier two capital: Surplus provisions (BIPRU firm only)

2.2.190 **R** A *BIPRU firm* calculating *risk weighted exposure amounts* under the *IRB approach* may include in its *upper tier two capital resources* positive amounts resulting from the calculation in ■ BIPRU 4.3.8 R (Treatment of expected loss amounts), up to 0.6% of the *risk weighted exposure amounts* calculated under that approach.

FCA PRA

2.2.191 **R** A *BIPRU firm* calculating *risk weighted exposure amounts* under the *IRB approach* may not include in its *capital resources* value adjustments and provisions included in the calculation in ■ BIPRU 4.3.8 R (Treatment of expected loss amounts under the *IRB approach* for *trading book exposures*) or value adjustments and provisions for *exposures* that would otherwise have been eligible for inclusion in general/collective provisions other than in accordance with ■ GENPRU 2.2.190 R.

FCA PRA

2.2.192 **R** For the purpose of ■ GENPRU 2.2.190 R and ■ GENPRU 2.2.191 R, *risk weighted exposure amounts* must not include those calculated in respect of *securitisation positions* which have a *risk weight* of 1250%.

FCA PRA

2.2.193 **R** If a *BIPRU firm* calculates *risk weighted exposure amounts* under the *IRB approach* for the purposes of ■ BIPRU 14 (Capital requirements for settlement and counterparty risk) it must not include valuation adjustments referred to in ■ BIPRU 14.2.18 R (1) (Treatment of expected loss amounts) in its *capital resources* except in accordance with that *rule*.

FCA PRA

Lower tier two capital

2.2.194 **R** A *firm* may include a *capital instrument* in its *lower tier two capital resources* if (in addition to meeting the requirements of the *rules* about eligibility for inclusion in *tier two capital*) either the holder has no right to repayment or it satisfies either of the following conditions:

FCA PRA

- (1) it has an original maturity of at least five years; or
- (2) it is redeemable on notice from the holder, but the period of notice of repayment required to be given by the holder is five years or more.

2.2.195
FCA PRA

G

A *firm* may include perpetual *capital instruments* that do not meet the conditions in ■ GENPRU 2.2.177 R (Eligibility conditions for *upper tier two capital*) in *lower tier two capital resources* if they meet the general conditions described in ■ GENPRU 2.2.159 R (General conditions for eligibility as tier two *capital instruments*).

2.2.196
FCA PRA

R

- (1) For the purposes of calculating the amount of a *lower tier two instrument* which may be included in a *firm's capital resources*:
 - (a) in the case of an instrument with a fixed maturity date, in the final five years to maturity; and
 - (b) in the case of an instrument with or without a fixed maturity date but where five years' or more notice of redemption or repayment has been given, in the final five years to the date of redemption or repayment;

the principal amount must be amortised on a straight line basis.
- (2) If a *firm* gives notice of the redemption or repayment of a *lower tier two instrument* and (1) does not apply, the *firm* must no longer include it in its *lower tier two capital resources*.

2.2.197
FCA PRA

G

If a *firm* wishes to include in *lower tier two capital resources* an instrument with or without a fixed maturity date but where less than five years' notice of redemption or repayment has been given, it should seek individual *guidance* from the *appropriate regulator*.

The effect of swaps on debt capital

2.2.198
FCA PRA

R

■ GENPRU 2.2.198 R to ■ GENPRU 2.2.201 R apply to a *tier one instrument*, *tier two instrument* or *tier three instrument* of a *firm* that is treated as a liability under the accounting framework to which it is subject as referred to in ■ GENPRU 1.3.4 R (General requirements: accounting principles to be applied) (a "debt instrument").

2.2.199
FCA PRA

R

A *firm* must recognise for the purpose of this section any effect that changes in exchange rates or interest rates have on a debt instrument (as defined in ■ GENPRU 2.2.198 R) under the accounting framework to which the *firm* is subject as referred to in ■ GENPRU 1.3.4 R (General requirements: accounting principles to be applied).

2.2.200
FCA PRA

R

A *firm* must recognise, in accordance with ■ GENPRU 2.2.201 R, the effect of a *foreign currency* hedge on a debt instrument (as defined in ■ GENPRU 2.2.198 R) denominated in a *foreign currency* or of an interest rate hedge on a fixed rate *coupon* debt instrument if:

- (1) the accounting framework to which the *firm* is subject as referred to in ■ GENPRU 1.3.4 R (General requirements: accounting principles to be applied) provides for a fair value hedge accounting relationship between a liability and its related hedge;
- (2) such a relationship exists under that accounting framework between that debt instrument and that hedge;
- (3) (if the debt instrument is a *tier one instrument*) the *firm's* obligations under that hedge comply with the conditions in ■ GENPRU 2.2.64 R to ■ GENPRU 2.2.65 R (General conditions for eligibility as tier one capital);
- (4) (if the debt instrument is a *tier two instrument* or an *upper tier three instrument*) the *firm's* obligations under that hedge comply with the conditions in ■ GENPRU 2.2.159 R to ■ GENPRU 2.2.169 R (General conditions for eligibility as tier two capital instruments) as modified, in the case of an *upper tier three instrument*, by ■ GENPRU 2.2.244 R (Application of *tier two capital rules* to *tier three capital debt*) except as follows:
 - (a) ■ GENPRU 2.2.159 R (9) only applies to the extent that it requires that hedge to be unsecured; and
 - (b) ■ GENPRU 2.2.159 R (12) (legal opinion) does not apply.

2.2.201
FCA PRA

R A *firm* must recognise the effect of a hedge as referred to in ■ GENPRU 2.2.200 R by including the net accounting fair value of the hedging instrument in the valuation of the debt instrument (as defined in ■ GENPRU 2.2.198 R).

Deductions from tiers one and two: Qualifying holdings (bank or building society only)

2.2.202
PRA

R ■ GENPRU 2.2.202 R to ■ GENPRU 2.2.207 R only apply to a *bank* or *building society*.

2.2.203
PRA

R A *qualifying holding* is a direct or indirect holding of a *bank* or *building society* in a non-financial *undertaking* which represents 10% or more of the capital or of the voting rights or which makes it possible to exercise a significant influence over the management of that *undertaking*.

2.2.204
PRA

R For the purpose of ■ GENPRU 2.2.203 R, a non-financial *undertaking* is an *undertaking* other than:

- (1) a *credit institution* or *financial institution*;
- (2) an *undertaking* whose exclusive or main activities are a direct extension of banking or concern services ancillary to banking,

such as leasing, factoring, the management of unit trusts, the management of data processing services or any other similar activity; or

(3) an *insurer*.

2.2.205

PRA

R

The amount of *qualifying holdings* that a *bank* or *building society* must deduct in the calculation in the *capital resources table* is:

- (1) (if the *firm* has one or more *qualifying holdings* that exceeds 15% of its relevant *capital resources*) the sum of such excesses; and
- (2) to the extent not already deducted in (1), the amount by which the sum of each of that *firm's qualifying holdings* exceeds 60% of its relevant *capital resources*.

2.2.206

PRA

R

The relevant *capital resources* of a *firm* mean for the purposes of this *rule* the sum of the amount of *capital resources* calculated at stages L (Total tier one capital plus tier two capital) and Q (Total tier three capital) of the calculation in the *capital resources table* as adjusted in accordance with the following:

- (1) the *firm* must not take into account the items referred to in any of the following:
 - (a) ■ GENPRU 2.2.190 R to ■ GENPRU 2.2.193 R (surplus provisions); or
 - (b) ■ GENPRU 2.2.236 R (*expected loss* amounts and other negative amounts); or
 - (c) ■ GENPRU 2.2.237 R (*securitisation positions*);
- (2) the *firm* must make the deductions to be made at stage S of the calculation in the *capital resources table* (Deductions from total capital); and
- (3) the *firm* need not deduct any *excess trading book position* under (2).

2.2.207

PRA

R

The following are not included as *qualifying holdings*:

- (1) *shares* that are not held as investments; or
- (2) *shares* that are held temporarily during the normal course of underwriting; or
- (3) *shares* held in a *firm's* name on behalf of others.

Deductions from tiers one and two: Material holdings (BIPRU firm only)

2.2.208

R

FCA PRA

2.2.209

R

FCA PRA

■ GENPRU 2.2.208 R to ■ GENPRU 2.2.216 G only apply to a *BIPRU firm*.

- (1) Subject to (2) and (3), a *material holding* is:
- (a) a *BIPRU firm's* holdings of *shares* and any other interest in the capital of an individual *credit institution* or *financial institution* (held in the *non-trading book* or the *trading book* or both) exceeding 10% of the *share* capital of the issuer, and, where this is the case, any holdings of subordinated debt of the same issuer are also included as a *material holding*; the full amount of the holding is a *material holding*; or
 - (b) a *BIPRU firm's* holdings of *shares*, any other interest in the capital and subordinated debt in an individual *credit institution* or *financial institution* (held in the *non-trading book* or the *trading book* or both) not deducted under (a) if the total amount of such holdings exceeds 10% of that *firm's capital resources* at stage N (Total tier one capital plus tier two capital after deductions) of the calculation in the *capital resources table* (calculated before deduction of its *material holdings*); only the excess amount is a *material holding*; or
 - (c) a *bank* or *building society's* aggregate holdings in the *non-trading book* of *shares*, any other interest in the capital, and subordinated debt in all *credit institutions* or *financial institutions* not deducted under (a) or (b) if the total amount of such holdings exceeds 10% of that *firm's capital resources* at stage N of the calculation in the *capital resources table* (calculated before deduction of its *material holdings*); only the excess amount is a *material holding*; or
 - (d) a *material insurance holding*.
- (2) If a *BIPRU firm* holds *shares* in the capital of Business Growth Fund plc or another *financial institution* which makes *venture capital investments* (in this section and its related annexes, a "Venture Capital Investor") and the following conditions are met:
- (a) the sole business of the Venture Capital Investor is the making of *venture capital investments* together with the performance of *ancillary activities* in relation to the administration of the *venture capital investments*;
 - (b) none of the *venture capital investments* made by the Venture Capital Investor is an investment (direct or indirect) in:
 - (i) a *credit institution*; or

- (ii) a *financial institution* the principal activity of which is to perform any activity other than the acquisition of holdings in other *undertakings*;
- (c) the relevant proportion of the Venture Capital Investor is included in the *firm's UK consolidation group* in accordance with ■ BIPRU 8.5; and
- (d) the *firm* assigns a *risk weight* to its *exposure* to the Venture Capital Investor as if it were an *equity exposure* to which the simple *risk weight* approach is applied as set out in ■ BIPRU 4.7.9 R to ■ BIPRU 4.7.12 R (and in calculating its *capital resources requirement* the *firm* must assign a *risk weight* to that *exposure* in accordance with those *rules* and notwithstanding that those *rules* would not otherwise apply to that calculation);

the Venture Capital Investor may be ignored for the purposes of determining whether there is a *material holding*.

- (3) If a *BIPRU firm* holds *shares* in the capital of a *subsidiary undertaking* which is a *financial institution* solely by reason of its principal activity being the acquiring of holdings and which in turn holds (directly or indirectly) *shares* in the capital of a Venture Capital Investor (in this section and its related annexes, a "Venture Capital Holding Company") and the following conditions are met:
 - (a) the Venture Capital Investor meets the conditions in (2)(a) and (b);
 - (b) the Venture Capital Holding Company is included in the *firm's UK consolidation group* in accordance with ■ BIPRU 8.5;
 - (c) the proportion of the value of the Venture Capital Holding Company attributable to investment in Venture Capital Investors and the proportion of the value of the Venture Capital Holding Company attributable to investment in other investments can be identified and valued on a regular basis; and
 - (d) the *firm* assigns a *risk weight* to its *exposure* to the proportion of the Venture Capital Holding Company that represents the value of its investment in Venture Capital Investors as if it were an *equity exposure* to which the simple *risk weight* approach is applied as set out in ■ BIPRU 4.7.9 R to ■ BIPRU 4.7.12 R (and in calculating its *capital resources requirement* the *firm* must assign a *risk weight* to that *exposure* in accordance with those *rules* and notwithstanding that those *rules* would not otherwise apply to that calculation);

the proportion of the *firm's* investment in the Venture Capital Holding Company that represents the value of its investment in Venture Capital Investors may be ignored for the purposes of

- determining whether there is a *material holding*. The proportion of the *firm's* investment in the Venture Capital Holding Company that represents the value of other investments is a *material holding*.
- 2.2.210** FCA PRA G For the purpose of the definition of a *material holding*, *share capital* includes *preference shares*. *Share premium* should be taken into account when determining the amount of *share capital*.
- 2.2.211** FCA PRA R When calculating the size of its *material holdings* a *firm* must only include an actual holding (that is, a long cash position). A *firm* must not net such holdings with a short position.
- 2.2.212** FCA PRA R A *material insurance holding* means the holdings of a *BIPRU firm* of items of the type set out in ■ GENPRU 2.2.213 R in any:
- (1) *insurance undertaking*; or
 - (2) *insurance holding company*;
- that fulfils one of the following conditions:
- (3) it is a *subsidiary undertaking* of that *firm*; or
 - (4) that *firm* holds a *participation* in it.
- 2.2.213** FCA PRA R An item falls into this provision for the purpose of ■ GENPRU 2.2.212 R if it is:
- (1) an *ownership share*; or
 - (2) subordinated debt or another item of capital that falls into Article 16(3) of the *First Non-Life Directive* or, as applicable, Article 27(3) of the *Consolidated Life Directive*.
- 2.2.214** FCA PRA R The amount to be deducted with respect to each *material insurance holding* is the higher of:
- (1) the book value of the *material insurance holding*; and
 - (2) the *solo capital resources requirement* for the *insurance undertaking* or *insurance holding company* in question calculated in accordance with Part 3 of ■ GENPRU 3 Annex 1 R (Method 3 of the capital adequacy calculations for financial conglomerates).
- 2.2.215** FCA PRA R For the purpose of the definition of a *material holding*, holdings must be valued using the valuation method which the holder uses for its external financial reporting purposes.

2.2.216

G

FCA PRA

- (1) This paragraph gives *guidance* on how the calculation under ■ GENPRU 2.2.214 R (1) should be carried out where an *insurance undertaking* is accounted for using the embedded value method.
- (2) On acquisition, any "goodwill" element (that is, the difference between the acquisition value according to the embedded value method and the actual investment) should be deducted from *tier one capital resources*.
- (3) The embedded value should be deducted from the total of *tier one capital resources* and *tier two capital resources*.
- (4) Post-acquisition, where the embedded value of the *undertaking* increases, the increase should be added to reserves, while the new embedded value is deducted from total *capital resources*.
- (5) This means that the net impact on the level of total *capital resources* is zero, although *tier two capital resources* headroom will increase with any increase in *tier one capital resources* reserves.
- (6) Embedded value is the value of the *undertaking* taking into account the present value of the expected future inflows from existing life assurance business.

2.2.216A

G

PRA

- (1) This paragraph gives *guidance* as to the amount to be deducted at Part 2 of stage M (Deductions from the totals of tier one and two) of ■ GENPRU 2 Annex 2 R (Capital resources table for a bank) and ■ GENPRU 2 Annex 3 R (Capital resources table for a building society) in respect of investments in *subsidiary undertakings* and *participations* (excluding any amount which is already deducted as *material holdings* or *qualifying holdings*).
- (2) The effect of those *rules* is to achieve the deduction of all investments in *subsidiary undertakings* and *participations* for *banks* and *building societies* by ensuring that amounts not already deducted under other *rules* are accounted for at this stage of the calculation of *capital resources*, except where the investment has been made in:
 - (a) a Venture Capital Investor and the conditions in ■ GENPRU 2.2.209R (2) are met; or
 - (b) a Venture Capital Holding Company and the conditions in ■ GENPRU 2.2.209R (3) are met;
- (3) The following investments in *subsidiary undertakings* and *participations* should be deducted at this stage:
 - (a) those not deducted in Part 1 of stage M because of the operation of the thresholds in ■ GENPRU 2.2.205 R (on qualifying holdings) and ■ GENPRU 2.2.209 R (on material holdings); and
 - (b) those which do not meet the definition of *qualifying holding* or *material holding*, but excluding investments in Venture Capital Investors which are ignored in accordance with ■ GENPRU 2.2.209R (2) and investments in Venture Capital Holding Companies which are ignored in accordance with ■ GENPRU 2.2.209R (3), for the purposes of determining whether there is a *material holding*.

- (4) For example, an investment in an *undertaking* which is not a *qualifying holding* under ■ GENPRU 2.2.204 R (2) (on the definition of a non-financial undertaking), that is whose exclusive or main activities are a direct extension of banking or concern services ancillary to banking, such as leasing, factoring, the management of unit trusts, the management of data processing services or any other similar activity, should be deducted at this stage.

Deductions from tiers one and two: Reciprocal cross holdings (BIPRU firm only)

2.2.217 R

FCA PRA

■ GENPRU 2.2.217 R to ■ GENPRU 2.2.220 R apply to a *BIPRU firm*.

2.2.218 R

FCA PRA

A *BIPRU firm* must deduct at stage M of the calculation in the *capital resources table* (Deductions from the totals of tier one and two) any *reciprocal cross-holdings*. However a *BIPRU firm* must not deduct such holdings to the extent that they fall to be deducted at Part 1 of stage M of the calculation in the *capital resources table* (Deductions for *material holdings, qualifying holdings* and certain other items).

2.2.219 R

FCA PRA

A *reciprocal cross-holding* means a holding of the *BIPRU firm* of *shares*, any other interest in the capital, and subordinated debt, whether in the *trading* or *non-trading* book, in:

- (1) a *credit institution*; or
- (2) a *financial institution*;

that satisfies the following conditions:

- (3) the holding is the subject of an agreement or arrangement between the *BIPRU firm* and either the issuer of the instrument in question or a member of a *group* to which the issuer belongs;
- (4) under the terms of the agreement or arrangement described in (3) the issuer invests in the *BIPRU firm* or in a member of the *group* to which that *BIPRU firm* belongs; and
- (5) the effect of that agreement or arrangement on the capital position of the *BIPRU firm*, the issuer, or any member of a *group* to which either belongs, under any relevant rules is significantly more beneficial than it is in economic terms, taking into account the agreement or arrangement as a whole.

2.2.220 R

FCA PRA

For the purpose of ■ GENPRU 2.2.219 R, a relevant rule means a *rule* in *GENPRU, BIPRU* or *INSPRU* or any other capital adequacy or solvency requirements of the *appropriate regulator* or any other regulator, territory or country.

Deductions from tiers one and two: Connected lending of a capital nature (bank only)

2.2.221

R

PRA

- (1) ■ GENPRU 2.2.221 R to ■ GENPRU 2.2.235 G only apply to a bank.
- (2) If a *firm* has elected to ignore an investment in a Venture Capital Investor or a Venture Capital Holding Company in accordance with ■ GENPRU 2.2.209R (2) or ■ (3), for the purposes of determining whether there is a *material holding*, ■ GENPRU 2.2.221 R to ■ GENPRU 2.2.233 R do not apply to any lending by the *firm* to that Venture Capital Investor or Venture Capital Holding Company, provided that any lending to the Venture Capital Holding Company is made to and deployed by the *firm* solely in connection with the Venture Capital Investor.

2.2.222

R

PRA

Connected lending of a capital nature means all lending within ■ GENPRU 2.2.227 R or ■ GENPRU 2.2.229 R and guarantees within ■ GENPRU 2.2.231 R or ■ GENPRU 2.2.233 R.

2.2.223

R

PRA

A *bank* must not deduct any item as *connected lending of a capital nature* to the extent that it falls to be deducted at Part 1 of stage M of the calculation in the *capital resources table* (Deductions for *material holdings*, *qualifying holdings* and certain other items) or as a *reciprocal cross-holding*.

2.2.224

R

PRA

For the purpose of the *rules* in this section about *connected lending of a capital nature* and in relation to a *bank*, a connected party means another *person* ("P") who fulfils at least one of the following conditions and is not solo-consolidated with the *bank* under ■ BIPRU 2.1 (Solo consolidation):

- (1) P is *closely related* to the *bank*; or
- (2) P is an *associate* of the *bank*; or
- (3) the same *persons* significantly influence the *governing body* of P and the *bank*.

2.2.225

R

PRA

For the purpose of ■ GENPRU 2.2.224 R, in relation to a *person* ("P") to which a *bank* has an *exposure* when P is acting on his own behalf and also an *exposure* to P when P acts in his capacity as a trustee, custodian or general partner of an investment trust, unit trust, venture capital or other investment fund, pension fund or similar fund (a "fund") the *bank* may choose to treat this latter *exposure* as an *exposure* to the fund, unless such treatment would be misleading.

2.2.226

G

PRA

■ BIPRU 10.3.13 G (*Guidance* on exposures to trustees) applies to ■ GENPRU 2.2.225 R .

2.2.227

PRA

R

A loan is *connected lending of a capital nature* if:

- (1) it is made by the *bank* to a connected party; and
- (2) it falls into ■ GENPRU 2.2.228 R.

2.2.228

PRA

R

A loan falls into this *rule* for the purposes of ■ GENPRU 2.2.227 R (2) if, whether through contractual, structural, reputational or other factors:

- (1) based on the terms of the loan and the other knowledge available to the *bank*, the borrower would be able to consider it from the point of view of its characteristics as capital as being similar to *share* capital or subordinated debt; or
- (2) the position of the lender from the point of view of maturity and repayment is inferior to that of the senior unsecured and unsubordinated creditors of the borrower.

2.2.229

PRA

R

A loan is also *connected lending of a capital nature* if:

- (1) it funds directly or indirectly a loan to a connected party of the *bank* falling into ■ GENPRU 2.2.228 R or an investment in the capital of a connected party of the *bank*; and
- (2) it falls into ■ GENPRU 2.2.228 R.

2.2.230

PRA

G

It is likely that a loan is not *connected lending of a capital nature* if:

- (1) it is secured by collateral that is eligible for the purposes of *credit risk mitigation* under the *standardised approach* to credit risk as set out in ■ BIPRU 5.4 (Financial collateral) and ■ BIPRU 5.5 (Other funded credit risk mitigation); or
- (2) it is repayable on demand (and should be treated as such for accounting purposes by the borrower and lender) and the *bank* can demonstrate that there are no potential obstacles to exercising the right to repay, whether contractual or otherwise.

2.2.231

PRA

R

A guarantee is *connected lending of a capital nature* if it is a guarantee by the *bank* of a loan from a third party to a connected party of the *bank* and:

- (1) the loan meets the requirements of ■ GENPRU 2.2.228 R; or
- (2) the rights that the *bank* would have against the borrower with respect to the guarantee meet the requirements of ■ GENPRU 2.2.228 R (2).

2.2.232 **R** A guarantee is also *connected lending of a capital nature* if it is a guarantee
PRA by the *bank* of a loan falling into ■ GENPRU 2.2.229 R (1); and

- (1) the loan meets the conditions in ■ GENPRU 2.2.228 R; or
- (2) the guarantee meets the conditions in ■ GENPRU 2.2.231 R (2).

2.2.233 **R** The amount of a guarantee that constitutes *connected lending of a capital*
PRA *nature* that a *firm* must deduct is the amount guaranteed.

2.2.234 **G** A loan may initially fall outside the definition of *connected lending of a capital*
PRA but later fall into it. For example, if the initial lending to a connected party is subsequently
downstreamed to another connected party the relationship between the *bank* and the
ultimate borrower may be such that, looking at the arrangements as a whole, the
undertaking to which the *bank* lends is able to regard the loan to it as being capable of
absorbing losses.

2.2.235 **G** Lending to a connected party will not normally be *connected lending of a capital*
PRA where that party:

- (1) is acting as a vehicle to pass funding to an unconnected party; and
- (2) has no other creditors whose claims could be senior to those of the lender.

Deductions from tiers one and two: Expected losses and other negative amounts (BIPRU firm only)

2.2.236 **R** A *BIPRU firm* calculating *risk weighted exposure amounts* under the *IRB*
FCA PRA *approach* must deduct:

- (1) any negative amounts arising from the calculation in ■ BIPRU 4.3.8 R (Treatment of expected loss amounts); and
- (2) any *expected loss* amounts calculated in accordance with ■ BIPRU 4.7.12 R (*Expected loss* amounts under the simple risk weight approach to calculating *risk weighted exposure amounts* for *exposures* belonging to the *equity exposure IRB exposure class*) or ■ BIPRU 4.7.17 R (*Expected loss* amounts under the *PD/LGD approach*).

Deductions from tiers one and two: Securitisation positions (BIPRU firm only)

2.2.237 **R** A *BIPRU firm* calculating *risk weighted exposure amounts* under the *IRB*
FCA PRA *approach* or the *standardised approach* to credit risk must deduct from its *capital resources* the following:

- (1) the exposure amount of *securitisation positions* which receive a *risk weight* of 1250% under ■ BIPRU 9 (Securitisation), unless the *firm* includes the *securitisation positions* in its calculation of *risk*

weighted exposure amounts (see ■ BIPRU 9.10 (Reduction in risk-weighted exposure amounts)); and

- (2) the exposure amount of *securitisation positions* in the *trading book* that would receive a *risk weight* of 1250% if they were in the *firm's non-trading book*.

Deductions from tiers one and two: Special treatment of material holdings and other items (BIPRU firm only)

2.2.238

FCA PRA

R

■ GENPRU 2.2.238 R to ■ GENPRU 2.2.241 R apply to a *BIPRU firm* and relate to the deductions in respect of:

- (1) *material holdings*;
- (2) *expected loss* amounts and other negative amounts referred to in ■ GENPRU 2.2.236 R; and
- (3) *securitisation positions* referred to in ■ GENPRU 2.2.237 R.

2.2.239

FCA PRA

R

- (1) The treatment in the *capital resources table* of the deductions in ■ GENPRU 2.2.238 R only has effect for the purpose of the *capital resources gearing rules*.

- (2) In other cases (3) and (4) apply.

- (3) A *BIPRU firm* making the deductions described in ■ GENPRU 2.2.238 R must deduct 50% of the total amount of those deductions at stage E (Deductions from tier one capital) and 50% at stage J (Deductions from tier two capital) of the calculation in the *capital resources table* after the application of the *capital resources gearing rules*.

- (4) To the extent that half of the total of:

- (a) *material holdings*;
- (b) *expected loss* amounts and other negative amounts; and
- (c) *securitisation positions*;

exceeds the amount calculated at stage I (Total tier two capital) of that calculation, a *firm* must deduct that excess from the amount calculated at stage F (Total tier one capital after deductions) of the *capital resources table*.

2.2.240

PRA PRA

G

The alternative calculation in ■ GENPRU 2.2.239 R (3) to ■ (4) is only relevant to ■ BIPRU 11 (Pillar 3 disclosures) and certain reporting requirements under *SUP*. However the deduction of *material holdings* at Part 2 of stage E of the *capital resources table* in the case of a *BIPRU investment firm* with an *investment firm consolidation waiver* has effect for all purposes.

Tier three capital: upper tier three capital resources (BIPRU firm only).....

2.2.241 **R**

■ GENPRU 2.2.241 R to ■ GENPRU 2.2.245 R only apply to a *BIPRU firm*.

FCA PRA

2.2.242 **R**

A *BIPRU firm* may include subordinated debt in its *upper tier three capital resources* only if:

FCA PRA

- (1) it has an original maturity of at least two years or is subject to at least two years' notice of repayment; and
- (2) payment of interest or principal is permitted only if, after that payment, the *firm's capital resources* would be not less than its *capital resources requirement*.

2.2.243 **R**

A *BIPRU firm* which includes subordinated debt in its *tier three capital resources* must notify the *appropriate regulator* one month in advance of all payments of either interest or principal made when the *firm's capital resources* are less than 120% of its *capital resources requirement*.

FCA PRA

2.2.244 **R**

The *rules* in the table in ■ GENPRU 2.2.245 R apply to short term subordinated debt that a *BIPRU firm* includes in its *tier three capital resources* in the same way that they apply to a *firm's tier two capital resources* with the adjustments in that table.

FCA PRA

2.2.245 **R**

Tier three capital: lower tier three capital resources (BIPRU firm only)

2.2.246
FCA PRA
 2.2.247
FCA PRA

R ■ GENPRU 2.2.246 R to ■ GENPRU 2.2.249 R only apply to a *BIPRU firm*.

R A *BIPRU firm's* net interim *trading book* profits mean its net *trading book* profits adjusted as follows:

- (1) they are net of any foreseeable charges or dividends and less net losses on its other business; and
- (2) a *firm* must not take into account items that have already been included in the calculation of *capital resources* as part of the calculation of the following items:
 - (a) interim net profits (see stage (A) of the *capital resources table*); or
 - (b) interim net losses or material interim net losses (see stage (A) of the *capital resources table*); or
 - (c) profit and loss and other reserves (see stage (A) of the *capital resources table*).

2.2.248
FCA PRA

R *Trading book* profits and losses, other than those losses to which ■ GENPRU 2.2.86 R (2) (Valuation adjustment and reserves) refers, originating from valuation adjustments or reserves as referred to in

2.2.249
FCA PRA

R

■ GENPRU 1.3.29 R to ■ GENPRU 1.3.35A G (Valuation adjustments or reserves) must be included in the calculation of net interim *trading book* profits and be added to or deducted from *tier three capital resources*.

Trading book valuation adjustments or reserves as referred to in ■ GENPRU 1.3.29 R to ■ GENPRU 1.3.35A G which exceed those made under the accounting framework to which a *firm* is subject must be treated in accordance with ■ GENPRU 2.2.248 R if not required to be treated under ■ GENPRU 2.2.86 R (2).

Deductions from total capital: Inadmissible assets (insurers only)

2.2.250
PRA

R

■ GENPRU 2.2.250 R to ■ GENPRU 2.2.253 G only apply to an *insurer*.

2.2.251
PRA

R

For the purposes of the *capital resources table*, an *insurer* which is not a *pure reinsurer* must deduct from total *capital resources* the value of any asset which is not an *admissible asset* as listed in ■ GENPRU 2 Annex 7 R (Admissible assets in insurance), unless the asset is held to cover *property-linked liabilities* or *index-linked liabilities* under ■ INSPRU 3.1.57 R or ■ INSPRU 3.1.58 R (Covering linked liabilities).

2.2.252
PRA

G

■ GENPRU 2.2.251 R does not apply to intangible assets which should be deducted from *tier one capital resources* under ■ GENPRU 2.2.155 R (Deductions from tier one: Intangible assets).

2.2.253
PRA

G

The list of *admissible assets* has been drawn with the aim of excluding assets:

- (1) for which a sufficiently objective and verifiable basis of valuation does not exist; or
- (2) whose realisability cannot be relied upon with sufficient confidence; or
- (3) whose nature presents an unacceptable custody risk; or
- (4) the holding of which may give rise to significant liabilities or onerous duties.

Deductions from total capital: Adjustments for related undertakings

2.2.254
PRA

R

■ GENPRU 2.2.254 R to ■ GENPRU 2.2.258 G only apply to an *insurer*.

2.2.255
PRA

R

An *insurer* must deduct from its *capital resources* the value of its investments in each of its *related undertakings* that is an *ancillary services undertaking*.

PAGE 95
2.2.256
PRA

R

In relation to each of its *related undertakings* that is a *regulated related undertaking* (other than an *insurance undertaking*) an *insurer* must add to (if positive), at stage J in the *capital resources table* (Positive adjustments for related undertakings), or deduct from (if negative), at stage L in the *capital resources table* (Deductions from total capital), its *capital resources*

2.2.257
PRA

G

the value of its *shares* in that *undertaking* calculated in accordance with ■ GENPRU 1.3.47 R (Shares in and debts due from related undertakings).

For the purposes of ■ GENPRU 2.2.255 R, investments must be valued at their accounting book value in accordance with ■ GENPRU 1.3.4 R (General requirements: accounting principles to be applied).

2.2.258
PRA

G

Related undertakings which are also *insurance undertakings* are not included in ■ GENPRU 2.2.256 R because an *insurer* that is a *participating insurance undertaking* is subject to the requirements of ■ INSPRU 6.1 (Group Risk: Insurance Groups).

Deductions from total capital: Illiquid assets (BIPRU investment firm only)

2.2.259
FCA PRA

R

■ GENPRU 2.2.259 R to ■ GENPRU 2.2.262 G only apply to a *BIPRU investment firm*.

2.2.260
FCA PRA

R

Illiquid assets means illiquid assets including

- (1) tangible fixed assets (except land and buildings if they are used by a *firm* as security for loans, but this exclusion is only up to the value of the principal outstanding on the loans); or
- (2) any holdings in the *capital resources* of *credit institutions* or *financial institutions*, except to the extent that:
 - (a) they have already been deducted as a *material holding*; or
 - (b) they are *shares* which are included in a *firm's trading book* and included in the calculation of the *firm's market risk capital requirement*; or
- (3) holdings of other *securities* which are not *readily realisable securities*; or
- (4) deficiencies of net assets in *subsidiary undertakings*; or
- (5) deposits which are not repayable within 90 days (except for payments in connection with margined *futures* or *options* contracts); or
- (6) loans and other amounts owed to a *firm* except where they are due to be repaid within 90 days; or
- (7) physical stocks except for *positions* in *physical commodities* which are included in the calculation of a *firm's commodity PRR*.

2.2.261 FCA PRA G If a loan or other amount owing to a *firm* was originally due to be paid more than 90 days from the date of the making of the loan or the incurring of the payment obligation, as the case may be, it may be treated as liquid for the purposes of ■ GENPRU 2.2.260 R (6) where through the passage of time the remaining time to the contractual repayment date falls below 90 days.

2.2.262 FCA PRA G If a loan or other amount is due to be paid within 90 days (whether measured by reference to original or remaining maturity), a *firm* should consider whether it can reasonably expect the amount owing to be paid within that period. If the *firm* cannot reasonably expect it to be paid within that period the *firm* should treat it as illiquid.

Deductions from total capital: Excess trading book position (bank or building society only)

2.2.263 PRA R ■ GENPRU 2.2.263 R to ■ GENPRU 2.2.265 R only apply to a *bank* or *building society*.

- 2.2.264** PRA R
- (1) The *excess trading book position* is the excess of:
 - (a) a *bank* or *building society's* aggregate net long (including notional) *trading book positions* in *shares*, subordinated debt or any other interest in the capital of *credit institutions* or *financial institutions*;
 - over;
 - (b) 25% of that *firm's capital resources* calculated at stage T (Total capital after deductions) of the *capital resources table* (calculated before deduction of the *excess trading book position*).

(2) Only the excess amount calculated under (1) must be deducted.

2.2.265 PRA R The *standard market risk PRR rules* apply for establishing what is a net *position* and the amount and value of that *position* for the purposes of ■ GENPRU 2.2.264 R, ignoring *rules* which would otherwise exclude such *positions* from ■ BIPRU 7.2 (Interest rate PRR) or ■ BIPRU 7.3 (Equity PRR and basic interest rate PRR for equity derivatives) on the basis that they are to be deducted from a *bank* or *building society's capital resources*, or for any other reason.

Other capital resources: Unpaid share capital or initial funds and calls for supplementary contributions (Insurer only)

2.2.266 PRA G ■ GENPRU 2.2.266 G to ■ GENPRU 2.2.269 G only apply to an *insurer*.

2.2.267 PRA G Unpaid *share* capital or, in the case of a *mutual*, *unpaid initial funds* and calls for supplementary contributions are excluded from the *capital resources* of a *firm* except to the extent allowed in a *waiver* under section 138A of the *Act* (Modification or waiver of rules).

2.2.268 PRA G Subject to a *waiver*, under the *Insurance Directives* a maximum of one half of unpaid *share capital* or, in the case of a *mutual*, one half of the *unpaid initial fund* may be included in an *insurer's capital resources*, once the paid-up part amounts to 25% of that *share capital* or fund, up to 50% of total *capital resources*.

2.2.269 PRA G In the case of a *mutual* carrying on *general insurance business* and subject to a *waiver*, calls for supplementary contributions within the *financial year* may only be included in a *firm's capital resources* up to a maximum of 50% of the difference between the maximum contributions and the contributions actually called in, subject to a limit of 50% of total *capital resources*. In the case of a *mutual* carrying on *long-term insurance business*, the *Consolidated Life Directive* does not permit calls for supplementary contributions to be included in a *firm's capital resources*.

Other requirements: insurers carrying on with-profits business (Insurer only)

2.2.270 FCA PRA R ■ GENPRU 2.2.270 R to ■ GENPRU 2.2.275 G only apply to an *insurer*.

2.2.270A FCA PRA G ■ GENPRU 2.2.271 R to ■ GENPRU 2.2.272 G and ■ GENPRU 2.2.274 G are made by both the *PRA* and *FCA* for the purpose of applying these provisions to *insurers* pursuant to the *statutory objectives*.

2.2.271 FCA PRA R An *insurer* carrying on *with-profits insurance business* must, in addition to the other requirements in respect of *capital resources* elsewhere in ■ GENPRU 2.2, meet the following conditions before a *capital instrument* can be included in that *insurer's capital resources*:

- (1) the *insurer* must manage the *with-profits fund* so that discretionary benefits under a *with-profits insurance contract* are calculated and paid disregarding, insofar as is necessary for its *customers* to be treated fairly, any liability the *firm* may have to make payments under the *capital instrument*;
- (2) the intention to manage the *with-profits fund* on the basis set out in (1) must be disclosed in the *firm's Principles and Practices of Financial Management*; and
- (3) no amounts, whether interest, principal, or other amounts, must be payable by the *firm* under the *capital instrument* if the *firm's* assets would then be insufficient to enable it to declare and pay under a *with-profits insurance contract* discretionary benefits that are consistent with the *firm's* obligations under the *FCA's Principle 6 (Customers' interests)*.

2.2.272 FCA PRA G The purpose of ■ GENPRU 2.2.271 R is to achieve practical subordination of *capital instruments* if they are to qualify as *capital resources* to the liabilities an *insurer* has to *with-profits policyholders*, including liabilities which arise from the regulatory duty (as regulated by the *FCA*) to treat *customers* fairly in setting discretionary benefits. (*FCA's Principle 6 (Customers' interests)* requires a *firm* to pay due regard to the interests of its customers and treat them fairly.) It is not sufficient for a *capital instrument* to be subordinated to such liabilities only on winding up of the *firm* because

such liabilities to *policyholders* may have been reduced by the inappropriate use of management discretion to enable funds to be applied in repaying subordinated *capital instruments* before winding up proceedings commence.

2.2.273

PRA

G

■ GENPRU 2.2.271 R is an additional requirement to all other *rules* in this section concerning the eligibility of a *capital instrument* to count as a component of an *insurer's capital resources*. Subordinated debt instruments will be the main type of *capital instrument* to which this *rule* is relevant, including both *upper tier two* (undated) and *lower tier two* (dated) subordinated debt instruments. Subordinated debt instruments which are issued by a *related undertaking* are not intended to be covered by this *rule* and may be included in *group capital resources* as appropriate if the other eligibility criteria are met.

2.2.274

FCA PRA

G

■ GENPRU 2.2.64 R (10) and ■ GENPRU 2.2.159 R (10) contain provisions concerning the marketing of a *capital instrument*. In relation to a *firm* to which ■ GENPRU 2.2.271 R applies, in order to comply with ■ GENPRU 2.2.64 R (10) and ■ GENPRU 2.2.159 R (10), it should draw to the attention of subscribers the risk that payments may be deferred or cancelled in order to operate the *with-profits fund* so as to give priority to the payment of discretionary benefits to *with-profits policyholders*.

2.2.275

PRA

G

- (1) *Upper tier two instruments* should meet the requirements of ■ GENPRU 2.2.177 R (3) which goes beyond the requirement in ■ GENPRU 2.2.271 R (3) since it requires a *firm* to have the option to defer payments in all circumstances, not just if necessary to treat *customers* fairly. However, for *lower tier two instruments*, ■ GENPRU 2.2.271 R (3) represents an additional requirement since a failure to pay amounts of interest or principal on a due date must not constitute an event of default under ■ GENPRU 2.2.159 R (2) for *firms* carrying on *with-profits insurance business*.
- (2) For *firms* which are *realistic basis life firms* compliance with ■ GENPRU 2.2.271 R (3) would usually be achieved if the *capital instrument* provides that no amounts will be payable under it unless the *firm's capital resources* exceed its *capital resources requirement*. However, such *firms* should ensure that the terms of the *capital instrument* refer to *capital resources requirements* in force from time to time, including the current realistic reserving requirements and are not restricted to former minimum capital requirements based only on the *Insurance Directives'* required minimum margin of solvency. For *firms* which are not *realistic basis life firms*, compliance with ■ GENPRU 2.2.271 R (3) will probably require specific reference to be made to treating *customers* fairly in the terms of the *capital instrument*.

Public sector guarantees

2.2.276

FCA PRA

R

A *BIPRU firm* may not include a guarantee from a state or public authority in its *capital resources*.

2.3 Application of GENPRU 2 to Lloyd's

Application of GENPRU 2.1

2.3.1 **R** ■ GENPRU 2.1 applies to the *Society* in accordance with ■ INSPRU 8.1.2 R.

PRA

2.3.2 **R** ■ GENPRU 2.1.38 R to ■ GENPRU 2.2.39 G apply to *managing agents* in accordance with ■ INSPRU 8.1.4 R.

PRA

2.3.3 **G** ■ GENPRU 2.1.13 R requires the *Society* to ensure, in relation to each *member's insurance business*, that *capital resources* equal to or in excess of the *member's capital resources* requirement (CRR) are maintained. ■ GENPRU 2.1 sets out the overall framework of the CRR. ■ INSPRU 1.1 sets out the calculation of the components of the *general insurance capital requirement* and the *long-term insurance capital requirement*.

PRA

2.3.4 **G** *Managing agents* are required to calculate the ECR for the purposes of carrying out *syndicate ICAs* under ■ INSPRU 7.1. As *with-profits insurance business* is not carried on through any *syndicate*, the calculation of the *with-profits insurance capital component* will not be applicable. ■ INSPRU 1.3 is not applied to Lloyd's.

PRA

Calculation of the MCR

2.3.5 **R** For the purposes of ■ GENPRU 2.1.24 R, the *Society* must calculate the MCR in respect of the *general insurance business* of each *member* as the higher of:

PRA

- (1) the *member's share* of the *base capital resources requirement* in respect of *general insurance business* for the *members* in aggregate; and
- (2) the *general insurance capital requirement* for the *members*, calculated according to ■ GENPRU 2.3.11 R.

2.3.6 **R** For the purposes of ■ GENPRU 2.3.5 R (1), the *Society* must determine the *member's share* by apportioning the *base capital resources requirement* in respect of *general insurance business* for the *members* in aggregate between *members* in proportion to the result for each *member* of ■ GENPRU 2.3.11 R.

PRA

2.3.7

PRA

R

For the purposes of ■ GENPRU 2.1.25 R, the *Society* must calculate the MCR in respect of the *long-term insurance business* of each *member* as the higher of:

- (1) the *member's* share of the *base capital resources requirement* in respect of *long-term insurance business* for the *members* in aggregate; and
- (2) the sum of, for each *member*:
 - (a) the *long-term insurance capital requirement*; and
 - (b) the *resilience capital requirement*.

2.3.8

PRA

R

For the purposes of ■ GENPRU 2.3.7 R (1), the *Society* must determine the *member's* share by applying to the aggregate long-term business *base capital resources requirement* the ratio of the result for the *member* of ■ GENPRU 2.3.7 R (2) to the aggregate of the results of ■ GENPRU 2.3.7 R (2) for all *members*.

Calculation of the base capital resources requirement

2.3.9

PRA

R

The amount of the *base capital resources requirement* for the *members* in aggregate is:

- (1) for *general insurance business*, € 3.7 million; and
- (2) for *long-term insurance business*, € 3.7 million.

Calculation of the general insurance capital requirement

2.3.10

PRA

R

For the purposes of ■ GENPRU 2.1.34 R, the *Society* must calculate the *general insurance capital requirement* for the *members* in aggregate as the higher of:

- (1) the aggregate for all *members* of the higher of, for each *member*, the result of the *premiums amount* and the *claims amount*; and
- (2) the *brought forward amount*.

2.3.11

PRA

R

The *Society* must determine the *general insurance capital requirement* for each *member* by apportioning the result of ■ GENPRU 2.3.10 R between *members* on a fair and reasonable basis, provided that the *general insurance capital requirement* for a *member* must not be less than the higher of the result of the *premiums amount* and the *claims amount* for that *member*.

PAGE
101

2.3.12

PRA

G

The *Society* should calculate the *premiums amount* and the *claims amount* for each *member* on the basis of the *member's* own *general insurance business*, including *insurance business* that attaches to the reinsuring *member* for the purposes of GENPRU following an *approved reinsurance to close* (see ■ INSPRU 8.2.16 R).

2.3.13 **R** The *Society* must calculate the *general insurance capital requirement* it would have to determine under ■ GENPRU 2.1.34 R if it were an *insurer* carrying on all the *general insurance business* carried on by its *members*, but eliminating *inter-syndicate reinsurance* (the *Society GICR*).

2.3.14 **G** For the purpose of ■ GENPRU 2.3.13 R the *Society* may make appropriate approximations, taking reasonable care to avoid underestimating the *Society GICR*.

2.3.15 **R** The *Society* must determine each *member's* share of the *Society GICR* by allocating the *Society GICR* between the *members* in proportion to the result for each *member* of ■ GENPRU 2.3.11 R.

Application of GENPRU 2.2

2.3.16 **R** Subject to ■ GENPRU 2.3.18 R, ■ GENPRU 2.3.19 R and ■ GENPRU 2.3.21 R, ■ GENPRU 2.2 applies to *managing agents* and to the *Society* in accordance with:

- (1) for *managing agents*, ■ INSPRU 8.1.4 R; and
- (2) for the *Society*, ■ INSPRU 8.1.2 R.

2.3.17 **G** ■ GENPRU 2.1 sets out minimum *capital resources requirements* for a *firm* and for Lloyd's *members*. ■ GENPRU 2.2 sets out how, for the purpose of these requirements, *capital resources* are defined and measured. ■ GENPRU 2.2 applies:

- (1) to *managing agents* for their calculation of the *capital resources* managed by them in respect of each *syndicate* they manage (by reference, where there is a change in the underlying capital provision, to each open *syndicate* year); and
- (2) to the *Society* for its calculation of:
 - (a) each *member's* *capital resources*; and
 - (b) its own *capital resources*.

2.3.18 **R** ■ GENPRU 2.2.32 R to ■ GENPRU 2.2.41 R (Limits on the use of different forms of capital) do not apply to *managing agents*.

2.3.19 **R** ■ GENPRU 2.2.32 R to ■ GENPRU 2.2.41 R (Limits on the use of different forms of capital) do apply to the *Society* with respect to:

- (1) the *capital resources* requirements for the *members* in aggregate; and
- (2) the aggregate *capital resources* supporting the *insurance business* of all the *members*.

2.3.20

PRA

R ■ GENPRU 2.2.74 R does not apply to the *Society* or to *managing agents*.

2.3.21

PRA

R In this section (■ GENPRU 2.3), "the aggregate *capital resources* supporting the *insurance business* of all the *members*" are:

- (1) the aggregate of all the *members' capital resources* calculated under ■ GENPRU 2.3.25 R; and
- (2) the *Society's capital resources* excluding callable contributions.

Calculation of capital resources

2.3.22

PRA

R The *capital resources table* applies with the modifications that:

- (1) *Core tier one capital* includes *Lloyd's members' contributions* in accordance with ■ GENPRU 2.3.34 R, subject, in the case of letters of credit, guarantees and verifiable sums arising out of life assurance policies, to compliance with ■ GENPRU 1.5.8 G to ■ GENPRU 1.5.12 R; and
- (2) the *Society* may also recognise and value *callable contributions*, pursuant to ■ GENPRU 2.3.24 R.

2.3.23

PRA

G *Lloyd's member's contributions* are *admissible assets* under ■ GENPRU 2.3.34 R and include letters of credit, guarantees and verifiable sums arising out of life assurance policies held as *funds at Lloyd's*. Assets that may be valued as part of *capital resources* under PRU are not necessarily, however, permitted investments for *members* under the terms of any *Lloyd's trust deed*.

2.3.24

PRA

R In calculating its *capital resources*, the *Society* may, subject to ■ GENPRU 1.5.13 R to ■ GENPRU 1.5.14 R, recognise and value *callable contributions*.

2.3.25

PRA

R The *Society* must calculate each *member's capital resources* as the sum of:

- (1) a *member's* proportionate share of the *capital resources* held at *syndicate* level for each *syndicate* in which the *member* participates; and
- (2) the value of a *member's funds at Lloyd's* after deducting liabilities in compliance with ■ GENPRU 1.5.18 R.

2.3.26

PRA

R In order to comply with ■ GENPRU 2.1.13 R the *Society* must ensure at all times that:

- (1) each *member's capital resources requirement* is covered by:
 - (a) that *member's capital resources*, calculated according to ■ GENPRU 2.3.25 R; and

(b) to the extent that (a) is insufficient, by the *Society's* own *capital resources*; and

(2) the *Society GICR* is covered by the aggregate *capital resources* supporting the *insurance business* of all the *members*.

2.3.27

PRA

R

For the purposes of ■ GENPRU 2.3.26 R (1)(b), the *Society* must maintain at all times *capital resources* sufficient to meet the aggregate of, for each *member*, the amount, if any, by which the *member's capital resources* fall short of the *member's capital resources requirement*.

2.3.28

PRA

R

The *Society* must calculate each *member's* share of the amount of *capital resources* required to comply with ■ GENPRU 2.2.33 R as the higher of:

(1) 1/3 of the *long-term insurance capital requirement* for the *members* in aggregate; and

(2) the *base capital resources requirement*;

allocated between the *members* in proportion to the result for each *member* of ■ GENPRU 2.3.7 R (2).

2.3.29

PRA

R

For the purposes of ■ GENPRU 2.2.34 R, the *Society* must ensure that the aggregate *capital resources* supporting the *insurance business* of all the *members* meet the higher of:

(1) 1/3 of the *general insurance capital requirement* for the *members* in aggregate;

(2) 1/3 of the *Society GICR*; and

(3) the *base capital resources requirement*;

with the sum of the items listed in ■ GENPRU 2.2.34 R.

2.3.30

PRA

R

The *Society* must calculate each *member's* share of the amount of *capital resources* required to comply with ■ GENPRU 2.2.34 R as the higher of:

(1) 1/3 of the *general insurance capital requirement* for the *members* in aggregate;

(2) 1/3 of the *Society GICR*; and

(3) the *base capital resources requirement*;

allocated between the *members* in proportion to the result for each *member* of ■ GENPRU 2.3.11 R.

Characteristics of tier one capital

2.3.31

PRA

R

A Lloyd's member's contribution may be included in tier one capital resources to the extent that:

- (1) the proceeds are immediately and fully available in respect of the member's insurance business at Lloyd's;
- (2) (except in relation to letters of credit), it complies with ■ GENPRU 2.2.64 R (3) or cannot be repaid to a member until all of the member's liabilities in respect of its insurance business at Lloyd's have been extinguished, covered or reinsured by an approved reinsurance to close;
- (3) it otherwise complies with ■ GENPRU 2.2.64 R (5) to ■ GENPRU 2.2.64 R (10).

Adjustments for related undertakings

2.3.32

PRA

R

■ GENPRU 2.2.256 R (Adjustment for regulated related undertakings other than insurance undertakings) applies to the Society with the modification that the Society must also value its insurance undertakings in accordance with ■ GENPRU 2.2.256 R.

2.3.33

PRA

R

If a related undertaking is an insurance undertaking which has a deficit in the capital resources available to cover its capital resources requirement, the Society must make provision for:

- (1) its proportionate share of that deficit; or
- (2) in the case of a subsidiary undertaking, the whole of that deficit.

Modification of GENPRU 2 Annex 7R for Lloyd's

2.3.34

PRA

R

In the case of members, Lloyd's members' contributions are included in ■ GENPRU 2 Annex 7 R and include:

- (1) letters of credit;
- (2) guarantees; and
- (3) verifiable sums arising out of life assurance policies;

held as funds at Lloyd's.

2.3.35

PRA

G

The effect of ■ GENPRU 2.3.34 R is that Lloyd's members' contributions, including letters of credit, guarantees and life assurance policies, are admissible assets.

Part 2 of the capital resources calculation for an investment firm with a waiver from consolidated supervision

Note (1): Where the table refers to related text, it is necessary to refer to that text in order to understand fully what is included in the descriptions of capital items and deductions set out in the table.

Note (2): If the amount calculated at:

- (a) stage N less the deductions in respect of the *capital resources requirement* made immediately following stage N; or
- (b) stage T less the deductions in respect of the *capital resources requirement* made immediately following stages N and T;

is a negative number the *firm's capital resources* are less than its *capital resources requirement*.

Note (4): The *material holdings* that must be deducted at part 2 of stage E are *material holdings* issued by *undertakings* which would have been members of the *firm's UK consolidation group* or *non-EEA sub-group* if the *firm* did not have an *investment firm consolidation waiver* if:

- (1) in relation to a *BIPRU investment firm*, the holding forms part of the *undertaking's tier one capital resources*; or
- (2) (subject to (3)) in relation to any other *undertaking*, the holding would form part of the *undertaking's tier one capital resources* if:
 - (a) that *undertaking* were a *BIPRU firm* with a *Part 4A permission*; and
 - (b) it had carried on all its business in the *United Kingdom* and had obtained whatever *permissions*

Part 2 of the capital resources calculation for an investment firm with a waiver from consolidated supervision

- (3) **for doing so are required under the Act; or**
- in relation to any *undertaking* not falling within (1) and for which the methodology in (2) does not give an answer, the holding would form part of its *tier one capital resources* if the *undertaking* were a *BIPRU firm* of the same category as the *firm* carrying out the calculation under this Annex.**

Note (5): The *material holdings* that must be deducted by a *firm* at part 3 of stage E and at stage J or at Part 1 of stage M are *material holdings* issued by *undertakings* which would have been members of that *firm's UK consolidation group* or *non-EEA sub-group* if the *firm* did not have an *investment firm consolidation waiver* and which do not fall into Note (4).

Note (6): The contingent liabilities that must be deducted by a *firm* at Part 1 of stage M are any contingent liabilities which the *firm* has in favour of *investment firms, financial institutions, asset management companies* and *ancillary services undertakings* which would have been members of the *firm's UK consolidation group* or *non-EEA sub-group* if the *firm* did not have an *investment firm consolidation waiver*.

Admissible assets in insurance

PRA

- (1) (A) Investments that are, or amounts owed arising from the disposal of:
- (a) *debt securities*, bonds and other money and capital market instruments;
 - (b) loans;
 - (c) *shares* and other variable yield participations;
 - (d) *units* in:
 - (i) *collective investment schemes* falling within the *UCITS Directive*;
 - (ii) *non-UCITS retail schemes*;
 - (iii) *recognised schemes*; and
 - (iv) any other *collective investment scheme* where the *insurer's* investment in the scheme is sufficiently small to be consistent with a prudent overall investment strategy, having regard to the investment policy of the scheme and the information available to the *insurer* to enable it to monitor the investment risk being taken by the scheme
 - (e) land, buildings and immovable property rights;
 - (f) an *approved derivative* or *quasi-derivative* transaction that satisfies the conditions in **INSPRU 3.2.5 R** or an *approved stock lending transaction* that satisfies the conditions in **INSPRU 3.2.36 R**.
- (B) Debts and claims
- (a) debts owed by *reinsurers*, including *reinsurers' shares of technical provisions* (but excluding amounts recoverable from an *ISPV**);
 - (b) deposits with and debts owed by *ceding undertakings*;
 - (c) debts owed by *policyholders* and intermediaries arising out of direct and *reinsurance* operations (except where overdue for more than 3 months and other than *commission* prepaid to agents or intermediaries);
 - (d) for *general insurance business* only, claims arising out of salvage and subrogation;

- (e) for *long-term insurance business* only, advances secured on, and not exceeding the *surrender value* of, *long-term insurance contracts* issued by the *insurer*;
 - (f) tax recoveries;
 - (g) claims against *compensation funds*.
- (C) Other assets
- (a) tangible fixed assets, other than land and buildings;
 - (b) cash at *bank* and in hand, *deposits with credit institutions* and any other bodies authorised to receive *deposits*;
 - (c) for *general insurance business* only, *deferred acquisition costs*;
 - (d) accrued interest and rent, other accrued income and prepayments;
 - (e) for *long-term insurance business* only, reversionary interests.
- * An *insurer* may treat amounts recoverable from an *ISPV* as an *admissible asset* if it obtains a *waiver* under section 138A of the *Act*. The conditions that will need to be met, in addition to the statutory tests under section 138A(4) of the *Act*, before the *appropriate regulator* will consider granting such a *waiver* are set out in **INSPRU 1.6.13 G** to **INSPRU 1.6.18 G**.
- (2) Subject to paragraph (3) below a *unit* in a *collective investment scheme* is only admissible for the purposes of paragraph (1) above if it falls within paragraph (1)(A)(d), notwithstanding that it may also fall into one or more other categories in paragraph (1).
- (3) A *derivative, quasi-derivative* or *stock lending* transaction is only admissible for the purposes of paragraph (1) above if it falls within paragraph (1)(A)(f), notwithstanding that it may also fall into one or more other categories in paragraph (1).

Guidance on applications for waivers relating to Implicit items

PRA

G Implicit items under the Act

- 1 The *capital resources table* does not permit *implicit items* to be included in the calculation of a *firm's capital resources*, except subject to a *capital resources* under section 138A of the *Act*. Article 27(4) of the *Consolidated Life Directive* states that *implicit items* can be included in the calculation of a *firm's capital resources*, within limits, provided that the supervisory authority agrees. Certain *implicit items*, however, are not eligible for inclusion beyond 31 December 2009 (see paragraph 5). The *appropriate regulator* may be prepared to grant a *capital resources* from the *capital resources table* to allow *implicit items*, in line with the purpose of the *Consolidated Life Directive*, and provided the conditions as set out in article 27(4) of the *Consolidated Life Directive* are met. Such a *capital resources* would allow an *implicit item* to count towards the *firm's capital resources* available to count against its *capital resources requirement (CRR)* set out for *realistic basis life firms* in GENPRU 2.1.18 R and for *regulatory basis only life firms* in GENPRU 2.1.23 R. An *implicit item* may potentially count as *tier one capital* (but not *core tier one capital*) or *tier two capital*. Where a *capital resources* is granted allowing an *implicit item* as *tier one capital*, the value of the *implicit item* so allowed must be included at stage B of the *capital resources table*. If the application of the value of the *implicit item* is restricted by GENPRU 2.2.29 R, which requires that at least 50% of a *firm's tier one capital resources* must be accounted for by *core tier one capital*, the remainder may be included at stage G of the calculation in the *capital resources table*, subject to GENPRU 2.2.31 G. An *implicit item* treated as *tier two capital* will also be included at stage G of the calculation, again subject to GENPRU 2.2.81 R. Article 29(1) of the *Consolidated Life Directive* requires that *implicit items* be excluded from the capital eligible to cover the *guarantee fund*. Under GENPRU 2.2.33 R a *firm* must meet the *guarantee fund* from the sum of the items listed at stages A, B, G and H of the *capital resources table* less the sum of the items listed at stage E of the *capital resources table*. The *appropriate regulator* will only grant an *implicit items capital resources* if the *capital resources* includes a modification to GENPRU 2.2.33 R to ensure that the *implicit item* does not count towards meeting the *guarantee fund*.
- 2 Under section 138A of the *Act*, the *appropriate regulator* may, on the application of a *firm*, grant a *capital resources* from PRU. There are general requirements that must be met before any *capital resources* can be granted. As explained in SUP 8, the *appropriate regulator* may not give a *waiver* unless the *appropriate regulator* is satisfied that:
 - (1) compliance by the *firm* with the *rules* will be unduly burdensome, or would not achieve the purpose for which the *rules* were made; and
 - (2) the *waiver* would not result in undue risk to *persons* whose interests the *rules* are intended to protect.
- 3 The *appropriate regulator* will assess compliance with the requirements in the light of all the relevant circumstances. This will include consideration of the costs incurred by compliance with a particular *rule* or whether a *rule* is framed in a way that would make compliance difficult in view of the *firm's* circumstances. For example, the *firm* may demonstrate that if an *implicit item* were not allowed, the *firm* would either have to suffer increased (and unwarranted) costs in injecting further *capital resources* or operate with a lower equity backing ratio (see case studies in paragraph 43). Even if a *firm* can demonstrate a case for an *implicit item waiver*, it should not assume that the *appropriate regulator* will grant the *capital resources* requested, or that any *capital resources* will be granted for the full amount of the *implicit item* which could be granted, as set out in this annex. The *appropriate regulator* will consider each application on its own merits, and taking into

account all relevant circumstances, including the financial situation and business prospects of the *firm*.

4 *Implicit items* are economic reserves which are contained within the long-term insurance business provisions. Article 27(4) of the *Consolidated Life Directive* identifies three types of *implicit item*, in respect of: future profits, *zillmerisation* and hidden reserves. This annex is intended to amplify the *guidance* in SUP 8 relating to the granting of *waivers* for *implicit items* and to provide *guidance* on other aspects. Whilst this *guidance* applies to applications for *waivers* for *implicit items* generally, for a *realistic basis life firm*, to the extent that an *implicit item* is allocated to a *with-profits fund*, this *guidance* relates to *implicit items* for the purposes of determining the *regulatory value of assets* (see INSPRU 1.4.24 R).

5 The *Consolidated Life Directive* (reflecting the changes introduced by the Solvency 1 Directive) requires member states to end a *firm's* ability to take into account future profits *implicit items* by (at the latest) 31 December 2009. Until then, the maximum amount of the *implicit item* relating to future profits permitted under the *Consolidated Life Directive* is limited to 50% of the product of the estimated annual profits and the average period to run (not exceeding six years) on the *policies* in the portfolio. The *Consolidated Life Directive* further limits the maximum amount of these economic reserves that can be counted to 25% of the lesser of the available solvency margin and the required solvency margin. The changes introduced by the *Solvency 1 Directive* take effect for financial years beginning on or after 1 January 2004. However, the *Consolidated Life Directive* allows for a transitional period of five years, which runs from 20 March 2002 (the publication date of the *Solvency 1 Directive*), for *firms* to become fully compliant with these new requirements. *firms* will need to consider the potential impact of these changes when engaging in future capital planning. When applying for an *implicit item waiver* a *firm* should provide the appropriate regulator with a plan showing how the *firm* intends to maintain its capital adequacy over the period to 31 December 2009. *firms* should also be aware that the appropriate regulator will typically only grant *waivers* for a maximum of 12 months.

Future Profits

6 The future profits *implicit item* allows *firms* to take credit for margins in the *mathematical reserves* to the extent that these are expected to emerge from in force business. The future profit from in force business should be assessed, in the first instance, on prudent assumptions, to demonstrate that there is an 'economic reserve'. Having demonstrated that it exists, the amount should be limited to an amount calculated using a formula that takes into account the actual profit which has emerged over the last five years (see paragraph 28).

Zillmerisation

7 *Zillmerisation* is an allowance for acquisition costs that are expected, under prudent assumptions, to be recoverable from future *premiums*. *firms* can make a direct adjustment to their reserves for *zillmerisation*, subject to the *rules* on *mathematical reserves*. However, where no such adjustment has been made, the appropriate regulator will consider an application for a *capital resources* to take into account an *implicit item*.

Hidden reserves

8 Hidden reserves are reserves resulting from the underestimation of assets (other than *mathematical reserves*).

Process for applying for a waiver, including limits applicable when a waiver is granted

9 This annex sets out the procedures to be followed and the form of calculations and data which should be submitted by *firms* to the appropriate regulator. This *guidance* should also be read in conjunction with the general requirements relating to the *capital resources* process described in SUP 8. The appropriate regulator expects that applications for *waivers* in respect of future profits and *zillmerising* will not normally be considered to pass the "not result in undue risk to persons whose interests the *rules* are intended to protect" test unless the relevant criteria set out in this *guidance* have been satisfied and an application for such a *capital resources* may require further criteria to be satisfied for this test to be passed. As set out below, *waivers* in respect of either *zillmerising* or hidden reserves will not normally be given except in very exceptional circumstances.

Timing

- 10 *A long-term insurer may apply to the appropriate regulator for a capital resources in respect of implicit items. A capital resources will not apply retrospectively (see SUP 8.3.6 G). Consequently, applications intended for a particular accounting reference date will normally need to be made well before that reference date. Applications by firms must be made to the appropriate regulator in writing and include the relevant details specified under SUP 8.3.3 D. Given the uncertainty in predicting the future, waivers will normally be granted for a maximum of 12 months at a time and any further applications will need to be made accordingly.*
- 11 *The information that will be required to enable an application to be considered as set out below, should normally include a demonstration of how the capital resources requirement is to be met, with and without the capital resources. Clearly, up-to-date information may not be available before the financial year-end. In some cases information from the previous year-end's return may be used, as long as any known significant changes in the structure of the firm, or the assumptions used, have been taken into account.*
- 12 *If the application for a capital resources is granted, when a firm submits its next return the amount of the implicit item shown should not exceed that supported by the firm's calculations as at the valuation date. In the event that the amount of the future profits item calculated by the firm based on these updated assumptions is less than the amount calculated at the time of the firm's waiver application, the lower figure should be used in the return.*
- 13 *An implicit item in respect of zillmerising or hidden reserves is related to the basis on which liabilities or assets have been valued. In the case of hidden reserves, as explained below, the granting of a capital resources will be dependent on the overall capital resources of the firm. waivers in respect of these implicit items will, therefore, only be made in relation to the position shown in a particular set of returns and it will be essential for firms to submit applications to the appropriate regulator well in advance of the latest date for the submission of the relevant return.*
- 14 *Waivers may be withdrawn by the appropriate regulator at any time (e.g. where the appropriate regulator considers the amount in respect of which a capital resources has been given can no longer be justified). This may be as a result of changes in the firm's position or as a result of queries arising on scrutiny of the returns.*

Information to be submitted

- 15 *An application for a capital resources (which includes an application for an extension to or other variation of a capital resources) should be prepared using the standard application form for a capital resources (see SUP 8 Annex 2 D). In addition, the application should be accompanied by full supporting information to enable the appropriate regulator to arrive at a decision on the merits of the case. In particular, the application should state clearly the nature and the amounts of the implicit items that a firm wishes to count against its capital resources requirement and whether it proposes to treat the implicit item as tier one capital or tier two capital. In order to assess an application, the appropriate regulator needs information as to the make-up of the firm's capital resources, the quality of the capital items which have been categorised into each tier of capital and a breakdown of capital both within and outside the firm's long-term insurance fund or funds and between the firm's with-profits funds and non-profit funds. An explanation as to the appropriateness of the proposed treatment of the implicit item under the capital resources table should also be provided, including a demonstration that, in allowing for implicit items, there has been no double counting of future margins and that the basis for valuing such margins is prudent.*
- 16 *The PRA recognises that the assessment of the insurance technical provisions reflects the contractual obligations of the firm. Implicit items are therefore margins over and above an economic assessment in these technical provisions only. Non-contractual "constructive" obligations arising from a firm's regulatory duty (as regulated by the FCA) to treat customers fairly e.g. regarding future terminal bonuses, are not fully captured by the technical provisions. A firm must instead be satisfied that it has sufficient capital resources at all times to meet its obligations under the FCA's Principle 6. The granting of a waiver for an implicit item does not in any way detract from this requirement and a firm will need to be satisfied that this condition is still met.*

17 As a minimum, applications for a future profits *implicit item* should be supported by the information contained in Forms 13, 14, 18, 19, 40, 41, 42, 48, 49, the answers to questions 1 to 12 of the abstract of the valuation report, Appendix 9.4 of *IPRU(INS)*, the abstract of the valuation report for the realistic valuation, Appendix 9.4A of *IPRU(INS)* and Forms 51, 52, 53, 54 and 58. For a *zillmerisation* implicit item, only those items noted above forming part of the abstract valuation report will normally be needed. Applications for a *capital resources* in respect of a hidden reserves *implicit item* will normally be considered only if accompanied by the information which is contained in the annual regulatory *returns*. In particular, the balance sheet forms, *long-term insurance business* revenue accounts, and abstract of the valuation report as set out in Appendices 9.1, 9.3 and 9.4 of *IPRU(INS)* should be provided. This is not to say that a full regulatory *return* must be provided in the specified format, simply that the information contained in these forms should be provided. Where appropriate, the information may be summarised.

18 The following supporting information relating to the calculation of the amounts claimed should be supplied for each type of *implicit item* in respect of which a *capital resources* is sought: Future profits: in addition to information related to the prospective calculation and retrospective calculation described below, the profits reported in each of the last five *financial years* up to the date of the most recent available valuation under *rule 9.4* of *IPRU(INS)* which has been submitted to the appropriate regulator prior to, or together with, the application, and the amounts and nature of any exceptional items left out of account; the method used for calculating the average period to run and the results for each of the main categories of business, both before and after allowing for premature termination (where the calculation has been made in two stages); and the basis on which this allowance has been made. *Zillmerising*: the categories of contracts for which an item has been calculated and the percentages of the *relevant capital sum* in respect of which an adjustment has been made. Hidden reserves: particulars, with supporting evidence, of the undervaluation of assets for which recognition is sought.

Continuous monitoring by firms

19 *Firms* should take into account any material changes in financial conditions or other relevant circumstances that may have an impact on the level of future profits that can prudently be taken into account. *firms* should also re-evaluate whether an application to vary an *implicit item waiver* should be made whenever circumstances have changed. In the event that circumstances have changed such that an amendment is appropriate, the *firm* must contact the appropriate regulator as quickly as possible in accordance with Principle 11. (See SUP 8.5.1 R). In this context, the appropriate regulator would expect notice of any matter that materially impacts on the *firm's* financial condition, or any *waivers* granted.

Future profits - factors to take into account when submitting calculations to support waiver applications

20 Where an application is made in respect of a *firm* which has separate *with-profits funds* and *non-profit funds*, the *firm* should ensure that the *capital resources requirement* in respect of the *non-profit fund* is not covered by future profits attributable to *policyholders* arising in the *with-profits fund*. Furthermore, for a *realistic basis life firm* the amount of the *implicit item* allocated to each *with-profits fund* should be calculated separately, as the amount allocated to each *with-profits fund* will be taken into consideration in the calculation of the *with-profits insurance capital component* (see INSPRU 1.4.24 R).

21 *firms* need to assess prospective future profit (i.e. how much can reasonably be expected to arise) and compare this to maximum limits (in article 27(4) of the *Consolidated Life Directive*), which relate to past profits.

Future profits - prospective calculation

22 The application for a *capital resources* should be supported by details of a prospective calculation of future profits arising from in-force business. The information supplied to the appropriate regulator should include a description of the method used in the calculation and of the assumptions made, together with the results arising. From 31 December 2009 at the latest, future profits *implicit items* will no longer be permitted under the *Consolidated Life Directive*. Where a *firm* first applies for an *implicit item waiver* after GENPRU 2.2 comes into effect, under the prospective calculation a *firm* should only take into consideration future profits that are expected to emerge in the period

up to 31 December 2009. *Implicit item waivers* granted before GENPRU 2.2 comes into effect will continue to operate under the terms of those *wavers*, but an application to vary the terms of such a *capital resources*, for example to extend the effective period, is an application for a new *capital resources* for which a *firm* should usually only take into consideration future profits that are expected to emerge in the period up to 31 December 2009.

Assumptions

23 The assumptions made should be prudent, rather than best estimate, assumptions of future experience (that is, the prudent assumptions should allow for the fair market price for assuming that risk including associated expenses). In particular, it would not normally be considered appropriate for the projected return on any asset to be taken to be higher than the risk-free yield (that is, assessed by reference to the yield arrived at using a model of future risk free yields properly calibrated from the forward gilts market). It may also be appropriate to bring future withdrawals into account on a suitably prudent basis. For *with-profits business*, the assumptions for future investment returns should not capitalise future bonus loadings except where the *with-profits policyholders* share in risks other than the investment performance of the fund. Furthermore, the rate at which future profits are discounted should include an appropriate margin over a risk free rate of return. Calculations should also be carried out to demonstrate that the prospective calculation of the future profits arising from the in-force business supporting the application for the *implicit item* would be sufficient to support the amount of the *implicit item* under each scenario described for use in determining the *resilience capital requirement* - where the *capital resources* relates to an *implicit item* allocated to more than one fund, this should be demonstrated separately for that element of the *implicit item* allocated to each fund. For an *implicit item* allocated to a *with-profits fund*, proper allowance should be made for any shareholder transfers to ensure that the *implicit item* is not supported by future profits which will be required to support those transfers. To the extent, if any, that future profits are dependent on the levying of explicit expense related charges (for example as in the case of unit-linked business) the documentation submitted should include a demonstration of the prudence of the assumptions made as to the level at which future charges will be levied and expenses incurred.

Other limitations on the extent to which waivers for implicit items will be granted to a realistic basis life firm

24 Where a *capital resources* in respect of an *implicit item* is granted to a *realistic basis life firm* additional limits may apply by reference to a comparison of *realistic excess capital* and *regulatory excess capital* including allowance for the effect of the *capital resources*. Where the *capital resources* relates to an *implicit item* allocated partly or entirely to a *with-profits fund*, the *capital resources* will contain a limitation to the effect that the *regulatory excess capital* for that *with-profits fund*, allowing for the effect of the *capital resources*, may not exceed that fund's *realistic excess capital*. This limitation will apply on an ongoing basis so that, for example, in the case of an *implicit item* allocated to a *with-profits fund*, the amount of the *implicit item* would be limited to zero whenever the *regulatory excess capital* exceeded the *realistic excess capital* of that fund.

Other charges to future profits

25 To avoid double counting, no account should be taken of any future surplus arising from assets corresponding to explicit items which have been counted towards the *capital resources requirement* such as shareholders funds, surplus carried forward or investment reserves. Deductions should be made in the calculation of future surpluses for the impact of any other arrangements which give rise to a charge over future surplus emerging (e.g. financial *reinsurance* arrangements, subordinated loan capital or contingent loan agreements). Deductions should also be made to the extent that any credit has been taken for the purposes of INSPRU 1.4.45 R (2) for the present value of future profits relating to non-profit business written in a *non-profit fund*. The information supplied to the appropriate regulator should identify the amount and reason for any adjustments made to the calculation of the prospective amount of future profits.

26 The *firm* should confirm to the appropriate regulator that the calculations have been properly carried out and that there are no other factors that should be taken into account.

Future profits - retrospective calculation

Overriding limit

27 The maximum amount of the *implicit item* relating to future profits permitted under the *Consolidated Life Directive* is 50% of the product of the estimated annual profit and the average period to run (not exceeding six years (ten years during the transitional period referred to in paragraph 5)) on the *policies* in the portfolio. Article 27(4) of the *Consolidated Life Directive* also imposes a further limit on the amount of the *implicit item* equal to 25% of the lower of:

- (1) the *firm's capital resources*; and
- (2) the higher of its *base capital resources requirement for long-term insurance business* and its *long-term insurance capital requirement*.

Once the transitional period set out in article 71(1) of the *Consolidated Life Directive* has expired in 2007 (see paragraph 5), the appropriate regulator will not allow a *capital resources* for more than the amount permitted by article 27(4) of the Directive.

Definition of profits

28 The estimated annual profit should be taken as the average annual surplus arising in the *long-term insurance fund* over the last five *financial years* up to the date of the most recent available valuation which has been submitted to the appropriate regulator prior to, or together with, the application. For this purpose, deficiencies arising should be treated as negative surpluses. Where a *firm's financial year* has altered, the surplus arising in a period falling partly outside the relevant five year period should be assumed to accrue uniformly over the period in question for the purpose of estimating the profits arising within the five year period. When there has been a transfer of a block of business into the *firm* (or out of the *firm*) during the period, surplus arising from the transferred block should be included (or excluded) for the full five year period. Where a portion of a block of business is transferred, the surplus included (or excluded) should be a reasonable estimate of the surplus arising from the portion transferred.

29 Where a *firm* has been carrying on *long-term insurance business* for less than 5 years, the total profits made during the past five years should be taken to be the aggregate of any surpluses that have arisen during the period in which *long-term insurance business* has been carried on less any deficiencies that may have arisen during that period. The resulting total should still be divided by five to obtain the estimated annual profit.

Exceptional items

30 Substantial items of an exceptional nature should be excluded from the calculation of the estimated annual profit. Such items include profits arising from an exceptional change in the value at which assets are brought into account, where this is not reflected in a similar change in the amount of the liabilities, and profits arising from a change in the overall valuation approach between one year and another. An exceptional loss (i.e. a reduction of an exceptional nature in the surplus arising) may be excluded from the calculation only to the extent that it can be set against a profit or profits up to the amount of the loss and arising from a similar cause. It is not intended, however, that any adjustment should be made for the effect on surplus of a net strengthening of reserves for costs associated with an expansion of the business or for special capital expenditure, such as the purchase of computer systems.

Double counting

31 The inclusion of investment income arising from the assets representing the explicit components of *capital resources* (as part of the estimated annual profit for the purpose of determining the future profits *implicit item*) would result in double-counting. If those assets were required to meet the effects of adverse developments, this would automatically result in the cessation of the contribution to profits from the associated investment income. It would clearly not be appropriate for the appropriate regulator to grant a *capital resources* which would enable a *firm* to meet the *capital resources requirement* on the basis of counting both the capital values of the assets and the value of the income flow which they can be expected to generate.

32 The definition of the estimated annual profit as the surplus arising in the *long-term insurance fund* ensures that any contribution to surplus arising from transfers from the profit and loss account, including investment income on shareholders' assets, is not included in the estimated annual profit. Thus double-counting should not arise in respect of shareholders' assets. Double-counting

may arise, however, in respect of the investment income from the assets representing the explicit components of *capital resources* carried within the *long-term insurance fund* (e.g. surplus carried forward or investment reserves), but the amount of such investment income is not separately identified in the *return*.

- 33 Where there is reason to suspect that the elimination of any such double-counting would reduce a *firm's capital resources* to close to or below the required level, or would otherwise be significant, the appropriate regulator will request this information with a view to taking account of this factor in determining the amount of the *implicit item*. Additional information concerning investment income should be furnished with an application for a *capital resources*, if a *firm* believes that any double-counting would fall into one of the categories mentioned above.

Average period to run

- 34 The average number of years remaining to run on *policies* should be calculated on the basis of the weighted average of the periods for individual *contracts of insurance*, using as weights the actuarial present value of the benefits payable under the contracts. A separate weighted average should be calculated for each of the various categories of contract and the results combined to obtain the weighted average for the portfolio as a whole. Approximate methods of calculation, which the *firm* considers will give results similar to the full calculation, will be accepted. In particular, the appropriate regulator will normally accept the calculation of an average period to run for a specific category of contract on the basis of the average valuation factor for future benefits derived from data contained in the abstract of the valuation report in the regulatory *returns*. A *firm* will be asked to demonstrate the validity of the method adopted only where an abnormal distribution of the business in force gives grounds for doubt about its accuracy.

- 35 Calculations will normally be requested only for the main categories of *insurance business*, accounting for not less than 90% of the *mathematical reserves*, except where there are grounds for expecting that the exclusion of certain categories of *policies* under this provision might have a significant effect on the resulting average period to run. Detailed calculations will not be required where a *capital resources* is sought in respect of a low multiple of the annual profits, well within the average period to run for the *firm*.

- 36 Where, for a particular category of business, a method of valuation is used which does not involve the calculation of the value of future benefits and which is significant for the *firm* in question, the calculation of the average period to run should be based on estimates of the value of future benefits.

Premature termination of contracts

- 37 Allowance should be made for the premature termination of *contracts of insurance*, based on the actual experience of the *firm* over the last five years, or other appropriate period, and taking into account specific features of contracts such as options which can be expected to lead to premature termination (e.g. guaranteed surrender values on income bonds written as *long-term insurance contracts* and option dates on flexible whole-life contracts). The adjustment should be made separately for each of the main categories of business. The use of industry-wide rates of termination will be acceptable where a *firm* is satisfied that this will result in sufficient allowance being made having regard to the *firm's* own experience. Methods of calculation that involve a degree of approximation will be permitted.

- 38 For certain types of contract, where the period left to run is most naturally defined as the term to a fixed maturity or expiry date, the allowance for premature termination should also take into account terminations resulting from death.

Overall limit

- 39 The overall average period left to run calculated as described above should be limited to a maximum of six years under article 27(4) of the *Consolidated Life Directive* (or a maximum of ten years during the transitional period referred to in paragraph 5) before applying it to the estimated annual profit in order to determine the maximum value of the future profits *implicit item*.

Definition of period to run

- 40 The definition of the period to run and the basis of the allowance for early termination should clearly be considered together. For certain types of contracts (e.g. pension contracts with a range

of retirement ages or other options), there is inherent uncertainty about the likely term to run. In such circumstances any estimate for determining the amount of the future profits *implicit item* for which a *capital resources* is sought should be based on prudent assumptions tending, if anything, to underestimate the average period to run.

Zillmerising

41 The appropriate regulator does not normally expect to grant *capital resources* permitting *implicit items* due to *zillmerisation* except in very exceptional circumstances. *Zillmerisation* is an allowance for acquisition costs that are expected, under prudent assumptions, to be recoverable from future *premiums*. *firms* can make a direct adjustment to their reserves for *zillmerisation*, subject to the requirements on *mathematical reserves* set out in INSPRU 1.3.43 R, and this is the usual approach. However, where no such adjustment has been made, or where the maximum adjustment has not been made in the *mathematical reserves*, the appropriate regulator will consider an application for an *implicit item*, if the amount is consistent with the amount that would have been allowed as an adjustment to *mathematical reserves* under INSPRU 1.3.43 R.

Hidden reserves

42 The appropriate regulator will grant *waivers* permitting *implicit items* due to hidden reserves only in very exceptional circumstances. These items relate to hidden reserves resulting from the under-estimation of assets. The *rules* for the valuation of assets and liabilities (see GENPRU 1.3) which apply to assets and liabilities other than *mathematical reserves* are based on the valuation used by the *firm* for the purposes of its external accounts, with adjustments for regulatory prudence such as concentration limits for large holdings, and would not normally be expected to contain hidden reserves.

Case studies on "unduly burdensome"

43 Some examples of situations where the existing *rules* might be considered to be unduly burdensome are given below:

- A *firm* writes *with-profits business*. The *firm's* investment policy is affected by its published financial position. Application of the *rules* without an *implicit item* would result in the *firm* adopting a lower equity backing ratio. It may be possible to demonstrate that, in the circumstances, it would be unduly burdensome to require the *firm* to incur costs (which might prejudice *policyholders*) resulting from the lower equity backing ratio, rather than take allowance for an *implicit item*.
- A *firm* has purchased a block of in-force business, on which the future profits may be reasonably estimated. However, this asset is given no value under the *rules*. It may be possible to demonstrate that it is unduly burdensome for the *firm* to recognise the cost of acquiring the assets whilst giving no value to the asset acquired.
- A *firm* has a block of in-force business, on which the future profits may be reasonably estimated. Application of the *rules* without an *implicit item* would result in a need to obtain additional capital. It may be possible to demonstrate that it is unduly burdensome, having regard to the particular circumstances of the *firm*, to require it to incur the costs involved in the injection of further capital rather than take allowance for an *implicit item*.
- A *firm* has purchased matching assets for guaranteed annuity liabilities. The operation of the asset and liability valuation *rules* leads to statutory losses in certain circumstances in spite of good matching of assets and liabilities on a realistic basis of assessment. It may be possible to demonstrate that it is unduly burdensome to require the *firm* to incur the costs involved in the injection of further capital rather than take allowance for an *implicit item*.

Conditions which will typically be applied to implicit items waivers

Limits

44 Where *implicit items waivers* are granted, the value cannot exceed (and will normally be less than) the monetary limits described in paragraph 27, except that during the transitional period the pre-Solvency I limits will apply. In addition, time limits will apply and *waivers* will normally only last for 12 months.

Publicity

45

The appropriate regulator will publish the *capital resources* (see SUP 8.6 and SUP 8.7). Public disclosure is standard practice unless the appropriate regulator is satisfied that publication is inappropriate or unnecessary (see section 138A of the *Act*). Any request that a direction not be published should be made to the appropriate regulator in writing with grounds in support, as set out in SUP 8.6. Disclosure of a *capital resource* will normally be required in the *firm's annual returns*.

2

Chapter 3

Cross sector groups

3.1 Application

3.1.1

FCA PRA

R

- (1) ■ GENPRU 3.1 applies to every *firm* that is a member of a *financial conglomerate* other than:
 - (a) an *incoming EEA firm*;
 - (b) an *incoming Treaty firm*;
 - (c) a *UCITS qualifier*; and
 - (d) an *ICVC*.
- (2) ■ GENPRU 3.1 does not apply to a *firm* with respect to a *financial conglomerate* of which it is a member if the interest of the *financial conglomerate* in that *firm* is no more than a *participation*.
- (3) ■ GENPRU 3.1.25 R (Capital adequacy requirements: high level requirement), ■ GENPRU 3.1.26 R (Capital adequacy requirements: application of Method 4 from Annex I of the Financial Groups Directive), ■ GENPRU 3.1.29 R (Capital adequacy requirements: application of Methods 1, 2 or 3 from Annex I of the Financial Groups Directive) and ■ GENPRU 3.1.35 R (Risk concentration and intra group transactions: the main rule) do not apply with respect to a *third-country financial conglomerate*.

Purpose

3.1.2

FCA PRA

G

■ GENPRU 3.1 implements the *Financial Groups Directive*. However, material on the following topics is to be found elsewhere in the *Handbook* as follows:

- (1) further material on *third-country financial conglomerates* can be found in ■ GENPRU 3.2;
- (2) ■ SUP 15.9 contains notification *rules* for members of *financial conglomerates*;
- (3) material on reporting obligations can be found in ■ SUP 16.12.32 R and ■ SUP 16.12.33 R ; and
- (4) material on systems and controls in *financial conglomerates* can be found in ■ SYSC 12.

3.1.3

FCA PRA

G

Introduction: identifying a financial conglomerate

- (1) In general the process in (2) to (8) applies for identifying *financial conglomerates*.
- (2) *Competent authorities* that have authorised *regulated entities* should try to identify any *consolidation group* that is a *financial conglomerate*. If a *competent authority* is of the opinion that a *regulated entity* authorised by that *competent authority* is a member of a *consolidation group* which may be a *financial conglomerate* it should communicate its view to the other *competent authorities* concerned.
- (3) A *competent authority* may start (as described in (2)) the process of deciding whether a group is a *financial conglomerate* even if it would not be the *coordinator*.
- (4) A member of a group may also start that process by notifying one of the *competent authorities* that have authorised group members that its group may be a *financial conglomerate*, for example by notification under ■ SUP 15.9.
- (5) If a group member gives a notification in accordance with (4), that does not automatically mean that the group should be treated as a *financial conglomerate*. The process described in (6) to (9) still applies.
- (6) The *competent authority* that would be *coordinator* will take the lead in establishing whether a group is a *financial conglomerate* once the process has been started as described in (2) and (3).
- (7) The process of establishing whether a group is a *financial conglomerate* will normally involve discussions between the *financial conglomerate* and the *competent authorities* concerned.
- (8) A *financial conglomerate* should be notified by its *coordinator* that it has been identified as a *financial conglomerate* and of the appointment of the *coordinator*. The notification should be given to the *parent undertaking* at the head of the group or, in the absence of a *parent undertaking*, the *regulated entity* with the largest balance sheet total in the *most important financial sector*. That notification does not of itself make a group into a *financial conglomerate*; whether or not a group is a *financial conglomerate* is governed by the definition of *financial conglomerate* as set out in ■ GENPRU 3.1.
- (9) ■ GENPRU 3 Annex 3 G is a questionnaire (together with its explanatory notes) that the *appropriate regulator* asks groups that may be *financial conglomerates* to fill out in order to decide whether or not they are.

Introduction: The role of other competent authorities

A lead supervisor (called the *coordinator*) is appointed for each *financial conglomerate*. Article 10 of the *Financial Groups Directive* describes the criteria for deciding which *competent authority* is appointed as *coordinator*. Article 11 of the *Financial Groups Directive* sets out the tasks of the *coordinator*.

3.1.4

FCA PRA

G

3.1.5

FCA PRA

R

Definition of financial conglomerate: basic definition

A *financial conglomerate* means a *consolidation group* that is identified as a *financial conglomerate* in accordance with the decision tree in

- GENPRU 3 Annex 4 R.

3.1.6

FCA PRA

R

Definition of financial conglomerate: sub-groups

A *consolidation group* is not prevented from being a *financial conglomerate* because it is part of a wider:

- (1) *consolidation group*; or
- (2) *financial conglomerate*; or
- (3) group of persons linked in some other way.

3.1.7

FCA PRA

R

Definition of financial conglomerate: the financial sectors: general

For the purpose of the definition of *financial conglomerate*, there are two *financial sectors* as follows:

- (1) the *banking sector* and the *investment services sector*, taken together; and
- (2) the *insurance sector*.

3.1.8

FCA PRA

R

- (1) This *rule* applies for the purpose of the definition of *financial conglomerate* and the *financial conglomerate definition decision tree*.
- (2) Any *mixed financial holding company* is considered to be outside the *overall financial sector* for the purpose of the tests set out in the boxes titled Threshold Test 1, Threshold Test 2 and Threshold Test 3 in the *financial conglomerate definition decision tree*.
- (3) Determining whether the tests set out in the boxes titled Threshold Test 2 and Threshold Test 3 in the *financial conglomerate definition decision tree* are passed is based on considering the consolidated and/or aggregated activities of the members of the *consolidation group* within the *insurance sector* and the consolidated and/or aggregated activities of the members of the *consolidation group* within the *banking sector* and the *investment services sector*.

3.1.9

FCA PRA

R

Definition of financial conglomerate: adjustment of the percentages

Once a *financial conglomerate* has become a *financial conglomerate* and subject to supervision in accordance with the *Financial Groups Directive*, the figures in the *financial conglomerate definition decision tree* are altered as follows:

- (1) the figure of 40% in the box titled Threshold Test 1 is replaced by 35%;
- (2) the figure of 10% in the box titled Threshold Test 2 is replaced by 8%; and
- (3) the figure of six billion Euro in the box titled Threshold Test 3 is replaced by five billion Euro.

3.1.10

FCA PRA

R

The alteration in ■ GENPRU 3.1.9 R only applies to a *financial conglomerate* during the period that:

- (1) begins when the *financial conglomerate* would otherwise have stopped being a *financial conglomerate* because it does not meet one of the unaltered thresholds referred to in ■ GENPRU 3.1.9 R; and
- (2) covers the three years following that date.

Definition of financial conglomerate: balance sheet totals

3.1.11

FCA PRA

R

The calculations referred to in the *financial conglomerate definition decision tree* regarding the balance sheet must be made on the basis of the aggregated balance sheet total of the members of the *consolidation group*, according to their annual accounts. For the purposes of this calculation, *undertakings* in which a *participation* is held must be taken into account as regards the amount of their balance sheet total corresponding to the aggregated proportional share held by the *consolidation group*. However, where consolidated accounts are available, they must be used instead of aggregated accounts.

Definition of financial conglomerate: solvency requirement

3.1.12

FCA PRA

R

The solvency and capital adequacy requirements referred to in the *financial conglomerate definition decision tree* must be calculated in accordance with the provisions of the relevant *sectoral rules*.

Definition of financial conglomerate: discretionary changes to the definition

3.1.13

FCA PRA

G

Articles 3(3) to 3(6), Article 5(4) and Article 6(5) of the *Financial Groups Directive* allow *competent authorities*, on a case by case basis, to:

- (1) change the definition of *financial conglomerate* and the obligations applying with respect to a *financial conglomerate*;
- (2) apply the scheme in the *Financial Groups Directive* to *EEA regulated entities* in specified kinds of group structures that do not come within the definition of *financial conglomerate*; and
- (3) exclude a particular entity in the scope of capital adequacy requirements that apply with respect to a *financial conglomerate*.

Capital adequacy requirements: introduction

3.1.14

FCA PRA

G

The capital adequacy provisions of ■ GENPRU 3.1 are designed to be applied to EEA-based *financial conglomerates*.

3.1.15

FCA PRA

G

■ GENPRU 3.1.25 R is a high level capital adequacy *rule*. It applies whether or not the *appropriate regulator* is the *coordinator* of the *financial conglomerate* concerned.

3.1.16

FCA PRA

G

■ GENPRU 3.1.26 R to ■ GENPRU 3.1.31 R and ■ GENPRU 3 Annex 1 R implement the detailed capital adequacy requirements of the *Financial Groups Directive*. They only deal with a *financial conglomerate* for which the *appropriate regulator* is the *coordinator*. If another *competent authority* is *coordinator* of a *financial conglomerate*, those *rules* do not apply with respect to that *financial conglomerate* and instead that *coordinator* will be responsible for implementing those detailed requirements.

3.1.17

FCA PRA

G

Annex I of the *Financial Groups Directive* lays down four methods for calculating capital adequacy at the level of a *financial conglomerate*. Those four methods are implemented as follows:

- (1) Method 1 calculates capital adequacy using accounting consolidation. It is implemented by ■ GENPRU 3.1.29 R to ■ GENPRU 3.1.31 R and Part 1 of ■ GENPRU 3 Annex 1 R.
- (2) Method 2 calculates capital adequacy using a deduction and aggregation approach. It is implemented by ■ GENPRU 3.1.29 R to ■ GENPRU 3.1.31 R and Part 2 of ■ GENPRU 3 Annex 1 R.
- (3) Method 3 calculates capital adequacy using book values and the deduction of capital requirements. It is implemented by ■ GENPRU 3.1.29 R to ■ GENPRU 3.1.31 R and Part 3 of ■ GENPRU 3 Annex 1 R.
- (4) Method 4 consists of a combination of Methods 1, 2 and 3 from Annex I of the *Financial Groups Directive*, or a combination of two of those Methods. It is implemented by ■ GENPRU 3.1.26 R to ■ GENPRU 3.1.28 R, ■ GENPRU 3.1.30 R and Part 4 of ■ GENPRU 3 Annex 1 R.

3.1.18

FCA PRA

G

Part 4 of ■ GENPRU 3 Annex 1 R (Use of Method 4 from Annex I of the *Financial Groups Directive*) applies the *appropriate regulator's sectoral rules* with respect to the *financial conglomerate* as a whole, with some adjustments. Where Part 4 of ■ GENPRU 3 Annex 1 R applies the *appropriate regulator's sectoral rules* for:

- (1) the *insurance sector*, that involves a combination of Methods 2 and 3; and
- (2) the *banking sector* and the *investment services sector*, that involves a combination of Methods 1 and 3.

3.1.19

FCA PRA

G

Paragraph 5.7 of ■ GENPRU 3 Annex 1 R (Capital adequacy calculations for financial conglomerates) deals with a case in which there are no capital ties between entities in a *financial conglomerate*. In particular, the *appropriate regulator*, after consultation with the other *relevant competent authorities* and in accordance with Annex I of the

Financial Groups Directive, will determine which proportional share of a solvency deficit in such an entity will have to be taken into account, bearing in mind the liability to which the existing relationship gives rise.

3.1.20

FCA PRA

G

- (1) In the following cases, the *appropriate regulator* (acting as *coordinator*) may choose which of the four methods for calculating capital adequacy laid down in Annex I of the *Financial Groups Directive* should apply:
- (a) where a *financial conglomerate* is headed by a *regulated entity* that has been authorised by the *appropriate regulator*; or
 - (b) the only *relevant competent authority* for the *financial conglomerate* is the *appropriate regulator*.
- (2) ■ GENPRU 3.1.28 R automatically applies Method 4 from Annex I of the *Financial Groups Directive* in these circumstances except in the cases set out in ■ GENPRU 3.1.28 R (1)(e) and ■ GENPRU 3.1.28 R (1)(f). The process in ■ GENPRU 3.1.22 G does not apply.

3.1.21

FCA PRA

G

Where ■ GENPRU 3.1.20 G does not apply, the Annex I method to be applied is decided by the *coordinator* after consultation with the *relevant competent authorities* and the *financial conglomerate* itself.

3.1.22

FCA PRA

G

The method of calculating capital adequacy chosen in respect of a *financial conglomerate* as described in ■ GENPRU 3.1.21 G will be applied with respect to that *financial conglomerate* by varying the *Part 4A permission* of a *firm* in that *financial conglomerate* to include a *requirement*. That *requirement* will have the effect of obliging the *firm* to ensure that the *financial conglomerate* has capital resources of the type and amount needed to comply with whichever of the methods in ■ GENPRU 3 Annex 1 R is to be applied with respect to that *financial conglomerate*. The powers in the *Act* relating to *waivers* and varying a *firm's Part 4A permission* can be used to implement one of the methods from Annex I of the *Financial Groups Directive* in a way that is different from that set out in ■ GENPRU 3.1 and ■ GENPRU 3 Annex 1 R if that is necessary to reflect the consultations referred to in ■ GENPRU 3.1.21 G.

3.1.23

FCA PRA

G

If there is more than one *firm* in a *financial conglomerate* with a *Part 4A permission*, the *appropriate regulator* would not normally expect to apply the *requirement* described in ■ GENPRU 3.1.22 G to all of them. Normally it will only be necessary to apply it to one.

3.1.24

FCA PRA

G

The *appropriate regulator* expects that in all or most cases falling into ■ GENPRU 3.1.21 G, the *rules* in Part 4 of ■ GENPRU 3 Annex 1 R will be applied.

Capital adequacy requirements: high level requirement

3.1.25

FCA PRA

R

- (1) A *firm* that is a member of a *financial conglomerate* must at all times have capital resources of such an amount and type that results in the capital resources of the *financial conglomerate* taken as a whole being adequate.

- (2) This *rule* does not apply with respect to any *financial conglomerate* until notification has been made that it has been identified as a *financial conglomerate* as contemplated by Article 4(2) of the *Financial Groups Directive*.

Capital adequacy requirements: application of Method 4 from Annex I of the Financial Groups Directive

3.1.26

FCA PRA

R

If this *rule* applies under ■ GENPRU 3.1.27 R to a *firm* with respect to a *financial conglomerate* of which it is a member, the *firm* must at all times have capital resources of an amount and type:

- (1) that ensure that the *financial conglomerate* has capital resources of an amount and type that comply with the *rules* applicable with respect to that *financial conglomerate* under Part 4 of ■ GENPRU 3 Annex 1 R (as modified by that annex); and
- (2) that as a result ensure that the *firm* complies with those *rules* (as so modified) with respect to that *financial conglomerate*.

3.1.27

FCA PRA

R

■ GENPRU 3.1.26 R applies to a *firm* with respect to a *financial conglomerate* of which it is a member if one of the following conditions is satisfied:

- (1) the condition in ■ GENPRU 3.1.28 R is satisfied; or
- (2) this *rule* is applied to the *firm* with respect to that *financial conglomerate* as described in ■ GENPRU 3.1.30 R.

Capital adequacy requirements: compulsory application of Method 3 from Annex I of the Financial Groups Directive

3.1.28

FCA PRA

R

- (1) The condition in this *rule* is satisfied for the purpose of ■ GENPRU 3.1.27 R (1) with respect to a *firm* and a *financial conglomerate* of which it is a member (with the result that ■ GENPRU 3.1.26 R automatically applies to that *firm*) if:
 - (a) notification has been made in accordance with regulation 2 of the *Financial Groups Directive Regulations* that the *financial conglomerate* is a *financial conglomerate* and that the *appropriate regulator* is *coordinator* of that *financial conglomerate*;
 - (b) the *financial conglomerate* is not part of a wider UK regulated EEA *financial conglomerate*;
 - (c) the *financial conglomerate* is not a UK regulated EEA *financial conglomerate* under another *rule* or under paragraph (b) of the definition of UK regulated EEA *financial conglomerate* (application of supplementary supervision through a *firm's Part 4A permission*);

- (d) one of the following conditions is satisfied:
- (i) the *financial conglomerate* is headed by a *regulated entity* that is a *UK domestic firm*; or
 - (ii) the only *relevant competent authority* for that *financial conglomerate* is the *appropriate regulator*;
- (e) this *rule* is not disapplied under paragraph 5.7 of ■ GENPRU 3 Annex 1 R (No capital ties); and
- (f) the *financial conglomerate* meets the condition set out in the box titled Threshold Test 2 (10% average of balance sheet and solvency requirements) in the *financial conglomerate definition decision tree*.
- (2) Once ■ GENPRU 3.1.26 R applies to a *firm* with respect to a *financial conglomerate* of which it is a member under ■ GENPRU 3.1.27 R (1), (1)(f) ceases to apply with respect to that *financial conglomerate*. Therefore the fact that the *financial conglomerate* subsequently ceases to meet the condition in (1)(f) does not mean that the condition in this *rule* is not satisfied.

Capital adequacy requirements: application of Methods 1, 2 or 3 from Annex I of the Financial Groups Directive

3.1.29

FCA PRA

R

If with respect to a *firm* and a *financial conglomerate* of which it is a member, this *rule* is applied to the *firm* with respect to that *financial conglomerate* as described in ■ GENPRU 3.1.30 R, the *firm* must at all times have capital resources of an amount and type that ensures that the *conglomerate capital resources* of that *financial conglomerate* at all times equal or exceed its *conglomerate capital resources requirement*.

Capital adequacy requirements: use of Part 4A permission to apply Annex I of the Financial Groups Directive

3.1.30

FCA PRA

R

With respect to a *firm* and a *financial conglomerate* of which it is a member:

- (1) ■ GENPRU 3.1.26 R (Method 4 from Annex I of the *Financial Groups Directive*) is applied to the *firm* with respect to that *financial conglomerate* for the purposes of ■ GENPRU 3.1.27 R (2); or
- (2) ■ GENPRU 3.1.29 R (Methods 1 to 3 from Annex I of the *Financial Groups Directive*) is applied to the *firm* with respect to that *financial conglomerate*;

if the *firm's Part 4A permission* contains a *requirement* obliging the *firm* to comply with ■ GENPRU 3.1.26 R or, as the case may be, ■ GENPRU 3.1.29 R.

3.1.31

FCA PRA

R

If ■ GENPRU 3.1.29 R (Methods 1-3 from Annex I of the *Financial Groups Directive*) applies to a *firm* with respect to a *financial conglomerate* of which it is a member, the definitions of *conglomerate capital resources* and *conglomerate capital resources requirement* that apply for the purposes of that *rule* are the ones from whichever of Part 1, Part 2 or Part 3 of ■ GENPRU 3 Annex 1 R is specified in the *requirement* referred to in ■ GENPRU 3.1.30 R.

Risk concentration and intra-group transactions: introduction

3.1.32

FCA PRA

G

■ GENPRU 3.1.35 R implements Article 7(4) and Article 8(4) of the *Financial Groups Directive*, which provide that where a *financial conglomerate* is headed by a *mixed financial holding company*, the *sectoral rules* regarding *risk concentration* and *intra-group transactions* of the *most important financial sector* in the *financial conglomerate*, if any, shall apply to that sector as a whole, including the *mixed financial holding company*.

3.1.33

FCA PRA

G

Articles 7(3) (Risk concentration) and 8(3) (Intra-group transactions) and Annex II (Technical application of the provisions on intra-group transactions and risk concentration) of the *Financial Groups Directive* say that Member States may apply at the level of the *financial conglomerate* the provisions of the *sectoral rules* on *risk concentrations* and *intra-group transactions*. ■ GENPRU 3.1 does not take up that option, although the *appropriate regulator* may impose such obligations on a case by case basis.

Risk concentration and intra-group transactions: application

3.1.34

FCA PRA

R

■ GENPRU 3.1.35 R applies to a *firm* with respect to a *financial conglomerate* of which it is a member if:

- (1) the condition in Articles 7(4) and 8(4) of the *Financial Groups Directive* is satisfied (the *financial conglomerate* is headed by a *mixed financial holding company*); and
- (2) that *financial conglomerate* is a *UK regulated EEA financial conglomerate*.

Risk concentration and intra group transactions: the main rule

3.1.35

FCA PRA

R

A *firm* must ensure that the *sectoral rules* regarding *risk concentration* and *intra-group transactions* of the *most important financial sector* in the *financial conglomerate* referred to in ■ GENPRU 3.1.34 R are complied with with respect to that *financial sector* as a whole, including the *mixed financial holding company*. The *appropriate regulator's sectoral rules* for these purposes are those identified in the table in ■ GENPRU 3.1.36 R.

Risk concentration and intra-group transactions: Table of applicable sectoral rules

3.1.36

R

FCA PRA

Table: application of sectoral rules

This table belongs to ■ GENPRU 3.1.35 R

The most important financial sector	Applicable sectoral rules	
	Risk concentration	Intra-group transactions
<i>Banking and investment services sector</i>	BIPRU 8.9A (Consolidated large exposure requirements) including BIPRU TP as it applies to a UK consolidation	BIPRU 10 (Large exposures requirements) including BIPRU TP as it applies on a solo basis and relates to BIPRU 10.
<i>Insurance sector</i>	None	Rule 9.39 of IPRU(INS)
Note	Any waiver granted to a member of the <i>financial conglomerate</i> , on a solo or consolidated basis, shall not apply in respect of the <i>financial conglomerate</i> for the purposes of GENPRU 3.1.36 R.	

3.1.37

R

FCA PRA

- (1) Where the *rules* for the *banking and investment services sector* are being applied, a *mixed financial holding company* must be treated as being a *financial holding company*.
- (2) Where the *rules* for the *insurance sector* are being applied, a *mixed financial holding company* must be treated as being an *insurance holding company*.

3.1.38

R

FCA PRA

- (1) This *rule* applies for the purposes of the definitions of:
 - (a) a *core concentration risk group counterparty*; and
 - (b) a *non-core concentration risk group counterparty*;
 as they apply for the purposes of the *rules* for the *banking and investment services sector* as applied by ■ GENPRU 3.1.36 R.
- (2) For the purposes of ■ BIPRU 10.9A.4 R (1) and ■ BIPRU 10.9A.4 R (2) (as they apply to the definitions in ■ GENPRU 3.1.38R (1)), the conditions are also satisfied if the *counterparty* and the *firm* are included within the scope of consolidated supervision on a full basis with respect to the same *financial conglomerate* under ■ GENPRU 3.1 or the relevant implementation measures in another *EEA State* for the *Financial Groups Directive*.

(4) [deleted]

The financial sectors: asset management companies

3.1.39

FCA PRA

R

- (1) In accordance with Article 30 of the *Financial Groups Directive* (Asset management companies), this *rule* deals with the inclusion of an *asset management company* that is a member of a *financial conglomerate* in the scope of regulation of *financial conglomerates*. This *rule* does not apply to the definition of *financial conglomerate*.
- (2) An *asset management company* is in the *overall financial sector* and is a *regulated entity* for the purpose of:
 - (a) ■ GENPRU 3.1.26 R to ■ GENPRU 3.1.36 R;
 - (b) ■ GENPRU 3 Annex 1 R (Capital adequacy calculations for financial conglomerates) and ■ GENPRU 3 Annex 2 R (Prudential rules for third country groups); and
 - (c) any other provision of the *Handbook* relating to the supervision of *financial conglomerates*.
- (3) In the case of a *financial conglomerate* for which the *appropriate regulator* is the *coordinator*, all *asset management companies* must be allocated to one *financial sector* for the purposes in (2), being either the *investment services sector* or the *insurance sector*. But if that choice has not been made in accordance with (4) and notified to the *appropriate regulator* in accordance with (4)(d), an *asset management company* must be allocated to the *investment services sector*.
- (4) The choice in (3):
 - (a) must be made by the *undertaking* in the *financial conglomerate* holding the position referred to in Article 4(2) of the *Financial Groups Directive* (group member to whom notice must be given that the group has been found to be a *financial conglomerate*);
 - (b) applies to all *asset management companies* that are members of the *financial conglomerate* from time to time;
 - (c) cannot be changed; and
 - (d) must be notified to the *appropriate regulator* as soon as reasonably practicable after the notification in (4)(a).
- (5) This *rule* applies even if:
 - (a) a *UCITS management company* is a *BIPRU investment firm*; or

(b) *an asset management company is an investment firm.*

3.2 Third-country groups

Application

3.2.1

FCA PRA

R

■ GENPRU 3.2 applies to every *firm* that is a member of a *third-country group*. But it does not apply to:

- (1) an *incoming EEA firm*; or
- (2) an *incoming Treaty firm*; or
- (3) a *UCITS qualifier*; or
- (4) an *ICVC*.

Purpose

3.2.2

FCA PRA

G

■ GENPRU 3.2 implements in part Article 18 of the *Financial Groups Directive* and Article 143 of the *Banking Consolidation Directive*.

Equivalence

3.2.3

FCA PRA

G

The first question that must be asked about a *third-country financial group* is whether the *EEA regulated entities* in that *third-country group* are subject to supervision by a *third-country competent authority*, which is equivalent to that provided for by the *Financial Groups Directive* (in the case of a *financial conglomerate*) or the *EEA prudential sectoral legislation* for the *banking sector* or the *investment services sector* (in the case of a *banking and investment group*). Article 18(1) of the *Financial Groups Directive* sets out the process for establishing equivalence with respect to *third-country financial conglomerates* and Article 143 (1) and (2) of the *Banking Consolidation Directive* does so with respect to *third-country banking and investment groups*.

Other methods: General

3.2.4

FCA PRA

G

If the supervision of a *third-country group* by a *third-country competent authority* does not meet the equivalence test referred to in ■ GENPRU 3.2.3 G, *competent authorities* may apply other methods that ensure appropriate supervision of the *EEA regulated entities* in that *third-country group* in accordance with the aims of supplementary supervision under the *Financial Groups Directive* or consolidated supervision under the applicable *EEA prudential sectoral legislation*.

Supervision by analogy: introduction

3.2.5

FCA PRA

G

If the supervision of a *third-country group* by a *third-country competent authority* does not meet the equivalence test referred to in ■ GENPRU 3.2.3 G, a *competent authority* may, rather than take the measures described in ■ GENPRU 3.2.4 G, apply, by analogy, the provisions concerning supplementary supervision under the *Financial Groups Directive* or, as applicable, consolidated supervision under the applicable *EEA prudential sectoral legislation*, to the *EEA regulated entities* in the *banking sector*, *investment services sector* and (in the case of a *financial conglomerate*) *insurance sector*.

3.2.6

FCA PRA

G

The *appropriate regulator* believes that it will only be right to adopt the option in ■ GENPRU 3.2.5 G in response to very unusual group structures.

3.2.7

FCA PRA

G

■ GENPRU 3.2.8 R and ■ GENPRU 3.2.9 R and ■ GENPRU 3 Annex 2 R set out *rules* to deal with the situation covered in ■ GENPRU 3.2.5 G. Those *rules* do not apply automatically. Instead, they can only be applied with respect to a particular *third-country group* through the *Part 4A permission* of a *firm* in that *third-country group*. Broadly speaking the procedure described in ■ GENPRU 3.1.22 G also applies to this process.

Supervision by analogy: rules for third-country conglomerates

3.2.8

FCA PRA

R

If the *Part 4A permission* of a *firm* contains a *requirement* obliging it to comply with this *rule* with respect to a *third-country financial conglomerate* of which it is a member, it must comply, with respect to that *third-country financial conglomerate*, with the *rules* in Part 1 of ■ GENPRU 3 Annex 2 R, as adjusted by Part 3 of that annex.

Supervision by analogy: rules for third-country banking and investment groups

3.2.9

FCA PRA

R

If the *Part 4A permission* of a *firm* contains a *requirement* obliging it to comply with this *rule* with respect to a *third-country banking and investment group* of which it is a member, it must comply, with respect to that *third-country banking and investment group*, with the *rules* in Part 2 of ■ GENPRU 3 Annex 2 R, as adjusted by Part 3 of that annex.

Capital adequacy calculations for financial conglomerates (GENPRU 3.1.26R and GENPRU 3.1.29R)

FCA PRA

1 Table: PART 1: Method of Annex I of the Financial Groups Directive (Accounting Consolidation Method)

Capital resources	1.1	The <i>conglomerate capital resources</i> of a <i>financial conglomerate</i> calculated in accordance with this Part are the capital of that <i>financial conglomerate</i> , calculated on an accounting consolidation basis, that qualifies under paragraph 1.2.
	1.2	The elements of capital that qualify for the purposes of paragraph 1.1 are those that qualify in accordance with the <i>applicable sectoral rules</i> , in accordance with the following: <ol style="list-style-type: none"> (1) the <i>conglomerate capital resources requirement</i> is divided up in accordance with the contribution of each <i>financial sector</i> to it; and (2) the portion of the <i>conglomerate capital resources requirement</i> attributable to a particular <i>financial sector</i> must be met by capital resources that are eligible in accordance with the <i>applicable sectoral rules</i> for that <i>financial sector</i>.
	1.3	The <i>conglomerate capital resources requirement</i> of a <i>financial conglomerate</i> calculated in accordance with this Part is equal to the sum of the capital adequacy and solvency requirements for each <i>financial sector</i> calculated in accordance with the <i>applicable sectoral rules</i> for that <i>financial sector</i> .
Consolidation	1.4	The information required for the purpose of establishing whether or not a <i>firm</i> is complying with GENPRU 3.1.29 R (insofar as the definitions in this Part are applied for the purpose of that <i>rule</i>) must be based on the consolidated accounts of the <i>financial conglomerate</i> , together with such other sources of information as appropriate.
	1.5	The <i>applicable sectoral rules</i> that are applied under this Part are the <i>applicable sectoral consolidation rules</i> . Other <i>applicable sectoral rules</i> must be applied if required.
Capital resources re-quirement	1.3	The <i>conglomerate capital resources requirement</i> of a <i>financial conglomerate</i> calculated in accordance with this Part is equal to the sum of the capital adequacy and solvency requirements for each <i>financial sector</i> calculated in accordance with the <i>applicable sectoral rules</i> for that <i>financial sector</i> .

PAGE 1

2 Table: PART 2: Method 2 of Annex I of the Financial Groups Directive (Deduction and aggregation Method)

Capital resources	2.1	The <i>conglomerate capital resources</i> of a <i>financial conglomerate</i> calculated in accordance with this Part are equal to the sum
-------------------	-----	---

		of the following amounts (so far as they qualify under paragraph 2.3) for each member of the <i>overall financial sector</i> :
		(1) (for the <i>person</i> at the head of the <i>financial conglomerate</i>) its <i>solo capital resources</i> ;
		(2) (for any other member):
		(a) its <i>solo capital resources</i> ; less
		(b) the book value of the <i>financial conglomerate's</i> investment in that member, to the extent not already deducted in the calculation of the <i>solo capital resources</i> for:
		(i) the <i>person</i> at the head of the <i>financial conglomerate</i> ; or
		(ii) any other member.
	2.2	The deduction in paragraph 2.1(2) must be carried out separately for each type of capital represented by the <i>financial conglomerate's</i> investment in the member concerned.
	2.3	The elements of capital that qualify for the purposes of paragraph 2.1 are those that qualify in accordance with the <i>applicable sectoral rules</i> . In particular, the portion of the <i>conglomerate capital resources requirement</i> attributable to a particular member of a <i>financial sector</i> must be met by capital resources that would be eligible under the <i>sectoral rules</i> that apply to the calculation of its <i>solo capital resources</i> .
Capital resources requirement	2.4	The <i>conglomerate capital resources requirement</i> of a <i>financial conglomerate</i> calculated in accordance with this Part is equal to the sum of the <i>solo capital resources requirement</i> for each member of the <i>financial conglomerate</i> that is in the <i>overall financial sector</i> .
Partial inclusion	2.5	The capital resources and capital resources requirements of a member of the <i>financial conglomerate</i> in the <i>overall financial sector</i> must be included proportionally. If however the member is a <i>subsidiary undertaking</i> and it has a <i>solvency deficit</i> , they must be included in full.
Accounts	2.6	The information required for the purpose of establishing whether or not a <i>firm</i> is complying with GENPRU 3.1.29 R (insofar as the definitions in this Part are applied for the purpose of that <i>rule</i>) must be based on the individual accounts of members of the <i>financial conglomerate</i> , together with such other sources of information as appropriate.

3. Table: PART 3: Method 3 of Annex I of the Financial Groups Directive(Book value/Requirement Method)

Capital resources	3.1	The <i>conglomerate capital resources</i> of a <i>financial conglomerate</i> calculated in accordance with this Part are equal to the capital resources of the <i>person</i> at the head of the <i>financial conglomerate</i> that qualify under paragraph 3.2.
-------------------	-----	---

	3.2	The elements of capital that qualify for the purposes of paragraph 3.1 are those that qualify in accordance with the <i>applicable sectoral rules</i> . In particular, the portion of the <i>conglomerate capital resources requirement</i> attributable to a particular member of a <i>financial sector</i> must be met by capital resources that would be eligible under the <i>sectoral rules</i> that apply to the calculation of its <i>solo capital resources</i> .
Capital resources requirement	3.3	The <i>conglomerate capital resources requirement</i> of a <i>financial conglomerate</i> calculated in accordance with this Part is equal to the sum of the following amounts for each member of the <i>overall financial sector</i> : (1) (in the case of the <i>person</i> at the head of the <i>financial conglomerate</i>) its <i>solo capital resources requirement</i> ; (2) (in the case of any other member) the higher of the following two amounts: (a) its <i>solo capital resources requirement</i> ; and (b) the book value of the interest of the <i>person</i> at the head of the <i>financial conglomerate</i> in that member.
	3.4	A <i>participation</i> may be valued using the equity method of accounting.
Partial inclusion	3.5	The capital resources requirement of a member of the <i>financial conglomerate</i> in the <i>overall financial sector</i> must be included proportionally. If however the member has a <i>solvency deficit</i> and is a <i>subsidiary undertaking</i> , it must be included in full.
Accounts	3.6	The information required for the purpose of establishing whether or not a <i>firm</i> is complying with GENPRU 3.1.29 R (insofar as the definitions in this Part are applied for the purpose of that <i>rule</i>) must be based on the individual accounts of members of the <i>financial conglomerate</i> , together with such other sources of information as appropriate.

4 Table: PART 4: Method 4 of Annex I of the Financial Groups Directive(Combination of Methods 1, 2 and 3)

Applicable sectoral rules	4.1	The <i>rules</i> that apply with respect to a particular <i>financial conglomerate</i> under GENPRU 3.1.26 R are those relating to capital adequacy and solvency set out in the table in paragraph 4.2.
---------------------------	-----	---

5 Table: Paragraph 4.2: Application of sectoral consolidation rules

Type of financial conglomerate	Applicable sectoral consolidation rules
<i>Banking and investment services conglomerate</i>	BIPRU 8 and <i>BIPRU TP</i> , subject to paragraph 4.5.
<i>Insurance conglomerate</i>	INSPRU 6.1 amended in accordance with Part 5.

6 Table

Types of financial conglomerate	4.3	<p>(1) This paragraph sets out how to determine the category of <i>financial conglomerate</i> for the purposes of paragraphs 4.1 and 4.2.</p> <p>(2) If there is an <i>EEA regulated entity</i> at the head of the <i>financial conglomerate</i>, then:</p> <p>(a) if that entity is in the <i>banking sector</i> or the <i>investment services sector</i>, the <i>financial conglomerate</i> is a <i>banking and investment services conglomerate</i>; or</p> <p>(b) if that entity is in the <i>insurance sector</i>, the <i>financial conglomerate</i> is an <i>insurance conglomerate</i>.</p> <p>(3) If (2) does not apply and the <i>most important financial sector</i> is the <i>banking and investment services sector</i>, it is a <i>banking and investment services conglomerate</i>.</p> <p>(4) If (2) and (3) does not apply, it is an <i>insurance conglomerate</i>.</p>

7 Table

A mixed financial holding company	4.4	<p>A <i>mixed financial holding company</i> must be treated in the same way as:</p> <p>(1) a <i>financial holding company</i> (if the rules in BIPRU 8) are applied; or</p> <p>(2) an <i>insurance holding company</i> (if the rules in INSPRU 6.1 are applied).</p>
-----------------------------------	-----	---

8 Table: PART 5: Principles applicable to all methods

Transfer-ability of capital	5.1	<p>Capital may not be included in:</p> <p>(1) a <i>firm's conglomerate capital resources</i> under GENPRU 3.1.29 R; or</p> <p>(2) in the capital resources of the <i>financial conglomerate</i> for the purposes of GENPRU 3.1.26 R;</p> <p>if the effectiveness of the transferability and availability of the capital across the different members of the <i>financial conglomerate</i> is insufficient, given the objectives (as referred to in the third unnumbered sub-paragraph of paragraph</p>
-----------------------------	-----	--

Double counting

5.2

2(ii) of Annex I of the *Financial Groups Directive* (Technical principles)) of the capital adequacy rules for *financial conglomerates*.

Capital must not be included in:

- (1) a *firm's conglomerate capital resources* under GENPRU 3.1.29 R; or
- (2) the capital resources of the *financial conglomerate* for the purposes of GENPRU 3.1.26 R;

if:

- (3) it would involve double counting or multiple use of the same capital; or
- (4) it results from any inappropriate intra-group creation of capital.

Cross sectoral capital

5.3

In accordance with the second sub-paragraph of paragraph 2(ii) of Section I of Annex I of the *Financial Groups Directive* (Other technical principles and insofar as not already required in Parts 1-3):

- (1) the solvency requirements for each different *financial sector* represented in a *financial conglomerate* required by GENPRU 3.1.26 R or, as the case may be, GENPRU 3.1.29 R must be covered by own funds elements in accordance with the corresponding *applicable sectoral rules*; and
- (2) if there is a deficit of own funds at the *financial conglomerate* level, only cross sectoral capital (as referred to in that sub-paragraph) shall qualify for verification of compliance with the additional solvency requirement required by GENPRU 3.1.26 R or, as the case may be, GENPRU 3.1.29 R.

Application of sectoral rules: General

5.4

The following adjustments apply to the *applicable sectoral rules* as they are applied by the *rules* in this annex.

- (1) The scope of those *rules* will be extended to cover any *mixed financial holding company* and each other member of the *overall financial sector*.
- (2) If any of those *rules* would otherwise not apply to a situation in which they are applied by GENPRU 3 Annex 1 R, those *rules* nevertheless still apply (and in particular, any of those *rules* that would otherwise have the effect of disapplying consolidated supervision (or, in the case of the *insurance sector*, supplementary supervision) do not apply).
- (3) (If it would not otherwise have been included) an *ancillary insurance services undertaking* is included in the *insurance sector*.
- (4) The scope of those *rules* is amended so as to remove restrictions relating to where members of the *financial conglomerate*

Application of sectoral 5.5 rules: Insurance sector

erate are incorporated or have their head office, so that the scope covers every member of the *financial conglomerate* that would have been included in the scope of those *rules* if those members had their head offices in an *EEA State*.

(5) (For the purposes of Parts 1 to 3) those *rules* must be adjusted, if necessary, when calculating the capital resources, capital resources requirements or solvency requirements for a particular *financial sector* to exclude those for a member of another *financial sector*.

(6) Any *waiver* granted to a member of the *financial conglomerate* under those *rules* does not apply for the purposes of this annex.

(1) This *rule* applies an adjustment to the *applicable sectoral rules* for the *insurance sector* as they are applied by the *rules* in this annex.

(2) To the extent that:

- (a) those *rules* merely require a report on whether or not a specified level of solvency is met (a soft limit); or
- (b) the requirements in those *rules* concern having certain net assets of an amount at or above certain levels;

those requirements are restated so as to include an obligation at all times actually to have capital at or above that level (a hard limit), thereby turning a soft limit into a hard limit and turning a limit drafted by reference to assets and liabilities into a requirement that the level of capital be maintained at or above a specified level. If those *rules* apply both a hard and a soft limit, and the level of the soft limit is higher, that soft limit is applied under this annex, but translated into a hard limit in accordance with the earlier provisions of this *rule*.

Application of sectoral 5.6 rules: Banking sector and investment services sector

The following adjustments apply to the *applicable sectoral rules* for the *banking sector* and the *investment services sector* as they are applied by the *rules* in this annex.

(1) References in those *rules* to *non-EEA sub-groups* do not apply.

(2) (For the purposes of Parts 1 to 3), where those *rules* require a group to be treated as if it were a single *undertaking*, those *rules* apply to the *banking sector* and *investment services sector* taken together.

(3) Any *investment firm consolidation waivers* granted to members of the *financial conglomerate* do not apply.

(4) (For the purposes of Parts 1 to 4), without prejudice to the application of requirements in **BIPRU 8** preventing the use of an *advanced prudential calculation approach* on a consolidated basis, any *advanced prudential calculation ap-*

No capital ties

5.7

proach permission that applies for the purpose of BIPRU 8 does not apply.

(5) (For the purposes of Parts 1 to 4), BIPRU 8.5.9 R and BIPRU 8.5.10 R do not apply.

(6) (For the purposes of Parts 1 to 4), where the *financial conglomerate* does not include a *credit institution*, the method in GENPRU 2 Annex 4 R must be used for calculating the capital resources and BIPRU 8.6.8 R does not apply.

(1) This *rule* deals with a *financial conglomerate* in which some of the members are not linked by capital ties at the time of the notification referred to in GENPRU 3.1.28 R (1) (Capital adequacy requirements: Compulsory application of Method 4 from Annex I of the Financial Groups Directive).

(2) If:

(a) GENPRU 3.1.26 R (Capital adequacy requirements: Application of Method 4 from Annex I of the Financial Groups Directive) would otherwise apply with respect to a *financial conglomerate* under GENPRU 3.1.28 R; and

(b) all members of that *financial conglomerate* are linked directly or indirectly with each other by capital ties except for members that collectively are of negligible interest with respect to the objectives of supplementary supervision of *regulated entities in a financial conglomerate* (the "peripheral members");

GENPRU 3.1.28 R continues to apply. Otherwise GENPRU 3.1.28 R does not apply with respect to a *financial conglomerate* falling into (1).

(3) If GENPRU 3.1.28 R applies with respect to a *financial conglomerate* in accordance with (2) the peripheral members must be excluded from the calculations under GENPRU 3.1.26 R.

(4) If:

(a) GENPRU 3.1.26 R applies with respect to *financial conglomerate* falling into (1) under GENPRU 3.1.27 R (2) (Use of Part 4A permission to apply Annex I of the Financial Groups Directive); or

(b) GENPRU 3.1.29 R (Capital adequacy requirements: Application of Methods 1, 2 or 3 from Annex I of the Financial Groups Directive) applies with respect to a *financial conglomerate* falling into (1);

then:

(c) the treatment of the links in (1) (including the treatment of any *solvency deficit*) is as provided for in the *requirement* referred to in GENPRU 3.1.30 R; and

(d) GENPRU 3.1.26 R or GENPRU 3.1.29 R, as the case may be, apply even if the *applicable sectoral rules* do not deal with how *undertakings* not linked by capital ties are to be dealt with for the purposes of consolidated supervision (or, in the case of the *insurance sector*, supplementary supervision).

(5) Once GENPRU 3.1.26 R applies to a *firm* with respect to a *financial conglomerate* of which it is a member under GENPRU 3.1.27 R (1) (automatic application of Method 4 from Annex I of the *Financial Groups Directive* on satisfaction of the condition in GENPRU 3.1.28 R), the disapplication of GENPRU 3.1.28 R under (2) ceases to apply with respect to that *financial conglomerate*.

9 Table: PART 6: Definitions used in this Annex

Defining the financial 6.1
sectors

For the purposes of Parts 1 to 3 of this annex (but, not for the purposes of the definition of *most important financial sector*):

(1) an *asset management company* is allocated in accordance with GENPRU 3.1.39 R; and

(2) a *mixed financial holding company* must be treated as being a member of the *most important financial sector*.

Solo capital resources 6.2
requirement: Banking
sector and investment
service sector

(1) The *solo capital resources requirement* of an *undertaking* in the *banking sector* or the *investment services sector* must be calculated in accordance with this *rule*, subject to paragraphs 6.5 and 6.6.

(2) The *solo capital resources requirement* of a *building society* is its *CRR*.

(3) The *solo capital resources requirement* of an *electronic money institution* is the capital resources requirement that applies to it under the *Electronic Money Regulations*.

(4) If there is a *credit institution* in the *financial conglomerate*, the *solo capital resources requirement* for any *undertaking* in the *banking sector* or the *investment services sector* is, subject to (2) and (3), calculated in accordance with the *rules* for calculating the *CRR* of a *bank* that is a *BIPRU firm*.

(5) If:

(a) the *financial conglomerate* does not include a *credit institution*;

(b) there is at least one *CAD investment firm* in the *financial conglomerate*; and

(c) all the *CAD investment firms* in the *financial conglomerate* are *limited licence firms* or *limited activity firms*;

the *solo capital resources requirement* for any *undertaking* in the *banking sector* or the *investment services sector* is cal-

		<p>culated in accordance with the <i>rules</i> for calculating the <i>CRR</i> of:</p> <p>(d) (if there is a <i>limited activity firm</i> in the <i>financial conglomerate</i>), a <i>BIPRU limited activity firm</i>; or</p> <p>(e) (in any other case), a <i>BIPRU limited licence firm</i>.</p> <p>(6) If:</p> <p>(a) the <i>financial conglomerate</i> does not include a <i>credit institution</i>; and</p> <p>(b) (5) does not apply;</p> <p>the <i>solo capital resources requirement</i> for any <i>undertaking</i> in the <i>banking sector</i> or the <i>investment services sector</i> is calculated in accordance with the <i>rules</i> for calculating the <i>CRR</i> of a <i>full scope BIPRU investment firm</i>.</p> <p>(7) Any <i>CRR</i> calculated under a <i>BIPRU TP</i> may be used for the purposes of the <i>solo capital resources requirement</i> in this <i>rule</i> in the same way that the <i>CRR</i> can be used under BIPRU 8.</p>
Solo capital resources requirement: application of rules	6.3	Any exemption that would otherwise apply under any <i>rules</i> applied by paragraph 6.2 do not apply for the purposes of this Annex.
Solo capital resources requirement: Insurance sector	6.4	<p>(1) The <i>solo capital resources requirement</i> of an <i>undertaking</i> in the <i>insurance sector</i> must be calculated in accordance with this <i>rule</i>.</p> <p>(2) Subject to (3), the <i>solo capital resources requirement</i> of an <i>undertaking</i> in the <i>insurance sector</i> is the capital resources requirement identified in INSPRU 6.1.34 R (1) to (8) as applying to that <i>undertaking</i>.</p> <p>(3) INSPRU 6.1.34 R (1)(b) does not apply for the purposes of this annex.</p>
Solo capital resources requirement: EEA firms in the banking sector or investment services sector	6.5	<p>The <i>solo capital resources requirement</i> for an <i>EEA regulated entity</i> (other than a <i>BIPRU firm</i>, an <i>insurer</i> or an <i>EEA insurer</i>) that is subject to the <i>solo capital adequacy sectoral rules</i> for its <i>financial sector</i> of the <i>competent authority</i> that authorised it is equal to the amount of capital it is obliged to hold under those <i>sectoral rules</i> provided that the following conditions are satisfied:</p> <p>(1) (for the purposes of the <i>banking sector</i> and the <i>investment services sector</i>) those <i>sectoral rules</i> must correspond to the <i>appropriate regulator's sectoral rules</i> identified in paragraph 6.2 as applying to that <i>financial sector</i>;</p> <p>(2) the entity must be subject to those <i>sectoral rules</i> in (1); and</p> <p>(3) paragraph 6.3 applies to the entity and those <i>sectoral rules</i>.</p>

<p>Solo capital resources requirement: non-EEA firms subject to equivalent regimes in the banking sector or investment services sector 6.6</p>	<p>The <i>solo capital resources requirement</i> for a <i>recognised third country credit institution</i> or a <i>recognised third country investment firm</i> is the amount of capital resources that it is obliged to hold under the <i>sectoral rules</i> for its <i>financial sector</i> that apply to it in the state or territory in which it has its head office provided that:</p> <p>(1) there is no reason for the <i>firm</i> applying the <i>rules</i> in this annex to believe that the use of those <i>sectoral rules</i> would produce a lower figure than would be produced under paragraph 6.2; and</p> <p>(2) paragraph 6.3 applies to the entity and those <i>sectoral rules</i>.</p>
<p>Solo capital resources requirement: mixed financial holding company 6.7</p>	<p>The <i>solo capital resources requirement</i> of a <i>mixed financial holding company</i> is a notional capital requirement. It is the capital adequacy requirement that applies to <i>regulated entities</i> in the <i>most important financial sector</i> under the table in paragraph 6.10.</p>

10 Table

<p>Solo capital resources requirement: the insurance sector 6.8</p>	<p>References to capital requirements in the provisions of GENPRU 3 Annex 1 R defining <i>solo capital resources requirement</i> must be interpreted in accordance with paragraph 5.4.</p>
<p>Applicable sectoral consolidation rules 6.9</p>	<p>The <i>applicable sectoral consolidation rules</i> for a <i>financial sector</i> are the <i>appropriate regulator's sectoral rules</i> about capital adequacy and solvency on a consolidated basis that are applied in the table in paragraph 6.10.</p>

11 Table: Paragraph 6.10: Application of sectoral consolidation rules

Financial sector	Appropriate regulator's sectoral rules
<i>Banking sector</i>	BIPRU 8 and <i>BIPRU TP</i> , as adjusted under paragraph 4.5
<i>Insurance sector</i>	INSPRU 6.1 .
<i>Investment services sector</i>	BIPRU 8 and <i>BIPRU TP</i>

Prudential rules for third country groups (GENPRU 3.2.8R to GENPRU 3.2.9R)

FCA **PRA**

1 Table: PART 1: Third-country financial conglomerates

- 1.1 This Part of this annex sets out the *rules* with which a *firm* must comply under GENPRU 3.2.8 R with respect to a *financial conglomerate* of which it is a member.
- 1.2 A *firm* must comply, with respect to the *financial conglomerate* referred to in paragraph 1.1, with whichever of GENPRU 3.1.26 R and GENPRU 3.1.29 R is applied under paragraph 1.3.
- 1.3 For the purposes of paragraph 1.2:
- (1) the *rule* in GENPRU 3.1 that applies as referred to in paragraph 1.2 is the one that is specified by the *requirement* referred to in GENPRU 3.2.8 R;
 - (2) (where GENPRU 3.1.29 R is applied) the definitions of *conglomerate capital resources* and *conglomerate capital resources requirement* that apply for the purposes of that *rule* are the ones from whichever of Part 1, Part 2 or Part 3 of GENPRU 3 Annex 1 R is specified in that *requirement*; and
 - (3) the *rules* so applied (including those in GENPRU 3 Annex 1 R) are adjusted in accordance with paragraph 3.1.
- 1.4 If the condition in Articles 7(4) and 8(4) of the *Financial Groups Directive* is satisfied (the *financial conglomerate* is headed by a *mixed financial holding company*) with respect to the *financial conglomerate* referred to in paragraph 1.1 the *firm* must also comply with GENPRU 3.1.35 R (as adjusted in accordance with paragraph 3.1) with respect to that *financial conglomerate*.
- 1.5 A *firm* must comply with the following with respect to the *financial conglomerate* referred to in paragraph 1.1:
- (1) SYSC 12 (as it applies to *financial conglomerates* and as adjusted under paragraph 3.1); and
 - (2) GENPRU 3.1.25 R.

2 Table: PART 2: Third-country banking and investment groups

- 2.1 This Part of this annex sets out the *rules* with which a *firm* must comply under GENPRU 3.2.9 R with respect to a *third-country banking and investment group* of which it is a member.
- 2.2 A *firm* must comply with one of the sets of *rules* specified in paragraph 2.3 as adjusted under paragraph 3.1 with

	respect to the <i>third-country banking and investment group</i> referred to in paragraph 2.1.
2.3	The <i>rules</i> referred to in paragraph 2.2 are as follows:
	(1) the <i>applicable sectoral consolidation rules</i> in BIPRU 8; or
	(2) the <i>rules</i> in ELM 7.
2.4	The set of <i>rules</i> from paragraph 2.3 that apply with respect to a particular <i>third-country banking and investment group</i> (as referred to in paragraph 2.1) are those that would apply if they were adjusted in accordance with paragraph 3.1.
2.5	The <i>sectoral rules</i> applied by Part 2 of this annex cover all prudential <i>rules</i> applying on a consolidated basis including those relating to large exposures.
2.6	A <i>firm</i> must comply with SYSC 12 (as it applies to <i>banking and investment groups</i> and as adjusted under paragraph 3.1) with respect to the <i>third-country banking and investment group</i> referred to in paragraph 2.1.

3 Table: PART 3: Adjustment of scope

3.1	The adjustments that must be carried out under this paragraph are that the scope of the <i>rules</i> referred in Part 1 or Part 2 of this annex, as the case may be, are amended:
	(1) so as to remove any provisions disapplying those <i>rules</i> for <i>third-country groups</i> ;
	(2) so as to remove all limitations relating to where a member of the <i>third-country group</i> is incorporated or has its head office; and
	(3) so that the scope covers every member of the <i>third-country group</i> that would have been included in the scope of those <i>rules</i> if those members had their head offices in, and were incorporated in, an <i>EEA State</i> .

Guidance Notes for Classification of Groups

FCA **PRA**

This annex consists only of one or more forms. Forms are to be found through the following address:

Classification of Groups (GENPRU 3.1.3 G) - FSA/docs/genpru/genpru_ch3_annex3G.pdf

Purpose and scope

The form is designed to identify groups and sub-groups that are likely to be financial conglomerates under the Financial Groups Directive. A group may be a financial conglomerate if it contains both insurance and banking/investment businesses and meets certain threshold tests. The *appropriate regulator* needs to identify conglomerates with their head offices in the EEA and those with their head offices outside the EEA, although this does not necessarily mean that the latter will be subject to EEA conglomerate supervision.

This form's purpose is to enable the *appropriate regulator* to obtain sufficient information so as to be able to determine how likely a group/sub-group is to be a financial conglomerate. In certain cases this can only be determined after consultation with the other EU relevant competent authorities. A second purpose of the form is therefore to identify any groups and sub-groups that may need such consultation so that this can be made as soon as possible. This should allow firms time to prepare to comply.

The third purpose of the form is to gain information from firms on the most efficient way to implement the threshold calculations in detail (consistently with the directive). We have, therefore, asked for some additional information in part 4 of the form.

A copy of this form will can be found on the *appropriate regulator's* Financial Groups Website with current contact details.

Please include workings showing the method employed to determine the percentages in part 2 (for the threshold conditions) and giving details of all important assumptions / approximations made in doing the calculations.

The definition of financial conglomerate includes not only conventional groups made up of parent-subsidiary relationships but groups linked by control and "consolidation Article 12(1) relationships". If this is the case for your group, please submit along with this form a statement that this is the case. Please include in that statement an explanation of how you have included group members not linked by capital ties in the questionnaire calculations.

A consolidation Article 12(1) relationship arises between undertakings in the circumstances set out in Article 12(1) of the Seventh Company Law Directive. These are set out in the Handbook Glossary (in the definition of consolidation Article 12(1) relationship). Broadly speaking, undertakings come within this definition if they do not form a conventional group but:

- (a) are managed on a unified basis; or
- (b) have common management.

PAGE
1

General guidance

We would like this to be completed based on the most senior parent in the group, and, if applicable, for the company heading the most senior conglomerate group in the EEA. If appropriate, please also attach a list of all other likely conglomerate sub-groups.

Please use the most recent accounts for the top level company in the group together with the corresponding accounts for all subsidiaries and participations that are included in the consolidated accounts. Please indicate the names of any significant subsidiaries with a different year-end from the group's year-end.

Please note the following:

- (a) Branches should be included as part of the parent entity.
- (b) Include in the calculations overseas entities owned by the relevant group or sub-group.
- (c) There are only two sectors for this purpose: banking/investment and insurance.
- (d) You will need to assign non-regulated financial entities to one of these sectors:
 - **banking/investment** activities are listed in - Annex 1 to the Banking Consolidation Directive
 - **insurance** activities are listed in - IPRU Insurers Annex 11.1 and 11.2 p 163-168.
 - Any **operator of a UCITS scheme, insurance intermediary, mortgage broker and mixed financial holding company** does not fall into the directive definitions of either financial sector or insurance sector and should be treated for these purposes as being outside the financial sector. They should therefore be ignored for the purposes of these calculations.

Threshold tests

For the purpose of completing section 2 of the form relating to the threshold tests, the following guidance should be used. However, if you consider that for your group there is a more appropriate calculation then you may use this calculation so long as the method of computation is submitted with the form.

Calculating balance sheet totals

Generally, use total (gross) assets for the balance sheet total of a group/entity. However, investments in other entities that are part of the group will need to be deducted from the sector that has made the investment and the balance sheet total of the entity is added to the sector in which it operates.

Our expectation of how this may be achieved efficiently is as follows:

- (i) Off-balance-sheet items should be excluded.
- (ii) Where off-balance sheet treatment of **funds under management** and on-balance sheet treatment of **policy holders' funds** may distort the threshold calculation, groups should consult the appropriate regulator on the appropriateness of using other measures under article 3.5 of the Financial Groups Directive.
- (iii) If consolidated accounts exist for a sub-group consisting of financial entities from only one of the two sectors, these consolidated accounts should be used to measure the balance-sheet total of the sub-group (i.e. total assets less investments in entities in the other sector). If consolidated accounts do not exist, intra-group balances should be netted out when calculating the balance sheet total of a single sector (but cross-sector intra-group balances should not be netted out).
- (iv) Where consolidated accounts are used, minority interests should be excluded and goodwill should be included.
- (v) Where accounting standards differ between entities, groups should consult the *appropriate regulator* if they believe this is likely materially to affect the threshold calculation.
- (vi) Where there is a subsidiary or participation in the opposite sector from its parent (i.e. insurance sector for a banking/investment firm parent and vice versa), the balance sheet amount of the subsidiary or participation should be allocated to its sector using its individual accounts.
- (vii) The balance-sheet total of the parent entity/sub-group is measured as total assets of the parent/sub-group less the book value of its subsidiaries or participations in the other sector (i.e. the value of the subsidiary or participation in the parent's consolidated accounts is deducted from the parent's consolidated assets).

(viii) The cross-sector subsidiaries or participations referred to above, valued according to their own accounts, are allocated pro-rata, according to the aggregated share owned by the parent/sub-group, to their own sector.

(ix) If the cross-sector entities above themselves own group entities in the first sector (i.e. that of the top parent/sub-group) these should (in accordance with the methods above) be excluded from the second sector and added to the first sector using individual accounts.

Solvency (capital adequacy) requirements

Generally, the solvency requirements should be according to sectoral rules of the *appropriate regulator* that would apply to the type of entity. However, you can use EEA rules or local rules in the circumstances set out in Part 6 of **■ GENPRU 3 Annex 1 R**. But if this choice makes a significant difference, either with respect to whether the group is a financial conglomerate or with respect to which sector is the biggest, you should consult with the *appropriate regulator*. Non-regulated financial entities should have proxy requirements calculated on the basis of the most appropriate sector. If sub-groups submit single sector consolidated returns then the solvency requirement may be taken from those returns.

Our expectation of how this may be achieved efficiently is as follows:

- (i) If you complete a solvency return for a sub-group consisting of financial entities from only one of the two sectors, the total solvency requirement for the sub-group should be used.
- (ii) Solvency requirements taken must include any deductions from available capital so as to allow the appropriate aggregation of requirements.
- (iii) Where there is a regulated subsidiary or participation in the opposite sector from its parent/sub-group, the solvency requirement of the subsidiary or participation should be from its individual regulatory return. If there is an identifiable contribution to the parent's solvency requirement in respect of the cross-sector subsidiary or participation, the parent's solvency requirement may be adjusted to exclude this.
- (iv) Where there is an unregulated financial undertaking in the opposite sector from its parent/sub-group, the solvency requirement of the subsidiary or participation should be one of the following:
 - (a) as if the entity were regulated by the *appropriate regulator* under the appropriate sectoral rules;
 - (b) using EU minimum requirements for the appropriate sector; or
 - (c) using non-EU local requirements* for the appropriate sector.

Please note on the form which of these options you have used, according to the country and sector, and whether this is the same treatment as in your latest overall group solvency calculation.

- (v) For banking/investment requirements, use the total amount of capital required.
- (vi) For insurance requirements, use the total amount of capital required.

Market share measures

These are not defined by the directive. The aim is to identify any standard industry approaches to measuring market share in individual EU countries by sector, or any data sources which are commonly used as a proxy.

Article I.

Article II. Threshold tests

Test F2

B/S of banking/investment + insurance sector = result %

B/S total

Test F3/F4/F5

B/S of insurance sector

B/S of banking/investment sector + insurance sector = A%

B/S of banking/investment sector

B/S of banking/investment sector + insurance sector = B%

Solvency requirement of insurance sector

Solvency requirement of banking/investment sector +insurance sector = C%

Solvency requirement of banking/investment sector

Solvency requirement of banking/investment sector +insurance sector = D%

The relevant percentage for the insurance sector is:

$$(A\% + C\%)/2 = I\%$$

The relevant percentage for the banking/investment sector is:

$$(B\% + D\%)/2 = BI\%$$

The smallest sector is the sector with the smallest relevant percentage.

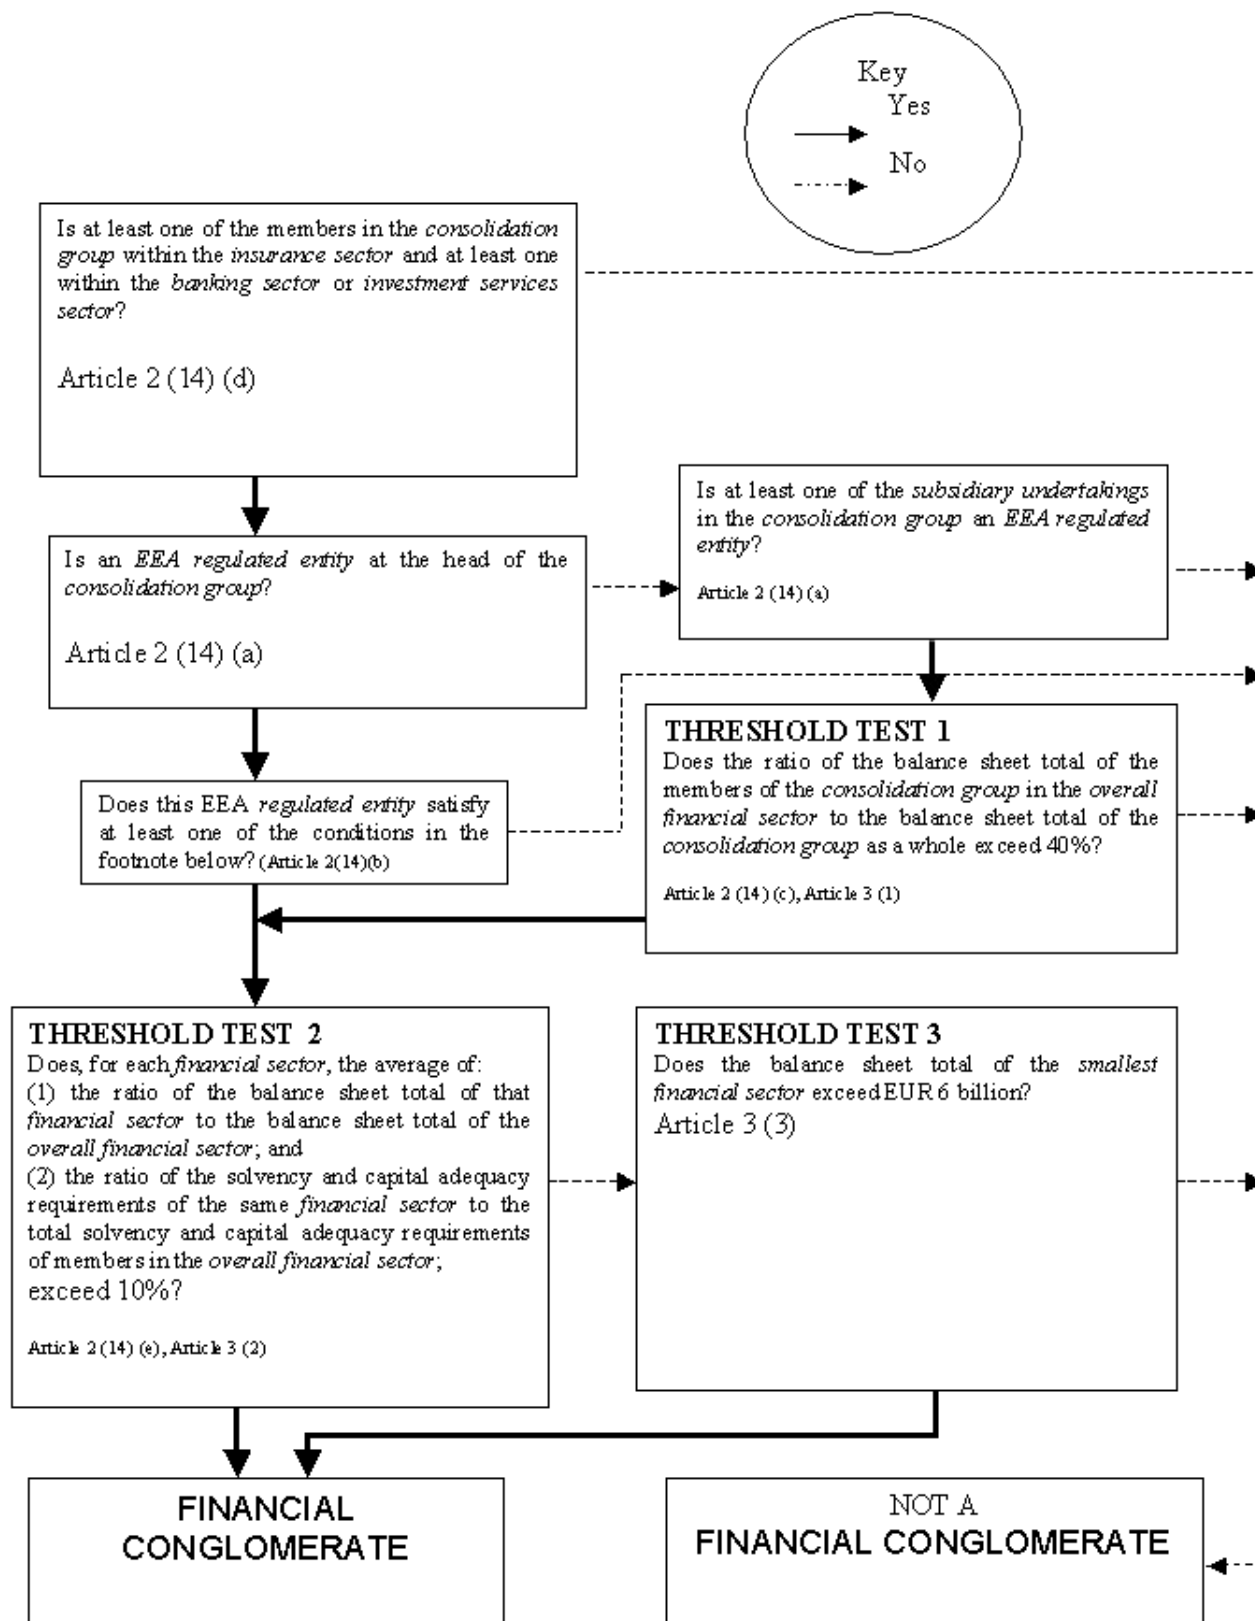

Article III. If $I\% < BI\%$ then F3 is insurance, F4 = A%, and F5 = C%

Article IV. If $BI\% < I\%$ then F3 is banking/investment, F4 = B% and F5 = D%

(see GENPRU 3.1.5R)

GENPRU TP 4 Capital instruments

PRA

	Duration	
4.1	R	GENPRU TP 4 applies until the relevant <i>rule</i> is revoked
	Application	
4.2	R	Subject to GENPRU TP 4.4R, GENPRU TP 4 applies to a <i>firm</i> which immediately before 31 December 2004 had the benefit of a <i>waiver</i> in relation to IPRU (INS) rule 2.10 or 5.2, or a written concession in relation to a pre-commencement provision listed in GENPRU TP 4.7R, in either case allowing the <i>firm</i> to exclude from the calculation of its liabilities obligations under a particular capital instrument issued by the <i>firm</i> .
	Waivers	
4.3	R	Subject to GENPRU TP 4.4R and to compliance with the conditions set out in GENPRU TP 4.6R, a <i>firm</i> will be treated as complying with GENPRU 2.2.271 R (3), GENPRU 2.2.177 R (2), GENPRU 2.2.177 R (3), GENPRU 2.2.180 R and GENPRU 2.2.181 R, in relation to the capital instrument to which the <i>waiver</i> or written concession referred to in GENPRU TP 4.2R related, so long as the <i>firm</i> is not obliged to pay any interest under the terms of the capital instrument in circumstances where the <i>firm</i> does not have <i>capital resources</i> equal to or in excess of its required margin of solvency under the <i>Insurance Directives</i> .
4.4	R	<p>GENPRU TP 4.3R ceases to apply to a <i>firm</i>:</p> <p>(1) once the <i>firm</i> has redeemed the capital instrument; or</p> <p>(2) on or after any date upon which the <i>firm</i> has the</p>

			option to redeem the capital instrument and may prudently do so.
4.5	R	Subject to compliance with the conditions set out in <i>GENPRU</i> TP 4.6R, a <i>firm</i> will be treated as complying with <i>GENPRU</i> 2.2.159 R (6), <i>GENPRU</i> 2.2.159 R (10), <i>GENPRU</i> 2.2.159 R (12), and <i>GENPRU</i> 2.2.163 R in relation to the capital instrument to which the <i>waiver</i> or written concession referred to in <i>GENPRU</i> TP 4.2R related.	
4.6	R	The conditions referred to in <i>GENPRU</i> TP 4.3R and <i>GENPRU</i> TP 4.5R are:	
		(1)	the <i>firm</i> must notify the <i>PRA</i> immediately if it becomes aware of any matter which is material to the relevance or appropriateness of the <i>waiver</i> or written concession;
		(2)	the <i>firm</i> must maintain a written record of the <i>rule</i> in <i>GENPRU</i> to which it considers the <i>waiver</i> or written concession applies; and
		(3)	the <i>firm</i> must make the record available to the <i>PRA</i> on request.
4.7	R	The <i>pre-commencement</i> provisions referred to in <i>GENPRU</i> TP 4.2R are those contained in:	
		(1)	the Insurance Companies Act 1982 and relevant secondary legislation; and
		(2)	the Friendly Societies Act 1992 and relevant secondary legislation.

GENPRU TP 8 Miscellaneous capital resources definitions for BIPRU firms

		Application
8.1	R	This section applies to a <i>BIPRU firm</i> .
[FCA] [PRA]		
8.2	R	Any provision of this section that applies on a consolidated basis under <i>GENPRU TP 8.3R</i> applies to any <i>firm</i> to which <i>BIPRU 8 (Group risk - consolidation)</i> applies.
[FCA] [PRA]		
8.3	R	Consolidation A provision of this section applies on a consolidated basis for the purpose of <i>BIPRU 8 (Group risk -consolidation)</i> to the extent that, and in the same way that, the provision in <i>BIPRU</i> to which it relates applies on a consolidated basis.
[FCA] [PRA]		
8.4	R	Specific issues of TONS and other securities <i>A bank</i> may treat a <i>security</i> forming part of an issue of <i>securities</i> listed in <i>GENPRU TP 8.5R</i> as eligible for inclusion within stage B of the <i>capital resources table</i> (Perpetual non cumulative preference shares) if it would not otherwise be eligible if:
[PRA]		
		(1) on 31 December 2006 the <i>bank</i> was subject to <i>IPRU(BANK)</i> ;
		(2) the <i>bank</i> issued it on or before 31 December 2006; and
		(3) as at 31 December 2006 the <i>bank</i> included it, and was entitled to include it, in the calculation of its capital resources under <i>IPRU(BANK)</i> as permanent share capital and tier one capital as referred to in chapter CA of <i>IPRU(BANK)</i> .
8.5	R	The issues of <i>securities</i> referred to in <i>GENPRU TP 8.4R</i> are as follows:
[PRA]		
		(1) Barclays £400mn 6% perpetual TONs;

			(2)	Abbey National £175m 6.984% perpetual TOPIC;
			(3)	Northern Rock £200m 7.053% perpetual TONs;
			(4)	Barclays \$1bn 6.86% perpetual TONs;
			(5)	Lloyds TSB \$1000m 6.90% perpetual capital securities; and
			(6)	Abbey National \$500m 7.375% T1MBS.
				PIBS
8.6	R			<i>A building society</i> may treat a <i>PIBS</i> as eligible for inclusion within stage B of the <i>capital resources table</i> (Perpetual non-cumulative preference shares) if it would not otherwise be eligible if:
[PRA]			(1)	on 31 December 2006 the <i>firm</i> was subject to <i>IPRU(BSOC)</i> ;
			(2)	the <i>building society</i> issued it before 18 November 2004; and
			(3)	as at 31 December 2006 the <i>building society</i> included it, and was entitled to include it, in the calculation of its capital resources under <i>IPRU(BSOC)</i> as tier one capital as referred to in Annex 1A of chapter 1 of volume 1 of <i>IPRU(BSOC)</i> .
				Preference shares
8.7	R			<i>A bank</i> or <i>BIPRU investment firm</i> may treat a <i>preference share</i> as eligible for inclusion within stage B of the <i>capital resources table</i> (Perpetual non-cumulative preference shares) if it would not otherwise be eligible if:
[FCA] [PRA]			(1)	on 31 December 2006 the <i>firm</i> was subject to <i>IPRU(BANK)</i> or <i>IPRU(INV)</i> ;
			(2)	the <i>firm</i> issued it on or before 31 December 2006;
			(3)	as at 31 December 2006 the <i>firm</i> included it, and was entitled to include it, in the calculation of its capital resources under <i>IPRU(BANK)</i> or <i>IPRU(INV)</i> as capital of a type that corresponded to <i>tier one capital resources</i> ;
			(4)	it would have been eligible for inclusion within stage B of the <i>capital resources</i>

			<p><i>table</i> except for the fact that it does not meet GENPRU 2.2.64 R (4)(b) (Restrictions on mandatory <i>coupons</i> for <i>tier one capital</i>) or GENPRU 2.2.109 R (1) (Restrictions on mandatory <i>coupons</i> for perpetual non-cumulative <i>preference shares</i>) or both of those <i>rules</i>;</p>
		(5)	<p>the only reason that it does not meet GENPRU 2.2.64 R (4)(b) or GENPRU 2.2.109 R (1) is because a mandatory cash <i>coupon</i> is payable;</p>
		(6)	<p>the <i>firm</i> has the right not to pay the cash <i>coupon</i> if it is in breach of any of the <i>main BIPRU firm Pillar 1 rules</i> or to the extent that paying such <i>coupon</i> would result in a breach of any of those <i>rules</i>; and</p>
		(7)	<p>any amount not paid under (6) does not accumulate.</p>
			<p>Innovative tier one capital</p>
8.8	R		<p>A <i>bank</i> may treat an item of a <i>capital instrument</i> as eligible for inclusion within stage C of the <i>capital resources table</i> (Innovative tier one capital) if it would not otherwise be eligible if:</p>
[PRA]		(1)	<p>on 31 December 2006 the <i>firm</i> was subject to <i>IPRU(BANK)</i>;</p>
		(2)	<p>the <i>bank</i> issued it on or before 31 December 2006;</p>
		(3)	<p>as at 31 December 2006 the <i>bank</i> included it, and was entitled to include it, in the calculation of its capital resources under <i>IPRU(BANK)</i> as innovative tier one capital as referred to in chapter CA of <i>IPRU(BANK)</i>;</p>
		(4)	<p>it would have been eligible for inclusion within stage C of the <i>capital resources table</i> except for the fact that it does not meet GENPRU 2.2.64 R (4)(b) (Restrictions on mandatory <i>coupons</i> for <i>tier one capital</i>);</p>
		(5)	<p>the only reason that it does not meet GENPRU 2.2.64 R (4)(b) is because a mandatory cash <i>coupon</i> is payable;</p>

			<p>(6) the <i>bank</i> has the right not to pay the cash <i>coupon</i> if it is in breach of any of the <i>main BIPRU firm Pillar 1 rules</i> or to the extent that paying such <i>coupon</i> would result in a breach of any of those <i>rules</i>; and</p> <p>(7) any amount not paid under (6) does not accumulate.</p>
			<p>Upper tier 2 instruments: Deferral of interest</p>
8.9	R	[FCA] [PRA]	<p>A <i>bank</i> or <i>BIPRU investment firm</i> may treat a <i>capital instrument</i> as eligible for inclusion within stage G of the <i>capital resources table</i> (Upper tier two capital) if it would not otherwise be eligible if:</p> <p>(1) on 31 December 2006 the <i>firm</i> was subject to <i>IPRU(BANK)</i> or <i>IPRU(INV)</i>;</p> <p>(2) the <i>firm</i> issued it on or before 31 December 2006;</p> <p>(3) as at 31 December 2006 the <i>firm</i> included it, and was entitled to include it, in the calculation of its capital resources under <i>IPRU(BANK)</i> or <i>IPRU(INV)</i> as capital of a type that corresponded to <i>upper tier two capital resources</i>;</p> <p>(4) it would have been eligible for inclusion within stage G of the <i>capital resources table</i> except for the fact that it does not meet GENPRU 2.2.177 R (2) ;</p> <p>(5) the only reason that it does not meet GENPRU 2.2.177 R (2) is because a mandatory cash <i>coupon</i> is payable; and</p> <p>(6) the <i>firm</i> has the right not to pay the cash <i>coupon</i> if it is in breach of any of the <i>main BIPRU firm Pillar 1 rules</i> or to the extent that paying such <i>coupon</i> would result in a breach of any of those <i>rules</i> .</p>
			<p>Lower tier 2 instruments: Additional events of default for building societies</p>
8.10	R	[PRA]	<p>A <i>building society</i> may treat a <i>capital instrument</i> as eligible for inclusion within stage H of the <i>capital resources table</i> (Lower tier two capital) if it would not otherwise be eligible if:</p>

- (1) on 31 December 2006 the *building society* was subject to *IPRU(BSOC)*;
- (2) the *building society* issued it on or before 31 December 2006;
- (3) as at 31 December 2006 the *building society* included it, and was entitled to include it, in the calculation of its capital resources under *IPRU(BSOC)* as Term Subordinated Debt falling within its Tier Two Capital (as referred to in Annex 1A of Chapter 1 and Chapter 2 of *IPRU(BSOC)*);
- (4) it would have been eligible for inclusion within stage H of the *capital resources table* except for the fact that it does not meet GENPRU 2.2.159 R (2) (Events of default); and
- (5) the only reason that it does not meet GENPRU 2.2.159 R (2) is because it contains an event of default permitted by paragraph 2.8.10G(3) of Volume 1 of *IPRU(BSOC)* (cancellation of a society's registration under the Building Societies Act 1986 otherwise than under section 103(1)(a) of that Act).

Conversion ratio

8.11 R
[FCA] [PRA]

GENPRU 2.2.138 R (2) (Tier one capital: Conversion ratio) does not apply to a *capital instrument* issued by a *firm* if:

- (1) on 31 December 2006 the *firm* was subject to *IPRU(BANK)*, *IPRU(BSOC)* or *IPRU(INV)*;
- (2) the *firm* issued it on or before 31 December 2006; and
- (3) as at 31 December 2006 the *firm* included it, and was entitled to include it, in the calculation of its capital resources under:
 - (a) (in the case of a *bank*) *IPRU(BANK)* as innovative tier one capital as referred to in chapter CA of *IPRU(BANK)*; or

(b) (in the case of any other type of *firm*) *IPRU(BSOC)* or *IPRU(INV)* as capital of a type that corresponded to *tier one capital*.

Legal opinions

8.12 R
[FCA] [PRA]

GENPRU 2.2.118 R (Legal opinions for *innovative tier one capital*) does not apply to a *capital instrument* issued by a *firm* if:

- (1) on 31 December 2006 the *firm* was subject to *IPRU(BANK)*, *IPRU(BSOC)* or *IPRU(INV)*;
- (2) the *firm* issued the *capital instrument* on or before 31 December 2006;
- (3) (in the case of a *bank*) as at 31 December 2006 the *bank* included the *capital instrument*, and was entitled to include it, in the calculation of its capital resources under *IPRU(BANK)* as innovative tier one capital as referred to in chapter CA of *IPRU(BANK)*; and
- (4) (in any other case) the *firm* included the *capital instrument*, and was entitled to include it, in the calculation of its capital resources under *IPRU(BSOC)* or *IPRU(INV)* as capital of a type that corresponded to *tier one capital*.

8.13 R
[FCA] [PRA]

The following *rules*:

- (1) GENPRU 2.2.159 R (12) (Legal opinions for *tier two capital*);
- (2) GENPRU 2.2.163 R (Legal opinions for *tier two capital* governed by a foreign law);
- (3) GENPRU 2.2.181 R (Legal opinions for *upper tier two capital*); and
- (4) GENPRU 2.2.244 R (Application of certain *rules* about *tier two capital* to *tier three capital*) so far as it applies the *rules* in (1) to (3);

do not apply to a *capital instrument* issued by a *firm* if:

- (5) on 31 December 2006 the *firm* was subject to *IPRU(BANK)*, *IPRU(BSOC)* or *IPRU(INV)*;
- (6) the *firm* issued the *capital instrument* on or before 31 December 2006; and
- (7) as at 31 December 2006 the *firm* included the *capital instrument*, and was entitled to include it, in the calculation of its capital resources under *IPRU(BANK)*, *IPRU(BSOC)* or *IPRU(INV)* as capital of the type that corresponds to:
 - (a) (where the *firm* dis-applies the *rule* in (1) or (2)) *tier two capital*; or
 - (b) (where the *firm* dis-applies the *rule* in (3)) *upper tier two capital*; or
 - (c) (where the *firm* dis-applies the *rule* in (4)) *tier three capital*.

Version of IPRU

8.14 R Any reference in this section to a type of capital in *IPRU* is [FCA] [PRA] to a type of capital in *IPRU* in the form *IPRU* was in on 31 December 2006.

Eligibility

8.15 G If this section says that an item of capital is eligible for inclu- [FCA] [PRA] sion within a particular stage of the *capital resources table* this is still subject to the application of the *capital resources gearing rules*.

Waivers and concessions

8.16 G A reference to a *firm* being entitled to include *capital instru- [FCA] [PRA] ments* in the calculation of its capital resources under *IPRU* at a particular level includes the *firm* being able to do this under a *waiver* or, in the case of *IPRU(BANK)* or *IPRU(BSOC)*, a written approval by the *appropriate regulator*.

Combinations of provisions

8.17	G	A <i>firm</i> may combine the use of two or more of the provisions in this section.
[FCA] [PRA]		

General Prudential sourcebook

GENPRU TP 8A Further miscellaneous capital resources definitions for BIPRU firms

FCA PRA

Application and interpretation

8A.1 R This section applies to a *BIPRU firm*. In this section a reference to 30 December 2010 means 23.59 on 30 December 2010.

Tier one capital

8A.2 R Until 31 December 2040 a *BIPRU firm* may treat a *capital instrument* as eligible for inclusion as *hybrid capital*, if it would not otherwise be eligible, if:

- (1) on 30 December 2010 the *BIPRU firm* was subject to *GENPRU*; and
- (2) as at 30 December 2010 the *BIPRU firm* included it, and was entitled to include it, at stage B or C of the calculation in the *capital resources table*.

8A.3 R If a *BIPRU firm* treats a *capital instrument* as eligible for inclusion as *hybrid capital* under *GENPRU TP8A.2R*, then the *firm*:

- (1) if it included the *capital instrument* as *innovative tier one capital* as at 30 December 2010, must treat the *capital instrument* as *hybrid capital* included at stage C of the calculation in the *capital resources table*;
- (2) except where it is a *building society*, must apply the limit in *GENPRU 2.2.30A R (3)* to the aggregate of the *capital instruments* treated under (1) and the *hybrid capital* that is eligible under *GENPRU 2.2* for inclusion at stage C of the calculation in the *capital resources table*;
- (3) in the case of a *building society*, must not include *hybrid capital* at stage C of the calculation in the *capital resources table* under *GENPRU 2.2*, except as provided by (4), if the amount of *PIBS* with incentives to redeem treated under *GENPRU TP8A.2R* exceeds the limit in *GENPRU 2.2.30A R (3)*;
- (4) in the case of a *building society*, may include *hybrid capital* at stage C of the calculation in the *capital resources table*, notwithstanding (3), if the *firm* issued it after 30 December 2010 and:

- (a) the *capital instrument* would otherwise be eligible for inclusion as *hybrid capital* at stage C of the calculation in the *capital resources table* under GENPRU 2.2; and
 - (b) the *firm* issued it in order to replace a *PIBS* with an incentive to redeem that the *firm* treated as *hybrid capital* under GENPRU TP8A.2R ;
- (5) must not include *hybrid capital* at stage B2 of the calculation in the *capital resources table* under GENPRU 2.2, except as provided by GENPRU TP8A.4R, if and to the extent that the aggregate of the following exceeds the limit in GENPRU 2.2.30A R (2)
- (a) *capital instruments* included at stage C in the *capital resources table* under (1) and GENPRU 2.2 ; and
 - (b) *capital instruments* included at stage B of the calculation in the *capital resources table* as at 30 December 2010 and treated under GENPRU TP8A.2R ;
- (6) if it includes *hybrid capital* at stage B2 of the calculation in the *capital resources table* under GENPRU 2.2, except as provided by GENPRU TP8A.4R, must include *capital instruments* treated under GENPRU TP8A.2R in the calculation of the limit in GENPRU 2.2.30A R (2);
- (7) must not include *hybrid capital* at stage B1 of the calculation in the *capital resources table* under GENPRU 2.2, except as provided by GENPRU TP8A.5R, if and to the extent that the aggregate of the following exceeds the limit in GENPRU 2.2.30A R (1) :
- (a) *capital instruments* included at stage C in the *capital resources table* under (1) and GENPRU 2.2; and
 - (b) *capital instruments* included at stage B of the calculation in the *capital resources table* as at 30 December 2010 and treated under GENPRU TP8A.2R ; and
- (8) if it includes *hybrid capital* at stage B1 of the calculation in the *capital resources table* under GENPRU 2.2, except as provided by GENPRU TP8A.5R, must include *capital instruments* treated under GENPRU TP8A.2R in the calculation of the limit in GENPRU 2.2.30A R (1).

8A.4

R A BIPRU firm may include *hybrid capital* at stage B2 of the calculation in the *capital resources table*, notwithstanding GENPRU TP8A.3R(5), if the *firm* issued it after 30 December 2010 and:

- (1) the *capital instrument* would otherwise be eligible for inclusion as *hybrid capital* at stage B2 of the calculation in the *capital resources table* under GENPRU 2.2; and
- (2) the *firm* issued it in order to replace another *capital instrument* that the *firm* treated as *hybrid capital* under GENPRU TP8A.2R.

- 8A.5 R A BIPRU firm may include *hybrid capital* at stage B1 of the calculation in the *capital resources table*, notwithstanding GENPRU TP8A.3R(7), if the firm issued it after 30 December 2010 and:
- (1) the *capital instrument* would otherwise be eligible for inclusion as *hybrid capital* at stage B1 of the calculation in the *capital resources table* under GENPRU 2.2; and
 - (2) the firm issued it in order to replace another *capital instrument* that the firm treated as *hybrid capital* under GENPRU TP8A.2R.
- 8A.6 R In relation to the *tier one capital resources* of a BIPRU firm, calculated at stage F of the calculation in the *capital resources table* (Total tier one capital after deductions):
- (1) from 31 December 2020 until 30 December 2030:
 - (a) no more than 20% may be accounted for by items treated under GENPRU TP8A.2R as *tier one capital*; and
 - (b) in the case of a *building society*, any *PIBS* with an incentive to redeem treated under GENPRU TP8A.2R is to be treated as *hybrid capital* included at stage C of the calculation in the *capital resources table* and as subject to the limit in GENPRU 2.2.30A R (3); and
 - (2) from 31 December 2030 until 30 December 2040, no more than 10% may be accounted for by items treated under GENPRU TP8A.2R as *tier one capital*.
- 8A.7 R BIPRU firms which do not comply by 31 December 2010 with the limits set out in GENPRU 2.2.29 R to GENPRU 2.2.30A R (3) must develop strategies and processes on the necessary measures to resolve this situation before the dates set out in GENPRU TP8A.6R .

General Prudential sourcebook

GENPRU TP 8B Miscellaneous capital resources definitions for BIPRU firms: Core tier one capital

FCA PRA

Application

8B.1 R This section applies to a *BIPRU firm*.

Core tier one capital

8B.2 R A provision in this section applies on a consolidated basis for the purposes of BIPRU 8 (Group risk - consolidation) to a *UK consolidation group* to the extent that, and in the same manner that, the provision in *GENPRU* to which it relates applies on a consolidated basis.

8B.3 R The Royal Bank of Scotland plc may treat a *share* falling within GENPRU TP 8B.4R as eligible for inclusion within stage A of the *capital resources table* (Core tier one capital) if it would not otherwise be eligible provided that:

- (1) the *share*:
 - (a) had been issued on or before 30 December 2010; or
 - (b) if issued after that date, is issued pursuant to a contractual obligation requiring its issue entered into on or before 30 December 2010;
- (2) as at 30 December 2010 The Royal Bank of Scotland plc was entitled (or would have been entitled, had the *share* then been issued) to include it in the calculation of its *capital resources* under *GENPRU* as *permanent share capital* and, in the case of a *share* which had been issued as at that date, did so include it; and
- (3) the *share* is held by or on behalf of the Government of the *United Kingdom*.

8B.4 R The *shares* referred to in GENPRU TP 8B.3R are as follows:

- (1) The Royal Bank of Scotland Group plc Series 1 Class B Shares of 1p each; and
- (2) The Royal Bank of Scotland Group plc Series 1 Dividend Access Share of 1p; either as separate instruments or considered together as connected instruments

Voting rights

8B.5 R A *BIPRU firm* may treat an ordinary *share* that has different voting rights to other ordinary *shares* issued by the *firm* as eligible for inclusion within stage A of the *capital resources table* (Core tier one capital) without making a notification of issue or change in voting rights to the *appropriate regulator* under GENPRU 2.2.83B R if:

- (1) on 30 December 2010 the *firm* was subject to *GENPRU*;

- (2) the *firm* issued the ordinary *share* on or before 30 December 2010 and the shareholders were bound by the differences in voting rights on or before 30 December 2010; and
- (3) as at 30 December 2010 the *firm* included the ordinary *share*, and was entitled to include it, in the calculation of *capital resources* under GENPRU as *permanent share capital*;

provided that by 30 June 2011 the *firm* provides the *appropriate regulator* with full details of the ordinary *shares*, their terms of issue and the differences in voting rights applicable to those ordinary *shares*.

General Prudential sourcebook

GENPRU TP 9 Individual capital guidance for BIPRU firms

PRA

		Application
9.1	G	<p>This section applies to a <i>BIPRU firm</i> that is a <i>bank</i> or <i>building society</i> for which the <i>FSA</i> has given:</p> <p>(1) (in the case of a <i>building society</i>) a threshold ratio under <i>IPRU(BSOC)</i>; or</p> <p>(2) (in the case of a <i>bank</i>) an individual capital ratio under <i>IPRU(BANK)</i>;</p> <p>that was in effect on 31 December 2006 but to which the <i>FSA</i> has not yet given <i>individual capital guidance</i>.</p>
		Duration
9.2	G	This section applies to a <i>firm</i> until it receives <i>individual capital guidance</i> .
9.3	G	GENPRU TP 9.4G - GENPRU TP 9.6G only apply until 31 December 2007. Thereafter (if they do not already apply) GENPRU TP 9.7G - GENPRU TP 9.10G apply.
		Pre 2007 capital requirements
9.4	G	GENPRU TP 9.5G - GENPRU TP 9.6G apply if, and for as long as, a <i>firm</i> applies the treatment in <i>BIPRU TP 3</i> (Pre CRD capital requirements applying on a solo basis during 2007) to all its <i>exposures</i> .
9.5	G	If GENPRU TP 9.4G applies, any threshold ratio or individual capital ratio remains in force. However compliance with such ratios should be measured by reference to <i>capital resources</i> .
9.6	G	Where necessary, a <i>firm</i> should apply the adjustment set out in section 4.1.3 of chapter CO of <i>IPRU(BANK)</i> (CAD banks) as it stood on 31 December 2006 to its <i>trading book</i> capital requirements.
		BIPRU capital requirements
9.7	G	GENPRU TP 9.8G - GENPRU TP 9.10G apply to a <i>firm</i> if GENPRU TP 9.5G - GENPRU TP 9.6G do not apply.

9.8	G	<p>Any threshold ratio or individual capital ratio remains in force adjusted as follows:</p> <ol style="list-style-type: none"> (1) the <i>firm</i> should work out the percentage of its <i>capital resources requirement</i> as at the date in GENPRU TP 9.10G represented by the absolute amount in GENPRU TP 9.9G; and (2) the <i>firm</i> should hold <i>capital resources</i> of an amount at least equal to the percentage specified in (1) of its <i>capital resources requirement</i> from time to time.
9.9	G	<p>The absolute amount referred to in GENPRU TP 9.8G is:</p> <ol style="list-style-type: none"> (1) (if GENPRU TP 9.7G - GENPRU TP 9.10G apply to the <i>firm</i> on 1 January 2007) the amount of capital resources it had to hold under <i>IPRU</i> on 31 December 2006 in order to meet the ratio referred to in GENPRU TP 9.1G; and (2) (in any other case) the amount of <i>capital resources</i> it had to hold immediately prior to the date in GENPRU TP 9.10G in order to meet the ratio referred to in GENPRU TP 9.1G.
9.10	G	<p>The date referred to in GENPRU TP 9.8G and GENPRU TP 9.9G is:</p> <ol style="list-style-type: none"> (1) (if GENPRU TP 9.9G(1) applies) 1 January 2007; and (2) (if GENPRU TP 9.9G(2) applies) the date on which GENPRU TP 9.7G - GENPRU TP 9.10G first apply to the <i>firm</i>.
9.11	G	<p>The following illustrates how GENPRU TP 9.8G - GENPRU TP 9.10G work. This example relates to a <i>bank</i> to which GENPRU TP 9.7G - GENPRU TP 9.10G apply from 1 January 2007. The example is as follows (all figures in £millions):</p> <ol style="list-style-type: none"> (1) as at 31 December 2006: <ol style="list-style-type: none"> (a) the <i>bank</i> has risk-weighted assets of £1250; (b) its Pillar 1 capital resources require-

			ment was £100 (8% of £1250);
		(c)	its individual capital ratio was 10%; and
		(d)	its capital resources requirement expressed as an absolute amount and including the individual capital ratio is £125;
		(2)	on 1 January 2007 its <i>capital resources requirement</i> is £80;
		(3)	the result is that the new individual capital ratio is 156.25% (£125m/£80m); and
		(4)	its capital resources requirement expressed as an absolute amount and including the individual capital ratio remains at £125 despite the fall in the Pillar 1 charge.
9.12	G		Continuing the example, say that the <i>bank's capital resources requirement</i> falls to £70 on 31 July 2007. Its capital resources requirement, expressed as an amount and including the individual capital ratio, now falls to £109.375.
			Adjustments
9.13	G		No adjustment should be made to take into account differences between the calculation of capital resources under <i>IPRU</i> and of <i>capital resources</i> .
			Consolidation
9.14	G		This section also applies to threshold ratios and individual capital ratios that apply on a consolidated basis.

General Prudential sourcebook

GENPRU TP 10 Assets of former underwriting members

PRA

	Application	
10.1	R	GENPRU TP 10 applies to the <i>Society</i> .
	Duration	
10.2	R	GENPRU TP 10 applies until the <i>Society</i> is no longer required to identify or value assets of <i>individual members</i> that became <i>former underwriting members</i> before 1 January 2003.
	Valuation and identification of assets	
10.3	R	For the purposes of GENPRU 1 and GENPRU 2, the <i>Society</i> must identify and value the assets of <i>individual members</i> that became <i>former underwriting members</i> before 1 January 2003 in accordance with the requirements for the identification and valuation of assets contained in the "Conditions and Requirements Relating to Solvency and Reporting" which were approved by the <i>FSA</i> , exercising the powers of HM Treasury under section 83 of the Insurance Companies Act 1982, and which were applicable immediately before <i>commencement</i> .

General Prudential sourcebook

GENPRU TP 11 PRU waivers

PRA

		Application
11.1	R	GENPRU TP 11 applies to an <i>insurer</i> to whom a <i>GENPRU rule</i> listed in the Table in GENPRU TP 12 applies.
		Version of PRU to be used
11.2	R	A reference in GENPRU TP 11 to <i>PRU</i> is to the version in force on 30 December 2006.
		Duration of transitional
11.3	R	GENPRU TP 11 applies until the relevant <i>GENPRU rule</i> is revoked.
		Continuing effect of waivers
11.4	R	<p>A <i>rule</i> in <i>GENPRU</i> listed in the Table at GENPRU TP 12 is disapplied, or is modified in its application, to a <i>firm</i>:</p> <p>(1) in order to produce the same effect, including any conditions, as a <i>waiver</i> had on the corresponding <i>rule</i> in <i>PRU</i>;</p> <p>(2) for the same period as the <i>waiver</i> would have lasted, if shorter than the period in GENPRU TP 11.3R;</p> <p>provided the conditions set out in GENPRU TP 11.5R are satisfied.</p>
11.5	R	<p>The conditions referred to in GENPRU TP 11.4R are:</p> <p>(1) the <i>rule</i> is shown in the Table at GENPRU TP 12 as corresponding with the <i>rule</i> in <i>PRU</i> in relation</p>

			<p>to which the <i>waiver</i> was granted to the <i>firm</i>;</p> <p>(2) the <i>waiver</i> was current as respects the <i>firm</i> immediately before 31 December 2006; and</p> <p>(3) there is no specific transitional <i>rule</i> relating to the <i>waiver</i>.</p>
11.6	R		<p>GENPRU TP 11.4 does not have effect if, and to the extent that, it would be inconsistent with any <i>EU</i> law obligation of the <i>United Kingdom</i>.</p>
11.7	R		<p>A <i>firm</i> which has the benefit of a <i>waiver</i> to which GENPRU TP 11.4R applies must:</p> <p>(1) notify the <i>PRA</i> immediately if it becomes aware of any matter which is material to the relevance or appropriateness of the <i>waiver</i>;</p> <p>(2) maintain a written record of the <i>rule</i> in <i>GENPRU</i> to which it considers the <i>waiver</i> applies; and</p> <p>(3) make the record available to the <i>PRA</i> on request.</p>

GENPRU 2.2.107 R does not apply to a *firm*.

General Prudential sourcebook

GENPRU TP 14 Continued use of IPRU expenditure requirements by BIPRU investment firms

FCA

		Application
14.1	R	This section applies to a <i>BIPRU investment firm</i> .
		Transitional rule
14.2	R	If a <i>firm</i> : (1) is subject to the <i>fixed overheads requirement</i> ; and (2) was on 31 December 2006 subject to one of the expenditure based requirements under <i>IPRU</i> listed in the table in <i>GENPRU TP 14.3R</i> ; the <i>firm</i> may treat that expenditure based requirement as being its <i>fixed overheads requirement</i> .
14.3	R	Table: Continuing IPRU expenditure requirements This table belongs to <i>GENPRU TP 14.2R</i>

FCA

<i>IPRU</i> expenditure requirement	Remarks
Expenditure based requirement under Chapter 5 of <i>IPRU(INV)</i>	If the <i>firm</i> is subject to an expenditure based requirement of 6/52 of its annual audited expenditure, the <i>firm</i> must, for the purposes of this section, use the requirement of one quarter of its annual audited expenditure under <i>rule 5.2.3(4)(c)(i)</i>
The capital requirement of 13/52 of annual audited expenditure under <i>rule 7.2.3R(1)</i> of Chapter 7 of <i>IPRU(INV)</i>	
The expenditure requirement under <i>rule 10-73(1)(b)</i> of Chapter 10 of <i>IPRU(INV)</i>	

IPRU expenditure requirement	Remarks
Financial Resources Test 2 for Category A firms under section 13.5 of Chapter 13 of <i>IPRU(INV)</i> (Expenditure-based requirement)	A <i>firm</i> must, for the purposes of this section, calculate its requirement as 13/52 of its relevant annual expenditure even if the fraction that applies to it under Chapter 13 would otherwise be 4/52 or 8/52.
<p>Note (1): A reference to annual expenditure covers expenditure based on a forecast, pro-rated expenditure based on a period shorter than twelve months or any other expenditure figures for which the <i>IPRU rules</i> in this table provide.</p>	
<p>Note (2): Any <i>waiver</i> that a <i>firm</i> has in relation to the <i>rules</i> in <i>IPRU</i> in this table has effect for the purposes of this section. Any condition, limitation or requirement to which such a <i>waiver</i> is subject also continues to apply.</p>	

FCA

		Duration
14.4	R	A <i>firm</i> must stop applying this section at the date when, under the <i>IPRU</i> expenditure requirements that apply to it as described in <i>GENPRU TP 14.3R</i> , it would have had to start using figures for the period following the one on which the expenditure requirements to which it was subject on 31 December 2006 were based.
14.5	G	Say for example that a <i>firm's accounting reference date</i> is 31 December. As at 31 December 2006 the <i>firm's IPRU</i> expenditure requirement was based on its annual accounts for the year ended 31 December 2005. Its annual accounts for the year ending 31 December 2006 are completed on 15 March 2007. From 1 January 2007 to 14 March 2007 the <i>firm</i> may treat its <i>IPRU</i> expenditure requirements as being its <i>fixed overheads requirement</i> . On 15 March 2007 the <i>firm</i> should switch to calculating its <i>fixed overheads requirement</i> under <i>GENPRU 2.1</i>

14.6	G	<p>(Calculation of capital resources requirement).</p> <p>Capital resources</p> <p>The expenditure requirement under <i>IPRU</i> is measured against the <i>firm's capital resources</i> as calculated under GENPRU 2.2 (Capital resources) and not capital resources calculated under <i>IPRU</i>.</p>

GENPRU TP 15 Admissible assets

	Application	
15.1	R	GENPRU TP 15 applies to an <i>insurer</i> which is not a pure <i>reinsurer</i> .
	Duration of transitional	
15.2	R	GENPRU TP 15 applies until 30 December 2007.
	GENPRU 2 Annex 7R	
15.3	R	(1) In determining whether its assets are <i>admissible assets</i> , instead of applying GENPRU 2 Annex 7 R, a <i>firm</i> may elect to treat as an <i>admissible asset</i> an asset that would have been an <i>admissible asset</i> for the purposes of the Integrated Prudential Sourcebook (PRU) as it was in force on 30 December 2006.
		(2) (1) does not apply when determining whether a <i>derivative</i> or <i>quasi-derivative</i> is an <i>approved derivative</i> or <i>approved quasi-derivative</i> .
		(3) If a <i>firm</i> applies (1) to any of its assets, it must do so for all of its assets except <i>derivatives</i> and <i>quasi-derivatives</i> .

Schedule 1 Record keeping requirements

G

FCA PRA

1 The aim of the *guidance* in the following table is to give the reader a quick overall view of the relevant record keeping requirements.

2 It is not a complete statement of those requirements and should not be relied on as if it were.

3 Table

Handbook reference	Subject of Record	Contents of record	When record must be made	Retention Period
GENPRU 1.2.60 R - GENPRU 1.2.61 R	<i>Firm's</i> assessment of its financial resources	(1) The major sources of risk the <i>firm</i> has identified (2) How the <i>firm</i> intends to deal with those risks (3) Details of the stress and scenario analyses carried out and the resulting financial resources estimated to be required	Not specified	At least three years
GENPRU 1.3.22 R	Valuation models for marking to model	Secure copy of <i>firm's</i> own valuation model	When model is in use	Not specified

General Prudential sourcebook

Schedule 2 Notification and reporting requirements

G

1 The aim of the *guidance* in the following table is to give the reader a quick overall view of the relevant notification requirements.

2 It is not a complete statement of those requirements and should not be relied on as if it were.

3 Table

Handbook reference	Matter to be notified	Contents of notification	Trigger events	Time allowed
GENPRU 1.5.19 R [PRA]	Intention to change maximum amount of <i>callable contribution</i>	Fact of intention and details of the change	Intention to change the maximum amount	Adequate advance notice, normally not less than 6 months
GENPRU 2.1.11 R [FCA] [PRA]	Breach or expected breach of GENPRU 2.1.13 R or <i>main BIPRU firm Pillar 1 rules</i>	Fact of breach or expectation of breach	Breach or expectation of breach	Immediately
GENPRU 2.2.19 R [FCA] [PRA]	Intention to deduct <i>illiquid assets</i> rather than <i>material holdings</i>	Fact of intention	Intention to start or stop using method in column 2	One month prior to change of method
GENPRU 2.2.61B R [FCA] [PRA]	Intention to issue a <i>capital instrument</i> for inclusion in <i>capital resources</i>	Fact of intention and details of intended amount, issue date, type of investor, stage of capital, features of instrument and confirmation of compliance with <i>rules</i>	Intention to issue	One <i>month</i> prior to issue, unless exceptional circumstances prevent a <i>firm</i> adhering to a <i>one-month</i> period
GENPRU 2.2.61C R [FCA] [PRA]	Proposed changes to details of the issue of a <i>capital instrument</i> notified under GENPRU 2.2.61B R	Proposed change and all information required under GENPRU 2.2.61B R (1) to GENPRU 2.2.61B R (4)	Intention to change any details of the issue previously notified to the <i>appropriate regulator</i>	As soon as the changes are proposed
GENPRU 2.2.61D R [FCA] [PRA]	Proposed establishment of a debt securities program	All information required under	Intention to establish	One month prior to first drawdown

Handbook reference	Matter to be notified	Contents of notification	Trigger events	Time allowed
GENPRU 2.2.61F R [FCA] [PRA]	Issue of <i>capital instruments</i> for inclusion in <i>capital resources</i> where instrument or facility previously notified to the appropriate regulator	GENPRU 2.2.61B R (1) to GENPRU 2.2.61B R (4) All information required under GENPRU 2.2.61B R (1) to GENPRU 2.2.61B R (3) and confirmation no changes have been made to the terms of the instrument since a previous similar issue	Intention to issue	No later than date of issue
GENPRU 2.2.74 R [FCA] [PRA]	Intention to redeem <i>tier one instrument</i> included in <i>tier one capital resources</i>	Fact of intention and details of the <i>firm's</i> position after such redemption in order to show how it will meet the <i>capital resources requirement</i> , how it will have sufficient financial resources to meet the <i>overall financial adequacy rule</i> and, in the case of a <i>BIPRU firm</i> , how it will not otherwise suffer any undue effects to its financial or solvency conditions	Intention to redeem	At least one month prior to becoming committed to redeem
GENPRU 2.2.79G R [FCA] [PRA]	Intention to purchase a <i>tier one instrument</i> in accordance with GENPRU 2.2.79A R	Fact of intention and details of the <i>firm's</i> position after the purchase in order to show how, over an appropriate timescale, adequately stressed, and without planned recourse to the capital markets, it will meet its <i>capital resources requirement</i> and have sufficient financial resources to meet the <i>overall financial adequacy rule</i>	Intention to purchase	At least one month prior to becoming committed to purchase
GENPRU 2.2.83B R [FCA] [PRA]	Intention to include in stage A of the <i>cap-</i>	Fact of intention.	Intention to include in stage A of the <i>cap-</i>	At least one month before the <i>shares</i> are issued or (in the case

Handbook reference	Matter to be notified	Contents of notification	Trigger events	Time allowed
	<i>ital resources table</i> different classes of the same <i>share</i> type that meet the conditions in GENPRU 2.2.83 R and GENPRU 2.2.83A R but have differences in voting rights.		<i>ital resources table</i> classes of the same <i>share</i> type that have different voting rights.	of existing issued <i>shares</i>) the differences in voting rights take effect.
GENPRU 2.2.83F R [PRA]	Intention by a <i>building society</i> to issue a <i>capital instrument</i> that includes a <i>coupon</i> limit in its terms of issuance in accordance with GENPRU 2.2.83E R.	Fact of intention.	Intention to issue a <i>capital instrument</i> that includes a <i>coupon</i> limit.	At least one month before the intended date of issue.
GENPRU 2.2.135 R [FCA] [PRA]	Intention to include an unusual transaction in capital under GENPRU 2.2.124 R	Fact of intention.	Intention to include in capital	At least one month prior to inclusion of that capital in <i>capital resources</i>
GENPRU 2.2.171 R [FCA] [PRA]	Proposal to amend a tier two instrument	Details of the proposed amendment	Proposal to amend	One month before amendment is due to take effect
GENPRU 2.2.174 R [FCA] [PRA]	Intention to repay (other than on contractual repayment date) <i>tier two instrument</i>	Fact of intention and details of the <i>firm's</i> position after such repayment in order to show how it will meet the <i>capital resources requirement</i> and how it will have sufficient financial resources to meet the <i>overall financial adequacy rule</i>	Intention to repay	Six <i>Months</i> (in the case of an <i>insurer</i>) or one <i>Month</i> (in the case of a <i>BIPRU</i> firm) prior to becoming committed to repayment
GENPRU 2.2.243 R [FCA] [PRA]	Intention to pay interest or principal on subordinated debt included in <i>tier three capital resources</i> if the <i>firm's capital resources</i> are less than 120% of its <i>capital resources requirement</i>	Fact of intention	Intention to pay	One month prior to any payment of interest or principal
GENPRU 2.2.245 R [FCA] [PRA]	Intention to repay (other than on contractual repayment date) <i>tier three capital resources</i>	Fact of intention and details of how the <i>firm</i> will meet its <i>capital resources requirement</i> after such repayment	Intention to repay	One month prior to repayment

General Prudential sourcebook

Schedule 3 Fees and other requirement payments

G

FCA PRA

There are no requirements for fees or other payments in *GENPRU*.

General Prudential sourcebook

Schedule 4 Powers exercised

Sch 4.1 G

The following powers and related provisions in the *Act* have been exercised by the *FSA* to make the *rules* in *GENPRU*:

- Section 138 (General rule-making power);
- Section 149 (Evidential provisions);
- Section 150(2) (Actions for damages);
- Section 156 (General supplementary powers); and
- Section 316(1) (Direction by Authority)

Sch 4.2 G

The following power in the *Act* has been exercised by the *FSA* to give the *guidance* in *GENPRU*:

- Section 157(1) (Guidance).

General Prudential sourcebook

Schedule 5 Rights of action for damages

G

FCA

1. The table below sets out the rules in *GENPRU* contravention of which by an *authorised person* may be actionable under section 138D of the *Act* (Actions for damages) by a person who suffers loss as a result of the contravention.
2. If a "Yes" appears in the column headed "For private person", the rule may be actionable by a private person under section 138D (or, in certain circumstances, his fiduciary or representative; see article 6(2) and (3)(c) of the Financial Services and Markets Act 2000 (Rights of Action) Regulations 2001 (SI 2001/2256)). A "Yes" in the column headed "Removed" indicates that the *FCA* has removed the right of action under section 138D(3) of the *Act*. If so, a reference to the rule in which it is removed is also given.
3. The column headed "For other person" indicates whether the rule may be actionable by a person other than a private person (or his fiduciary or representative) under article 6(2) and (3) of those Regulations. If so, an indication of the type of person by whom the rule may be actionable is given.

Chapter/Appendix	Section/Annex	Right of action under section 138D		
		For private person	Removed	For other person
All rules in <i>GENPRU</i>		No	Yes - GENPRU 1.4.1 R	No

General Prudential sourcebook

Schedule 6 Rules that can be waived

G

FCA PRA

The rules in *GENPRU* may be waived by the *appropriate regulator* under section 138A of the *Act* (Modification or waiver of rules). However, if the *rules* incorporate requirements laid down in European directives, it will not be possible for the *appropriate regulator* to grant a *waiver* that would be incompatible with the *United Kingdom's* responsibilities under those directives. It therefore follows that if a *rule* in *GENPRU* contains provisions which derive partly from a directive, and partly not, the *appropriate regulator* will be able to consider a *waiver* of the latter requirements only, unless the directive provisions are optional rather than mandatory.

Chapter 1

Application

1.1 Application

1.1.1

FCA **PRA**

G

There is no overall application statement for *BIPRU*. Each chapter or section has its own application statement. Broadly speaking however, *BIPRU* applies to:

- (1) a *bank*;
- (2) a *building society*;
- (3) a *BIPRU investment firm*; and
- (4) groups containing such *firms*.

1.1.2

FCA **PRA**

R

***BIPRU* applies to a *firm* in relation to the whole of its business, except where a particular provision provides for a narrower scope.**

1.1.3

FCA **PRA**

G

In the main *BIPRU* only applies to a *UCITS investment firm* in respect of *designated investment business* (excluding *scheme management activity*). However **■** BIPRU 2.2 (Internal capital adequacy standards), **■** BIPRU 2.3 (Interest rate risk in the non-trading book), **■** BIPRU 8 (Group risk - consolidation) and **■** BIPRU 11 (Disclosure) apply to the whole of its business.

Purpose

1.1.4

FCA **PRA**

G

■ BIPRU 1.1 implements in part Articles 3(1)(b), 5, 9, 10 and 20 of the *Capital Adequacy Directive*.

Guidance on the categorisation of BIPRU investment firms

1.1.5

FCA **PRA**

G

Guidance on the categorisation of *investment firms* for the purposes of *BIPRU* and *GENPRU* is included in **■** PERG 13 (Guidance on the scope of the Markets in Financial Instruments Directive and the recast Capital Adequacy Directive).

The definition of a BIPRU firm

1.1.6

FCA **PRA**

R

Subject to **■** BIPRU 1.1.7 R, a *BIPRU firm* means a *firm* that is:

- (1) a *building society*; or
- (2) a *bank*; or

- (3) a *full scope BIPRU investment firm*; or
- (4) a *BIPRU limited licence firm*; or
- (5) a *BIPRU limited activity firm*.

1.1.7

FCA PRA

R

None of the following is a *BIPRU firm* and each of the following is excluded from each of the categories of *BIPRU investment firm* listed in

■ BIPRU 1.1.6 R (3) to ■ BIPRU 1.1.6R (5) and ■ BIPRU 1.1.18 R (2) to ■ (4):

- (1) an *incoming EEA firm*;
- (2) an *incoming Treaty firm*;
- (3) any other *overseas firm*;
- (4) an *ELMI*;
- (5) an *insurer*; and
- (6) an *ICVC*.

1.1.8

FCA PRA

R

A *firm* falling within ■ BIPRU 1.1.6 R (3) to ■ BIPRU 1.1.6R (5) is a *BIPRU investment firm*. A *BIPRU investment firm* includes a *UCITS investment firm* that is not excluded under ■ BIPRU 1.1.7 R.

1.1.9

FCA PRA

G

EEA firms are subject to the prudential standards of their home state regulator. But the *Banking Consolidation Directive* permits a host state *competent authority* to require a *BCD credit institution* to meet certain standards relating to its liquidity. The *appropriate regulator's* approach to liquidity for such *firms* is set out in ■ BIPRU 12.

1.1.10

FCA PRA

G

- (1) This paragraph applies to an *undertaking* that would be a *third country BIPRU firm* if it were *authorised* under the *Act*.
- (2) Except in exceptional circumstances, it is the *appropriate regulator's* policy that it will not give an overseas applicant a *Part 4A permission* unless the *appropriate regulator* is satisfied that the applicant will be subject to prudential regulation by its home state *regulatory body* that is broadly equivalent to that provided for in the *Handbook* and the applicable *EEA prudential sectoral legislation*. The *appropriate regulator* will take into account not only the requirements to which the *firm* is subject but how they are enforced. The *appropriate regulator* will also take into account the laws, regulations and administrative provisions to which it is subject in its home state. The reasons for that policy include:
 - (a) it is unlikely that a *firm* that is not subject to equivalent supervision will be able to satisfy the *threshold conditions* (and in particular *threshold condition 5* (Suitability)) and it is unlikely that it will be possible to establish that the *firm* does satisfy them;
 - (b) such a *firm* is likely to pose a threat to the interests of *consumers* and potential *consumers*, particularly as effective supervision of an *overseas firm* depends on cooperation between the *appropriate regulator* and the *regulatory body* that authorises the *firm* in its home country and on the

appropriate regulator being able to place appropriate reliance on the supervision carried out by such *regulatory body*; and

- (c) under Article 38(1) of the *Banking Consolidation Directive* the *appropriate regulator* should not apply to *branches* of *credit institutions* having their head office outside the *EEA*, when commencing or carrying on their business, provisions which result in more favourable treatment than that accorded to *branches* of *credit institutions* having their head office in the *EEA*.
- (3) If an *undertaking* is not subject to equivalent supervision in its home state and it wishes to carry on in the *United Kingdom regulated activities* coming within the scope of the activities that define a *BIPRU firm* it should establish a *subsidiary undertaking* in the *United Kingdom*. Such a *subsidiary undertaking* should be able to show, amongst other things, how it would comply with the *threshold conditions* (and in particular *threshold conditions* 3 (Close links) and 5 (Suitability)).
- (4) If in exceptional circumstances the *appropriate regulator* does grant a *Part 4A permission* to an *undertaking* that is not subject to equivalent prudential regulation the *appropriate regulator* is likely to take measures under the *regulatory system* to compensate for the lack of equivalent supervision. These may include applying the prudential requirements for *BIPRU firms* to the *firm*.
- (5) An *overseas firm* that is subject to equivalent supervision is subject to the *threshold conditions* and the *Principles*. *BIPRU* and *GENPRU* do not generally apply. However ■ *BIPRU 12* applies to a *credit institution* with respect to liquidity risk in relation to its *United Kingdom branch*.

Types of investment firm: Limited activity firms

1.1.11

FCA PRA

R

A *limited activity firm* means (as specified by Article 20(3) of the *Capital Adequacy Directive* (Exemptions from operational risk)) a *CAD investment firm* that satisfies the following conditions:

- (1) it meets the criteria in (a) or the criteria in (b):
- (a) *it deals on own account only*:
- (i) for the purpose of fulfilling or executing a client order; or
- (ii) for the purpose of gaining entrance to a clearing and settlement system or a *recognised investment exchange* or *designated investment exchange* when acting in an agency capacity or executing a client order; or
- (b) it satisfies the following conditions:
- (i) it does not hold client money or securities in relation to *investment services* that it provides and is not authorised to do so;

- (ii) the only *investment service* it undertakes is *dealing on own account*;
 - (iii) it has no external customers in relation to *investment services* it provides; and
 - (iv) the execution and settlement of its transactions in relation to *investment services* it provides takes place under the responsibility of a clearing institution and are guaranteed by that clearing institution;
- (2) (in the case of a *CAD investment firm* that is a *BIPRU investment firm*) its *base capital resources requirement* is €730,000;
 - (3) (in the case of a *CAD investment firm* that is an *EEA firm*) it is subject to the *CRD implementation measures* of its *Home State* for Article 9 of the *Capital Adequacy Directive* (Initial capital requirement of €730,000); and
 - (4) (in the case of any other *CAD investment firm*) its *base capital resources requirement* would be €730,000 if it had been a *BIPRU investment firm* on the basis of the assumptions in
 - BIPRU 1.1.14 R (3)(a) and ■ BIPRU 1.1.14 R (3)(b).

Types of investment firm: Limited licence firms

1.1.12

FCA PRA

R

A *limited licence firm* means (as specified by Article 20(2) of the *Capital Adequacy Directive* (Exemptions from operational risk)) a *CAD investment firm* that is not authorised to:

- (1) *deal on own account*; or
- (2) provide the investment services of underwriting or placing *financial instruments* (as referred to in point 6 of Section A of Annex I of *MiFID*) on a firm commitment basis.

Types of investment firm: CAD full scope firm

1.1.13

FCA PRA

R

A *CAD full scope firm* means a *CAD investment firm* that is not a *limited activity firm* or a *limited licence firm*.

Types of investment firm: CAD investment firm

1.1.14

FCA PRA

R

- (1) In accordance with Article 3(1)(b) of the *Capital Adequacy Directive*, a *person* is a *CAD investment firm* if it falls into (2) or (3).
- (2) A *person* whose head office is in an *EEA State* is a *CAD investment firm* if it is an *investment firm* that is subject to the requirements imposed by *MiFID* but excludes the following:
 - (a) a *bank*, a *building society* or an *ELMI*;

- (b) a *credit institution*;
- (c) a *local*; and
- (d) an *exempt CAD firm*.

(3) An *investment firm* whose head office is not in an *EEA State* is a *CAD investment firm* if it would have fallen into (2) if:

- (a) its head office had been in an *EEA State*; and
- (b) it had carried on all its business in the *EEA* and had obtained whatever authorisations for doing so are required under *MiFID*.

1.1.15

FCA PRA

G

The following are excluded from the definition of a *CAD investment firm* and hence from the definition of *BIPRU investment firm* :

- (1) an *investment firm* to which *MiFID* does not apply under Article 2(1); and
- (2) an *investment firm* with the benefit of an exemption pursuant to Article 3 of *MiFID*.

Types of investment firm: Exempt CAD firm

1.1.16

FCA PRA

R

In accordance with Article 3(1)(b)(iii) of the *Capital Adequacy Directive* (Definitions), an *exempt CAD firm* means an *investment firm* that satisfies the following conditions:

- (1) it would have been a *CAD investment firm* if *exempt CAD firms* were not excluded from the definition; and
- (2) it is only authorised to provide the service of investment advice and/or receive and transmit orders from investors (as referred to in Section A of Annex I of *MiFID*) without in both cases holding money or securities belonging to its clients and which for that reason may not at any time place itself in debit with its clients.

Types of BIPRU investment firm

1.1.17

FCA PRA

R

- (1) A *BIPRU limited licence firm* means a *limited licence firm* that falls into (4).
- (2) A *BIPRU limited activity firm* means a *limited activity firm* that falls into (4).
- (3) A *full scope BIPRU investment firm* means a *CAD full scope firm* that falls into (4).
- (4) A *limited licence firm*, *limited activity firm* or *CAD full scope firm* falls into (4) if:

- (a) it is a *firm*; and
- (b) its head office is in the *United Kingdom* and it is not otherwise excluded from the definition of *BIPRU firm* under
 - BIPRU 1.1.7 R.

Alternative classification of BIPRU investment firms

1.1.18

FCA PRA

R

BIPRU investment firm are divided into the following classes for the purposes of the calculation of the *base capital resources requirement* and for the purpose of any other provision of the *Handbook* that applies this classification:

- (1) a *UCITS investment firm*;
- (2) a *BIPRU 50K firm*;
- (3) a *BIPRU 125K firm*; and
- (4) a *BIPRU 730K firm*.

Types of investment firm: BIPRU 125K firm

1.1.19

FCA PRA

R

A *BIPRU 125K firm* means a *BIPRU investment firm* that satisfies the following conditions:

- (1) it does not:
 - (a) *deal on own account*; or
 - (b) underwrite issues of *financial instruments* (as referred in Section A of Annex I of *MiFID*) on a firm commitment basis;
- (2) it holds clients' money or securities in relation to *investment services* it provides or is authorised to do so;
- (3) it offers one or more of the following services (all as referred to in Section A of Annex I of *MiFID*):
 - (a) reception and transmission of investors' orders for *financial instruments*; or
 - (b) the execution of investors' orders for *financial instruments*; or
 - (c) the management of individual portfolios of investments in *financial instruments*;
- (4) it is not a *UCITS investment firm* and;
- (5) it does not operate a *multilateral trading facility*.

1.1.20

FCA PRA

R

Types of investment firm: BIPRU 50K firm

A *BIPRU 50K firm* means a *BIPRU investment firm* that satisfies the following conditions:

- (1) it satisfies the conditions in ■ BIPRU 1.1.19 R (1) and ■ (3);
- (2) it does not hold clients' money or securities in relation to *investment services* it provides and it is not authorised to do so;
- (3) it is not a *UCITS investment firm*; and
- (4) it does not operate a *multilateral trading facility*.

1.1.21

FCA PRA

R

Types of investment firm: 730K firm

A *BIPRU investment firm* that is not a *UCITS investment firm*, a *BIPRU 50K firm* or a *BIPRU 125K firm* is a *BIPRU 730K firm*. A *BIPRU investment firm* that operates a *multilateral trading facility* is a *BIPRU 730K firm*.

1.1.22

FCA PRA

R

Types of investment firm: Part 4A permission

A *firm* also falls into one of the categories of *BIPRU investment firm* listed in ■ BIPRU 1.1.6 R (3) to ■ (5) or ■ BIPRU 1.1.18 R if its *Part 4A permission* contains a *requirement* that it comply with the *rules* in *GENPRU* and *BIPRU* applicable to that category of *firm*. If a *firm* is subject to such a *requirement* and it would otherwise also fall into another category of *BIPRU investment firm* it does not fall into that other category.

1.1.23

FCA PRA

R

Meaning of dealing on own account

- (1) *Dealing on own account* means (for the purpose of *GENPRU* and *BIPRU*) the service of dealing in any *financial instruments* for own account as referred to in point 3 of Section A of Annex I to *MiFID*, subject to (2) and (3).
- (2) In accordance with article 5(2) of the *Capital Adequacy Directive* (Definition of dealing on own account), a *CAD investment firm* that executes investors' orders for *financial instruments* and holds such *financial instruments* for its own account does not for that reason *deal on own account* if the following conditions are met:
 - (a) such *position* only arise as a result of the *CAD investment firm's* failure to match investors' orders precisely;
 - (b) the total market value of all such *positions* is no higher than 15% of the *CAD investment firm's initial capital*;
 - (c) (in the case of a *BIPRU investment firm*) it complies with the *main BIPRU firm Pillar 1 rules* and ■ BIPRU 10 (Large exposures requirements);

- (d) (in the case of a *CAD investment firm* that is an *EEA firm*) it complies with the *CRD implementation measures* of its *Home State* for Articles 18 and 20 (Minimum capital requirements) and 28 (Large exposures) of the *Capital Adequacy Directive*;
 - (e) (in the case of any other *CAD investment firm*) it would comply with the *rules* in (2)(c) if it had been a *BIPRU investment firm* on the basis of the assumptions in ■ BIPRU 1.1.14 R (3)(a) and ■ BIPRU 1.1.14R (3)(b); and
 - (f) such *positions* are incidental and provisional in nature and strictly limited to the time required to carry out the transaction in question.
- (3) In accordance with Article 5(2) of the *Capital Adequacy Directive*, the holding of *non-trading book positions* in *financial instruments* in order to invest *capital resources* is not *dealing on own account* for the purposes referred to in ■ BIPRU 1.1.18 R.

Interpretation of the definition of types of firm and undertaking

1.1.24

FCA PRA

R

For the purposes of the definitions in ■ BIPRU 1.1, a *person* does any of the activities referred to in ■ BIPRU 1.1 if:

- (1) it does that activity anywhere in the world; or
- (2) if its *permission* includes that activity; or
- (3) (in the case of an *EEA firm*) it is authorised by its *Home State regulator* to do that activity; or
- (4) (if the carrying on of that activity is prohibited in a state or territory without an authorisation in that state or territory) that *firm* has such an authorisation.

1.1.25

FCA PRA

R

For the purposes of the definitions in ■ BIPRU 1.1, a *person* offers any of the services referred to in ■ BIPRU 1.1.19 R (3)if:

- (1) it offers that service anywhere in the world; or
- (2) any of ■ BIPRU 1.1.24 R (1) to ■ BIPRU 1.1.24R (4) apply.

1.1.26

FCA PRA

R

For the purposes of the definitions in ■ BIPRU 1.1, a *person* has an authorisation to do any of the activities referred to in ■ BIPRU 1.1 if any of ■ BIPRU 1.1.24 R (2) to ■ (4) apply.

1.2 Definition of the trading book

Application

1.2.1 **R** This section applies to a *BIPRU firm*.

FCA **PRA**

Purpose

1.2.2 **G** This section implements certain provisions of the *Capital Adequacy Directive* and the *Banking Consolidation Directive* relating to the *trading book*. The precise provisions being implemented are listed as a note after each *rule*.

FCA **PRA**

Definition of the trading book: General

1.2.3 **R** The *trading book* of a *firm* consists of all *position* in *CRD financial instrument* and *commodities* held either with trading intent or in order to hedge other elements of the *trading book* and which are either free of any restrictive covenants on their tradability or able to be hedged.

FCA **PRA**

[Note: CAD Article 11(1)]

Definition of the trading book: Positions

1.2.4 **R** The term *position* includes proprietary positions and positions arising from client servicing and market making.

FCA **PRA**

[Note: CAD Article 11(2) second sentence]

1.2.5 **G** *Positions* arising from client servicing include those arising out of contracts where a *firm* acts as principal (even in the context of activity described as 'broking' or 'customer business'). Such *positions* should be allocated to a *firm's trading book* if the intent is trading (see ■ BIPRU 1.2.10 R). This applies even if the nature of the business means that generally the only risks incurred by the *firm* are counterparty risks (i.e. no market risk charges apply). If the nature of the business means that generally the only risks incurred by the *firm* are counterparty risks, the *position* will generally still meet the trading intent requirement in ■ BIPRU 1.2.10 R if the *position* would meet the trading intent requirement if *position* risk did arise. The *appropriate regulator* understands that business carried out under International Uniform Brokerage Execution ("Give-Up") Agreements involve back to back trades as principal. Thus *positions* arising out of business carried out under such agreements should be allocated to a *firm's trading book*.

FCA **PRA**

Definition of the trading book: Repos

1.2.6

FCA PRA

R

Term trading-related repo-style transactions that a *firm* accounts for in its *non-trading book* may be included in the *trading book* for capital requirement purposes so long as all such repo-style transactions are included. For this purpose, trading-related repo-style transactions are defined as those that meet the requirements of ■ BIPRU 1.2.4 R, ■ BIPRU 1.2.10 R and ■ BIPRU 1.2.12 R, and both legs are in the form of either cash or securities includable in the *trading book*. Regardless of where they are booked, all repo-style transactions are subject to a *non-trading book* counterparty credit risk charge.

[Note: CAD Annex VII Part D point 4]

1.2.6A

FCA PRA

G

Capital requirements for term trading-related repo-style transactions are the same whether the risks arise in the *trading book* as counterparty credit risk or in the *non-trading book* as credit risk.

CRD financial instruments

1.2.7

FCA PRA

R

A *CRD financial instrument* means any contract that gives rise to both a financial asset of one party and a financial liability or equity instrument of another party.

[Note: CAD Article 3(1)(e)]

1.2.8

FCA PRA

R

CRD financial instruments include both primary *CRD financial instrument* or cash instruments, and derivative *CRD financial instruments* the value of which is derived from the price of an underlying *CRD financial instrument*, a rate, an index or the price of another underlying item and include as a minimum the instruments specified in Section C of Annex I to the *MIFID*.

[Note: CAD Article 3(1) last paragraph]

1.2.9

FCA PRA

G

Generally, for the purpose of the definition of *CRD financial instrument*:

- (1) a financial asset means cash, the right to receive cash or another financial asset, the contractual right to exchange financial assets on potentially favourable terms or an equity instrument; and
- (2) a financial liability means the contractual obligation to deliver cash or another financial asset or to exchange financial liabilities under conditions that are potentially unfavourable.

Trading intent

1.2.10

FCA PRA

R

Positions held with trading intent for the purpose of the definition of the *trading book* are those held intentionally for short-term resale and/or with the intention of benefiting from actual or expected short-term price

differences between buying and selling prices, or from other price or interest rate variations.

[Note: CAD Article 11(2) first sentence]

1.2.11

FCA PRA

R

Trading intent must be evidenced on the basis of the strategies, policies and procedures set up by the *firm* to manage the *position* or portfolio in accordance with ■ BIPRU 1.2.12 R.

[Note: CAD 11(3)]

1.2.12

FCA PRA

R

Positions/portfolios held with trading intent must comply with the following requirements:

- (1) there must be a clearly documented trading strategy for the *position*/instrument or portfolios, approved by senior management, which must include the expected holding horizon;
- (2) there must be clearly defined policies and procedures to monitor the *position* against the *firm's* trading strategy including the monitoring of turnover and stale *position* in the *firm's trading book*; and
- (3) there must be clearly defined policies and procedures for the active management of the *position*, which must include the following:
 - (a) *position* entered into on a trading desk;
 - (b) *position* limits are set and monitored for appropriateness;
 - (c) dealers have the autonomy to enter into/manage the *position* within agreed limits and according to the approved strategy;
 - (d) *positions* are reported to senior management as an integral part of the *firm's* risk management process; and
 - (e) *positions* are actively monitored with reference to market information sources and an assessment made of the marketability or hedge-ability of the *position* or its component risks, including the assessment of, the quality and availability of market inputs to the valuation process, level of market turnover, sizes of *positions* traded in the market.

[Note: CAD Annex VII Part A]

Internal hedges

1.2.13

FCA PRA

R

Internal hedges may be included in the *trading book*, in which case ■ BIPRU 1.2.14 R to ■ BIPRU 1.2.16 R apply.

[Note: CAD Article 11(5)]

1.2.14

FCA PRA

R

(1) An internal hedge is a *position* that materially or completely offsets the component risk element of a *non-trading book position* or a set of *position*. *Positions* arising from internal hedges are eligible for *trading book* capital treatment, provided that they are held with trading intent and that the general criteria on trading intent and prudent valuation specified in ■ BIPRU 1.2.12 R and the *trading book systems and controls rules*. In particular:

- (a) internal hedges must not be primarily intended to avoid or reduce capital requirements;
- (b) internal hedges must be properly documented and subject to particular internal approval and audit procedures;
- (c) the internal transaction must be dealt with at market conditions;
- (d) the bulk of the market risk that is generated by the internal hedge must be dynamically managed in the *trading book* within the authorised limits; and
- (e) internal transactions must be carefully monitored.

(2) Monitoring must be ensured by adequate procedures.

[Note: CAD Annex VII Part C point 1]

1.2.15

FCA PRA

R

The treatment referred to in ■ BIPRU 1.2.14 R applies without prejudice to the capital requirements applicable to the "*non-trading book leg*" of the internal hedge.

[Note: CAD Annex VII Part C point 2]

1.2.16

FCA PRA

R

By way of derogation from ■ BIPRU 1.2.14 R to ■ BIPRU 1.2.15 R, when a *firm* hedges a *non-trading book* credit risk exposure using a credit derivative booked in its *trading book* (using an internal hedge), the *non-trading book* exposure is not deemed to be hedged for the purposes of calculating capital requirements unless the *firm* purchases from an eligible third party protection provider a credit derivative meeting the requirements set out in ■ BIPRU 5.7.13 R (Additional requirements for credit derivatives) with regard to the *non-trading book* exposure. Without prejudice to the second sentence of ■ BIPRU 14.2.10 R, where such third party protection is purchased and is recognised as a hedge of a *non-trading book* exposure for the purposes of calculating capital requirements, neither the internal nor external credit

derivative hedge must be included in the *trading book* for the purposes of calculating capital requirements.

[Note: CAD Annex VII Part C point 3]

Size thresholds

1.2.17

FCA PRA

R

- (1) Subject to (3), a *firm* may calculate its capital requirements for its *trading book* business in accordance with the *standardised approach* to credit risk (or, if it has an *IRB permission*, the *IRB approach*) as it applies to the *non-trading book* where the size of the *trading book* business meets the following requirements:
 - (a) the *trading book* business of the *firm* does not normally exceed 5% of its total business;
 - (b) its total *trading book position* do not normally exceed €15 million; and
 - (c) the *trading book* business of the *firm* never exceeds 6% of its total business and its total *trading book positions* never exceed €20 million.
- (2) Subject to (3), if (1) applies, the following are disapplied:
 - (a) the *rules* relating to the *interest rate PRR*, the *equity PRR*, the *CIU PRR* and the *PRR* calculated under ■ BIPRU 7.11 (Credit derivatives in the trading book);
 - (b) the *rules* relating to the *option PRR* (but only in relation to *positions* which under ■ BIPRU 7.6.5 R (Table: Appropriate calculation for an option or warrant) may be subject to one of the other *PRR charges* listed in (2)(a) or which would be subject to such a *PRR charge* if ■ BIPRU 7.6.5 R did not require an *option PRR* to be calculated);
 - (c) ■ ■ BIPRU 7.10 (Use of a Value at Risk Model) so far as ■ BIPRU 7.10 relates to the risks covered by the requirements in (a) and (b); and
 - (d) ■ BIPRU 14 (Capital requirements for settlement and counterparty risk).
- (3) If (1) applies, the following continue to apply:
 - (a) the *rules* relating to the *commodity PRR* and the *foreign currency PRR*;
 - (b) the *rules* relating to the *option PRR* (so far as not disapplied under (2)(b));
 - (c) ■ BIPRU 7.10 (so far as not disapplied under (2)(c));
 - (d) ■ BIPRU 14.2.3 R to ■ BIPRU 14.2.8 R (Credit derivatives); and

- (e) ■ BIPRU 14.2.15 R to ■ BIPRU 14.2.16 R (Collateral for *repurchase transactions* and other products).

[Note: CAD Article 18(2)]

1.2.18

FCA PRA

R

In order to calculate the proportion that *trading book* business bears to total business for the purpose of ■ BIPRU 1.2.17 R (1)(a) to ■ BIPRU 1.2.17R (1)(c) the *firm* must refer to the size of the combined on- and off-balance-sheet business. For this purpose, debt instruments must be valued at their market prices or their principal values, equities at their market prices and derivatives according to the nominal or market values of the instruments underlying them. Long *positions* and short *positions* must be summed regardless of their signs.

[Note: CAD Article 18(3)]

1.2.19

FCA PRA

R

If a *firm* should happen for more than a short period to exceed either or both of the limits imposed in ■ BIPRU 1.2.17 R (1)(a) and ■ BIPRU 1.2.17R (1)(b) or either or both of the limits imposed in ■ BIPRU 1.2.17 R (1)(c):

- (1) ■ BIPRU 1.2.17 R ceases to apply; and
- (2) the *firm* must notify the *appropriate regulator*.

[Note: CAD Article 18(4)]

1.2.20

FCA PRA

G

As required by ■ BIPRU 8.7.21 R (Special rules for the consolidated market risk requirement), a *firm* should consider whether it meets the threshold conditions in ■ BIPRU 1.2.17 R on both an unconsolidated (or solo) basis and a consolidated basis. If a *firm's* trading activities on both an unconsolidated (or solo) basis and a consolidated basis are below the threshold size, it may be appropriate for the *firm* not to adopt the *trading book* treatment. However, even if the *firm* does not apply the *trading book* treatment it should still adopt a *trading book policy statement*. That statement may be restricted to identifying the activities the *firm* normally considers to be trading and that would constitute part of its *trading book*. The *firm* should use this policy statement to help it to decide whether or not adopting the *trading book* treatment is appropriate.

Systems and controls for the trading book

1.2.21

FCA PRA

R

A *firm* must implement policies and processes for the measurement and management of all material sources and effects of market risks.

[Note: BCD Annex V, Part 7 point 10]

1.2.22

FCA PRA

R

A *firm* must establish and maintain systems and controls to manage its *trading book*, in accordance with the *trading book systems and controls rules*, ■ BIPRU 1.2.6 R (Definition of the trading book: Repos) and the *overall financial adequacy rule* to ■ BIPRU 1.2.27 R (Trading book policy statements).

1.2.23

FCA PRA

R

[Note: CAD Article 11(4)]

A *firm* must establish and maintain systems and controls sufficient to provide prudent and reliable valuation estimates.

[Note: CAD Annex VII Part B point 1]

1.2.24

FCA PRA

R

Systems and controls must include at least the following elements:

- (1) documented policies and procedures for the process of valuation (including clearly defined responsibilities of the various areas involved in the determination of the valuation, sources of market information and review of their appropriateness, frequency of independent valuation, timing of closing prices, procedures for adjusting valuations, month end and ad-hoc verification procedures); and
- (2) reporting lines for the department accountable for the valuation process that are clear and independent of the front office.

[Note: CAD Annex VII Part B point 2]

1.2.25

FCA PRA

R

The reporting line in relation to the matters covered by ■ BIPRU 1.2.21 R to ■ BIPRU 1.2.24 R must ultimately be to an executive *director* on the *firm's governing body*.

[Note: CAD Annex VII Part B point 2 (last sentence)]

Trading book policy statements

1.2.26

FCA PRA

R

A *firm* must have clearly defined policies and procedures for determining which *positions* to include in the *trading book* for the purposes of calculating its capital requirements, consistent with the criteria set out in ■ BIPRU 1.2.3 R to ■ BIPRU 1.2.4 R, ■ BIPRU 1.2.10 R to ■ BIPRU 1.2.11 R, ■ BIPRU 1.1.13 R and ■ BIPRU 1.2.22 R and taking into account the *firm's* risk management capabilities and practices. Compliance with these policies and procedures must be fully documented and subject to periodic internal audit.

[Note: CAD Annex VII Part D point 1]

1.2.27

FCA PRA

R

A *firm* must have clearly defined policies and procedures for overall management of the *trading book*. At a minimum these policies and procedures must address:

- (1) the activities the *firm* considers to be trading and as constituting part of the *trading book* for capital requirement purposes;
- (2) the extent to which a *position* can be marked-to-market daily by reference to an active, liquid two-way market;

- (3) for *positions* that are marked-to-model, the extent to which the *firm* can:
 - (a) identify all material risks of the *position*;
 - (b) hedge all material risks of the *position* with instruments for which an active, liquid two-way market exists; and
 - (c) derive reliable estimates for the key assumptions and parameters used in the model;
- (4) the extent to which the *firm* can, and is required to, generate valuations for the *position* that can be validated externally in a consistent manner;
- (5) the extent to which legal restrictions or other operational requirements would impede the *firm's* ability to effect a liquidation or hedge of the *position* in the short term;
- (6) the extent to which the *firm* can, and is required to, actively risk manage the *position* within its trading operation; and
- (7) the extent to which the *firm* may transfer risk or *positions* between the *non-trading book* and *trading book* and the criteria for such transfers.

[Note: CAD Annex VII Part D point 2]

1.2.28

FCA PRA

G

The policies and procedures referred to in ■ BIPRU 1.2.27 R (1) should cover:

- (1) the *CRD financial instrument* and *commodities* that the *firm* proposes to trade in, including the currencies, maturities, issuers and quality of issues; and
- (2) any instruments to be excluded from its *trading book*.

1.2.29

FCA PRA

R

- (1) The policies and procedures referred to in the *overall financial adequacy rule* and ■ BIPRU 1.2.27 R must be recorded in a single written document. A *firm* may record those policies and procedures in more than one written document if the *firm* has a single written document that identifies:
 - (a) all those other documents; and
 - (b) the parts of those documents that record those policies and procedures.
- (2) A *trading book policy statement* means the single document referred to in this *rule*.

1.2.30

FCA PRA

R

- (1) A *firm* must notify the *appropriate regulator* as soon as is reasonably practicable when it adopts a *trading book policy statement*.
- (2) A *firm* must notify the *appropriate regulator* as soon as is reasonably practicable if the *trading book policy statement* is subject to significant changes.

1.2.31

FCA PRA

G

A significant change for the purpose of the *overall Pillar 2 rule* includes new types of customers or business requiring different funding or provisioning.

1.2.32

FCA PRA

G

There is likely to be an overlap between what the *trading book policy statement* should contain and other documents such as dealing or treasury manuals. A cross reference to the latter in the *trading book policy statement* is adequate and material in other documents need not be set out again in the *trading book policy statement*. However where this is the case the matters required to be included in the *trading book policy statement* should be readily identifiable.

1.2.33

FCA PRA

G

The *trading book policy statement* may be prepared on either a consolidated or a solo (or solo-consolidated) basis. It should be prepared on a consolidated basis when a group either manages its trading risk centrally or employs the same risk management techniques in each group member. A *trading book policy statement* prepared on a consolidated basis should set out how it applies to each *firm* in the group and should be approved by each such *firm's governing body*.

Treatments common to the trading book and the non-trading book

1.2.34

FCA PRA

G

Capital requirements for *foreign currency risk* and *commodity position risk* are the same whether the risk arises in the *trading book* or the *non-trading book*. The calculation of capital requirements for *foreign currency risk* is set out in ■ BIPRU 7.5. The calculation of capital requirements for *commodity position risk* is set out in ■ BIPRU 7.4.

Trading book treatments

1.2.35

FCA PRA

G

All *positions* that are in a *firm's trading book* require capital to cover *position risk* and may require capital to cover counterparty credit risk and to cover large exposures. Counterparty credit risk in the *trading book* is dealt with by ■ BIPRU 14 and capital for *large exposures* is covered by ■ BIPRU 10.

Non-trading book treatments

1.2.36

FCA PRA

G

All *positions* that are not in a *firm's trading book* are included in its *non-trading book* and subject capital requirements for the *non-trading book* unless they are deducted from *capital resources* under GENPRU 2.2 (Capital resources).

1.3 Applications for advanced approaches and waivers

Application

1.3.1

FCA PRA

R

This section of the *Handbook* applies to every *BIPRU firm* that wishes to apply for a permission to use any of the approaches set out in ■ BIPRU 1.3.2 G.

Purpose

1.3.2

FCA PRA

G

- (1) A *firm* may apply for an *Article 129 permission* or a *waiver* in respect of:
 - (a) the *IRB approach*;
 - (b) the *advanced measurement approach*;
 - (c) the *CCR internal model method*; and
 - (d) the *VaR model approach*.
- (2) A *firm* should apply for a *waiver* if it wants to:
 - (a) apply the *CAD 1 model approach*; or
 - (b) apply the *master netting agreement internal models approach*; or
 - (c) disapply consolidated supervision under ■ BIPRU 8 for its *UK consolidation group* or *non-EEA sub-group*; or
 - (d) apply the treatment in ■ BIPRU 2.1 (Solo-consolidation waiver); or
 - (da) apply the treatment for a *core UK group* in ■ BIPRU 3.2.25 R (Zero risk-weighting for intra-group exposures) or in ■ BIPRU 10.8A (Intra-group exposures: core UK group); or
 - (e) apply the treatment for a *non-core large exposures group* in ■ BIPRU 10.9A (Intra-group exposures: non-core large exposures group); or
 - (f) apply the treatment in ■ BIPRU 10.6.35 R (Sovereign large exposure waiver).

Article 129

1.3.3

FCA PRA

G

An *EEA parent institution* and its *subsidiary undertakings* or the *subsidiary undertakings* of its *EEA parent financial holding company* that wish to use any of the approaches listed in ■ BIPRU 1.3.2 G (1) in respect of its group, including members of its group that are *BIPRU firms*, may apply for an *Article 129 permission*.

1.3.4 FCA PRA G The *Article 129 procedure* allows an *EEA parent institution* and its *subsidiary undertakings* or the *subsidiary undertakings* of its *EEA parent financial holding company* to apply for permission to use the approaches in ■ BIPRU 1.3.2 G (1) without making separate applications to the *competent authority* of each *EEA State* where members of a *firm's* group are authorised.

1.3.5 FCA PRA G The *Capital Requirements Regulations 2006* set out the *Article 129 procedure*.

1.3.6 FCA PRA G Where a *firm* or its group has been granted an *Article 129 permission*, each *competent authority*, including the lead *competent authority*, will need to take action to apply that *Article 129 permission* to the *institutions* that they authorise. Part 3 of the *Capital Requirements Regulations 2006* governs how the *appropriate regulator* will take that action, whether or not the *appropriate regulator* is the lead *competent authority*.

Article 129 permissions and waivers - specific conditions

1.3.7 FCA PRA D When an *advanced measurement approach* is intended to be used by an *EEA parent institution* and its *subsidiary undertakings* or the *subsidiary undertakings* of an *EEA parent financial holding company*, the application of a *firm* in accordance with ■ BIPRU 1.3.14 D must include the elements listed in ■ BIPRU 6.5.5 R (Minimum standards for the advanced measurement approach).

[Note:BCD Article 105(2)]

1.3.8 FCA PRA D When an *advanced measurement approach* is intended to be used by an *EEA parent institution* and its *subsidiary undertakings* or the *subsidiary undertakings* of an *EEA parent financial holding company*, the application of a *firm* must include a description of the methodology used for allocating *operational risk* capital between the different entities of the group.

[Note: BCD annex X Part 3 point 30]

1.3.9 FCA PRA D For the purposes of ■ BIPRU 1.3.8 D, the application of a *firm* must indicate whether and how diversification effects are intended to be factored in the risk measurement system.

[Note: BCD annex X Part 3 point 31]

Waiver - general

1.3.10 FCA PRA G As explained in ■ SUP 8, under sections 138A and 138B of the *Act*, the *appropriate regulator* may not grant a *waiver* to a *firm* unless it is satisfied that:

- (1) compliance by the *firm* with the *rules*, or with the *rules* as modified, would be unduly burdensome or would not achieve the purpose for which the *rules* were made; and
- (2) the *waiver* would not result in undue risk to *persons* whose interests the *rules* are intended to protect.

1.3.11 FCA PRA G The conditions relating to the use of an approach listed in ■ BIPRU 1.3.2 G referred to in the relevant chapter of *BIPRU* are minimum standards. Satisfaction of those conditions does not automatically mean the *appropriate regulator* will grant a *waiver*

referred to in those paragraphs. The *appropriate regulator* will in addition also apply the tests in section 138A of the *Act*.

1.3.12

FCA PRA

G

In the *appropriate regulator's* view, if the minimum standards referred to in ■ BIPRU 1.3.11 G are satisfied, the conditions referred to in ■ BIPRU 1.3.10 G (1) will generally be met.

Forms and method of application

1.3.13

FCA PRA

D

Subject to ■ BIPRU 1.3.14 D to ■ BIPRU 1.3.20 D, if a *firm* wishes to apply for a *waiver* to apply an approach set out in ■ BIPRU 1.3.2 G, it must comply with ■ SUP 8.3.3 D.

1.3.14

FCA PRA

D

If a *firm* wishes to apply for a *waiver* or an *Article 129 permission* to use the *advanced measurement approach*, it must complete and submit the form in ■ BIPRU 1 Annex 1D D.

1.3.15

FCA PRA

D

If a *firm* wishes to apply for a *waiver* or an *Article 129 permission* to use the *IRB approach*, it must complete and submit the form in ■ BIPRU 1 Annex 2D D.

1.3.16

FCA PRA

D

If a *firm* wishes to apply for a *waiver* or an *Article 129 permission* to use the *CCR internal model method*, it must complete and submit the form in ■ BIPRU 1 Annex 3D D.

1.3.17

FCA PRA

D

Where a *firm* makes an application in accordance with ■ BIPRU 1.3.14 D, ■ BIPRU 1.3.15 D or ■ BIPRU 1.3.16 D, the *firm* must state on the application whether it is making an application for a *waiver* or an *Article 129 permission*.

1.3.18

FCA PRA

D

Where a *firm* applies for a *VaR model permission*, the *firm* must state whether it is making an application for a *waiver* or an *Article 129 permission*.

1.3.19

FCA PRA

G

In respect of the application for *waivers* to apply the approaches set out in ■ BIPRU 1.3.2 G (1), the *appropriate regulator* will aim to give decisions on applications as soon as practicable. However, the *appropriate regulator* expects that it will take a significant period to determine and give a decision due to the complexity of the issues raised by the applications. Details of timelines for applications for waivers to use advanced approaches and under the *Article 129 procedure* are set out on the *appropriate regulator* website.

1.3.20

FCA PRA

D

Where a *firm* applies for a *solo consolidation waiver*, it must demonstrate how each of the conditions set out in ■ BIPRU 2.1.20 R to ■ BIPRU 2.1.24 R are met and address the criteria set out in the *guidance* in ■ BIPRU 2.1.25 G as part of its application in accordance with ■ BIPRU 1.3.13 D.

1.3.21

FCA PRA

G

Before sending in an application for a *waiver* or *Article 129 permission*, a *firm* may find it helpful to discuss the application with its usual supervisory contact at the *appropriate regulator*. However, the *firm* should still ensure that all relevant information is included in the application.

1.4 Actions for damages

1.4.1

FCA PRA

R

A contravention of the *rules* in *BIPRU* does not give rise to a right of action by a *private person* under section 138D of the *Act* (and each of those *rules* is specified under section 138D(3) of the *Act* as a provision giving rise to no such right of action).

Chapter 2

Capital

2.1 Solo consolidation

Application

2.1.1 **R** This section applies to a *BIPRU firm* that has a *solo consolidation waiver*.
FCA **PRA**

Purpose

2.1.2 **G** The purpose of this section is to implement Articles 70 and 118 of the *Banking Consolidation Directive*. It also implements Articles 2 and 28 of the *Capital Adequacy Directive* so far as they apply those provisions of the *Banking Consolidation Directive* to *CAD investment firms*.
FCA **PRA**

2.1.3 **G** The *rules* in *GENPRU* and *BIPRU* do not allow a *firm* that is a *parent undertaking* to incorporate the capital and requirements of a *subsidiary undertaking* in the calculation of that *firm's capital resources* and *capital resources requirement*. A *firm* that wishes to incorporate a *subsidiary undertaking* for this purpose should therefore apply for a *solo consolidation waiver*.
FCA **PRA**

Applying for a solo consolidation waiver

2.1.4 **G** ■ **BIPRU 1.3** (Applications for advanced approaches) explains how to apply for a *solo consolidation waiver*.
FCA **PRA**

General

2.1.5 **G** The *appropriate regulator* will not grant a *firm* a *solo consolidation waiver* with respect to a *subsidiary undertaking* unless the *firm* and the *subsidiary undertaking* meet the standards in ■ **BIPRU 2.1.19 R** to ■ **BIPRU 2.1.24 R**.
FCA **PRA**

2.1.6 **G** A *solo consolidation waiver* will modify the relevant parts of *GENPRU*, *BIPRU* and *SYSC* referred to in ■ **BIPRU 2.1.7 R** to ■ **BIPRU 2.1.8 R** to apply ■ **BIPRU 2.1** to a *firm*.
FCA **PRA**

The basic rules for solo consolidation

2.1.7 **R** A *firm* that has a *solo consolidation waiver* must incorporate in the calculation of its requirements under the *main BIPRU firm Pillar 1 rules* and ■ **BIPRU 10** (Large exposure requirements) each *subsidiary undertaking* to which the *solo consolidation waiver* applies. This does not apply to the *base capital resources requirement*.
FCA **PRA**

2.1.8

FCA PRA

R

- (1) A *firm* that has a *solo consolidation waiver* must meet the obligations in ■ SYSC 12.1.13 R (Application of certain systems and controls *rules* on a consolidated basis) on a consolidated basis with respect to the *firm* and each *subsidiary undertaking* to which the *firm's solo consolidation waiver* applies.
- (2) If (1) applies, ■ SYSC 12.1.13 R applies to the group made up of the *firm* and its *subsidiary undertakings* referred to in (1) in the same way as it applies to a *UK consolidation group* or *non-EEA sub-group*.
- (3) If (1) applies, the provisions of SYSC and BIPRU listed in ■ SYSC 12.1.13 R do not apply to the *firm* on a solo basis.

Solo consolidation and capital and concentration risk requirements

2.1.9

FCA PRA

R

■ BIPRU 2.1.10 R to ■ BIPRU 2.1.18 R apply for the purposes of ■ BIPRU 2.1.7 R.

2.1.10

FCA PRA

R

A *firm* must treat itself and each *subsidiary undertaking* referred to in ■ BIPRU 2.1.7 R as a single *undertaking* and must apply, on that basis, ■ BIPRU 8 (Group risk - consolidation) to the group made up of the *firm* and such *subsidiary undertakings* in the same way as ■ BIPRU 8 applies to a *UK consolidation group* or *non-EEA sub-group*.

2.1.11

FCA PRA

R

Subject to ■ BIPRU 2.1.13 R, a *firm* must calculate its *capital resources* in accordance with ■ BIPRU 8.6 (Consolidated capital resources).

2.1.12

FCA PRA

R

A *firm* must calculate its *capital resources requirement* in accordance with ■ BIPRU 8.7.13 R (3) (Treating group members as a single undertaking for consolidation purposes).

2.1.13

FCA PRA

R

Where GENPRU applies a different method of calculating *capital resources* or *capital resources requirements* depending on the category into which the *firm* in question falls, the method that applies is the one that would apply to the *firm* on a solo basis.

2.1.14

FCA PRA

G

For example, the effect of ■ BIPRU 2.1.13 R is that if a *firm* that is applying ■ BIPRU 2.1 is a *limited licence firm* it should continue to apply the *capital resources* and *capital resources requirement* applicable to a *limited licence firm*.

2.1.15

FCA PRA

R

A *firm* must continue to calculate its *base capital resources requirement* and the requirement in ■ GENPRU 2.1.42 R (Calculation of capital resources requirement on authorisation) on a solo basis.

2.1.16

FCA PRA

R

A *firm* must apply ■ BIPRU 10 (Large exposure requirements) in accordance with ■ BIPRU 8.9A (Consolidated large exposures requirements). Accordingly the *firm* must apply ■ BIPRU 8.9A to the group made up of the *firm* and the *subsidiary undertakings* referred to in ■ BIPRU 2.1.7 R in the same way as ■ BIPRU 8.9A applies to a *UK consolidation group* or *non-EEA sub-group*.

<p>2.1.17 FCA PRA</p>	<p>G</p>	<p>One effect of ■ BIPRU 2.1.16 R is that ■ BIPRU 10.8A (Core UK groups) and ■ BIPRU 10.9A (Non-core large exposures groups) do not apply. The corresponding provisions of ■ BIPRU 8.9A (Consolidated large exposures requirements) apply instead.</p>
<p>2.1.18 FCA PRA</p>	<p>R</p>	<p>A <i>firm</i> must include in full any <i>subsidiary undertaking</i> in respect of which the <i>firm</i> applies ■ BIPRU 2.1 in the calculations under ■ BIPRU 2.1.7 R.</p>
<p>Minimum standards</p> <p>.....</p>		
<p>2.1.19 FCA PRA</p>	<p>R</p>	<p>A <i>firm</i> must not apply ■ BIPRU 2.1 to a <i>subsidiary undertaking</i> to which the <i>firm's solo consolidation waiver</i> applies ■ BIPRU 2.1 unless in addition it meets the conditions in ■ BIPRU 2.1.20 R to ■ BIPRU 2.1.24 R.</p>
<p>2.1.20 FCA PRA</p>	<p>R</p>	<p>The risk evaluation, measurement and control procedures of the <i>firm</i> must cover the <i>subsidiary undertaking</i> referred to in ■ BIPRU 2.1.19 R.</p>
<p>2.1.21 FCA PRA</p>	<p>R</p>	<p>The <i>firm</i> must hold more than 75% of the voting rights attaching to the <i>shares</i> in the capital of the <i>subsidiary undertaking</i> referred to in ■ BIPRU 2.1.19 R and must have the right to appoint or remove a majority of the members of the <i>governing body</i> of the <i>subsidiary undertaking</i>.</p>
<p>2.1.22 FCA PRA</p>	<p>R</p>	<p>The material <i>exposures</i> or material liabilities of the <i>subsidiary undertaking</i> referred to in ■ BIPRU 2.1.19 R must be to the <i>firm</i>.</p>
<p>2.1.23 FCA PRA</p>	<p>R</p>	<p>Where the <i>firm</i> is a <i>parent institution in a Member State</i>, it must have measures in place that ensure the satisfactory allocation of risks within the group consisting of the <i>firm</i> and each <i>subsidiary undertaking</i> to which ■ BIPRU 2.1 is applied.</p>
<p>2.1.24 FCA PRA</p>	<p>R</p>	<p>A <i>firm</i> must be able to demonstrate fully to the <i>appropriate regulator</i> the circumstances and arrangements, including legal arrangements, by virtue of which there are no material practical or legal impediments, and none are foreseen, to the prompt transfer of the <i>capital resources</i> of the <i>subsidiary undertaking</i> referred to in ■ BIPRU 2.1.19 R or repayment of liabilities when due by the <i>subsidiary undertaking</i> to the <i>firm</i>.</p>
<p>2.1.25 FCA PRA</p>	<p>G</p>	<p>The following are the criteria that the <i>appropriate regulator</i> will take into account when considering whether the condition in ■ BIPRU 2.1.24 R is going to be met:</p> <ol style="list-style-type: none"> (1) the speed with which funds can be transferred or liabilities repaid to the <i>firm</i> and the simplicity of the method for the transfer or repayment; (2) whether there are any interests other than those of the <i>firm</i> in the <i>subsidiary undertaking</i> and what impact those other interests may have on the <i>firm's</i> control over the <i>subsidiary undertaking</i> and on the ability of the <i>firm</i> to require a transfer of funds or repayment of liabilities;

- (3) whether the prompt transfer of funds or repayment of liabilities to the *firm* might harm the reputation of the *firm* or its *subsidiary undertakings*;
- (4) whether there are any tax disadvantages for the *firm* or the *subsidiary undertaking* as a result of the transfer of funds or repayment of liabilities;
- (5) whether there are any exchange controls that may have an impact on the transfer of funds or repayment of liabilities;
- (6) whether there are assets in the *subsidiary undertaking* available either to be transferred or liquidated for the purposes of the transfer of funds or repayment of liabilities;
- (7) whether any regulatory requirements impact on the ability of the *subsidiary undertaking* to transfer funds or repay liabilities promptly;
- (8) whether the purpose of the *subsidiary undertaking* prejudices the prompt transfer of funds or repayment of liabilities;
- (9) whether the legal structure of the *subsidiary undertaking* prejudices the prompt transfer of funds or repayment of liabilities;
- (10) whether the contractual relationships of the *subsidiary undertaking* with the *firm* and other third parties prejudices the prompt transfer of funds or repayment of liabilities;
- (11) whether past and proposed flows of funds between the *subsidiary undertaking* and the *firm* demonstrate the ability to make prompt transfer of funds or repayment of liabilities; and
- (12) whether the degree of solo consolidation by the *firm* undermines the *appropriate regulator's* ability to assess the soundness of the *firm* as a legal entity (taking into account any other *subsidiary undertakings* to which ■ BIPRU 2.1 is being applied).

2.1.26

FCA PRA

G

The effect of ■ BIPRU 2.1.19 R is that even though a *firm's solo consolidation waiver* applies ■ BIPRU 2.1 with respect to a *subsidiary undertaking*, the *firm* should not apply ■ BIPRU 2.1 with respect to that *subsidiary undertaking* unless in addition it meets the conditions in ■ BIPRU 2.1.20 R to ■ BIPRU 2.1.24 R.

2.1.27

FCA PRA

G

A *firm* should not apply ■ BIPRU 2.1 to a *subsidiary undertaking* to which the *firm's solo consolidation waiver* applies if it ceases to be a *subsidiary undertaking* of the *firm* even if the *solo consolidation waiver* is not varied by removing the *subsidiary undertaking*.

2.1.28

FCA PRA

G

If a *subsidiary undertaking* referred to in ■ BIPRU 2.1.27 G later becomes a *subsidiary undertaking* again the *firm* should not apply ■ BIPRU 2.1 to it unless the *solo consolidation waiver* is varied to re-apply it with respect to the *subsidiary undertaking*.

2.2 Internal capital adequacy standards

Application

2.2.1

FCA PRA

G

■ BIPRU 2.2 applies to a *BIPRU firm*.

Purpose

2.2.2

FCA PRA

G

(1) ■ BIPRU 2.2 sets out *guidance* on ■ GENPRU 1.2 (Adequacy of financial resources) so far as it applies to a *BIPRU firm*. In particular it sets out *guidance* on how a *firm* should carry out its *ICAAP*, as well as some factors the *appropriate regulator* will take into consideration when undertaking a *SREP*. The terms *ICAAP* and *SREP* are explained in ■ BIPRU 2.2.4 G.

■ BIPRU 2.2.41 R- ■ BIPRU 2.2.43 R are *rules* that apply to a *firm* with an *IRB permission*.

(2) ■ BIPRU 2.2 is for the most part written on the basis that ■ GENPRU 1.2 (Adequacy of financial resources) applies to a *firm* on a solo basis. However it is still relevant when ■ GENPRU 1.2 applies on a consolidated basis. When ■ GENPRU 1.2 applies on a consolidated basis, ■ BIPRU 2.2 should be read with appropriate adjustments.

Meaning of capital

2.2.3

FCA PRA

G

For the purpose of ■ BIPRU 2.2, "capital" refers to a *firm's* financial resources, *capital resources* and internal capital, all as referred to in the *overall Pillar 2 rule*.

The ICAAP and the SREP: Introduction

2.2.4

FCA PRA

G

The adequacy of a *firm's* capital needs to be assessed both by a *firm* and the *appropriate regulator*. This process involves:

- (1) an *internal capital adequacy assessment process (ICAAP)*, which a *firm* is obliged to carry out in accordance with the *ICAAP rules*; and
- (2) a *supervisory review and evaluation process (SREP)*, which is conducted by the *appropriate regulator*.

2.2.5

FCA PRA

G

The ICAAP and the SREP: The ICAAP

The obligation to conduct an *ICAAP*, includes requirements on a *firm* to:

- (1) carry out regularly assessments of the amounts, types and distribution of financial resources, *capital resources* and internal capital that it considers adequate to cover the nature and level of the risks to which it is or might be exposed (■ GENPRU 1.2.30 R to ■ GENPRU 1.2.41 G (the *overall Pillar 2 rule* and related *rules*);
- (2) identify the major sources of risk to its ability to meet its liabilities as they fall due (the *overall Pillar 2 rule*);
- (3) conduct stress and scenario tests (the *general stress and scenario testing rule*), taking into account, in the case of a *firm* with an *IRB permission*, the stress test required by ■ BIPRU 4.3.39 R to ■ BIPRU 4.3.40 R (Stress tests used in assessment of capital adequacy for a *firm* with an *IRB permission*);
- (4) ensure that the processes, strategies and systems required by the *overall Pillar 2 rule* and used in its *ICAAP*, are both comprehensive and proportionate to the nature, scale and complexity of that *firm's* activities (■ GENPRU 1.2.35 R); and
- (5) document its *ICAAP* (■ GENPRU 1.2.60 R).

2.2.6

FCA PRA

G

Where a *firm* is a member of a group, it should base its *ICAAP* on the consolidated financial position of the group. The group assessment should include information on diversification benefits and transferability of resources between members of the group and an apportionment of the capital required by the group as a whole to the *firm* (■ GENPRU 1.2.44 G to ■ GENPRU 1.2.56 G (Application of ■ GENPRU 1.2 on a solo and consolidated basis: Processes and tests)). A *firm* may, instead of preparing the *ICAAP* itself, adopt as its *ICAAP* an assessment prepared by other group members.

2.2.7

FCA PRA

G

A *firm* should ensure that its *ICAAP* is:

- (1) the responsibility of the *firm's governing body*;
- (2) reported to the *firm's governing body*; and
- (3) forms an integral part of the *firm's* management process and decision-making culture.

The ICAAP and the SREP: The SREP

2.2.8

FCA PRA

G

The *appropriate regulator* will review a *firm's ICAAP*, including the results of the *firm's* stress tests carried out under *GENPRU* and *BIPRU*, as part of its *SREP*. Provided that the *appropriate regulator* is satisfied with the appropriateness of a *firm's* capital assessment, the *appropriate regulator* will take into account that *firm's ICAAP* and stress tests in its *SREP*. More material on stress tests for a *firm* with an *IRB permission* can be found in ■ BIPRU 2.2.41 R to ■ BIPRU 2.2.45 G.

2.2.9

FCA PRA

G

The *SREP* is a process under which the *appropriate regulator* :

- (1) reviews the arrangements, strategies, processes and mechanisms implemented by a *firm* to comply with *GENPRU*, *BIPRU* and *SYSC* and with requirements imposed by or under the *regulatory system* and evaluates the risks to which the *firm* is or might be exposed;
- (2) determines whether the arrangements, strategies, processes and mechanisms implemented by the *firm* and the capital held by the *firm* ensures a sound management and coverage of the risks in (1); and
- (3) (if necessary) requires the *firm* to take the necessary actions or steps at an early stage to address any failure to meet the requirements referred to in (1).

2.2.10

FCA PRA

G

As part of its *SREP*, the *appropriate regulator* may ask a *firm* to provide it with the results of that *firm's ICAAP*, together with an explanation of the process used. Where appropriate, the *appropriate regulator* will ask for additional information on the *ICAAP*.

2.2.11

FCA PRA

G

As part of its *SREP*, the *appropriate regulator* will consider whether the amount and quality of capital which a *firm* should hold to meet its *CRR* in ■ [GENPRU 2.1](#) (Calculation of capital resources requirements) is sufficient for that *firm* to comply with the *overall financial adequacy rule*.

2.2.12

FCA PRA

G

After completing a review as part of the *SREP*, the *appropriate regulator* will normally give that *firm* individual *guidance (individual capital guidance)*, advising it of the amount and quality of capital which it should hold to meet the *overall financial adequacy rule*.

2.2.12A

FCA PRA

G

As part of its *SREP*, the *appropriate regulator* will also consider whether a *firm* should hold a *capital planning buffer* and, in that case, the amount and quality of such *capital planning buffer*. In making these assessments, the *appropriate regulator* will have regard to the nature, scale and complexity of a *firm's* business and of the major sources of risks relevant to such business as referred to in the *general stress and scenario testing rule*. Accordingly, a *firm's capital planning buffer* should be of sufficient amount and adequate quality to allow the *firm* to continue to meet the *overall financial adequacy rule* in the face of adverse circumstances, after allowing for realistic management actions.

2.2.12B

FCA PRA

G

After completing a review as part of the *SREP*, the *appropriate regulator* may notify the *firm* of the amount and quality of capital which it should hold as a *capital planning buffer* over and above the level of capital recommended as its *ICG*. The *appropriate regulator* may set a *firm's capital planning buffer* either as an amount and quality of capital which it should hold now (that is, at the time of the *appropriate regulator's* notification following the *firm's SREP*) or, in exceptional cases, as a forward looking target that the *firm* should build up over time.

2.2.12C

FCA PRA

G

Where the amount or quality of capital which the *appropriate regulator* considers a *firm* should hold to meet the *overall financial adequacy rule* or as a *capital planning buffer* is not the same as that which results from a *firm's ICAAP*, the *appropriate regulator* usually expects to discuss any such difference with the *firm*. Where necessary,

the *appropriate regulator* may consider the use of its powers under section 166 of the *Act* (Reports by skilled persons) to assist in such circumstances.

2.2.13

FCA PRA

G

If a *firm* considers that the *individual capital guidance* given to it is inappropriate to its circumstances it should, consistent with *Principle 11* (Relations with regulators), inform the *appropriate regulator* that it disagrees with that *guidance*. The *appropriate regulator* may reissue *individual capital guidance* if, after discussion with the *firm*, the *appropriate regulator* concludes that the amount or quality of capital that the *firm* should hold to meet the *overall financial adequacy rule* is different from the amount or quality initially suggested by the *appropriate regulator*.

2.2.13A

FCA PRA

G

If a *firm* disagrees with the *appropriate regulator's* assessment as to the amount or quality of *capital planning buffer* that it should hold, it should, consistent with *Principle 11* (Relations with regulators), notify the *appropriate regulator* of its disagreement. The *appropriate regulator* may reconsider its initial assessment if, after discussion with the *firm*, the *appropriate regulator* concludes that the amount or quality of capital that the *firm* should hold as *capital planning buffer* is different from the amount or quality initially suggested.

2.2.14

FCA PRA

G

The *appropriate regulator* will not give *individual capital guidance* to the effect that the amount of capital advised in that *guidance* is lower than the amount of capital which a *firm* should hold to meet its *CRR*.

2.2.15

FCA PRA

G

If, after discussion, the *appropriate regulator* and a *firm* still do not agree on an adequate level of capital, the *appropriate regulator* may consider using its powers under section 55J of the *Act* to vary on its own initiative a *firm's Part 4A permission* so as to require it to hold capital in accordance with the *appropriate regulator's* view of the capital necessary to comply with the *overall financial adequacy rule*. In deciding whether it should use its powers under section 55J, the *appropriate regulator* will take into account the amount and quality of the *capital planning buffer* which the *firm* should hold as referred to in ■ BIPRU 2.2.12A G and ■ BIPRU 2.2.12B G. ■ SUP 7 provides further information about the *appropriate regulator's* powers under section 45.

The drafting of individual capital guidance and capital planning buffer

2.2.16

FCA PRA

G

If the *appropriate regulator* gives *individual capital guidance* to a *firm*, the *appropriate regulator* will state what amount and quality of capital the *appropriate regulator* considers the *firm* needs to hold in order to comply with the *overall financial adequacy rule*. It will generally do so by saying that the *firm* should hold *capital resources* of an amount which is at least equal to a specified percentage of that *firm's capital resources requirement* plus one or more static add-ons in relation to specific risks in accordance with the *overall Pillar 2 rule*.

2.2.17

FCA PRA

G

- (1) *Individual capital guidance* may refer to two types of *capital resources*.
- (2) The first type is referred to as general capital. It refers to total *tier one capital resources* and *tier two capital resources* after deductions.
- (3) The second type is referred to as total capital. It refers to total *tier one capital resources*, *tier two capital resources* and *tier three capital resources* after deductions.

2.2.18

FCA PRA

G

- (1) In both of the cases in ■ BIPRU 2.2.17 G *capital resources* should be calculated in the same way as they are in GENPRU 2.2 (Capital resources). This includes the *rules* limiting the amount of capital that can be included in the various tiers of capital when *capital resources* are being calculated.
- (2) ■ GENPRU 2.2.42 R does not allow *innovative tier one capital* to count as *tier one capital resources* for certain purposes. This restriction does not apply for the purposes in ■ BIPRU 2.2.17 G.

2.2.19

FCA PRA

G

- (1) *Individual capital guidance* may also be given with respect to group capital resources. This paragraph explains how such *guidance* should be interpreted unless the *individual capital guidance* specifies another interpretation.
- (2) If ■ BIPRU 8.2.1 R (General consolidation *rule* for a *UK consolidation group*) applies to the *firm* the *guidance* relates to its *UK consolidation group*. If ■ BIPRU 8.3.1 R (General consolidation *rule* for a *non-EEA sub-group*) applies to the *firm* the *guidance* relates to its *non-EEA sub-group*. If both apply to the *firm* the *guidance* relates to its *UK consolidation group* and to its *non-EEA sub-group*.
- (3) The *guidance* will be on the *overall financial adequacy rule* as it applies on a consolidated basis under ■ GENPRU 1.2.59 R (Application of ■ GENPRU 1.2 on a solo and consolidated basis: Adequacy of resources) and insofar as it refers to capital resources.
- (4) ■ BIPRU 2.2.16 G to ■ BIPRU 2.2.18 G apply for the purpose of this paragraph as they apply to *guidance* given on a solo basis. References to *capital resources* should be read as being to *consolidated capital resources*.

2.2.19A

FCA PRA

G

Where the *appropriate regulator* notifies a *firm* that it should hold a *capital planning buffer*, the notification will state what amount and quality of capital the *appropriate regulator* considers that is adequate for the *firm* to hold as such. This will normally be notified to the *firm* together with its *individual capital guidance* and expressed as a separate amount of *capital resources* that the *firm* should hold in excess of the amount of *capital resources* indicated as its *individual capital guidance*.

2.2.19B

FCA PRA

G

For the purposes of ■ BIPRU 2.2.19A G, ■ BIPRU 2.2.17 G to ■ BIPRU 2.2.19 G apply as they apply to *individual capital guidance*. References in those provisions to *individual capital guidance* or *guidance* should be read as if they were references to *capital planning buffer*. In relation to ■ BIPRU 2.2.19G (3) and ■ GENPRU 1.2.59 R, where the *general stress and scenario testing rule*, as part of the *ICAAP rules*, applies to a *firm* on a consolidated basis, the *appropriate regulator* may notify the *firm* that it should hold a group *capital planning buffer*. In these cases, the *firm* should ensure that the group holds a *capital planning buffer* of sufficient amount and adequate quality to allow it to continue to meet the *overall financial adequacy rule* in the face of adverse circumstances, after allowing for realistic management actions.

Failure to meet individual capital guidance and monitoring and reporting on the capital planning buffer

2.2.20

FCA PRA

G

A *firm's* continuing to hold capital in accordance with its *individual capital guidance* and its ability to carry on doing so is a fundamental part of the *appropriate regulator's*

supervision of that *firm*. Therefore if a *firm's capital resources* have fallen, or are expected to fall, below the level advised in *individual capital guidance*, then, consistent with *Principle 11* (Relations with regulators), a *firm* should inform the *appropriate regulator* of this fact as soon as practicable, explaining why this has happened or is expected to happen and:

- (1) what action the *firm* intends to take to increase its capital resources or to reduce its risks and hence its capital requirements; or
- (2) what modification the *firm* considers should be made to the *individual capital guidance* which it has been given.

2.2.21

FCA PRA

G

In the circumstance set out in ■ BIPRU 2.2.20 G, the *appropriate regulator* may ask a *firm* for alternative or more detailed proposals and plans or further assessments and analyses of capital adequacy and risks faced by the *firm*. The *appropriate regulator* will seek to agree with the *firm* appropriate timescales and scope for any such additional work, in light of the circumstances which have arisen.

2.2.22

FCA PRA

G

If a *firm* has not accepted *individual capital guidance* given by the *appropriate regulator* it should, nevertheless, inform the *appropriate regulator* as soon as practicable if its capital resources have fallen, or are expected to fall, below the level suggested by that *individual capital guidance*.

2.2.23

FCA PRA

G

Monitoring the use of a *firm's capital planning buffer* is also a fundamental part of the *appropriate regulator* supervision of that *firm*. A *firm* should only use its *capital planning buffer* to absorb losses or meet increased capital requirements if certain adverse circumstances materialise. These should be circumstances beyond the *firm's* normal and direct control, whether relating to a deteriorating external environment or periods of stress such as macroeconomic downturns or financial/market shocks, or firm-specific circumstances.

2.2.23A

FCA PRA

G

Consistent with *Principle 11* (Relations with regulators), a *firm* should notify the *appropriate regulator* as early as possible in advance where it has identified that it would need to use its *capital planning buffer*. The *firm's* notification should at least state:

- (1) what adverse circumstances are likely to force the *firm* to draw down its *capital planning buffer*;
- (2) how the *capital planning buffer* will be used up in line with the *firm's* capital planning projections; and
- (3) what plan is in place for the eventual restoration of the *capital planning buffer*.

2.2.23B

FCA PRA

G

Following discussions with the *firm* on the items listed in ■ BIPRU 2.2.23AG (1) to ■ BIPRU 2.2.23AG (3), the *appropriate regulator* may put in place additional reporting arrangements to monitor the *firm's* use of its *capital planning buffer* in accordance with the plan referred to in ■ BIPRU 2.2.23AG (3). The *appropriate regulator* may also identify specific trigger points as the *capital planning buffer* is being used up by the *firm*, which could lead to additional supervisory actions.

2.2.23C FCA PRA G Where a *firm's capital planning buffer* is being drawn down due to circumstances other than those referred to in ■ BIPRU 2.2.23 G, such as poor planning or mismanagement, the *appropriate regulator* may ask the *firm* for more detailed plans for it to restore its *capital planning buffer*. In the light of the relevant circumstances, the *appropriate regulator* may consider taking other remedial actions, which may include using its powers under section 55J of the *Act* to vary on its own initiative a *firm's Part 4A permission*.

2.2.23D FCA PRA G A *firm* should inform the *appropriate regulator* where its *capital planning buffer* is likely to start being drawn down even if it has not accepted the *appropriate regulator's* assessment as to the amount or quality of its *capital planning buffer*.

2.2.23E FCA PRA G Where a *firm* has started to use its *capital planning buffer* in circumstances where it was not possible to notify in advance, it should notify the *appropriate regulator* and provide the information referred to in ■ BIPRU 2.2.23A G as soon as practicable afterwards.

2.2.23F FCA PRA G ■ BIPRU 2.2.20 G to ■ BIPRU 2.2.23E G also apply to *individual capital guidance* and to *capital planning buffer* on a consolidated basis as referred to in ■ BIPRU 2.2.19 G.

Proportionality of an ICAAP

2.2.24 FCA PRA G ■ BIPRU 2.2.25 G to ■ BIPRU 2.2.27 G set out what the *appropriate regulator* considers to be a proportional approach to preparing an *ICAAP* as referred to in ■ GENPRU 1.2.35 R (The processes, strategies and systems required by the *overall Pillar 2 rule* should be comprehensive and proportionate), according to the relative degree of complexity of a *firm's* activities. If a *firm* adopts the appropriate approach, it may enable the *appropriate regulator* more easily to review a *firm's ICAAP* when the *appropriate regulator* undertakes its *SREP*. The *appropriate regulator* is also likely to place more reliance on an *ICAAP* which takes the appropriate form described in ■ BIPRU 2.2.25 G to ■ BIPRU 2.2.27 G than would otherwise be the case although there may also be circumstances in which the *appropriate regulator* will be able to rely on an *ICAAP* that is not drawn up in that form.

- 2.2.25** FCA PRA G
- (1) This paragraph applies to a small *firm* whose activities are simple and primarily not credit-related.
 - (2) In carrying out its *ICAAP* it could:
 - (a) identify and consider that *firm's* largest losses over the last 3 to 5 years and whether those losses are likely to recur;
 - (b) prepare a short list of the most significant risks to which that *firm* is exposed;
 - (c) consider how that *firm* would act, and the amount of capital that would be absorbed, in the event that each of the risks identified were to materialise;
 - (d) consider how that *firm's CRR* might alter under the scenarios in (c) and how its *CRR* might alter in line with its business plans for the next 3 to 5 years;

- (e) consider whether any of the risks in the *overall Pillar 2 rule* is applicable to the *firm* (it is unlikely that any of those risks not already identified in (a) or (b) will apply to a *firm* whose activities are simple);
 - (f) document the ranges of capital required in the scenarios identified and form an overall view on the amount and quality of capital which that *firm* should hold, ensuring that its senior management is involved in arriving at that view; and
 - (g) (in order to determine the amount of capital that would be absorbed in the circumstances detailed in (c)) carry out simple sensitivity tests where the *firm* analyses the impact of a shift in the key risk parameters identified in (b) on the earnings of the *firm*.
- (3) A *firm* is also expected to form a view on the consolidated amount of capital it should hold as well as the capital required to be held in respect of each of the individual risks identified under the *overall Pillar 2 rule*. For that purpose, it may conservatively sum the results of the individual tests performed in (2)(c). If the *firm* chooses however to reduce that sum on the understanding that not all risks will materialise at the same time, then the *firm* should perform scenario tests that demonstrate that a reduction in capital is legitimate.
- (4) A *firm* should conduct stress tests and scenario analyses in accordance with ■ GENPRU 1.2.42 R to assess how that *firm's* capital and CRR would alter and what that *firm's* reaction might be to a range of adverse scenarios, including operational and market events. Where relevant, a *firm* should also consider the impact of a severe economic or industry downturn on its future earnings, *capital resources* and *capital resources requirement*, taking into account its business plans. The downturn scenario should be based on forward looking hypothetical events calibrated against the most adverse movements in individual risk drivers experienced over a long historical period.

2.2.26

FCA PRA

G

In relation to a *firm* whose activities are moderately complex, in carrying out its ICAAP, ■ BIPRU 2.2.25 G (3) to ■ (4) apply. In addition, it could:

- (1) having consulted the management in each major business line, prepare a comprehensive list of the major risks to which the business is exposed;
- (2) estimate, with the aid of historical data, where available, the range and distribution of possible losses which might arise from each of those risks and consider using shock stress tests to provide risk estimates;
- (3) consider the extent to which that *firm's* CRR adequately captures the risks identified in (1) and (2);
- (4) for areas in which the CRR is either inadequate or does not address a risk, estimate the additional capital (if any) needed to protect that *firm* and its *customers*, in addition to any other risk mitigation action that *firm* plans to take;
- (5) consider the risk that that *firm's* own analyses of capital adequacy may be inaccurate and that it may suffer from management weaknesses, which affect the effectiveness of its risk management and mitigation;

2.2.27

FCA PRA

G

- (6) project that *firm's* business activities forward in detail for one year and in less detail for the next 3 to 5 years and estimate how that *firm's* capital and CRR would alter, assuming that business develops as expected;
 - (7) assume that business does not develop as expected and consider how that *firm's* capital and CRR would alter and what that *firm's* reaction to a range of adverse economic scenarios might be (see ■ GENPRU 1.2.30 R to ■ GENPRU 1.2.43 G (the *overall Pillar 2 rule* and related *rules and guidance*)). Where appropriate, the adverse scenarios should consider the impact of market events that are instantaneous or occur over an extended period of time but which are nevertheless still co-dependent on movements in economic conditions ;
 - (8) document the results obtained from the analyses in (2), (4), (6), and (7) in a detailed report for that *firm's* senior management, and, where relevant, its *governing body*; and
 - (9) ensure that systems and processes are in place to review against performance the accuracy of the estimates made in (2), (4), (6) and (7).
- (1) This paragraph applies to a proportional ICAAP in the case of a *firm* whose activities are complex.
 - (2) A proportional approach to that *firm's* ICAAP should cover the matters identified in ■ BIPRU 2.2.26 G, but is likely also to involve the use of models, most of which will be integrated into its day-to-day management and operation.
 - (3) Models of the sort referred to in (2) may be linked so as to generate an overall estimate of the amount of capital that a *firm* considers appropriate to hold for its business needs. For example, a *firm* is likely to use value at risk models for *market risk* (see ■ BIPRU 7.10), advanced modelling approaches for credit risk (see ■ BIPRU 4) and, possibly, *advanced measurement approaches* for *operational risk* (see ■ BIPRU 6.5). A *firm* might also use economic scenario generators to model stochastically its business forecasts and risks. A *firm* may also link such models to generate information on the economic capital desirable for that *firm*. A model which a *firm* uses to generate its target amount of economic capital is known as an economic capital model (ECM). Economic capital is the target amount of capital which maximises the return for a *firm's* stakeholders for a desired level of risk.
 - (4) A *firm* is also likely to be part of a *group* and to be operating internationally. There is likely to be centralised control over the models used throughout the *group*, the assumptions made and their overall calibration.
 - (5) The more a *firm* integrates into its business such economic capital modelling, the more it is likely to focus on managing risks for the benefit of its stakeholders. Consequently, ECMs may produce capital estimates that differ from the amount of capital needed for regulatory purposes. For the *appropriate regulator* to rely on the results of a *firm's* models, including ECMs, a *firm* should be able to explain the basis and results of its models and how the amount of capital produced by its models reflects the amount of capital needed for regulatory purposes. It may be that those amounts are not equal. Where they are not equal, the *appropriate regulator* will expect a *firm* to discuss any differences with the *appropriate regulator*. However,

it may prove difficult to reconcile the outcome of a *firm's* modelling with the *appropriate regulator's* own assessment of the adequacy of that *firm's* capital. This may be the case when, for instance, matters of judgment are involved in arriving at a *firm's* capital assessment, or the *appropriate regulator* relies on information which cannot be fully disclosed to the *firm* (for example comparisons with the *firm's* peers). Nevertheless, a *firm* whose ECM produces a different amount of capital to that required for regulatory purposes is still obliged to comply with the *overall Pillar 2 rule*. A *firm* should therefore be able to explain to the *appropriate regulator* how the outcome of its ECM is adjusted so that it complies with the *overall financial adequacy rule* and the *overall Pillar 2 rule*.

- (6) Stress testing should provide senior management with a consolidated view of the amount of risk the *firm* is or might be exposed to under the chosen stress events. Senior management should therefore be presented with information that considers the possibility of the risks materialising simultaneously in various proportions. For instance, it would be misrepresentative to simulate *market risk* stressed events without considering that, in those circumstances, market *counterparties* may be more likely to default. Accordingly, a *firm* could:
 - (a) carry out combined stress tests where assets and liabilities are individually subjected to simultaneous changes in two or more risk drivers; for instance, the change in value of each loan made by a *firm* may be estimated using simultaneous changes to both interest rates and stock market or property values;
 - (b) integrate the results of market and credit risk models rather than aggregating the results of each model separately; and
 - (c) consider scenarios which include systemic effects on the *firm* of wider failures in the *firm's* market or systems upon which the *firm* depends and also any possible systemic effects caused by the *firm* itself suffering losses which affect other market participants which in turn exacerbate the *firm's* position.

- (7) Furthermore, if a complex *firm* uses an ECM it should validate the assumptions of the model through a comprehensive stress testing programme. In particular this validation should:
 - (a) test correlation assumptions (where risks are aggregated in this way) using combined stresses and scenario analyses;
 - (b) use stress tests to identify the extent to which the *firm's* risk models omit non-linear effects, for instance the behaviour of derivatives in market risk models; and
 - (c) consider not just the effect of parallel shifts in interest rate curves, but also the effect of curves becoming steeper or flatter.

Guidance on risks to be covered in an ICAAP

■ BIPRU 2.2.30 G to ■ BIPRU 2.2.40 G set out *guidance* on some of the sources of risk identified in the *overall Pillar 2 rule*. ■ BIPRU 2.2.41 R to ■ BIPRU 2.2.45 G have material relating to a *firm* with an *IRB permission*.

- (1) A *firm* may take into account factors other than those identified in the *overall Pillar 2 rule* when it assesses the level of capital it wishes to hold. These factors might include external rating goals, market reputation and its strategic goals.

2.2.28

G

FCA PRA

PAGE
15

2.2.29

G

FCA PRA

However, a *firm* should be able to distinguish, for the purpose of its dialogue with the *appropriate regulator*, between capital it holds in order to comply with the *overall financial adequacy rule*, capital that it holds as a *capital planning buffer* and capital held for other purposes.

- (2) The calibration of the *CRR* assumes that a *firm's* business is well-diversified, well-managed with assets matching its liabilities and good controls, and stable with no large, unusual or high risk transactions. A *firm* may find it helpful to assess the extent to which its business in fact differs from these assumptions and therefore what adjustments it might be reasonable for it to make to the *CRR* to arrive at an adequate level of *capital resources*.

Interest rate risk arising from non-trading book activities

2.2.30

FCA PRA

G

A *firm* should assess its exposure to changes in interest rates, in particular risks arising from the effect of interest rate changes on *non-trading book* activities that are not captured by the *CRR*. In doing so, a *firm* may wish to use stress tests to determine the impact on its balance sheet of a change in market conditions.

Securitisation risk

2.2.31

FCA PRA

G

A *firm* should assess its exposure to risks transferred through the *securitisation* of assets should those transfers fail for whatever reason. A *firm* should consider the effect on its financial position of a *securitisation* arrangement failing to operate as anticipated or of the values and risks transferred not emerging as expected.

Residual risk

2.2.32

FCA PRA

G

A *firm* should assess its exposure to residual risks that may result from the partial performance or failure of *credit risk mitigation* techniques for reasons that are unconnected with their intrinsic value. This could result from, for instance, ineffective documentation, a delay in payment or the inability to realise payment from a guarantor in a timely manner. Given that residual risks can always be present, a *firm* should assess the appropriateness of its *CRR* against its assumptions which underlie any risk mitigation measures it may have in place.

Concentration risk

2.2.33

FCA PRA

G

A *firm* should assess, and monitor, in detail its exposure to sectoral, geographic, liability and asset concentrations. The *appropriate regulator* considers that concentrations in these areas increase a *firm's* exposure to credit risk. Where a *firm* identifies such concentrations it should consider the adequacy of its *CRR*.

Liquidity risk

2.2.34

FCA PRA

G

In accordance with the *overall Pillar 2 rule* a *firm* should consider its exposure to *liquidity risk* and assess its response should that risk materialise.

2.2.35

FCA PRA

G

When assessing *liquidity risk*, a *firm* should consider the extent to which there is a mismatch between assets and liabilities.

2.2.36

FCA PRA

G

A *firm* should also, when assessing *liquidity risk*, consider the amount of assets it holds in highly liquid, marketable forms that are available should unexpected cash flows

lead to a liquidity problem. The price concession of liquidating assets is of prime concern when assessing such *liquidity risk* and should therefore be built into a *firm's ICAAP*.

2.2.37

G

FCA PRA

Some further areas to consider in developing the *liquidity risk* scenario might include:

- (1) any mismatching between expected asset and liability cash flows;
- (2) the inability to sell assets quickly;
- (3) the extent to which a *firm's* assets have been pledged; and
- (4) the possible need to reduce large asset positions at different levels of market liquidity and the related potential costs and timing constraints.

Business risk: General

2.2.38

G

FCA PRA

A *firm's CRR*, being risk-sensitive, may vary as business cycles and economic conditions fluctuate over time. A deterioration in business or economic conditions could require a *firm* to raise capital or, alternatively, to contract its businesses, at a time when market conditions are most unfavourable to raising capital. Such an effect is known as procyclicality.

2.2.39

G

FCA PRA

To reduce the impact of cyclical effects, a *firm* should aim to maintain an adequate *capital planning buffer* during an upturn in business and economic cycles such that it has sufficient capital available to protect itself in unfavourable market conditions.

2.2.40

G

FCA PRA

To assess its expected capital requirements over the economic and business cycles, a *firm* may wish to project forward its financial position taking account of its business strategy and expected growth according to a range of assumptions as to the state of the economic or business environment which it faces. For example, an *ICAAP* should include an analysis of the impact that the actions of a *firm's* competitors might have on its performance, in order to see what changes in its environment the *firm* could sustain. Projections over a three to five year period would be appropriate in most circumstances. A *firm* may then calculate its projected *CRR* and assess whether it could be met from expected financial resources. Additional *guidance* on capital planning over an economic and business cycle can be found in ■ GENPRU 1.2.73A G (Capital planning).

Business risk: Stress tests for firms using the IRB approach

2.2.41

R

FCA PRA

A *firm* with an *IRB permission* must ensure that there is no significant risk that it will not be able to meet its capital resource requirements for credit risk under ■ GENPRU 2.1 (Calculation of capital resources requirements) at all times throughout an economic cycle, including the capital resources requirements for credit risk indicated by any stress test carried out under ■ BIPRU 4.3.39 R to ■ BIPRU 4.3.40 R (Stress tests used in assessment of capital adequacy for a *firm* with an *IRB permission*) as being likely to apply in the scenario tested. For the purpose of deciding what *capital resources* are or will be available to meet those credit risk requirements from time to time a *firm* must exclude *capital resources* that are likely to be required to meet its other capital requirements under ■ GENPRU 2.1 at the relevant

time. A *firm* must also be able to demonstrate to the *appropriate regulator* at any time that it is complying with this *rule*.

2.2.42

FCA PRA

R

■ BIPRU 2.2.41 R applies to a *firm* on a solo basis if ■ BIPRU 4 (IRB approach) applies to it on a solo basis and applies on a consolidated basis if ■ BIPRU 4 does.

2.2.43

FCA PRA

R

If ■ BIPRU 2.2.41 R applies to a *firm* on a consolidated basis the following adjustments are made to ■ BIPRU 2.2.41 R in accordance with the general principles of ■ BIPRU 8 (Group risk - consolidation):

- (1) references to *capital resources* are to the *consolidated capital resources* of the *firm's UK consolidation group* or, as the case may be, its *non-EEA sub-group*; and
- (2) references to the capital requirements in ■ GENPRU 2.1 (Calculation of capital resources requirements) are to the consolidated capital requirements with respect to the *firm's UK consolidation group* or, as the case may be, its *non-EEA sub-group* under ■ BIPRU 8 (Group risk - consolidation).

2.2.44

FCA PRA

G

If a *firm's* current available *capital resources* are less than the capital resources requirement indicated by the stress test that need not be a breach of ■ BIPRU 2.2.41 R. The *firm* may wish to set out any countervailing effects and off-setting actions that can be demonstrated to the satisfaction of the *appropriate regulator* as being likely to reduce the difference referred to in the first sentence. The *appropriate regulator* is only likely to consider a demonstration of such actions as credible if those actions are set out in a capital management plan based on the procedures in ■ GENPRU 1.2.73A G (Capital planning) and including a plan of the type referred to in ■ GENPRU 1.2.73A G (5) that has been approved by the *firm's* senior management or *governing body*.

2.2.45

FCA PRA

G

The countervailing factors and off-setting actions that a *firm* may rely on as referred to in ■ BIPRU 2.2.44 G include, but are not limited to, projected balance sheet shrinkage, growth in *capital resources* resulting from retained profits between the date of the stress test and the projected start of the economic downturn, the possibility of raising new capital in a downturn, the ability to reduce dividend payments or other distributions, and the ability to allocate capital from other risks which can be shown to be negatively correlated with the *firm's* credit risk profile.

Systems and controls

2.2.46

FCA PRA

G

A *firm* may decide to hold additional capital to mitigate any weaknesses in its overall control environment. These weaknesses might be indicated by the following:

- (1) a failure by a *firm* to complete an assessment of its systems and controls to establish whether they comply with SYSC; or
- (2) a failure by a *firm's* senior management to approve its financial results; or
- (3) a failure by a *firm* to consider an analysis of relevant internal and external information on its business and control environment.

2.2.47

FCA PRA

G

In considering if there are any systems and control weaknesses and their effect on the adequacy of the *CRR*, a *firm* should be able to demonstrate to the *appropriate regulator* that all the issues identified in *SYSC* have been considered and that appropriate plans and procedures exist to deal adequately with adverse scenarios.

Risks which may be considered according to the nature of the activities of a firm

2.2.48

FCA PRA

G

(1) ■ BIPRU 2.2.49 G to ■ BIPRU 2.2.70 G set out *guidance* for:

- (a) a *bank* or *building society*;
- (b) an asset management *firm*; and
- (c) a securities *firm*;

whose activities are either simple or moderately complex.

(2) ■ BIPRU 2.2.49 G to ■ BIPRU 2.2.70 G provide examples of the sorts of risks which such a *firm* might typically face and of stress tests or scenario analyses which it might carry out as part of its *ICAAP*.

(3) The material on securities *firms* is also relevant to a *commodities firm*.

Banks and building societies

2.2.49

PRA

G

The *appropriate regulator* considers that the concentration risk resulting from concentrated portfolios is significant for most *banks* and *building societies*.

2.2.50

PRA

G

If a *bank* or *building society* chooses to use the *CRR* as a starting point for its capital assessment, it should remember that, when assessing its exposure to concentration risk, the calculation of the *CRR* is based on the assumption that a *firm* is well-diversified.

2.2.51

PRA

G

In assessing the degree of credit concentration, a *bank* or *building society* should consider its degree of credit concentration in a particular economic or geographic area. Where the business of a *firm* is, by its nature, concentrated (for example, a specialised *firm* lending to one sector only), a *firm* should consider the impact of adverse economic factors, such as a rise in unemployment in the area in which it has a concentration of *exposures*, and its impact on asset quality. A gradual change of cultural environment could also affect a *bank* or *building society* and a *firm* should consider whether this issue should be the subject of scenario analysis.

2.2.52

PRA

G

Typically, a *building society's* portfolio is concentrated. The extent to which a *building society* can diversify its business is limited. A *building society* should, nevertheless, consider the impact of geographic concentrations on its capital by, for instance, analysing the effect of local economic factors such as unemployment and its impact on arrears, house prices and loan-to-value ratios.

2.2.53

PRA

G

Similarly, a *building society* should consider the concentration in its portfolio of certain product types that have, inherently, a more than average risk (for example, lifetime mortgages). It should, through scenario analyses in relation to its portfolio, assess the potential impact on its profitability and capital of those scenarios.

- 2.2.54** **PRA** **G** In relation to ■ BIPRU 10 (Large exposures requirements), a *bank* or *building society* should take into account factors such as future business growth and cyclicalities when it assesses the amount of capital which it will need to remain in compliance with those *rules*. A *firm* may also consider in its assessment whether any *large exposures* that it has identified are positively correlated.
- 2.2.55** **PRA** **G** Where a *bank* or *building society* lends to a *counterparty* which it assesses as representing a high credit risk, it should assess whether compliance with the *rules* in BIPRU in relation to credit risk is sufficient for it to manage that risk prudently.
- 2.2.56** **PRA** **G** The performance of specialised portfolios may, in some instances, depend on key individuals. This factor exacerbates concentration risk because the skill of those individuals in part limits the risk arising from a concentrated portfolio. The impact of those individuals is likely to be correspondingly greater in small *firms*. In developing its stress tests and scenario analyses, a *bank* or *building society* should therefore consider the impact of losing key individuals on its ability to operate normally, as well as the direct impact on its revenues.
- 2.2.57** **PRA** **G** A *bank* or *building society* should assess the sensitivity of its financial position to adverse movements in interest rates. For instance, a *bank* or *building society* should assess its sensitivity to interest rate risk arising from interest rate mismatches between assets and liabilities. A *building society* is exposed to interest rate risk to the extent that it borrows on a short term basis but lends over a longer period.
- 2.2.58** **PRA** **G** When assessing the adequacy of its capital, a *bank* or *building society* should not only consider the vulnerability of its revenue, but also the sensitivity of its funding and, in particular, its ability to raise additional funding in time of economic stress. A *bank* or *building society* should therefore consider whether its funding pool is sufficiently diversified. For example, where a *bank* is reliant solely on its parent to provide funding, its access to funds may be suddenly restricted should the parent's creditworthiness be downgraded. Similarly, a *bank* or *building society* may consider the impact of an increase in bond rates or a rating downgrade, if relevant, on its capital cost and its subsequent ability to raise capital.
- 2.2.59** **PRA** **G** A *bank* or *building society* should assess the impact of its business plans on its capital over the time horizon which it uses in its business plans. A *bank* or *building society* should assess the impact on its capital of diversifying its activities and the risk it runs of failing to manage that new business successfully. For that purpose, it may consider the cost of a price war to enter a new competitive market or the risk of mis-pricing some products as a result of not having sufficient expertise in its new area of business.
- 2.2.60** **PRA** **G** A *bank* or *building society* is also exposed to reputational risk, as its ability to underwrite new business is heavily reliant on the standing of the reputation of the *firm*. A *bank* or *building society* may consider the impact on its financial position of legal disputes which damage its reputation.

An asset management firm

- 2.2.61** **FCA** **G** An asset manager is primarily exposed to *operational risk* and reputational risk.

2.2.62

FCA

G

When assessing reputational risk an asset manager should consider issues such as:

- (1) how poor performance can affect its ability to generate profits;
- (2) the effect on its financial position should one or more of its key fund managers leave that *firm*;
- (3) the effect on its financial position should it lose some of its largest customers; and
- (4) how poor customer services can affect its financial position; for example, a *firm* which has outsourced the management of customer accounts may want to consider the impact on its own reputation of the service provider failing to deliver the service.

2.2.63

FCA

G

As an asset manager's mandates become more complex, the risk of it failing to comply fully with the terms of its contracts increases. In the event of such failure, a *firm* can be exposed to substantial losses resulting from *customers'* claims and legal actions. Although the *appropriate regulator* would expect an asset manager to have in place adequate controls to mitigate that risk, it may also like to consider the potential cost to it should *customers* claim that it has not adhered to mandates. Past claims and compensation may provide a useful benchmark for an asset manager to assess its sensitivity to future legal action. In assessing the adequacy of its capital, an asset manager may therefore consider whether it could absorb the highest operational loss it has suffered over the last 3 to 5 years.

2.2.64

FCA

G

In relation to the issues identified in ■ BIPRU 2.2.63 G, an asset manager should consider, for example:

- (1) the direct cost to it resulting from fraud or theft;
- (2) the direct cost arising from *customers'* claims and legal action in the future; an asset manager could consider the impact on its financial position if a legal precedent were to encourage its *customers* to take legal action against that *firm* for failing to advise correctly on a certain type of product; the relevance of such scenarios is likely to depend on whether the asset manager is acting on a discretionary basis or solely as advisor; and
- (3) where it has obtained professional indemnity insurance, the deductibles and individual or aggregate limits on the sums insured.

2.2.65

FCA

G

The *appropriate regulator* expects an asset manager to consider the impact of economic factors on its ability to meet its liabilities as they fall due. An asset manager should therefore develop scenarios which relate to its strategic and business plan. An asset manager might therefore consider:

- (1) the effect of a market downturn affecting both transaction volumes and the market values of assets in its funds; in assessing the impact of such a scenario, an asset manager may consider the extent to which it can remain profitable (for example, by rapidly scaling down its activities and reducing its costs);
- (2) the impact on current levels of capital if it plans to undertake a significant restructuring; and

2.2.66

FCA

G

- (3) the impact on current levels of capital if it plans to enter a new market or launch a new product; it should assess the amount of capital it needs to hold, when operating for the first time in a market in which it lacks expertise.

A securities firm

- (1) A securities *firm* may consider the impact of the situations listed in (a) to (c) on its capital levels when assessing its exposure to concentration risk:
- (a) the potential loss that could arise from large exposures to a single *counterparty*;
 - (b) the potential loss that could arise from exposures to large transactions or to a product type; and
 - (c) the potential loss resulting from a combination of events such as a sudden increase in volatility leaving a hitherto fully-margined client unable to meet the margin calls due to the large size of the underlying *position* and the subsequent difficulties involved in liquidating its *position*.
- (2) An example of the analysis in (1)(b) relates to a securities *firm* which relies on the income generated by a large, one-off corporate finance transaction. It may want to consider the possibility of legal action arising from that transaction which prevents the payment of its fees. Additionally, an underwriting *firm* may, as a matter of routine, commit to place a large amount of securities. It may therefore like to assess the impact of losses arising from a failure to place the securities successfully.

2.2.67

FCA

G

Where a securities *firm* deals in illiquid securities (for example, unlisted securities or securities listed on illiquid markets), or holds illiquid assets, potentially large losses can arise from trades that have failed to settle or because of large unrealised market losses. A securities *firm* may therefore consider the impact of *liquidity risk* on its exposure to:

- (1) credit risk; and
- (2) *market risk*.

2.2.68

FCA

G

Counterparty risk *rules* only partially capture the risk of settlement failure as the quantification of risk is only based on mark-to-market values and does not take account of the volatility of the securities over the settlement period. A securities *firm's* assessment of its exposure to counterparty risk should take into account:

- (1) whether it acts as arranger only or whether it also executes trades;
- (2) the types of execution venues which it uses; for example, the London Stock Exchange or a retail service provider (RSP) have more depth than *multilateral trading facilities* ; and
- (3) whether it offers extended settlements and free delivery compared to delivery versus payment business.

2.2.69

FCA

G

- (1) A securities *firm* should also consider the impact of external factors on the levels of capital it needs to hold. Scenarios covering such external factors should relate to its strategy and business plan. A securities *firm* might wish to consider the questions in (2) to (7).
- (2) Whether it plans to participate in a one-off transaction that might strain temporarily or permanently its capital.
- (3) Whether the unevenness of its revenue suggests that it should hold a capital buffer. Such an assessment could be based, for instance, on an analysis of past revenue and the volatility of its capital.
- (4) How its income might alter as interest rates fluctuate where it is obliged to pay interest to its clients in excess of interest it earns on client money deposits.
- (5) How its capital would be affected by a market downturn. For instance, how sensitive that *firm* is to a sharp reduction of trading volumes.
- (6) How political and economic factors will affect that *firm's* business. For instance, a *commodity firm* may wish to consider the impact of a sharp increase in prices on initial margins and, consequently, on its liquidity.
- (7) Whether it anticipates expanding its activities (for example, by offering clearing services), and if so, the impact on its capital.

2.2.70

FCA

G

A securities *firm* may also want to assess the impact of its internal credit limits on its levels of capital. For instance, a *firm* whose internal procedures authorise dealing without cash in the account or without pre-set dealing limits might consider more capital is required than if it operated stricter internal credit limits.

Capital models

2.2.71

FCA PRA

G

A *firm* may approach its assessment of adequate capital by developing a model, including an ECM (see ■ BIPRU 2.2.27 G), for some or all of its business risks. The assumptions required to aggregate risks modelled and the confidence levels adopted should be considered by a *firm's* senior management. A *firm* should also consider whether any relevant risks, including systems and control risks, are not captured by the model.

2.2.72

FCA PRA

G

A *firm* should not expect the *appropriate regulator* to accept as adequate any particular model that it develops or automatically to reflect the results from the model in any *individual capital guidance* or *capital planning buffer*. However, the *appropriate regulator* will take into account the results of a sound and prudent model when giving *individual capital guidance* or when dealing with the *firm* in relation to its *capital planning buffer* (see ■ GENPRU 1.2.19 G (Outline of provisions related to ■ GENPRU 2.1 (Adequacy of financial resources))).

PAGE
23

2.2.73

FCA PRA

G

There is no prescribed approach as to how a *firm* should develop its internal capital model. However, a *firm* should be able to demonstrate:

- (1) the confidence levels set and whether these are linked to its corporate strategy;
- (2) the time horizons set for the different types of business that it undertakes;

- (3) the extent of historic data used and back-testing carried out;
- (4) that it has in place a process to verify the correctness of the model's outputs; and
- (5) that it has the skills and resources to operate, maintain and develop the model.

2.2.74

FCA PRA

G

In relation to the use of an ECM (see ■ BIPRU 2.2.27 G), the *appropriate regulator* is likely to place more reliance on a *firm's ICAAP* if the *firm* provides the following information:

- (1) a comparison of the amount of capital that the ECM generates in respect of each of the risks captured in the *CRR* before aggregation with the corresponding components of the *CRR* calculation; and
- (2) evidence that the *guidance* in ■ BIPRU 2.2.71 G to ■ BIPRU 2.2.78 G has been followed.

2.2.75

FCA PRA

G

If a *firm* adopts a top-down approach to developing its internal model, it should be able to allocate the outcome of the internal model to risks it has previously identified in relation to each separate legal entity, business unit or business activity, as appropriate. In relation to a *firm* which is a member of a group, ■ GENPRU 1.2.53 R (Application of ■ GENPRU 1.2 on a solo and consolidated basis: Processes and tests) sets out how internal capital identified as necessary by that *firm's ICAAP* should be allocated.

2.2.76

FCA PRA

G

If a *firm's* internal model makes explicit or implicit assumptions in relation to correlations within or between risk types, or in relation to diversification benefits between business types, the *firm* should be able to explain to the *appropriate regulator*, with the support of empirical evidence, the basis of those assumptions.

2.2.77

FCA PRA

G

A *firm's* model should also reflect the past experience of both the *firm* and the sectors in which it operates.

2.2.78

FCA PRA

G

The values assigned to inputs into a *firm's* model should be derived either stochastically, by assuming the value of an item can follow an appropriate probability distribution and by selecting appropriate values at the tail of the distribution, or deterministically, using appropriate prudent assumptions. For options or guarantees which change in value significantly in certain economic or demographic circumstances, a stochastic approach would normally be appropriate.

2.3 Interest rate risk in the non-trading book

Application

This section of the *Handbook* applies to a *BIPRU firm*.

2.3.1

R

FCA PRA

2.3.2

G

FCA PRA

- (1) Interest rate risk in the *non-trading book* will normally be a major source of risk for:
 - (a) a *bank*;
 - (b) a *building society*; and
 - (c) a *BIPRU investment firm* that deals on own account (including underwriting on a *firm* commitment basis) and whose *non-trading book* business equals or exceeds 15% of its total business.
- (2) However it will not normally be a significant risk for any other *BIPRU investment firm*.
- (3) The test in (1)(c) should be carried out in the same way as it is for the purpose of the 5% test in ■ BIPRU 1.2.17 R (Definition of the trading book).
- (4) Where ■ BIPRU 2.3 is applied on a consolidated basis (see ■ BIPRU 2.3.13 R) the test in (1)(c) should be carried out in the same way as it is under ■ BIPRU 8.7.24 R (Trading book size for the purposes of consolidation).

2.3.3

G

FCA PRA

Interest rate risk in the *non-trading book* may arise from a number of sources for example:

- (1) risks related to the mismatch of repricing of assets and liabilities and off balance sheet short and long-term positions;
- (2) risks arising from hedging exposure to one interest rate with exposure to a rate which reprices under slightly different conditions;
- (3) risk related to the uncertainties of occurrence of transactions e.g. when expected future transactions do not equal the actual transactions; and
- (4) risks arising from consumers redeeming fixed rate products when market rates change.

2.3.4

FCA PRA

G

■ BIPRU 2.3 sets out more detail on how the systems and controls requirements in SYSC and ■ GENPRU 1.2.30 R (Processes, strategies and systems for risks) and the requirements about stress and scenario testing in ■ GENPRU 1.2.36 R apply to interest rate risk in the *non-trading book*.

2.3.5

FCA PRA

G

■ BIPRU 2.3 implements Article 124(5) of the *Banking Consolidation Directive*.

Proportionality

2.3.6

FCA PRA

G

The *guidance* on proportionality in ■ BIPRU 2.2 applies to ■ BIPRU 2.3.

Stress testing for interest rate risk: General requirement

2.3.7

FCA PRA

R

- (1) As part of its obligations under ■ GENPRU 1.2.30 R (Processes, strategies and systems for risks) and ■ GENPRU 1.2.36 R (Stress and scenario tests) a *firm* must carry out an evaluation of its exposure to the interest rate risk arising from its non-trading activities.
- (2) The evaluation under (1) must cover the effect of a sudden and unexpected parallel change in interest rates of 200 basis points in both directions.
- (3) A *firm* must immediately notify the *appropriate regulator* if any evaluation under this *rule* suggests that, as a result of the change in interest rates described in (2), the economic value of the *firm* would decline by more than 20% of its *capital resources*.

2.3.8

FCA PRA

G

A *firm* should, under ■ BIPRU 2.3.7 R (2), apply a 200 basis point shock to each major currency exposure.

2.3.9

FCA PRA

G

For a larger and/or more complex *firm*, appropriate systems to evaluate and manage interest rate risk in the *non-trading book* should include:

- (1) the ability to measure the exposure and sensitivity of the *firm's* activities, if material, to repricing risk, yield curve risk, basis risk and risks arising from embedded optionality (for example, pipeline risk, prepayment risk) as well as changes in assumptions (for example those about customer behaviour);
- (2) consideration as to whether a purely static analysis of the impact on their current portfolio of a given shock or shocks should be supplemented by a more dynamic simulation approach; and
- (3) scenarios in which different interest rate paths are computed and in which some of the assumptions (e.g. about behaviour, contribution to risk and balance sheet size and composition) are themselves functions of interest rate level.

2.3.10

FCA PRA

G

Under ■ GENPRU 1.2.60 R, a *firm* is required to make a written record of its assessments made under ■ GENPRU 1.2. A *firm's* record of its approach to evaluating and managing interest rate risk as it affects the *firm's* non-trading activities should cover the following issues:

- (1) the internal definition of and boundary between "banking book" and "trading activities" (see ■ BIPRU 1.2);
- (2) the definition of economic value and its consistency with the method used to value assets and liabilities (e.g. discounted cashflows);
- (3) the size and the form of the different shocks to be used for internal calculations;
- (4) the use of a dynamic and / or static approach in the application of interest rate shocks;
- (5) the treatment of commonly called "pipeline transactions" (including any related hedging);
- (6) the aggregation of multicurrency interest rate exposures;
- (7) the inclusion (or not) of non-interest bearing assets and liabilities (including capital and reserves);
- (8) the treatment of current and savings accounts (i.e. the maturity attached to exposures without a contractual maturity);
- (9) the treatment of fixed rate assets (liabilities) where customers still have a right to repay (withdraw) early;
- (10) the extent to which sensitivities to small shocks can be scaled up on a linear basis without material loss of accuracy (i.e. covering both convexity generally and the non-linearity of pay-off associated with explicit option products);
- (11) the degree of granularity employed (for example offsets within a time bucket); and
- (12) whether all future cash flows or only principal balances are included.

2.3.11

FCA PRA

G

The *appropriate regulator* will periodically review whether the level of the shock referred to in ■ BIPRU 2.3.7 R (2) is appropriate in the light of changing circumstances, in particular the general level of interest rates (for instance periods of very low interest rates) and their volatility. A *firm's* internal systems should therefore be flexible enough to compute its sensitivity to any standardised shock that is prescribed. If a 200 basis point shock would imply negative interest rates or if such a shock would otherwise be considered inappropriate, the *appropriate regulator* will consider adjusting the requirements accordingly.

Stress testing for interest rate risk: Frequency

2.3.12

FCA PRA

R

- (1) A *firm* must carry out the evaluations required by ■ BIPRU 2.3.7 R as frequently as necessary for it to be reasonably satisfied that it has at all times a sufficient understanding of the degree to which

it is exposed to the risks referred to in that *rule* and the nature of that exposure. In any case it must carry out those evaluations no less frequently than required by (2) or (3).

- (2) The minimum frequency of the evaluation in ■ BIPRU 2.3.7 R (1) is once each year.
- (3) The minimum frequency of the evaluation in ■ BIPRU 2.3.7 R (2) is once each quarter.

Consolidation

2.3.13

FCA PRA

R

■ GENPRU 1.2.45 R to ■ GENPRU 1.2.59 R (Application of ■ GENPRU 1.2 on a solo and consolidated basis) apply to ■ BIPRU 2.3 as they apply to ■ GENPRU 1.2.30 R and ■ GENPRU 1.2.36 R.

Chapter 3

Standardised credit risk

3.1 Application and purpose

Application

3.1.1 **R** ■ BIPRU 3 applies to a *BIPRU firm*.

FCA **PRA**

Purpose

3.1.2 **G** ■ BIPRU 3 implements:

FCA **PRA**

- (1) Articles 78 to 80, paragraph (1) of Article 81, Article 83, Annex II and Parts 1 and 3 of Annex VI of the *Banking Consolidation Directive*;
- (2) Article 18 of the *Capital Adequacy Directive* so far as it applies Articles 78 to 80, paragraph (1) of Article 81, Article 83 and Parts 1 and 3 of Annex VI of the *Banking Consolidation Directive* to *investment firms*; and
- (3) Article 40 of the *Capital Adequacy Directive* for the purposes of the calculation of credit risk under the *Banking Consolidation Directive*.

3.1.3 **G** ■ BIPRU 3.1 sets out how a *firm* should calculate the *credit risk capital component*, which is one of the elements that make up the *credit risk capital requirement* under ■ GENPRU 2.1.51 R. Part of that calculation involves calculating *risk weighted exposure amounts* for *exposures* in the *firm's non-trading book*. The rest of ■ BIPRU 3 sets out how the *firm* should carry out that calculation.

FCA **PRA**

3.1.4 **G** ■ BIPRU 5 deals with the effect of *credit risk mitigation* on the calculation of *risk weighted exposure amounts*. ■ BIPRU 13 deals with the calculation of *exposure* values for certain kinds of products. ■ BIPRU 14.3 deals with the calculation of the *counterparty risk capital component* for unsettled transactions in the *trading book* and *non-trading book*. ■ BIPRU 14.4 deals with *capital resources* with respect to *free deliveries*.

FCA **PRA**

Calculation of the credit risk capital component

3.1.5 **R** The *credit risk capital component* of a *firm* is 8% of the total of its *risk weighted exposure amounts* for *exposures* falling into ■ BIPRU 3.1.6 R, calculated in accordance with ■ BIPRU 3.

FCA **PRA**

3.1.6 **R** An *exposure* falls into this *rule* if:

FCA **PRA**

- (1) it is in a *firm's non-trading book*; and

-
- (2) it has not been deducted from the *firm's capital resources* under
■ GENPRU 2.2.

3.2 The central principles of the standardised approach to credit risk

3.2.1

FCA PRA

R Subject to ■ BIPRU 13:

- (1) the *exposure* value of an asset item must be its balance-sheet value, subject to any value adjustments required by ■ GENPRU 1.3; and
- (2) the *exposure* value of an off-balance sheet item listed in the table in ■ BIPRU 3.7.2 R must be the percentage of its value set out in that table.

[Note: BCD Article 78(1) part]

3.2.2

FCA PRA

R The off-balance sheet items listed in the table in ■ BIPRU 3.7.2 R must be assigned to the risk categories as indicated in that table.

[Note: BCD Article 78(1) part]

3.2.3

FCA PRA

R Where an *exposure* is subject to *funded credit protection*, a firm may modify the *exposure* value applicable to that item in accordance with ■ BIPRU 5.

[Note: BCD Article 78(3)]

3.2.4

FCA PRA

G ■ BIPRU 13 sets out the method for determination of the *exposure* value of a *financial derivative instrument*, with the effects of contracts of novation and other netting agreements taken into account for the purposes of that method in accordance with ■ BIPRU 13.7.

[Note: reference to BCD Article 78(2) first sentence. Implementation in ■ BIPRU 13]

3.2.5

FCA PRA

G ■ BIPRU 13.3 and ■ BIPRU 13.8 set out the provisions applying to the treatment and determination of the *exposure* value of *repurchase transactions*, *securities or commodities lending or borrowing transactions*, *long settlement transactions* and *margin lending transactions* (SFTs).

[Note: reference to BCD Article 78(2) second sentence. Implementation in ■ BIPRU 13]

3.2.6

FCA PRA

G

■ BIPRU 13 also sets out the methods for the determination of *exposure* values for *long settlement transactions*.

3.2.7

FCA PRA

G

■ BIPRU 13.8 provides that, in the case of a *firm* using the *financial collateral comprehensive method* under ■ BIPRU 5, where an *exposure* takes the form of an *SFT*, the *exposure* value should be increased by the volatility adjustment appropriate to such *securities* or *commodities* set out in ■ BIPRU 5.4.30 R to ■ BIPRU 5.4.65 R (Supervisory volatility adjustments approach and the own estimates of volatility adjustments approach).

[Note: reference to *BCD* Article 78(1), part. Implementation in ■ BIPRU 13]

3.2.8

FCA PRA

G

■ BIPRU 13.3.13 R and ■ BIPRU 13.8.8 R set out the provisions relating to determination of the *exposure* value of certain credit risk *exposures* outstanding with a *central counterparty*, where the *central counterparty* credit risk *exposures* with all participants in its arrangements are fully collateralised on a daily basis.

[Note: reference to *BCD* Article 78(4). Implementation in ■ BIPRU 13]

Exposure Classes

3.2.9

FCA PRA

R

A *firm* must assign each *exposure* to one of the following *exposure* classes:

- (1) claims or contingent claims on central governments or *central banks*;
- (2) claims or contingent claims on regional governments or local authorities;
- (3) claims or contingent claims on administrative bodies and non-commercial *undertakings*;
- (4) claims or contingent claims on *multilateral development banks*;
- (5) claims or contingent claims on *international organisation*;
- (6) claims or contingent claims on *institutions*;
- (7) claims or contingent claims on corporates;
- (8) retail claims or contingent retail claims;
- (9) claims or contingent claims secured on real estate property;
- (10) past due items;
- (11) items belonging to regulatory high-risk categories;
- (12) claims in the form of *covered bonds*;

- (13) *securitisation* positions;
- (14) short-term claims on *institutions* and corporates;
- (15) claims in the form of *CIUs*; or
- (16) other items.

[Note: *BCD* Article 79(1)]

3.2.10

FCA PRA

R

To be eligible for the *retail exposure* class, an *exposure* must meet the following conditions:

- (1) the *exposure* must be either to an individual *person* or *persons*, or to a small or medium sized entity;
- (2) the *exposure* must be one of a significant number of *exposures* with similar characteristics such that the risks associated with such lending are substantially reduced; and
- (3) the total amount owed to the *firm*, its *parent undertakings* and its *subsidiary undertakings*, including any past due *exposure*, by the obligor client or *group of connected clients*, but excluding claims or contingent claims secured on residential real estate collateral, must not, to the knowledge of the *firm*, exceed €1 million.

[Note: *BCD* Article 79(2)]

3.2.11

FCA PRA

R

A *firm* must take reasonable steps to acquire the knowledge referred to in ■ BIPRU 3.2.10 R (3).

[Note: *BCD* Article 79(2)(c) last sentence]

3.2.12

FCA PRA

R

Securities are not eligible for the *retail exposure* class.

[Note: *BCD* Article 79(2) last sentence]

3.2.13

FCA PRA

R

The present value of retail minimum lease payments is eligible for the *retail exposure* class.

[Note: *BCD* Article 79(3)]

3.2.14

FCA PRA

G

Retail exposures: Significance

A key driver of the preferential *risk weight* afforded *retail exposures* is the lower correlation and systematic risk associated with such *exposures*. This aspect is unrelated to the absolute number of *retail exposures*. Accordingly in defining what constitutes a significant number of *retail exposures* for the purpose of ■ BIPRU 3.2.10 R (2), a *firm* need only satisfy itself that the number of *retail exposures* is sufficiently large to diversify away idiosyncratic risk. This assessment will be subject to supervisory review

and part of a *firm's* SREP. It will be looked at as one of the issues relating to overall diversification.

Retail exposures: Aggregation: Reasonable steps

3.2.15

FCA PRA

G

In deciding what steps are reasonable for the purposes of ■ BIPRU 3.2.11 R, a *firm* may take into account complexity and cost, as well as the materiality of the impact upon its capital calculation. A *firm* should be able to demonstrate to the *appropriate regulator* that it has complied with the obligation to take reasonable steps under ■ BIPRU 3.2.11 R in the way it takes these factors into account.

Retail exposures: Aggregation: Single risk

3.2.16

FCA PRA

G

- (1) The definition of *group of connected clients* is set out in the *Glossary*. Paragraph (2) of that definition is "two or more *persons* ... who are to be regarded as constituting a single risk because they are so interconnected that, if one of them were to experience financial problems, the other or all of the others would be likely to encounter repayment difficulties".
- (2) Say that a *firm* has *exposures* to A and B. When deciding whether A and B come within paragraph (2) of the definition two conditions should be satisfied. Firstly the connections between A and B should mean that if A experiences financial problems, B should be likely to encounter repayment difficulties. Secondly, the connections between A and B should mean that if B experiences financial problems, A should be likely to encounter repayment difficulties.
- (3) The *guidance* in ■ BIPRU 3.2.16 G is provided for the purpose of ■ BIPRU 3.2.10 R only and not for the purposes of any other provision in the Handbook that uses the defined term *group of connected clients*.

Retail exposures: Aggregation: Personal and business exposures

3.2.17

FCA PRA

G

If a *firm* has *exposures* to an owner of a *retail SME* in his personal capacity and *exposures* to the *retail SME* the *firm* should aggregate the two types of *exposure* for the purpose of ■ BIPRU 3.2.10 R (3), although it should not include claims secured on residential real estate collateral. In deciding what steps are reasonable for the purposes of ■ BIPRU 3.2.11 R in aggregating these two types of *exposure*, a *firm* may take into account the materiality of those personal *exposures*. A *firm* should be able to demonstrate to the *appropriate regulator* that it has complied with the obligation to take reasonable steps under ■ BIPRU 3.2.11 R when taking into account materiality in this way.

Retail exposures: Exchange rate

3.2.18

FCA PRA

G

Where an exposure is denominated in a currency other than the euro, a *firm* may calculate the euro equivalent for purposes of ■ BIPRU 3.2.10 R using any appropriate set of exchange rates provided its choice has no obvious bias and that the *firm* is consistent in its approach to choosing rates.

Retail exposures: Frequency of monitoring

3.2.19

FCA PRA

G

A *firm* may monitor compliance with the €1m threshold in ■ BIPRU 3.2.10 R on the basis of approved limits provided it has internal control procedures that are sufficient to ensure

that amounts owed cannot diverge from approved limits to such an extent as to give rise to a material breach of the €1m threshold.

3.2.20

FCA PRA

R

- (1) To calculate *risk weighted exposure amounts*, *risk weights* must be applied to all *exposures*, unless deducted from *capital resources*, in accordance with the provisions of ■ BIPRU 3.4.
- (2) The application of *risk weights* must be based on the *standardised credit risk exposure class* to which the *exposure* is assigned and, to the extent specified in ■ BIPRU 3.4, its credit quality.
- (3) Credit quality may be determined by reference to:
 - (a) the credit assessments of *eligible ECAs* in accordance with the provisions of ■ BIPRU 3; or
 - (b) the credit assessments of export credit agencies as described in ■ BIPRU 3.4.

[Note: BCD Article 80(1)]

3.2.21

FCA PRA

R

For the purposes of applying a *risk weight*, as referred to in ■ BIPRU 3.2.20 R, the *exposure* value must be multiplied by the *risk weight* specified or determined in accordance with the *standardised approach*.

[Note: BCD Article 80(2)]

3.2.22

FCA PRA

R

Notwithstanding ■ BIPRU 3.2.20 R, where an *exposure* is subject to credit protection the *risk weight* applicable to that item may be modified in accordance with ■ BIPRU 5.

[Note: BCD Article 80(4)]

3.2.23

FCA PRA

R

Risk weighted exposure amounts for *securitised exposures* must be calculated in accordance with ■ BIPRU 9.

[Note: BCD Article 80(5)]

3.2.24

FCA PRA

R

Exposures the calculation of *risk weighted exposure amounts* for which is not otherwise provided for under the *standardised approach* must be assigned a *risk weight* of 100%.

[Note: BCD Article 80(6)]

Zero risk-weighting for intra-group exposures: core UK group

3.2.25

FCA PRA

R

- (1) Subject to ■ BIPRU 3.2.35 R, and with the exception of *exposures* giving rise to liabilities in the form of the items referred to in ■ BIPRU 3.2.26 R, a *firm* is not required to comply with

■ BIPRU 3.2.20 R (Calculation of risk weighted exposures amounts under the standardised approach) in the case of the *exposures* of the *firm* to a counterparty which is its *parent undertaking*, its *subsidiary undertaking* or a *subsidiary undertaking* of its *parent undertaking* provided that the following conditions are met:

- (a) the counterparty is
 - (i) a *core concentration risk group counterparty*; and
 - (ii) an *institution*, *financial holding company*, *financial institution*, *asset management company* or *ancillary services undertaking* subject to appropriate prudential requirements;
 - (b) [deleted]
 - (ba) (in relation to a *subsidiary undertaking*) 100% of the voting rights attaching to the *shares* in the counterparty's capital is held by the *firm* or a *financial holding company* (or a *subsidiary undertaking* of the *financial holding company*), whether individually or jointly, and that the *firm* or *financial holding company* (or its *subsidiary undertaking*) must have the right to appoint or remove a majority of the members of the board of *directors*, committee of management or other governing body of the counterparty;
 - (c) the counterparty is subject to the same risk evaluation, measurement and control procedures as the *firm*;
 - (d) the counterparty is incorporated in the *United Kingdom*; and
 - (e) there is no current or foreseen material practical or legal impediment to the prompt transfer of *capital resources* or repayment of liabilities from the counterparty to the *firm*.
- (2) Where a *firm* chooses under (1) not to apply ■ BIPRU 3.2.20 R, it must assign a *risk weight* of 0% to the *exposure*.
- (3) A *firm* need not apply the treatment in (1) and (2) to every *exposure* that is eligible for that treatment.

[Note: BCD Article 80(7)]

- (1) *Firms* are referred to ■ BIPRU 10.8A (Intra-group exposures: core UK group) under which *exposures* within the *core UK group* are exempt from the limits described in ■ BIPRU 10.5 (Limits on exposures) if they would be assigned a *risk weight* of 0% under ■ BIPRU 3.2.25 R.
- (2) Therefore, a *firm* that is applying for a *core UK group waiver* should demonstrate that it meets the conditions in ■ BIPRU 3.2.25 R and ■ BIPRU 10.8A for establishing a *core UK group*. A *firm* that is granted a *core UK group waiver* may rely on it for the purpose of assigning a *risk weight* of 0% to *exposures* within its *core*

3.2.25A

FCA PRA

G

UK group and for the purpose of exempting the *exposures* within the *core UK group* from the 25% *large exposure* limit.

3.2.26

FCA PRA

R

A *firm* must not apply the treatment in ■ BIPRU 3.2.25 R to *exposures* giving rise to liabilities in the form of any of the following items:

- (1) in the case of a *BIPRU firm*, any *tier one capital* or *tier two capital*; and
- (2) in the case of any other *undertaking*, any item that would be *tier one capital* or *tier two capital* if the *undertaking* were a *BIPRU firm*.

[Note: BCD Article 80(7), part]

3.2.27

R

- (1) [deleted]
 - (a) [deleted]
 - (b) [deleted]
 - (c) [deleted]
- (2) [deleted]

3.2.27A

FCA PRA

R

- (1) For the purpose of ■ BIPRU 3.2.25R (1)(e), a *firm* must be able on an ongoing basis to demonstrate fully to the *appropriate regulator* the circumstances and arrangements, including legal arrangements, by virtue of which there are no material practical or legal impediments, and none are foreseen, to the prompt transfer of *capital resources* or repayment of liabilities from the counterparty to the *firm*.
- (2) In relation to a counterparty that is not a *firm*, the arrangements referred to in (1) must include a legally binding agreement with each *firm* that is a member of the *core UK group* that it will promptly on demand by the *firm* increase the *firm's capital resources* by an amount required to ensure that the *firm* complies with ■ GENPRU 2.1 (Calculation of capital resources requirements), ■ BIPRU 10 (Large exposures) and any other requirements relating to *capital resources* or concentration risk imposed on a *firm* by or under the *regulatory system*.

3.2.28

FCA PRA

G

For the purpose of ■ BIPRU 3.2.25 R (1)(c) it is the risk management functions of the group that should be integrated, rather than the group's operational management. A *firm* should ensure that if risk management functions are integrated in this way it should be possible for the *appropriate regulator* to undertake qualitative supervision of the management of the integrated risk management function.

3.2.29

FCA PRA

G

In relation to a *core concentration risk group counterparty*, an *undertaking* is included within the scope of consolidation of a group on a full basis if it is at the head of the group or if its assets and liabilities are taken into account in full as referred to in ■ BIPRU 8.5.2 G (Basis of inclusion of undertakings in consolidation).

3.2.29A

FCA PRA

G

- (1) In relation to ■ BIPRU 3.2.25 R (1)(ba), a *subsidiary undertaking* should generally be 100% owned and controlled by a single shareholder. However, if a *subsidiary undertaking* has more than one shareholder, that *undertaking* may be a member of the *core UK group* if all its shareholders are also members of the same *core UK group*.
- (2) For the purpose of ■ BIPRU 3.2.25R (1)(d) (Incorporation in the UK), if a counterparty is of a type that falls within the scope of the Council Regulation of 29 May 2000 on insolvency proceedings (Regulation 1346/2000/EC) and it is established in the *United Kingdom* other than by incorporation, a *firm* wishing to include that counterparty in its *core UK group* may apply to the *appropriate regulator* for a *waiver* of this condition if it can demonstrate fully to the *appropriate regulator* that the counterparty's centre of main interests is situated in the *United Kingdom* within the meaning of that Regulation.

3.2.30

FCA PRA

G

For the purpose of ■ BIPRU 3.2.25R (1)(e) (Prompt transfer of capital resources):

- (1) in the case of an *undertaking* that is a *firm* the requirement in ■ BIPRU 3.2.25R (1)(e) for the prompt transfer of *capital resources* refers to *capital resources* in excess of the capital and financial resources requirements to which it is subject under the *regulatory system*; and
- (2) the following guidance relating to the condition in ■ BIPRU 10.8A.2 R (6) requiring the prompt transfer of *capital resources* within a *core UK group* as applicable for the exemption from *large exposure* limits is also relevant:
 - (a) ■ BIPRU 10.8A.6 G in respect of the criteria that the *appropriate regulator* will consider when assessing whether the condition requiring the prompt transfer of *capital resources* is going to be met; and
 - (b) ■ BIPRU 10.8A.7 G (2) in respect of the counterparty's obligation to increase the *firm's capital resources* and the limitations that may be permitted.

3.2.31

FCA PRA

G

The requirement in ■ BIPRU 3.2.25 R (1)(e) for the prompt repayment of liabilities refers to the prompt repayment of liabilities when due.

3.2.32

FCA PRA

G

The *guidance* in ■ BIPRU 3.2.30 G - ■ BIPRU 3.2.31 G does not apply to ■ BIPRU 2.1 (Solo consolidation) even though the provisions have similar wording. This is because the purpose of the provisions in ■ BIPRU 2.1 is to define the conditions under which two *undertakings* should be treated as a single *undertaking*. The purpose of ■ BIPRU 3.2.25 R (1) is to define the circumstances in which it is appropriate to apply a zero *risk weight*.

3.2.33

FCA PRA

G

A *firm* that has chosen to apply the treatment in ■ BIPRU 3.2.25 R should monitor the *exposures* to which a 0% *risk weight* is applied under that treatment and report these to the *appropriate regulator* as required.

3.2.34

FCA PRA

G

If a *firm* has an *IRB permission* and *exposures* are exempted from the *IRB approach* under ■ BIPRU 4.2.26 R (6) the *firm* may apply a 0% *risk weight* to them under ■ BIPRU 3.2.25 R (2) (Zero risk weighting for intra-group exposures) if the conditions in ■ BIPRU 3.2.25 R (1) are satisfied.

3.2.35

FCA PRA

R

- (1) A *firm* may not apply ■ BIPRU 3.2.25 R unless it has a *core UK group waiver*.
- (2) [deleted]
- (3) A *firm* may stop applying ■ BIPRU 3.2.25 R or may stop applying it to some *exposures*.
- (4) [deleted]
- (5) A *firm* must notify the *appropriate regulator* if it becomes aware that any *exposure* that it has treated as exempt under ■ BIPRU 3.2.25 R has ceased to meet the conditions for exemption or if the *firm* ceases to treat an *exposure* under that *rule*.

3.2.36

G

[deleted]

3.2.37

FCA PRA

G

■ BIPRU 3 Annex 1 G is a flow chart guide to assessing whether an intra-group *exposure* can be zero *risk weighted* using the *standardised approach* subject to the conditions set out in ■ BIPRU 3.2.25 R - ■ BIPRU 3.2.35 R.

Exposures to recognized third-country investment firms, clearing houses and investment exchanges

3.2.38

FCA PRA

R

For the purposes of the *standardised approach* (including as it applies for the purposes of ■ BIPRU 14) and without prejudice to ■ BIPRU 13.3.13 R and ■ BIPRU 13.8.8 R (Exposure to a central counterparty), *exposures to recognised third country investment firms* and *exposures to recognised clearing houses, designated clearing houses, recognised investment exchanges* and *designated investment exchanges* must be treated as exposures to *institutions*.

[Note: CAD Article 40]

3.3 The use of the credit assessments of ratings agencies

3.3.1 **R** An external credit assessment may be used to determine the *risk weight* of an *exposure* in accordance with ■ BIPRU 3.2.20 R to ■ BIPRU 3.2.26 R only if the *ECAI* which provides it is recognised by the *appropriate regulator* as an *eligible ECAI* for the purposes of the *standardised approach to credit risk*.

FCA PRA

[Note: BCD Article 81(1)]

Recognition of ratings agencies

3.3.2 **G** The *appropriate regulator* will recognise an *ECAI* as an *eligible ECAI* for the purposes of ■ BIPRU 3, or will refuse to recognise an *ECAI* or will revoke its recognition of an *ECAI* as an *eligible ECAI* in accordance with the *Capital Requirements Regulations 2006*.

FCA PRA

3.3.3 **G** Regulation 22 of the *Capital Requirements Regulations 2006* deals with recognition by the *appropriate regulator* of *eligible ECAIs* for *exposure risk weight* purposes. Regulation 25 deals with revoking recognition.

FCA PRA

3.3.4 **G** The criteria which the *appropriate regulator* must apply when assessing *ECAIs* for recognition for *exposure risk weighting* purposes are set out in Regulation 22 and Schedule 1 to the *Capital Requirements Regulations 2006*. In making an assessment against those criteria and in carrying out the mapping process described in ■ BIPRU 3.3.7 G to ■ BIPRU 3.3.9 G the *appropriate regulator* will have regard to the approach set out in the Committee of European Banking Supervisors' "Guidelines on the recognition of External Credit Assessment Institutions" dated 20 January 2006. The *appropriate regulator* does not expect to recognise an *ECAI* unless the information set out in those guidelines has been submitted to it.

FCA PRA

3.3.5 **G** The list of *eligible ECAIs* is published on the *appropriate regulator* website. When the *appropriate regulator* recognises an *ECAI* as an *eligible ECAI*, it publishes that decision by amending the list of *eligible ECAIs* on the *appropriate regulator* website to include the name of the *eligible ECAI*. When the *appropriate regulator* determines that the recognition of an *ECAI* should be revoked, it publishes that decision by deleting the name of the *ECAI* from the list on the *appropriate regulator* website.

FCA PRA

3.3.6 **G** The list of *eligible ECAIs* includes those who have been recognised as eligible for *exposure risk weighting* purposes by a *competent authority* of another *EEA State* and are subsequently recognised as *eligible ECAIs* by the *appropriate regulator* without carrying

FCA PRA

out its own evaluation process under Regulation 22(2) of the *Capital Requirements Regulations 2006*.

Mapping of credit assessments

3.3.7

FCA PRA

G

Under Regulation 22(3) of the *Capital Requirements Regulations 2006* the *appropriate regulator* is obliged to determine, taking into account the requirements set out in Schedule 2 to the *Capital Requirements Regulations 2006*, with which of the *credit quality steps* set out in Part 1 of Annex VI of the *Banking Consolidation Directive* the relevant credit assessments of an *eligible ECAI* are to be associated. Those determinations should be objective and consistent.

3.3.8

FCA PRA

R

The *credit quality step* with which a relevant credit assessment of an *eligible ECAI* is to be associated is that in the table mapping the credit assessments of *eligible ECAIs* to *credit quality steps* published by the *appropriate regulator* under Regulation 22(3) of the *Capital Requirements Regulations 2006*.

3.3.9

FCA PRA

G

The table mapping the credit assessments of *eligible ECAIs* to *credit quality steps* is published on the *appropriate regulator's* website and amended from time to time in line with additions to and deletions from the list of *eligible ECAIs*. The table includes mappings made by a *competent authority* of another *EEA State* which are subsequently recognised by the *appropriate regulator* without carrying out its own determination process under Regulation 22(5) of the *Capital Requirements Regulations 2006*.

[Note: For the most recent version of the table, refer to: <http://www.fca.org.uk/your-fca/documents/fsa-ecais-standardised> for the *FCA* and <http://www.bankofengland.co.uk/publications/Documents/prabankingpolicy/2013/ecaisstandardised.pdf> for the *PRA*]

3.4 Risk weights under the standardised approach to credit risk

Risk weights: Exposures to central governments or central banks: Treatment

3.4.1
FCA PRA

R

Without prejudice to ■ BIPRU 3.4.2 R to ■ BIPRU 3.4.9 R, exposures to central governments and central banks must be assigned a 100% *risk weight*.

[Note: BCD Annex VI Part 1 point 1]

3.4.2
FCA PRA

R

Subject to ■ BIPRU 3.4.4 R, *exposures* to central governments and *central banks* for which a credit assessment by a *nominated ECAI* is available must be assigned a *risk weight* according to the table in ■ BIPRU 3.4.3 R in accordance with the assignment by the *appropriate regulator* in accordance with the *Capital Requirements Regulations 2006* of the credit assessments of *eligible ECAIs* to six steps in a *credit quality assessment scale*.

[Note: BCD Annex VI Part 1 point 2]

Table: Exposures to central governments and central banks for which a credit assessment by a nominated ECAI is available

3.4.3
FCA PRA

R

This table belongs to ■ BIPRU 3.4.2 R.

<i>Credit quality step</i>	1	2	3	4	5	6
<i>Risk weight</i>	0 %	20 %	50 %	100 %	100 %	150 %

3.4.4
FCA PRA

R

Exposures to the European Central Bank must be assigned a 0% *risk weight*.

[Note: BCD Annex VI Part 1 point 3]

Exposures in the national currency of the borrower

PAGE
15

3.4.5
FCA PRA

R

Exposures to *EEA States'* central governments and *central banks* denominated and funded in the domestic currency of that central government and *central bank* must be assigned a *risk weight* of 0%.

[Note: BCD Annex VI Part 1 point 4]

3.4.6

FCA PRA

R

When the *competent authorities* of a third country which apply supervisory and regulatory arrangements at least equivalent to those applied in the *EEA* assign a *risk weight* which is lower than that indicated in ■ BIPRU 3.4.1 R to ■ BIPRU 3.4.3 R to *exposures* to their central government and *central bank* denominated and funded in the domestic currency, a *firm* may *risk weight* such *exposures* in the same manner.

[Note: BCD Annex VI Part 1 point 5]

Use of credit assessments by export credit agencies

3.4.7

FCA PRA

R

An export credit agency credit assessment may be recognised by a *firm* for the purpose of determining the *risk weight* to be applied to an *exposure* under the *standardised approach* if either of the following conditions is met:

- (1) the credit assessment is a consensus risk score from export credit agencies participating in the OECD "Arrangement on Guidelines for Officially Supported Export Credits"; or
- (2) the export credit agency publishes its credit assessments, and the export credit agency subscribes to the OECD agreed methodology, and the credit assessment is associated with one of the eight minimum export insurance premiums (MEIP) that the OECD agreed methodology establishes.

[Note: BCD Annex VI Part 1 point 6]

3.4.8

FCA PRA

R

Exposures for which a credit assessment by an export credit agency is recognised for *risk weighting* purposes must be assigned a *risk weight* according to the table in ■ BIPRU 3.4.9 R.

[Note: BCD Annex VI Part 1 point 7]

Table: Exposure for which a credit assessment by an export credit agency is recognised

3.4.9

FCA PRA

R

This table belongs to ■ BIPRU 3.4.8 R.

<i>Risk weight</i>	0%	0%	20%	50%	100%	100%	100%	150%

Exposures to regional governments or local authorities: General

3.4.10

FCA PRA

R

Without prejudice to ■ BIPRU 3.4.15 R to ■ BIPRU 3.4.19 R:

- (1) a *firm* must *risk weight exposures* to regional governments and local authorities in accordance with ■ BIPRU 3.4.11 R to ■ BIPRU 3.4.14 R and ■ BIPRU 3.4.19A R; and

- (2) the preferential treatment for short-term *exposures* specified in ■ BIPRU 3.4.37 R, ■ BIPRU 3.4.39 R and ■ BIPRU 3.4.44 R must not be applied.

[Note: BCD Annex VI Part 1 point 8]

Exposures to regional governments or local authorities: Central government risk weight based method

3.4.11

FCA PRA

R

- (1) *Exposures* to regional governments and local authorities must be assigned a *risk weight* according to the *credit quality step* to which *exposures* to the central government of the jurisdiction in which the regional government or local authority is established are assigned in accordance with the table in ■ BIPRU 3.4.12 R.

- (2) *Exposures* to an unrated regional government or local authority must not be assigned a *risk weight* lower than that applied to *exposures* to its central government.

[Note: BCD Annex VI Part 1 points 25 and 26]

Table: Central government risk weight based method

3.4.12

FCA PRA

R

This table belongs to ■ BIPRU 3.4.11 R.

<i>Credit quality step</i> to which central government is assigned	1	2	3	4	5	6
<i>Risk weight of exposure</i>	20%	50%	100%	100%	100%	150%

3.4.13

FCA PRA

R

For *exposures* to regional governments and local authorities established in countries where the central government is unrated, the *risk weight* must be not more than 100%.

[Note: BCD Annex VI Part 1 point 27]

3.4.14

FCA PRA

R

For *exposures* to regional governments and local authorities with an original effective maturity of three months or less, the *risk weight* must be 20%.

[Note: BCD Annex VI Part 1 point 28]

3.4.15

FCA PRA

R

A *firm* must treat an *exposure* to a regional government or local authority of the *United Kingdom* listed in ■ BIPRU 3 Annex 2 R as an *exposure* to the central government of the *United Kingdom*.

[Note: BCD Annex VI Part 1 point 9]

3.4.16

FCA PRA

G

The *appropriate regulator* will include a regional government or local authority in the list in ■ BIPRU 3 Annex 2 R where there is no difference in risk between *exposures* to that body and *exposures* to the central government of the *United Kingdom* because of the specific revenue-raising powers of the regional government or local authority, and the existence of specific institutional arrangements the effect of which is to reduce the risk of default.

[Note: BCD Annex VI Part 1 point 9]

3.4.17

FCA PRA

R

A *firm* must treat an *exposure* to a regional government or local authority of an *EEA State* other than the *United Kingdom* as an *exposure* to the central government in whose jurisdiction that regional government or local authority is established if that regional government or local authority is included on the list of regional governments and local authorities drawn up by the *competent authority* in that *EEA State* under a *CRD implementation measure* with respect to point 9 of Part 1 of Annex VI of the *Banking Consolidation Directive*.

[Note: BCD Annex VI Part 1 point 9]

3.4.18

FCA PRA

R

Exposures to churches or religious communities constituted in the form of a legal *person* under public law must, in so far as they raise taxes in accordance with legislation conferring on them the right to do so, be treated as *exposures* to regional governments and local authorities, except that ■ BIPRU 3.4.15 R and ■ BIPRU 3.4.17 R do not apply.

[Note: BCD Annex VI Part 1 point 10]

3.4.19

FCA PRA

R

When competent authorities of a third country jurisdiction which apply supervisory and regulatory arrangements at least equivalent to those applied in the *EEA* treat *exposures* to regional governments and local authorities as *exposures* to their central government, a *firm* may *risk weight exposures* to such regional governments and local authorities in the same manner.

[Note: BCD Annex VI Part 1 point 11]

3.4.19A

FCA PRA

R

Without prejudice to ■ BIPRU 3.4.17 R to ■ BIPRU 3.4.19 R, an *exposure* to a regional government or local authority of an *EEA State* denominated and funded in the domestic currency of that regional government or local authority must be assigned a risk weight of 20%.

[Note: BCD Annex VI Part 2(b)]

Exposures to administrative bodies and non-commercial undertakings

3.4.20

FCA PRA

R

■ BIPRU 3.4.21 R to ■ BIPRU 3.4.26 R set out the provisions applying to *exposures* to administrative bodies and non-commercial *undertakings*.

Treatment

3.4.21

FCA PRA

R

Without prejudice to ■ BIPRU 3.4.22 R to ■ BIPRU 3.4.26 R, *exposures* to administrative bodies and non-commercial *undertakings* must be assigned a 100% *risk weight*.

[Note: BCD Annex VI Part 1 point 12]

Public sector entities

3.4.22

FCA PRA

R

Without prejudice to ■ BIPRU 3.4.23 R to ■ BIPRU 3.4.26 R, *exposures* to *public sector entities* must be assigned a 100% *risk weight*.

[Note: BCD Annex VI Part 1 point 13]

3.4.23

FCA PRA

R

A *firm* may treat an *exposure* to a *public sector entity* as an *exposure* to a regional government or local authority in accordance with ■ BIPRU 3.4.11 R to ■ BIPRU 3.4.14 R.

[Note: BCD Annex VI Part 1 point 14]

3.4.24

FCA PRA

R

In exceptional circumstances a *firm* may treat an *exposure* to a *public sector entity* established in the *United Kingdom* as an *exposure* to the central government of the *United Kingdom* if there is no difference in risk between *exposures* to that body and *exposures* to the central government of the *United Kingdom* because of the existence of an appropriate guarantee by the central government.

[Note: BCD Annex VI Part 1 point 15]

3.4.25

FCA PRA

R

Where a *competent authority* of another *EEA State* implements points 14 or 15 of Part 1 of Annex VI of the *Banking Consolidation Directive* by exercising the discretion to treat *exposures* to *public sector entities* as *exposures* to *institutions* or as *exposures* to the central government of the *EEA State* concerned, a *firm* may *risk weight exposures* to the relevant *public sector entities* in the same manner.

[Note: BCD Annex VI Part 1 point 16]

3.4.26

FCA PRA

R

When *competent authorities* of a third country jurisdiction, which apply supervisory and regulatory arrangements at least equivalent to those applied in the *EEA*, treat *exposures* to *public sector entities* as *exposures* to *institutions*, a *firm* may *risk weight exposures* to the relevant *public sector entities* in the same manner.

[Note: BCD Annex VI Part 1 point 17]

Exposures to multilateral development banks: Treatment

3.4.27

FCA PRA

R

Without prejudice to ■ BIPRU 3.4.28 R to ■ BIPRU 3.4.29 R:

- (1) a *firm* must treat *exposures to multilateral development banks* in the same manner as *exposures to institutions* in accordance with ■ BIPRU 3.4.34 R to ■ BIPRU 3.4.39 R (Exposures to institutions: credit assessment based method); and
- (2) the preferential treatment for short-term *exposures* specified in ■ BIPRU 3.4.37 R, ■ BIPRU 3.4.39 R and ■ BIPRU 3.4.44 R must not be applied.

[Note: BCD Annex VI Part 1 point 19]

3.4.28

FCA PRA

R

An *exposure to a multilateral development bank* listed in point (1) of the definition in the *Glossary* must be assigned a 0% *risk weight*.

[Note: BCD Annex VI Part 1 point 20]

3.4.29

FCA PRA

R

A *risk weight* of 20% must be assigned to the portion of unpaid capital subscribed to the European Investment Fund.

[Note: BCD Annex VI Part 1 point 21]

Exposures to international organisations

3.4.30

FCA PRA

R

Exposures to the following international organisations must be assigned a 0% *risk weight*:

- (1) the *EU*;
- (2) the International Monetary Fund; and
- (3) the Bank for International Settlements.

[Note: BCD Annex VI Part 1 point 22]

Exposures to institutions: General

3.4.31

FCA PRA

R

■ BIPRU 3.4.32 R to ■ BIPRU 3.4.48 R set out the treatment to be accorded to *exposures to institutions*.**Exposures to institutions: Treatment**

3.4.32

FCA PRA

R

Without prejudice to ■ BIPRU 3.4.33 R to ■ BIPRU 3.4.47 R, *exposures to financial institutions* authorised and supervised by the *competent authorities* responsible for the authorisation and supervision of *credit institutions* and subject to prudential requirements equivalent to those applied to credit *institutions* must be *risk weighted* as *exposures to institutions*.

[Note: BCD Annex VI Part 1 point 24]

Exposures to institutions: Risk weight floor on exposures to unrated institutions

3.4.33

FCA PRA

R

Exposures to an unrated institution must not be assigned a risk weight lower than that applied to exposures to its central government.

[Note: BCD Annex VI Part 1 point 25]

Exposures to institutions: Credit assessment based method

3.4.34

FCA PRA

R

Exposures to institutions with a residual maturity of more than three months for which a credit assessment by a nominated ECAI is available must be assigned a risk weight according to the table in ■ BIPRU 3.4.35 R in accordance with the assignment by the appropriate regulator in accordance with the Capital Requirements Regulations 2006 of the credit assessments of eligible ECAIs to six steps in a credit quality assessment scale.

[Note: BCD Annex VI Part 1 point 29]

Table: Exposures to institutions with a residual maturity of more than three months for which a credit assessment by a nominated ECAI is available

3.4.35

FCA PRA

R

This table belongs to ■ BIPRU 3.4.34 R.

<i>Credit quality step</i>	1	2	3	4	5	6
<i>Risk weight</i>	20%	50%	50%	100%	100%	150%

3.4.36

FCA PRA

R

Without prejudice to ■ BIPRU 3.4.33 R, *exposures to unrated institutions must be assigned a risk weight of 50%.*

[Note: BCD Annex VI Part 1 point 30]

3.4.37

FCA PRA

R

Exposures to an institution with a residual maturity of three months or less for which a credit assessment by a nominated ECAI is available must be assigned a risk weight according to the table in ■ BIPRU 3.4.38 R in accordance with the assignment by the appropriate regulator in accordance with the Capital Requirements Regulations 2006 of the credit assessments of eligible ECAIs to six steps in a credit quality assessment scale.

[Note: BCD Annex VI Part 1 point 31]

Table: Exposures to an institution with a residual maturity of three months or less for which a credit assessment by a nominated ECAI is available

3.4.38

FCA PRA

R

This table belongs to ■ BIPRU 3.4.37 R.

<i>Credit quality step</i>	1	2	3	4	5	6
----------------------------	---	---	---	---	---	---

Risk weight	20%	20%	20%	50%	50%	150%
-------------	-----	-----	-----	-----	-----	------

3.4.39

FCA PRA

R

Without prejudice to ■ BIPRU 3.4.33 R, *exposures* to unrated *institutions* having an original effective maturity of three months or less must be assigned a 20% *risk weight*

[Note: BCD Annex VI Part 1 point 32]

Exposures to institutions: Interaction with short-term credit assessments

3.4.40

FCA PRA

R

If there is no short-term credit assessment as set out in ■ BIPRU 3.4.112 R, the general preferential treatment for short-term *exposures* as specified in ■ BIPRU 3.4.37 R applies to all *exposures* to *institutions* of up to three months residual maturity.

[Note: BCD Annex VI Part 1 point 34]

3.4.41

FCA PRA

R

If there is a short-term credit assessment as set out in ■ BIPRU 3.4.112 R and such an assessment determines the application of a more favourable or identical *risk weight* than the use of the general preferential treatment for short-term *exposures*, as specified in ■ BIPRU 3.4.37 R, then the short-term assessment and *risk weighting* specified in ■ BIPRU 3.4.112 R must be used for that specific *exposure* only. Other short-term *exposures* must follow the general preferential treatment for short-term *exposures*, as specified in ■ BIPRU 3.4.37 R.

[Note: BCD Annex VI Part 1 point 35]

3.4.42

FCA PRA

R

If there is a short-term credit assessment as set out in ■ BIPRU 3.4.112 R and such an assessment determines a less favourable *risk weight* than the use of the general preferential treatment for short-term *exposures*, as specified in ■ BIPRU 3.4.37 R, then the general preferential treatment for short-term *exposures* must not be used and all unrated short-term claims must be assigned the same *risk weight* as that applied by the specific short-term assessment.

[Note: BCD Annex VI Part 1 point 36]

3.4.43

FCA PRA

G

■ BIPRU 3 Annex 4 G contains a flow diagram guide to determining the *risk weight* to be applied to short-term *exposures* to *institutions* according to whether a short-term credit assessment is available.

Exposures to institutions: Short-term exposures in the national currency of the borrower

3.4.44

FCA PRA

R

A *firm* may assign to an *exposure* to an *institution* formed under the law of the *United Kingdom* of a residual maturity of 3 months or less denominated and funded in pounds sterling a *risk weight* that is one category less favourable than the preferential *risk weight*, as described

in ■ BIPRU 3.4.5 R (Exposures in the national currency of the borrower), assigned to *exposures* to the central government of the *United Kingdom*.

[Note: BCD Annex VI Part 1 point 37]

3.4.45

FCA PRA

R

(1) Where a *competent authority* of another *EEA State* implements point 37 of Part 1 of Annex VI of the *Banking Consolidation Directive* by exercising the discretion to allow the treatment in that point, a *firm* may assign to the relevant national currency *exposures* the *risk weight* permitted by that *CRD implementation measure*.

(2) When the *competent authority* of a third country which applies supervisory and regulatory arrangements at least equivalent to those applied in the *EEA* assigns to an *exposure* to an *institution* formed under the law of that third country of a residual maturity of 3 months or less denominated and funded in the national currency a *risk weight* that is one category less favourable than the preferential *risk weight*, as described in ■ BIPRU 3.4.6 R (Exposures in the national currency of the borrower), assigned to *exposures* to the central government of that third country, a *firm* may *risk weight* such *exposures* in the same manner.

[Note: BCD Annex VI Part 1 point 37]

3.4.46

FCA PRA

R

No *exposures* of a residual maturity of 3 months or less denominated and funded in the national currency of the borrower may be assigned a *risk weight* less than 20%.

[Note: BCD Annex VI Part 1 point 38]

Exposures to institutions: Investments in regulatory capital instruments

3.4.47

FCA PRA

R

Investments in *equity* or regulatory capital instruments issued by *institutions* must be *risk weighted* at 100%, unless deducted from *capital resources*.

[Note: BCD Annex VI Part 1 point 39]

Exposures to institutions: Minimum reserves required by the ECB

3.4.48

FCA PRA

R

Where an *exposure* to an *institution* is in the form of minimum reserves required by the European Central Bank or by the *central bank* of an *EEA State* to be held by the *firm*, a *firm* may assign the *risk weight* that would be assigned to *exposures* to the *central bank* of the *EEA State* in question provided:

- (1) the reserves are held in accordance with Regulation (EC) No. 1745/2003 of the European Central Bank of 12 September 2003 or a subsequent replacement regulation or in accordance with national requirements in all material respects equivalent to that Regulation; and

- (2) in the event of the bankruptcy or insolvency of the *institution* where the reserves are held, the reserves will be fully repaid to the *firm* in a timely manner and will not be available to meet other liabilities of the *institution*.

[Note: BCD Annex VI Part 1 point 40]

Exposures to corporates: General

3.4.49

FCA PRA

G

■ BIPRU 3.4.50 R to ■ BIPRU 3.4.52 R set out the treatment to be accorded to *exposures* to *corporates*.

Exposures to corporates: Treatment

3.4.50

FCA PRA

R

Exposures for which a credit assessment by a *nominated ECAI* is available must be assigned a *risk weight* according to the table in ■ BIPRU 3.4.51 R in accordance with the assignment by the *appropriate regulator* in accordance with the *Capital Requirements Regulations 2006* of the credit assessments of *eligible ECAIs* to six steps in a *credit quality assessment scale*.

[Note: BCD Annex VI Part 1 point 41]

Table: Exposures for which a credit assessment by a nominated ECAI is available

3.4.51

FCA PRA

R

This table belongs to ■ BIPRU 3.4.50 R.

Credit quality step	1	2	3	4	5	6
Risk weight	20%	50%	100%	100%	150%	150%

3.4.52

FCA PRA

R

Unrated *exposures* must be assigned a 100% *risk weight* or the *risk weight* of its central government, whichever is the higher.

[Note: BCD Annex VI Part 1 point 42]

Retail exposures

3.4.53

FCA PRA

R

Exposures that comply with the criteria listed in ■ BIPRU 3.2.10 R must be assigned a *risk weight* of 75%. However a *firm* may treat such an *exposure* under ■ BIPRU 3.2.24 R (100% *risk weight*).

[Note: BCD Annex VI Part 1 point 43]

Exposures secured by real estate property

3.4.54

FCA PRA

R

■ BIPRU 3.4.55 R to ■ BIPRU 3.4.94 R set out the treatment to be accorded to *exposures* secured by real estate property.

3.4.55

FCA PRA

R

Without prejudice to ■ BIPRU 3.4.56 R to ■ BIPRU 3.4.94 R, *exposures* fully secured by real estate property must be assigned a *risk weight* of 100%.

[Note: BCD Annex VI Part 1 point 44]

Exposures secured by mortgages on residential property

3.4.56

FCA PRA

R

Without prejudice to ■ BIPRU 3.4.85 R, an *exposure* or any part of an *exposure* fully and completely secured, to the satisfaction of the *firm*, by mortgages on residential property which is or shall be occupied or let by the owner or the beneficial owner in the case of personal investment companies must be assigned a *risk weight* of 35%.

[Note: BCD Annex VI Part 1 point 45]

3.4.56A

FCA PRA

R

- (1) A *firm* must not treat a *lifetime mortgage* as an *exposure* fully and completely secured on residential property for the purposes of ■ BIPRU 3.4.56 R unless the amount of the *exposure* is calculated according to the following formula:

exposure amount =

$$\frac{P(1+i)^T}{(1+d)^T}$$

where:

- (a) P is the current outstanding balance on the *lifetime mortgage*;
 - (b) i is the interest rate charged on the *lifetime mortgage*, which for the purposes of this calculation must not be lower than the discount rate referred to in (c);
 - (c) d is the discount rate which is the risk-free rate as represented by the yield on 10-year UK government bonds; and
 - (d) T is the projected number of years to maturity of the *exposure*.
- (2) Notwithstanding (1)(c), a *firm* may calculate an annual average discount rate provided there is no obvious bias in its calculation and it is consistent in its approach.

3.4.56B

FCA PRA

G

- (1) This paragraph provides *guidance* on ■ BIPRU 3.4.56A R.
- (2) For the purposes of ■ BIPRU 3.4.56A R (2), a *firm* may use the FTSE UK gilt 10-year yield index which the Council of Mortgage Lenders makes available to its members.
- (3) If a *firm* offers a variable interest rate on a *lifetime mortgage*, it should calculate an average interest rate in a way which is consistent with the calculation of the discount rate.
- (4) To determine the projected number of years to maturity of the *exposure*, a *firm* may use the standard mortality tables published by the Institute of Actuaries or the Faculty of Actuaries. For internal risk management purposes, the *firm* should use factual data or seek actuarial advice to determine how the information in these tables may be adjusted to take account of regional and other relevant variations.

3.4.57

FCA PRA

R

Exposures fully and completely secured, to the satisfaction of the firm, by shares in Finnish residential housing companies, operating in accordance with the Finnish Housing Company Act of 1991 or subsequent equivalent legislation, in respect of residential property which is or shall be occupied or let by the owner must be assigned a risk weight of 35%.

[Note: BCD Annex VI Part 1 point 46]

3.4.58

FCA PRA

R

Without prejudice to ■ BIPRU 3.4.85 R, an *exposure* or any part of an *exposure* to a tenant under a property leasing transaction concerning residential property under which the *firm* is the lessor and the tenant has an option to purchase, must be assigned a *risk weight* of 35% provided that the *firm* is satisfied that the *exposure* of the *firm* is fully and completely secured by its ownership of the property.

[Note: BCD Annex VI Part 1 point 47]

3.4.59

FCA PRA

G

An Ijara mortgage is an example of an *exposure* described in ■ BIPRU 3.4.58 R.

3.4.60

FCA PRA

R

- (1) In the exercise of its judgement for the purposes of ■ BIPRU 3.4.56 R to ■ BIPRU 3.4.58 R, a *firm* may be satisfied only if the conditions in (2) to (6) are met.
- (2) The value of the property does not materially depend upon the credit quality of the obligor. This requirement does not preclude situations where purely macroeconomic factors affect both the value of the property and the performance of the borrower.
- (3) The risk of the borrower does not materially depend upon the performance of the underlying property or project, but rather on the underlying capacity of the borrower to repay the debt

from other sources. As such, repayment of the facility does not materially depend on any cash flow generated by the underlying property serving as collateral.

- (4) The minimum requirements about:
- (a) legal certainty in ■ BIPRU 3.4.64 R;
 - (b) monitoring of property values in ■ BIPRU 3.4.66 R;
 - (c) documentation in ■ BIPRU 3.4.72 R; and
 - (d) insurance in ■ BIPRU 3.4.73 R;
- are met.
- (5) The valuation *rules* set out in ■ BIPRU 3.4.77 R to ■ BIPRU 3.4.80 R are met.
- (6) The value of the property exceeds the *exposures* by a substantial margin as set out in ■ BIPRU 3.4.81 R, ■ BIPRU 3.4.83 R, ■ BIPRU 3.4.84 R or ■ BIPRU 3.4.85 R (as applicable).

[Note: BCD Annex VI Part 1 point 48]

3.4.61

FCA PRA

R

■ BIPRU 3.4.60 R (3) does not apply to *exposures* fully and completely secured by mortgages on residential property which is situated within the *United Kingdom*.

[Note: BCD Annex VI Part 1 point 49]

3.4.62

FCA PRA

G

The *Banking Consolidation Directive* permits a *competent authority* to disapply the condition in ■ BIPRU 3.4.60 R (3), if it has evidence that a well-developed and long-established residential real estate market is present in its territory with loss rates which are sufficiently low to justify such treatment. ■ BIPRU 3.4.61 R implements that option. However, if the evidence changes so that these conditions are no longer satisfied, the *appropriate regulator* may be obliged to revoke ■ BIPRU 3.4.61 R.

3.4.63

FCA PRA

R

If a *CRD implementation measure* of another *EEA State* exercises the discretion in point 49 of Part 1 of Annex VI of the *Banking Consolidation Directive* to dispense with the condition corresponding to ■ BIPRU 3.4.60 R (3) (The risk of the borrower should not materially depend upon the performance of the underlying property or project) , a *firm* may apply a *risk weight* of 35% to such *exposures* fully and completely secured by mortgages on residential property situated in that *EEA State*.

[Note: BCD Annex VI Part 1 point 50]

3.4.64

FCA PRA

R

The requirements about legal certainty referred to in ■ BIPRU 3.4.60 R (4)(a) are as follows:

- (1) the mortgage or charge must be enforceable in all relevant jurisdictions which are relevant at the time of conclusion of the credit agreement, and the mortgage or charge must be properly filed on a timely basis;
- (2) the arrangements must reflect a perfected lien (i.e. all legal requirements for establishing the pledge shall have been fulfilled); and
- (3) the protection agreement and the legal process underpinning it must enable the *firm* to realise the value of the protection within a reasonable timeframe.

[Note: BCD Annex VIII Part 2 point 8(a)]

3.4.65

FCA PRA

G

The term protection agreement in ■ BIPRU 3.4.64 R (3) refers to the contract or deed by which the mortgage or charge is established.

3.4.66

FCA PRA

R

- (1) The requirements about monitoring of property values referred to in ■ BIPRU 3.4.60 R (4)(b) are as follows:
 - (a) the value of the property must be monitored on a frequent basis and at a minimum once every three years for residential real estate;
 - (b) more frequent monitoring must be carried out where the market is subject to significant changes in conditions;
 - (c) statistical methods may be used to monitor the value of the property and to identify property that needs revaluation;
 - (d) the property valuation must be reviewed by an independent valuer when information indicates that the value of the property may have declined materially relative to general market prices; and
 - (e) for loans exceeding €3 million or 5% of the *capital resources* of the *firm*, the property valuation must be reviewed by an independent valuer at least every three years.
- (2) For the purposes of (1), 'independent valuer' means a person who possesses the necessary qualifications, ability and experience to execute a valuation and who is independent from the credit decision process.

[Note: BCD Annex VIII Part 2 point 8(b)]

- 3.4.67** FCA PRA G A property will need to be revalued over time to ensure that the original purchase price does not overstate the degree of security provided by the property. Ijara providers should undertake revaluations in the same way as providers of conventional mortgages.
- 3.4.68** FCA PRA G For the purposes of ■ BIPRU 3.4.66 R (1)(a), the monitoring of property values should be an inherent part of risk managing and tracking the portfolio. The requirement to monitor property values does not include the physical assessment of each property in the portfolio.
- 3.4.69** FCA PRA G For the purposes of ■ BIPRU 3.4.66 R (1)(d) and ■ (e), the review of a property valuation is more in-depth than the normal monitoring process required by ■ BIPRU 3.4.66 R (1)(a). This requirement is likely to include a review of the property value on an individual *exposure* basis. Where an *exposure* is secured by multiple properties, the review can be undertaken at the level of the *exposure*, rather than at the level of each individual property.
- 3.4.70** FCA PRA G The review of property values required by ■ BIPRU 3.4.66 R (1)(e) may lead to an amendment of the value assigned to the property under by ■ BIPRU 3.4.80 R.
- 3.4.71** FCA PRA G For the purposes of ■ BIPRU 3.4.66 R (2), necessary qualifications need not be professional qualifications but the firm should be able to demonstrate that he or she has the necessary ability and experience to undertake the review.
- 3.4.72** FCA PRA R The requirements about documentation referred to in ■ BIPRU 3.4.60 R (4)(c) are that the types of residential real estate accepted by the *firm* and its lending policies in this regard must be clearly documented.
- [Note: BCD Annex VIII Part 2 point 8(c)]
- 3.4.73** FCA PRA R The requirements about insurance referred to in ■ BIPRU 3.4.60 R (4)(d) are that the *firm* must have procedures to monitor that the property taken as protection is adequately insured against damage.
- [Note: BCD Annex VIII Part 2 point 8(d)]
- 3.4.74** FCA PRA G For the purposes of ■ BIPRU 3.4.73 R a *firm* should, as a minimum, ensure that it is a requirement of each loan that the property taken as collateral must have adequate buildings insurance at all times, which should be reviewed when any new loan is extended against the property.
- 3.4.75** FCA PRA G A *firm* may deal with the risk that insurance on properties taken as protection may be inadequate by taking out insurance at the level of the portfolio.
- 3.4.76** FCA PRA R The valuation *rules* referred to in ■ BIPRU 3.4.60 R (5) are set out in ■ BIPRU 3.4.77 R to ■ BIPRU 3.4.80 R.
- 3.4.77** FCA PRA R The property must be valued by an independent valuer at or less than the market value. In those *EEA States* that have laid down rigorous criteria

for the assessment of the mortgage lending value in statutory or regulatory provisions the property may instead be valued by an independent valuer at or less than the mortgage lending value.

[Note: BCD Annex VIII Part 3 point 62]

3.4.78

FCA PRA

R

Market value means the estimated amount for which the property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. The market value must be documented in a transparent and clear manner.

[Note: BCD Annex VIII Part 3 point 63]

3.4.79

FCA PRA

R

Mortgage lending value means the value of the property as determined by a prudent assessment of the future marketability of the property taking into account long-term sustainable aspects of the property, the normal and local market conditions, the current use and alternative appropriate uses of the property. Speculative elements must not be taken into account in the assessment of the mortgage lending value. The mortgage lending value must be documented in a transparent and clear manner.

[Note: BCD Annex VIII Part 3 point 64]

3.4.80

FCA PRA

R

The value of the collateral must be the market value or mortgage lending value reduced as appropriate to reflect the results of the monitoring required under ■ BIPRU 3.4.60 R (4)(b) and ■ BIPRU 3.4.66 R and to take account of any prior claims on the property.

[Note: BCD Annex VIII Part 3 point 65]

3.4.81

FCA PRA

R

A *firm* may not treat an *exposure* as fully and completely secured by residential property located in the *United Kingdom* for the purpose of ■ BIPRU 3.4.56 R or ■ BIPRU 3.4.58 R unless the amount of the *exposure* or of the secured part of the *exposure* referred to in ■ BIPRU 3.4.56 R or ■ BIPRU 3.4.58 R, as the case may be, is 80% or less of the value of the residential property on which it is secured.

3.4.82

FCA PRA

G

- (1) The application of ■ BIPRU 3.4.81 R may be illustrated by an example. If a *firm* has a mortgage *exposure* of £100,000 secured on residential property in the *United Kingdom* that satisfies the criteria listed in ■ BIPRU 3.4.56 R to ■ BIPRU 3.4.80 R and the value of that property is £100,000, then £80,000 of that *exposure* may be treated as fully and completely secured and *risk weighted* at 35%. The remaining £20,000 may be *risk weighted* at 75% provided the *exposure* meets the criteria in ■ BIPRU 3.2.10 R. The portion *risk weighted* at 75% should be treated as a *retail exposure* for the purposes of the aggregation calculations specified in ■ BIPRU 3.2.10 R (3). A diagrammatic illustration of this example is in (2).

(2)

EXAMPLE

- £100,000 loan secured on property valued at £100,000
- First £80,000 (80% LTV) *risk weighted at 35%*
- Remaining £20,000 *risk weighted at 75%* if meets retail criteria: counts to retail aggregation calculation
- Overall *risk weight* = 43%

- (3) The same approach applies to *exposures* described in ■ BIPRU 3.4.58 R. On initiation a 35% *risk weight* should be applied to the first 80% of the principal/"purchase price" outstanding, with a 75% *risk weight* being applied to the remainder of the principal (assuming that the *exposure* meets the requirements in ■ BIPRU 3.2 to be treated as a *retail exposure*).

3.4.83

FCA PRA

R

A *firm* may only treat an *exposure* as fully and completely secured by residential property situated in another *EEA State* for the purposes of ■ BIPRU 3.4.56 R or ■ BIPRU 3.4.58 R if it would be treated as fully and completely secured by the relevant *CRD implementation measures* in that *EEA State* implementing points 45 and 47 of Part 1 of Annex VI of the *Banking Consolidation Directive*.

3.4.84

FCA PRA

R

For the purposes of ■ BIPRU 3.4.56 R or ■ BIPRU 3.4.58 R, a *firm* may only treat an *exposure* as fully and completely secured by residential property situated in the territory of a *third-country competent authority* that is listed as equivalent for credit risk in ■ BIPRU 8 Annex 6 R if it would be treated as fully and completely secured under the applicable requirements of that *third-country competent authority* (including any applicable loan-to-value ceiling).

3.4.85

FCA PRA

R

For the purposes of ■ BIPRU 3.4.56 R or ■ BIPRU 3.4.58 R, where the residential property in question is situated in the territory of a *third-country competent authority* that is not listed as equivalent for credit risk in ■ BIPRU 8 Annex 3 R:

- (1) a *firm* must not treat an *exposure* as fully and completely secured by the residential property in question unless the value of the property exceeds the *exposures* by a substantial margin, which must be at least 20%;
- (2) the *firm* must apply a *risk weight* of 50% to the *exposure*.

3.4.86

FCA PRA

G

For the purposes of ■ BIPRU 3.4.85 R (1) and in order to satisfy itself that an *exposure* is fully and completely secured by the relevant property, a *firm* should make its own assessment of the appropriate margin in each case, using its knowledge of the market in the relevant country and of its own portfolio.

3.4.87

FCA PRA

G

If a *firm* has more than one *exposure* secured on the same property they should be aggregated and treated as if they were a single *exposure* secured on the property for the purposes of ■ BIPRU 3.4.56 R and ■ BIPRU 3.4.58 R and ■ BIPRU 3.4.81 R, ■ BIPRU 3.4.83 R and ■ BIPRU 3.4.84 R.

3.4.88

FCA PRA

G

If an *exposure* is secured on property that is used in part for residential purposes in accordance with ■ BIPRU 3.4.56 R and partly for commercial purposes (such as a farm, public house, guest house or shop) it may be treated as secured by residential real estate if the *firm* can demonstrate that the property's main use is, or will be, residential and that the value of the property is not significantly affected by its commercial use.

Exposures secured by mortgages on commercial real estate

3.4.89

FCA PRA

R

Exposures or any part of an *exposure* secured by mortgages on offices or other commercial premises which cannot properly be considered to fall within any other *standardised credit risk exposure class* or to qualify for a lower *risk weight* under ■ BIPRU 3 must be assigned a *risk weight* of 100%.

[Note: BCD Annex VI Part 1 point 51]

3.4.90

FCA PRA

R

Exposures fully and completely secured by shares in Finnish housing companies, operating in accordance with the Finnish Housing Company Act of 1991 or subsequent equivalent legislation, in respect of offices or other commercial premises may be assigned a *risk weight* of 50%.

[Note: BCD Annex VI Part 1 point 52]

3.4.91

FCA PRA

R

If a *CRD implementation measure* in another *EEA State* implements the discretion in point 51 of Part 1 of Annex VI of the *Banking Consolidation Directive*, a *firm* may apply the same treatment as that *CRD implementation measure* to *exposures* falling within the scope of that *CRD implementation measure* which are fully and completely secured by mortgages on offices or other commercial premises situated in that *EEA State*.

[Note: BCD Annex VI Part 1 points 51 and 57]

3.4.92

FCA PRA

R

If a *CRD implementation measure* in another *EEA State* implements the discretion in point 53 of Part 1 of Annex VI of the *Banking Consolidation Directive*, a *firm* may apply the same treatment as that *CRD implementation measure* to *exposures* related to property leasing transactions concerning offices or other commercial premises situated in that *EEA State* and governed by statutory provisions whereby the lessor retains full ownership of the rented assets until the tenant exercises his option to purchase, as long as that *exposure* falls within the scope of that *CRD implementation measure*.

[Note: BCD Annex VI Part 1 points 53 and 57]

3.4.93

FCA PRA

R

In particular, if a *firm* applies ■ BIPRU 3.4.91 R or ■ BIPRU 3.4.92 R, it must comply with the corresponding *CRD implementation measures* in relation to points 54-56 of Part 1 of Annex VI of the *Banking Consolidation Directive*.

[Note: *BCD* Annex VI Part 1 points 54 to 56]

3.4.94

FCA PRA

R

- (1) If a *CRD implementation measure* in another *EEA State* implements the discretion in point 58 of Part 1 of Annex VI of the *Banking Consolidation Directive* to dispense with the condition in point 54(b) for *exposures* fully and completely secured by mortgages on commercial property situated in that *EEA State*, a *firm* may apply the same treatment as that *CRD implementation measure* to *exposures* fully and completely secured by mortgages on commercial property situated in that *EEA State* falling within the scope of that *CRD implementation measure*.
- (2) However a *firm* may not apply the treatment in (1) if the eligibility to use that treatment under the *CRD implementation measure* referred to in (1) ceases as contemplated under point 59 of Annex VI of the *Banking Consolidation Directive* (condition in point 54(b) must apply where conditions in point 58 are not satisfied).

[Note: *BCD* Annex VI Part 1 points 58, 59 and 60]

Past due items

3.4.95

FCA PRA

G

■ BIPRU 3.4.96 R to ■ BIPRU 3.4.101 R set out the treatment to be accorded to past due items.

3.4.96

FCA PRA

R

Without prejudice to the provisions contained in ■ BIPRU 3.4.97 R to ■ BIPRU 3.4.101 R, the unsecured part of any item that is past due for more than 90 days (irrespective of the amount of that item or of the unsecured portion of that item) must be assigned a *risk weight* of:

- (1) 150% if value adjustments are less than 20% of the unsecured part of the *exposure* gross of value adjustments; and
- (2) 100% if value adjustments are no less than 20% of the unsecured part of the *exposure* gross of value adjustments.

[Note: *BCD* Annex VI Part 1 point 61]

3.4.97

FCA PRA

R

For the purpose of defining the secured portion of the past due item, eligible collateral and guarantees must be those eligible for *credit risk mitigation* purposes under ■ BIPRU 5.

[Note: *BCD* Annex VI Part 1 point 62]

3.4.98

FCA PRA

G

For the purposes of ■ BIPRU 3.4.97 R, the secured portion of a past due item is dealt with under ■ BIPRU 5 (Credit risk mitigation). A *firm* may treat the secured portion of an *exposure* covered by a mortgage indemnity product that meets the relevant CRM eligibility criteria as secured for the purposes of ■ BIPRU 3.4.97 R. The *risk weight* to be applied to the secured portion is determined under ■ BIPRU 5.7.21 R to ■ BIPRU 5.7.24 R. The *risk weight* of the unsecured portion is determined in accordance with ■ BIPRU 3.4.96 R.

3.4.99

FCA PRA

R

Exposures indicated in ■ BIPRU 3.4.56 R to ■ BIPRU 3.4.63 R (Exposures secured by mortgages on residential property) must be assigned a *risk weight* of 100% net of value adjustments if they are past due for more than 90 days. If value adjustments are no less than 20% of the *exposure* gross of value adjustments, the *risk weight* to be assigned to the remainder of the *exposure* is 50%.

[Note: BCD Annex VI Part 1 point 64]

3.4.100

FCA PRA

G

The application of ■ BIPRU 3.4.96 R and ■ BIPRU 3.4.99 R may be illustrated on the basis of a £110,000 loan on a property valued at £100,000, where £80,000 of the loan is secured and £30,000 of the exposure is unsecured and provisions of £20,000 are taken:

- (1) Option 1 (application of ■ BIPRU 3.4.96 R):
 - (a) provision of £20,000 taken on £80,000 secured *exposure*;
 - (b) provision exceeds 20%, so the *firm* should *risk weight* the remaining £60,000 secured *exposure* at 50%;
 - (c) the *risk weight* to be applied to the unsecured *exposure* of £30,000 is 150%;
 - (d) the average *risk weight* to be assigned to the net *exposure* of £90,000 is 83%.
- (2) Option 2 (application of ■ BIPRU 3.4.99 R):
 - (a) provision of £20,000 taken on £30,000 unsecured *exposure*;
 - (b) provision exceeds 20%, so the *firm* should *risk weight* the remaining £10,000 unsecured *exposure* at 100%;
 - (c) the *risk weight* to be applied to the secured *exposure* of £80,000 is 100%;
 - (d) the average *risk weight* to be assigned to the net *exposure* of £90,000 is 100%.

3.4.101

FCA PRA

R

Exposures indicated in ■ BIPRU 3.4.89 R to ■ BIPRU 3.4.94 R (Exposures secured by mortgages on commercial real estate) must be assigned a *risk weight* of 100% if they are past due for more than 90 days.

[Note: BCD Annex VI Part 1 point 65]

3.4.102

FCA PRA

R

Non past due items to be assigned a 150% *risk weight* under ■ BIPRU 3.4 and for which value adjustments have been established may be assigned a *risk weight* of:

- (1) 100% if value adjustments are no less than 20% of the *exposure* value gross of value adjustments; and
- (2) 50%, if value adjustments are no less than 50% of the *exposure* value gross of value adjustments.

[Note: BCD Annex VI Part 1 point 67]

Items belonging to regulatory high-risk categories

3.4.103

FCA PRA

R

■ BIPRU 3.4.104 R sets out the treatment to be accorded to items belonging to regulatory high-risk categories.

3.4.104

FCA PRA

R

Exposures listed in ■ BIPRU 3 Annex 3 R must be assigned a *risk weight* of 150%.

[Note: BCD Annex VI Part 1 point 66]

3.4.105

FCA PRA

G

For the purposes of point 66 of Part 1 of Annex VI of the *Banking Consolidation Directive*, the *exposures* listed in ■ BIPRU 3 Annex 3 R are in the view of the *appropriate regulator* associated with particularly high risk.

Exposures in the form of covered bonds

3.4.106

FCA PRA

R

■ BIPRU 3.4.107 R to ■ BIPRU 3.4.110 R set out the treatment to be accorded to *exposures* in the form of *covered bonds*.

3.4.107

FCA PRA

R

- (1) *Covered bonds* means covered bonds as defined in paragraph (1) of the definition in the *glossary* (Definition based on Article 22(4) of the *UCITS Directive*) and collateralised by any of the following eligible assets:
 - (a) *exposures* to or guaranteed by central governments, *central bank*, *public sector entities*, regional governments and local authorities in the *EEA*;
 - (b) (i) *exposures* to or guaranteed by non-*EEA* central governments, non-*EEA central banks*, *multilateral development banks*, *international organisations* that qualify for the *credit quality step 1*;
 - (ii) *exposures* to or guaranteed by non-*EEA public sector entities*, non-*EEA* regional governments and non-*EEA* local authorities that are *risk weighted* as *exposures to institutions* or central governments and *central banks* according to ■ BIPRU 3.4.23 R, ■ BIPRU 3.4.24 R, ■ BIPRU 3.4.10 R or ■ BIPRU 3.4.16 G to ■ BIPRU 3.4.17 R

- respectively and that qualify for the *credit quality step 1*; and
- (iii) *exposures* in the sense of this point (b) that qualify as a minimum for the *credit quality step 2*, provided that they do not exceed 20% of the nominal amount of outstanding *covered bonds* of issuing *institutions*;
- (c) *exposures* to *institutions* that qualify for the *credit quality step 1* but so that:
- (i) the total exposure of this kind must not exceed 15% of the nominal amount of the outstanding *covered bonds* of the issuing *credit institution*;
 - (ii) *exposures* caused by transmission and management of payments of the obligors of, or liquidation proceeds in respect of, loans secured by real estate to the holders of *covered bonds* must not be comprised by the 15% limit; and
 - (iii) *exposures* to *institutions* in the *EEA* with a maturity not exceeding 100 days are not comprised by the step 1 requirement but those *institutions* must as a minimum qualify for *credit quality step 2*;
- (d) loans secured:
- (i) by residential real estate or shares in Finnish residential housing companies as referred to in ■ BIPRU 3.4.57 R up to the lesser of the principal amount of the liens that are combined with any prior liens and 80% of the value of the pledged properties; or
 - (ii) by senior units issued by French Fonds Communs de Créances or by equivalent *securitisation* entities governed by the laws of an *EEA State securitising* residential real estate *exposures* provided that the special public supervision to protect bond holders as provided for in Article 52(4) of Directive 2009/65/EC of the European Parliament and of the Council ensures that the assets underlying such units must, at any time while they are included in the cover pool, be at least 90% composed of residential mortgages that are combined with any prior liens up to the lesser of the principal amounts due under the units, the principal amounts of the liens, and 80% of the value of the pledged properties, that the units qualify for *credit quality step 1* and that such units do not exceed 10% of the nominal amount of the outstanding issue; or

- (e) (i) loans secured by commercial real estate or shares in Finnish housing companies as referred to in ■ BIPRU 3.4.57 R up to the lesser of the principal amount of the liens that are combined with any prior liens and 60% of the value of the pledged properties; or
- (ii) loans secured by senior units issued by French Fonds Communs de Créances or by equivalent *securitisation* entities governed by the laws of an *EEA State securitising* commercial real estate *exposures* provided that the special public supervision to protect bond holders as provided for in Article 52(4) of Directive 2009/65/EC of the European Parliament and of the Council ensures that the assets underlying such units must, at any time while they are included in the cover pool, be at least 90% composed of commercial mortgages that are combined with any prior liens up to the lesser of the principal amounts due under the units, the principal amounts of the liens, and 60% of the value of the pledged properties, that the units qualify for *credit quality step 1* and that such units do not exceed 10% of the nominal amount of the outstanding issue; or
- (iii) a *firm* may recognise loans secured by commercial real estate as eligible where the loan to value ratio of 60% is exceeded up to a maximum level of 70% if the value of the total assets pledged as collateral for the *covered bonds* exceed the nominal amount outstanding on the *covered bond* by at least 10%, and the bondholders' claim meets the legal certainty requirements set out in ■ BIPRU 3 and ■ BIPRU 5; the bondholders' claim must take priority over all other claims on the collateral; or
- (f) loans secured by ships where only liens that are combined with any prior liens within 60% of the value of the pledged ship.
- (2) For the purposes of ■ BIPRU 3.4.107 R (1)(d)(ii) and ■ BIPRU 3.4.107 R (1)(e)(ii) *exposures* caused by transmission and management of payments of the obligors of, or liquidation proceeds in respect of, loans secured by pledged properties of the senior units or debt *securities* must not be comprised in calculating the 90% limit.
- (3) For the purposes of ■ BIPRU 3.4.107 R to ■ BIPRU 3.4.110 R "collateralised" includes situations where the assets described in subpoints (1)(a) to (1)(f) are exclusively dedicated in law to the protection of the bond-holders against losses.
- (4) [deleted]

(4A) Until 31 December 2013, the 10% limit for senior units issued by French Fonds Communs de Créances or by equivalent *securitisation* entities as specified in (1)(d)(ii) and (1)(e)(ii) does not apply, provided that:

- (a) the *securitised* residential or commercial real estate *exposures* were originated by a member of the same consolidated group of which the *issuer* of the *covered bonds* is also a member or by an entity affiliated to the same central body to which the *issuer* of the *covered bonds* is also affiliated (that common group membership or affiliation to be determined at the time the senior units are made collateral for *covered bonds*); and
- (b) a member of the same consolidated group of which the *issuer* of the *covered bonds* is also a member or an entity affiliated to the same central body to which the *issuer* of the *covered bonds* is also affiliated retains the whole first loss tranche supporting those senior units.

(5) Until 31 December 2010 the figure of 60% in (1)(f) can be replaced with a figure of 70%.

[Note: BCD Annex VI Part 1 point 68]

3.4.108

FCA PRA

R

A *firm* must for real estate collateralising *covered bonds* meet the minimum requirements set out in ■ BIPRU 3.4.64 R to ■ BIPRU 3.4.73 R and the valuation rules set out in ■ BIPRU 3.4.77 R to ■ BIPRU 3.4.80 R.

[Note: BCD Annex VI Part 1 point 69]

3.4.109

FCA PRA

R

Notwithstanding ■ BIPRU 3.4.107 R to ■ BIPRU 3.4.108 R, *covered bonds* meeting the definition of Article 22(4) of the *UCITS Directive* and issued before 31 December 2007 are also eligible for the preferential treatment until their maturity.

[Note: BCD Annex VI Part 1 point 70]

3.4.110

FCA PRA

R

Covered bonds must be assigned a *risk weight* on the basis of the *risk weight* assigned to senior unsecured *exposures* to the *credit institution* which issues them. The following correspondence between *risk weights* applies:

- (1) if the *exposures* to the *institution* are assigned a *risk weight* of 20%, the *covered bond* must be assigned a *risk weight* of 10%;
- (2) if the *exposures* to the *institution* are assigned a *risk weight* of 50%, the *covered bond* must be assigned a *risk weight* of 20%;

- (3) if the *exposures* to the *institution* are assigned a *risk weight* of 100%, the *covered bond* must be assigned a *risk weight* of 50%; and
- (4) if the *exposures* to the *institution* are assigned a *risk weight* of 150%, the *covered bond* must be assigned a *risk weight* of 100%.

[Note: BCD Annex VI Part 1 point 71]

Items representing securitisation positions

3.4.111
FCA PRA

R *Risk weighted exposure* amounts for *securitisation* positions must be determined in accordance with ■ BIPRU 9.

[Note: BCD Annex VI Part 1 point 72]

Exposures to institutions and corporates with a short-term credit assessment

3.4.112
FCA PRA

R *Exposures to institutions* where ■ BIPRU 3.4.34 R to ■ BIPRU 3.4.39 R apply, and *exposures to corporates* for which a short-term credit assessment by a *nominated ECAI* is available must be assigned a *risk weight* according to the table in ■ BIPRU 3.4.113 R in accordance with the mapping by the *appropriate regulator* in accordance with the *Capital Requirements Regulations 2006* of the credit assessments of *eligible ECAIs* to six steps in a *credit quality assessment scale*.

[Note: BCD Annex VI Part 1 point 73]

Table: Exposures to institutions where BIPRU 3.4.34 R to BIPRU 3.4.39 R apply, and exposures to corporates for which a short-term credit assessment by a nominated ECAI is available

3.4.113
FCA PRA

R This table belongs to ■ BIPRU 3.4.112 R.

<i>Credit quality step</i>	1	2	3	4	5	6
<i>Risk weight</i>	20%	50%	100%	150%	150%	150%

Exposures in the form of collective investment undertakings (CIUs)

3.4.114
FCA PRA

R ■ BIPRU 3.4.115 R to ■ BIPRU 3.4.125 R set out the treatment to be accorded to *exposures* in the form of *CIUs*.

3.4.115
FCA PRA

R Without prejudice to ■ BIPRU 3.4.116 R to ■ BIPRU 3.4.125 R, *exposures* in *CIUs* must be assigned a *risk weight* of 100%.

[Note: BCD Annex VI Part 1 point 74]

3.4.116
FCA PRA

R *Exposures* in the form of *CIUs* for which a credit assessment by a *nominated ECAI* is available must be assigned a *risk weight* according to the table in ■ BIPRU 3.4.117 R in accordance with the assignment by the *appropriate regulator* in accordance with the *Capital Requirements*

Regulations 2006 of the credit assessments of eligible ECAIs to six steps in a credit quality assessment scale.

[Note: BCD Annex VI Part 1 point 75]

3.4.117

FCA PRA

R

Table: Exposures in the form of CIUs for which a credit assessment by a nominated ECAI is available

This table belongs to ■ BIPRU 3.4.116 R.

Credit quality step	1	2	3	4	5	6
Risk weight	20%	50%	100%	100%	150%	150%

3.4.118

FCA PRA

R

Where a *firm* considers that a position in a *CIU* is associated with particularly high risks it must assign that position a *risk weight* of 150%.

[Note: BCD Annex VI Part 1 point 76]

3.4.119

FCA PRA

G

A *firm* should consider a *CIU* as being high risk where there is no external credit assessment from an *eligible ECAI* and where the *CIU* has specific features (such as high levels of leverage or lack of transparency) that prevent it from meeting the eligibility criteria laid out in ■ BIPRU 3.4.121 R.

3.4.120

FCA PRA

G

Other examples of high risk *CIUs* are: one in which a substantial element of the *CIU's* property is made up of items that would attract a *risk weight* of over 100%; or one whose mandate (as referred to in ■ BIPRU 3.4.124 R) would permit it to invest in a substantial amount of such items.

3.4.121

FCA PRA

R

Where ■ BIPRU 3.4.116 R does not apply, a *firm* may determine the *risk weight* for a *CIU* as set out in ■ BIPRU 3.4.123 R to ■ BIPRU 3.4.125 R, if the following eligibility criteria are met:

- (1) one of the following conditions is satisfied:
 - (a) the *CIU* is managed by a company which is subject to supervision in an *EEA State*; or
 - (b) the following conditions are satisfied:
 - (i) the *CIU* is managed by a company which is subject to supervision that is equivalent to that laid down in *EU* law; and
 - (ii) cooperation between *competent authorities* is sufficiently ensured; and
- (2) the *CIU's* prospectus or equivalent document includes:

- (a) the categories of assets in which the *CIU* is authorised to invest; and
 - (b) if investment limits apply, the relative limits and the methodologies to calculate them; and
- (3) the business of the *CIU* is reported on at least an annual basis to enable an assessment to be made of the assets and liabilities, income and operations over the reporting period.

[Note: *BCD* Annex VI Part 1 point 77]

3.4.122

FCA PRA

R

If another *EEA competent authority* approves a third country *CIU* as eligible under a *CRD implementation measure* with respect to point 77(a) of Part 1 of Annex VI of the *Banking Consolidation Directive* then a *firm* may make use of this recognition.

[Note: *BCD* Annex VI Part 1 point 78]

3.4.123

FCA PRA

R

Where a *firm* is aware of the underlying *exposures* of a *CIU*, it may look through to those underlying *exposures* in order to calculate an average *risk weight* for the *CIU* in accordance with the *standardised approach*.

[Note: *BCD* Annex VI Part 1 point 79]

3.4.124

FCA PRA

R

Where a *firm* is not aware of the underlying *exposures* of a *CIU*, it may calculate an average *risk weight* for the *CIU* in accordance with the *standardised approach* subject to the following rules: it will be assumed that the *CIU* first invests, to the maximum extent allowed under its mandate, in the *standardised credit risk exposure classes* attracting the highest capital requirement, and then continues making investments in descending order until the maximum total investment limit is reached.

[Note: *BCD* Annex VI Part 1 point 80]

3.4.125

FCA PRA

R

A *firm* may rely on a third party to calculate and report, in accordance with the methods set out in ■ BIPRU 3.4.123 R to ■ BIPRU 3.4.124 R, a *risk weight* for the *CIU* provided that the correctness of the calculation and report is adequately ensured.

[Note: *BCD* Annex VI Part 1 point 81]

Other items

.....
 ■ BIPRU 3.4.127 R to ■ BIPRU 3.4.133 R set out the treatment to be accorded to other items as referred to in ■ BIPRU 3.2.9 R (16).

3.4.126

FCA PRA

R

Treatment

3.4.127

FCA PRA

R

Tangible assets within the meaning of Article 4(10) of the *Bank Accounts Directive* must be assigned a *risk weight* of 100%.

[Note: BCD Annex VI Part 1 point 82]

3.4.128

FCA PRA

R

Prepayments and accrued income for which a *firm* is unable to determine the counterparty in accordance with the *Bank Accounts Directive*, must be assigned a *risk weight* of 100%.

[Note: BCD Annex VI Part 1 point 83]

3.4.129

FCA PRA

R

Cash items in the process of collection must be assigned a 20% *risk weight*. Cash in hand and equivalent cash items must be assigned a 0% *risk weight*.

[Note: BCD Annex VI Part 1 point 84]

3.4.130

FCA PRA

R

Holdings of equity and other participations except where deducted from *capital resources* must be assigned a *risk weight* of at least 100%.

[Note: BCD Annex VI Part 1 point 86]

3.4.131

FCA PRA

R

Gold bullion held in own vaults or on an allocated basis to the extent backed by bullion liabilities must be assigned a 0% *risk weight*.

[Note: BCD Annex VI Part 1 point 87]

3.4.132

FCA PRA

R

In the case of asset sale and *repurchase agreements* and outright forward purchases, the *risk weight* must be that assigned to the assets in question and not to the counterparties to the transactions.

[Note: BCD Annex VI Part 1 point 88]

3.4.133

FCA PRA

R

Where a *firm* provides credit protection for a number of *exposures* under terms that the *n*th default among the *exposures* triggers payment and that this credit event terminates the contract, and where the product has an external credit assessment from an *eligible ECAI* the *risk weights* prescribed in ■ BIPRU 9 must be assigned. If the product is not rated by an *eligible ECAI*, the *risk weights* of the *exposures* included in the basket must be aggregated, excluding *n-1 exposures*, up to a maximum of 1250% and multiplied by the nominal amount of the protection provided by the credit derivative to obtain the *risk weighted* asset amount. The *n-1 exposures* to be excluded from the aggregation must be determined on the basis that they include those *exposures* each of which produces a lower *risk weighted exposure amount* than the *risk weighted exposure amount* of any of the *exposures* included in the aggregation.

[Note: BCD Annex VI Part 1 point 89]

3.4.134

FCA PRA

R

The *exposure* value for leases must be the discounted minimum lease payments. Minimum lease payments are the payments over the lease term that the lessee is or can be required to make and any bargain option (i.e. an option the exercise of which is reasonably certain). Any guaranteed residual value fulfilling the set of conditions in ■ BIPRU 5.7.1 R (Eligibility), regarding the eligibility of protection providers as well as the minimum requirements for recognising other types of guarantees provided in ■ BIPRU 5.7.6 R (Minimum requirements: General) to ■ BIPRU 5.7.12 R (Additional requirements for guarantees) must also be included in the minimum lease payments. These *exposures* must be assigned to the relevant *exposure* class in accordance with ■ BIPRU 3.2.9 R, ■ BIPRU 3.2.10 R, ■ BIPRU 3.2.11 R, ■ BIPRU 3.2.12 R, ■ BIPRU 3.2.13 R and ■ BIPRU 3.2.14 G. When the *exposure* is a residual value of leased properties, the *risk weighted exposure amounts* must be calculated as follows:

$$1/t * 100\% * \textit{exposure value};$$

where t is the greater of 1 and the nearest number of whole years of the lease term remaining.

[Note: BCD Annex VI Part 1, point 90]

3.5 Simplified method of calculating risk weights

3.5.1 FCA PRA G This section (■ BIPRU 3.5) sets out a simplified approach to calculating *risk weights*. This approach is only relevant to an *exposure* class for which *risk weights* are determined by the ratings of a *nominated ECAI* or an export credit agency. For other *exposure* classes a *firm* should use the normal approach under the *standardised approach*.

3.5.2 FCA PRA G The approach in this section is only likely to be relevant for a *limited licence firm* or a *limited activity firm* that has only incidental credit *exposures* and for whom it would be prohibitively costly to establish the systems needed to include the credit assessments of *ECAIs* and export credit agencies in its regulatory capital calculations. However the approach may be used by other *firms* if appropriate. A *firm* should notify the *appropriate regulator* if it adopts the approach in this section.

3.5.3 FCA PRA G Rather than *risk weighting exposures* individually, a *firm* eligible to apply the simplified approach should apply a single *risk weight* to all *exposures* in each *exposure* class. The simplified *risk weight* for *exposures* in a particular class will be the *risk weighting* for unrated entities for each *exposure* class in which the external credit assessments influence *risk weights*.

3.5.4 FCA PRA G The table in ■ BIPRU 3.5.5 G has a summary of the *risk weights* that a *firm* should use if it uses the simplified method of calculating *risk weights* referred to in ■ BIPRU 3.5.1 G.

3.5.5 FCA PRA G Table : Simplified method of calculating risk weights

This table belongs to ■ BIPRU 3.5.4 G.

Exposure class	Exposure sub-class	Risk weights	Comments
Central government	<i>Exposures to United Kingdom government or Bank of England in sterling</i>	0%	
	<i>Exposures to United Kingdom government or Bank of England in the currency of another EEA State</i>	0%	See Note 2.

Exposure class	Exposure sub-class	Risk weights	Comments
Regional/local governments	<i>Exposures to EEA State's central government or central bank in currency of that state</i>	0%	
	<i>Exposures to EEA State's central government or central bank in the currency of another EEA State</i>	0%	See Notes 2 and 3.
	<i>Exposures to central governments or central banks of certain countries outside the EEA in currency of that country</i>	See next column	The risk weight is whatever it is under local law. See BIPRU 3.4.6 R for precise details.
	<i>Exposures to European Central Bank</i>	0%	
	<i>Other exposures</i>	100%	
	<i>Exposures to the Scottish Parliament, National Assembly for Wales and Northern Ireland Assembly in sterling</i>	0%	
	<i>Exposures to the Scottish Parliament, National Assembly for Wales and Northern Ireland Assembly in the currency of another EEA State</i>	0%	See Note 2.
	<i>Exposures to EEA States' equivalent regional/local governments in currency of that state</i>	0%	See BIPRU 3.4.17 R for details of type of local/regional government covered.
	<i>Exposures to EEA States' equivalent regional/local governments in the currency of another EEA State</i>	0%	See BIPRU 3.4.17 R for details of type of local/regional government covered.
	<i>Exposures to local or regional governments of certain countries outside the EEA in currency of that country</i>	0%	See Notes 2 and 3. See BIPRU 3.4.19 R for details of type of local/regional government covered. See Note 1.

Exposure class	Exposure sub-class	Risk weights	Comments
	<i>Exposures to United Kingdom or EEA States' local/regional government in currency of that state if the exposure has original effective maturity of 3 months or less</i>	20%	
	<i>Exposures to United Kingdom or EEA States' local/regional government in the currency of another EEA State if the exposure has original effective maturity of 3 months or less</i>	20%	See Note 2. See Note 3 for local/regional government of an EEA State other than the United Kingdom
	<i>Exposures to local or regional governments of countries outside the EEA in currency of that country if the exposure has original effective maturity of 3 months or less</i>	20%	See Note 1.
	<i>Other exposures</i>	100%	
PSE	<i>Exposures to a PSE of the United Kingdom or of an EEA State if that PSE is guaranteed by its central government and if the exposure is in currency of that PSE's state.</i>	0%	BIPRU 3.4.24 R describes the United Kingdom PSEs covered and BIPRU 3.4.25 R describes the EEA PSEs covered.
	<i>Exposures to PSE of a country outside the EEA if that PSE is guaranteed by the country's central government and if the exposure is in currency of that country.</i>	0%	See BIPRU 3.4.26 R and Note 1.
	<i>Exposures to a PSE of the United Kingdom or of an EEA State in currency of that state if the exposure has original effective maturity of 3 months or less</i>	20%	

Exposure class	Exposure sub-class	Risk weights	Comments
	<i>Exposures to a PSE of the United Kingdom or of an EEA State in the currency of another EEA State if the exposure has original effective maturity of 3 months or less</i>	20%	See Notes 2 and 3.
	<i>Exposures to PSE of a country outside the EEA in currency of that country if the exposure has original effective maturity of 3 months or less</i>	20%	See Note 1.
	<i>Other exposures</i>	100%	
<i>Multilateral development banks</i>	<i>Exposures to multilateral development banks listed in paragraph (1) of the Glossary definition</i>	0%	Simplified approach does not apply. Normal rules apply.
	<i>Other exposures</i>	Various	Treated as an <i>institution</i>
<i>EU, the International Monetary Fund and the Bank for International Settlements</i>		0%	Simplified approach does not apply. Normal rules apply.
<i>Institutions</i>	<i>Exposures to United Kingdom institution in sterling with original effective maturity of three months or less</i>	20%	
	<i>Exposures to United Kingdom institution in the currency of another EEA State with original effective maturity of three months or less</i>	20%	See Note 2.
	<i>Exposures to institution whose head office is in another EEA State in the currency of that state with original effective maturity of three months or less</i>	20%	
	<i>Exposures to institution whose head office is in another EEA State in the currency of another EEA State with</i>	20%	See Notes 2 and 3.

Exposure class	Exposure sub-class	Risk weights	Comments
	original effective maturity of three months or less		
	<i>Exposures to institution with a head office in a country outside the EEA in the currency of that country with original effective maturity of three months or less</i>	20%	See Note 1.
	<i>Exposures to United Kingdom institution in sterling with original effective maturity of over three months</i>	50%	
	<i>Exposures to United Kingdom institution in the currency of another EEA State with original effective maturity of over three months</i>	50%	See Note 2.
	<i>Exposures to an EEA institution with a head office in another EEA State in the currency of that state with original effective maturity of over three months</i>	50%	
	<i>Exposures to an EEA institution with a head office in another EEA State in the currency of another EEA State with original effective maturity of over three months</i>	50%	See Notes 2 and 3.
	<i>Exposures to institution with a head office in a country outside the EEA in the currency of that country with original effective maturity of over three months</i>	50%	See Note 1.
	Other exposures	100%	
Corporates		100%	

Exposure class	Exposure sub-class	Risk weights	Comments
<i>Retail exposures</i>		75%	Simplified approach does not apply. Normal rules apply.
Mortgages on residential or commercial property		Various	Simplified approach does not apply. Normal rules apply.
Past due items		Various	Simplified approach does not apply. Normal rules apply.
High risk items		150%	Simplified approach does not apply. Normal rules apply.
<i>Covered bonds</i>		Various	<i>Risk weights</i> are based on the <i>risk weight</i> of issuer as described in BIPRU 3.4.110 R. The <i>risk weight</i> of the issuer for this purpose should be calculated under the simplified approach.
<i>Securitisation exposures</i>		Generally 1250%. May look through to underlying exposures if BIPRU 9 allows.	Use the BIPRU 9 rules for unrated exposures under the standardised approach
Short term exposures with rating			See BIPRU 3.4.112 R. Not applicable as uses ECAI ratings.
CIUs	May look through to underlying under BIPRU 3.4.123 R	Various	Simplified approach does not apply. Normal rules apply. May use simplified approach to underlying if simplified approach applies to underlying.
	May use average risk weight under BIPRU 3.4.124 R	Various	Simplified approach does not apply. Normal rules apply. May use simplified approach to underlyings if simplified approach applies to underlying.
	High risk under BIPRU 3.4.118 R	150%	Simplified approach does not apply. Normal rules apply.
	Others	100%	
Other items under BIPRU 3.2.9 R (16)		Various	Simplified approach does not apply. Normal rules apply.

Exposure class	Exposure sub-class	Risk weights	Comments
----------------	--------------------	--------------	----------

Note 1: The *risk weight* should not be lower than the *risk weight* that applies for national currency *exposures* of the central government of the third country in question under BIPRU 3.5. That means that this *risk weight* only applies if the third country is one of those to which BIPRU 3.4.6 R (Preferential *risk weight* for *exposures* of the central government of countries outside the *EEA* that apply equivalent prudential standards) applies.

Note 2: This is a transitional measure. It lasts until 31 December 2012.

Note 3: The *risk weight* should not be lower than the *risk weight* that applies for *exposures* of the central government of the *EEA State* in question in the currency of another *EEA State* under BIPRU 3.5.

3.5.6

FCA PRA

G

If an *exposure* is guaranteed and if under ■ BIPRU 5 the *firm* may treat the *exposure* as being to the guarantor, the simplified approach may be used for the guarantor. The key provisions are ■ BIPRU 5.7.23 R to ■ BIPRU 5.7.25 R.

3.5.7

FCA PRA

G

If an *exposure* is collateralised and if under ■ BIPRU 5 the *firm* may recognise the collateral, the simplified approach may be used to determine the *risk weight* to be applied to the collateralised *exposure*. The key provisions are ■ BIPRU 5.4.18 R to ■ BIPRU 5.4.21 R.

3.5.8

FCA PRA

R

If a *firm* does not nominate one or more *eligible ECAIs* as referred to in ■ BIPRU 3.6.4 R the *firm* must not use the *financial collateral comprehensive method*.

3.6 Use of rating agencies' credit assessments for the determination of risk weights under the standardised approach to credit risk

3.6.1
FCA PRA

R

The use of *ECAI* credit assessments for the calculation of a *firm's risk weighted exposure amounts* must be consistent and in accordance with ■ BIPRU 3.6. Credit assessments must not be used selectively.

[Note: *BCD* Article 83(1)]

3.6.2
FCA PRA

R

Where the *appropriate regulator's* recognition of an *ECAI* is not limited to its solicited credit assessments, a *firm* may use an unsolicited credit assessment of an *eligible ECAI* for the calculation of a *firm's risk weighted exposure amounts*.

[Note: *BCD* Article 83(2)]

3.6.3
FCA PRA

G

The *appropriate regulator's* recognition of an *ECAI* may be limited to its solicited credit assessments. Where this is the case a *firm* should not use unsolicited assessments. The *appropriate regulator* may indicate that the unsolicited ratings of an *eligible ECAI* are not to be used for the purposes of ■ BIPRU 3 if those assessments are considered to be inferior in quality to the general quality of solicited assessments or if it considers that the *ECAI's* strategy in relation to the issuing of unsolicited assessments is founded in the placing of undue pressure on the rated entity to pay for a rating.

Treatment

3.6.4
FCA PRA

R

A *firm* may nominate one or more *eligible ECAIs* to be used for the determination of *risk weights* to be assigned to asset and off-balance sheet items.

[Note: *BCD* Annex VI Part 3 point 1]

3.6.5
FCA PRA

R

A *firm* which decides to use the credit assessments produced by an *eligible ECAI* for a certain class of items must use those credit assessments consistently for all *exposures* belonging to that class.

[Note: *BCD* Annex VI Part 3 point 2]

3.6.6

FCA PRA

R

A *firm* which decides to use the credit assessments produced by an *eligible ECAI* must use them in a continuous and consistent way over time.

[Note: BCD Annex VI Part 3 point 3]

3.6.7

FCA PRA

R

A *firm* can only use *ECAIs'* credit assessments that take into account all amounts both in principal and in interest owed to it.

[Note: BCD Annex VI Part 3 point 4]

3.6.8

FCA PRA

R

If only one credit assessment is available from a *nominated ECAI* for a rated item, that credit assessment must be used to determine the *risk weight* for that item.

[Note: BCD Annex VI Part 3 point 5]

3.6.9

FCA PRA

R

If two credit assessments are available from *nominated ECAIs* and the two correspond to different *risk weights* for a rated item, the higher *risk weight* must be applied.

[Note: BCD Annex VI Part 3 point 6]

3.6.10

FCA PRA

R

If more than two credit assessments are available from *nominated ECAIs* for a rated item, the two assessments generating the two lowest *risk weights* must be referred to. If the two lowest *risk weights* are different, the higher *risk weight* must be assigned. If the two lowest *risk weights* are the same, that *risk weight* must be assigned.

[Note: BCD Annex VI Part 3 point 7]

3.6.11

FCA PRA

R

- (1) If a *firm* has decided to make use of the credit assessments of export credit agencies, when *risk weighting exposures* to central governments or *central banks*, if two or more credit assessments are available to a *firm* from export credit agencies or if credit assessments are available to a *firm* from both *nominated ECAIs* and export credit agencies, the *firm* must adopt the approach in this *rule*.
- (2) If two credit assessments are available and correspond to different *risk weights* for a rated item, the higher *risk weight* must be applied.
- (3) If more than two credit assessments are available for a rated item, the assessments generating the two lowest *risk weights* must be referred to:
 - (a) if the two lowest *risk weights* are the same, that *risk weight* must be applied; or

(b) if the two lowest *risk weights* are different, the higher of the two must be applied.

(4) If a *firm* does not for the purposes of ■ BIPRU 3 make any use of the consensus risk scores referred to in ■ BIPRU 3.4.7 R (1) it may treat those scores as not being available to it for the purpose of this *rule*. Likewise, if a *firm* does not for the purposes of ■ BIPRU 3 make any use of the credit assessments of a particular export credit agency as referred to in ■ BIPRU 3.4.7 R (2) it may treat those assessments as not being available to it for the purpose of this *rule*.

Issuer and issue credit assessment

3.6.12

FCA PRA

R

Where a credit assessment exists for a specific issuing program or facility to which the item constituting the *exposure* belongs, this credit assessment must be used to determine the *risk weight* to be assigned to that item.

[Note: BCD Annex VI Part 3 point 8]

3.6.13

FCA PRA

R

Where no directly applicable credit assessment exists for a certain item, but a credit assessment exists for a specific issuing program or facility to which the item constituting the *exposure* does not belong or a general credit assessment exists for the issuer, then that credit assessment must be used if it produces a higher *risk weight* than would otherwise be the case or if it produces a lower *risk weight* and the *exposure* in question ranks *pari passu* or senior in all respects to the specific issuing program or facility or to senior unsecured *exposures* of that issuer as relevant.

[Note: BCD Annex VI Part 3 point 9]

3.6.14

FCA PRA

R

■ BIPRU 3.6.12 R and ■ BIPRU 3.6.13 R are not to prevent the application of ■ BIPRU 3.4.107 R to ■ BIPRU 3.4.110 R (Exposures in the form of covered bonds).

[Note: BCD Annex VI Part 3 point 10]

3.6.15

FCA PRA

R

Credit assessments for issuers within a corporate group cannot be used as credit assessment of another issuer within the same corporate group.

[Note: BCD Annex VI Part 3 point 11]

Long-term and short-term credit assessments

3.6.16

FCA PRA

R

Short-term credit assessments may only be used for short-term asset and off-balance sheet items constituting *exposures to institutions and corporates*.

[Note: BCD Annex VI Part 3 point 12]

3.6.17

FCA PRA

R

Any short-term credit assessment may only apply to the item the short-term credit assessment refers to, and it must not be used to derive *risk weights* for any other item.

[Note: BCD Annex VI Part 3 point 13]

3.6.18

FCA PRA

R

Notwithstanding ■ BIPRU 3.6.17 R, if a short-term rated facility is assigned a 150% *risk weight*, then all unrated unsecured *exposures* on that obligor whether short-term or long-term must also be assigned a 150% *risk weight*.

[Note: BCD Annex VI Part 3 point 14]

3.6.19

FCA PRA

R

Notwithstanding ■ BIPRU 3.6.17 R, if a short-term rated facility is assigned a 50% *risk weight*, no unrated short-term *exposure* may be assigned a *risk weight* lower than 100%.

[Note: BCD Annex VI Part 3 point 15]

Domestic and foreign currency items

3.6.20

FCA PRA

R

A credit assessment that refers to an item denominated in the obligor's domestic currency cannot be used to derive a *risk weight* for another *exposure* on that same obligor that is denominated in a foreign currency.

[Note: BCD Annex VI Part 3 point 16]

3.6.21

FCA PRA

R

Notwithstanding ■ BIPRU 3.6.20 R, when an *exposure* arises through a *firm's* participation in a loan that has been extended by a *multilateral development bank* whose preferred creditor status is recognised in the market, the credit assessment on the obligors' domestic currency item may be used for *risk weighting* purposes.

[Note: BCD Annex VI Part 3 point 17]

3.7 Classification of off-balance-sheet items

3.7.1

FCA PRA

R

In accordance with ■ BIPRU 3.2.1 R (2) and ■ BIPRU 3.2.2 R, a *firm* must:

- (1) assign an off-balance sheet item listed in the table in ■ BIPRU 3.7.2 R to the risk category indicated in column 1 of that table; and
- (2) determine the *exposure* value of that item as the percentage of its value for the appropriate risk category as set out in column 3 of the table in ■ BIPRU 3.7.2 R.

3.7.2

FCA PRA

R

Table: Classification of off-balance-sheet items

This table belongs to ■ BIPRU 3.7.1 R

[Note: *BCD* Annex II]

Category	Item	Percentage
Full risk	Guarantees having the character of credit substitutes	100%
	Credit derivatives	
	Acceptances	
	Endorsements on bills not bearing the name of another <i>credit institution</i>	
	Transactions with recourse	
	Irrevocable standby letters of credit having the character of credit substitutes	
	Assets purchased under outright forward purchase agreements	
	Forward deposits	
	The unpaid portion of partly-paid <i>shares and securities</i>	
	Asset sale and repurchase agreements as defined in Article 12(3) and (5) of the <i>Bank Accounts Directive</i>	
Other items also carrying full risk		
Medium risk	Documentary credits issued and confirmed (see also medium/low risk).	50%
	Warranties and indemnities (including tender, performance, customs and tax bonds) and guarantees not having the character of credit substitutes.	
	Irrevocable standby letters of credit not having the character of credit substitutes.	

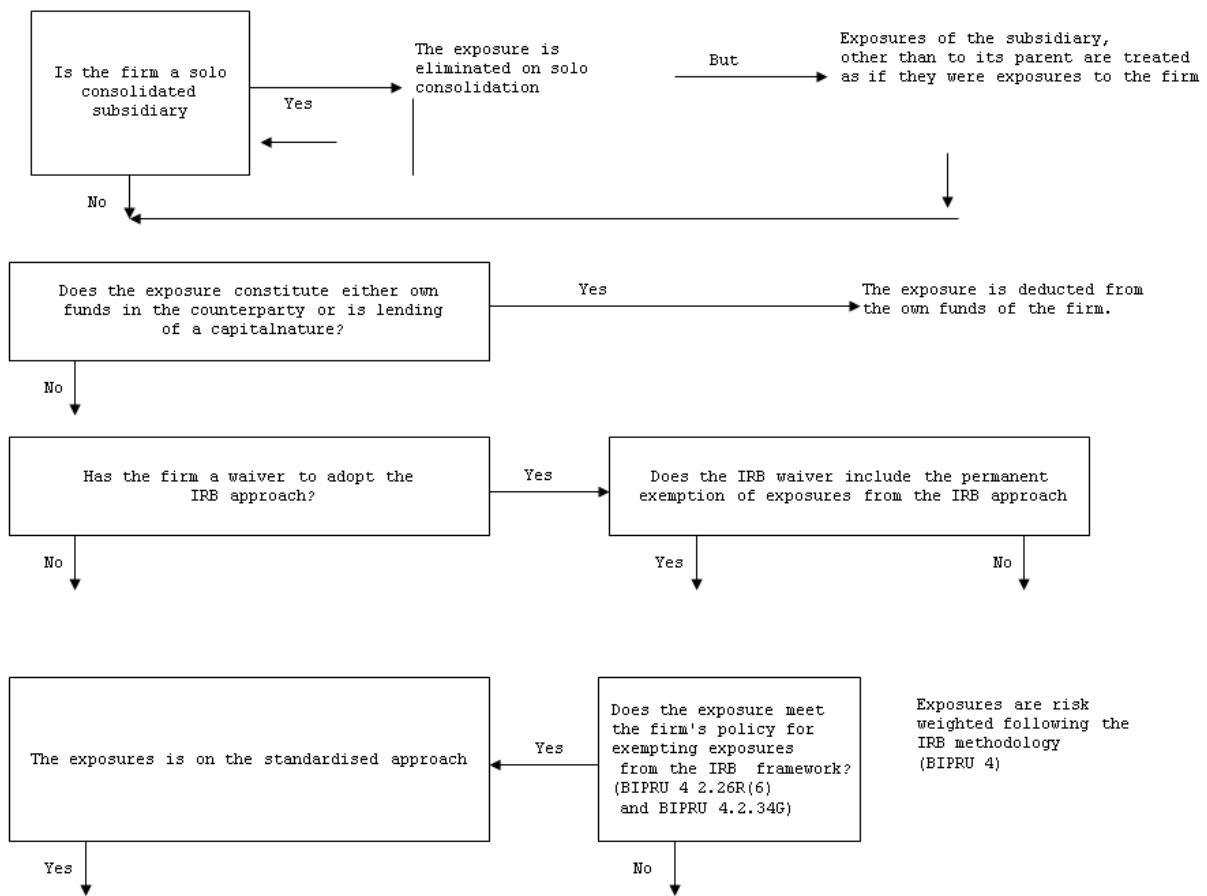

Category	Item	Percentage
Medium/low risk	Undrawn credit facilities (agreements to lend, purchase <i>securities</i> , provide guarantees or acceptance facilities) with an original maturity of more than one year.	20%
	Note issuance facilities (NIFs) and revolving underwriting facilities (RUFs). Documentary credits in which underlying shipment acts as collateral and other self-liquidating transactions.	
Low risk	Undrawn credit facilities (agreements to lend, purchase <i>securities</i> , provide guarantees or acceptance facilities) with an original maturity of up to and including one year which may not be cancelled unconditionally at any time without notice or that do not effectively provide for automatic cancellation due to deterioration in a borrower's creditworthiness. Undrawn credit facilities (agreements to lend, purchase <i>securities</i> , provide guarantees or acceptance facilities) which may be cancelled unconditionally at any time without notice, or that do effectively provide for automatic cancellation due to deterioration in a borrower's creditworthiness. Retail credit lines may be considered as unconditionally cancellable if the terms permit the <i>firm</i> to cancel them to the full extent allowable under consumer protection and related legislation.	0%

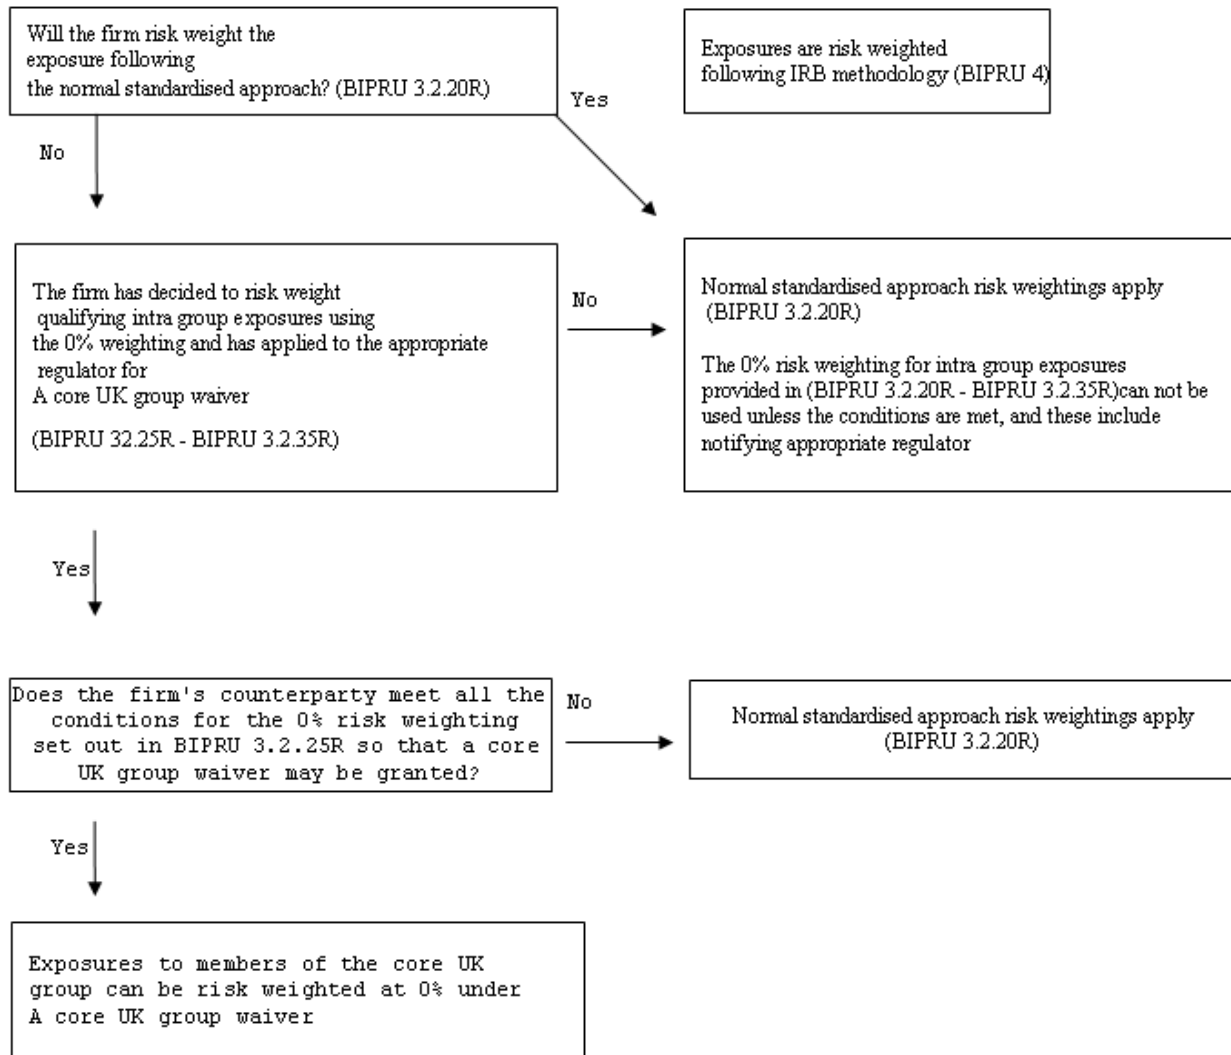

Guidance on the standardised approach zero risk weighting for intra-group exposures

FCA PRA

This flow chart belongs to ■ BIPRU 3.2.25 R - ■ BIPRU 3.2.35 R.

Flowchart - zero risk weighting for intra-group exposures

Regional governments and local authorities eligible for the treatment in BIPRU 3.4.15R

Chapter 4

The IRB approach

4.1 The IRB approach: Application, purpose and overview

Application

4.1.1 **R** ■ BIPRU 4 applies to a *firm* with an *IRB permission*.

FCA **PRA**

Purpose

4.1.2 **G** ■ BIPRU 4 implements the following provisions of the *Banking Consolidation Directive*:

FCA **PRA**

- (1) Articles 84 - 89; and
- (2) Annex VII.

4.1.3 **G** ■ BIPRU 4 also implements Annex VIII of the *Banking Consolidation Directive* so far as it applies to the *IRB approach*. In particular, it implements (in part):

FCA **PRA**

- (1) from Part 1 of that Annex, points 12-16, 19-22, 26(g)(ii) and 27;
- (2) from Part 2 of that Annex, points 8-11; and
- (3) from Part 3 of that Annex, points 1, 11, 20, 23-24, 58(h), 61, 64-79 and 90-93.

4.1.4 **G** ■ BIPRU 4 also implements article 40 of the *Capital Adequacy Directive* as it applies to the *IRB approach*.

FCA **PRA**

4.1.5 **G** Other material on the *IRB approach* can be found in ■ BIPRU 8 (Group risk), ■ BIPRU 9 (Securitisation), ■ BIPRU 13 (The calculation of exposure values for financial derivatives, securities financing transactions and long settlement transactions) and ■ BIPRU 14 (Capital requirements for settlement and counterparty risk). ■ BIPRU 5 (Credit risk mitigation) also contains material applicable to the *IRB approach*.

FCA **PRA**

Overview

4.1.6 **G** The *IRB approach* is an alternative to the *standardised approach* for calculating a *firm's* credit risk capital requirements. It may be applied to all a *firm's exposures* or to some of them, subject to various limitations on partial use as set out in ■ BIPRU 4.2. Under the *IRB approach* capital requirements are based on a *firm's* own estimates of certain parameters together with other parameters set out in the *Banking Consolidation Directive*.

FCA **PRA**

4.1.7

FCA PRA

G

Exposures are divided into a number of distinct *exposure* classes. These are listed in ■ BIPRU 4.3.2 R. There is a special treatment for purchased receivables, although they do not form an *exposure* class on their own.

4.1.8

FCA PRA

G

For *exposures* in the *sovereign, institution and corporate IRB exposure class*, there is a *foundation IRB approach* under which a *firm* provides its own estimates of *PD* and an *advanced IRB approach* under which a *firm* additionally provides its own estimates of *LGD* and *conversion factors*. The distinction between the *foundation IRB approach* and the *advanced IRB approach* only applies to this *IRB exposure class*.

4.1.9

FCA PRA

G

For *retail exposures*, a *firm* provides its own estimates of *PD*, *LGD* and *conversion factors*.

4.1.10

FCA PRA

G

For the *corporate exposure* class there is a separate sub-class of *specialised lending exposure*. A *firm* may calculate *risk weights* for these *exposures*, where it is able to do so, in the same way as it does for the rest of its *corporate exposure* class, i.e. using the *foundation IRB approach* or the *advanced IRB approach*. Where a *firm* is not able to use this approach it may calculate *risk weights* for *specialised lending exposures* by slotting them into predetermined *risk weights*.

4.1.11

FCA PRA

G

For *equity exposures* there are two approaches based on market based measures and a third under which a *firm* uses its own estimates of *PD* only.

IRB permissions: general

4.1.12

FCA PRA

G

The *rules* in *GENPRU* and *BIPRU* do not allow a *firm* to use the *IRB approach*. A *firm* that wishes to use the *IRB approach* should therefore apply for permission to use the *IRB approach* using the application procedure explained in ■ BIPRU 1.3. If a *firm's* application is granted, its terms will be set out in an *IRB permission*.

4.1.13

FCA PRA

G

The *appropriate regulator* recognises that the nature of *IRB approaches* will vary between *firms*. The scope of and the requirements and conditions set out in an *IRB permission* may therefore differ in substance or detail from ■ BIPRU 4 in order to address individual circumstances adequately. However any differences will only be allowed if they are compliant with the *Banking Consolidation Directive*. An *IRB permission* will implement any such variation by modifying the relevant provisions of *GENPRU* and *BIPRU*. An *IRB permission* may also include additional conditions to meet the particular circumstances of the *firm*.

4.1.14

FCA PRA

G

- (1) The *appropriate regulator* will only grant an *IRB permission* if it is satisfied that the *firm's* systems for the management and rating of credit risk *exposures* are sound and implemented with integrity and, in particular, that they meet the standards in ■ BIPRU 4.2.2 R in accordance with the *minimum IRB standards*.
- (2) Under ■ BIPRU 4.2.11 R, a *firm* applying for an *IRB permission* is required to demonstrate that it has been using for the *IRB exposure classes* in question *rating systems* that were broadly in line with the *minimum IRB standards* for internal risk measurement and management purposes for at least three years prior to the date of its *IRB permission*.

- (3) Under ■ BIPRU 4.2.13 R, a *firm* applying for the use of own estimates of *LGDs* and/or *conversion factors* should demonstrate that it has been estimating and employing own estimates of *LGDs* and/or *conversion factors* in a manner that was broadly consistent with the *minimum IRB standards* for use of own estimates for at least three years prior to the date of its *IRB permission* or of a variation of its *IRB permission* that, in either case, entitles the *firm* to use own estimates of *LGDs* and/or *conversion factors*.

Link to standard rules: Incorporation of the IRB output into the capital calculation

4.1.15

FCA PRA

G

An *IRB permission* will modify ■ GENPRU 2.1.51 R (Calculation of the credit risk capital requirement) by amending, to the extent set out in the *IRB permission*, the calculation of the *credit risk capital requirement* in accordance with ■ BIPRU 4 and the other provisions of the *Handbook* relating to the *IRB approach*.

4.1.16

FCA PRA

R

A *firm* must calculate its *credit risk capital component* as the sum of:

- (1) (for *exposures* to which the *standardised approach* is applied) the *credit risk capital component* as calculated under ■ BIPRU 3.1.5 R; and
- (2) (for *exposures* to which the *IRB approach* is applied to which the *standardised approach* would otherwise apply in accordance with ■ BIPRU 3.1.5 R (Credit risk capital component)), 8% of the total of the *firm's risk weighted exposure amounts* calculated in accordance with the *IRB approach*.

4.1.17

FCA PRA

G

For *exposures* covered by an *IRB permission*, ■ BIPRU 5 (Credit risk mitigation) is modified by ■ BIPRU 4.10.

4.1.18

FCA PRA

G

Under ■ BIPRU 4.9, a *firm* is required to deal with *securitisation positions* under those provisions of ■ BIPRU 9 applicable to a *firm* using the *IRB approach*.

4.1.19

FCA PRA

G

Exposures treated under ■ BIPRU 13 are required to be dealt with in accordance with the *IRB approach* to the extent set out in ■ BIPRU 13.

4.1.20

FCA PRA

G

By modifying ■ GENPRU 2.1.51 R to allow the *firm* to use the *IRB approach* to calculate all or part of its *risk weighted exposure amounts*, the *appropriate regulator* is treating it like an *application rule*. The modification means that the provisions of BIPRU relating to the *IRB approach* supersede the *rules* relating to the *standardised approach* for *exposures* coming within the scope of the *IRB permission*.

4.1.21

FCA PRA

R

A reference in the *Handbook* to a provision of the *IRB approach*, in the case of a *firm*:

- (1) excludes any provision of the *IRB approach* set out in the *Handbook* that is not applied to that *firm* by its *IRB permission*;

- (2) includes any additional provision contained in the *firm's IRB permission*; and
- (3) takes into account any other amendments made to the provisions in the *Handbook* relating to the *IRB approach* made by the *firm's IRB permission*.

4.1.22

FCA PRA

R

To the extent that a *firm's IRB permission* does not allow it to use a particular approach in the *Handbook* relating to the *IRB approach* the *Handbook* provision in question does not apply to the *firm*.

4.1.23

FCA PRA

R

If a provision of the *Handbook* relating to the *IRB approach* says that a *firm* may do something if its *IRB permission* allows it, a *firm* may do that thing unless its *IRB permission* expressly says that it may not do so except that:

- (1) ■ BIPRU 4.2.18 R - ■ BIPRU 4.2.19 R (Sequential implementation of IRB approach) and ■ BIPRU 4.2.26 R (1)-■ BIPRU 4.2.26R (5) (Combined use of standardised approach with IRB approach) only apply if expressly permitted by a *firm's IRB permission*;
- (2) a *firm* may not use the *advanced IRB approach* for the *sovereign, institution and corporate IRB exposure class* except to the extent expressly permitted by the *firm's IRB permission*;
- (3) if a *firm* uses its own estimates of *LGD* and *conversion factors* it may only take into account *unfunded credit protection* to reduce *LGD* in the manner set out in its *IRB permission*;
- (4) if a *firm* uses its own estimates of *LGD* and *conversion factors* it may only recognise the effects of financial collateral under ■ BIPRU 10.2.19 R (Firms using own estimates of *LGD* and *conversion factors* under the *IRB approach*) in the manner set out in its *IRB permission*;
- (5) a *firm* must deal with *equity exposures* in the manner set out in its *IRB permission*; and
- (6) (in the case of *collateral* that is only eligible for recognition under paragraph 21 of Part 1 of Annex VIII of the *Banking Consolidation Directive* (Other physical collateral)) a *firm* may not recognise as eligible collateral an item of a type referred to in ■ BIPRU 4.10.16 R (Other physical collateral) unless that item is of a type specified as permitted in its *IRB permission*.

PAGE
5

4.1.24

FCA PRA

G

An *IRB permission* will set out *firm-specific* material. This will generally include:

- (1) details about the *firm's* methodology for carrying out the *IRB approach*, including the models and *rating systems* that a *firm* should use;

- (2) reporting requirements; and
- (3) requirements about internal control structure.

Compliance

4.1.25

FCA PRA

R

If a *firm* ceases to comply with the requirements of the *IRB approach*, it must either present to the *appropriate regulator* a plan for a timely return to compliance or demonstrate that the effect of non-compliance is immaterial.

[Note: BCD Article 84(5)]

4.1.26

FCA PRA

G

If a *firm* ceases to comply with the requirements of the *IRB approach*, the *appropriate regulator* may revoke the *IRB permission* or take other appropriate supervisory action.

4.1.27

FCA PRA

G

For the purposes of ■ BIPRU 4.1.25 R, the *appropriate regulator* will expect a *firm* to demonstrate that, taking into account all instances where the *firm* has not complied with the requirements of the *IRB approach*, the effect of non-compliance is immaterial.

4.2 The IRB approach: High level material

Application

4.2.1

R

This section applies to all *exposures* treated under the *IRB approach*.

FCA PRA

General approach to granting an IRB permission

4.2.2

R

A *firm's* systems for the management and rating of credit risk *exposures* must be sound and implemented with integrity and, in particular, they must meet the following standards in accordance with the *minimum IRB standards*:

FCA PRA

- (1) the *firm's rating systems* provide for a meaningful assessment of obligor and transaction characteristics, a meaningful differentiation of risk and accurate and consistent quantitative estimates of risk;
- (2) internal ratings and *default* and *loss* estimates used in the calculation of capital requirements and associated systems and processes play an essential role in the risk management and decision-making process, and in the credit approval, internal capital allocation and corporate governance functions of the *firm*;
- (3) the *firm* has a credit risk control unit responsible for its *rating systems* that is appropriately independent and free from undue influence;
- (4) the *firm* collects and stores all relevant data to provide effective support to its credit risk measurement and management process; and
- (5) the *firm* documents its *rating systems*, the rationale for their design and validates its rating systems.

[Note: BCD Article 84(2) (part)]

4.2.3

R

Where an *EEA parent institution* and its *subsidiary undertakings* or an *EEA parent financial holding company* and its *subsidiary undertakings* use the *IRB approach* on a unified basis, the question whether the *minimum IRB standards* are met is answered by considering the *parent undertaking*

FCA PRA

and its *subsidiary undertakings* together unless the *firm's IRB permission* specifies otherwise.

[Note: BCD Article 84(2) (part)]

Outsourcing

4.2.4

FCA PRA

G

- (1) This *guidance* sets out the basis on which a *firm* may rely upon a *rating system* or data provided by another member of its *group*.
- (2) A *firm* may rely upon a *rating system* or data provided by another member of its *group* if the following conditions are satisfied:
 - (a) the *firm* only does so to the extent that it is appropriate, given the nature and scale of the *firm's* business and portfolios and the *firm's* position within the *group*;
 - (b) the *group* is an *EEA banking and investment group*;
 - (c) the integrity of the *firm's* systems and controls is not adversely affected;
 - (d) the outsourcing of these functions meets the requirements of SYSC; and
 - (e) (if the provision of the *rating system* or data is not carried out in the *United Kingdom* or in the jurisdiction of the *competent authority* that is the lead regulator of the *group*) the *firm* can demonstrate to the *appropriate regulator* that the ability of the *appropriate regulator* and that lead regulator to carry out their responsibilities under the *Handbook*, the *Banking Consolidation Directive* and the *Capital Adequacy Directive* are not adversely affected.
- (3) If a *firm* does use a *rating system* or data provided by another member of its *group*, the requirements in ■ BIPRU 4 continue to apply to that *firm* in respect of that *rating system* and data. A *firm* cannot absolve itself of the responsibility for complying with those requirements by claiming that any breach is caused by the actions of a third party to which the *firm* has delegated tasks. The *rating system* and data provision are still those of the *firm*, even though personnel elsewhere in the *firm's* group are carrying out these functions on its behalf. So any references in *BIPRU* to what a *firm*, its personnel and its management should and should not do still apply.
- (4) If a *firm* does use a *rating system* or data provided by another *group* member, the *firm's governing body* should formally delegate those functions to the *persons* or bodies that are to carry them out.
- (5) Before delegating the provision of a *rating system* or data to another *group* member, the *firm's governing body* should have explicitly considered the arrangement and decided that it is appropriate and that it enables the *firm* to meet the conditions in (2).

Assessment and estimation

4.2.5

FCA PRA

G

- (1) This paragraph provides *guidance* on ■ BIPRU 4.2.2 R and in particular ■ BIPRU 4.2.2 R (1).
- (2) The information that a *firm* produces or uses for the purpose of the *IRB approach* should be reliable and take proper account of the different users

- of the information produced (customers, shareholders, regulators and other market participants).
- (3) A *firm* should establish quantified and documented targets and standards, against which it should test the accuracy of data used in its *rating systems*.
 - (4) Tests under (3) might include:
 - (a) report and accounts reconciliation, including completeness in relation to (b);
 - (b) whether every *exposure* has a *PD*, *LGD* and, if applicable, *conversion factor* for reporting purposes;
 - (c) whether the *firm's* risk control environment has key risk indicators for the purpose of monitoring and ensuring data accuracy;
 - (d) whether the *firm* has an adequate business and information technology infrastructure with fully documented processes;
 - (e) whether the *firm* has clear and documented standards on ownership of data (including inputs and manipulation) and timeliness of current data (daily, monthly, real time); and
 - (f) whether the *firm* has a comprehensive quantitative audit programme.
 - (5) The reconciliation referred to in 4(a) should be reasonably fit for purpose. In particular it should meet the standards in (6) and (7).
 - (6) For data inputs, testing for accuracy of data, including the reconciliation referred to in 4(a), should be sufficiently detailed so that, together with other available evidence, it gives reasonable assurance that data input into the *rating system* is accurate, complete and appropriate. Input data fails the required standard if it gives rise to a serious risk of material misstatement in the capital requirement either immediately or subsequently.
 - (7) For data outputs, the *firm*, as part of the reconciliation referred to in 4(a), should be able to identify and explain material differences between the outputs produced under accounting standards and those produced under the requirements of the *IRB approach*, including in relation to areas that address similar concepts in different ways (for example *expected loss* on the one hand and accounting provisions on the other).
 - (8) A *firm* should have clear and documented standards and policies about the use of data in practice (including information technology standards) which should in particular cover the *firm's* approach to the following:
 - (a) data access and security;
 - (b) data integrity, including the accuracy, completeness, appropriateness and testing of data; and
 - (c) data availability.

Further requirements concerning the use test

4.2.6

FCA PRA

R

If a *firm* uses separate models for the purpose of the *IRB approach* and for its internal purposes as referred to in ■ BIPRU 4.2.2 R (2) it must be able to demonstrate the reasonableness of any differences between those models.

4.2.7

FCA PRA

G

- (1) This paragraph provides *guidance* on ■ BIPRU 4.2.2 R and in particular ■ BIPRU 4.2.2 R (2).
- (2) The *IRB approach* as applicable to a *firm* should be an integral part of its business and risk management processes and procedures to the extent that credit risk is relevant to them. It should also have a substantial influence on its decision-making and actions.
 - (a) particular regard should be had to the use of the *IRB approach* in:
 - (i) credit approval;
 - (ii) individual and portfolio limit setting;
 - (iii) reporting of credit risk information; and
 - (iv) provisioning;
 - (b) other relevant aspects include:
 - (i) assessment of economic capital;
 - (ii) internal capital allocation so far as related to credit risk;
 - (iii) risk appetite;
 - (iv) strategy and acquisitions;
 - (v) profitability and performance; and
 - (vi) performance-related remuneration;
 - (c) the carrying out of the *firm's* obligations under the *overall Pillar 2 rule*; and
 - (d) matters relating to the *firm's* infrastructure, including information technology, skills and resources and organisational culture.

4.2.8

FCA PRA

G

This paragraph provides further *guidance* on ■ BIPRU 4.2.2 R and in particular ■ BIPRU 4.2.2 R (2). In the *appropriate regulator's* view risk management has an essential role in informing risk decisions. However, an essential role does not necessarily mean an exclusive role or even always a primary role. There may be justifiable differences between the *IRB approach* and the *firm's* use of *rating systems* for its internal purposes as referred to in ■ BIPRU 4.2.2 R (2). For example, internal standards and policies may refer to estimates of *PD* and *LGD* for the length of the asset rather than to estimates based on a one-year period (in the case of *PD* estimates) or on an economic downturn (in the case of *LGD* estimates) required by the *IRB approach*.

4.2.9

FCA PRA

G

If a *firm* uses scorecards for its internal credit approval process and the models it uses for the purpose of the *IRB approach* are fundamentally different from those scorecards, a *firm's* demonstration of how this is compatible with ■ BIPRU 4.2.2 R (2) might include

demonstrating that estimates calculated under the *IRB approach* are used to change sanctioning decisions at an individual or portfolio level. Examples of this might include amending cut-offs, the application of policy rules, the revision of an existing scorecard or the introduction of a new one or taking strategic decisions on which segments of the market to target.

4.2.10

FCA PRA

G

To the extent that a *firm* uses *LGD* estimates in its internal risk management processes that differ from the downturn *LGDs* used in the calculation of *risk weighted* assets (see ■ BIPRU 4.3.103 R), the reasons for the difference should be documented in accordance with ■ BIPRU 4.3.109 R.

Requirements concerning the experience requirement

4.2.11

FCA PRA

R

A *firm* must be able to demonstrate that it has been using for the *IRB exposure classes* in question *rating systems* that were broadly in line with the *minimum IRB standards* for internal risk measurement and management purposes for at least three years prior to the date of its *IRB permission*.

[Note: BCD Article 84(3)]

4.2.12

FCA PRA

G

In meeting the experience requirement under ■ BIPRU 4.2.11 R, the *appropriate regulator* would expect a *firm* to be able to demonstrate that it has been:

- (1) operating an internal *rating system* with estimates of *PD*;
- (2) meeting the standards in ■ BIPRU 4 for senior management knowledge and reporting; and
- (3) meeting the standards in ■ BIPRU 4 relating to the use of *rating systems* in its business;

for the required minimum 3 year period.

4.2.13

FCA PRA

R

A *firm* that has applied for the use of own estimates of *LGDs* and/or *conversion factors* must be able to demonstrate to the *appropriate regulator* that it has been estimating and employing own estimates of *LGDs* and/or *conversion factors* in a manner that was broadly consistent with the *minimum IRB standards* for use of own estimates of those parameters for at least three years prior to the date of its *IRB permission* or of a variation of its *IRB permission* that, in either case, entitled the *firm* to use own estimates of *LGDs* and/or *conversion factors*.

[Note: BCD Article 84(4)]

4.2.14

FCA PRA

G

In meeting the experience requirement under ■ BIPRU 4.2.13 R, the *appropriate regulator* would expect a *firm* to be able to demonstrate that it has been:

- (1) operating an internal *rating system* with estimates of *LGD* and with *conversion factors*; and

(2) compliant with ■ BIPRU 4.2.11 R as applied to the *advanced IRB approach*.

for the required minimum 3 year period.

4.2.15

FCA PRA

G

In the *appropriate regulator's* view the standard required by ■ BIPRU 4.2.11 R and ■ BIPRU 4.2.13 R is for a *rating system* to be improved in the light of experience during the three year period so that it meets the minimum requirements more fully for the last year than for the two prior years, provided that the *rating system* has not changed so profoundly that experience from the first or second years becomes of marginal relevance in assessing the reliability of the changed *rating system*.

Implementation of the internal ratings based approach

4.2.16

FCA PRA

R

A *firm* must comply with any requirements in its *IRB permission* relating to the matters described in ■ BIPRU 4.2.17 R - ■ BIPRU 4.2.35 G.

4.2.17

FCA PRA

R

Without prejudice to ■ BIPRU 4.2.26 R, a *firm* and any *parent undertaking* and its *subsidiary undertakings* must implement the *IRB approach* for all *exposures*.

[Note: BCD Article 85(1) (part)]

4.2.18

FCA PRA

R

To the extent that a *firm's IRB permission* permits this, implementation may be carried out sequentially across the different *IRB exposure classes* within the same business unit, across different business units in the same group or for the use of own estimates of *LGDs* or *conversion factors* for the calculation of *risk weights* for the *sovereign, institution and corporate IRB exposure class*.

[Note: BCD Article 85(1) (part)]

4.2.19

FCA PRA

R

In the case of the *retail exposures*, implementation may (but only to the extent provided for in the *firm's IRB permission*) be carried out sequentially across the categories of *exposures* to which the different correlations in ■ BIPRU 4.6.41 R-■ BIPRU 4.6.44 R correspond.

[Note: BCD Article 85(1) (part)]

4.2.20

FCA PRA

R

- (1) Implementation of the *IRB approach* as referred to in ■ BIPRU 4.2.18 R must be carried out within a reasonable period of time as set out in the *IRB permission*.
- (2) The implementation must be carried out subject to strict conditions determined by the *appropriate regulator* and set out in the *IRB permission*.
- (3) A *firm* must not use the flexibility under ■ BIPRU 4.2.18 R selectively with the purpose of achieving reduced minimum capital requirements in respect of those *IRB exposure classes*

or business units that are yet to be included in the *IRB approach* or in the use of own estimates of *LGDs* and *conversion factors*.

[Note: BCD Article 85(2)]

4.2.21

FCA PRA

G

- (1) A *firm* should achieve full roll-out of the *IRB approach* to all its *exposures*, subject to the exemptions outlined in ■ BIPRU 4.2.26 R, within the period specified in its *IRB permission*. A *firm* should not retain a permanent mix of portfolios on the *standardised approach* and the *IRB approach*, on the *foundation IRB approach* and the *advanced IRB approach* or on a mixture of all approaches with the exception of portfolios covered by those exemptions.
- (2) This applies to a move:
 - (a) from the *standardised approach* to the *IRB approach*;
 - (b) from the *foundation IRB approach* to the *advanced IRB approach*; and
 - (c) from the *transitional rules and guidance for BIPRU* to the *IRB approach*.
- (3) The period referred to in ■ BIPRU 4.2.20 R (1) will generally be not more than three years of starting use of the *IRB approach* or the *advanced IRB approach* as applicable.

4.2.22

FCA PRA

R

A *firm* using the *IRB approach* for any *IRB exposure class* must at the same time use the *IRB approach* for the *equity exposure class*.

[Note: BCD Article 85(3)]

4.2.23

FCA PRA

R

Subject to ■ BIPRU 4.2.17 R - ■ BIPRU 4.2.20 R, ■ BIPRU 4.2.22 R and ■ BIPRU 4.2.26 R, a *firm* that has an *IRB permission* must not use the *standardised approach* for the calculation of *risk weighted exposure amounts* for the *exposures* to which the *IRB approach* applies under the *IRB permission*.

[Note: BCD Article 85(4)]

4.2.24

FCA PRA

R

Subject to ■ BIPRU 4.2.17 R - ■ BIPRU 4.2.22 R and ■ BIPRU 4.2.26 R, a *firm* whose *IRB permission* provides for the use of the *advanced IRB approach* for the calculation of *LGDs* and *conversion factors* for the *sovereign, institution and corporate IRB exposure class* must not use the *LGD values* and *conversion factors* applicable to the *foundation IRB approach* for the *exposures* to which the *advanced IRB approach* applies under the *IRB permission*.

[Note: BCD Article 85(5)]

4.2.25

FCA PRA

G

The *appropriate regulator* will not agree to a *firm's* request to revoke or vary its *IRB permission* so as to permit the *firm* to revert to the *standardised approach* except for demonstrated good cause. Likewise, the *appropriate regulator* will not agree to a *firm's* request to revoke or vary its *IRB permission* so as to permit the *firm* to revert to the

foundation IRB approach if the *IRB permission* provides for it to use the *advanced IRB approach*, except for demonstrated good cause.

Combined use of methodologies: Basic provisions

4.2.26

FCA PRA

R

- (1) To the extent that its *IRB permission* permits this, a *firm* permitted to use the *IRB approach* in the calculation of *risk weighted exposure amounts* and *expected loss* amounts for one or more *IRB exposure classes* may apply the *standardised approach* in accordance with this *rule*.
- (2) A *firm* may apply the *standardised approach* to the *IRB exposure class* referred to in ■ BIPRU 4.3.2 R (1) (Sovereigns) where the number of material counterparties is limited and it would be unduly burdensome for the *firm* to implement a *rating system* for these counterparties. A *firm* may include in this treatment an *exposure* of the type described in ■ BIPRU 3.4.18 R (Exposures to churches or religious communities) that would fall within ■ BIPRU 3.4.15 R or ■ BIPRU 3.4.17 R (Exposure to a regional government or local authority) if those provisions had not been excluded by ■ BIPRU 3.4.18 R.
- (3) A *firm* may apply the *standardised approach* to the *IRB exposure class* referred to in ■ BIPRU 4.3.2 R (2) (Institutions), where the number of material counterparties is limited and it would be unduly burdensome for the *firm* to implement a *rating system* for these counterparties.
- (4) A *firm* may apply the *standardised approach* to *exposures* in non-significant business units as well as *IRB exposure classes* that are immaterial in terms of size and perceived risk profile.
- (5) A *firm* may apply the *standardised approach* to *exposures* to the central governments of *EEA States* and their regional governments, local authorities and administrative bodies, provided that:
 - (a) there is no difference in risk between the *exposures* to the central government and those other *exposures* because of specific public arrangements; and
 - (b) *exposures* to the central government are assigned a 0% *risk weight* under the *standardised approach*.
- (6) A *firm* may apply the *standardised approach* to *exposures* of a *firm* to a counterparty which is its *parent undertaking*, its *subsidiary undertaking* or a *subsidiary undertaking* of its *parent undertaking* provided that the counterparty is an *institution*, a *financial holding company*, a *financial institution*, an *asset*

management company or an *ancillary services undertaking* subject to appropriate prudential requirements.

- (7) A *firm* may apply the *standardised approach* to *equity exposures* to entities whose credit obligations qualify for a 0% *risk weight* under the *standardised approach* (including those publicly sponsored entities where a zero *risk weight* can be applied).
- (8) A *firm* may apply the *standardised approach* to *equity exposures* incurred under legislative programmes to promote specified sectors of the economy that provide significant subsidies for the investment to the *firm* and involve some form of government oversight and restrictions on the *equity* investments. This exclusion is limited to an aggregate of 10% of *capital resources*.
- (9) A *firm* may apply the *standardised approach* to the *exposures* identified in ■ BIPRU 3.4.48 R (Exposures in the form of minimum reserves required by the European Central Bank or by the central bank of an *EEA State*) meeting the conditions specified therein.
- (10) A *firm* may apply the *standardised approach* to state and state-reinsured guarantees pursuant to ■ BIPRU 5.7.12 R (Conditions for state and state-reinsured guarantees).

[Note: BCD Article 89(1)]

Combined use of methodologies: Documentation

4.2.27

FCA PRA

G

As part of the application for an *IRB permission*, a *firm* should have a well documented policy explaining the basis on which *exposures* are to be selected for permanent exemption from the *IRB approach* and for treatment under the *standardised approach*. The *firm's* roll out plan should also contain provisions for the continuing application of that policy on a consistent basis over time.

Combined use of methodologies: Sovereign and institutional, exposures

4.2.28

FCA PRA

G

A *firm* intending to make use of ■ BIPRU 4.2.26 R (2) or ■ BIPRU 4.2.26 R (3) should demonstrate to the *appropriate regulator* when applying for an *IRB permission* that it meets the requirements of those provisions with respect to its sovereign or, as the case may be, institutional, *exposures*.

Combined use of methodologies: Meaning of non-significance and immateriality

4.2.29

FCA PRA

R

For the purposes of ■ BIPRU 4.2.26 R (4), the *equity exposure IRB exposure class* of a *firm* must be considered material if its aggregate value, excluding *equity exposures* incurred under legislative programmes as referred to in ■ BIPRU 4.2.26 R (8) but including *exposures* in a *CIU* treated as *equity exposures* in accordance with ■ BIPRU 4.9.11 R to ■ BIPRU 4.9.15 R, exceeds, on average over the preceding year, 10% of the *firm's capital resources*.

If the number of those *equity exposures* is less than 10 individual holdings, that threshold is 5% of the *firm's capital resources*.

[Note: BCD Article 89(2)]

4.2.30

FCA PRA

R

- (1) This *rule* sets out what must be treated as being non-significant business or immaterial for the purposes of ■ BIPRU 4.2.26 R (4), for *exposures* that do not fall within the *equity exposure IRB exposure class*.
- (2) A *firm* may elect permanently to exclude *exposures* from the *IRB approach* and apply the *standardised approach*. However a *firm* may only make use of this exemption to the extent that:
 - (a) the *consolidated credit risk requirement* (adjusted under (6)) so far as it is attributable to the excluded *exposures*; would be no more than 15% of:
 - (b) the *consolidated credit risk requirement* (adjusted under (6)) with respect to all *exposures* (including the ones dealt with under (a)).
- (3) *Exposures* excluded under ■ BIPRU 4.2.29 R or ■ BIPRU 4.2.26 R (2), ■ BIPRU 4.2.26 R (3) and ■ BIPRU 4.2.26 R (5)-■ BIPRU 4.2.26 R (7) must not be included in (a) or (b).
- (4) The calculation in (2)(a) is based on the *standardised approach*.
- (5) The calculation in (2)(b) is based on whichever of the *standardised approach* and the *IRB approach* would apply to the *exposures* referred to in (2)(b) at the time when the calculation is being made.
- (6) The *consolidated credit risk requirement* is adjusted for the purposes of this *rule* as follows:
 - (a) the element based on the *concentration risk capital component* is excluded, with only the elements based on the *credit risk capital component* and the *counterparty risk capital component* being taken into account; and
 - (b) the calculation is carried out with respect to the group of *undertakings* referred to in ■ BIPRU 4.2.17 R.
- (7) If a group with respect to which the calculation in this *rule* is being carried out is not required to calculate the *consolidated credit risk requirement*, the calculations in this *rule* must be carried out as if it were.

4.2.31

FCA PRA

R

If a *firm* applies to use the *advanced IRB approach* for the *sovereign, institution and corporate IRB exposure class*, ■ BIPRU 4.2.26 R (4) also applies with respect to *exposures* in that class. For these purposes, to the extent permitted in the *firm's IRB permission*, a *firm* may:

- (1) exclude some *exposures* from the *IRB approach* and apply the *standardised approach* to those *exposures*; and
- (2) exclude other *exposures* from the *advanced IRB approach* and apply the *foundation IRB approach* to those *exposures*.

4.2.32

FCA PRA

G

Where ■ BIPRU 4.2.31 R applies:

- (1) the 15% limit in ■ BIPRU 4.2.30 R (2) is a combined limit for excluded *exposures* remaining on the *standardised approach* and excluded *exposures* remaining on the *foundation IRB approach*; and
- (2) the calculation in ■ BIPRU 4.2.30 R (2)(a) is carried out under whichever method of calculation would be applicable to the *exposure* in question.

Combined use of methodologies: Territorial aspects

4.2.33

FCA PRA

G

- (1) This *guidance* sets out at what level the tests in ■ BIPRU 4.2.30 R- ■ BIPRU 4.2.32 G will be applied in the case of a *firm* that is a member of a group that is part of a bigger group.
- (2) If an *EEA banking and investment group* for which the *appropriate regulator* is the lead regulator is part of a wider *EEA banking and investment group* for which the *appropriate regulator* is also lead regulator then ■ BIPRU 4.2.30 R- ■ BIPRU 4.2.32 G apply with respect to that wider group.
- (3) If an *EEA banking and investment group* for which the *appropriate regulator* is the lead regulator is part of a wider *EEA banking and investment group* for which another *competent authority* is lead regulator then ■ BIPRU 4.2.26 R (4) applies with respect to that wider group but the requirements of that lead regulator will generally apply in place of ■ BIPRU 4.2.30 R- ■ BIPRU 4.2.32 G.
- (4) If an *EEA banking and investment group* for which the *appropriate regulator* is the lead regulator is part of a wider *third-country banking and investment group* that is subject to equivalent supervision by a regulatory authority outside the *EEA*, then ■ BIPRU 4.2.26 R (4) applies with respect to both that wider group and the sub-group of which the *appropriate regulator* is lead regulator. However the requirements of that third country regulator apply in place of ■ BIPRU 4.2.30 R- ■ BIPRU 4.2.32 G. The question of whether supervision is equivalent is decided in accordance with ■ GENPRU 3.2 (Third country groups).
- (5) If an *EEA banking and investment group* for which the *appropriate regulator* is the lead regulator is part of a wider *third-country banking and investment group* that is not subject to equivalent supervision by a regulatory authority outside the *EEA*, then ■ BIPRU 4.2.30 R- ■ BIPRU 4.2.32 G will apply. ■ BIPRU 4.2.30 R- ■ BIPRU 4.2.32 G will apply to the whole group if ■ GENPRU 3.2.9 R (Supervision by analogy) applies. If ■ GENPRU 3.2.4 G (Alternative measures)

applies, ■ BIPRU 4.2.30 R- ■ BIPRU 4.2.32 G will apply to the *EEA banking and investment group*.

- (6) In the case of a group described in (2) or (3) in respect of which the *Article 129 procedure* applies then ■ BIPRU 4.2.26 R (4) applies with respect to that wider group. The detailed requirements that apply will be decided in accordance with that procedure.

Combined use of methodologies: Intra-group exposures

4.2.34

FCA PRA

G

- (1) Generally, the *appropriate regulator* will consider excluding, through a *firm's IRB permission, exposures* falling into ■ BIPRU 4.2.26 R (6) from the *IRB approach*. The degree to which this exclusion applies will be set out in the *firm's IRB permission*.
- (2) *Exposures* excluded under (1) will be eligible for a 0% *risk weight* under the *standardised approach* if they satisfy the conditions in ■ BIPRU 3.2.25 R to ■ BIPRU 3.2.27A R (Zero risk weight for certain intra-group exposures).
- (3) *Exposures* to or holdings in any non-financial *undertakings* in a *firm's group* are not eligible for permanent exemption from the *IRB approach* under ■ BIPRU 4.2.26 R (6), as they are not subject to consolidated supervision. It is also the *appropriate regulator's* policy that *exposures* to or holdings in any *insurance undertaking* are ineligible. Such *exposures* should remain on the *IRB approach* unless excluded under another part of ■ BIPRU 4.2.26 R.
- (4) If a *firm* uses the exemption in (1) it should have a policy that:
- provides for the identification of connected counterparties excluded under (1);
 - identifies *exposures* that would be permanently exempted from the *IRB approach* under (1); and
 - identifies the connected counterparty *exposures* that are not permitted to be permanently exempted from the *IRB approach* under (1).
- (5) The policy in (4) should be applied consistently to all *exposures* excluded under (1).

Combined use of methodologies: Purchase of a new businesses

4.2.35

FCA PRA

G

- (1) This *guidance* deals with some possible effects of acquiring a major new business after the grant of an *IRB permission*.
- (2) A *firm* should if possible ensure that the *exposures* arising through the acquisition are dealt with in accordance with the *firm's IRB permission*.
- (3) If the acquisition is made during the currency of a roll out plan under ■ BIPRU 4.2.18 R, a *firm* should ensure that the *exposures* arising through the acquisition are dealt with in accordance with that plan. For these purposes the existing and the acquired business should be considered together. The whole of the *firm's* business, including the newly acquired business, should be included in both the denominator and numerator of the fraction in ■ BIPRU 4.2.30 R.

- (4) If a *firm* cannot comply with (2) the *appropriate regulator* will consider an application to vary the *firm's IRB permission* in order to deal with the acquisition. For example the *appropriate regulator* may agree to extend the time by which the roll out should be completed (see ■ BIPRU 4.2.20 R). However any such variation should be consistent with the provisions of ■ BIPRU 4.2 that would have applied if the acquisition had been included in the *firm's* original application for an *IRB permission*.
- (5) If the acquisition is made after a *firm* has completed its roll out under ■ BIPRU 4.2.18 R the *appropriate regulator* will not in general agree to an application to treat an *exposure*:
 - (a) under the *standardised approach* if it would otherwise be treated under the *IRB approach* under the *firm's IRB permission*; or
 - (b) under the *foundation IRB approach* if it would otherwise be treated under the *advanced IRB approach* under the *firm's IRB permission*.
- (6) Any application to disapply the policy in (5) will be treated in accordance with the approach set out in ■ BIPRU 4.2.25 G.
- (7) The *appropriate regulator* will also adopt the approach in (5) while a roll out plan is in progress if, in relation to an *exposure* of a particular type, the period for completion of the roll out for those *exposures* under that plan has ended.

4.3 The IRB approach: Provisions common to different exposure classes

Application

4.3.1

FCA PRA

R

This section applies to all *exposures* treated under the *IRB approach*.

Exposure classes

4.3.2

FCA PRA

R

Each *exposure* must be assigned to one of the following *exposure* classes:

- (1) claims or contingent claims on central governments and *central banks*;
- (2) claims or contingent claims on *institutions*;
- (3) claims or contingent claims on corporates;
- (4) retail claims or contingent retail claims;
- (5) equity claims;
- (6) *securitisation* positions; and
- (7) *non credit-obligation assets*.

[Note: BCD Article 86(1)]

4.3.3

FCA PRA

R

The methodology used by a *firm* for assigning *exposures* to different *IRB exposure classes* must be appropriate and consistent over time.

[Note: BCD Article 86(9)]

Calculation of risk weighted exposure amounts

4.3.4

FCA PRA

R

The *risk weighted exposure amounts* for credit risk for *exposures* belonging to one of the *exposure* classes referred to in (1) to (4) must, unless deducted from *capital resources*, be calculated in accordance with the following provisions:

- (1) for *exposures* in the *sovereign, institution and corporate IRB exposure class*, ■ BIPRU 4.4.57 R to ■ BIPRU 4.4.60 R,

- BIPRU 4.4.79 R, ■ BIPRU 4.5.8 R to ■ BIPRU 4.5.10 R (for *specialised lending exposures*), ■ BIPRU 4.9.3 R and ■ BIPRU 4.8.16 R to ■ BIPRU 4.8.17 R (for purchased *corporate exposure* receivables);
- (2) for *exposures in the retail exposure class*, ■ BIPRU 4.6.41 R to ■ BIPRU 4.6.44 R, ■ BIPRU 4.6.57 R and ■ BIPRU 4.8.18 R to ■ BIPRU 4.8.20 R (for purchased *retail exposure* receivables);
- (3) for *exposures in the equity exposure class*, ■ BIPRU 4.7.5 R to ■ BIPRU 4.7.6 R, ■ BIPRU 4.7.9 R to ■ BIPRU 4.7.11 R, ■ BIPRU 4.7.14 R to ■ BIPRU 4.7.16 R and ■ BIPRU 4.7.24 R to ■ BIPRU 4.7.25 R; and
- (4) for *exposures in the non credit-obligation assets exposure class*, ■ BIPRU 4.9.6 R.

[Note: BCD Article 87(1)]

4.3.5

FCA PRA

R

The calculation of *risk weighted exposure amounts* for credit risk and *dilution risk* must be based on the relevant parameters associated with the *exposure* in question. These include *probability of default (PD)*, *loss given default (LGD)*, maturity (M) and the *exposure* value of the *exposure*. *PD* and *LGD* may be considered separately or jointly, in accordance with the provisions relating to *PD* and *LGD* in ■ BIPRU 4.4, ■ BIPRU 4.6, ■ BIPRU 4.7 and ■ BIPRU 4.8 at:

- (1) for *exposures in the sovereign, institution and corporate IRB exposure class*, ■ BIPRU 4.4.34 R - ■ BIPRU 4.4.35 R, ■ BIPRU 4.4.42 R to ■ BIPRU 4.4.43 R, ■ BIPRU 4.4.63 R - ■ BIPRU 4.4.66 R, ■ BIPRU 4.4.80 R and, for *PD* and *LGD* for *dilution risk* of purchased *corporate exposure* receivables, ■ BIPRU 4.8.23 R and ■ BIPRU 4.8.26 R;
- (2) for *exposures in the retail exposure class*, ■ BIPRU 4.6.50 R - ■ BIPRU 4.6.54 R, ■ BIPRU 4.6.58 R, and, for *PD* and *LGD* for *dilution risk* of purchased *retail exposure* receivables, ■ BIPRU 4.8.24 R and ■ BIPRU 4.8.27 R; and
- (3) for *exposures in the equity exposure class*, ■ BIPRU 4.7.18 R and ■ BIPRU 4.7.20 R - ■ BIPRU 4.7.21 R.

[Note: BCD Article 87(3)]

4.3.6

FCA PRA

R

Calculation of expected loss amounts

The *expected loss* amounts for *exposures* belonging to one of the *IRB exposure classes* referred to in (1) to (3) must be calculated in accordance with the methods set out in the following provisions:

- (1) for *exposures* in the *sovereign, institution and corporate IRB exposure class*, ■ BIPRU 4.4.61 R to ■ BIPRU 4.4.62 R and (for *specialised lending exposures*) ■ BIPRU 4.5.13 R to BIPRU 4.5.15R;
- (2) for *exposures* in the *retail exposure class*, ■ BIPRU 4.6.47 R to ■ BIPRU 4.6.48 R;
- (3) for *exposures* in the *equity exposure class*, ■ BIPRU 4.7.12 R, ■ BIPRU 4.7.17 R and ■ BIPRU 4.7.26 R; and
- (4) (for purchased receivables falling into one of the *IRB exposure classes* in (1) to (3)) ■ BIPRU 4.8.30 R.

[Note: BCD Article 88(1)]

4.3.7

FCA PRA

R

The calculation of *expected loss* amounts in accordance with ■ BIPRU 4.3.6 R must be based on the same input figures of *PD*, *LGD* and the *exposure* value for each *exposure* as being used for the calculation of *risk weighted exposure amounts* in accordance with ■ BIPRU 4. For *defaulted exposures*, where a *firm* uses its own estimate of *LGDs*, *EL* must be the *firm's* best estimate of expected loss (EL_{BE}), for the *defaulted exposure* in accordance with ■ BIPRU 4.3.122 R.

[Note: BCD Article 88(2)]

Treatment of expected loss amounts

4.3.8

FCA PRA

R

The *expected loss* amounts calculated in accordance with ■ BIPRU 4.3.6 R (1), ■ BIPRU 4.3.6 R (2) and ■ BIPRU 4.3.6 R (4) must be subtracted from the sum of value adjustments and provisions related to these *exposures*. Discounts on balance sheet *exposures* purchased when in *default* according to ■ BIPRU 4.4.71 R must be treated in the same manner as value adjustments. *Expected loss* amounts for *securitised exposures* and value adjustments and provisions related to these *exposures* must not be included in this calculation.

[Note: BCD Annex VII Part 1 point 36]

Corporate governance

4.3.9

FCA PRA

R

All material aspects of the rating and estimation processes must be approved by the *firm's governing body* or a designated committee thereof and senior management. These parties must possess a general

understanding of the *firm's rating systems* and detailed comprehension of its associated management reports.

[Note: BCD Annex VII Part 4 point 124]

4.3.10

FCA PRA

G

- (1) A *firm's governing body* or *designated committee* may choose to approve only material aspects of the *firm's rating systems* and material changes to the *firm's rating systems*.
- (2) Where a *firm's governing body* or *designated committee* chooses to approve only material aspects of the *firm's rating systems* and material changes to the *firm's rating systems*:
 - (a) the *firm's governing body* or *designated committee* should define the *firm's* overall approach to material aspects of rating and estimation processes for all *rating systems*, including non-material *rating systems* and approve a policy statement defining that approach; and
 - (b) the *firm* should define and document the process for approval of non-material aspects of the *firm's rating systems*.

4.3.11

FCA PRA

R

Senior management must provide notice to the *governing body* or a *designated committee* thereof of material changes or exceptions from established policies that will materially impact the operations of the *firm's rating systems*.

[Note: BCD Annex VII Part 4 point 125]

4.3.12

FCA PRA

G

Where the *firm's rating systems* are used on a unified basis for the *parent undertaking* and its *subsidiary undertakings* under ■ BIPRU 4.2.3 R, and approval and reporting of the *ratings systems* are carried out at the group level, the governance requirements in ■ BIPRU 4.3.9 R and ■ BIPRU 4.3.11 R may be met if:

- (1) the *subsidiary undertakings* have delegated to the *governing body* or *designated committee* of the *EEA parent institution* or *EEA parent financial holding company* responsibility for approval of the *firm's rating systems*;
- (2) the *governing body* or *designated committee* of the *EEA parent institution* or *EEA parent financial holding company* approves either:
 - (a) all aspects of the *firm's rating systems*, and material changes; or
 - (b) all aspects of the *firm's rating systems* that are material in the context of the group, and material changes to those, and a policy statement defining the overall approach to material aspects of rating and estimation processes for all *rating systems*, including non-material *rating systems*.

PAGE
23

4.3.13

FCA PRA

R

Senior management must have a good understanding of the *rating system's* designs and operations. Senior management must ensure on an ongoing basis that the *rating systems* are operating properly. Senior management must be regularly informed by the credit risk control units about the

performance of the rating process, areas needing improvement, and the status of efforts to improve previously identified deficiencies.

[Note: BCD Annex VII Part 4 point 126]

4.3.14

FCA PRA

R

Internal ratings-based analysis of the *firm's* credit risk profile must be an essential part of the management reporting required under ■ BIPRU 4.3.9 R, ■ BIPRU 4.3.11 R and ■ BIPRU 4.3.13 R. Reporting must include at least risk profile by grade, migration across grades, estimation of the relevant parameters per grade, and comparison of realised *default* rates and, to the extent that own estimates are used, of realised *LGDs* and realised *conversion factors* against expectations and stress-test results. Reporting frequencies must depend on the significance and type of information and the level of the recipient.

[Note: BCD Annex VII Part 4 point 127]

Credit risk control

4.3.15

FCA PRA

R

The credit risk control unit must be independent from the personnel and management functions responsible for originating or renewing *exposures* and report directly to senior management. The unit must be responsible for the design or selection, implementation, oversight and performance of the *rating systems*. It must regularly produce and analyse reports on the output of the *rating systems*.

[Note: BCD Annex VII Part 4 point 128]

4.3.16

FCA PRA

R

The areas of responsibility for the credit risk control unit(s) must include the following:

- (1) testing and monitoring grades and pools;
- (2) production and analysis of summary reports from the *firm's rating systems*;
- (3) implementing procedures to verify that grade and pool definitions are consistently applied across departments and geographic areas;
- (4) reviewing and documenting any changes to the rating process, including the reasons for the changes;
- (5) reviewing the rating criteria to evaluate if they remain predictive of risk (and changes to the rating process, criteria or individual rating parameters must be documented and retained);
- (6) active participation in the design or selection, implementation and validation of models used in the rating process;

- (7) oversight and supervision of models used in the rating process; and
- (8) ongoing review and alterations to models used in the rating process.

[Note: BCD Annex VII Part 4 point 129]

4.3.17

FCA PRA

R

Notwithstanding ■ BIPRU 4.3.16 R, a *firm* using pooled data according to ■ BIPRU 4.3.92 R - ■ BIPRU 4.3.94 R (Overall requirements for estimation) may outsource the following tasks:

- (1) production of information relevant to testing and monitoring grades and pools;
- (2) production of summary reports from the *firm's rating systems*;
- (3) production of information relevant to review of the rating criteria to evaluate if they remain predictive of risk;
- (4) documentation of changes to the rating process, criteria or individual rating parameters; and
- (5) production of information relevant to ongoing review and alterations to models used in the rating process.

[Note: BCD Annex VII Part 4 point 130 (part)]

4.3.18

FCA PRA

R

A *firm* making use of ■ BIPRU 4.3.17 R must ensure that the *appropriate regulator* has access to all relevant information from the third party that is necessary for examining compliance with the *minimum IRB standards* and the *firm's IRB permission* and that the *appropriate regulator* may perform on-site examinations to the same extent as within the *firm*.

[Note: BCD Annex VII Part 4 point 130 (part)]

Documentation of rating systems

4.3.19

FCA PRA

R

A *firm* must document the design and operational details of its *rating systems*. The documentation must evidence compliance with the *minimum IRB standards* and the *firm's IRB permission*, and address topics including portfolio differentiation, rating criteria, responsibilities of parties that rate obligors and *exposures*, frequency of assignment reviews, and management oversight of the rating process.

[Note: BCD Annex VII Part 4 point 31]

4.3.20

FCA PRA

R

A *firm* must ensure that all documentation relating to its *rating systems* or otherwise required by the *rules* governing the *IRB approach* are stored, arranged and indexed in such a way that the *firm* would be able to make them all available to the *appropriate regulator*, or to make any class or description of them specified by the *appropriate regulator* available to the

appropriate regulator, immediately on demand or within a short time thereafter.

4.3.21

FCA PRA

R

A *firm* must document the rationale for and analysis supporting its choice of rating criteria. A *firm* must document all major changes in the risk rating process, and such documentation must support identification of changes made to the risk rating process subsequent to the last review by the *appropriate regulator*. The organisation of rating assignment including the rating assignment process and the internal control structure must also be documented.

[Note: BCD Annex VII Part 4 point 32]

4.3.22

FCA PRA

R

A *firm* must document the specific definitions of default and loss used internally and demonstrate consistency with the definitions of *default* and *loss* set out in the *glossary* and ■ BIPRU 4.

[Note: BCD Annex VII Part 4 point 33]

4.3.23

FCA PRA

G

A *firm's* documentation relating to data should include clear identification of responsibility for data quality. A *firm* should set standards for data quality and aim to improve them over time. A *firm* should measure its performance against those standards. A *firm* should ensure that its data is of high enough quality to support its risk management processes and the calculation of its capital requirements.

4.3.24

FCA PRA

R

Where a *firm* employs statistical models in the rating process, the *firm* must document its methodologies. This material must:

- (1) provide a detailed outline of the theory, assumptions and/or mathematical and empirical basis of the assignment of estimates to grades, individual obligors, *exposures*, or pools, and the data source(s) used to estimate the model;
- (2) establish a rigorous statistical process (including out-of-time and out-of-sample performance tests) for validating the model; and
- (3) indicate any circumstances under which the model does not work effectively.

[Note: BCD Annex VII Part 4 point 34]

Rating systems

4.3.25

FCA PRA

R

A *rating system* comprises all of the methods, processes, controls, data collection and IT systems that support the assessment of credit risk, the assignment of *exposures* to grades or pools (rating), and the quantification of *default* and *loss* estimates for a certain type of *exposure*.

[Note: BCD Annex VII Part 4 point 1]

4.3.26

FCA PRA

R

If a *firm* uses multiple *rating systems*, the rationale for assigning an obligor or a transaction to a *rating system* must be documented and applied in a manner that appropriately reflects the level of risk.

[Note: BCD Annex VII Part 4 point 2]

4.3.27

FCA PRA

R

Assignment criteria and processes must be periodically reviewed to determine whether they remain appropriate for the current portfolio and external conditions.

[Note: BCD Annex VII Part 4 point 3]

4.3.28

FCA PRA

R

Where a *firm* uses direct estimates of risk parameters these may be seen as the outputs of grades on a continuous rating scale.

[Note: BCD Annex VII Part 4 point 4]

Validation of internal estimates

4.3.29

FCA PRA

R

A *firm* must have robust systems in place to validate the accuracy and consistency of *rating systems*, processes, and the estimation of all relevant risk parameters (*PD*, *LGD*, *conversion factors* and *EL*). A *firm* must be able to demonstrate to the *appropriate regulator* that the internal validation process enables it to assess the performance of internal rating and risk estimation systems consistently and meaningfully.

[Note: BCD Annex VII Part 4 point 110]

4.3.30

FCA PRA

R

- (1) A *firm* must validate its *rating systems*. Its validation process must include, as a minimum, the elements set out in (2) - (8).
- (2) A *firm* must establish and define standards of objectivity, accuracy, stability and conservatism that it designs its *ratings systems* to meet. It must have processes that establish whether its *rating systems* meet those standards.
- (3) A *firm* must establish and define standards of accuracy of calibration (i.e. whether outcomes are consistent with estimate) and discriminative power (i.e. the ability to rank-order risk) that it designs its *rating systems* to meet. It must have processes that establish whether its *rating systems* meet those standards.
- (4) A *firm* must have policies and standards that specify the actions to be taken when a *rating system* fails to meet the standards of accuracy and discriminative power referred to in (2) and (3).
- (5) A *firm's* validation process must include a mix of developmental evidence, benchmarking and process verification. A *firm's* validation process must include policies on how this mixture varies between different *rating systems*.

- (6) A *firm's* validation process must include the use of both quantitative and qualitative techniques.
- (7) A *firm's* validation process must include policies on how validation procedures are expected to vary over time.
- (8) A *firm's* validation process must include independent input into and review of its *rating systems*.
- (9) The standards set under (2) and (3) must meet the *minimum IRB standards*.
- (10) For the purpose of (5):
 - (a) developmental evidence means evidence that substantiates whether the logic and quality of a *rating system* (including the quantification process) adequately discriminates between different levels of, and delivers accurate estimates of *PD*, *EL*, *LGD* and *conversion factors* (as applicable); and
 - (b) process verification means the process of establishing whether the methods used in a *rating system* to discriminate between different levels of risk and to quantify *PD*, *EL*, *LGD* and *conversion factors* are being used, monitored and updated in the way intended in the design of the *rating system*.

4.3.31

FCA PRA

G

A *firm* should have regard to the involvement of management at an appropriately senior level in the validation process.

4.3.32

FCA PRA

G

The approach to validation may vary with the significance of the *exposures* covered by a *rating system*.

4.3.33

FCA PRA

R

A *firm* must regularly compare realised *default* rates with estimated *PDs* for each grade and where realised *default* rates are outside the expected range for that grade a *firm* must specifically analyse the reasons for the deviation. A *firm* using its own estimates of *LGDs* and/or *conversion factors* must also perform analogous analysis for own estimates of *LGDs* and *conversion factors*. Such comparisons must make use of historical data that cover as long a period as possible. A *firm* must document the methods and data used in such comparisons. This analysis and documentation must be updated at least annually.

[Note: BCD Annex VII Part 4 point 111]

4.3.34

FCA PRA

G

- (1) This paragraph sets out *guidance* on assessing the adequacy of a *rating system's* discriminative power (see ■ BIPRU 4.3.30 R (3) on the meaning of discriminative power).

- (2) A *firm* should be able to explain the performance of its *rating systems* against its chosen measure (or measures) of discriminative power. In making this comparison a *firm* should rely primarily on actual historic *default* experience where this is available. In particular, a *firm* should be able to explain:
 - (a) the extent of any potential inaccuracy in these measures, caused in particular by small sample size; and
 - (b) the potential for divergence in the future, whether caused by changing economic conditions or other factors.
- (3) The assessment of discriminative power should include appropriate use of external benchmarks where available.
- (4) The *appropriate regulator* will, in assessing the *firm's* performance, take into consideration the sophistication of the measure of discrimination chosen.
- (5) In the case of a portfolio for which there is insufficient *default* experience to provide any confidence in statistical measures of discriminative power a *firm* need not carry out the procedure in (2) and may instead use other methods. For example, it may make use of comparison with an external measurement approach by analysing whether the *firm's rating systems* and the external approach rank common obligors in broadly similar ways. A *firm* should be able to explain the methodology it uses and the rationale for its use.

4.3.35

FCA PRA

R

A *firm* must also use other appropriate quantitative validation tools and comparisons with relevant external data sources. The analysis must be based on data that is appropriate to the portfolio, is updated regularly, and covers a relevant observation period. A *firm's* internal assessments of the performance of its *rating systems* must be based on as long a period as possible.

[Note: BCD Annex VII Part 4 point 112]

4.3.36

FCA PRA

R

The methods and data used for quantitative validation must be consistent through time. Changes in estimation and validation methods and data (both data sources and periods covered) must be documented.

[Note: BCD Annex VII Part 4 point 113]

4.3.37

FCA PRA

R

A *firm* must have sound internal standards for situations where deviations in realised *PDs*, *LGDs*, *conversion factors* and, where *EL* is used, total losses, from expectations become significant enough to call the validity of the estimates into question. These standards must take account of business cycles and similar systematic variability in *default* and *loss* experience. Where realised values continue to be higher than expected values, a *firm* must revise estimates upward to reflect its *default* and *loss* experience.

[Note: BCD Annex VII Part 4 point 114]

Internal audit

4.3.38

FCA PRA

R

Internal audit or another comparable independent auditing unit must review at least annually the *firm's rating systems* and its operations, including the operations of the *firm* and the estimation of *PDs*, *LGDs*, *ELs* and *conversion factors*. Areas of review must include adherence to all applicable minimum requirements.

[Note: BCD Annex VII Part 4 point 131]

Stress tests used in assessment of capital adequacy

4.3.39

FCA PRA

R

A *firm* must have in place sound stress testing processes for use in the assessment of its capital adequacy. Stress testing must involve identifying possible events or future changes in economic conditions that could have unfavourable effects on the *firm's credit exposures* and assessment of the *firm's* ability to withstand such changes.

[Note: BCD Annex VII Part 4 point 40]

4.3.39A

FCA PRA

G

The *appropriate regulator* expects that *firms* will routinely make use of stress testing and scenario analysis as a tool in the calibration and/or validation of their *IRB approach* parameters in order to increase the accuracy or, at least, the conservatism of the estimates. Stress testing should include a thorough exploration of various outturns different to the *firm's* normal expectations in order to give the *firm* a clear view of the potential for the forward-looking estimate to be different from that indicated by the primary data source(s). *Firms* should consider this as an integral part of their quantification process, and should have clear standards for how the results of the stress tests affect the final estimates used for the *IRB approach* parameters.

4.3.40

FCA PRA

R

- (1) A *firm* must regularly perform a credit risk stress test to assess the effect of certain specific conditions on its total capital requirements for credit risk. The test to be employed must be one chosen by the *firm*. The test to be employed must be meaningful and reasonably conservative. Stressed portfolios must contain the vast majority of a *firm's* total *exposures* covered by the *IRB approach*.
- (2) The stress test must be designed to assess the *firm's* ability to meet its capital requirements for credit risk under ■ GENPRU 2.1 during all stages of the economic cycle and during an economic downturn scenario based on forward looking hypothetical events calibrated against the most adverse movements in individual risk drivers experienced over a long historical period.
- (3) In particular the stress test must address the impact (including by ratings migration) of changes in the credit quality of its credit risk counterparties including its protection providers. A *firm* using the treatment set out in ■ BIPRU 4.4.79 R must in particular consider the impact of protection providers falling outside the eligibility criteria.

- (4) The stress test must be conducted on the basis of the *firm's exposures* (on- and off-balance sheet) as they stand at the time of the stress test.
- (5) The stress test must be carried out at least annually and also in the event of a significant change in the state of the economy.
- (6) A *firm* need not assume that the recession referred to in (2) will occur in the 12 months immediately following the stress test. Instead, the stress test must incorporate a plausible time horizon for the occurrence of the cyclical deterioration of the severity tested for. A *firm* need not assume that the downturn will occur for all portfolios in all jurisdictions simultaneously.

[Note: BCD Annex VII Part 4 points 41 and 42]

4.3.41

FCA PRA

G

To the extent that the economic conditions assumed in the stress tests required under ■ BIPRU 4.3.39 R or ■ BIPRU 4.3.40 R coincide with the conditions assumed in the production of economic downturn *LGDs* (see ■ BIPRU 4.3.103 R), the *LGDs* to be used might be expected to be similar.

4.3.42

FCA PRA

G

The requirement in ■ BIPRU 4.3.40 R (2) is to identify, in a forward-looking manner, severe but plausible downturn conditions relevant to business lines and jurisdictions and to determine the likely impact of those conditions on a *firm's* credit risk regulatory capital requirements. The description of the economic recession contained in ■ BIPRU 4.3.40 R (2) should not be taken as stipulating one approach (e.g. statistical) over other approaches (e.g. scenario analysis) in the identification of the relevant recessionary circumstances.

Rating systems: Assignment to grades or pools

4.3.43

FCA PRA

R

A *firm* must have specific definitions, processes and criteria for assigning *exposures* to grades or pools within a *rating system*.

[Note: BCD Annex VII Part 4 point 17 (part)]

4.3.44

FCA PRA

R

The grade or pool definitions and criteria must be sufficiently detailed to allow those charged with assigning ratings consistently to assign obligors or facilities posing similar risk to the same grade or pool. This consistency must exist across lines of business, departments and geographic locations within each *rating system*.

[Note: BCD Annex VII Part 4 point 17 (part)]

4.3.45

FCA PRA

G

In meeting ■ BIPRU 4.3.44 R a *firm* should have regard to its application to each *rating system*.

4.3.46

FCA PRA

R

The documentation of the rating process must allow third parties to understand the assignments of *exposures* to grades or pools, to replicate

grade and pool assignments and to evaluate the appropriateness of the assignments to a grade or a pool.

[Note: BCD Annex VII Part 4 point 17 (part)]

4.3.47

FCA PRA

R

The criteria referred to in ■ BIPRU 4.3.43 R must also be consistent with the *firm's* internal lending standards and its policies for handling troubled obligors and facilities.

[Note: BCD Annex VII Part 4 point 17 (part)]

4.3.48

FCA PRA

R

A *firm* must take all relevant information into account in assigning obligors and facilities to grades or pools. Information must be current and must enable the *firm* to forecast the future performance of the *exposure*. The less information a *firm* has, the more conservative must be its assignments of *exposures* to obligor and *facility grades* or pools. If a *firm* uses an external rating as a primary factor determining an internal rating assignment, the *firm* must ensure that it considers other relevant information.

[Note: BCD Annex VII Part 4 point 18]

Rating systems: General governance

4.3.49

FCA PRA

G

- (1) This paragraph contains *guidance* on ■ BIPRU 4.3.43 R and more general *guidance* about the governance of *rating systems*.
- (2) In determining the assignment referred to in ■ BIPRU 4.3.43 R, a *firm* should have regard to the sensitivity of the rating to movements in fundamental risk drivers.
- (3) A *firm* should, for any *rating system*, be able to demonstrate that it acts appropriately or has an appropriate policy, as applicable, with respect to:
 - (a) any deficiencies caused by its not being sensitive to movements in fundamental risk drivers or for any other reason;
 - (b) periodic review and action in the light of such review;
 - (c) provision of appropriate internal guidance to staff to ensure consistency in the use of the *rating system*, including the assignment of *exposures* or facilities to pools or grades;
 - (d) dealing with potential weaknesses of the *rating system*;
 - (e) identifying appropriate and inappropriate uses of the *rating system* and acting on that identification;
 - (f) novel or narrow rating approaches; and
 - (g) ensuring the appropriate level of stability over time of the *rating system*.

Rating systems: Overrides

4.3.50

FCA PRA

R

For grade and pool assignments a *firm* must document the situations in which human judgement may override the inputs or outputs of the assignment process and the personnel responsible for approving these overrides. A *firm* must document these overrides and the personnel responsible. A *firm* must analyse the performance of the *exposures* whose assignments have been overridden. This analysis must include assessment of the performance of *exposures* whose rating has been overridden by a particular *person*, accounting for all the responsible personnel.

[Note: BCD Annex VII Part 4 point 25]

Rating systems: Use of models

4.3.51

FCA PRA

R

- (1) This paragraph applies to the use of statistical models and/or other mechanical methods to assign *exposures* to *obligor grades*, *obligor pools*, *facility grades* or *facility pools*.
- (2) A *firm* must be able to demonstrate to the *appropriate regulator* that the model has good predictive power and that capital requirements are not distorted as a result of its use.
- (3) The input variables to the model must form a reasonable and effective basis for the resulting predictions. The model must not have material biases.
- (4) A *firm* must have in place a process for vetting data inputs into the model, which includes an assessment of the accuracy, completeness and appropriateness of the data.
- (5) A *firm* must be able to demonstrate to the *appropriate regulator* that the data used to build the model is representative of the population of the *firm's* actual obligors or *exposures*.
- (6) A *firm* must have a regular cycle of model validation that includes monitoring of model performance and stability, review of model specification and testing of model outputs against outcomes.
- (7) A *firm* must complement the statistical model by human judgement and human oversight to review model-based assignments and to ensure that the models are used appropriately. Review procedures must aim at finding and limiting errors associated with model weaknesses. Human judgements must take into account all relevant information not considered by the model. A *firm* must document how human judgement and model results are to be combined.
- (8) Use of a model obtained from a third-party vendor that claims proprietary technology is not a justification for exemption from documentation or any other of the requirements in ■ BIPRU 4 or a *firm's* IRB permission for rating systems. A *firm* must be able to

satisfy the *appropriate regulator* that all those requirements are satisfied if it uses such a model.

[Note: BCD Annex VII Part 4 points 30 and 35 (part)]

4.3.52

FCA PRA

G

- (1) This paragraph contains guidance on ■ BIPRU 4.3.51 R (7).
- (2) ■ BIPRU 4.3.51 R (7) does not require that each individual assignment of an *exposure* to a pool or grade should be the subject of an open-ended review by reference to factors not covered by the model if:
 - (a) that is not necessary in order to meet the requirements of ■ BIPRU 4 about the ability of the *rating system* to predict and to discriminate (as referred to in ■ BIPRU 4.3.29 R to ■ BIPRU 4.3.30 R (Validation of internal estimates)); and
 - (b) the outputs of the model are not designed to be supplemented by such a review.

4.3.53

FCA PRA

G

- (1) This paragraph contains *guidance* on ■ BIPRU 4.3.51 R for the use of external models.
- (2) ■ BIPRU 4.3.51 R (2) - ■ BIPRU 4.3.51 R (8) also apply to mechanical methods to assign *exposures* or obligors to facility grades or pools and to a combination of models and mechanical methods.
- (3) The standards which a *firm* applies to an external model should not be lower than those for internal models.
- (4) The *appropriate regulator* will not accredit any individual model or vendor. The burden is on a *firm* to satisfy itself that external models are fit for purpose and meet the relevant requirements of the *IRB approach*.
- (5) Notwithstanding that commercial confidentiality may limit the willingness of vendors of external models to disclose all details, a *firm* should ensure that it is able to obtain sufficiently detailed information to be able to satisfy the requirements of the *IRB approach*.
- (6) A *firm* should have a clear understanding of responsibilities for support and maintenance of external models. This should include how new developments will be brought in and what entitlement the *firm* has to receive and/or request specific enhancements. A *firm* should ensure that the requirements of ■ BIPRU 4.3.51 R and other provisions of the *IRB approach* are complied with on an ongoing basis.
- (7) If a *firm* uses an external model it should have regard to the following:
 - (a) the adequacy of the information it has about the population on which the model is built;
 - (b) the comparability of the population referred to in (a) to the *exposures* with respect to which it is using that model;
 - (c) what the drivers of the model are and their relevance to the *exposures* with respect to which it is using the model; and

- (d) how the *firm* satisfies itself that the standards required by the *IRB approach* for an internal model are met by the external model.

Rating systems: Data maintenance

4.3.54

R

FCA PRA

A *firm* must collect and store data on aspects of its internal ratings as required under ■ BIPRU 11 (Disclosure).

[Note: BCD Annex VII Part 4 point 36]

Rating systems: IT systems

4.3.55

G

FCA PRA

A *firm* should ensure that IT systems relevant to the operation of its *rating systems* are sound and robust. A *firm's* IT systems should provide rapid availability of databases and appropriate archiving. Adequate controls should be in place to prevent unauthorised changes to data being made. Contingency processes and plans should be in place to deal with events of system failure. A *firm* should document work-flows and procedures related to data collection and storage.

Definition of default: Main provisions

4.3.56

R

FCA PRA

A *default* must be considered to have occurred with regard to a particular obligor when either or both of the two following events has taken place:

- (1) the *firm* considers that the obligor is unlikely to pay its credit obligations to the *firm*, the *parent undertaking* or any of its *subsidiary undertakings* in full, without recourse by the *firm* to actions such as realising security (if held); and
- (2) the obligor is past due more than 90 days on any material credit obligation to the *firm*, the *parent undertaking* or any of its *subsidiary undertakings*.

[Note: BCD Annex VII Part 4 point 44 (part)]

4.3.57

R

FCA PRA

The following provisions also apply with respect to the definition of *default*:

- (1) for overdrafts, days past due commence once an obligor has breached an advised limit, has been advised a limit smaller than current outstandings, or has drawn credit without authorisation and the underlying amount is material;
- (2) an advised limit means a limit which has been brought to the knowledge of the obligor;
- (3) days past due for credit cards commence on the minimum payment due date;
- (4) in the case of *retail exposures* and *exposures to public sector entities* the number of days past due is as set out in ■ BIPRU 4.4.22 R and ■ BIPRU 4.6.20 R; and

- (5) in all cases for the purposes of the definition of *default*, a credit obligation or, for overdrafts, the underlying amount, is material if, when added to the other *exposures* of the obligor, the total exceeds the amount which the *firm* treats as a material default for its internal risk measurement and management purposes.

[Note: BCD Annex VII Part 4 point 44 (part)]

Definition of default: Materiality

4.3.58

FCA PRA

R

Where a *firm* applies the definition of *default* at facility level in accordance with ■ BIPRU 4.6.21 R, it should define materiality for the purposes of ■ BIPRU 4.3.57 R (5) by reference to the facility amount only, disregarding other *exposures* of the obligor.

4.3.59

FCA PRA

R

A *firm* must have a policy which sets out how it will determine whether a credit obligation or, for overdrafts, the underlying amount, is material for the purposes of the definition of *default* in ■ BIPRU 4.3.56 R (2) and ■ BIPRU 4.3.57 R (5).

Definition of default: Identification of obligor

4.3.60

FCA PRA

G

- (1) This paragraph contains *guidance* on the definition of *default*.
- (2) If:
 - (a) a *firm* ordinarily assigns *exposures* in the *sovereign, institution and corporate IRB exposure class* to a member of a group substantially on the basis of membership of that group and a common group rating; and
 - (b) the *firm* does so in the case of a particular group;
- (3) the *firm* should consider whether members of that group should be treated as a single obligor for the purpose of the definition of *default*.
- (4) The *appropriate regulator* would not expect a *firm* to treat an obligor as part of a single obligor under (2) if the *firm* rates its *exposures* on a stand alone basis or if its rating is notched. A rating is notched if it takes into account individual risk factors or otherwise reflects risk factors that are not applied on a common group basis.
- (5) Accordingly if a group has two members who are separately rated the *default* of one does not necessarily imply the *default* of the other.

Definition of default: Days past due

4.3.61

FCA PRA

G

- (1) This paragraph contains *guidance* on the meaning of days past due for the purposes of the definition of *default*.
- (2) If an amount is overdue by the relevant number of days past due because of administrative oversight on the part of the obligor or the *firm*, a *firm* with sufficient information may, retrospectively if necessary, treat that as not involving a *default* if:

- (a) that failure is not associated with any increase in the risk referred to in ■ BIPRU 4.3.56 R (1); and
 - (b) treating it as not being in *default* is consistent with the way that the *firm* treated the failure in its relationship with the obligor.
- (3) If a *firm* takes advantage of this provision it should have a policy about the circumstances in which it can apply the treatment in (2). That policy should be documented and consistently applied.

4.3.62

FCA PRA

G

Days past due is only one part of the definition of *default* and should be treated as a back-stop. A *firm* should not rely solely on the number of days past due set by ■ BIPRU 4 but should also consider all other indicators of unlikelihood to pay when assessing whether a *default* has occurred.

4

Definition of default: Unlikelihood to pay

4.3.63

FCA PRA

R

- (1) Elements to be taken as indications of unlikelihood to pay must include the items set out in this *rule*.
- (2) The *firm* putting the credit obligation on non-accrued status must be taken as an indication of unlikelihood to pay.
- (3) The *firm* making a value adjustment resulting from a significant perceived decline in credit quality subsequent to the *firm* taking on the *exposure* must be taken as an indication of unlikelihood to pay.
- (4) The *firm* selling the credit obligation at a material credit-related economic loss must be taken as an indication of unlikelihood to pay.
- (5) The *firm* consenting to a distressed restructuring of the credit obligation must be taken as an indication of unlikelihood to pay where this is likely to result in a diminished financial obligation caused by the material forgiveness, or postponement, of principal, interest or (where relevant) fees. This includes in the case of *equity exposures* assessed under a *PD/LGD approach*, distressed restructuring of the equity itself.
- (6) The *firm* having filed for the obligor's bankruptcy or a similar order in respect of an obligor's credit obligation to the *firm*, the *parent undertaking* or any of its *subsidiary undertakings* must be taken as an indication of unlikelihood to pay.
- (7) The obligor seeking or having been placed in bankruptcy or similar protection where this would avoid or delay repayment of a credit obligation to the *firm*, the *parent undertaking* or any of its *subsidiary undertakings* must be taken as an indication of unlikelihood to pay.

[Note: BCD Annex VII Part 4 point 45]

4.3.64

FCA PRA

G

A *firm* may use the amount overdue as an additional indication of unlikelihood to pay. If a *firm* uses this approach, the days past due element of the definition of *default* continues to apply, including the provisions relating to the fixed number of days past due referred to in ■ BIPRU 4.3.57 R (4). A *firm* might make the use of a definition of *default* that takes into account the amount overdue consistent with the days past due element of the definition by setting the amount overdue at such a level that, taking into account:

- (1) the order in which payments are applied against overdue payments; and
- (2) the number of payment dates, the time between them, the amount of the overdue payments that results in a *default* under the definition used by the *firm* and other relevant factors;

it is not possible for any payment to be past due by a number of days exceeding the maximum amount specified in BIPRU for the purposes of the definition of *default* without there being a *default* under the part of the definition of *default* based on the amount overdue.

4.3.65

FCA PRA

G

In the case of a *retail exposure*, a value adjustment resulting from significant perceived decline in credit quality falling within ■ BIPRU 4.3.63 R (3) need not necessarily be taken as an indication of unlikelihood to pay if a *firm* employs formulaic portfolio provisioning based on a number of days overdue for its *retail exposures*. However, if such an *exposure* reaches the compulsory days past due indicator for the purposes of the definition of *default* it should automatically be deemed to be in *default*, regardless of the provisioning situation.

4.3.66

FCA PRA

G

An obligation should be considered a distressed restructuring under ■ BIPRU 4.3.63 R (5) if an independent third party, with expertise in the relevant area, would not be prepared to provide financing on substantially the same terms and conditions.

4.3.67

FCA PRA

G

- (1) The realisation or forfeiture of collateral may be taken as an indication of unlikelihood to pay for the purposes of the definition of *default*.
- (2) However, the realisation or forfeiture of collateral may not indicate unlikelihood to pay:
 - (a) in the case of an *exposure* in a market (such as one that involves *retail exposures* involving margin lending) in which it is established practice for collateral to be sold if its value falls below a certain percentage of the *exposure* and the obligor does not restore the margin (but this exception does not apply if the value of the collateral has fallen below the amount outstanding); or
 - (b) if the *firm* is able to demonstrate that for some other reason the realisation or forfeiture of collateral is not a meaningful indication of unlikelihood to pay.

4.3.68

FCA PRA

G

- (1) If an obligor approach is being taken with respect to *retail exposures* (that is, the application of the definition of *default* at an obligor level rather than

at a facility level as set out in ■ BIPRU 4.6.21 R,) a *firm* should ensure that the *PD* associated with unsecured *exposures* is not understated as a result of the presence of any collateralised *exposures*. A *firm* should be able to explain to the *appropriate regulator*, if asked, how it has ensured that its estimate of *PD* is appropriate for both secured and unsecured *exposures* covered by an obligor rating approach.

- (2) In the view of the *appropriate regulator*, *firms* typically find that the *PD* of a residential mortgage is lower than the *PD* of an unsecured loan to the same borrower.

4.3.69

FCA PRA

G

A *firm* may, but without prejudice to ■ BIPRU 4.4.22 R and ■ BIPRU 4.6.20 R (Fixed numbers of days past due), use additional, or stricter, indicators of unlikeliness to pay if it uses these indicators for internal purposes in accordance with ■ BIPRU 4.2.2 R (2) (Use tests) and if the disclosures under ■ BIPRU 11 (Disclosure) are on this basis.

Risk quantification: Definition of default: Other provisions

4.3.70

FCA PRA

R

A *firm* must (if it uses external data that is not itself consistent with the definition of *default*) be able to demonstrate to the *appropriate regulator* that appropriate adjustments have been made that achieve broad equivalence with the definition of *default*.

[Note: BCD Annex VII Part 4 point 46]

4.3.71

FCA PRA

R

If a *firm* considers that a previously *defaulted exposure* is such that no trigger of *default* continues to apply, the *firm* must rate the obligor or facility as it would for a non-*defaulted exposure*. Should the definition of *default* subsequently be triggered, another *default* must be deemed to have occurred.

[Note: BCD Annex VII Part 4 point 47]

4.3.72

FCA PRA

G

A *firm* should have a clear and documented policy for determining whether an *exposure* that has been in *default* should subsequently be returned to performing status.

Risk quantification: Overall requirements for estimation: General

4.3.73

FCA PRA

R

■ BIPRU 4.3.74 R to ■ BIPRU 4.3.131 R apply to a *firm's* own estimates of risk parameters used in the *IRB approach*.

[Note: BCD Annex VII Part 4 point 43]

4.3.74

FCA PRA

R

A *firm's* own estimates of the risk parameters *PD*, *LGD*, *conversion factor* and *EL* must incorporate all relevant data, information and methods. The estimates must be derived using both historical experience and empirical evidence, and must not be based purely on judgemental considerations. The estimates must be plausible and intuitive and must be based on the material drivers of the respective risk parameters. The less data a *firm* has, the more conservative it must be in its estimation.

[Note: BCD Annex VII Part 4 point 49]

4.3.75

FCA PRA

G

- (1) This paragraph provides guidance on ■ BIPRU 4.3.73 R.
- (2) Relevant data and information under ■ BIPRU 4.3.73 R includes external data.
- (3) Where internal *default* and *loss* experience is scarce, a *firm* should consider using material relevant external information. When using external information such as industry averages when determining *LGD* or *conversion factors*, a *firm* should consider whether this data is appropriate to its own experience and whether adjustments are necessary.

4.3.76

FCA PRA

R

- (1) In calculating estimates of *PD*, *LGD* and *conversion factors* a *firm* must adjust the averages of historical experience referred to in the *historical averages rules* in order to ensure that those estimates are accurate estimates of the *default* rate, *loss* rate or *conversion factor* over the long-run.
- (2) The *historical average rules* means the requirements in ■ BIPRU 4 relating to the calculation of *PD*, *LGD* and *conversion factors* using historical averages (and in particular ■ BIPRU 4.4.24 R, ■ BIPRU 4.4.30 R, ■ BIPRU 4.8.7 R, ■ BIPRU 4.8.8 R, ■ BIPRU 4.6.24 R, ■ BIPRU 4.6.27 R, ■ BIPRU 4.3.99 R and ■ BIPRU 4.3.125 R).

4.3.77

FCA PRA

G

Where a *firm* is able to demonstrate that the effect is immaterial in accordance with ■ BIPRU 4.1.25 R (Compliance), it may estimate average *LGDs* and *conversion factors* under the *historical average rules* in a way that does not strictly comply with ■ BIPRU 4.3.94 R (Default weighted average), provided the final estimates of *LGD* and *conversion factors* following the adjustments to averages of historical experience are made on the basis of *default* weighted averages for the *facility grade* or pool in question.

4.3.78

FCA PRA

G

A *firm* may carry out the adjustments under ■ BIPRU 4.3.76 R (Adjustments to averages of historical experience) by adjusting the data from which estimates are made rather than by adjusting the estimates themselves if it can demonstrate that capital requirements are not underestimated as a result.

4.3.79

FCA PRA

G

While the qualitative requirements in ■ BIPRU 4 are important for all portfolios, they are of even greater importance in those cases where a *firm* lacks sufficient historical data to calibrate or validate its estimates of *PD*, *LGD* or *conversion factors* on the basis of proven statistical significance, sometimes referred to as low default portfolios.

4.3.80

FCA PRA

R

- (1) A *firm* must collect data on what it considers to be the main drivers of the risk parameters *PD*, *LGD*, *conversion factor* and *EL* for each group of obligors or facilities.
- (2) A *firm* must document its identification of the main drivers of risk parameters.

(3) A *firm* must be able to demonstrate that its process of identification is reasonable and appropriate.

4.3.81

FCA PRA

R

In its processes for identifying the main drivers of risk parameters, a *firm* must set out its reasons for concluding that the data sources chosen provide in themselves sufficient discriminative power and accuracy and why additional potential data sources do not provide relevant and reliable information that would be expected materially to improve the discriminative power and accuracy of its estimates of the risk parameter in question. This does not require an intensive analysis of all factors.

4.3.82

FCA PRA

G

If a *firm* uses a rating model to assign exposures to the borrower or facility grades, it may reflect the data on main drivers of risk parameters by its inclusion in the model as a risk driver or as part of a subsequent process that adjusts the output of that model to calculate the risk parameters *PD*, *LGD*, *conversion factor* and *EL*.

4.3.83

FCA PRA

R

A *firm* must be able to provide a breakdown of its loss experience in terms of *default* frequency, *LGD*, *conversion factor*, or *loss* where *EL* estimates are used, by the factors it sees as the drivers of the respective risk parameters. A *firm* must be able to demonstrate to the *appropriate regulator* that its estimates are representative of long-run experience.

[Note: BCD Annex VII Part 4 point 50]

4.3.84

FCA PRA

R

Any changes in lending practice or the process for pursuing recoveries over the observation periods referred to in ■ BIPRU 4.4.31 R (Observation period for sovereigns, institutions and corporates for PDs), ■ BIPRU 4.6.28 R (Observation period for retail exposures for PDs), ■ BIPRU 4.4.54 R (Observation period for sovereigns, institutions and corporates for LGDs), ■ BIPRU 4.6.33 R (Observation period for retail exposures for LGDs), ■ BIPRU 4.4.55 R (Observation period for sovereigns, institutions and corporates for conversion factors) and ■ BIPRU 4.6.38 R (Observation period for retail exposures for conversion factors) must be taken into account. A *firm's* estimates must reflect the implications of technical advances and new data and other information, as it becomes available. A *firm* must review its estimates when new information comes to light but at least on an annual basis.

[Note: BCD Annex VII Part 4 point 51]

4.3.85

FCA PRA

R

The population of *exposures* represented in the data used for estimation, the lending standards used when the data was generated and other relevant characteristics must be comparable with those of a *firm's* *exposures* and standards. A *firm* must also be able to demonstrate to the *appropriate regulator* that the economic or market conditions that underlie the data are relevant to current and foreseeable conditions. The number of *exposures* in the sample and the data period used for quantification must be sufficient to provide a *firm* with confidence in the accuracy and robustness of its estimates.

[Note: BCD Annex VII Part 4 point 52]

4.3.86

FCA PRA

G

It may be reasonable for a *firm* to treat foreseeable in ■ BIPRU 4.3.85 R as referring to the most distant date to which it carries out detailed capital planning.

4.3.87

FCA PRA

G

A *firm* should be able to demonstrate to the *appropriate regulator*:

- (1) how, with respect to each *rating system*, both assignment of ratings and estimates of *PD*, *LGD* and *conversion factors* are affected by:
 - (a) movements in the economic cycle; and
 - (b) other cyclical effects which are material to levels of *default*, *loss* or the amount of *exposures* at *default* for the *exposures* covered by the *rating system*; and
- (2) the level of conservatism inherent in its ratings, as provided for by *BIPRU*.

4.3.88

FCA PRA

R

A *firm* must add to its estimates a margin of conservatism that is related to the expected range of estimation errors. Where methods and data are less satisfactory and the expected range of errors is larger, the margin of conservatism must be larger.

[Note: BCD Annex VII Part 4 point 54]

4.3.89

FCA PRA

G

Estimation of *PD* through the use of a technique set out in *BIPRU* does not remove the need to make conservative adjustments, where necessary, related to the expected range of estimation errors so that capital requirements produced by the relevant model or other *rating system* are not understated.

4.3.90

FCA PRA

R

If a *firm* uses different estimates for the calculation of *risk weights* and internal purposes it must be documented. The *firm* must be able to demonstrate to the *appropriate regulator* the reasonableness of such estimates.

[Note: BCD Annex VII Part 4 point 55]

4.3.91

FCA PRA

G

If a *firm* can demonstrate to the *appropriate regulator* that for data that has been collected prior to 31 December 2006, appropriate adjustments have been made to achieve broad equivalence with the definitions of *default* or *loss*, the *appropriate regulator* may in the *IRB permission* allow the *firm* some flexibility in the application of the required standards for data.

[Note: BCD Annex VII Part 4 point 56]

4.3.92

FCA PRA

R

Risk quantification: Overall requirements for estimation: Pooled data

If a *firm* uses data that is pooled across *institutions* it must be able to demonstrate to the *appropriate regulator* that:

- (1) the *rating systems* and criteria of other firms in the pool are similar to its own;
- (2) the pool is representative of the portfolio for which the pooled data is used; and
- (3) the pooled data is used consistently over time by the *firm* for its permanent estimates.

[Note: BCD Annex VII Part 4 point 57]

4.3.93

FCA PRA

G

■ BIPRU 4.3.92 R (1) is intended to ensure that data entering a pool is consistent and does not contain distortions as a result of different contributors' practices. It is not intended to constrain the use of pooled data by one *firm* that is contributed by a second *firm* where the differences do not affect the data being contributed.

4.3.94

FCA PRA

R

If a *firm* uses data that is pooled across *institutions* it remains responsible for the integrity of its *rating systems*. If a *firm* uses such data it must be able to demonstrate to the *appropriate regulator* that it has sufficient in-house understanding of its *rating systems*, including effective ability to monitor and audit the rating process.

[Note: BCD Annex VII Part 4 point 58]

Risk quantification: Overall requirements for estimation: Requirements specific to PD estimates

4.3.95

FCA PRA

R

- (1) If:
 - (a) a *firm's* internal experience of *exposures* of a type covered by a model or other *rating system* is 20 *defaults* or fewer; and
 - (b) in the *firm's* view, reliable estimates of *PD* cannot be derived from external sources of *default* data, including the use of market price related data, for all the *exposures* covered by the *rating system*;

the *firm* must estimate *PD* for *exposures* covered by that *rating system* in accordance with this *rule*.
- (2) A *firm* must use a statistical technique to derive the distribution of *defaults* implied by the *firm's* experience, estimating *PDs* (the "statistical *PD*") from the upper bound of a confidence interval set by the *firm* in order to produce conservative estimates of *PDs* in accordance with ■ BIPRU 4.3.88 R.

- (3) The techniques chosen for the purposes of (2) must take account, as a minimum, of the following modelling issues:
- (a) the number of *defaults* and number of obligor years in the sample;
 - (b) the number of years from which the sample was drawn;
 - (c) the interdependence between *default* events for individual obligors;
 - (d) the interdependence between *default* rates for different years; and
 - (e) the choice of the statistical estimators and the associated distributions and confidence intervals.
- (4) The *firm* must further adjust the statistical PD to the extent necessary to take account of the following:
- (a) any likely differences between the observed *default* rates over the period covered by the *firm's default* experience and the long-run PD for each grade in accordance with ■ BIPRU 4.4.24 R and ■ BIPRU 4.6.24 R; and
 - (b) any other information that indicates (taking into account the robustness and cogency of that information) that the statistical PD is likely to be an inaccurate estimate of PD.
- (5) This *rule* is in addition to the other requirements in BIPRU about the calculation of PD.
- (6) When a *firm* calculates whether it has 20 *defaults* or fewer under the calculation in (1)(a), it must only take into account *defaults* that occurred during periods that are relevant to the validation under ■ BIPRU 4 of the model or other *rating system* in question.

4.3.96

FCA PRA

G

A *firm* may if appropriate also choose to use the approach in ■ BIPRU 4.3.91 G if the internal experience on *exposures* covered by a *rating system* is greater than 20 *defaults*.

4.3.97

FCA PRA

G

If a *firm* excludes *defaulted exposures* that have been cured (as referred to in ■ BIPRU 4.3.71 R) or restructured (as referred to in ■ BIPRU 4.3.63 R (5)) from estimates of LGD in accordance with ■ BIPRU 4.3.110 G, it may also exclude cures from estimates of PD for these *exposures*.

Risk quantification: Overall requirements for estimation: Requirements specific to own-LGD estimates

4.3.98

FCA PRA

R

■ BIPRU 4.3.98 R to ■ BIPRU 4.3.123 R set out requirements specific to own-LGD estimates.

4.3.99

FCA PRA

R

A *firm* must estimate *LGDs* by *facility grade* or pool on the basis of the average realised *LGDs* by *facility grade* or pool using all observed *defaults* within the data sources (*default weighted average*).

[Note: BCD Annex VII Part 4 point 73]

4.3.100

FCA PRA

R

A *firm* must calculate the *default weighted average* on the basis of the number of *defaults* included in the calculations made under the *historical average rules* so far as they relate to the calculation of *PDs* and must not be weighted by the size of *exposures*.

4.3.101

FCA PRA

R

- (1) A *firm's* estimates of *LGDs* must take into account:
 - (a) data in respect of relevant incomplete workouts; and
 - (b) the possibility that the proportion of *defaulted exposures* which are cured (as referred to in ■ BIPRU 4.3.71 R) or restructured (as referred to in ■ BIPRU 4.3.63 R (5)) or the length of the period over which a *firm* makes recoveries under a *defaulted exposure* may be different from the *firm's* observed historic experience.
- (2) An incomplete workout as referred to in (1)(a) means a *defaulted exposure* included in the data set on which the *firm's LGD* estimates are based, but for which the recovery process is still in progress, with the result that the final realised *losses* in respect of that *exposure* are not yet certain.

4.3.102

FCA PRA

G

The changes referred to in ■ BIPRU 4.3.101 R (1)(b) may be caused by external factors, such as the economic environment, as well as factors specific to the obligor, the transaction or the policies of the *firm*.

4.3.103

FCA PRA

R

A *firm* must use *LGD* estimates that are appropriate for an economic downturn if those are more conservative than the long-run average. To the extent a *rating system* is expected to deliver constant realised *LGDs* by grade or pool over time, a *firm* must make adjustments to its estimates of risk parameters by grade or pool to limit the capital impact of an economic downturn.

[Note: BCD Annex VII Part 4 point 74]

4.3.104

FCA PRA

R

- (1) A *firm* must have a rigorous and well documented process for:
 - (a) assessing the effects, if any, of economic downturn conditions on recovery rates; and
 - (b) producing *LGD* estimates consistent with downturn conditions as referred to in ■ BIPRU 4.3.103 R.
- (2) That process must include the following, which may be included in an integrated manner:

- (a) identification of appropriate downturn conditions for each *IRB exposure class* within each jurisdiction;
- (b) identification of adverse dependencies, if any, between *default* rates and recovery rates; and
- (c) incorporation of adverse dependencies, if identified, between *default* rates and recovery rates in the *firm's* estimates of *LGD* in a manner that meets the requirements in
 - BIPRU 4.3.103 R relating to an economic downturn.

4.3.105

FCA PRA

G

A *firm* may derive the *LGD* in accordance with ■ BIPRU 4.3.104 R (2)(c) either by directly assigning to the *facility grade* or pool an estimate of *LGD* appropriate for downturn conditions, or alternatively by estimating a *default* weighted average *LGD* in accordance with ■ BIPRU 4.3.99 R and ■ BIPRU 4.3.76 R and converting it into an *LGD* appropriate for downturn conditions by the use of a formula. It should be able to demonstrate that that formula produces well-founded estimates of *LGDs* consistent with downturn conditions for the *exposures* in question.

4.3.106

FCA PRA

G

A *firm* may combine *IRB exposure classes*, jurisdictions or both for the purpose of ■ BIPRU 4.3.104 R (2)(a) if it can demonstrate that the downturn conditions to which the portfolios are subject will be similar.

4.3.107

FCA PRA

G

The adverse dependencies referred to in ■ BIPRU 4.3.104 R (2)(b) will not always exist. However, if a *firm* uses *LGDs* that do not allow for such adverse dependencies, it should be able to justify its decision.

4.3.108

FCA PRA

G

Data relating to economic downturn conditions is likely to be scarce. Accordingly, a *firm* should use internal data, external data or a combination of data sources in order to produce appropriate downturn *LGD* estimates in accordance with ■ BIPRU 4.3.103 R.

4.3.109

FCA PRA

R

A *firm* must retain sufficient data on both *LGDs* calculated on a economic downturn basis and calculated on a long-run average basis (as referred to in ■ BIPRU 4.3.103 R) to be able to demonstrate to the *appropriate regulator* (if asked) that its estimates based on an economic downturn are no less conservative than the long-run average as referred to in that *rule*.

4.3.110

FCA PRA

G

Where a *firm* is able to demonstrate that the effect is immaterial in accordance with ■ BIPRU 4.1.25 R (Compliance), it may exclude *defaulted exposures* that have been cured (as referred to in ■ BIPRU 4.3.67 G (1)) or restructured (as referred to in ■ BIPRU 4.3.63 R (5)) from the data about *default* and *loss* experience on which *LGDs* are calculated provided it can demonstrate that its calculation of capital requirements (including capital requirements resulting from the application of capital floors under the transitional *rules* and *guidance* in BIPRU) are not reduced as a result of this approximation.

4.3.111

FCA PRA

R

Irrespective of whether calculated on an economic downturn or long-run average basis, each *LGD* estimate must be at least zero.

4.3.112

FCA PRA

G

In order to support an *LG*D estimate which is very low or zero, a *firm* should be able to demonstrate that the estimate adequately reflects the expected experience on a *default* weighted average basis or in a downturn as appropriate, taking into account the costs and discount rate associated with realisations and the operation of ■ BIPRU 4.3.118 R.

4.3.113

FCA PRA

R

The methods that a *firm* uses for discounting cash flows for the purposes of estimating *LG*Ds must take account of the uncertainties associated with the receipt of recoveries with respect to a *defaulted exposure*. If a *firm* intends to use a discount rate that does not take full account of the uncertainty in recoveries, it must be able to explain by what other process it has taken into account that uncertainty for the purposes of calculating *LG*Ds.

4.3.114

FCA PRA

G

The uncertainty referred to in ■ BIPRU 4.3.113 R can be addressed by adjusting cash flows to certainty-equivalents or by using a discount rate that embodies an appropriate risk premium; or by a combination of the two.

4.3.115

FCA PRA

G

A *firm* may exclude from its calculation of *loss* indirect costs that it incurs for the purpose of making recoveries with respect to a *defaulted exposure* if it would also have incurred those costs if there had not been a *default*.

4.3.116

FCA PRA

R

A *firm* must consider the extent of any dependence between the risk of the obligor with that of the collateral or collateral provider. Cases where there is a significant degree of dependence must be addressed in a conservative manner.

[Note: BCD Annex VII Part 4 point 75]

4.3.117

FCA PRA

R

Currency mismatches between the underlying obligation and the collateral must be treated conservatively in the *firm's* assessment of *LG*D.

[Note: BCD Annex VII Part 4 point 76]

4.3.118

FCA PRA

R

To the extent that *LG*D estimates take into account the existence of collateral, these estimates must not solely be based on the collateral's estimated market value. *LG*D estimates must take into account the effect of the potential inability of the *firm* expeditiously to gain control of its collateral and liquidate it.

[Note: BCD Annex VII Part 4 point 77]

4.3.119

FCA PRA

G

- (1) A *firm* may comply with ■ BIPRU 4.3.118 R by reducing the amount of the collateral taken into account for the purposes of calculating *LG*D (applying a haircut to the collateral), basing that reduction on validated realisation experience and using conservatism to reflect the uncertainties.
- (2) If collateral is used to reduce the *LG*D, a *firm* should be able to demonstrate how the risk in ■ BIPRU 4.3.118 R has been accounted for. To the extent that it

is adequately accounted for in that way it need not be reflected again as part of the residual risk in relation to collateral under the *overall Pillar 2 rule*.

4.3.120

FCA PRA

R

To the extent that *LGD* estimates take into account the existence of collateral, a *firm* must establish internal requirements for collateral management, legal certainty and risk management that are generally consistent with those set out in ■ BIPRU 5 (Credit risk mitigation) as modified by ■ BIPRU 4.10.

[Note: BCD Annex VII Part 4 point 78]

4.3.121

FCA PRA

R

To the extent that a *firm* recognises collateral for determining the exposure value for *counterparty credit risk* according to the *CCR standardised method* or the *CCR internal model method*, any amount expected to be recovered from the collateral must not be taken into account in the *LGD* estimates.

[Note: BCD Annex VII Part 4 point 79]

4.3.122

FCA PRA

R

For the specific case of *exposures* already in *default*, a *firm* must use the sum of its best estimate of *expected loss* for each *exposure* given current economic circumstances and *exposure* status and the possibility of additional unexpected *losses* during the recovery period.

[Note: BCD Annex VII Part 4 point 80]

4.3.123

FCA PRA

R

To the extent that unpaid late fees have been capitalised in a *firm's* income statement, they must be added to the *firm's* measure of *exposure* and *loss*.

[Note: BCD Annex VII Part 4 point 81]

Risk quantification: Overall requirements for estimation: Requirements specific to own-conversion factor estimates

4.3.124

FCA PRA

R

■ BIPRU 4.3.125 R - ■ BIPRU 4.3.131 R set out requirements specific to *own-conversion factor* estimates.

4.3.125

FCA PRA

R

A *firm* must estimate *conversion factors* by *facility grade* or pool on the basis of the average expected *conversion factors* by *facility grade* or pool using all observed *defaults* within the data sources (*default weighted average*).

[Note: BCD Annex VII Part 4 point 87]

4.3.126

FCA PRA

G

- (1) A *firm* using own estimates of *conversion factors* should take into account all facility types that may result in an *exposure* when an obligor *defaults*, including uncommitted facilities.

- (2) A *firm* should treat a facility as an *exposure* from the earliest date at which a customer is able to make drawings under it.
- (3) To the extent that a *firm* makes available multiple facilities, it should be able to demonstrate:
 - (a) how it deals with the fact that *exposures* on one may become *exposures* under another on which the *losses* are ultimately incurred; and
 - (b) the impact of its approach on its capital requirements.

4.3.127

FCA PRA

R

A *firm* must use *conversion factor* estimates that are appropriate for an economic downturn if those are more conservative than the long-run average. To the extent a *rating system* is expected to deliver realised *conversion factors* at a constant level by grade or pool over time, a *firm* must make adjustments to its estimates of risk parameters by grade or pool to limit the capital impact of an economic downturn.

[Note: BCD Annex VII Part 4 point 88]

4.3.128

FCA PRA

R

A *firm's* estimates of *conversion factors* must reflect the possibility of additional drawings by the obligor up to and after the time a *default* event is triggered. The *conversion factor* estimate must incorporate a larger margin of conservatism where a stronger positive correlation can reasonably be expected between the *default* frequency and the magnitude of *conversion factor*.

[Note: BCD Annex VII Part 4 point 89]

4.3.129

FCA PRA

R

In arriving at estimates of *conversion factors* a *firm* must consider its specific policies and strategies adopted in respect of account monitoring and payment processing. A *firm* must also consider its ability and willingness to prevent further drawings in circumstances short of payment *default*, such as covenant violations or other technical *default* events.

[Note: BCD Annex VII Part 4 point 90]

4.3.130

FCA PRA

R

A *firm* must have adequate systems and procedures in place to monitor facility amounts, current outstandings against committed lines and changes in outstandings per obligor and per grade. A *firm* must be able to monitor outstanding balances on a daily basis.

[Note: BCD Annex VII Part 4 point 91]

4.3.131

FCA PRA

R

If a *firm* uses different estimates of *conversion factors* for the calculation of *risk weighted exposure amounts* and internal purposes it must be documented. The *firm* must be able to demonstrate their reasonableness to the *appropriate regulator*.

[Note: BCD Annex VII Part 4 point 92]

4.3.132

FCA PRA

G

Risk quantification: Overall requirements for estimation: Comparability

- (1) This paragraph contains *guidance* about the interpretation of the requirements relating to comparability in ■ BIPRU 4.3.85 R. It is also relevant to the requirement for representative data in ■ BIPRU 4.3.51 R (5), to the references to comparability in the additional *guidance* in ■ BIPRU 4.3.53 G (7)(b) and to the requirements for similarity in ■ BIPRU 4.3.92 R.
- (2) In general, comparability should be based on analyses of the population of *exposures* represented in the data, the lending standards used when the data was generated (where relevant) and other relevant characteristics in relation to the corresponding properties of the *firm's* own portfolio. Other relevant characteristics could include the distribution of the obligors across industries, the size distribution of the *exposures* and similarity with respect to the geographic or demographic distribution of the *exposures*.

4.4 The IRB approach: Exposures to corporates, institutions and sovereigns

Application

4.4.1

R

FCA PRA

- (1) This section applies with respect to the *sovereign, institution and corporate IRB exposure class*.
- (2) The *sovereign, institution and corporate IRB exposure class* includes *specialised lending exposures*.
- (3) Both ■ BIPRU 4.4 and ■ BIPRU 4.5 (Specialised lending exposures) apply to *specialised lending exposures*. A firm may calculate *risk weighted exposure amounts* for a *specialised lending exposure* either:
 - (a) (if it is able to do so) in accordance with ■ BIPRU 4.4; or
 - (b) in accordance with ■ BIPRU 4.4 as modified by ■ BIPRU 4.5.

Definition

4.4.2

R

FCA PRA

The following *exposures* must be treated as *exposures* to central governments and *central banks*:

- (1) *exposures* to regional governments, local authorities or *public sector entities* which are treated as *exposures* to central governments under the *standardised approach*; and
- (2) *exposures* to *multilateral development banks* and international organisations which attract a *risk weight* of 0% under the *standardised approach*.

[Note: BCD Article 86(2)]

4.4.3

R

FCA PRA

The following *exposures* must be treated as *exposures* to *institutions*:

- (1) *exposures* to regional governments and local authorities which are not treated as *exposures* to central governments under the *standardised approach*;

- (2) *exposures to public sector entities* which are treated as *exposures to institutions* under the *standardised approach*;
- (3) *exposures to multilateral development banks* which do not attract a 0% *risk weight* under the *standardised approach*; and
- (4) without prejudice to ■ BIPRU 13.3.13 R and ■ BIPRU 13.8.7 R (*Exposures to a central counterparty*) *exposures to recognised third country investment firms* and *exposures to recognised clearing houses* and *designated investment exchanges*.

[Note: BCD Article 86(3) and CAD Article 40]

4.4.4

FCA PRA

R

Any credit obligation not assigned to the *IRB exposure classes* referred to in ■ BIPRU 4.3.2 R (1) (Sovereigns), ■ BIPRU 4.3.2 R (2) (Institutions) and ■ BIPRU 4.3.2 R (4) - ■ BIPRU 4.3.2 R (6) (Retail, equity and securitisations) must be assigned to the *corporate exposure class*.

[Note: BCD Article 86(7)]

Rating system: Structure of rating system

4.4.5

FCA PRA

R

■ BIPRU 4.4.6 R - ■ BIPRU 4.4.21 R apply in addition to ■ BIPRU 4.3.25 R - ■ BIPRU 4.3.28 R (Rating systems).

4.4.6

FCA PRA

R

A *rating system* must take into account obligor and transaction risk characteristics.

[Note: BCD Annex VII Part 4 point 5]

4.4.7

FCA PRA

R

A *rating system* must have an obligor rating scale which reflects exclusively quantification of the risk of obligor *default*. The obligor rating scale must have a minimum of seven grades for non-*defaulted* obligors and one for *defaulted* obligors.

[Note: BCD Annex VII Part 4 point 6]

4.4.8

FCA PRA

R

An *obligor grade* means for the purpose of ■ BIPRU 4 as it applies to the *sovereign, institution and corporate IRB exposure class* a risk category within a *rating system's* obligor rating scale, to which obligors are assigned on the basis of a specified and distinct set of rating criteria, from which estimates of *PD* are derived. A *firm* must document both the relationship between *obligor grades* in terms of the level of *default risk* each grade implies and the criteria used to distinguish that level of *default risk*.

[Note: BCD Annex VII Part 4 point 7]

4.4.9

FCA PRA

R

A *firm* with portfolios concentrated in a particular market segment and range of *default risk* must have enough *obligor grades* within that range

to avoid undue concentrations of obligors in a particular grade. Significant concentrations within a single grade must be supported by convincing empirical evidence that the *obligor grade* covers a reasonably narrow *PD* band and that the *default* risk posed by all obligors in the grade falls within that band.

[Note: *BCD* Annex VII Part 4 point 8]

Rating system: Assignment to grades or pools

4.4.10

G

FCA PRA

Material on assignment to grades or pools can be found in ■ BIPRU 4.3.43 R - ■ BIPRU 4.3.48 R.

Rating system: Assignment of exposures

4.4.11

R

FCA PRA

Each obligor must be assigned to an *obligor grade* as part of the credit approval process.

[Note: *BCD* Annex VII Part 4 point 19]

4.4.12

R

FCA PRA

Each separate legal entity to which a *firm* is exposed must be separately rated. A *firm* must be able to demonstrate to the *appropriate regulator* that it has acceptable policies regarding the treatment of individual obligor clients and *groups of connected clients*.

[Note: *BCD* Annex VII Part 4 point 22]

4.4.13

R

FCA PRA

Separate *exposures* to the same obligor must be assigned to the same *obligor grade*, irrespective of any differences in the nature of each specific transaction. Exceptions, where separate *exposures* are allowed to result in multiple grades for the same obligor are:

- (1) country transfer risk, this being dependent on whether the *exposures* are denominated in local or foreign currency;
- (2) where the treatment of associated guarantees to an *exposure* may be reflected in an adjusted assignment to an *obligor grade*; and
- (3) where consumer protection, bank secrecy or other legislation prohibit the exchange of client data.

[Note: *BCD* Annex VII Part 4 point 23]

Rating system: Overrides

4.4.14

G

FCA PRA

Material on overrides can be found in ■ BIPRU 4.3.50 R.

Rating system: Integrity of assignment process

4.4.15

FCA PRA

R

Assignments and periodic reviews of assignments must be completed or approved by an independent party that does not directly benefit from decisions to extend the credit.

[Note: BCD Annex VII Part 4 point 26]

4.4.16

FCA PRA

R

A *firm* must update assignments at least annually. High risk obligors and problem *exposures* must be subject to more frequent review. A *firm* must undertake a new assignment if material information on the obligor or *exposure* becomes available.

[Note: BCD Annex VII Part 4 point 27]

4.4.17

FCA PRA

G

Although it will not usually be the case that facility ratings and *conversion factors* will have to be updated more frequently than annually, *LGDs* and *exposure* values are subject to more frequent recalculation due to their connection to drawn balances, which can vary on a daily basis.

4.4.18

FCA PRA

R

A *firm* must have an effective process to obtain and update relevant information on obligor characteristics that affect *PDs*, and on transaction characteristics that affect *LGDs* and *conversion factors*.

[Note: BCD Annex VII Part 4 point 28]

Rating system: Use of models

4.4.19

FCA PRA

G

Material on the use of models can be found in ■ BIPRU 4.3.51 R - ■ BIPRU 4.3.53 G.

Rating system: Documentation of rating systems

4.4.20

FCA PRA

G

Material on the documentation of rating systems can be found in ■ BIPRU 4.3.19 R - ■ BIPRU 4.3.24 R.

Rating system: Data maintenance

4.4.21

FCA PRA

R

In addition to complying with the material in ■ BIPRU 4.3.54 R (Data maintenance) a *firm* must collect and store:

- (1) complete rating histories on obligors and recognised guarantors;
- (2) the dates the ratings were assigned;
- (3) the key data and methodology used to derive the rating;
- (4) the person responsible for the rating assignment;
- (5) the identity of obligors and *exposures* that *defaulted*;
- (6) the date and circumstances of such *defaults*;

- (7) data on the *PDs* and realised *default* rates associated with rating grades and ratings migration; and
- (8) (in the case of a *firm* not using the *advanced IRB approach* in the calculation of *LGDs* and/or *conversion factors*) data on comparisons of realised *LGDs* to the values as set out in ■ BIPRU 4.4.34 R and ■ BIPRU 4.8.25 R and realised *conversion factors* to the values as set out in ■ BIPRU 4.4.37 R, ■ BIPRU 4.4.45 R and ■ BIPRU 4.6.44 R.

[Note: BCD Annex VII Part 4 point 37]

Risk quantification: Definition of default

4.4.22

FCA PRA

R

- (1) This *rule*, in accordance with ■ BIPRU 4.3.57 R (4) (Definition of default), sets the exact number of days past due that a *firm* should abide by in the case of *exposures* to *PSEs*.
- (2) For counterparts that are *PSEs* situated within the *United Kingdom* the number of days past due is 180.
- (3) For counterparts that are *PSEs* situated in another *EEA State* the number of days past due is the lower of:
 - (a) 180; and
 - (b) the number of days past due fixed under the *CRD implementation measure* with respect to point 48 of Part 4 of Annex VII of the *Banking Consolidation Directive* for that *EEA State* for such *exposures*.
- (4) For counterparts that are *PSEs* in a state outside the *EEA* the number of days past due is the lower of:
 - (a) 180; and
 - (b) (if a number of days past due for such *exposures* has been fixed under any law of that state applicable to *undertakings* in the *banking sector* or the *investment services sector* that implements the *IRB approach*) that number.

[Note: BCD Annex VII Part 4 point 44 (part) and point 48 (part)]

Risk quantification: Overall requirements for estimation: Requirements specific to PD estimation

PAGE
55

4.4.23

FCA PRA

R

■ BIPRU 4.4.24 R - ■ BIPRU 4.4.31 R apply to both the *foundation IRB approach* and the *advanced IRB approach*.

4.4.24 **R** A *firm* must estimate *PDs* by *obligor grade* from long run averages of one-year *default* rates.

FCA PRA

[Note: BCD Annex VII Part 4 point 59]

4.4.25 **R** A *firm* must use *PD* estimation techniques only with supporting analysis. A *firm* must recognise the importance of judgmental considerations in combining results of techniques and in making adjustments for limitations of techniques and information.

FCA PRA

[Note: BCD Annex VII Part 4 point 62]

4.4.26 **G** Where rating agency experience or the output of a statistical default model are the primary component of *PD* estimation, a *firm* should consider whether it needs to make adjustments for other relevant information, such as internal experience, conservatism and cyclical effects. In making these adjustments, a *firm* should consider the extent to which it needs to take account of the potential for both under-recording of actual *defaults* experienced and divergence of actual experience from the true underlying average *PD*.

FCA PRA

4.4.27 **R** To the extent that a *firm* uses data on internal *default* experience for the estimation of *PDs* it must be able to demonstrate in its analysis that the estimates are reflective of underwriting standards and of any differences in the *rating system* that generated the data and the current *rating system*. Where underwriting standards or *rating systems* have changed, a *firm* must add a greater margin of conservatism in its estimate of *PD*.

FCA PRA

[Note: BCD Annex VII Part 4 point 63]

4.4.28 **R** To the extent that a *firm* associates or maps its internal grades to the scale used by an *ECAI* or similar organisations and then attributes the *default* rate observed for the external organisation's grades to the *firm's* grades, mappings must be based on a comparison of internal rating criteria to the criteria used by the external organisation and on a comparison of the internal and external ratings of any common obligors. Biases or inconsistencies in the mapping approach or underlying data must be avoided. The external organisation's criteria underlying the data used for quantification must be oriented to *default* risk only and not reflect transaction characteristics. The *firm's* analysis must include a comparison of the *default* definitions used, subject to the requirements in ■ BIPRU 4.3.56 R to ■ BIPRU 4.3.71 R and ■ BIPRU 4.4.22 R (Definition of default). The *firm* must document the basis for the mapping.

FCA PRA

[Note: BCD Annex VII Part 4 point 64]

4.4.29 **G** It is unlikely that a *firm* will be able to convince the *appropriate regulator* that it had considered all relevant and available information, as required by ■ BIPRU 4.3.74 R, if it used only data from one *ECAI* or similar organisation, where other relevant information is available.

FCA PRA

4.4.30

FCA PRA

R

To the extent that a *firm* uses statistical *default* prediction models it may estimate *PDs* as the simple average of *default*-probability estimates for individual obligors in a given grade. The firm's use of *default* probability models for this purpose must meet the standards specified in

■ BIPRU 4.3.51 R.

[Note: BCD Annex VII Part 4 point 65]

4.4.31

FCA PRA

R

Irrespective of whether a *firm* is using external, internal, or pooled data sources, or a combination of the three, for its *PD* estimation, the length of the underlying historical observation period used must be at least five years for at least one source. If the available observation period spans a longer period for any source, and this data is relevant, this longer period must be used. A *firm* not permitted to use own estimates of *LGDs* or *conversion factors* may have, when it implements the *IRB approach*, relevant data covering a period of two years. The period to be covered must increase by one year each year until relevant data cover a period of five years.

[Note: BCD Annex VII Part 4 point 66 (part)]

IRB foundation approach: General

4.4.32

FCA PRA

R

■ BIPRU 4.4.33 R - ■ BIPRU 4.4.39 R set out requirements specific to the *foundation IRB approach*.

4.4.33

FCA PRA

R

Under the *foundation IRB approach* a *firm* must apply the *LGD* values set out in ■ BIPRU 4.4.34 R and ■ BIPRU 4.8.25 R and the *conversion factors* set out in ■ BIPRU 4.4.37 R.

[Note: BCD Article 87(8)]

IRB foundation approach: LGDs

4.4.34

FCA PRA

R

A *firm* must use the following *LGD* values:

- (1) senior *exposures* without eligible collateral, 45%;
- (2) subordinated *exposures* without eligible collateral, 75%;
- (3) a *firm* may recognise funded and *unfunded credit protection* in the *LGD* in accordance with ■ BIPRU 5 (Credit risk mitigation), as modified by ■ BIPRU 4.10;
- (4) *covered bonds* may be assigned an *LGD* value of 11.25%; and
- (5) for certain senior *corporate exposure* purchased receivables, for certain subordinated *corporate exposure* purchased receivables and for *dilution risk* of *corporate* purchased receivables the provisions of ■ BIPRU 4.8.25 R (*LGDs* for corporate receivables) apply.

[Note: BCD Annex VII Part 2 point 8 (part)]

4.4.35

Foundation IRB approach: Exposure value and conversion factors

4.4.36

R

FCA PRA

■ BIPRU 4.4.37 R - ■ BIPRU 4.4.39 R apply in addition to ■ BIPRU 4.4.71 R - ■ BIPRU 4.4.78 R.

4.4.37

R

FCA PRA

- (1) The *exposure* value for the items set out in this *rule* must be calculated as the committed but undrawn amount multiplied by the applicable *conversion factor* set out in this *rule*.
- (2) For credit lines which are uncommitted, that are unconditionally cancellable at any time by the *firm* without prior notice, or that effectively provide for automatic cancellation due to deterioration in a borrower's credit worthiness, a *conversion factor* of 0 % applies. To apply a *conversion factor* of 0% a *firm* must actively monitor the financial condition of the obligor, and its internal control systems must enable it immediately to detect a deterioration in the credit quality of the obligor.
- (3) For short-term letters of credit arising from the movement of goods, a *conversion factor* of 20% applies for both the issuing and confirming *firms*.
- (4) For other credit lines, note issuance facilities (NIFs), and revolving underwriting facilities (RUFs), a *conversion factor* of 75% applies.
- (5) For undrawn purchase commitments for revolving purchased receivables falling under ■ BIPRU 4.8.29 R, the *conversion factor* set out in that *rule* applies.

[Note: BCD Annex VII Part 3 point 9 (part)]

4.4.38

R

FCA PRA

Where a commitment refers to the extension of another commitment, the lower of the two *conversion factors* associated with the individual commitment must be used.

[Note: BCD Annex VII Part 3 point 10]

4.4.39

FCA PRA

R

For all off-balance sheet items other than mentioned in ■ BIPRU 4.4.37 R, ■ BIPRU 4.4.45 R, ■ BIPRU 4.4.71 R - ■ BIPRU 4.4.78 R, ■ BIPRU 4.6.44 R, ■ BIPRU 4.8.28 R and ■ BIPRU 4.8.29 R, the *exposure* value must be the following percentage of its value:

- (1) 100% if it is a full risk item;
- (2) 50% if it is a medium risk item;
- (3) 20% if it is a medium/low risk item; and
- (4) 0% if it is a low risk item.

For the purposes of this *rule* the off-balance sheet items must be assigned to risk categories as indicated in ■ BIPRU 3.7 (Classification of off-balance sheet items).

[Note: BCD Annex VII Part 3 point 11]

Advanced IRB approach: General

4.4.40

FCA PRA

R

■ BIPRU 4.4.41 R - ■ BIPRU 4.4.55 R set out requirements specific to the *advanced IRB approach*.

4.4.41

FCA PRA

R

Under the *advanced IRB approach* a *firm* must use its own estimates of *LGDs* and *conversion factors* in accordance with ■ BIPRU 4.

[Note: BCD Article 87(9)]

Advanced IRB approach: LGDs and PDs

4.4.42

FCA PRA

R

A *firm* using own *LGD* estimates under the *advanced IRB approach* may recognise *unfunded credit protection* by adjusting *PDs* subject to ■ BIPRU 4.4.43 R.

[Note: BCD Annex VII Part 2 point 6]

4.4.43

FCA PRA

R

Notwithstanding ■ BIPRU 4.4.34 R and ■ BIPRU 4.8.25 R, if a *firm's IRB permission* permits it to use own *LGD* estimates under the *advanced IRB approach* for *exposures* to which ■ BIPRU 4 applies and permits it to use the approach in this *rule*, *unfunded credit protection* may be recognised by adjusting *PD* and/or *LGD* estimates subject to the *minimum IRB standards*. A *firm* must not assign guaranteed exposures an adjusted *PD* or *LGD* such that the adjusted *risk weight* would be lower than that of a comparable, direct *exposure* to the guarantor.

[Note: BCD Annex VII Part 2 point 10]

4.4.44

FCA PRA

G

A *firm* using the *advanced IRB approach* may only recognise *unfunded credit protection* in accordance with ■ BIPRU 4.4.43 R. The other methods for recognising *unfunded credit*

risk mitigation under the *standardised approach* and *foundation IRB approach* are not available to a *firm* on the *advanced IRB approach*.

Advanced IRB approach: Conversion factors

4.4.45

FCA PRA

R

If a *firm* uses its own estimates of *conversion factors* under the *advanced IRB approach* it must calculate the *exposure* value of off-balance sheet *exposures* calculated with the use of *conversion factors* by using its own estimates of *conversion factors* across different product types as mentioned in ■ BIPRU 4.4.37 R and ■ BIPRU 4.4.39 R (2) to ■ BIPRU 4.4.39 R (4).

[Note: BCD Annex VII Part 3 point 9 (part)]

4.4.46

FCA PRA

G

Under ■ BIPRU 4.4.45 R, a *firm* may calculate *exposure* values by calculating the amount expected to be claimed, instead of the maximum possible amount of the potential claim. The figure for the amount expected to be claimed should not be less than the current outstandings from time to time.

Advanced IRB approach: Structure of the rating system

4.4.47

FCA PRA

R

■ BIPRU 4.4.48 R - ■ BIPRU 4.4.50 R are in addition to ■ BIPRU 4.3.25 R - ■ BIPRU 4.3.28 R and ■ BIPRU 4.4.6 R - ■ BIPRU 4.4.9 R.

4.4.48

FCA PRA

R

If a *firm's IRB permission* provides for it to use the *advanced IRB approach* for the calculation of *LGDs*, its *rating system* must incorporate a distinct facility rating scale which exclusively reflects *LGD* related transaction characteristics.

[Note: BCD Annex VII Part 4 point 9]

4.4.49

FCA PRA

R

A *facility grade* means for the purpose of the *advanced IRB approach* a risk category within a *rating system's* facility scale to which *exposures* are assigned on the basis of a specified and distinct set of rating criteria from which own estimates of *LGDs* are derived. The grade definition must include both a description of how *exposures* are assigned to the grade and of the criteria used to distinguish the level of risk across grades.

[Note: BCD Annex VII Part 4 point 10]

4.4.50

FCA PRA

R

Significant concentrations within a single *facility grade* must be supported by convincing empirical evidence that the *facility grade* covers a reasonably narrow *LGD* band, respectively, and that the risk posed by all *exposures* in the grade falls within that band.

[Note: BCD Annex VII Part 4 point 11]

Advanced IRB approach: Assignment of exposures

4.4.51

FCA PRA

R

For a *firm* permitted to use own estimates of *LGDs* or *conversion factors* under the *advanced IRB approach*, each *exposure* must be assigned to

a *facility grade* as part of the credit approval process. This is in addition to the requirements in ■ BIPRU 4.4.11 R - ■ BIPRU 4.4.13 R.

[Note: BCD Annex VII Part 4 point 20]

4.4.52

FCA PRA

G

■ BIPRU 4.4.50 R and ■ BIPRU 4.4.51 R should be read in the light of ■ BIPRU 4.3.28 R.

Advanced IRB approach: Data maintenance

4.4.53

FCA PRA

R

As well as complying with ■ BIPRU 4.3.54 R and ■ BIPRU 4.4.21 R (Data maintenance), a *firm* using own estimates of *LGDs* and/or *conversion factors* under the *advanced IRB approach* must collect and store:

- (1) complete histories of data on the facility ratings and *LGD* and *conversion factor* estimates associated with each rating scale;
- (2) the dates the ratings were assigned and the estimates were done;
- (3) the key data and methodology used to derive the facility ratings and *LGD* and *conversion factor* estimates;
- (4) the person who assigned the facility rating and the person who provided *LGD* and *conversion factor* estimates;
- (5) data on the estimated and realised *LGDs* and *conversion factors* associated with each *defaulted exposure*;
- (6) data on the *LGD* of the *exposure* before and after evaluation of the effects of a guarantee or credit derivative, for a *firm* that reflects the credit risk mitigating effects of guarantees or credit derivatives through *LGD*; and
- (7) data on the components of *loss* for each *defaulted exposure*.

[Note: BCD Annex VII Part 4 Point 38]

Advanced IRB approach: Requirements specific to own-LGD estimates

4.4.54

FCA PRA

R

In addition to the requirements in ■ BIPRU 4.3.74 R - ■ BIPRU 4.3.94 R (General requirements about risk quantification) and ■ BIPRU 4.3.98 R - ■ BIPRU 4.3.123 R (Requirements for risk quantification specific to own-LGD estimates), estimates of *LGD* must be based on data over a minimum of five years, increasing by one year each year after implementation until a minimum of seven years is reached, for at least one data source. If the available observation period spans a longer period for any source, and the data is relevant, this longer period must be used.

[Note: BCD Annex VII Part 4 point 82]

Advanced IRB approach: Requirements specific to own-conversion factor estimates

4.4.55

FCA PRA

R

In addition to the requirements in ■ BIPRU 4.3.124 R - ■ BIPRU 4.3.131 R (Requirements specific to own-conversion factor estimates), estimates of *conversion factors* must be based on data over a minimum of five years, increasing by one year each year after implementation until a minimum of seven years is reached, for at least one data source. If the available observation period spans a longer period for any source, and the data is relevant, this longer period must be used.

[Note: BCD Annex VII Part 4 point 93]

Calculations: General

4.4.56

FCA PRA

R

The remainder of this section applies to both the *foundation IRB approach* and the *advanced IRB approach*.

Calculations: Risk-weighted exposure amounts

4.4.57

FCA PRA

R

Subject to ■ BIPRU 4.4.59 R to ■ BIPRU 4.4.60 R, ■ BIPRU 4.5.6 R, ■ BIPRU 4.5.8 R - ■ BIPRU 4.5.10 R (Risk weights for specialised lending), ■ BIPRU 4.8.16 R, ■ BIPRU 4.8.17 R (Risk weights for corporate exposure purchased receivables) and ■ BIPRU 4.9.3 R (Securitisation: provision of credit protection), *risk weighted exposure amounts* must be calculated according to the formulae in the table in ■ BIPRU 4.4.58 R and the adjustment formula in ■ BIPRU 4.4.79 R (Double default).

[Note: BCD Annex VII Part 1 point 3]

4.4.58

FCA PRA

R

Table: Formulae for the calculation of *risk weighted exposure amounts*

This table belongs to ■ BIPRU 4.4.57 R

Correlation (R) $0.12 \times (1 - \text{EXP}(-50 \cdot \text{PD})) / (1 - \text{EXP}(-50)) + 0.24 \cdot [1 - (1 - \text{EXP}(-50 \cdot \text{PD})) / (1 - \text{EXP}(-50))]$

Maturity factor (b) $(0.11852 - 0.05478 \cdot \ln(\text{PD}))^2$
 $(\text{LGD} \cdot \text{N}[(1 - \text{R})^{-0.5} \cdot \text{G}(\text{PD}) + (\text{R} / (1 - \text{R}))^{0.5} \cdot \text{G}(0.999)] - \text{PD} \cdot \text{LGD}) \cdot$

$(1 - 1.5 \cdot \text{b})^{-1} \cdot (1 + (\text{M} - 2.5) \cdot \text{b}) \cdot 12.5 \cdot 1.06$

N(x) denotes the cumulative distribution function for a standard normal random variable (i.e. the probability that a normal random variable with mean zero and variance of one is less than or equal to x). G(z) denotes the inverse cumulative distribution function for a standard normal random variable (i.e. the value x such that N(x) = z).

PD = 0 For PD = 0, RW shall be: 0

PD = 1 For **PD = 1**:

(i) for *defaulted exposures* where a *firm* applies the *LGD* values set out in BIPRU 4.4.32R and BIPRU 4.8.25R RW shall be: 0;

(ii) for *defaulted exposures* where a *firm* uses its own estimates of *LGDs*, RW shall be: $\text{Max}\{0, 12.5 * (\text{LGD} - \text{EL}_{\text{BE}})\}$;

where EL_{BE} must be the *firm's* best estimate of *expected loss* for the *defaulted exposure* according to BIPRU 4.3.122 R.

[Note: BCD Annex VII Part 1 point 3]

4.4.59

FCA PRA

R

For *exposures* to companies where the total annual sales for the consolidated group of which the firm is a part is less than EUR 50 million a *firm* may use the following correlation formula for the calculation of *risk weights* for *corporate exposures*. In this formula S is expressed as total annual sales in millions of Euros with $\text{EUR } 5 \text{ million} \leq S \leq \text{EUR } 50 \text{ million}$. Reported sales of less than EUR 5 million must be treated as if they were equivalent to EUR 5 million. In accordance with ■ BIPRU 4.8.21 R, for purchased receivables the total annual sales are the weighted average by individual *exposures* of the pool. The formula for the calculation of correlation (R) is:

$$0.12 \times (1 - \text{EXP}(-50 * \text{PD})) / (1 - \text{EXP}(-50)) + 0.24 *$$

$$[1 - (1 - \text{EXP}(-50 * \text{PD})) / (1 - \text{EXP}(-50))]$$

$$-0.04 * (1 - (S - 5) / 45)$$

[Note: BCD Annex VII Part 1 point 5 (part)]

4.4.60

FCA PRA

R

A *firm* must for the purpose of ■ BIPRU 4.4.59 R substitute total assets of the consolidated group for total annual sales when total annual sales are not a meaningful indicator of firm size and total assets are a more meaningful indicator than total annual sales.

[Note: BCD Annex VII Part 1 point 5 (part)]

Calculations: Expected loss amounts

4.4.61

FCA PRA

R

Expected loss amounts must be calculated according to the formulae in the table in ■ BIPRU 4.4.62 R.

[Note: BCD Annex VII Part 1 point 30 (part)]

4.4.62

FCA PRA

R Table: Formulae for the calculation of *expected loss* amounts

This table belongs to ■ BIPRU 4.4.61 R

Expected loss (EL) equals $PD \times LGD$ *Expected loss amount* equals $EL \times \text{exposure value}$

For *defaulted exposures* ($PD = 1$) where a *firm* uses its own estimates of *LGDs*, *EL* must be EL_{BE} , the *firm's* best estimate of *expected loss* for the *defaulted exposure* according to BIPRU 4.3.122 R.

For exposures subject to the treatment set out in BIPRU 4.4.79 R (Double default) *EL* must be 0.

[Note: BCD Annex VII Part 1 point 30 (part)]

Calculations: PD

4.4.63

FCA PRA

R A *firm* must provide its own estimates of *PDs* in accordance with its *IRB permission* and the *minimum IRB standards*.

[Note: BCD Article 87(6) (part)]

4.4.64

FCA PRA

R The *PD* of a *corporate exposure* or an *exposure* in the *IRB exposure class* referred to in ■ BIPRU 4.3.2 R (2) (Institutions) must be at least 0.03%.

[Note: BCD Annex VII Part 2 point 2]

4.4.65

FCA PRA

R The *PD* of obligors in *default* must be 100%.

[Note: BCD Annex VII Part 2 point 4]

4.4.66

FCA PRA

R Subject to ■ BIPRU 4.4.42 R (*Advanced IRB approach: LGDs and PDs*) a *firm* may recognise *unfunded credit protection* in the *PD* in accordance with the provisions of ■ BIPRU 5 (Credit risk mitigation), as modified by ■ BIPRU 4.10. For *dilution risk*, however, a *firm* may also recognise *unfunded credit protection* providers which are specified in its *IRB permission* in addition to those indicated in the *CRM eligibility conditions*.

[Note: BCD Annex VII Part 2 point 5]

Calculations: Maturity

4.4.67

FCA PRA

- R**
- (1) A *firm* must calculate maturity (*M*) for each of the *exposures* referred to in this *rule* in accordance with this *rule* and subject to ■ BIPRU 4.4.68 R to ■ BIPRU 4.4.70 R. In all cases, *M* must be no greater than 5 years.
 - (2) For an instrument subject to a cash flow schedule *M* must be calculated according to the following formula:

$$M = \text{MAX}\{1; \text{MIN}\{\sum_t t * CF_t / \sum_t CF_t; 5\}\}$$

where CF_t denotes the cash flows (principal, interest payments and fees) contractually payable by the obligor in period t .

- (3) For derivatives subject to a master netting agreement M must be the weighted average remaining maturity of the *exposure*, where M must be at least 1 year. The notional amount of each *exposure* must be used for weighting the maturity.
- (4) For *exposures* arising from fully or nearly-fully collateralised *financial derivative instruments* transactions and fully or nearly-fully collateralised *margin lending transactions* which are subject to a master netting agreement M must be the weighted average remaining maturity of the transactions where M must be at least 10 days. For *repurchase transactions* or securities or commodities lending or borrowing transactions which are subject to a master netting agreement, M must be the weighted average remaining maturity of transactions, where M must be at least 5 days. The notional amount of each transaction must be used for weighting the maturity.
- (5) Where a *firm* uses the *CCR internal model method* to calculate the *exposure* values, M must be calculated for *exposures* to which a *firm* applies this method and for which the maturity of the longest-dated contract contained in the *netting set* is greater than one year according to the following formula:

$$M = \text{MIN} \left(\frac{\sum_{k=1}^{tk \leq 1 \text{ year}} \text{Effective EE}_k * \Delta tk * dfk + \sum_{tk > 1 \text{ year}}^{\text{maturity}} \text{EE}_k * \Delta tk * dfk}{\sum_{k=1}^{tk \leq 1 \text{ year}} \text{Effective EE}_k * \Delta tk * dfk}, 5 \right)$$

where:

dfk = the risk-free discount factor for future time period tk and the remaining symbols are defined in ■ BIPRU 13.6.

- (6) Notwithstanding (7), a *firm* that uses a *CCR internal model method* model to calculate a *one-sided credit valuation adjustment* (CVA) may use the effective credit duration estimated by the model as M if permitted to do so by its *CCR internal model method permission*.
- (7) Subject to ■ BIPRU 4.4.68 R, for *netting sets* in which all contracts have an original maturity of less than one year the formula in (2) must be applied.
- (8) If a *firm* is permitted under its *IRB permission* to use own *PD* estimates for *corporate exposure* purchased receivables, for drawn amounts M must equal the purchased receivables *exposure*

weighted average maturity, where *M* must be at least 90 days. This same value of *M* must also be used for undrawn amounts under a committed purchase facility provided the facility contains effective covenants, early amortisation triggers, or other features that protect the purchasing *firm* against a significant deterioration in the quality of the future receivables it is required to purchase over the facility's term. Absent such effective protections, *M* for undrawn amounts must be calculated as the sum of the longest-dated potential receivable under the purchase agreement and the remaining maturity of the purchase facility, where *M* must be at least 90 days.

- (9) For any other instrument than mentioned in this *rule* or when a *firm* is not in a position to calculate *M* as set out in (2), *M* must be the maximum remaining time (in years) that the obligor is permitted to take fully to discharge its contractual obligations, where *M* must be at least 1 year.
- (10) Notwithstanding (2) and (9), *M* must be at least one-day for:
- (a) import letters of credit (including standby letters of credit issued for similar purposes) and acceptances under them;
 - (b) export letters of credit confirmation and negotiation;
 - (c) pre-shipment and post-shipment acceptances and financing;
 - (d) export and import loans collateralised by underlying goods, up to a maximum maturity of 180 days; and
 - (e) performance guarantees, bid bonds and other guarantees (including standby letters of credit issued for similar purposes) relating to the export and import of goods and services;

provided these *exposures* are not part of the *firm's* ongoing financing of the obligor.

[Note: BCD Annex VII Part 2 point 13 (part)]

4.4.68

FCA PRA

R

Notwithstanding ■ BIPRU 4.4.67 R (2) - ■ (4) and (8)-(9), *M* must be at least one-day for:

- (1) fully or nearly-fully collateralised *financial derivative instruments*;
- (2) fully or nearly-fully collateralised *margin lending transactions*; and
- (3) *repurchase transactions, securities or commodities lending or borrowing transactions*,

provided the documentation requires daily remargining and daily revaluation and includes provisions that allow for the prompt liquidation or setoff of collateral in the event of *default* or failure to re-margin.

[Note: *BCD* Annex VII Part 2 point 14 (part)]

4.4.69

FCA PRA

G

The last paragraph of paragraph 14 of Part 2 of Annex VII of the *Banking Consolidation Directive* says: "In addition, for other short-term exposures specified by the competent authorities which are not part of the credit institution's ongoing financing of the obligor, M shall be at least one-day. A careful review of the particular circumstances shall be made in each case." ■ BIPRU 4.4.67R (10) is currently the only instance where the *appropriate regulator* has specified any such short-term exposures.

[Note: *BCD* Annex VII Part 2 point 14 (part)]

4.4.70

FCA PRA

R

Maturity mismatches must be treated as specified in ■ BIPRU 4.10 and ■ BIPRU 5 (Credit risk mitigation).

[Note: *BCD* Annex VII Part 2 point 16]

Calculations: Exposure value

4.4.71

FCA PRA

R

Unless provided otherwise in ■ BIPRU 4 the *exposure* value of on-balance sheet *exposures* must be measured gross of value adjustments. This also applies to assets purchased at a price different than the amount owed. For purchased assets, the difference between the amount owed and the net value recorded on the balance-sheet of the firm is denoted discount if the amount owed is larger, and premium if it is smaller.

[Note: *BCD* Annex VII Part 3 point 1]

4.4.72

FCA PRA

R

A *firm* must not treat the *exposure* value of a facility as being less than current drawings under it. Interest accrued to date on an *exposure* under a facility must be included in current drawings or an allowance for it must be built into the *conversion factor*.

4.4.73

FCA PRA

R

Where a *firm* uses master netting agreements in relation to *repurchase transactions* or *securities or commodities lending or borrowing transactions* the *exposure* value must be calculated in accordance with ■ BIPRU 5 (Credit risk mitigation), as modified by ■ BIPRU 4.10, and ■ BIPRU 13.8.

[Note: *BCD* Annex VII Part 3 point 2]

4.4.74

FCA PRA

R

For on-balance sheet netting of loans and deposits a *firm* must apply for the calculation of the *exposure* value the methods set out in ■ BIPRU 5 (Credit risk mitigation), as modified by ■ BIPRU 4.10.

[Note: *BCD* Annex VII Part 3 point 3]

4.4.75

FCA PRA

R

The *exposure* value for leases must be the discounted minimum lease payments. Minimum lease payments are the payments over the lease term that the lessee is or can be required to make and any bargain option (i.e. option the exercise of which is reasonably certain). Any guaranteed residual value fulfilling the set of conditions in ■ BIPRU 5.7.1 R (Eligibility), as modified by ■ BIPRU 4.10.38 R and ■ BIPRU 4.10.39 R (Unfunded credit protection: Eligibility of providers) regarding the eligibility of protection providers as well as the minimum requirements for recognising other types of guarantees provided in ■ BIPRU 5.7.6 R (Minimum requirements: General) to ■ BIPRU 5.7.12 R (Additional requirements for guarantees) should also be included in the minimum lease payments.

[Note: BCD Annex VII Part 3 point 4]

4.4.76

FCA PRA

R

Where an *exposure* takes the form of *securities* or *commodities* sold, posted or lent under *repurchase transactions* or *securities or commodities lending or borrowing transactions*, *long settlement transactions* and *margin lending transactions*, the *exposure* value must be the value of the *securities* or *commodities* determined in accordance with ■ GENPRU 1.3 (Valuation). Where the *financial collateral comprehensive method* is used, the *exposure* value must be increased by the volatility adjustment appropriate to such *securities* or *commodities* as set out in ■ BIPRU 4.10 and ■ BIPRU 5 (Credit risk mitigation). The *exposure* value of *repurchase transactions*, *securities or commodities lending or borrowing transactions*, *long settlements transactions* and *margin lending transactions* must be determined in accordance with ■ BIPRU 13.

[Note: BCD Annex VII Part 3 point 7]

4.4.77

FCA PRA

R

Notwithstanding ■ BIPRU 4.4.76 R, the *exposure* value of credit risk *exposures* outstanding, as determined by the *firm*, with a *central counterparty* must be determined in accordance with ■ BIPRU 13.3.3 R and ■ BIPRU 13.8.8 R (Exposure to central counterparty), provided that the *central counterparty's CCR exposures* with all participants in its arrangements are fully collateralised on a daily basis.

[Note: BCD Annex VII Part 3 point 8]

4.4.78

FCA PRA

R

In the case of any *financial derivative instrument*, the *exposure* value must be determined by the methods set out in ■ BIPRU 13.

[Note: BCD Annex VII Part 3 point 5]

Double default

4.4.79

FCA PRA

R

The *risk weighted exposure amount* for each *exposure* which meets the requirements set out in ■ BIPRU 5.7.2 R and ■ BIPRU 4.4.83 R (Double default) may be adjusted according to the following formula:

- (1) *Risk weighted exposure amount* = $RW * exposure\ value * (0.15 + 160 * PD_{pp})$
- (2) $PD_{pp} = PD$ of the protection provider
- (3) RW must be calculated using the relevant *risk weight* formula set out in ■ BIPRU 4.4.57 R for the *exposure*, the *PD* of the obligor and the *LGD* of a comparable direct *exposure* to the protection provider. The maturity factor (b) must be calculated using the lower of the *PD* of the protection provider and the *PD* of the obligor.

[Note: BCD Annex VII Part 1 point 4]

4.4.80

FCA PRA

R

Notwithstanding ■ BIPRU 4.4.34 R and ■ BIPRU 4.4.43 R, for the purposes of ■ BIPRU 4.4.79 R, the *LGD* of a comparable direct *exposure* to the protection provider shall either be the *LGD* associated with an unhedged facility to the guarantor or the unhedged facility of the obligor, depending upon whether in the event both the guarantor and the obligor *default* during the life of the hedged transaction available evidence and the structure of the guarantee indicate that the amount recovered would depend on the financial condition of the guarantor or obligor, respectively

[Note: BCD Annex VII Part 2 point 11]

4.4.81

FCA PRA

R

For the purposes of ■ BIPRU 4.4.79 R, M must be the effective maturity of the credit protection but at least 1 year.

[Note: BCD Annex VII Part 2 point 13 (part)]

4.4.82

FCA PRA

R

■ BIPRU 4.4.83 R applies to the eligibility of protection providers under the *IRB approach* which qualify for the treatment set out in ■ BIPRU 4.4.79 R.

4.4.83

FCA PRA

R

An *institution*, an *insurance undertaking* (including an *insurance undertaking* that carries out *reinsurance*) or an export credit agency which fulfils the following conditions may be recognised as an eligible provider of *unfunded credit protection* which qualifies for the treatment set out in ■ BIPRU 4.4.79 R:

- (1) the protection provider has sufficient expertise in providing *unfunded credit protection*;
- (2) the protection provider is regulated in a manner equivalent to the rules laid down in the *Banking Consolidation Directive* or had,

at the time the credit protection was provided, a credit assessment by an *eligible ECAI* which is associated with *credit quality step 3* or above under the *rules* for the *risk weighting of exposures to corporates* under the *standardised approach*;

- (3) the protection provider had, at the time the credit protection was provided, or for any period of time thereafter, an internal rating with a *PD* equivalent to or lower than that associated with *credit quality step 2* or above under the *rules* for the *risk weighting of exposures to corporates* under the *standardised approach*;
- (4) the protection provider has an internal rating with a *PD* equivalent to or lower than that associated with *credit quality step 3* or above under the *rules* for the *risk weighting of exposures to corporates* under the *standardised approach*;

For the purpose of this *rule*, credit protection provided by an export credit agency must not benefit from any explicit central government counter-guarantee.

[Note: *BCD* Annex VIII Part 1 point 29]

4.4.84

FCA PRA

R

■ BIPRU 4.4.85 R applies to the requirements to qualify for the treatment set out in ■ BIPRU 4.4.79 R.

4.4.85

FCA PRA

R

To be eligible for the treatment set out in ■ BIPRU 4.4.79 R, credit protection deriving from a guarantee or credit derivative must meet the following conditions:

- (1) the underlying obligation must be to:
 - (a) a *corporate exposure*, excluding an *exposure to an insurance undertaking* (including an *insurance undertaking* that carries out *reinsurance*); or
 - (b) an *exposure to a regional government, local authority or public sector entity* which is not treated as an *exposure to a central government or a central bank* according to ■ BIPRU 4.4.2 R; or
 - (c) an *exposure to retail SME*, classified as a *retail exposure* according to ■ BIPRU 4.6.2 R;
- (2) the underlying obligors must not be members of the same *group* as the protection provider;
- (3) the *exposure* must be hedged by one of the following instruments:

- (a) single name unfunded credit derivatives or single name guarantees;
 - (b) first to *default* basket products, with these the treatment must be applied to the asset within the basket with the lowest *risk weighted exposure amount*;
 - (c) n^{th} to *default* basket products, with these the protection obtained is only eligible for consideration under this framework if eligible $(n-1)^{\text{th}}$ *default* protection has also been obtained or where $(n-1)$ of the assets within the basket has/have already *defaulted* and where this is the case the treatment must be applied to the asset within the basket with the lowest *risk weighted exposure amount*;
- (4) the credit protection must meet the requirements set out in ■ BIPRU 5.7.6 R - ■ BIPRU 5.7.8 R (Minimum requirements: Operational requirements), ■ BIPRU 5.7.11 R (Additional requirements for guarantees) and ■ BIPRU 5.7.13 R - ■ BIPRU 5.7.14 R (Additional requirements for credit derivatives);
 - (5) the *risk weight* that is associated with the *exposure* prior to the application of the treatment in ■ BIPRU 4.4.79 R does not already factor in any aspect of the credit protection;
 - (6) a *firm* must have the right and expectation to receive payment from the protection provider without having to take legal action in order to pursue the counterparty for payment;
 - (7) the purchased credit protection must absorb all credit losses incurred on the hedged portion of an *exposure* that arise due to the occurrence of credit events outlined in the contract;
 - (8) if the payout structure provides for physical settlement, then there must be legal certainty with respect to the deliverability of a loan, bond or contingent liability and if a *firm* intends to deliver an obligation other than the underlying *exposure*, it must ensure that the deliverable obligation is sufficiently liquid so that the *firm* would have the ability to purchase it for delivery in accordance with the contract;
 - (9) the terms and conditions of credit protection arrangements must be legally confirmed in writing by both the protection provider and the *firm*;
 - (10) a *firm* must have a process in place to detect excessive correlation between the creditworthiness of a protection provider and the obligor of the underlying *exposure* due to their performance being dependent on common factors beyond the systematic risk factor;

- (11) in the case of protection against *dilution risk*, the seller of purchased receivables must not be a member of the same *group* as the protection provider; and
- (12) with reference to (6), to the extent possible, a *firm* must take steps to satisfy itself that the protection provider is willing to pay promptly should a credit event occur.

[Note: *BCD* Annex VIII Part 2 point 22]

4.5 The IRB approach: Specialised lending exposures

Application

- 4.5.1 **R** ■ BIPRU 4.5 applies with respect to the *exposures* referred to in
 [FCA] [PRA] ■ BIPRU 4.5.3 R.

- 4.5.2 **R** Except for ■ BIPRU 4.5.1 R and ■ BIPRU 4.5.3 R, ■ BIPRU 4.5 only applies to
 [FCA] [PRA] the extent that a *firm* applies the method in ■ BIPRU 4.5 (slotting).

Definition of specialised lending

- 4.5.3 **R** Within the *corporate exposure IRB exposure class*, a *firm* must separately
 [FCA] [PRA] identify as *specialised lending exposures*, *exposures* which possess the following characteristics:

- (1) the *exposure* is to an entity which was created specifically to finance and/or operate physical assets;
- (2) the contractual arrangements give the lender a substantial degree of control over the assets and the income that they generate; and
- (3) the primary source of repayment of the obligation is the income generated by the assets being financed, rather than the independent capacity of a broader commercial enterprise.

[Note: BCD Article 86(6)]

Treatment of specialised lending

- 4.5.4 **R** If a *firm* is using or is applying to use the *advanced IRB approach* for some
 [FCA] [PRA] or all of its *exposures* in the *sovereign, institution and corporate IRB exposure class*, then *specialised lending exposures* treated under ■ BIPRU 4.5.8 R (Slotting) must be treated as being dealt with under the *advanced IRB approach* for the purposes of the calculations in ■ BIPRU 4.2.30 R and ■ BIPRU 4.2.31 R. If a *firm* is not using or applying to use the *advanced IRB approach* for any of its *exposures* in the *sovereign, institution and corporate IRB exposure class*, in the cases in which it is necessary to distinguish between the *advanced IRB approach* and the *foundation IRB approach*, then *specialised lending exposures* treated under ■ BIPRU 4.5.8 R must be treated as being dealt with under the *foundation*

IRB approach for the purposes of the calculations in ■ BIPRU 4.2.30 R and ■ BIPRU 4.2.31 R.

Structure of rating system

4.5.5

FCA PRA

R

A *firm* using the methods set out in ■ BIPRU 4.5.8 R (Slotting) for assigning *risk weights* for *specialised lending exposures* is exempt from the requirement to have an obligor rating scale which reflects exclusively quantification of the risk of obligor *default* for these *exposures*. Notwithstanding ■ BIPRU 4.4.7 R (Seven grades for exposures to sovereigns, institutions and corporates), a *firm* must have for these *exposures* four grades for non-*defaulted* obligors and one grade for *defaulted* obligors.

[Note: BCD Annex VII Part 4 point 12 and point 21]

Assignment of exposures

4.5.6

FCA PRA

R

- (1) A *firm* using the methods set out in ■ BIPRU 4.5.8 R (Slotting) for assigning *risk weights* for *specialised lending exposures* must assign each of these *exposures* to a grade in accordance with ■ BIPRU 4 Annex 1 R, taking into account the following factors:
 - (a) financial strength;
 - (b) political and legal environment;
 - (c) transaction and/or asset characteristics;
 - (d) strength of the sponsor and developer including any public private partnership income stream; and
 - (e) security package.
- (2) A *firm* must slot *exposures* into the five columns in the tables in ■ BIPRU 4.5.9 R and ■ BIPRU 4.5.13 R as follows:
 - (a) a *firm* must slot an *exposure* categorised as strong under Annex X into column 1;
 - (b) a *firm* must slot an *exposure* categorised as good under the Annex X into column 2;
 - (c) a *firm* must slot an *exposure* categorised as satisfactory under Annex X into column 3;
 - (d) a *firm* must slot an *exposure* categorised as weak under Annex X into column 4;
 - (e) in accordance with ■ BIPRU 4.5.5 R a *firm* must slot an *exposure* in *default* into column 5.

[Note: BCD Annex VII Part 1 point 6 (part)]

Calculation of risk-weighted exposure amounts

4.5.7
FCA PRA

R

Notwithstanding ■ BIPRU 4.3.5 R (Use of relevant parameters for calculating risk weighted exposure amounts), the calculation of *risk weighted exposure amounts* for credit risk for *specialised lending exposures* may be calculated in accordance with ■ BIPRU 4.5.8 R.

[Note: BCD Article 87(5)]

4.5.8
FCA PRA

R

For *specialised lending exposures* in respect of which a *firm* cannot demonstrate that its *PD* estimates meet the *minimum IRB standards* it must assign *risk weights* to these *exposures* according to the table in ■ BIPRU 4.5.9 R.

[Note: BCD Annex VII Part 1 point 6 (part)]

4.5.9
FCA PRA

R

Table: Risk weights for specialised lending

This table belongs to ■ BIPRU 4.5.8 R

Remain- ing maturi- ty	Category 1 (Strong)	Category 2 (Good)	Category 3 (Satisfac- tory)	Category 4 (Weak)	Category 5
Less than 2.5 years	50%	70%	115%	250%	0%
Equal or more than 2.5 years	70%	90%	115%	250%	0%

The coverage of each of the categories is set out in BIPRU 4.5.6 R

[Note: BCD Annex VII Part 1 point 6 (part)]

4.5.10
FCA PRA

R

A *firm* may generally assign preferential *risk weights* of 50% to *exposures* in category 1, and a 70% *risk weight* to *exposures* in category 2 if:

- (1) its *IRB permission* allows this; and
- (2) the *firm's* underwriting characteristics and other risk characteristics are substantially strong for the relevant category.

[Note: BCD Annex VII Part 1 point 6 (part)]

4.5.11
FCA PRA

G

- (1) If a *firm* applies for an *IRB permission* or for a variation of an *IRB permission* that permits the treatment in ■ BIPRU 4.5.10 R it should demonstrate that its standards exceed those of the slotting criteria provided for in ■ BIPRU 4.5 and result in ratings that are stronger than the benchmarks referred to in (3).

- (2) If a *firm* has an *IRB permission* that permits the treatment in ■ BIPRU 4.5.10 R it should continue to be able to demonstrate the matters in (1) to the *appropriate regulator* if asked.
- (3) Although a *firm* should map its internal ratings to the supervisory categories set out in the table in ■ BIPRU 4.5.9 R using the slotting criteria provided in ■ BIPRU 4.5.6 R, each supervisory category broadly corresponds to a range of external credit assessments of BBB- or better, BB+ or BB, BB- or B+ and B to C- (or their equivalents). The fifth category covers *default*.

Calculation of expected loss amounts

4.5.12

FCA PRA

R

The *EL* values for *specialised lending exposures* where a *firm* uses the methods set out in ■ BIPRU 4.5.8 R for assigning *risk weights* must be assigned according to the table in ■ BIPRU 4.5.13 R.

[Note: BCD Annex VII Part 1 point 31 (part)]

4.5.13

FCA PRA

R

Table: Expected loss values for specialised lending

This table belongs to ■ BIPRU 4.5.12 R

Remain- ing matu- rity	Category 1 (Strong)	Category 2 (Good)	Category 3 (Satis- factory)	Category 4 (Weak)	Category 5
Less than 2.5 years	0%	0.4%	2.8%	8%	50%
Equal or more than 2.5 years	0.4%	0.8%	2.8%	8%	50%

The coverage of each of the categories is set out in BIPRU 4.5.6 R

[Note: BCD Annex VII Part 1 point 31 (part)]

4.5.14

FCA PRA

R

Where a *firm's IRB permission* authorises it generally to assign preferential *risk weights* as outlined in ■ BIPRU 4.5.10 R of 50% to *exposures* in category 1, and 70% to *exposures* in category 2, the *EL* value for *exposures* in category 1 must be 0%, and for *exposures* in category 2 must be 0.4%.

[Note: BCD Annex VII Part 1 point 31 (part)]

4.6 The IRB approach: Retail exposures

Application

4.6.1

R

FCA PRA

- BIPRU 4.6 applies with respect to the *exposures* referred to in
- BIPRU 4.6.2 R.

Definition of retail exposures

4.6.2

R

FCA PRA

To be eligible to be treated as a *retail exposure*, *exposures* must meet the following criteria:

- (1) they must be either to an individual person or persons, or to a small or medium sized entity, provided in the latter case that the total amount owed to the *firm* and *parent undertaking* and its *subsidiary undertakings*, including any past due *exposure*, by the obligor client or *group of connected clients*, but excluding claims or contingent claims secured on residential real estate collateral, must not, to the knowledge of the *firm*, which must have taken reasonable steps to confirm the situation, exceed EUR 1 million;
- (2) they are treated by the *firm* in its risk management consistently over time and in a similar manner;
- (3) they are not managed just as individually as *exposures* in the *corporate exposure IRB exposure class*; and
- (4) they each represent one of a significant number of similarly managed *exposures*.

[Note: BCD Article 86(4) (part)]

4.6.3

R

FCA PRA

The present value of retail minimum lease payments is eligible to be treated as a *retail exposure*.

[Note: BCD Article 86(4) (part)]

4.6.4

G

FCA PRA

- (1) This paragraph sets out *guidance* on ■ BIPRU 4.6.2 R so far as it relates to the boundary between *retail exposures* and *corporate exposures*.

- 4
- (2) In deciding what steps are reasonable for the purposes of ■ BIPRU 4.6.2 R (1), a *firm* may take into account complexity and cost, as well as the materiality of the impact upon its capital calculation. A *firm* should be able to demonstrate to the *appropriate regulator* that it has complied with the obligation to take reasonable steps under ■ BIPRU 4.6.2 R (1) in the way it takes these factors into account.
 - (3) If a *firm* has *exposures* to an owner of a *retail SME* in his personal capacity and *exposures* to the *retail SME* the *firm* should aggregate the two types of *exposure* for the purpose of ■ BIPRU 4.6.2 R (1), although it should not include claims secured on residential real estate collateral. In deciding what steps are reasonable for the purposes of ■ BIPRU 4.6.2 R (1) in aggregating these two types of *exposure*, a *firm* may take into account the materiality of those personal *exposures*. A *firm* should be able to demonstrate to the *appropriate regulator* that it has complied with the obligation to take reasonable steps under ■ BIPRU 4.6.2 R (1) when taking into account materiality in this way.
 - (4) The definition of *group of connected clients* is set out in the *glossary*. Paragraph (2) of that definition is "two or more *persons* ... who are to be regarded as constituting a single risk because they are so interconnected that, if one of them were to experience financial problems, the other or all of the others would be likely to encounter repayment difficulties". Say that a *firm* has *exposures* to A and B. When deciding whether A and B come within paragraph (2) of the definition two conditions should be satisfied. Firstly the connections between A and B should mean that if A experiences financial problems, B should be likely to encounter repayment difficulties. Secondly, the connections between A and B should mean that if B experiences financial problems, A should be likely to encounter repayment difficulties
 - (5) A *firm* should have its own documented policy on the types of *exposures* that, in accordance with ■ BIPRU 4.6, qualify as *retail SME exposures*. The *appropriate regulator* would not expect that a definition based on the EUR 1m *exposure* limit would be adequate on its own.
 - (6) The purpose of the definition of *retail exposure* is to separate a non-granular retail and small and medium sized business portfolio from other business so that a separate capital calculation may be applied to that portfolio that takes into account its non-granularity. Where *retail exposures* are assigned to pools it is the statistical characteristics of these pools which are used to derive the *IRB approach* estimates. Therefore pools should be reasonably homogenous and subject to consistent risk management practices.
 - (7) A *firm* should have sufficient controls to ensure that any inadvertent assignment of non-eligible *exposures* to the *retail exposure IRB exposure class* is sufficiently immaterial that it does not result in any significant distortion of the overall statistical characteristics of the sub-sets of that *IRB exposure class* which arise when the *exposures* are assigned to grades or pools. Cost considerations do not justify inclusion of non-eligible *exposures* if the effect would be material. Sample testing could be one method of demonstrating that the impact would be immaterial. ■ BIPRU 4.1.25 R applies to *exposures* treated in accordance with this sub-paragraph (7).
 - (8) If an *exposure* to a small or medium sized business crosses the *retail exposure* size boundary it should be treated as a *corporate*, unless, in accordance with

■ BIPRU 4.1.25 R, the excess is immaterial because of its size or because it is temporary.

- (9) ■ BIPRU 4.6.2 R does not require that *exposures* to *retail SMEs* should never be individually managed. In deciding whether the frequency and extent of individual management does or does not make *exposures* ineligible for the *retail exposure IRB exposure class*, a *firm* should consider whether that individual management is:
- (a) sufficiently insignificant not to disrupt the homogeneity of the pool;
 - (b) consistent with the management of other *exposures* in the same *retail exposure* pool; and
 - (c) significantly different in extent from the individual management that occurs for *corporate exposures*, looked at as a whole.
- (10) Where an *exposure* is denominated in other currencies, a *firm* may calculate the Euro equivalent for the purposes of ■ BIPRU 4.6.2 R (1) using any appropriate set of exchange rates provided its choice has no obvious bias and that the *firm* is consistent in its approach to choosing rates.
- (11) A *firm* may monitor compliance with the €1m threshold in ■ BIPRU 4.6.2 R (1) on the basis of approved limits provided that it has internal control procedures that are sufficient to ensure that amounts owed cannot diverge from those approved limits to such an extent as to give rise to a breach of the €1m threshold or, if the *firm* is relying on provisions relating to reasonable steps in ■ BIPRU 4.6.2 R (1), any material breach of that threshold.

Rating system: Structure of rating system

4.6.5

FCA PRA

G

Further material on the structure of rating systems can be found in ■ BIPRU 4.3.25 R - ■ BIPRU 4.3.28 R.

Rating system: Assignment to grades or pools

4.6.6

FCA PRA

R

Rating systems must reflect both obligor and transaction risk, and must capture all relevant obligor and transaction characteristics.

[Note: BCD Annex VII Part 4 point 13]

4.6.7

FCA PRA

R

The level of risk differentiation must ensure that the number of *exposures* in a given grade or pool is sufficient to allow for meaningful quantification and validation of the *loss* characteristics at the grade or pool level. The distribution of *exposures* and obligors across grades or pools must be such as to avoid excessive concentrations.

[Note: BCD Annex VII Part 4 point 14]

4.6.8

FCA PRA

G

- (1) This paragraph contains *guidance* on the level of differentiation referred to in ■ BIPRU 4.6.7 R.

- (2) It is important that a *firm* achieves adequate segmentation to deliver robust estimates of *LGD* and *conversion factors*, as well as *PD*. Whether the focus should be more on *exposure* size or collateral type is a question of fact for the particular circumstances in which the assignment of *exposures* to grades or pools occurs. Typically the *appropriate regulator* would expect both to be important.
- (3) A *firm* may allocate *retail exposures* to pools based on direct estimates of *PD*, *LGD* and *conversion factors* as well as using an approach under which the *firm* segments first and attributes *PD*, *LGD* and *conversion factors* afterwards. However the result should in either case be that the pools are sufficiently homogenous.
- (4) The number and size of pools should be determined in relation to the objective of establishing homogeneous risk. Pools should be of sufficient size to permit the production of robust risk estimates but should not be so large as to obscure variations in quality.

4.6.9

FCA PRA

R

A *firm* must be able to demonstrate to the *appropriate regulator* that the process of assigning *exposures* to grades or pools provides for a meaningful differentiation of risk, provides for a grouping of sufficiently homogenous exposures, and allows for accurate and consistent estimation of loss characteristics at grade or pool level.

[Note: BCD Annex VII Part 4 point 15 (part)]

4.6.10

FCA PRA

G

For purchased receivables, ■ BIPRU 4.8 contains material about assignment to grades or pools.

4.6.11

FCA PRA

R

- (1) A *firm* must consider the following risk drivers when assigning *exposures* to grades or pools:
- obligor risk characteristics;
 - transaction risk characteristics, including product or collateral types or both; and
 - delinquency.
- (2) In the case of (1)(b) a *firm* must explicitly address cases where several *exposures* benefit from the same collateral.
- (3) However:
- a *firm* need not consider delinquency if this is compatible with its *IRB permission*; and
 - (in the case of a *firm* with an *IRB permission* that permits the *firm* not to consider delinquency) it should be able to demonstrate to the *appropriate regulator* that delinquency is not a material risk driver for the *exposures* treated in this way.

[Note: BCD Annex VII Part 4 Point 16]

Rating system: Assignment of exposures

4.6.12

FCA PRA

R

Each *exposure* must be assigned to a grade or a pool as part of the credit approval process.

[Note: BCD Annex VII Part 4 point 24]

Rating system: Overrides

4.6.13

FCA PRA

G

Material on overrides can be found in ■ BIPRU 4.3.50 R.

Rating system: Integrity of assignment process

4.6.14

FCA PRA

R

A *firm* must at least annually update obligor and facility assignments or review the *loss* characteristics and delinquency status of each identified risk pool whichever is applicable. A *firm* must also at least annually review in a representative sample the status of individual *exposures* within each pool as a means of ensuring that *exposures* continue to be assigned to the correct pool.

[Note: BCD Annex VII Part 4 point 29]

4.6.15

FCA PRA

G

Annual rescoring is one method of meeting the requirement in ■ BIPRU 4.6.14 R. However a *firm* need not carry out this update by means of a full re-run of a credit scoring model if it is able to demonstrate that its method is appropriate to the portfolio given its materiality and its impact on its capital requirements and that the *firm* still meets the *minimum IRB standards*.

Rating system: Use of models

4.6.16

FCA PRA

G

Material on the use of models can be found in ■ BIPRU 4.3.51 R - ■ BIPRU 4.3.53 G.

Rating system: Documentation

4.6.17

FCA PRA

G

Material on documentation can be found in ■ BIPRU 4.3.19 R - ■ BIPRU 4.3.24 R.

Rating system: Data maintenance

4.6.18

FCA PRA

R

In addition to complying with ■ BIPRU 4.3.54 R (Data maintenance) a *firm* must collect and store:

- (1) data used in the process of allocating *exposures* to grades or pools;
- (2) data on the estimated *PDs*, *LGDs* and *conversion factors* associated with grades or pools of *exposures*;
- (3) the identity of obligors and *exposures* that *defaulted*;

- (4) for *defaulted exposures*, data on the grades or pools to which the *exposure* was assigned over the year prior to *default* and the realised outcomes on *LGD* and *conversion factor*; and
- (5) data on *loss rates* for *qualifying revolving retail exposures*.

[Note: BCD Annex VII Part 4 point 39]

Risk quantification: Definition of default

4.6.19

FCA PRA

G

Material on the definition of *default* can be found in ■ BIPRU 4.3.56 R - ■ BIPRU 4.3.72 G.

4.6.20

FCA PRA

R

- (1) This *rule*, in accordance with ■ BIPRU 4.3.57 R (4) (Definition of default), sets the exact number of days past due that a *firm* must abide by in the case of *retail exposures*.
- (2) For *retail exposures* to counterparts situated within the *United Kingdom* the number of days past due is 180 days with the exception of *retail SME exposures*. For these *exposures* the number is 90 days.
- (3) For *retail exposures* to counterparts situated in another *EEA State* the number of days past due is the lower of:
 - (a) 180; and
 - (b) the number of days past due fixed under the *CRD implementation measure* in that *EEA State* with respect to paragraph 48 of Part 4 of Annex VII of the *Banking Consolidation Directive* for such *exposures*.
- (4) For *retail exposures* to counterparts in a state outside the *EEA* the number of days past due is the lower of:
 - (a) 180; and
 - (b) (if a number of days past due for such *exposures* has been fixed under any national law of that state applicable to *undertakings* in the *banking sector* or the *investment services sector* that implements the *IRB approach*) that number.

[Note: BCD Annex VII Part 4 point 44 (part) and point 48 (part)]

4.6.21

FCA PRA

R

A *firm* may apply the definition of *default* at a facility level.

[Note: BCD Annex VII Part 4 point 44 (part)]

4.6.22

FCA PRA

G

Where a *firm* chooses to apply the definition of *default* at facility level and a customer has *defaulted* on a facility, then *default* on that facility is likely to influence the *PD* assigned to that customer on other facilities and so should be taken into account.

Risk quantification: Overall requirements for estimation

4.6.23

G

FCA PRA

Material on the overall requirements for estimation can be found in ■ BIPRU 4.3.73 R - ■ BIPRU 4.3.94 R.

Risk quantification: Requirements specific to PD estimation

4.6.24

R

FCA PRA

A *firm* must estimate *PDs* by obligor grade or pool from long run averages of one-year *default* rates.

[Note: BCD Annex VII Part 4 point 67]

4.6.25

R

FCA PRA

Notwithstanding ■ BIPRU 4.6.24 R, *PD* estimates may also be derived from realised *losses* and appropriate estimates of *LGDs*.

[Note: BCD Annex VII Part 4 point 68]

4.6.26

R

FCA PRA

A *firm* must regard internal data for assigning exposures to grades or pools as the primary source of information for estimating *loss* characteristics. A *firm* may use external data (including pooled data) or statistical models for quantification provided a strong link can be demonstrated between:

- (1) the *firm's* process of assigning *exposures* to grades or pools and the process used by the external data source; and
- (2) the *firm's* internal risk profile and the composition of the external data.

[Note: BCD Annex VII Part 4 point 69]

4.6.27

R

FCA PRA

If a *firm* derives long run average estimates of *PD* and *LGD* for *retail exposures* from an estimate of total *losses*, and an appropriate estimate of *PD* or *LGD*, the process for estimating total *losses* must meet the *minimum IRB standards* for estimation of *PD* and *LGD*, and the outcome must be consistent with the concept of *LGD* as set out in ■ BIPRU 4.3.99 R (Default weighted average).

[Note: BCD Annex VII Part 4 point 70]

4.6.28

R

FCA PRA

Irrespective of whether a *firm* is using external, internal, pooled data sources or a combination of the three, for its estimation of *loss* characteristics, the length of the underlying historical observation period used must be at least five years for at least one source. If the available observation spans a longer period for any source, and these data are relevant, this longer period must be used. However:

- (1) a *firm* need not give equal importance to historic data if this is compatible with its *IRB permission*; and

- (2) (in the case of a *firm* with an *IRB permission* that permits this treatment of historic data) the *firm* must be able to convince the *appropriate regulator* that more recent data is a better predictor of *loss rates*.

[Note: BCD Annex VII Part 4 point 71 (part)]

4.6.29

FCA PRA

R

A *firm* may have, when implementing the *IRB approach*, relevant data covering a period of two years. The period to be covered must increase by one year each year until relevant data covers a period of five years.

[Note: BCD Annex VII Part 4 point 71 (part)]

4.6.30

FCA PRA

R

A *firm* must identify and analyse expected changes of risk parameters over the life of credit *exposures* (seasoning effects).

[Note: BCD Annex VII Part 4 point 72]

Risk quantification: Requirements specific to own-LGD estimation

4.6.31

FCA PRA

R

Notwithstanding ■ BIPRU 4.3.99 R (Default weighted average), *LGD* estimates may be derived from realised *losses* and appropriate estimates of *PDs*.

[Note: BCD Annex VII Part 4 point 83]

4.6.32

FCA PRA

R

Notwithstanding ■ BIPRU 4.3.128 R (Additional drawings), a *firm* may reflect future drawings either in its *conversion factor* or in its *LGD* estimates.

[Note: BCD Annex VII Part 4 point 84]

4.6.33

FCA PRA

R

Estimates of *LGD* must be based on data over a minimum of five years. Notwithstanding ■ BIPRU 4.3.99 R (Default weighted average):

- (1) a *firm* need not give equal importance to historic data if this is permitted by its *IRB permission*; and
- (2) (in the case of a *firm* with an *IRB permission* that permits this treatment of historic data) the *firm* must be able to convince the *appropriate regulator* that more recent data is a better predictor of *loss rates*.

[Note: BCD Annex VII Part 4 point 86 (part)]

4.6.34

FCA PRA

R

A *firm* may have, when it implements the *IRB approach*, relevant data covering a period of two years. The period to be covered must increase by one year each year until relevant data covers a period of five years.

[Note: BCD Annex VII Part 4 point 86 (part)]

4.6.35

FCA PRA

G

The *appropriate regulator* does not assume that all portfolios are sensitive to downturns. The *appropriate regulator* also accepts that for some portfolios, particularly in unsecured lending, the impact of the material drivers on *LGD* may be weak. However the burden is on the *firm* to demonstrate that its models are appropriate for the circumstances in which they are applied.

4.6.36

FCA PRA

G

Additional material on requirements specific to own-*LGD* estimation can be found in ■ BIPRU 4.3.98 R - ■ BIPRU 4.3.123 R.

Risk quantification: Requirements specific to own-conversion factor estimates

4.6.37

FCA PRA

R

Notwithstanding ■ BIPRU 4.3.128 R (Additional drawings), a *firm* may reflect future drawings either in its *conversion factors* or in its *LGD* estimates.

[Note: BCD Annex VII Part 4 point 94]

4.6.38

FCA PRA

R

Estimates of *conversion factors* must be based on data over a minimum of five years. Notwithstanding ■ BIPRU 4.3.125 R:

- (1) a *firm* need not give equal importance to historic data if this is permitted by its *IRB permission*; and
- (2) (in the case of a *firm* with an *IRB permission* that permits this treatment of historic data) the *firm* must be able to convince the *appropriate regulator* if asked that more recent data is a better predictor of loss rates.

[Note: BCD Annex VII Part 4 point 95 (part)]

4.6.39

FCA PRA

R

A *firm* may have, when it implements the *IRB approach*, relevant data covering a period of two years. The period to be covered must increase by one year each year until relevant data cover a period of five years.

[Note: BCD Annex VII Part 4 point 95 (part)]

4.6.40

FCA PRA

G

Additional material on requirements specific to own-*conversion factor* estimation can be found in ■ BIPRU 4.3.124 R - ■ BIPRU 4.3.131 R.

Calculation of risk weighted exposure amounts for retail exposures: General

4.6.41

FCA PRA

R

Subject to ■ BIPRU 4.6.43 R and ■ BIPRU 4.6.44 R, the *risk weighted exposure amounts* for *retail exposures* must be calculated according to the formulae in the table in ■ BIPRU 4.6.42 R.

[Note: BCD Annex VII Part 1 point 10 1st sentence]

4.6.42

FCA PRA

R Table: Risk weighted exposure amounts for retail exposures

This table belongs to ■ BIPRU 4.6.41 R

Correlation (R) $0.03 \times (1 - \text{EXP}(-35 \cdot PD)) / (1 - \text{EXP}(-35)) + 0.16 \cdot [1 - (1 - \text{EXP}(-35 \cdot PD)) / (1 - \text{EXP}(-35))]$

Risk weight (RW) $(LGD \cdot N[(1-R)^{-0.5} \cdot G(PD) + (R/(1-R))^{0.5} \cdot G(0.999)] - PD \cdot LGD) \cdot 12.5 \cdot 1.06$

N(x) denotes the cumulative distribution function for a standard normal random variable (i.e. the probability that a normal random variable with mean zero and variance of one is less than or equal to x).

G(z) denotes the inverse cumulative distribution function for a standard normal random variable (i.e. the value x such that $N(x) = z$).

PD = 1 For $PD = 1$ (defaulted exposure), RW must be:

$\text{Max} \{0, 12.5 \cdot (LGD - EL_{BE})\}$

where EL_{BE} must be the firm's best estimate of expected loss for the defaulted exposure according to BIPRU 4.3.122 R.

Risk weighted exposure amount equals $RW \cdot \text{exposure value}$

[Note: BCD Annex VII Part 1 point 10 (part)]

Calculation of risk weighted exposure amounts for retail exposures: Retail mortgages

4.6.43

FCA PRA

R For *retail exposures* secured by real estate collateral a correlation (R) of 0.15 must replace the correlation formula in the table in ■ BIPRU 4.6.42 R.

[Note: BCD Annex VII Part 1 point 12]

Calculation of risk weighted exposure amounts for retail exposures: Qualifying revolving retail exposures

4.6.44

FCA PRA

- R
- (1) For *qualifying revolving retail exposures* a correlation (R) of 0.04 must replace the correlation formula in the table in ■ BIPRU 4.6.42 R.
 - (2) *Retail exposures* qualify as *qualifying revolving retail exposures* if they meet the following conditions:
 - (a) the *IRB permission* of the *firm* in question does not disapply this paragraph;

- (b) the *exposures* are to individuals;
- (c) the *exposures* are revolving, unsecured, and, to the extent they are not drawn, immediately and unconditionally cancellable by the *firm*;
- (d) the maximum *exposure* to a single individual in the sub-portfolio is EUR 100,000 or less;
- (e) the *firm* is able to demonstrate to the *appropriate regulator* that the use of the correlation formula in this paragraph is limited to portfolios that have exhibited low volatility of *loss* rates, relative to their average level of *loss* rates, especially within the low *PD* bands; and
- (f) the *firm* is able to demonstrate to the *appropriate regulator* that treatment as a *qualifying revolving retail exposure* is consistent with the underlying risk characteristics of the sub-portfolio.

- (3) In the context of this *rule* revolving *exposures* are defined as those where customers' outstanding balances are permitted to fluctuate based on their decisions to borrow and repay, up to a limit established by the *firm* in question. Undrawn commitments may be considered as unconditionally cancellable if the terms permit the *firm* to cancel them to the full extent allowable under consumer protection and related legislation.

[Note: BCD Annex VII Part 1 point 13 (part) and Part 3 point 9(a) (part)]

4.6.45

FCA PRA

G

A *firm* should be able to demonstrate the low volatility of *loss* rates mentioned in ■ BIPRU 4.6.44 R (2)(e) at the time of the initial application for an *IRB permission* and thereafter at any time on request. The benchmark level should be the volatility of *loss* rates for the *qualifying revolving retail exposure* portfolio relative to the volatilities of *loss* rates of other relevant types of *retail exposures*. A *firm* should demonstrate low volatility by reference to data on the mean and standard deviation of *loss* rates over a time period that can be regarded as representative of the long-run performance of the portfolios concerned.

4.6.46

FCA PRA

G

In the *appropriate regulator's* view a sub-portfolio consisting of credit card or overdraft obligations will usually meet the condition in ■ BIPRU 4.6.44 R (2)(f). In the *appropriate regulator's* view it is unlikely that any other type of *retail exposure* will do so. If a *firm* wishes to apply the treatment in ■ BIPRU 4.6.44 R (1) to product types other than credit card or overdraft obligations it should first discuss this with the *appropriate regulator*.

Calculation of expected loss amounts

4.6.47

FCA PRA

R

Expected loss amounts must be calculated according to the formulae in the table in ■ BIPRU 4.6.48 R.

[Note: BCD Annex VII Part 1 point 30 (part)]

4.6.48

FCA PRA

R Table: Formulae for the calculation of expected loss amounts

This table belongs to ■ BIPRU 4.6.47 R

Expected loss (EL) equals $PD \times LGD$ *Expected loss amount* equals $EL \times \text{exposure value}$

For *defaulted exposures* ($PD = 1$) where a *firm* uses its own estimates of *LGDs*, *EL* must be EL_{BE} , the *firm's* best estimate of *expected loss* for the *defaulted exposure* according to BIPRU 4.3.122 R.

For *exposures* subject to the treatment set out in BIPRU 4.4.79 R (Double default) *EL* must be 0.

[Note: BCD Annex VII Part 1 point 30 (part)]

Calculation of PDs

4.6.49

FCA PRA

R A *firm* must provide its own estimates of *PDs* in accordance with its *IRB permission* and the *minimum IRB standards*.

[Note: BCD Article 87(6) (part)]

4.6.50

FCA PRA

R The *PD* of an *exposure* must be at least 0.03%.

[Note: BCD Annex VII Part 2 point 17]

4.6.51

FCA PRA

R The *PD* of obligors in *default* must be 100%. If a *firm* is using the facility level approach described in ■ BIPRU 4.6.21 R, the *PD* of an *exposure* in *default* must be 100%.

[Note: BCD Annex VII Part 2 point 18]

4.6.52

FCA PRA

R *Unfunded credit protection* may be recognised by adjusting *PDs* subject to ■ BIPRU 4.6.54 R. For *dilution risk*, where a *firm* does not use its own estimates of *LGDs*, this must be subject to compliance with ■ BIPRU 5 (Credit risk mitigation) modified by ■ BIPRU 4.10 and, for this purpose, a *firm* may recognise *unfunded credit protection* providers other than those indicated in the *CRM eligibility conditions* provided the *firm* is able to demonstrate that the unfunded protection provider giving the undertaking is sufficiently reliable and that the protection agreement is legally effective in accordance with ■ BIPRU 5.2.7 R (Unfunded credit protection).

[Note: BCD Annex VII Part 2 point 20]

Calculation of LGDs

4.6.53

FCA PRA

R

A firm must provide its own estimates of LGDs in accordance with its IRB permission and the minimum IRB standards.

[Note: BCD Article 87(7) (part)]

4.6.54

FCA PRA

R

Unfunded credit protection may be recognised as eligible by adjusting PD or LGD estimates subject to the minimum IRB standards as specified in ■ BIPRU 4.10.43 R - ■ BIPRU 4.10.48 R and in accordance with the IRB permission either in support of an individual exposure or a pool of exposures. A firm must not assign guaranteed exposures an adjusted PD or LGD such that the adjusted risk weight would be lower than that of a comparable, direct exposure to the guarantor.

[Note: BCD Annex VII Part 2 point 22]

Calculation of exposure values and own conversion factors

4.6.55

FCA PRA

R

Except where otherwise specified, ■ BIPRU 4.4.37 R - ■ BIPRU 4.4.39 R (Exposure value and conversion factors), ■ BIPRU 4.4.45 R (AIRB conversion factors) and ■ BIPRU 4.4.71 R - ■ BIPRU 4.4.78 R (Calculation of exposure values for sovereigns, institutions and corporates) also apply to retail exposures.

4.6.56

FCA PRA

R

A firm must provide its own estimates of conversion factors in accordance with its IRB permission and the minimum IRB standards.

[Note: BCD Article 87(7) (part)]

Double default

4.6.57

FCA PRA

R

The risk weighted exposure amount for each exposure to retail SME as defined in ■ BIPRU 4.6.2 R which meets the requirements set out in ■ BIPRU 4.4.83 R and ■ BIPRU 4.4.85 R may be calculated according to ■ BIPRU 4.4.79 R (Double default).

[Note: BCD Annex VII Part 1 point 11]

4.6.58

FCA PRA

R

Notwithstanding ■ BIPRU 4.6.54 R for the purposes of ■ BIPRU 4.4.80 R the LGD of a comparable direct exposure to the protection provider must either be the LGD associated with an unhedged facility to the guarantor or the unhedged facility of the obligor, depending upon whether in the event both the guarantor and obligor default during the life of the hedged transaction available evidence and the structure of the guarantee indicate that the amount recovered would depend on the financial condition of the guarantor or obligor, respectively.

[Note: BCD Annex VII Part 2 point 23]

4.7 The IRB approach: Equity exposures

Application

- 4.7.1 **R** ■ BIPRU 4.7 applies with respect to the *exposures* referred to in
 [FCA] [PRA] ■ BIPRU 4.7.2 R.

Definition of equity exposures

- 4.7.2 **R** The following *exposures* must be classed as *equity exposures*:

[FCA] [PRA]

- (1) non-debt *exposures* conveying a subordinated, residual claim on the assets or income of the issuer; and
- (2) debt *exposures* the economic substance of which is similar to the *exposures* specified in (1).

[Note: BCD Article 86(2)]

Calculation of risk-weighted exposure amounts

- 4.7.3 **R** Notwithstanding ■ BIPRU 4.3.5 R (Relevant parameters), the calculation of *risk weighted exposure amounts* for credit risk for all *exposures* belonging to the *equity exposure IRB exposure class* must be calculated in accordance with one of the following ways:

[FCA] [PRA]

- (1) the simple risk weight approach (see ■ BIPRU 4.7.8 R;
- (2) the *PD/LGD approach* (see ■ BIPRU 4.7.13 R); and
- (3) the internal models approach (see ■ BIPRU 4.7.23 R);

in accordance with ■ BIPRU 4.7 and subject to the *firm's IRB permission*.

[Note: BCD Article 87(4) (part)]

- 4.7.4 **R** Even if a *firm's IRB permission* would otherwise permit the use of the internal models approach as referred to in ■ BIPRU 4.7.3 R (3), it may only use that approach if it meets the minimum requirements in ■ BIPRU 4.7.27 R - ■ BIPRU 4.7.35 R.

[FCA] [PRA]

[Note: BCD Article 87(4) (part)]

4.7.5

FCA PRA

R

A *firm* may employ different approaches to different portfolios where the *firm* itself uses different approaches internally. A *firm* must, if it uses different approaches in accordance with the previous sentence, be able to demonstrate to the *appropriate regulator* that the choice is made consistently and is not determined by regulatory arbitrage considerations.

[Note: BCD Annex VII Part 1 point 17]

4.7.6

FCA PRA

R

Notwithstanding ■ BIPRU 4.7.5 R a firm may, if its *IRB permission* permits it to do so, attribute the *risk weighted exposure amounts* for *equity exposures* to *ancillary services undertakings* according to the treatment of *non credit-obligation assets*.

[Note: BCD Annex VII Part 1 point 18]

Exposure value

4.7.7

FCA PRA

R

The *exposure* value must be the value presented in the financial statements. Admissible *equity exposure* measures are the following:

- (1) for investments held at fair value with changes in value flowing directly through income and into *capital resources*, the *exposure* value is the fair value presented in the balance sheet;
- (2) for investments held at fair value with changes in value not flowing through income but into a tax-adjusted separate component of equity, the *exposure* value is the fair value presented in the balance sheet; and
- (3) for investments held at cost or at the lower of cost or market value, the *exposure* value is the cost or market value presented in the balance sheet.

[Note: BCD Annex VII Part 3 point 12]

The calculation of risk-weighted exposure amounts for equity exposures: The simple risk weight approach: Introduction

4.7.8

FCA PRA

R

■ BIPRU 4.7.9 R to ■ BIPRU 4.7.12 R set out the simple risk weight approach for calculating the *risk weighted exposure amounts* for *equity exposures* as referred to in ■ BIPRU 4.7.3 R (1).

4.7.9

FCA PRA

R

**The calculation of risk-weighted exposure amounts for equity exposures:
The simple risk weight approach: Risk weighted exposure amounts**

The *risk weighted exposure amounts* must be calculated according to the following formula:

risk-weighted exposure amounts = RW * *exposure value*;

where:

- (1) *risk weight* (RW) = 190% for private *equity exposures* in sufficiently diversified portfolios;
- (2) *risk weight* (RW) = 290% for exchange traded *equity exposures*; and
- (3) *risk weight* (RW) = 370% for all other *equity exposures*.

[Note: BCD Annex VII Part 1 point 19]

4.7.10

FCA PRA

R

Short cash positions and derivative instruments held in the *non-trading book* are permitted to offset long positions in the same individual stocks provided that these instruments have been explicitly designated as hedges of specific *equity exposures* and that they provide a hedge for at least another year. Other short positions must be treated as if they are long positions with the relevant *risk weight* assigned to the absolute value of each position. In the context of maturity mismatched positions, the method is that for *corporate exposures* as set out in ■ BIPRU 4.4.70 R.

[Note: BCD Annex VII Part 1 point 20]

4.7.11

FCA PRA

R

A *firm* may recognise *unfunded credit protection* obtained on an *equity exposure* in accordance with the methods set out in ■ BIPRU 5 (Credit risk mitigation), as modified by ■ BIPRU 4.10.

[Note: BCD Annex VII Part 1 point 21]

**The calculation of risk-weighted exposure amounts for equity exposures:
The simple risk weight approach: Expected loss**

4.7.12

FCA PRA

R

The *expected loss* amounts for *equity exposures* must be calculated according to the following formula:

- (1) *expected loss* amount = *EL* × *exposure value*; and
- (2) the *EL* values must be the following:
 - (a) *expected loss* (*EL*) = 0.8% for private *equity exposures* in sufficiently diversified portfolios;
 - (b) *expected loss* (*EL*) = 0.8% for exchange traded *equity exposures*; and

(c) *expected loss (EL)* = 2.4% for all other *equity exposures*.

[Note: BCD Annex VII Part 1 point 32]

**The calculation of risk-weighted exposure amounts for equity exposures:
The PD/LGD approach: Introduction**

4.7.13

FCA PRA

R

■ BIPRU 4.7.14 R to ■ BIPRU 4.7.22 R set out the *PD/LGD approach* for calculating the *risk weighted exposure amounts* for *equity exposures*.

**The calculation of risk-weighted exposure amounts for equity exposures:
The PD/LGD approach: Risk weighted exposure amounts**

4.7.14

FCA PRA

R

The *risk weighted exposure amounts* must be calculated according to the formulas in ■ BIPRU 4.4.58 R (Risk weighted exposure amounts for sovereigns, institutions and corporates). If a *firm* does not have sufficient information to use the definition of *default* a scaling factor of 1.5 must be assigned to the *risk weights*.

[Note: BCD Annex VII Part 1 point 22]

4.7.15

FCA PRA

R

At the individual *exposure* level the sum of the *expected loss* amount multiplied by 12.5 and the *risk weighted exposure amount* must not exceed the *exposure* value multiplied by 12.5.

[Note: BCD Annex VII Part 1 point 23]

4.7.16

FCA PRA

R

A *firm* may recognise *unfunded credit protection* obtained on an *equity exposure* in accordance with the methods set out in ■ BIPRU 5 (Credit risk mitigation) as modified by ■ BIPRU 4.10. This must be subject to an *LGD* of 90% on the *exposure* to the provider of the hedge. For private *equity exposures* in sufficiently diversified portfolios an *LGD* of 65% may be used.

[Note: BCD Annex VII Part 1 point 24]

**The calculation of risk-weighted exposure amounts for equity exposures:
The PD/LGD approach: Calculation of expected loss amounts**

4.7.17

FCA PRA

R

The *expected loss* amounts for *equity exposures* must be calculated according to the following formulae:

(1) *expected loss (EL)* = $PD \times LGD$; and

(2) *expected loss amount* = $EL \times exposure\ value$.

[Note: BCD Annex VII Part 1 point 33]

The calculation of risk-weighted exposure amounts for equity exposures: The PD/LGD approach: PDs

4.7.18

FCA PRA

R

PDs must be determined according to the methods for *corporate exposures*. The following minimum PDs must be applied:

- (1) 0.09% for exchange traded *equity exposures* where the investment is part of a long-term customer relationship;
- (2) 0.09% for non-exchange traded *equity exposures* where the returns on the investment are based on regular and periodic cash flows not derived from capital gains;
- (3) 0.40% for exchange traded *equity exposures* including other short positions as set out in ■ BIPRU 4.7.10 R; and
- (4) 1.25% for all other *equity exposures* including other short positions as set out in ■ BIPRU 4.7.10 R.

[Note: BCD Annex VII Part 2 point 24]

4.7.19

FCA PRA

R

■ BIPRU 4.4.29 G (five year observation period) applies to the *PD/LGD approach*.

[Note: BCD Annex VII Part 4 point 66 (part)]

The calculation of risk-weighted exposure amounts for equity exposures: The PD/LGD approach: LGDs

4.7.20

FCA PRA

R

Private *equity exposures* in sufficiently diversified portfolios may be assigned an *LGD* of 65%.

[Note: BCD Annex VII Part 2 point 25]

4.7.21

FCA PRA

R

All other *exposures* must be assigned an *LGD* of 90%.

[Note: BCD Annex VII Part 2 point 26]

The calculation of risk-weighted exposure amounts for equity exposures: The PD/LGD approach: Maturity

4.7.22

FCA PRA

R

M (maturity) assigned to all *exposures* must be 5 years.

[Note: BCD Annex VII Part 2 point 27]

The calculation of risk-weighted exposure amounts for equity exposures: The internal models approach: Introduction

4.7.23

FCA PRA

R

■ BIPRU 4.7.24 R to ■ BIPRU 4.7.35 R set out the internal models approach for calculating the *risk weighted exposure amounts* for *equity exposures* as referred to in ■ BIPRU 4.7.3 R (3).

**The calculation of risk-weighted exposure amounts for equity exposures:
The internal models approach: Risk weighted exposure amounts**

4.7.24

FCA PRA

R

The *risk weighted exposure amount* is the potential loss on the *firm's equity exposures* as derived using internal value-at-risk models subject to the 99th percentile, one-tailed confidence interval of the difference between quarterly returns and an appropriate risk-free rate computed over a long-term sample period, multiplied by 12.5. The *risk weighted exposure amounts* at the *equity exposure* portfolio level must not be less than the total of the sums of the minimum *risk weighted exposure amounts* required under the *PD/LGD approach* and the corresponding *expected loss* amounts multiplied by 12.5 and calculated on the basis of the *PD* values set out in ■ BIPRU 4.7.18 R (1) and the corresponding *LGD* values set out in ■ BIPRU 4.7.20 R and ■ BIPRU 4.7.21 R.

[Note: BCD Annex VII Part 1 point 25]

4.7.25

FCA PRA

R

A *firm* may recognise *unfunded credit protection* obtained on an *equity position*.

[Note: BCD Annex VII Part 1 point 26]

**The calculation of risk weighted exposure amounts for equity exposures:
The internal models approach: Expected loss amounts**

4.7.26

FCA PRA

R

The *expected loss* amounts for *equity exposures* under the internal models approach must be 0%.

[Note: BCD Annex VII Part 1 point 34]

**The calculation of risk weighted exposure amounts for equity exposures:
The internal models approach: Capital requirements and risk quantification**

4.7.27

FCA PRA

R

- (1) A *firm* must meet the standards set out in (2) to (9) for the purpose of calculating capital requirements.
- (2) The estimate of potential *loss* must be robust to adverse market movements relevant to the long-term risk profile of the *firm's* specific holdings. The data used to represent return distributions must reflect the longest sample period for which data is available and be meaningful in representing the risk profile of the *firm's* specific *equity exposures*. The data used must be sufficient to provide conservative, statistically reliable and robust loss estimates that are not based purely on subjective or judgmental considerations. A *firm* must be able to demonstrate to the *appropriate regulator* that the shock employed provides a conservative estimate of potential *losses* over a relevant long-term market or business cycle.
- (3) A *firm* must combine empirical analysis of available data with adjustments based on a variety of factors in order to attain model

outputs that achieve appropriate realism and conservatism. In constructing Value at Risk (VaR) models estimating potential quarterly losses, a *firm* may use quarterly data or convert shorter horizon period data to a quarterly equivalent using an analytically appropriate method supported by empirical evidence and through a well-developed and documented thought process and analysis. Such an approach must be applied conservatively and consistently over time. Where only limited relevant data is available a *firm* must add appropriate margins of conservatism.

- (4) The models used must be able to capture adequately all of the material risks embodied in equity returns including both the *general market risk* and *specific risk* exposure of the *firm's equity exposure* portfolio. The internal models must adequately explain historical price variation, capture both the magnitude and changes in the composition of potential concentrations, and be robust to adverse market environments. The population of risk *exposures* represented in the data used for estimation must be closely matched to or at least comparable with those of the *firm's equity exposures*.
- (5) The internal model must be appropriate for the risk profile and complexity of a *firm's equity exposure* portfolio. Where a *firm* has material holdings with values that are highly non-linear in nature the internal models must be designed to capture appropriately the risks associated with such instruments.
- (6) Mapping of individual positions to proxies, market indices, and risk factors must be plausible, intuitive, and conceptually sound.
- (7) A *firm* must be able to demonstrate to the *appropriate regulator* through empirical analyses the appropriateness of risk factors, including their ability to cover both *general market risk* and *specific risk*.
- (8) The estimates of the return volatility of *equity exposures* must incorporate relevant and available data, information, and methods. Independently reviewed internal data or data from external sources (including pooled data) must be used.
- (9) A rigorous and comprehensive stress-testing programme must be in place.

[Note: BCD Annex VII Part 4 point 115]

The calculation of risk-weighted exposure amounts for equity exposures: The internal models approach: Risk management and controls

- (1) With regard to the development and use of internal models for capital requirement purposes, a *firm* must establish policies,

4.7.28

FCA PRA

R

procedures, and controls to ensure the integrity of the model and modelling process. These policies, procedures, and controls must include the ones set out in the rest of this paragraph.

- (2) There must be full integration of the internal model into the overall management information systems of the *firm* and in the management of the *non-trading book equity exposure* portfolio. In particular they must be used in:
 - (a) measuring and assessing *equity exposure* portfolio performance (including the risk adjusted performance);
 - (b) allocating economic capital to *equity exposures*; and
 - (c) evaluating overall capital adequacy and the investment management process.
- (3) A *firm* must have established management systems, procedures, and control functions for ensuring the periodic and independent review of all elements of the internal modelling process, including approval of model revisions, vetting of model inputs, and review of model results, such as direct verification of risk computations. These reviews must assess the accuracy, completeness, and appropriateness of model inputs and results and focus on both finding and limiting potential errors associated with known weaknesses and identifying unknown model weaknesses. Such reviews may be conducted by an internal independent unit, or by an independent external third party.
- (4) There must be adequate systems and procedures for monitoring investment limits and the risk exposures of *equity exposures*.
- (5) The units responsible for the design and application of the model must be functionally independent from the units responsible for managing individual investments.
- (6) Parties responsible for any aspect of the modelling process must be adequately qualified. Management must allocate sufficient skilled and competent resources to the modelling function.

[Note: BCD Annex VII Part 4 point 116]

**The calculation of risk-weighted exposure amounts for equity exposures:
The internal models approach: Validation and documentation**

A *firm* must have a robust system in place to validate the accuracy and consistency of its internal models and modelling processes. All material elements of the internal models and the modelling process and validation must be documented.

[Note: BCD Annex VII Part 4 point 117]

4.7.30 **R** A *firm* must use the internal validation process to assess the performance of its internal models and processes in a consistent and meaningful way.

FCA **PRA**

[Note: BCD Annex VII Part 4 point 118]

4.7.31 **R** The methods and data used for quantitative validation must be consistent through time. Changes in estimation and validation methods and data (both data sources and periods covered) must be documented.

FCA **PRA**

[Note: BCD Annex VII Part 4 point 119]

4.7.32 **R** A *firm* must regularly compare actual *equity exposure* returns (computed using realised and unrealised gains and losses) with modelled estimates. Such comparisons must make use of historical data that cover as long a period as possible. A *firm* must document the methods and data used in such comparisons. This analysis and documentation must be updated at least annually.

FCA **PRA**

[Note: BCD Annex VII Part 4 point 120]

4.7.33 **R** A *firm* must make use of other quantitative validation tools and comparisons with external data sources. The analysis must be based on data that are appropriate to the portfolio, are updated regularly, and cover a relevant observation period. A *firm's* internal assessments of the performance of its models must be based on as long a period as possible.

FCA **PRA**

[Note: BCD Annex VII Part 4 point 121]

4.7.34 **R** A *firm* must have sound internal standards for situations where comparison of actual *equity exposure* returns with the models' estimates calls the validity of the estimates or of the models as such into question. These standards must take account of business cycles and similar systematic variability in *equity exposure* returns. All adjustments made to internal models in response to model reviews must be documented and consistent with the *firm's* model review standards.

FCA **PRA**

[Note: BCD Annex VII Part 4 point 122]

4.7.35 **R** The internal model and the modelling process must be documented, including the responsibilities of parties involved in the modelling, and the model approval and model review processes.

FCA **PRA**

[Note: BCD Annex VII Part 4 point 123]

4.8 The IRB approach: Purchased receivables

Application

4.8.1 **R** ■ BIPRU 4.8 applies with respect to purchased receivables.

FCA PRA

4.8.2 **G** Purchased receivables do not form an *IRB exposure class* on their own. For any purchased receivable, the provisions of the sections of ■ BIPRU 4 that deal with the *IRB exposure class* to which it belongs also apply, as modified by this section.

FCA PRA

[Note: BCD Annex VII Part 4 point 15 (part)]

Structure of rating systems

4.8.3 **R** For *retail exposure* that are purchased receivables, the grouping referred to in ■ BIPRU 4.6.9 R must reflect the seller's underwriting practices and the heterogeneity of its customers.

FCA PRA

Risk quantification: Overall requirements for estimation: General

4.8.4 **G** Further general material about the requirements for estimation can be found in ■ BIPRU 4.3.73 R - ■ BIPRU 4.3.94 R.

FCA PRA

4.8.5 **R** The estimates for determining the risk parameters *PD*, *LGD*, *conversion factor* and *EL* must reflect all relevant information available to the purchasing *firm* regarding the quality of the underlying receivables, including data for similar pools provided by the seller, by the purchasing *firm*, or by external sources. The purchasing *firm* must evaluate any data relied upon which is provided by the seller.

FCA PRA

[Note: BCD Annex VII Part 4 point 53]

Risk quantification: Overall requirements for estimation: Requirements specific to PD estimation

4.8.6 **R** With respect to ■ BIPRU 4.6.26 R (Internal and external data for PD estimation: retail exposures) a *firm* may use external and internal reference data for *PD* estimation. A *firm* must use all relevant data sources as points of comparison.

FCA PRA

[Note: BCD Annex VII Part 4 point 69 (part)]

4.8.7 **R** For *corporate exposure* purchased receivables a *firm* may estimate *ELs* by obligor grade from long run averages of one-year realised *default* rates.

FCA PRA

[Note: BCD Annex VII Part 4 point 60]

4.8.8 **R** If a *firm* derives long run average estimates of *PDs* and *LGDs* for *corporate exposure* purchased receivables from an estimate of *EL*, and an appropriate estimate of *PD* or *LGD*, the process for estimating total losses must meet the overall standards for estimation of *PD* and *LGD* set out in the *minimum IRB standards*, and the outcome must be consistent with the concept of *LGD* as set out in ■ BIPRU 4.3.99 R.

FCA PRA

[Note: BCD Annex VII Part 4 point 61]

Risk quantification: Overall requirements for estimation: Requirements specific to own-LGD estimates

4.8.9 **R** A *firm* may use external and internal reference data for its *LGD* estimates in the case of *retail exposures* that are purchased receivables.

FCA PRA

[Note: BCD Annex VII Part 4 point 85]

Risk quantification: Overall requirements for estimation: Minimum requirements for purchased receivables: General

4.8.10 **R** ■ BIPRU 4.8.11 R - ■ BIPRU 4.8.15 R set out minimum requirements specific to the treatment of purchased receivables under the *IRB approach*.

FCA PRA

Risk quantification: Overall requirements for estimation: Minimum requirements for purchased receivables: Legal certainty

4.8.11 **R** The structure of the facility must ensure that under all foreseeable circumstances a *firm* has effective ownership and control of all cash remittances from the receivables. When the obligor makes payments directly to a seller or servicer a *firm* must verify regularly that payments are forwarded completely and within the contractually agreed terms. Servicer means an entity that manages a pool of purchased receivables or the underlying credit *exposures* on a day-to-day basis. A *firm* must have procedures to ensure that ownership over the receivables and cash receipts is protected against bankruptcy stays or legal challenges that could materially delay the lender's ability to liquidate or assign the receivables or retain control over cash receipts.

FCA PRA

[Note: BCD Annex VII Part 4 point 105]

Risk quantification: Overall requirements for estimation: Minimum requirements for purchased receivables: Effectiveness of monitoring systems

4.8.12 **R** (1) A *firm* must monitor both the quality of the purchased receivables and the financial condition of the seller and servicer.

FCA PRA

In particular a *firm* must comply with the remaining provisions of this *rule*.

- (2) A *firm* must assess the correlation among the quality of the purchased receivables and the financial condition of both the seller and servicer, and have in place internal policies and procedures that provide adequate safeguards to protect against such contingencies, including the assignment of an internal risk rating for each seller and servicer.
- (3) A *firm* must have clear and effective policies and procedures for determining seller and servicer eligibility. A *firm* or its agent must conduct periodic reviews of sellers and servicers in order to verify the accuracy of reports from the seller or servicer, detect fraud or operational weaknesses, and verify the quality of the seller's credit policies and servicer's collection policies and procedures. The findings of these reviews must be documented.
- (4) A *firm* must assess the characteristics of the purchased receivables pools including:
 - (a) over-advances;
 - (b) history of the seller's arrears, bad debts, and bad debt allowances;
 - (c) payment terms; and
 - (d) potential contra accounts.
- (4) A *firm* must have effective policies and procedures for monitoring on an aggregate basis single-obligor concentrations both within and across purchased receivables pools.
- (5) A *firm* must ensure that it receives from the servicer timely and sufficiently detailed reports of receivables ageings and dilutions to ensure compliance with the *firm's* eligibility criteria and advancing policies governing purchased receivables, and provide an effective means with which to monitor and confirm the seller's terms of sale and dilution.

[Note: BCD Annex VII Part 4 point 106]

Risk quantification: Overall requirements for estimation: Minimum requirements for purchased receivables: Effectiveness of work-out systems

A *firm* must have systems and procedures for detecting deteriorations in the seller's financial condition and purchased receivables quality at an early stage, and for addressing emerging problems proactively. In particular a *firm* must have clear and effective policies, procedures, and information systems to monitor covenant violations, and clear and effective policies

and procedures for initiating legal actions and dealing with problem purchased receivables.

[Note: BCD Annex VII Part 4 point 107]

Risk quantification: Overall requirements for estimation: Minimum requirements for purchased receivables: Effectiveness of systems for controlling collateral, credit availability and cash

4.8.14

FCA PRA

R

A *firm* must have clear and effective policies and procedures governing the control of purchased receivables, credit, and cash. In particular, written internal policies must specify all material elements of the receivables purchase programme, including the advancing rates, eligible collateral, necessary documentation, concentration limits, and the way cash receipts are to be handled. These elements must take appropriate account of all relevant and material factors, including the seller's and servicer's financial condition, risk concentrations, and trends in the quality of the purchased receivables and the seller's customer base, and internal systems must ensure that funds are advanced only against specified supporting collateral and documentation.

[Note: BCD Annex VII Part 4 point 108]

Risk quantification: Overall requirements for estimation: Minimum requirements for purchased receivables: Compliance with the firm's internal policies and procedures

4.8.15

FCA PRA

R

A *firm* must have an effective internal process for assessing compliance with all internal policies and procedures. The process must include regular audits of all critical phases of the *firm's* receivables purchase programme, verification of the separation of duties between, firstly, the assessment of the seller and servicer and the assessment of the obligor and, secondly, between the assessment of the seller and servicer and the field audit of the seller and servicer and evaluations of back office operations, with particular focus on qualifications, experience, staffing levels, and supporting automation systems.

[Note: BCD Annex VII Part 4 point 109]

Calculation of risk-weighted asset amounts: Eligibility for different treatments: Corporate exposures

4.8.16

FCA PRA

R

For its *corporate exposure* purchased receivables a *firm* must comply with the minimum requirements set out in ■ BIPRU 4.8.11 R - ■ BIPRU 4.8.15 R. For *corporate exposure* purchased receivables that comply in addition with the conditions set out in ■ BIPRU 4.8.18 R, and where it would be unduly burdensome for a *firm* to use the risk quantification standards for *corporate exposures* as set out in the *minimum IRB standards* for these receivables, the risk quantification standards for *retail exposures* as set out in the *minimum IRB standards* may be used.

[Note: BCD Annex VII Part 1 point 7]

4.8.17

FCA PRA

R

For *corporate exposure* purchased receivables, refundable purchase discounts, collateral or partial guarantees that provide first-loss protection for *default losses*, *dilution losses*, or both, may be treated as first-loss positions under the provisions in ■ BIPRU 9 (Securitisation) about the *IRB approach*.

[Note: BCD Annex VII Part 1 point 8]

Calculation of risk weighted asset amounts: Eligibility for different treatments: Retail exposures

4.8.18

FCA PRA

R

To be eligible for the *retail exposure* treatment purchased receivables must comply with the minimum requirements set out in ■ BIPRU 4.8.11 R - ■ BIPRU 4.8.15 R and the following conditions:

- (1) the *firm* has purchased the receivables from unrelated, third party sellers, and its *exposure* to the obligor of the receivable does not include any *exposures* that are directly or indirectly originated by the *firm* itself;
- (2) the purchased receivables must be generated on an arm's-length basis between the seller and the obligor (and as such, intercompany accounts receivables and receivables subject to contra-accounts between firms that buy and sell to each other are ineligible);
- (3) the purchasing *firm* has a claim on all proceeds from the purchased receivables or a pro-rata interest in the proceeds; and
- (4) the portfolio of purchased receivables is sufficiently diversified.

[Note: BCD Annex VII Part 1 point 14]

4.8.19

FCA PRA

R

With respect to *retail exposures*, for purchased receivables, refundable purchase discounts, collateral or partial guarantees that provide first-loss protection for *default losses*, *dilution losses*, or both, may be treated as first-loss positions under the provisions in ■ BIPRU 9 (Securitisation) about the *IRB approach*.

[Note: BCD Annex VII Part 1 point 15]

4.8.20

FCA PRA

R

For hybrid pools of purchased *retail exposure* receivables where the purchasing *firm* cannot separate *exposures* secured by real estate collateral and *qualifying revolving retail exposures* from other *retail exposures*, the retail *risk weight* function producing the highest capital requirements for those *exposures* must apply.

[Note: BCD Annex VII Part 1 point 16]

4.8.21

FCA PRA

R

Calculation of risk weighted asset amounts for dilution risk

The *risk weights* for *dilution risk* for purchased receivables (both *corporate exposures* and *retail exposures*) must be calculated according to this *rule*. The *risk weights* must be calculated according to the formula in ■ BIPRU 4.4.58 R. However, for the purposes of that formula, the total annual sales referred to in ■ BIPRU 4.4.59 R are the weighted average by individual *exposures* of the pool. The input parameters *PD* and *LGD* and the *exposure* value must be determined under the applicable provisions of ■ BIPRU 4 as modified by this section. *M* (maturity) must be 1 year. However:

- (1) a *firm* need not recognise *dilution risk* if its *IRB permission* permits this; and
- (2) (in the case of a *firm* with an *IRB permission* that permits the treatment of *dilution risk* in (1)) the *firm* must be able to convince the *appropriate regulator* that *dilution risk* is immaterial.

[Note: BCD Article 87(2) (part) and Annex VII Part 1 point 28]

4.8.22

FCA PRA

R

Calculation of risk weighted exposure amounts: PDs

For purchased *corporate exposure* receivables in respect of which a *firm* cannot demonstrate that its *PD* estimates meet the *minimum IRB standards*, the *PDs* for these *exposures* must be determined according to the following methods:

- (1) for senior claims on purchased *corporate exposure* receivables *PD* must be the *firm's* estimate of *EL* divided by *LGD* for these receivables;
- (2) for subordinated claims on purchased *corporate exposure* receivables *PD* must be the *firm's* estimate of *EL*; and
- (3) if a *firm* is under its *IRB permission* using the *advanced IRB approach* for *LGD* estimates for *corporate exposures* and it can decompose its *EL* estimates for purchased *corporate exposure* receivables into *PDs* and *LGDs* in a reliable manner, the *LGD* estimate may be used.

[Note: BCD Annex VII Part 2 point 3]

4.8.23

FCA PRA

R

In the case of *corporate exposures*, for *dilution risk* of purchased receivables *PD* must be set equal to *EL* estimate for *dilution risk*. If a *firm* is under its *IRB permission* using the *advanced IRB approach* for *LGD* estimates for *corporate exposures* and it can decompose its *EL* estimates for *dilution risk* of purchased *corporate exposure* receivables into *PDs* and *LGDs* in a reliable manner, the *PD* estimate may be used. A *firm* may recognise *unfunded credit protection* in the *PD* in accordance with the provisions of ■ BIPRU 9 and ■ BIPRU 5 as modified by

■ BIPRU 4.10. A *firm* may recognise those *unfunded credit protection* providers set out in its *IRB permission* in addition to those indicated in the *CRM eligibility conditions*. Where a *firm's IRB permission* allows it to use its own *LGD* estimates for *dilution risk* of purchased corporate receivables, the *firm* may recognise *unfunded credit protection* by adjusting *PDs* subject to the provisions of ■ BIPRU 4.4.43 R.

[Note: BCD Annex VII Part 2 point 7]

4.8.24

FCA PRA

R

In the case of *retail exposures*, for *dilution risk* of purchased receivables *PD* must be set equal to *EL* estimates for *dilution risk*. If a *firm* can decompose its *EL* estimates for *dilution risk* of purchased receivables into *PDs* and *LGDs* in a reliable manner, the *PD* estimate may be used.

[Note: BCD Annex VII Part 2 point 19]

Calculation of risk weighted asset amounts: LGDs: Corporate exposures

4.8.25

FCA PRA

R

The following *LGD* values apply for purchased *corporate exposure* receivables:

- (1) for senior purchased *corporate exposure* receivables *exposures* where a *firm* cannot demonstrate that its *PD* estimates meet the *minimum IRB standards*, the value is 45%;
- (2) for subordinated purchased *corporate exposure* receivables *exposures* where a *firm* cannot demonstrate that its *PD* estimates meet the *minimum IRB standards*, the value is 100%; and
- (3) for *dilution risk* of purchased *corporate exposure* receivables, the value is 75%.

[Note: BCD Annex VII Part 2 point 8(e) to (g)]

4.8.26

FCA PRA

R

Notwithstanding ■ BIPRU 4.4.34 R and ■ BIPRU 4.8.25 R, for *dilution risk* and *default risk* if a *firm* is under its *IRB permission* using the *advanced IRB approach* for *LGD* estimates for *corporate exposures* and it can decompose its *EL* estimates for purchased *corporate exposure* receivables into *PDs* and *LGDs* in a reliable manner, the *LGD* estimate for purchased *corporate exposure* receivables may be used.

[Note: BCD Annex VII Part 2 point 9]

Calculation of risk weighted asset amounts: LGDs: Retail exposures

PAGE
105

4.8.27

FCA PRA

R

For *dilution risk* of purchased *retail exposure* receivables an *LGD* value of 75% must be used. If a *firm* can decompose its *EL* estimates for *dilution risk* of purchased receivables into *PDs* and *LGDs* in a reliable manner, the *LGD* estimate may be used.

[Note: BCD Annex VII Part 2 point 21]

Calculation of risk weighted asset amounts: Exposure value

4.8.28

FCA PRA

R

The *exposure* value for the calculation of *risk weighted exposure amounts* of purchased receivables must be the outstanding amount minus the capital requirements for *dilution risk* prior to *credit risk mitigation*.

[Note: BCD Annex VII Part 3 point 6]

4.8.29

FCA PRA

R

- (1) The *exposure* value for the items in (2) must be calculated as the committed but undrawn amount multiplied by a *conversion factor*.
- (2) For undrawn purchase commitments for revolving purchased receivables that are unconditionally cancellable or that effectively provide for automatic cancellation at any time by the *firm* without prior notice, a *conversion factor* of 0% applies. To apply a *conversion factor* of 0%, a *firm* must actively monitor the financial condition of the obligor, and its internal control systems must enable it immediately to detect a deterioration in the credit quality of the obligor.

[Note: BCD Annex VII Part 3 point 9 (c)]

Calculation of expected loss amounts

4.8.30

FCA PRA

R

The *expected loss* amounts for *dilution risk* of purchased receivables must be calculated according to the following formula:

expected loss (EL) = $PD \times LGD$; and
expected loss amount = $EL \times exposure\ value$.

[Note: BCD Article 88(5) and Annex VII Part 1 point 35]

4.9 The IRB approach: Securitisation, non-credit obligations assets and CIUs

Application

4.9.1

R

FCA PRA

BIPRU 4.9 applies with respect to *securitisation exposures, non credit-obligation assets and exposures to CIUs*.

Securitisation exposures

4.9.2

R

FCA PRA

The following must be calculated in accordance with ■ BIPRU 9 (Securitisation):

- (1) *risk-weighted exposure amounts for securitised exposures and for exposures belonging to the IRB exposure class referred to in ■ BIPRU 4.3.2 R (6) (securitisation positions); and*
- (2) *the expected loss amounts for securitised exposures.*

[Note: BCD Article 87(10) and Article 88(3)]

Provision of credit protection

4.9.3

R

FCA PRA

Where a *firm* provides credit protection for a number of *exposures* under terms that the *n*th default among the *exposures* shall trigger payment and that this credit event shall terminate the contract, if the product has an external credit assessment from an *eligible ECAI* the *risk weights* set out in ■ BIPRU 9 must be applied. If the product is not rated by an *eligible ECAI*, the *risk weights* of the *exposures* included in the basket must be aggregated, excluding *n-1 exposures* where the sum of the *expected loss* amount multiplied by 12.5 and the *risk weighted exposure amount* must not exceed the nominal amount of the protection provided by the credit derivative multiplied by 12.5. The *n-1 exposures* to be excluded from the aggregation must be determined on the basis that they must include those *exposures* each of which produces a lower *risk weighted exposure amount* than the *risk weighted exposure amount* of any of the *exposures* included in the aggregation.

[Note: BCD Annex VII Part 1 point 9]

4.9.4

FCA PRA

R

Non credit obligation assets: Introduction

■ BIPRU 4.9.5 R-■ BIPRU 4.9.10 R apply to *non credit-obligation assets*.

4.9.5

FCA PRA

R

Non credit obligation assets: Inclusion of residual value of leases

The *non credit obligation asset IRB exposure class* includes the residual value of leased properties, if not included in the lease *exposure* as defined in ■ BIPRU 4.4.75 R.

[Note: BCD Article 86(8)]

4.9.6

FCA PRA

R

Non credit obligation assets: Risk weighted exposure amount

The *risk weighted exposure amounts* must be calculated according to the formula:

Risk-weighted exposure amount = 100% * *exposure* value except for when the *exposure* is a residual value of leased properties in which case it must be calculated as follows:

$1/t * 100\% * \textit{exposure}$ value; where t is the greater of 1 and the nearest number of whole years of the lease remaining.

[Note: BCD Annex VII Part 1 point 27]

4.9.7

FCA PRA

G

t should be an integer number reflecting the nearest number of whole years of the lease remaining and should decrease as the lease matures so that the discounted value steps up gradually from a small value to 100% as the end of the lease approaches.

4.9.8

FCA PRA

R

Where a *firm* has full recourse in respect of purchased receivables for *default risk* and for *dilution risk*, to the seller of the purchased receivables, ■ BIPRU 4.8.21 R and ■ BIPRU 4.8.30 R need not be applied. The *exposure* may instead be treated as a collateralised *exposure*.

[Note: BCD Article 87(2) (part)]

4.9.9

FCA PRA

R

Non credit obligation assets: Exposure value

The *exposure* value of *non credit-obligation assets* must be the value presented in the financial statements.

[Note: BCD Annex VII Part 3 point 13]

4.9.10

FCA PRA

R

Non credit obligation assets: Expected loss amounts

For *non credit-obligation assets* the *expected loss* amount must be zero.

[Note: BCD Article 88(4)]

4.9.11

FCA PRA

R

Collective investment undertakings

- (1) Where *exposures* in the form of a *CIU* meet the criteria set out in ■ BIPRU 3.4.121 R to ■ BIPRU 3.4.122 R (Conditions for look through treatment under the standardised approach) and the *firm* is aware of all of the underlying *exposures* of the *CIU*, the *firm* must look through to those underlying *exposures* in order to calculate *risk weighted exposure amounts* and *expected loss* amounts in accordance with the methods set out in ■ BIPRU 4. ■ BIPRU 4.9.12 R applies to the part of the underlying *exposures* of the *CIU* of which the *firm* is not aware or could not reasonably be aware. In particular, ■ BIPRU 4.9.12 R must apply where it would be unduly burdensome for the *firm* to look through the underlying *exposures* in order to calculate *risk weighted exposure amounts* and *expected loss* amounts in accordance with methods set out in this *rule*.
- (2) Where (1) applies but a *firm* does not meet the conditions for using the methods set out in ■ BIPRU 4 for all or part of the underlying *exposures* of the *CIU*, *risk weighted exposure amounts* and *expected loss* amounts must be calculated in accordance with the following approaches.
- (3) For *equity exposures* the approach set out in ■ BIPRU 4.7.9 R - ■ BIPRU 4.7.12 R (Simple risk weights) must be used. If, for those purposes, the *firm* is unable to differentiate between private equity, exchange-traded and other *equity exposures*, it must treat the *exposures* concerned as other *equity exposures*.
- (4) For all other underlying *exposures*, the *standardised approach* must be used, subject to the following modifications:
 - (a) [deleted]
 - (b) [deleted]
 - (c) for *exposures* subject to a specific *risk weight* for unrated *exposures* or subject to the *credit quality step* yielding the highest *risk weight* for a given exposure class, the *risk weight* must be multiplied by a factor of two, but cannot be higher than 1250%; and
 - (d) for all other *exposures*, the *risk weight* must be multiplied by a factor of 1.1 and subject to a minimum of 5%.

[Note: BCD Article 87(11)]

PAGE
109

4.9.12

FCA PRA

R

- (1) Where *exposures* in the form of a *CIU* do not meet the criteria set out in ■ BIPRU 3.4.121 R to ■ BIPRU 3.4.122 R (Conditions for look through treatment under the standardised approach) or the *firm* is not aware of all of the underlying *exposures* of the *CIU*, a *firm* must look through to the underlying *exposures* and calculate *risk*

weighted exposure amounts and expected loss amounts in accordance with the approach set out in ■ BIPRU 4.7.9 R - ■ BIPRU 4.7.12 R (Simple risk weights). If, for those purposes, the *firm* is unable to differentiate between private equity, exchange-traded and other *equity exposures*, it must treat the *exposures* concerned as other *equity exposures*. For these purposes, non-equity *exposures* must be assigned to one of the classes (private equity, exchange traded equity or other equity) set out in ■ BIPRU 4.7.9 R (Simple risk weight approach) and unknown *exposures* must be assigned to the other equity class.

- (2) Alternatively to the method described in (1), a *firm* may calculate itself or rely on a third party to calculate and report the average *risk weighted exposure amounts* based on the *CIU's* underlying *exposures* and calculated in accordance with the approaches in ■ BIPRU 4.9.11R (3) to ■ BIPRU 4.9.11R (4), provided that the correctness of the calculation and the report is adequately ensured.
- (3) [deleted]
- (4) [deleted]
- (a) [deleted]
- (b) [deleted]

[Note: BCD Article 87(12)]

4.9.13

FCA PRA

G

For the purposes of ■ BIPRU 4.9.12 R (1), in the case of non-equity *exposures* a *firm* should look at the risk profile of the underlying *exposures* and map these to an equivalent equity *risk weight*. For example, if the underlying *exposures* are exchange-traded, the *risk weight* of exchange-traded *equity exposures* will apply. If the underlying *exposures* are unknown, the *risk weight* of the other equity class will apply. Only under exceptional circumstances would supervisors expect to see non-equity *exposures* mapped to the diversified private equity *risk weight*.

4.9.14

FCA PRA

G

For the purposes of ■ BIPRU 4.9.12 R (2), a *firm* should ensure that any third party relied on for the calculations and report possesses the necessary competence and experience to ensure that the calculations and report are correct.

4.9.15

FCA PRA

R

The *expected loss amounts* for *exposures* referred to in ■ BIPRU 4.9.11 R - ■ BIPRU 4.9.12 R must be calculated in accordance with the methods set out in ■ BIPRU 4.4.61 R (Calculation of expected loss for sovereigns, institutions and corporates), ■ BIPRU 4.5.12 R - ■ BIPRU 4.5.14 R (Calculation of expected loss for specialised lending), ■ BIPRU 4.6.47 R - ■ BIPRU 4.6.48 R (Calculation of expected loss for retail exposures), ■ BIPRU 4.7.12 R, ■ BIPRU 4.7.17 R and ■ BIPRU 4.7.26 R (Calculation of

expected loss for equity exposures) and ■ BIPRU 4.8.30 R (Dilution risk of purchased receivables).

[Note: *BCD* Article 88(6)]

4.10 The IRB approach: Credit risk mitigation

Application

4.10.1

G

■ BIPRU 4.10 applies to all *exposures* treated under the *IRB approach*.

FCA PRA

Purpose

4.10.2

G

■ BIPRU 4.10 sets out modifications to ■ BIPRU 5 (Credit risk mitigation) for those *exposures* for which the *IRB approach* is being used.

FCA PRA

General

4.10.3

R

A *firm* using the *IRB approach*, but not using its own estimates of *LGD* and *conversion factors*, may recognise *credit risk mitigation* in accordance with ■ BIPRU 5 as modified by ■ BIPRU 4.10 in the calculation of *risk weighted exposure amounts* for the purposes of the calculation of the *credit risk capital component* or as relevant *expected loss* amounts for the purposes of the calculation in ■ GENPRU 2.2.191 R to ■ GENPRU 2.2.193 R or ■ GENPRU 2.2.236 R.

FCA PRA

[Note: *BCD Article 91* (as it applies to the *IRB approach*)]

4.10.4

R

- (1) Where the requirements of ■ BIPRU 5.2.2 R - ■ BIPRU 5.2.8 R are met the calculation of *risk weighted exposure amounts*, and, as relevant, *expected loss* amounts, may be modified in accordance with ■ BIPRU 5 as modified by ■ BIPRU 4.10.
- (2) No *exposure* in respect of which *credit risk mitigation* is obtained must produce a higher *risk weighted exposure amount* or *expected loss* amount than an otherwise identical *exposure* in respect of which there is no *credit risk mitigation*.
- (3) Where the *risk weighted exposure amount* already takes account of credit protection under the *IRB approach* the calculation of the credit protection must not be further recognised under ■ BIPRU 5 or ■ BIPRU 4.10.
- (4) Subject to ■ BIPRU 5.2.8 R (Maturity mismatches), ■ BIPRU 5.2.9 R (Combinations of credit risk mitigation in the standardised

FCA PRA

approach) and ■ BIPRU 5.7.27 R to ■ BIPRU 5.7.28 R (Basket credit risk mitigation techniques), where the *CRM eligibility conditions* and the *CRM minimum requirements* are satisfied, the calculation of *risk weighted exposure amounts* and *expected loss* amounts under the *IRB approach* may be modified in accordance with the provisions of ■ BIPRU 5 and ■ BIPRU 4.10 that deal with calculating the effects of credit risk mitigation.

[Note: BCD Article 93 and Annex VIII Part 3 point 1 (as they apply to the *IRB approach*)]

Eligibility of funded credit protection: General

4.10.5

FCA PRA

R

In addition to the collateral set out in ■ BIPRU 5.3.1 R to ■ BIPRU 5.3.2 R, ■ BIPRU 5.4.1 R to ■ BIPRU 5.4.8 R and ■ BIPRU 5.6.1 R (Eligibility of funded credit protection) the provisions of ■ BIPRU 4.10.6 R - ■ BIPRU 4.10.12 R (Eligibility of real estate collateral), ■ BIPRU 4.10.14 R (Eligibility: receivables), ■ BIPRU 4.10.16 R (Eligibility: other physical collateral), and ■ BIPRU 4.10.19 R (Eligibility: leasing), apply where a *firm* calculates *risk weighted exposure amounts* and *expected loss* amounts under the *IRB approach*.

[Note: BCD Annex VIII Part 1 point 12]

Real estate collateral: Types of eligible collateral: General

4.10.6

FCA PRA

R

- (1) Residential real estate property which is or will be occupied or let by the owner or the beneficial owner in the case of personal investment companies and commercial real estate property, that is offices and other commercial premises, may be recognised as eligible collateral where the conditions set out in the remaining provisions of this paragraph are met.
- (2) The value of the property must not materially depend upon the credit quality of the obligor. This requirement does not preclude situations where purely macro-economic factors affect both the value of the property and the performance of the borrower.
- (3) The risk of the borrower must not materially depend upon the performance of the underlying property or project, but rather on the underlying capacity of the borrower to repay the debt from other sources. As such, repayment of the facility must not materially depend on any cash flow generated by the underlying property serving as collateral.

[Note: BCD Annex VIII Part 1 point 13]

4.10.7

FCA PRA

R

The condition in ■ BIPRU 4.10.6 R (3) does not apply to *exposures* secured by residential real estate property situated within the *United Kingdom*.

[Note: BCD Annex VIII Part 1 point 16 (part)]

4.10.8

FCA PRA

G

- (1) Under paragraph 16 of Part 1 of Annex VIII of the *Banking Consolidation Directive*, a *competent authority* may only disapply the condition in ■ BIPRU 4.10.6 R (3) if the *competent authority* has evidence that the relevant market is well-developed and long-established with loss-rates which are sufficiently low to justify such action.
- (2) If the evidence were to change so that the action was no longer justified the *appropriate regulator* would expect to revoke ■ BIPRU 4.10.7 R.

4.10.9

FCA PRA

R

- (1) The condition in ■ BIPRU 4.10.6 R (3) does not apply for *exposures* secured by residential real estate property situated within the territory of another *EEA State*.
- (2) However (1) only applies if and to the extent that the *CRD implementation measures* for that *EEA State* in relation to the *IRB approach* implement the option set out in paragraph 16 of Part 1 of Annex VIII of the *Banking Consolidation Directive* (waiver for residential real estate property) with respect to residential real estate property situated within that *EEA State*. Therefore (1) does not apply if the eligibility to use this treatment under those measures ceases as contemplated under paragraph 18 of Part 1 of Annex VIII of the *Banking Consolidation Directive* (suspension of alternative treatment).

[Note: BCD Annex VIII Part 1 point 16 (part)]

4.10.10

FCA PRA

R

- (1) The condition in ■ BIPRU 4.10.6 R (3) does not apply for commercial real estate property situated within the territory of another *EEA State*.
- (2) However (1) only applies if and to the extent that the *CRD implementation measures* for that *EEA State* in relation to the *IRB approach* implement the option set out in paragraph 17 of Part 1 of Annex VIII of the *Banking Consolidation Directive* (waiver for commercial real estate property) with respect to commercial real estate property situated within that *EEA State*. Therefore (1) does not apply if the eligibility to use this treatment under those measures ceases as contemplated under paragraph 18 of Part 1 of Annex VIII of the *Banking Consolidation Directive* (suspension of alternative treatment).

[Note: BCD Annex VIII Part 1 point 19]

4.10.11

FCA PRA

R

Real estate collateral: Types of eligible collateral: Finnish housing legislation

A *firm* may also recognise as eligible collateral shares in Finnish residential housing companies operating in accordance with the Finnish Housing Company Act of 1991 or subsequent equivalent legislation in respect of residential property which is or will be occupied or let by the owner, as residential real estate collateral, provided that the conditions in ■ BIPRU 4.10.6 R are met.

[Note: BCD Annex VIII Part 1 point 14]

4.10.12

FCA PRA

R

A *firm* may also recognise as eligible collateral shares in Finnish housing companies operating in accordance with the Finnish Housing Company Act of 1991 or subsequent equivalent legislation as commercial real estate collateral, provided that the conditions in ■ BIPRU 4.10.6 R are met.

[Note: BCD Annex VIII Part 1 point 15]

Real estate collateral: Minimum requirements for recognition

4.10.13

FCA PRA

R

For the recognition of real estate collateral: the minimum requirements in ■ BIPRU 3.4.64 R - ■ BIPRU 3.4.73 R must be met with the following adjustments:

- (1) those provisions apply to all real estate collateral eligible under ■ BIPRU 4.10; and
- (2) the minimum frequency of valuation as referred to in ■ BIPRU 3.4.66 R is once every year for commercial real estate.

[Note: BCD Annex VIII Part 2 point 8 (as it applies to the *IRB approach*)]

Receivables: Types of eligible collateral

4.10.14

FCA PRA

R

Amounts receivable linked to a commercial transaction or transactions with an original maturity of less than or equal to one year may be recognised as eligible collateral. Eligible receivables do not include those associated with *securitisations*, sub-participations or credit derivatives or amounts owed by affiliated parties.

[Note: BCD Annex VIII Part 1 point 20]

Receivables: Minimum requirements for recognition

4.10.15

FCA PRA

R

- (1) For the recognition of receivables as collateral the requirements in this paragraph must be met.
- (2) The legal mechanism by which the collateral is provided must be robust and effective and ensure that the lender has clear rights over the proceeds.

- (3) A *firm* must take all steps necessary to fulfil local requirements in respect of the enforceability of security interests. There must be a framework which allows the lender to have a first priority claim over the collateral subject to any claims of preferential creditors provided for in applicable insolvency law.
- (4) A *firm* must have conducted sufficient legal review confirming the enforceability of the collateral arrangements in all relevant jurisdictions.
- (5) The collateral arrangements must be properly documented, with a clear and robust procedure for the timely collection of collateral. A *firm's* procedures must ensure that any legal conditions required for declaring the default of the borrower and timely collection of collateral are observed. In the event of the obligor's financial distress or default, a *firm* must have legal authority to sell or assign the receivables to other parties without consent of the receivables obligors.
- (6) A *firm* must have a sound process for determining the credit risk associated with the receivables. Such a process must include, among other things, analyses of the obligor's business and industry and the types of customers with whom the obligor does business. Where a *firm* relies on the obligor to ascertain the credit risk of the customers, the *firm* must review the obligor's credit practices to ascertain their soundness and credibility.
- (7) The margin between the amount of the *exposure* and the value of the receivables must reflect all appropriate factors, including the cost of collection, concentration within the receivables pool pledged by an individual obligor, and potential concentration risk within the *firm's* total *exposures* beyond that controlled by the *firm's* general methodology. A *firm* must maintain a continuous monitoring process appropriate to the receivables. Additionally, compliance with loan covenants, Environmental restrictions, and other legal requirements must be reviewed on a regular basis.
- (8) The receivables pledged by an obligor must be diversified and not be unduly correlated with the obligor. Where there is material positive correlation, the attendant risks must be taken into account in the setting of margins for the collateral pool as a whole.
- (9) Receivables from affiliates of the obligor (including *subsidiary undertakings* and employees) must not be recognised as risk mitigants.

- (10) A *firm* must have a documented process for collecting receivable payments in distressed situations. The requisite facilities for collection must be in place, even when the *firm* normally looks to the obligor for collections.

[Note: BCD Annex VIII Part 2 point 9]

Other physical collateral: Types of eligible collateral

4.10.16

R

FCA PRA

A *firm* may recognise as eligible collateral a physical item of a type other than those types indicated in ■ BIPRU 4.10.6 R - ■ BIPRU 4.10.12 R (Eligibility of real estate collateral) if its *IRB permission* provides that the *firm* may treat collateral of that type as eligible and if the *firm* is able to demonstrate the following:

- (1) the existence of liquid markets for disposal of the collateral in an expeditious and economically efficient manner;
- (2) the existence of well-established, publicly available market prices for the collateral; and
- (3) there is no evidence that the net prices it receives when collateral is realised deviates significantly from the market prices referred to in (b).

[Note: BCD Annex VIII Part 1 point 21]

4.10.17

G

FCA PRA

If a *firm* wishes to recognise other types of collateral in accordance with ■ BIPRU 4.10.16 R (whether as part of its application for an *IRB permission* or under a variation of its *IRB permission*) it should demonstrate to the *appropriate regulator* how the criteria in ■ BIPRU 4.10.16 R (1) - ■ BIPRU 4.10.16 R (3) have been met with respect to that type of collateral.

Other physical collateral: Minimum requirements for recognition

4.10.18

R

FCA PRA

- (1) If a type of other physical collateral referred to in ■ BIPRU 4.10.16 R is potentially eligible under a *firm's IRB permission* a *firm* must only recognise it as eligible if the minimum requirements in (2) to (10) are met.
- (2) The collateral arrangement must be legally effective and enforceable in all relevant jurisdictions and must enable the *firm* to realise the value of the property within a reasonable timeframe.
- (3) With the sole exception of permissible prior claims referred to in ■ BIPRU 4.10.15 R (3), only first liens on, or charges over, collateral must be permissible. As such, the *firm* must have priority over all other lenders to the realised proceeds of the collateral.

- (4) The value of the property must be monitored on a frequent basis and at a minimum once every year. More frequent monitoring must be carried out where the market is subject to significant changes in conditions.
- (5) The loan agreement (or other agreement documenting the *exposure*) must include detailed descriptions of the collateral plus detailed specifications of the manner and frequency of revaluation.
- (6) The types of physical collateral accepted by the *firm* and policies and practices in respect of the appropriate amount of each type of collateral relative to the *exposure* amount must be clearly documented in internal credit policies and procedures available for examination.
- (7) The *firm's* credit policies with regard to the transaction structure must address appropriate collateral requirements relative to the *exposure* amount, the ability to liquidate the collateral readily, the ability to establish objectively a price or market value, the frequency with which the value can readily be obtained (including a professional appraisal or valuation), and the volatility or a proxy of the volatility of the value of the collateral.
- (8) Both initial valuation and revaluation must take fully into account any deterioration or obsolescence of the collateral. Particular attention must be paid in valuation and revaluation to the effects of the passage of time on fashion- or date-sensitive collateral.
- (9) The *firm* must have the right to inspect the property physically. It must have policies and procedures addressing its exercise of the right to physical inspection.
- (10) The *firm* must have procedures to monitor that the property taken as protection is adequately insured against damage.

[Note: BCD Annex VIII Part 2 point 10]

Leasing: Types of eligible transactions and conditions of eligibility

- (1) Where the requirements set out in this paragraph are met, *exposures* arising from transactions whereby a *firm* leases property to a third party must be treated the same as loans collateralised by the type of property leased.
- (2) For the *exposures* arising from leasing transactions to be treated as collateralised by the type of property leased, the following conditions must be met:

4.10.19

FCA PRA

R

PAGE
118

- (a) the conditions set out or referred to in ■ BIPRU 4.10.13 R or ■ BIPRU 4.10.18 R as appropriate for the recognition as collateral of the type of property leased are met;
- (b) there is robust risk management on the part of the lessor with respect to the use to which the leased asset is put, its age, and planned duration of its use, including appropriate monitoring of the value of the security;
- (c) there is in place a robust legal framework establishing the lessor's legal ownership of the asset and its ability to exercise its rights as owner in a timely fashion; and
- (d) where this has not already been ascertained in calculating the *LGD* level, the difference between value of the unamortised amount and the market value of the security must not be so large as to overstate the *credit risk mitigation* attributed to the leased assets.

[Note: *BCD* Annex VIII Part 1 point 22 and Part 2 point 11]

Calculating risk-weighted exposure amounts and expected loss amounts for funded credit risk mitigation: Introduction

4.10.20

FCA PRA

R

■ BIPRU 4.10.21 R - ■ BIPRU 4.10.37 R and ■ BIPRU 4.10.49 R set out how the calculation of *risk weighted exposure amounts* and *expected loss* amounts under ■ BIPRU 4.1 - ■ BIPRU 4.9 may be modified to take into account *credit risk mitigation* that meets the *CRM eligibility conditions* and the *CRM minimum requirements*.

Calculating risk weighted exposure amounts and expected loss amounts for funded credit risk mitigation: Valuation: Receivables

4.10.21

FCA PRA

R

The value of receivables for the purpose of calculating the effect of *credit risk mitigation* must be the amount receivable.

[Note: *BCD* Annex VIII Part 3 point 66]

Calculating risk weighted exposure amounts and expected loss amounts for funded credit risk mitigation: Valuation: Other physical collateral

4.10.22

FCA PRA

R

Physical collateral recognised as eligible as described in ■ BIPRU 4.10.16 R must be valued for the purpose of calculating the effect of *credit risk mitigation* at its market value. Market value is the estimated amount for which the property would exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction.

[Note: *BCD* Annex VIII Part 3 point 67]

Calculating risk weighted exposure amounts and expected loss amounts: General treatment

- 4.10.23** **R** ■ BIPRU 4.10.24 R - ■ BIPRU 4.10.29 R apply to collateral in the form of real estate collateral, receivables, other physical collateral and leasing permitted by ■ BIPRU 4.10 and *exposures* secured by such collateral.
FCA **PRA**
- 4.10.24** **R** LGD* (the effective *loss given default*) calculated as set out in ■ BIPRU 4.10.25 R - ■ BIPRU 4.10.28 R must be taken as the *LGD*.
FCA **PRA**
- [Note: BCD Annex VIII Part 3 point 68]
- 4.10.25** **R** Where the ratio of the value of the collateral (C) to the *exposure* value (E) is below a threshold level of C* (the required minimum collateralisation level for the *exposure*) as laid down in ■ BIPRU 4.10.28 R, LGD* must be the *LGD* laid down in the other sections of ■ BIPRU 4 for uncollateralised *exposures* to the counterparty. For this purpose, the *exposure* value of items listed in ■ BIPRU 4.4.37 R to ■ BIPRU 4.4.39 R and ■ BIPRU 4.8.29 R must be calculated using a *conversion factor* or percentage of 100% rather than the *conversion factors* or percentages indicated in those rules.
FCA **PRA**
- [Note: BCD Annex VIII Part 3 point 69]
- 4.10.26** **R** Where the ratio of the value of the collateral to the *exposure* value exceeds a second, higher threshold level of C** (i.e. the required level of collateralisation to receive full *LGD* recognition) as laid down in ■ BIPRU 4.10.28 R, LGD* must be that prescribed in that table.
FCA **PRA**
- [Note: BCD Annex VIII Part 3 point 70]
- 4.10.27** **R** Where the required level of collateralisation C** is not achieved in respect of the *exposure* as a whole, the *exposure* must be considered to be two *exposures* - that part in respect of which the required level of collateralisation C** is achieved and the remainder.
FCA **PRA**
- [Note: BCD Annex VIII Part 3 point 71]

4.10.28

R

Table: Minimum LGD for secured portion of exposures

FCA PRA

This table belongs to ■ BIPRU 4.10.24 R - ■ BIPRU 4.10.27 R

	LGD* for senior claims or contingent claims	LGD* for subordinated claims or contingent claims	Required minimum collateralisation level of the exposure (C*)	Required minimum collateralisation level of the exposure (C**)
Receivables	35%	65%	0%	125%
Residential real estate/commercial real estate	35%	65%	30%	140%
Other collateral	40%	70%	30%	140%

[Note: BCD Annex VIII Part 3 point 72 (part)]

Calculating risk weighted exposure amounts and expected loss amounts for funded credit risk mitigation: Alternative treatment for real estate collateral

4.10.29

R

FCA PRA

- (1) A firm may apply the treatment in paragraph 74 of Part 3 of Annex VIII of the *Banking Consolidation Directive* (50% risk weight for exposures secured by real estate) in respect of exposures collateralised by:
 - (a) residential real estate property; or
 - (b) commercial real estate property; located in the territory of another *EEA State*.
- (2) However (1)(a) or (1)(b) only applies if the *CRD implementing measures* for that *EEA State* with respect to the *IRB approach* have implemented the option set out in the provision of the *Banking Consolidation Directive* referred to in (1) with respect to the relevant category of real estate property situated within that *EEA State*.
- (3) The use of the treatment in (1) with respect to property in another *EEA State* must be subject to the same conditions as apply under the relevant *CRD implementation measures* for that *EEA State*.

[Note: BCD Annex VIII Part 3 point 75]

Calculating risk weighted exposure amounts and expected loss amounts: Mixed pools of collateral

4.10.30

FCA PRA

R

- (1) Where:
- (a) *risk weighted exposure amounts* and *expected loss amounts* are calculated under the *IRB approach*; and
 - (b) an *exposure* is collateralised by both financial collateral and other eligible collateral;
- LGD* to be taken as the *LGD* for the purposes of the *IRB approach* must be calculated in accordance with this *rule*.
- (2) A *firm* must subdivide the volatility-adjusted value of the *exposure* (i.e. the value after the application of the volatility adjustment as set out in ■ BIPRU 5.4.28 R (Volatility adjustments under the financial collateral comprehensive method) into parts each covered by only one type of collateral. That is, the *firm* must divide the *exposure* into the part covered by eligible financial collateral, the part covered by receivables, the parts covered by commercial real estate property collateral and/or residential real estate property collateral, the part covered by other eligible collateral, and the unsecured part, as relevant.
- (3) LGD* for each part of *exposure* must be calculated separately in accordance with the relevant provisions of ■ BIPRU 5 (Credit risk mitigation) and ■ BIPRU 4.10.

[Note: BCD Annex VIII Part 3 points 76 to 78]

Calculating risk weighted exposure amounts and expected loss amounts for funded credit risk mitigation: Other modifications of the rules on credit risk mitigation: Financial collateral simple method

4.10.31

FCA PRA

R

The *financial collateral simple method* must not be used under the *IRB approach*.

[Note: BCD Annex VIII Part 3 point 24 (part)]

Calculating risk weighted exposure amounts and expected loss amounts for funded credit risk mitigation: Other modifications of the rules on credit risk mitigation: Master netting agreements

4.10.32

FCA PRA

R

- (1) This *rule* sets out how the calculations under ■ BIPRU 5.6.11 R (Using the supervisory volatility adjustments or the own estimates volatility adjustments approaches to master netting agreements covering repurchase transactions and/or securities or commodities lending or borrowing transactions and/or other capital market driven transactions) must be modified under the *IRB approach*.

- (2) Where *risk weighted exposure amounts* and *expected loss* amounts are calculated under the *IRB approach*, E is the *exposure* value for each separate *exposure* under the agreement referred to in the provisions listed in (1) that would apply in the absence of the credit protection.

[Note: BCD Annex VIII Part 3 point 11 (as it applies to the *IRB approach*)]

4.10.33

FCA PRA

R

- (1) This *rule* sets out how the calculations under ■ BIPRU 5.6.24 R (Using the internal models approach to master netting agreements covering repurchase transactions and/or securities or commodities lending or borrowing transactions and/or other capital market driven transactions) must be modified under the *IRB approach*.
- (2) Where *risk weighted exposure amounts* and *expected loss* amounts are calculated under the *IRB approach* E is the *exposure* value for each separate *exposure* under the agreement referred to in the provisions listed in (1) that would apply in the absence of the credit protection.

[Note: BCD Annex VIII Part 3 point 20 (as it applies to the *IRB approach*)]

4.10.34

FCA PRA

R

- (1) This *rule* sets out how the calculations under ■ BIPRU 5.6.29 R (Calculating risk-weighted exposure amounts and expected loss amounts for master netting agreements covering repurchase transactions and/or securities or commodities lending or borrowing transactions and/or other capital market driven transactions) must be modified under the *IRB approach*.
- (2) E* must be taken as the *exposure* value of the *exposure* to the counterparty arising from the transactions subject to the master netting agreement referred to in the provisions listed in (1) for the purposes of ■ BIPRU 4.

[Note: BCD Annex VIII Part 3 point 23 (as it applies to the *IRB approach*)]

Calculating risk weighted exposure amounts and expected loss amounts for funded credit risk mitigation: Other modifications of the rules on credit risk mitigation: Financial collateral comprehensive method

4.10.35

FCA PRA

R

- (1) This *rule* sets out how the calculations under ■ BIPRU 5.4.28 R (Calculating adjusted values under the financial collateral comprehensive method) must be modified under the *IRB approach*.
- (2) E as referred to in the provisions listed in (1) is the *exposure* value as would be determined under the *IRB approach* if the *exposure* was not collateralised. For this purpose, where a *firm* calculates *risk weighted exposure amounts* under the *IRB approach*, the *exposure* value of the items listed in ■ BIPRU 4.4.37 R to ■ BIPRU 4.4.39 R, ■ BIPRU 4.4.45 R, ■ BIPRU 4.6.44 R (3) and

4.10.36

FCA PRA

R

- BIPRU 4.8.29 R must be calculated using a *conversion factor* of 100% rather than the *conversion factors* or percentages indicated in those provisions.
- (1) This *rule* sets out the calculation of *risk weighted exposure amounts* and *expected loss* amounts under the *financial collateral comprehensive method* for a *firm* using the *IRB approach*.
 - (2) LGD* (the effective *loss given default*) calculated as set out in this paragraph must be taken as the *LGD* for the purposes of ■ BIPRU 4.
 - (3) $LGD^* = LGD \times (E^*/E)$ where:
 - (a) *LGD* is the *loss given default* that would apply to the *exposure* under the *IRB approach* if the *exposure* was not collateralised;
 - (b) *E* is the *exposure* value as calculated under ■ BIPRU 4; and
 - (c) *E** is as calculated under ■ BIPRU 5.4.28 R (3) (Calculation of adjusted values under the financial collateral comprehensive method).

[Note: BCD Annex VIII Part 3 point 61]

4.10.37

FCA PRA

R

- (1) In the case of a *firm* using the *IRB approach* to calculate *risk weighted exposure amounts* and *expected loss* amounts, the *persons* in (2) are added to the list in ■ BIPRU 5.4.64 R (Definition of core market participant).
- (2) The *persons* referred to in (1) are other financial companies (including insurance companies) *exposures* to which do not have a credit assessment by an *eligible ECAI* and are internally rated as having a *probability of default* equivalent to that associated with the credit assessments of *ECAIs* that are associated with *credit quality step 2* or above under the *rules* for the *risk weighting* of *exposures* under the *standardised approach* to credit risk.

[Note: BCD Annex VIII Part 3 point 58(h) (as it applies to the *IRB approach*)]

Unfunded credit protection: Eligibility of providers

4.10.38

FCA PRA

R

- (1) In the case of a *firm* using the *IRB approach* in calculating *risk weighted exposure amounts* and *expected loss* amounts, the *persons* in (2) are added to the list in ■ BIPRU 5.7.1 R (List of eligible providers of unfunded credit protection).

- (2) The *persons* referred to in (1) are other corporate entities, including *parent undertakings, subsidiary undertakings* and affiliate corporate entities of the *firm*, that do not have a credit assessment by an *eligible ECAI* and are internally rated as having a *probability of default* equivalent to that associated with the credit assessments of *ECAIs* that are associated with *credit quality step 2* or above under the *rules* for the *risk weighting* of *exposures* under the *standardised approach* to credit risk.

[Note: BCD Annex VIII Part 1 point 26(g)(ii)]

4.10.39

FCA PRA

R

Where *risk weighted exposure amounts* and *expected loss* amounts are calculated under the *IRB approach*, to be eligible a guarantor must be internally rated by a *firm* in accordance with the provisions of the *minimum IRB standards*.

[Note: BCD Annex VIII Part 1 point 27]

Unfunded credit protection: Minimum requirements for assessing the effect of guarantees and credit derivatives: Introduction

4.10.40

FCA PRA

R

■ BIPRU 4.10.41 R to ■ BIPRU 4.10.48 R set out the minimum requirements:

- (1) assessing the effect of guarantees and credit derivatives for:
 - (a) *exposures* in the *sovereign, institution and corporate IRB exposure class* where the *advanced IRB approach* is being used to calculate *LGDs*; and
 - (b) *retail exposures*; and
- (2) additionally, in the case of *retail exposure* guarantees, to the assignment of *exposures* to grades or pools, and the estimation of *PD*.

[Note: BCD Annex VII Part 4 point 97]

4.10.41

FCA PRA

R

The requirements in ■ BIPRU 4.10.40 R (2) and ■ BIPRU 4.10.42 R - ■ BIPRU 4.10.48 R do not apply to guarantees provided by *institutions, central governments, central banks* and other *corporate* entities which meet the requirements in ■ BIPRU 5.7.1 R (7) if the *firm* has received approval under ■ BIPRU 4.2 to apply the *standardised approach* for *exposures* to such entities. In this case the requirements of ■ BIPRU 5 (credit risk mitigation) apply.

[Note: BCD Annex VII Part 4 point 96]

Unfunded credit protection: Minimum requirements for assessing the effect of guarantees and credit derivatives: Eligible guarantors and guarantees

4.10.42

FCA PRA

R

A *firm* must have clearly specified criteria for the types of guarantors it recognises for the calculation of *risk weighted exposure amounts*.

[Note: Annex VII Part 4 point 98]

4.10.43

FCA PRA

R

For recognised guarantors the same requirements as for obligors as set out in ■ BIPRU 4.3.43 R - ■ BIPRU 4.3.48 R (Assignment to grades and pools), ■ BIPRU 4.4.11 R - ■ BIPRU 4.4.18 R and ■ BIPRU 4.4.51 R (Assignment of exposures and rating systems), ■ BIPRU 4.5.6 R (Assignment of exposures) and ■ BIPRU 4.6.11 R and ■ BIPRU 4.6.14 R (Assignment of exposures and rating systems) apply.

[Note: BCD Annex VII Part 4 point 99]

4.10.44

FCA PRA

R

The guarantee must be evidenced in writing, non-cancellable on the part of the guarantor, in force until the obligation is satisfied in full (to the extent of the amount and tenor of the guarantee) and legally enforceable against the guarantor in a jurisdiction where the guarantor has assets to attach and enforce a judgement. Guarantees prescribing conditions under which the guarantor may not be obliged to perform (conditional guarantees) may be recognised if the *IRB permission* permits this. A *firm* must (in the case of a *firm* with an *IRB permission* that permits conditional guarantees) be able to demonstrate to the *appropriate regulator* that the assignment criteria adequately address any potential reduction in the risk mitigation effect.

[Note: BCD Annex VII Part 4 point 100]

Unfunded credit protection: Minimum requirements for assessing the effect of guarantees and credit derivatives: Adjustment criteria

4.10.45

FCA PRA

R

A *firm* must have clearly specified criteria for adjusting grades, pools or *LGD* estimates, and in the case of *retail exposures* and eligible purchased receivables, the process of allocating *exposures* to grades or pools, to reflect the impact of guarantees for the calculation of *risk weighted exposure amounts*. These criteria must comply with the minimum requirements referred to in ■ BIPRU 4.10.43 R.

[Note: BCD Annex VII Part 4 point 101]

4.10.46

FCA PRA

R

The criteria in ■ BIPRU 4.10.45 R must be plausible and intuitive. They must address the guarantor's ability and willingness to perform under the guarantee, the likely timing of any payments from the guarantor, the degree to which the guarantor's ability to perform under the guarantee is correlated with the obligor's ability to repay, and the extent to which residual risk to the obligor remains.

[Note: BCD Annex VII Part 4 point 102]

Unfunded credit protection: Minimum requirements for assessing the effect of guarantees and credit derivatives: Credit derivatives

4.10.47

FCA PRA

R

The minimum requirements for guarantees set out in ■ BIPRU 4.10 also apply for single name credit derivatives. In relation to a mismatch between the underlying obligation and the reference obligation of the credit derivative or the obligation used for determining whether a credit event has occurred the requirements set out under ■ BIPRU 5.7.14 R (Mismatches and credit derivatives) apply. For *retail exposures* and eligible purchased receivables, this paragraph applies to the process of allocating *exposures* to grades or pools.

[Note: BCD Annex VII Part 4 point 103]

4.10.48

FCA PRA

R

The criteria applied by ■ BIPRU 4.10.47 R must address the payout structure of the credit derivative and conservatively assess the impact this has on the level and timing of recoveries. A *firm* must consider the extent to which other forms of residual risk remain.

[Note: BCD Annex VII Part 4 point 104]

Unfunded credit protection: Minimum requirements for assessing the effect of guarantees and credit derivatives: Calculating risk weighted exposure amounts and expected loss amounts

4.10.49

FCA PRA

R

- (1) This *rule* relates to the calculation of *risk-weighted exposure amounts* and *expected loss* amounts in the case of *unfunded credit protection*.
- (2) ■ BIPRU 5.7.21 R (Tranching) applies for the purpose in (1).
- (3) The provisions in (4) replace those in ■ BIPRU 5.7.22 R to ■ BIPRU 5.7.25 R (Calculating risk weighted exposure amounts under the standardised approach in the case of unfunded credit protection).
- (4) For the covered portion of the *exposure* value E (based on the adjusted value of the credit protection G_A), the *PD* for the purposes of ■ BIPRU 4 may be the *PD* of the protection provider, or a *PD* between that of the borrower and that of the guarantor if a full substitution is deemed not to be warranted. In the case of subordinated *exposures* and non-subordinated unfunded protection, the *LGD* to be applied for the purposes of ■ BIPRU 4 may be that associated with senior claims.
- (5) For any uncovered portion of the *exposure* value E the *PD* must be that of the borrower and the *LGD* must be that of the underlying *exposure*.

- (6) G_A is the value of G^* as calculated under ■ BIPRU 5.7.17 R (Valuation of unfunded credit protection) further adjusted for any maturity mismatch as laid down in ■ BIPRU 4.10.51 R (Maturity mismatches).
- (7) E is the *exposure* value as related to the following rules:
 ■ BIPRU 4.4.38 R, ■ BIPRU 4.4.39 R, ■ BIPRU 4.4.71 R to ■ BIPRU 4.4.78 R, ■ BIPRU 4.7.7 R, ■ BIPRU 4.8.28 R, ■ BIPRU 4.8.29 R and ■ BIPRU 4.9.9 R. For this purpose, the *exposure* value of the items referred to in ■ BIPRU 4.4.37 R to ■ BIPRU 4.4.39 R and ■ BIPRU 4.8.29 R must be calculated using a *conversion factor* or percentage of 100% rather than the *conversion factors* or percentages indicated in those rules.

[Note: BCD Annex VIII Part 3 points 90 to 92]

Maturity mismatches

4.10.50

FCA PRA

R

In addition to ■ BIPRU 5.8.2 R, where there is a maturity mismatch the credit protection must not be recognised where the *exposure* is a short term *exposure* specified in the *firm's IRB permission* as being subject to a one-day floor rather than a one-year floor in respect of the maturity value (M) under ■ BIPRU 4.4.68 R.

[Note: BCD Annex VIII Part 4 point 2(b)]

4.10.51

FCA PRA

R

G_A as calculated under ■ BIPRU 5.8.11 R is then taken as the value of the protection for the purposes of calculating the effects of *unfunded credit protection* under the *IRB approach*.

[Note: BCD Annex VIII Part 4 point 8 (part)]

Supervisory Slotting Criteria for Specialised Lending

FCA **PRA**

This Annex outlines the criteria that must be used to slot a *specialised lending exposure* into the categories in **■ BIPRU 4.5.6 R**.

This table belongs to **■ BIPRU 4.5.6 R** and must be used in accordance with that rule only for project finance exposures.

Table 1 - Supervisory Rating Grades for Project Finance Exposures

	Strong	Good	Satisfactory	Weak
Financial strength				
Market conditions	Few competing suppliers or substantial and durable advantage in location, cost, or technology. Demand is strong and growing	Few competing suppliers or better than average location, cost, or technology but this situation may not last. Demand is strong and stable	Project has no advantage in location, cost, or technology. Demand is adequate and stable	Project has worse than average location, cost, or technology. Demand is weak and declining
Financial ratios (e.g. debt service coverage ratio (DSCR), loan life coverage ratio (LLCR), project life coverage ratio (PLCR), and debt-to-equity ratio)	Strong financial ratios considering the level of project risk; very robust economic assumptions	Strong to acceptable financial ratios considering the level of project risk; robust project economic assumptions	Standard financial ratios considering the level of project risk	Aggressive financial ratios considering the level of project risk
Stress analysis	The project can meet its financial obligations under sustained, severely stressed economic or sectoral conditions	The project can meet its financial obligations under normal stressed economic or sectoral conditions. The project is only likely to default under severe economic conditions	The project is vulnerable to stresses that are not uncommon through an economic cycle, and may default in a normal downturn	The project is likely to default unless conditions improve soon

Table 1 - Supervisory Rating Grades for Project Finance Exposures

	Strong	Good	Satisfactory	Weak
Duration of the credit compared to the duration of the project	Useful life of the project significantly exceeds tenor of the loan	Useful life of the project exceeds tenor of the loan	Useful life of the project exceeds tenor of the loan	Useful life of the project may not exceed tenor of the loan
Amortisation schedule	Amortising debt	Amortising debt	Amortising debt repayments with limited bullet payment	Bullet repayment or amortising debt repayments with high bullet repayment
Political and legal environment				
Political risk, including transfer risk, considering project type and mitigants	Very low exposure; strong mitigation instruments, if needed	Low exposure; satisfactory mitigation instruments, if needed	Moderate exposure; fair mitigation instruments	High exposure; no or weak mitigation instruments
Force majeure risk (war, civil unrest, etc)	Low exposure	Acceptable exposure	Standard protection	Significant risks, not fully mitigated
Government support and project's importance for the country over the long term	Project of strategic importance for the country (preferably export-oriented). Strong support from Government	Project considered important for the country. Good level of support from Government	Project may not be strategic but brings unquestionable benefits for the country. Support from Government may not be explicit	Project not key to the country. No or weak support from Government
Stability of legal and regulatory environment (risk of change in law)	Favourable and stable regulatory environment over the long term	Favourable and stable regulatory environment over the medium term	Regulatory changes can be predicted with a fair level of certainty	Current or future regulatory issues may affect the project
Acquisition of all necessary supports and approvals for such relief from local content laws	Strong	Satisfactory	Fair	Weak
Enforceability of contracts, collateral and security	Contracts, collateral and security are enforceable	Contracts, collateral and security are enforceable	Contracts, collateral and security are considered enforceable even if certain	There are unresolved key issues in respect if actual enforcement of

Table 1 - Supervisory Rating Grades for Project Finance Exposures

	Strong	Good	Satisfactory	Weak
Transaction characteristics			non-key issues may exist	contracts, collateral and security
Design and technology risk	Fully proven technology and design	Fully proven technology and design	Proven technology and design - start-up issues are mitigated by a strong completion package	Unproven technology and design; technology issues exist and/or complex design
Permitting and siting	All permits have been obtained	Some permits are still outstanding but their receipt is considered very likely	Some permits are still outstanding but the permitting process is well defined and they are considered routine	Key permits still need to be obtained and are not considered routine. Significant conditions may be attached
Type of construction contract	Fixed-price date-certain turnkey construction EPC (engineering and procurement contract)	Fixed-price date-certain turnkey construction EPC	Fixed-price date-certain turnkey construction contract with one or several contractors	No or partial fixed-price turnkey contract and/or interfacing issues with multiple contractors
Completion guarantees	Substantial liquidated damages supported by financial substance and/or strong completion guarantee from sponsors with excellent financial standing	Significant liquidated damages supported by financial substance and/or completion guarantee from sponsors with good financial standing	Adequate liquidated damages supported by financial substance and/or completion guarantee from sponsors with good financial standing	Inadequate liquidated damages or not supported by financial substance or weak completion guarantees
Track record and financial strength of contractor in constructing similar projects.	Strong	Good	Satisfactory	Weak
Scope and nature of operations and maintenance (O & M) contracts	Strong long-term O&M contract, preferably with contractual performance incentives,	Long-term O&M contract, and/or O&M reserve accounts	Limited O&M contract or O&M reserve account	No O&M contract: risk of high operational cost overruns beyond mitigants

Table 1 - Supervisory Rating Grades for Project Finance Exposures

	Strong	Good	Satisfactory	Weak
Operator's expertise, track record, and financial strength	and/or O&M reserve accounts Very strong, or committed technical assistance of the sponsors	Strong	Acceptable	Limited/weak, or local operator dependent on local authorities
(a) If there is a take-or-pay or fixed-price off-take contract:	Excellent creditworthiness of off-taker; strong termination clauses; tenor of contract comfortably exceeds the maturity of the debt	Good creditworthiness of off-taker; strong termination clauses; tenor of contract exceeds the maturity of the debt	Acceptable financial standing of off-taker; normal termination clauses; tenor of contract generally matches the maturity of the debt	Weak off-taker; weak termination clauses; tenor of contract does not exceed the maturity of the debt
(b) If there is no take-or-pay or fixed-price off-take contract:	Project produces essential services or a commodity sold widely on a world market; output can readily be absorbed at projected prices even at lower than historic market growth rates	Project produces essential services or a commodity sold widely on a regional market that will absorb it at projected prices at historical growth rates	Commodity is sold on a limited market that may absorb it only at lower than projected prices	Project output is demanded by only one or a few buyers or is not generally sold on an organised market
Price, volume and transportation risk of feed-stocks; supplier's track record and financial strength	Long-term supply contract with supplier of excellent financial standing	Long-term supply contract with supplier of good financial standing	Long-term supply contract with supplier of good financial standing - a degree of price risk may remain	Short-term supply contract or long-term supply contract with financially weak supplier - a degree of price risk definitely remains
Reserve risks (e.g. natural resource development)	Independently audited, proven and developed reserves well in excess of requirements over lifetime of the project	Independently audited, proven and developed reserves in excess of requirements over lifetime of the project	Proven reserves can supply the project adequately through the maturity of the debt	Project relies to some extent on potential and undeveloped reserves
Strength of Sponsor				

4

Table 1 - Supervisory Rating Grades for Project Finance Exposures

	Strong	Good	Satisfactory	Weak
Sponsor's track record, financial strength, and country/sector experience	Strong sponsor with excellent track record and high financial standing	Good sponsor with satisfactory track record and good financial standing	Adequate sponsor with adequate track record and good financial standing	Weak sponsor with no or questionable track record and/or financial weaknesses
Sponsor support, as evidenced by equity, ownership clause and incentive to inject additional cash if necessary	Strong. Project is highly strategic for the sponsor (core business - long-term strategy)	Good. Project is strategic for the sponsor (core business - long-term strategy)	Acceptable. Project is considered important for the sponsor (core business)	Limited. Project is not key to sponsor's long-term strategy or core business
Security Package				
Assignment of contracts and accounts	Fully comprehensive	Comprehensive	Acceptable	Weak
Pledge of assets, taking into account quality, value and liquidity of assets	First perfected security interest in all project assets, contracts, permits and accounts necessary to run the project	Perfected security interest in all project assets, contracts, permits and accounts necessary to run the project	Acceptable security interest in all project assets, contracts, permits and accounts necessary to run the project	Little security or collateral for lenders; weak negative pledge clause
Lender's control over cash flow (e.g. cash sweeps, independent escrow accounts)	Strong	Satisfactory	Fair	Weak
Strength of the covenant package (mandatory prepayments, payment deferrals, payment cascade, dividend restrictions...)	Covenant package is strong for this type of project	Covenant package is satisfactory for this type of project	Covenant package is fair for this type of project	Covenant package is Insufficient for this type of project
	Project may issue no additional debt	Project may issue extremely limited additional debt	Project may issue limited additional debt	Project may issue unlimited additional debt
Reserve funds (debt service, O&M, renewal and replacement,	Longer than average coverage period, all reserve funds fully funded in cash or letters	Average coverage period, all reserve funds fully funded	Average coverage period, all reserve funds fully funded	Shorter than average coverage period, reserve funds funded from operating cash flows

Table 1 - Supervisory Rating Grades for Project Finance Exposures

	Strong	Good	Satisfactory	Weak
unforeseen events, of credit from etc) highly rated bank				

This table belongs to ■ BIPRU 4.5.6 R and must be used in accordance with that rule only for income-producing real estate exposures

Table 2 - Supervisory Rating Grades for Income-Producing Real Estate Exposures

	Strong	Good	Satisfactory	Weak
Financial strength				
Market conditions	The supply and demand for the project's type and location are currently in equilibrium. The number of competitive properties coming to market is equal or lower than forecasted demand	The supply and demand for the project's type and location are currently in equilibrium. The number of competitive properties coming to market is roughly equal to forecasted demand	Market conditions are roughly in equilibrium. Competitive properties are coming on the market and others are in the planning stages. The project's design and capabilities may not be state of the art compared to new projects	Market conditions are weak. It is uncertain when conditions will improve and return to equilibrium. The project is losing tenants at lease expiration. New lease terms are less favourable compared to those expiring
Financial ratios and advance rate	The property's debt service coverage ratio (DSCR) is considered strong (DSCR is not relevant for the construction phase) and its loan to value ratio (LTV) is considered low given its property type. Where a secondary market exists, the transaction is underwritten to market standards	The DSCR (not relevant for development real estate) and LTV are satisfactory. Where a secondary market exists, the transaction is underwritten to market standards	The property's DSCR has deteriorated and its value has fallen, increasing its LTV	The property's DSCR has deteriorated significantly and its LTV is well above underwriting standards for new loans
Stress analysis	The property's resources, contingencies and liability	The property can meet its financial obligations under	During an economic downturn, the property would	The property's financial condition is strained and is

4

Table 2 - Supervisory Rating Grades for Income-Producing Real Estate Exposures

	Strong	Good	Satisfactory	Weak
	structure allow it to meet its financial obligations during a period of severe financial stress (e.g. interest rates, economic growth)	a sustained period of financial stress (e.g. interest rates, economic growth). The property is likely to default only under severe economic conditions	suffer a decline in revenue that would limit its ability to fund capital expenditures and significantly increase the risk of default	likely to default unless conditions improve in the near term
Cash-flow predictability				
(a) For complete and stabilised property	The property's leases are long-term with credit-worthy tenants and their maturity dates are scattered. The property has a track record of tenant retention upon lease expiration. Its vacancy rate is low. Expenses (maintenance, insurance, security, and property taxes) are predictable	Most of the property's leases are long-term, with tenants that range in creditworthiness. The property experiences a normal level of tenant turnover upon lease expiration. Its vacancy rate is low. Expenses are predictable	Most of the property's leases are medium rather than long-term with tenants that range in creditworthiness. The property experiences a moderate level of tenant turnover upon lease expiration. Its vacancy rate is moderate. Expenses are relatively predictable but vary in relation to revenue	The property's leases are of various terms with tenants that range in creditworthiness. The property experiences a very high level of tenant turnover upon lease expiration. Its vacancy rate is high. Significant expenses are incurred preparing space for new tenants
(b) For complete but not stabilised property	Leasing activity meets or exceeds projections. The project should achieve stabilisation in the near future	Leasing activity meets or exceeds projections. The project should achieve stabilisation in the near future	Most leasing activity is within projections; however, stabilisation will not occur for some time	Market rents do not meet expectations. Despite achieving target occupancy rate, cash flow coverage is tight due to disappointing revenue
(c) For construction phase	The property is entirely pre-leased through the tenor of the loan or pre-sold to an investment grade tenant or buyer, or the	The property is entirely pre-leased or pre-sold to a creditworthy tenant or buyer, or the bank has a binding commit-	Leasing activity is within projections but the building may not be pre-leased and there may not exist a take-out financing.	The property is deteriorating due to cost overruns, market deterioration, tenant cancellations or other factors. There may

Table 2 - Supervisory Rating Grades for Income-Producing Real Estate Exposures

	Strong	Good	Satisfactory	Weak
Asset characteristics	bank has a binding commitment for take-out financing from an investment grade lender	ment for permanent financing from a creditworthy lender	The bank may be the permanent lender	be a dispute with the party providing the permanent financing
Location	Property is located in highly desirable location that is convenient to services that tenants desire	Property is located in desirable location that is convenient to services that tenants desire	The property location lacks a competitive advantage	The property's location, configuration, design and maintenance have contributed to the property's difficulties
Design and condition	Property is favoured due to its design, configuration, and maintenance, and is highly competitive with new properties	Property is appropriate in terms of its design, configuration and maintenance. The property's design and capabilities are competitive with new properties	Property is adequate in terms of its configuration, design and maintenance	Weaknesses exist in the property's configuration, design or maintenance
Property is under construction	Construction budget is conservative and technical hazards are limited. Contractors are highly qualified	Construction budget is conservative and technical hazards are limited. Contractors are highly qualified	Construction budget is adequate and contractors are ordinarily qualified	Project is over budget or unrealistic given its technical hazards. Contractors may be under qualified
Strength of Sponsor/Developer				
Financial capacity and willingness to support the property	The sponsor/developer made a substantial cash contribution to the construction or purchase of the property. The sponsor/developer has substantial resources and limited direct and contingent liabilities.	The sponsor/developer made a material cash contribution to the construction or purchase of the property. The sponsor/developer's financial condition allows it to support the property in the event of a	The sponsor/developer's contribution may be immaterial or non-cash. The sponsor/developer is average to below average in financial resources	The sponsor/developer lacks capacity or willingness to support the property

Table 2 - Supervisory Rating Grades for Income-Producing Real Estate Exposures

	Strong	Good	Satisfactory	Weak
	The sponsor/developer's properties are diversified geographically and by property type	cash flow shortfall. The sponsor/developer's properties are located in several geographic regions		
Reputation and track record with similar properties	Experienced management and high sponsors' quality. Strong reputation and lengthy and successful record with similar properties	Appropriate management and sponsors' quality. The sponsor or management has a successful record with similar properties	Moderate management and sponsors' quality. Management or sponsor track record does not raise serious concerns	Ineffective management and substandard sponsors' quality. Management and sponsor difficulties have contributed to difficulties in managing properties in the past
Relationships with relevant real estate actors	Strong relationships with leading actors such as leasing agents	Proven relationships with leading actors such as leasing agents	Adequate relationships with leasing agents and other parties providing important real estate services	Poor relationships with leasing agents and/or other parties providing important real estate services
Security Package				
Nature of lien	Perfect first lien (Note 1)	Perfect first lien (Note 1)	Perfect first lien (Note 1)	Ability of lender to foreclose is constrained
Assignment of rents (for projects leased to long-term tenants)	The lender has obtained an assignment. They maintain current tenant information that would facilitate providing notice to remit rents directly to the lender, such as a current rent roll and copies of the project's leases	The lender has obtained an assignment. They maintain current tenant information that would facilitate providing notice to the tenants to remit rents directly to the lender, such as current rent roll and copies of the project's leases	The lender has obtained an assignment. They maintain current tenant information that would facilitate providing notice to the tenants to remit rents directly to the lender, such as current rent roll and copies of the project's leases	The lender has not obtained an assignment of the leases or has not maintained the information necessary to readily provide notice to the building's tenants
Quality of the insurance coverage	Appropriate	Appropriate	Appropriate	Substandard

Table 2 - Supervisory Rating Grades for Income-Producing Real Estate Exposures

Strong	Good	Satisfactory	Weak
--------	------	--------------	------

Note 1: Lenders in some markets extensively use loan structures that include junior liens. Junior liens may be indicative of this level of risk if the total LTV inclusive of all senior positions does not exceed a typical first loan LTV.

This table belongs to **■ BIPRU 4.5.6 R** and must be used in accordance with that rule only for object finance exposures

Table 3 - Supervisory Rating Grades for Object Finance Exposures

Strong	Good	Satisfactory	Weak
--------	------	--------------	------

Financial strength

Market conditions	Demand is strong and growing, strong entry barriers, low sensitivity to changes in technology and economic outlook	Demand is strong and stable. Some entry barriers, some sensitivity to changes in technology and economic outlook	Demand is adequate and stable, limited entry barriers, significant sensitivity to changes in technology and economic outlook	Demand is weak and declining, vulnerable to changes in technology and economic outlook, highly uncertain environment
Financial ratios (debt service coverage ratio and loan-to-value ratio)	Strong financial ratios considering the type of asset. Very robust economic assumptions	Strong / acceptable financial ratios considering the type of asset. Robust project economic assumptions	Standard financial ratios for the asset type	Aggressive financial ratios considering the type of asset
Stress analysis	Stable long-term revenues, capable of withstanding severely stressed conditions through an economic cycle	Satisfactory short-term revenues. Loan can withstand some financial adversity. Default is only likely under severe economic conditions	Uncertain short-term revenues. Cash flows are vulnerable to stresses that are not uncommon through an economic cycle. The loan may default in a normal downturn	Revenues subject to strong uncertainties; even in normal economic conditions the asset may default, unless conditions improve
Market liquidity	Market is structured on a worldwide basis; assets are highly liquid	Market is worldwide or regional; assets are relatively liquid	Market is regional with limited prospects in the short term, implying lower liquidity	Local market and/or poor visibility. Low or no liquidity, particularly on niche markets

Table 3 - Supervisory Rating Grades for Object Finance Exposures

	Strong	Good	Satisfactory	Weak
Political and legal environment				
Political risk, including transfer risk	Very low; strong mitigation instruments, if needed	Low; satisfactory mitigation instruments, if needed	Moderate; fair mitigation instruments	High; no or weak mitigation instruments
Legal and regulatory risks	Jurisdiction is favourable to repossession and enforcement of contracts	Jurisdiction is favourable to repossession and enforcement of contracts	Jurisdiction is generally favourable to repossession and enforcement of contracts, even if repossession might be long and/or difficult	Poor or unstable legal and regulatory environment. Jurisdiction may make repossession and enforcement of contracts lengthy or impossible
Transaction characteristics				
Financing term compared to the economic life of the asset	Full payout profile/minimum balloon. No grace period	Balloon more significant, but still at satisfactory levels	Important balloon with potentially grace periods	Repayment in fine or high balloon
Operating risk				
Permits / licensing	All permits have been obtained; asset meets current and foreseeable safety regulations	All permits obtained or in the process of being obtained; asset meets current and foreseeable safety regulations	Most permits obtained or in process of being obtained, outstanding ones considered routine, asset meets current safety regulations	Problems in obtaining all required permits, part of the planned configuration and/or planned operations might need to be revised
Scope and nature of O & M contracts	Strong long-term O&M contract, preferably with contractual performance incentives, and/or O&M reserve accounts (if needed)	Long-term O&M contract, and/or O&M reserve accounts (if needed)	Limited O&M contract or O&M reserve account (if needed)	No O&M contract: risk of high operational cost overruns beyond mitigants
Operator's financial strength, track record in managing the asset type	Excellent track record and strong re-marketing capability	Satisfactory track record and re-marketing capability	Weak or short track record and uncertain re-marketing capability	No or unknown track record and inability to re-market the asset

Table 3 - Supervisory Rating Grades for Object Finance Exposures

	Strong	Good	Satisfactory	Weak
and capability to re-market asset when it comes off-lease				
Asset characteristics				
Configuration, size, design and maintenance (i.e. age, size for a plane) compared to other assets on the same market	Strong advantage in design and maintenance. Configuration is standard such that the object meets a liquid market	Above average design and maintenance. Standard configuration, maybe with very limited exceptions - such that the object meets a liquid market	Average design and maintenance. Configuration is somewhat specific, and thus might cause a narrower market for the object	Below average design and maintenance. Asset is near the end of its economic life. Configuration is very specific; the market for the object is very narrow
Resale value	Current resale value is well above debt value	Resale value is moderately above debt value	Resale value is slightly above debt value	Resale value is below debt value
Sensitivity of the asset value and liquidity to economic cycles	Asset value and liquidity are relatively insensitive to economic cycles	Asset value and liquidity are sensitive to economic cycles	Asset value and liquidity are quite sensitive to economic cycles	Asset value and liquidity are highly sensitive to economic cycles
Strength of sponsor				
Operator's financial strength, track record in managing the asset type and capability to re-market asset when it comes off-lease	Excellent track record and strong re-marketing capability	Satisfactory track record and re-marketing capability	Weak or short track record and uncertain re-marketing capability	No or unknown track record and inability to re-market the asset
Sponsors' track record and financial strength	Sponsors with excellent track record and high financial standing	Sponsors with good track record and good financial standing	Sponsors with adequate track record and good financial standing	Sponsors with no or questionable track record and/or financial weaknesses
Security Package				
Asset control	Legal documentation provides the lender effective control (e.g. a first	Legal documentation provides the lender effective control (e.g. a per-	Legal documentation provides the lender effective control (e.g. a per-	The contract provides little security to the lender and leaves room to

Table 3 - Supervisory Rating Grades for Object Finance Exposures

	Strong	Good	Satisfactory	Weak
	perfected security interest, or a leasing structure including such security) on the asset, or on the company owning it	perfected security interest, or a leasing structure including such security) on the asset, or on the company owning it	perfected security interest, or a leasing structure including such security) on the asset, or on the company owning it	some risk of losing control on the asset
Rights and means at the lender's disposal to monitor the location and condition of the asset	The lender is able to monitor the location and condition of the asset, at any time and place (regular reports, possibility to lead inspections)	The lender is able to monitor the location and condition of the asset, almost at any time and place	The lender is able to monitor the location and condition of the asset, almost at any time and place	The lender is able to monitor the location and condition of the asset are limited
Insurance against damages	Strong insurance coverage including collateral damages with top quality insurance companies	Satisfactory insurance coverage (not including collateral damages) with good quality insurance companies	Fair insurance coverage (not including collateral damages) with acceptable quality insurance companies	Weak insurance coverage (not including collateral damages) or with weak quality insurance companies

This table belongs to **BIPRU 4.5.6 R** and must be used in accordance with that rule only for commodities finance exposures.

Table 4 - Supervisory Rating Grades for Commodities Finance Exposures

	Strong	Good	Satisfactory	Weak
Financial strength				
Degree of over-collateralisation of trade	Strong	Good	Satisfactory	Weak
Political and legal Environment				
Country risk	No country risk	Limited exposure to country risk (in particular, offshore location of reserves in an emerging country)	Exposure to country risk (in particular, offshore location of reserves in an emerging country)	Strong exposure to country risk (in particular, inland reserves in an emerging country)
Mitigation of country risks	Very strong mitigation:	Strong mitigation:	Acceptable mitigation:	Only partial mitigation:

Table 4 - Supervisory Rating Grades for Commodities Finance Exposures

	Strong	Good	Satisfactory	Weak
	Strong offshore Mechanisms	Offshore mechanisms	Offshore mechanisms	No offshore mechanisms
	Strategic commodity	Strategic commodity	Less strategic commodity	Non-strategic commodity
	1st class buyer	Strong buyer	Acceptable buyer	Weak buyer
Asset characteristics				
Liquidity and susceptibility to damage	Commodity is quoted and can be hedged through futures or OTC instruments. Commodity is not susceptible to damage	Commodity is quoted and can be hedged through OTC instruments. Commodity is not susceptible to damage	Commodity is not quoted but is liquid. There is uncertainty about the possibility of hedging. Commodity is not susceptible to damage	Commodity is not quoted. Liquidity is limited given the size and depth of the market. No appropriate hedging instruments. Commodity is susceptible to damage
Strength of sponsor				
Financial strength of trader	Very strong, relative to trading philosophy and risks	Strong	Adequate	Weak
Track record, including ability to manage the logistic process	Extensive experience with the type of transaction in question. Strong record of operating success and cost efficiency	Sufficient experience with the type of transaction in question. Above average record of operating success and cost efficiency	Limited experience with the type of transaction in question. Average record of operating success and cost efficiency	Limited or uncertain track record in general. Volatile costs and profits
Trading controls and hedging policies	Strong standards for counterparty selection, hedging, and monitoring	Adequate standards for counterparty selection, hedging, and monitoring	Past deals have experienced no or minor problems	Trader has experienced significant losses on past deals
Quality of financial disclosure	Excellent	Good	Satisfactory	Financial disclosure contains some uncertainties or is insufficient
Security package				

Table 4 - Supervisory Rating Grades for Commodities Finance Exposures

	Strong	Good	Satisfactory	Weak
Asset control	First perfected security interest provides the lender legal control of the assets at any time if needed	First perfected security interest provides the lender legal control of the assets at any time if needed	At some point in the process, there is a rupture in the control of the assets by the lender. The rupture is mitigated by knowledge of the trade process or a third party undertaking as the case may be	Contract leaves room for some risk of losing control over the assets. Recovery could be jeopardised
Insurance against damages	Strong insurance coverage including collateral damages with top quality insurance companies	Satisfactory insurance coverage (not including collateral damages) with good quality insurance companies	Fair insurance coverage (not including collateral damages) with acceptable quality insurance companies	Weak insurance coverage (not including collateral damages) or with weak quality insurance companies

Application

5.1.1 **R** ■ BIPRU 5 applies to a *BIPRU firm*.

FCA **PRA**

Purpose

5.1.2 **G** ■ BIPRU 5 implements, in part, Articles 78(1) and 91 to 93 and Annex VIII of the *Banking Consolidation Directive*.

FCA **PRA**

5.1.3 **G** ■ BIPRU 5 sets out the principles for the recognition of *credit risk mitigation* in the calculation of *risk weighted exposure amounts* for the purposes of the calculation of the *credit risk capital component*.

FCA **PRA**

5.1.4 **G** ■ BIPRU 4.10 implements those parts of Articles 91 to 93 and Annex VIII of the *Banking Consolidation Directive* which are specific to the recognition of *credit risk mitigation* by *firms* using the *IRB approach*, and modifies the application of the provisions in ■ BIPRU 5 to those *firms*.

FCA **PRA**

5.1.5 **G** In certain cases provisions specific to the *IRB approach* have been kept in ■ BIPRU 5 in order to reduce duplication. The main examples are certain references to *expected loss* and references in the *IRB approach* in the provisions in ■ BIPRU 5.7 about basket CRM techniques.

FCA **PRA**

5.2 The central principles of credit risk mitigation

5.2.1

FCA PRA

R

A *firm* using the *standardised approach* may recognise *credit risk mitigation* in accordance with ■ BIPRU 5 in the calculation of *risk weighted exposure amounts* for the purposes of the calculation of the *credit risk capital component*.

[Note: BCD Article 91]

5.2.2

FCA PRA

R

The technique used to provide the credit protection together with the actions and steps taken and procedures and policies implemented by a *lending firm* must be such as to result in credit protection arrangements which are legally effective and enforceable in all relevant jurisdictions.

[Note: BCD Article 92(1)]

5.2.3

FCA PRA

R

- (1) A *firm* must not recognise credit protection as eligible until it has conducted sufficient legal review confirming that the credit protection arrangements are legally effective and enforceable in all relevant jurisdictions in accordance with ■ BIPRU 5.2.2 R.
- (2) A *firm* must re-conduct legal reviews as necessary to ensure continuing enforceability and effectiveness.

5.2.4

FCA PRA

R

A *lending firm* must take all appropriate steps to ensure the effectiveness of the credit protection arrangement and to address related risks.

[Note: BCD Article 92(2)]

Funded credit protection

5.2.5

FCA PRA

R

In the case of *funded credit protection*:

- (1) to be eligible for recognition the assets relied upon must be sufficiently liquid and their value over time sufficiently stable to provide appropriate certainty as to the credit protection achieved having regard to the approach used to calculate *risk weighted exposure amounts* and to the degree of recognition allowed; eligibility is limited to the assets set out in the *CRM eligibility conditions*; and

- (2) the *lending firm* must have the right to liquidate or retain, in a timely manner, the assets from which the protection derives in the event of the default, insolvency or bankruptcy of the obligor - or other credit event set out in the transaction documentation - and, where applicable, of the custodian holding the collateral; the degree of correlation between the value of the assets relied upon for protection and the credit quality of the obligor must not be undue.

[Note: BCD Article 92(3) and (4)]

Treatment of credit linked notes

5.2.6

FCA PRA

G

A credit linked note should be treated, to the extent of its cash funding, as *funded credit protection*. Therefore the conditions in ■ BIPRU 5 regulating the eligibility of protection providers for *unfunded credit protection* do not apply. However the other provisions about the requirements for the recognition of *unfunded credit protection* do apply.

Unfunded credit protection

5.2.7

FCA PRA

R

In the case of *unfunded credit protection*:

- (1) to be eligible for recognition the party giving the undertaking must be sufficiently reliable, and the protection agreement legally effective and enforceable in the relevant jurisdictions, to provide appropriate certainty as to the credit protection achieved having regard to the approach used to calculate *risk weighted exposure amounts* and to the degree of recognition allowed; and
- (2) eligibility is limited to the protection providers and types of protection agreement set out in the *CRM eligibility conditions*.

[Note: BCD Article 92(5)]

Minimum requirements

5.2.8

FCA PRA

R

The minimum requirements set out in BIPRU 5 must be complied with.

[Note: BCD Article 92(6)]

5.2.9

FCA PRA

R

A *firm* must be able to satisfy the *appropriate regulator* that it has adequate risk management processes to control the risks to which the *firm* may be exposed as a result of carrying out *credit risk mitigation*. Those processes must include appropriate stress tests and scenario analyses relating to those risks, including residual risk and the risks relating to the intrinsic value of the *credit risk mitigation*.

[Note: BCD Annex VIII Part 2 point 1]

5.2.10 **R** Notwithstanding the presence of *credit risk mitigation* taken into account for the purposes of calculating *risk weighted exposure amounts* and as relevant *expected loss* amounts, a *firm* must continue to undertake full credit risk assessment of the underlying *exposure* and must be in a position to demonstrate to the *appropriate regulator* the fulfilment of this requirement. In the case of *repurchase transactions* and/or *securities or commodities lending or borrowing transactions* the underlying *exposure* must, for the purposes of this *rule* only, be deemed to be the net amount of the *exposure*.

FCA PRA

[Note: BCD Annex VIII Part 2 point 2]

Calculating the effects of the credit risk mitigation

5.2.11 **R** Where the requirements of ■ BIPRU 5.2.2 R to ■ BIPRU 5.2.8 R are met the calculation of *risk weighted exposure amounts*, may be modified in accordance with ■ BIPRU 5.

FCA PRA

[Note: BCD Article 93(1)]

5.2.12 **R** No *exposure* in respect of which *credit risk mitigation* is obtained may produce a higher *risk weighted exposure amount* than an otherwise identical *exposure* in respect of which there is no *credit risk mitigation*.

FCA PRA

[Note: BCD Article 93(2)]

5.2.13 **R** Where the *risk weighted exposure amount* already takes account of credit protection under the *standardised approach* the calculation of the credit protection must not be further recognised under ■ BIPRU 5.

FCA PRA

[Note: BCD Article 93(3)]

5.2.14 **R** Subject to ■ BIPRU 5.8, ■ BIPRU 5.9 and ■ BIPRU 5.7.27 R to ■ BIPRU 5.7.28 R, where the *CRM eligibility conditions* and the *CRM minimum requirements* are satisfied, the calculation of *risk weighted exposure amounts* under the *standardised approach* may be modified in accordance with the provisions of ■ BIPRU 5.

FCA PRA

[Note: BCD Annex VIII Part 3 point 1]

5.2.15 **R** Cash, *securities* or *commodities* purchased, borrowed or received under a *repurchase transaction* or *securities or commodities lending or borrowing transaction* must be treated as collateral.

FCA PRA

[Note: BCD Annex VIII Part 3 point 2]

5.3 On balance sheet netting

Eligibility

5.3.1

FCA PRA

R

A *firm* may recognise as eligible the on-balance sheet netting of mutual claims between the *firm* and its counterparty.

[Note: BCD Annex VIII Part 1 point 3]

5.3.2

FCA PRA

R

Without prejudice to ■ BIPRU 5.6.1 R, eligibility is limited to reciprocal cash balances between a *firm* and a counterparty. Only loans and deposits of the *lending firm* may be subject to a modification of *risk weighted exposure amounts* and, as relevant, *expected loss* amounts as a result of an on-balance sheet netting agreement.

[Note: BCD Annex VIII Part 1 point 4]

Minimum requirements

5.3.3

FCA PRA

R

For on-balance sheet netting agreements - other than master netting agreements covering *repurchase transactions, securities or commodities lending or borrowing transactions* and/or other *capital market-driven transactions* - to be recognised for the purposes of ■ BIPRU 5 the following conditions must be satisfied:

- (1) they must be legally effective and enforceable in all relevant jurisdictions, including in the event of the insolvency or bankruptcy of a counterparty;
- (2) the *firm* must be able to determine at any time those assets and liabilities that are subject to the on-balance sheet netting agreement;
- (3) the *firm* must monitor and control the risks associated with the termination of the credit protection; and
- (4) the *firm* must monitor and control the relevant *exposures* on a net basis.

[Note: BCD Annex VIII Part 2 point 3]

Calculating the effects of credit risk mitigation

5.3.4

FCA PRA

R

Loans and deposits with a *lending firm* subject to on-balance sheet netting are to be treated as cash collateral.

[Note: BCD Annex VIII Part 3 point 4]

5

5.4 Financial collateral

Eligibility

5.4.1

FCA PRA

R

- (1) Where the *credit risk mitigation* used relies on the right of a *firm* to liquidate or retain assets, eligibility depends upon whether *risk weighted exposure amounts*, and, as relevant, *expected loss amounts*, are calculated under the *standardised approach* or the *IRB approach*.
- (2) Eligibility further depends upon whether the *financial collateral simple method* is used or the *financial collateral comprehensive method*.
- (3) In relation to *repurchase transactions* and *securities or commodities lending or borrowing transactions*, eligibility also depends upon whether the transaction is booked in the *non-trading book* or the *trading book*.

[Note: BCD Annex VIII Part 1 point 6]

5.4.2

FCA PRA

R

The following financial items may be recognised as eligible collateral under all approaches and methods:

- (1) cash on deposit with, or *cash assimilated instruments* held by, the *lending firm*;
- (2) *debt securities* issued by central governments or *central banks* which *securities* have a credit assessment by an *eligible ECAI* or export credit agency recognised as eligible for the purposes of the *standardised approach*, which is associated with *credit quality step 4* or above under the *rules* for the *risk weighting* of *exposures* to central governments and *central banks* under the *standardised approach*;
- (3) *debt securities* issued by *institutions* which *securities* have a credit assessment by an *eligible ECAI* associated with *credit quality step 3* or above under the *rules* for the *risk weighting* of *exposures* to a *credit institution* under the *standardised approach*;

- (4) *debt securities* issued by other entities which *securities* have a credit assessment by an *eligible ECAI* associated with *credit quality step 3* or above under the *rules* for the *risk weighting* of *exposures* to *corporates* under the *standardised approach*;
- (5) *debt securities* with a short-term credit assessment by an *eligible ECAI* associated with *credit quality step 3* or above under the *rules* for the *risk weighting* of *short term exposures* under the *standardised approach*;
- (6) equities or *convertible* bonds that are included in a main index; and
- (7) gold.

[Note: BCD Annex VIII Part 1 point 7 (part)]

5.4.3

FCA PRA

R

For the purposes of ■ BIPRU 5.4.2 R (2), '*debt securities* issued by central governments or *central banks*' include -

- (1) *debt securities* issued by regional governments or local authorities *exposures* to which are treated as *exposures* to the central government in whose jurisdiction they are established under the *standardised approach*;
- (2) *debt securities* issued by *public sector entities* which are treated as *exposures* to central governments in accordance with ■ BIPRU 3.4.24 R;
- (3) *debt securities* issued by *multilateral development banks* to which a 0% *risk weight* is assigned under the *standardised approach*; and
- (4) *debt securities* issued by *international organisations* which are assigned a 0% *risk weight* under the *standardised approach*.

[Note: BCD Annex VIII Part 1 point 7 (part)]

5.4.4

FCA PRA

R

For the purposes of ■ BIPRU 5.4.2 R (3), '*debt securities* issued by *institutions*' include:

- (1) *debt securities* issued by regional governments or local authorities other than those *exposures* to which are treated as *exposures* to the central government in whose jurisdiction they are established under the *standardised approach*;
- (2) *debt securities* issued by *public sector entities*, *exposures* to which are treated as *exposures* to a *credit institution* under the *standardised approach*;

- (3) *debt securities* issued by *multilateral development banks* other than those to which a 0% *risk weight* is assigned under the *standardised approach*.

[Note: BCD Annex VIII Part 1 point 7 (part)]

5.4.5

FCA PRA

R

Debt securities issued by *institutions* which *securities* do not have a credit assessment by an *eligible ECAI* may be recognised as eligible collateral if they fulfil the following criteria:

- (1) they are listed on a *recognised investment exchange* or a *designated investment exchange*;
- (2) they qualify as senior debt;
- (3) all other rated issues by the issuing *institution* of the same seniority have a credit assessment by an *eligible ECAI* associated with *credit quality step 3* or above under the *rules* for the *risk weight* of *exposures to institutions* or short term *exposures* under the *standardised approach*;
- (4) the *lending firm* has no information to suggest that the issue would justify a credit assessment below that indicated in (3); and
- (5) the *firm* can demonstrate to the *appropriate regulator* that the market liquidity of the instrument is sufficient for these purposes.

[Note: BCD Annex VIII Part 1 point 8]

5.4.6

FCA PRA

R

- (1) Units in *CIUs* may be recognised as eligible collateral if the following conditions are satisfied:
 - (a) they have a daily public price quote;
 - (b) the *CIU* is limited to investing in instruments that are eligible for recognition under ■ BIPRU 5.4.2 R to ■ BIPRU 5.4.5 R; and
 - (c) if the *CIU* is not limited to investing in instruments that are eligible for recognition under ■ BIPRU 5.4.2 R to ■ BIPRU 5.4.5 R, units may be recognised with the value of the eligible assets as collateral under the assumption that the *CIU* has invested to the maximum extent allowed under its mandate in non-eligible assets. In cases where non-eligible assets can have a negative value due to liabilities or contingent liabilities resulting from ownership, the *firm* must calculate the total value of the non-eligible assets and must reduce the value of the eligible assets by that of the non-eligible assets in case the latter is negative in total.

- (2) The use (or potential use) by a *CIU* of derivative instruments to hedge permitted investments shall not prevent units in that *CIU* from being eligible.

[Note: *BCD* Annex VIII Part 1 point 9]

5.4.7

FCA PRA

R

In relation to ■ BIPRU 5.4.2 R (2) to ■ (5):

- (1) where a *security* has two credit assessments by *eligible ECAIs*, the less favourable assessment must be deemed to apply;
- (2) in cases where a *security* has more than two credit assessments by *eligible ECAIs*:
- (a) the two most favourable assessments must be deemed to apply; or
- (b) if the two most favourable credit assessments are different, the less favourable of the two must be deemed to apply.

[Note: *BCD* Annex VIII Part 1 point 10]

5.4.8

FCA PRA

R

- (1) In addition to the collateral set out in ■ BIPRU 5.4.2 R to ■ BIPRU 5.4.7 R, where a *firm* uses the *financial collateral comprehensive method*, the following financial items may be recognised as eligible collateral:
- (a) equities or *convertible* bonds not included in a main index but traded on a *recognised investment exchange* or a *designated investment exchange*;
- (b) units in *CIUs* if the following conditions are met:
- (i) they have a daily public price quote; and
- (ii) the *CIU* is limited to investing in instruments that are eligible for recognition under ■ BIPRU 5.4.2 R to ■ BIPRU 5.4.5 R and the items mentioned in (a); and
- (c) if the *CIU* is not limited to investing in instruments that are eligible for recognition under ■ BIPRU 5.4.2 R to ■ BIPRU 5.4.5 R and the items mentioned in (a) of this *rule*, units may be recognised with the value of the eligible assets as collateral under the assumption that the *CIU* has invested to the maximum extent allowed under its mandate in non-eligible assets. In cases where non-eligible assets can have a negative value due to liabilities or contingent liabilities resulting from ownership, the *firm* must calculate the total value of the non-eligible assets and must reduce the value of the eligible assets by that of the non-eligible assets, in case the latter is negative in total.

- (2) The use (or potential use) by a *CIU* of derivative instruments to hedge permitted investments shall not prevent units in that *CIU* from being eligible.

[Note: *BCD* Annex VIII Part 1 point 11]

Minimum requirements

5.4.9

FCA PRA

R

For the recognition of financial collateral and gold, the following conditions must be met:

- (1) the low correlation conditions in ■ BIPRU 5.4.10 R;
- (2) the legal certainty conditions in ■ BIPRU 5.4.11 R; and
- (3) the operational requirements in ■ BIPRU 5.4.12 R.

[Note: *BCD* Annex VIII Part 2 point 6]

5.4.10

FCA PRA

R

The low correlation conditions referred to in ■ BIPRU 5.4.9 R (1) are as follows:

- (1) (a) the credit quality of the obligor and the value of the collateral must not have a material positive correlation; and
(b) *securities* issued by the obligor, or any related *group* entity are not eligible.
- (2) notwithstanding (1)(b), the obligor's own issues of *covered bonds* falling within the terms of ■ BIPRU 3.4.107 R to ■ BIPRU 3.4.109 R may be recognised as collateral for *repurchase transactions*, provided that (1)(a) is complied with.

[Note: *BCD* Annex VIII Part 2 point 6(a)]

5.4.11

FCA PRA

R

The legal certainty conditions referred to in ■ BIPRU 5.4.9 R (2) are as follows:

- (1) a *firm* must fulfil any contractual and statutory requirements in respect of, and take all steps necessary to ensure, the enforceability of the collateral arrangements under the law applicable to its interest in the collateral;
- (2) in accordance with the general principle in ■ BIPRU 5.2.2 R, a *firm* must have conducted sufficient legal review confirming the enforceability of the collateral arrangements in all relevant jurisdictions; and
- (3) a *firm* must re-conduct such review as necessary to ensure continuing enforceability.

[Note: BCD Annex VIII Part 2 point 6(b)]

5.4.12

FCA PRA

R

The operational requirements referred to in ■ BIPRU 5.4.9 R (3) are as follows:

- (1) the collateral arrangements must be properly documented, with a clear and robust procedure for the timely liquidation of collateral;
- (2) a *firm* must employ robust procedures and processes to control risks arising from the use of collateral - including risks of failed or reduced credit protection, valuation risks, risks associated with the termination of the credit protection, concentration risk arising from the use of collateral and the interaction with the *firm's* overall risk profile;
- (3) a *firm* must have documented policies and practices concerning the types and amounts of collateral accepted;
- (4) a *firm* must calculate the market value of the collateral, and revalue it accordingly, with a minimum frequency of once every six months and whenever the *firm* has reason to believe that there has occurred a significant decrease in its market value; and
- (5) where the collateral is held by a third party, a *firm* must take reasonable steps to ensure that the third party segregates the collateral from its own assets.

[Note: BCD Annex VIII Part 2 point 6(c)]

5.4.13

FCA PRA

R

In addition to the requirements set out in ■ BIPRU 5.4.9 R, for the recognition of financial collateral under the *financial collateral simple method* the residual maturity of the protection must be at least as long as the residual maturity of the *exposure*.

[Note: BCD Annex VIII Part 2 point 7]

The financial collateral simple method: General

5.4.14

FCA PRA

R

■ BIPRU 5.4.17 R - ■ BIPRU 5.4.22 R set out the calculation of the effects of *credit risk mitigation* under the *financial collateral simple method*.

5.4.15

FCA PRA

R

The *financial collateral simple method* is available only where *risk weighted exposure amounts* are calculated under the *standardised approach* to credit risk.

[Note: BCD Annex VIII Part 3 point 24 (part)]

5.4.16

FCA PRA

R

A *firm* must not use both the *financial collateral simple method* and the *financial collateral comprehensive method*, unless such use is for the purposes of ■ BIPRU 4.2.17 R to ■ BIPRU 4.2.19 R and ■ BIPRU 4.2.26 R, and such use is provided for by the *firm's IRB permission*. A *firm* must

demonstrate to the *appropriate regulator* that this exceptional application of both methods is not used selectively with the purpose of achieving reduced minimum capital requirements and does not lead to regulatory arbitrage.

[Note: BCD Annex VIII Part 3 point 24 (part)]

The financial collateral simple method: Valuation

5.4.17

FCA PRA

R

Under the *financial collateral simple method*, recognised financial collateral is assigned a value equal to its market value as determined in accordance with ■ BIPRU 5.4.12 R.

[Note: BCD Annex VIII Part 3 point 25]

The financial collateral simple method: Calculating risk-weighted exposure amounts

5.4.18

FCA PRA

R

The *risk weight* that would be assigned under the *standardised approach* to credit risk if the *lending firm* had a direct *exposure* to the collateral instrument must be assigned to those portions of *exposure* values collateralised by the market value of recognised collateral. For this purpose, the *exposure* value of an off-balance sheet item listed in ■ BIPRU 3.7.2 R must be 100% of its value rather than the *exposure* value indicated in ■ BIPRU 3.2.1 R. The *risk weight* of the collateralised portion must be a minimum of 20% except as specified in ■ BIPRU 5.4.19 R to ■ BIPRU 5.4.21 R. The remainder of the *exposure* value receives the *risk weight* that would be applied to an unsecured *exposure* to the counterparty under the *standardised approach*.

[Note: BCD Annex VIII Part 3 point 26]

The financial collateral simple method: Repurchase transactions and securities lending or borrowing transactions

5.4.19

FCA PRA

R

A *risk weight* of 0% must be assigned to the collateralised portion of the *exposure* arising from transactions which fulfil the criteria enumerated in ■ BIPRU 5.4.62 R or ■ BIPRU 5.4.65 R. If the counterparty to the transaction is not a *core market participant* a *risk weight* of 10% must be assigned.

[Note: BCD Annex VIII Part 3 point 27]

The financial collateral simple method: financial derivative instruments subject to daily mark-to-market

5.4.20

FCA PRA

R

A *risk weight* of 0% must, to the extent of the collateralisation, be assigned to the *exposure* values determined under ■ BIPRU 13 for *financial derivative instruments* and subject to daily marking-to-market, collateralised by cash or *cash assimilated instruments* where there is no currency mismatch. A *risk weight* of 10% must be assigned to the extent of the collateralisation to the *exposure* values of such transactions

collateralised by *debt securities* issued by central governments or *central banks* which are assigned a 0% *risk weight* under the *standardised approach*.

[Note: BCD Annex VIII Part 3 point 28 (part)]

5.4.21

FCA PRA

R

A 0% *risk weight* may be assigned where the *exposure* and the collateral are denominated in the same currency, and either:

- (1) the collateral is cash on deposit or a *cash assimilated instrument*; or
- (2) the collateral is in the form of *debt securities* issued by central governments or *central banks* eligible for a 0% *risk weight* under the *standardised approach*, and its market value has been discounted by 20%.

[Note: BCD Annex VIII Part 3 point 29]

5.4.22

FCA PRA

R

For the purposes of ■ BIPRU 5.4.20 R and ■ BIPRU 5.4.21 R '*debt securities* issued by central governments or *central banks*' must include:

- (1) *debt securities* issued by regional governments or local authorities *exposures* to which are treated as *exposures* to the central government in whose jurisdiction they are established under the *standardised approach*;
- (2) *debt securities* issued by *multilateral development banks* to which a 0% *risk weight* is assigned under or by virtue of the *standardised approach*; and
- (3) *debt securities* issued by *international organisations* which are assigned a 0% *risk weight* under the *standardised approach*.

[Note: BCD Annex VIII Part 3 point 28 (part)]

The financial collateral comprehensive method: General

5.4.23

FCA PRA

R

■ BIPRU 5.4.24 R - ■ BIPRU 5.4.66 R set out the calculation of the effects of *credit risk mitigation* under the *financial collateral comprehensive method*.

5.4.24

FCA PRA

R

In valuing financial collateral for the purposes of the *financial collateral comprehensive method*, volatility adjustments must be applied to the market value of collateral, as set out in ■ BIPRU 5.4.30 R to ■ BIPRU 5.4.65 R, in order to take account of price volatility.

[Note: BCD Annex VIII Part 3 point 30]

5.4.25

FCA PRA

R

Subject to the treatment for currency mismatches in the case of *financial derivative instrument* set out in ■ BIPRU 5.4.26 R, where collateral is

denominated in a currency that differs from that in which the underlying *exposure* is denominated, an adjustment reflecting currency volatility must be added to the volatility adjustment appropriate to the collateral as set out in ■ BIPRU 5.4.30 R to ■ BIPRU 5.4.65 R.

[Note: BCD Annex VIII Part 3 point 31]

5.4.26

FCA PRA

R

In the case of *financial derivative instrument* covered by netting agreements recognised under ■ BIPRU 13, a volatility adjustment reflecting currency volatility must be applied when there is a mismatch between the collateral currency and the settlement currency. Even in the case where multiple currencies are involved in the transactions covered by the netting agreement, only a single volatility adjustment may be applied.

[Note: BCD Annex VIII Part 3 point 32]

5.4.27

FCA PRA

R

In the case of a *firm* using the *financial collateral comprehensive method*, where an *exposure* takes the form of securities or *commodities* sold, posted or lent under a *repurchase transaction* or under a *securities or commodities lending or borrowing transaction*, and *margin lending transactions* the *exposure* value must be increased by the volatility adjustment appropriate to such securities or *commodities* as prescribed in ■ BIPRU 5.4.30 R to ■ BIPRU 5.4.65 R.

[Note: BCD Article 78(1), third sentence]

The financial collateral comprehensive method: Calculating adjusted values

5.4.28

FCA PRA

R

- (1) The volatility-adjusted value of the collateral to be taken into account is calculated as follows in the case of all transactions except those transactions subject to recognised master netting agreements to which the provisions set out in ■ BIPRU 5.6.5 R to ■ BIPRU 5.6.29 R are to be applied:

$$C_{VA} = C \times (1 - H_C - H_{FX})$$

- (2) The volatility-adjusted value of the *exposure* to be taken into account is calculated as follows:

$$E_{VA} = E \times (1 + H_E), \text{ and in the case of } \textit{financial derivative instruments} \ E_{VA} = E.$$

- (3) The fully adjusted value of the *exposure*, taking into account both volatility and the risk-mitigating effects of collateral is calculated as follows:

$$E^* = \max \{0, [E_{VA} - C_{VAM}]\}$$

Where:

- (a) E is the *exposure* value as would be determined under the *standardised approach* if the *exposure* was not collateralised.
 - (b) E_{VA} is the volatility-adjusted *exposure* amount.
 - (c) C_{VA} is the volatility-adjusted value of the collateral.
 - (d) C_{VAM} is C_{VA} further adjusted for any maturity mismatch in accordance with the provisions of ■ BIPRU 5.8.
 - (e) H_E is the volatility adjustment appropriate to the *exposure* (E), as calculated under ■ BIPRU 5.4.30 R to ■ BIPRU 5.4.65 R.
 - (f) H_C is the volatility adjustment appropriate for the collateral, as calculated under ■ BIPRU 5.4.30 R to ■ BIPRU 5.4.65 R.
 - (g) H_{FX} is the volatility adjustment appropriate for currency mismatch, as calculated under ■ BIPRU 5.4.30 R to ■ BIPRU 5.4.65 R.
 - (h) E^* is the fully adjusted *exposure* value taking into account volatility and the risk-mitigating effects of the collateral.
- (4) For the purpose of (3)(a), for a *firm* calculating *risk weighted exposure amounts* under the *standardised approach* the *exposure* value of an off-balance sheet items listed in ■ BIPRU 3.7 must be 100% of its value rather than the *exposure* value indicated in ■ BIPRU 3.2.1 R and ■ BIPRU 3.7.2 R.

[Note: BCD Annex VIII Part 3 point 33]

The financial collateral comprehensive method: Calculation of volatility adjustments to be applied: General

5.4.29

FCA PRA

R

■ BIPRU 5.4.30 R - ■ BIPRU 5.4.65 R set out the calculation of volatility adjustments under the *financial collateral comprehensive method*.

5.4.30

FCA PRA

R

Volatility adjustments may be calculated in two ways: the *supervisory volatility adjustments approach* and the *own estimates of volatility adjustments approach*.

[Note: BCD Annex VIII Part 3 point 34]

5.4.31

FCA PRA

R

A *firm* may choose to use the *supervisory volatility adjustments approach* or the *own estimates of volatility adjustments approach* independently of the choice it has made between the *standardised approach* and the *IRB approach* for the calculation of *risk weighted exposure amounts*. However, if a *firm* seeks to use the *own estimates of volatility adjustments approach*,

it must do so for the full range of instrument types, excluding immaterial portfolios where it may use the *supervisory volatility adjustments approach*.

[Note: BCD Annex VIII Part 3 point 35 (part)]

5.4.32

FCA PRA

R Where the collateral consists of a number of recognised items, the volatility adjustment must be

$$(H = \sum_i \alpha_i H_i)$$

where:

- (1) a_i is the proportion of an item to the collateral as a whole; and
- (2) H_i is the volatility adjustment applicable to that item.

[Note: BCD Annex VIII Part 3 point 35 (part)]

The financial collateral comprehensive method: Supervisory volatility adjustments approach

5.4.33

FCA PRA

R ■ BIPRU 5.4.34 R - ■ BIPRU 5.4.43 R set out the calculation of volatility adjustments under the *supervisory volatility adjustments approach*.

5.4.34

FCA PRA

R The volatility adjustments to be applied under the *supervisory volatility adjustments approach* (assuming daily revaluation) are those set out in the tables in ■ BIPRU 5.4.35 R - ■ BIPRU 5.4.38 R.

[Note: BCD Annex VIII Part 3 point 36]

Table: Volatility adjustments for debt securities described in BIPRU 5.4.2R(2) and (3) - (4)

5.4.35

FCA PRA

R

This table belongs to ■ BIPRU 5.4.34 R.

This table belongs to ■ BIPRU 5.4.34 R.

Volatility adjustment for currency mismatch		
20 day liquidation period (%)	10 day liquidation period (%)	5 day liquidation period (%)
11.314	8	5.657

5.4.39

FCA PRA

R

- (1) For *secured lending transactions* the liquidation period is 20 business days.
- (2) For *repurchase transactions* (except insofar as such transactions involve the transfer of *commodities* or guaranteed rights relating to title to *commodities*) and *securities lending or borrowing transactions* the liquidation period is 5 business days.
- (3) For other *capital market-driven transactions*, the liquidation period is 10 business days.

[Note: BCD Annex VIII Part 3 point 37]

5.4.40

FCA PRA

R

In the tables in ■ BIPRU 5.4.35 R - ■ BIPRU 5.4.38 R and in ■ BIPRU 5.4.41 R to ■ BIPRU 5.4.43 R, the *credit quality step* with which a credit assessment of the *debt security* is associated is the *credit quality step* with which the external credit assessment is associated under the *standardised approach*. For the purposes of this *rule*, ■ BIPRU 5.4.7 R also applies.

[Note: BCD Annex VIII Part 3 point 38]

5.4.41

FCA PRA

R

For non-eligible *securities* or for *commodities* lent or sold under *repurchase transactions* or *securities or commodities lending or borrowing transactions*, the volatility adjustment is the same as for non-main index equities listed on a *recognised investment exchange* or a *designated investment exchange*.

[Note: BCD Annex VIII Part 3 point 39]

5.4.42

FCA PRA

R

For eligible units in *CIUs* the volatility adjustment is the weighted average volatility adjustments that would apply, having regard to the liquidation period of the transaction as specified in ■ BIPRU 5.4.39 R, to the assets in

which the fund has invested. If the assets in which the fund has invested are not known to the *firm*, the volatility adjustment is the highest volatility adjustment that would apply to any of the assets in which the fund has the right to invest.

[Note: BCD Annex VIII Part 3 point 40]

5.4.43

FCA PRA

R

For unrated *debt securities* issued by *institutions* and satisfying the eligibility criteria in ■ BIPRU 5.4.5 R the volatility adjustments are the same as for *securities* issued by *institutions* or *corporates* with an external credit assessment associated with *credit quality steps* 2 or 3.

[Note: BCD Annex VIII Part 3 point 41]

The financial collateral comprehensive method: Own estimates of volatility adjustments approach: General

5.4.44

FCA PRA

R

■ BIPRU 5.4.45 R - ■ BIPRU 5.4.60 R deal with the calculation of volatility adjustments under the *own estimates of volatility adjustments approach*.

5.4.45

FCA PRA

R

A *firm* complying with the requirements set out in ■ BIPRU 5.4.50 R to ■ BIPRU 5.4.60 R may use the *own estimates of volatility adjustments approach* for calculating the volatility adjustments to be applied to collateral and *exposures*.

[Note: BCD Annex VIII Part 3 point 42]

5.4.46

FCA PRA

R

When *debt securities* have a credit assessment from an *eligible ECAI* equivalent to investment grade or better, a *firm* may calculate a volatility estimate for each category of *security*.

[Note: BCD Annex VIII Part 3 point 43]

5.4.47

FCA PRA

R

In determining relevant categories, a *firm* must take into account the type of issuer of the *security* the external credit assessment of the *securities*, their residual maturity, and their modified duration. Volatility estimates must be representative of the *securities* included in the category by the *firm*.

[Note: BCD Annex VIII Part 3 point 44]

5.4.48

FCA PRA

R

For *debt securities* having a credit assessment from an *eligible ECAI* equivalent to below investment grade and for other eligible collateral the volatility adjustments must be calculated for each individual item.

[Note: BCD Annex VIII Part 3 point 45]

5.4.49

FCA PRA

R

A *firm* using the *own estimates of volatility adjustments approach* must estimate volatility of the collateral or foreign exchange mismatch without

taking into account any correlations between the unsecured *exposure*, collateral and/or exchange rates.

[Note: *BCD* Annex VIII Part 3 point 46]

The financial collateral comprehensive method: Own estimates of volatility adjustments approach: Quantitative Criteria

5.4.50

FCA PRA

R

In calculating the volatility adjustments, a 99th percentile one-tailed confidence interval must be used.

[Note: *BCD* Annex VIII Part 3 point 47]

5.4.51

FCA PRA

R

The liquidation period is 20 *business days* for *secured lending transactions*; 5 *business days* for *repurchase transactions* except insofar as such transactions involve the transfer of *commodities* or guaranteed rights relating to title to commodities and *securities lending or borrowing transactions*; and 10 *business days* for other *capital market-driven transactions*.

[Note: *BCD* Annex VIII Part 3 point 48]

5.4.52

FCA PRA

R

A *firm* may use volatility adjustment numbers calculated according to shorter or longer liquidation periods, scaled up or down to the liquidation period set out in ■ BIPRU 5.4.51 R for the type of transaction in question, using the square root of time formula:

$$(H_M = H_N) \sqrt{T_M/T_N}$$

where:

- (1) T_M is the relevant liquidation period;
- (2) H_M is the volatility adjustment under T_M ; and
- (3) H_N is the volatility adjustment based on the liquidation period T_N .

[Note: *BCD* Annex VIII Part 3 point 49]

5.4.53

FCA PRA

R

A *firm* must take into account the illiquidity of lower-quality assets. The liquidation period must be adjusted upwards in cases where there is doubt concerning the liquidity of the collateral. A *firm* must also identify where historical data may understate potential volatility, e.g. a pegged currency. Such cases must be dealt with by means of stress scenario assessments .

[Note: *BCD* Annex VIII Part 3 point 50]

5.4.54

FCA PRA

R

The historical observation period (sample period) for calculating volatility adjustments must be a minimum length of one year. For a *firm* that uses

a weighting scheme or other methods for the historical observation period, the effective observation period must be at least one year (that is, the weighted average time lag of the individual observations must not be less than 6 months).

[Note: BCD Annex VIII Part 3 point 51]

5.4.55

FCA PRA

G

The *appropriate regulator* may also require a *firm* to calculate its volatility adjustments using a shorter observation period if, in the *appropriate regulator's* judgement, this is justified by a significant upsurge in price volatility.

5.4.56

FCA PRA

R

A *firm* must update its data sets at least once every three months and must also reassess them whenever market prices are subject to material changes. This implies that volatility adjustments must be computed at least every three months.

[Note: BCD Annex VIII Part 3 point 52]

The financial collateral comprehensive method: Own estimates of volatility adjustments approach: Qualitative Criteria

5.4.57

FCA PRA

R

The volatility estimates must be used in the day-to-day risk management process of a *firm* including in relation to its internal *exposure* limits.

[Note: BCD Annex VIII Part 3 point 53]

5.4.58

FCA PRA

R

If the liquidation period used by a *firm* in its day-to-day risk management process is longer than that set out in ■ BIPRU 5.4 for the type of transaction in question, the *firm's* volatility adjustments must be scaled up in accordance with the square root of time formula set out in ■ BIPRU 5.4.52 R.

[Note: BCD Annex VIII Part 3 point 54]

5.4.59

FCA PRA

R

A *firm* must have established procedures for monitoring and ensuring compliance with a documented set of policies and controls for the operation of its system for the estimation of volatility adjustments and for the integration of such estimations into its risk management process.

[Note: BCD Annex VIII Part 3 point 55]

5.4.60

FCA PRA

R

An independent review of a *firm's* system for the estimation of volatility adjustments must be carried out regularly in the *firm's* own internal auditing process. A review of the overall system for the estimation of volatility adjustments and for integration of those adjustments into the *firm's* risk management process must take place at least once a year and must specifically address, at a minimum:

- (1) the integration of estimated volatility adjustments into daily risk management;

- (2) the validation of any significant change in the process for the estimation of volatility adjustments;
- (3) the verification of the consistency, timeliness and reliability of data sources used to run the system for the estimation of volatility adjustments, including the independence of such data sources; and
- (4) the accuracy and appropriateness of the volatility assumptions.

[Note: BCD Annex VIII Part 3 point 56]

The financial collateral comprehensive method: Scaling up of volatility adjustments

5.4.61

FCA PRA

R

The volatility adjustments set out in ■ BIPRU 5.4.34 R to ■ BIPRU 5.4.43 R are the volatility adjustments to be applied where there is daily revaluation. Similarly, where a *firm* uses its own estimates of the volatility adjustments in accordance with ■ BIPRU 5.4.45 R to ■ BIPRU 5.4.60 R, these must be calculated in the first instance on the basis of daily revaluation. If the frequency of revaluation is less than daily, larger volatility adjustments must be applied. These must be calculated by scaling up the daily revaluation volatility adjustments, using the following 'square root of time' formula:

$$(H = H_M \sqrt{(N_R + (T_M - 1)) / (T_M)})$$

where:

- (1) H is the volatility adjustment to be applied;
- (2) H_M is the volatility adjustment where there is daily revaluation;
- (3) N_R is the actual number of business days between revaluations;
and
- (4) T_M is the liquidation period for the type of transaction in question.

[Note: BCD Annex VIII Part 3 point 57]

The financial collateral comprehensive method: Conditions for applying a 0% volatility adjustment

5.4.62

FCA PRA

R

In relation to *repurchase transaction* and *securities lending or borrowing transactions*, where a *firm* uses the *supervisory volatility adjustments approach* or the *own estimates of volatility adjustments approach* and where the conditions set out in (1) - (8) are satisfied, a *firm* may, instead of applying the volatility adjustments calculated under ■ BIPRU 5.4.30 R to ■ BIPRU 5.4.61 R, apply a 0% volatility adjustment:

- (1) both the *exposure* and the collateral are cash or *debt securities* issued by central governments or *central banks* within the meaning of ■ BIPRU 5.4.2 R (2) and eligible for a 0% *risk weight* under the *standardised approach*;
- (2) both the *exposure* and the collateral are denominated in the same currency;
- (3) either the maturity of the transaction is no more than one day or both the *exposure* and the collateral are subject to daily marking-to-market or daily remargining;
- (4) it is considered that the time between the last marking-to-market before a failure to remargin by the counterparty and the liquidation of the collateral is no more than four business days;
- (5) the transaction is settled across a settlement system proven for that type of transaction;
- (6) the documentation covering the agreement is standard market documentation for *repurchase transactions* or *securities lending or borrowing transactions* in the *securities* concerned;
- (7) the transaction is governed by documentation specifying that if the counterparty fails to satisfy an obligation to deliver cash or *securities* or to deliver margin or otherwise defaults, then the transaction is immediately terminable; and
- (8) the counterparty is a *core market participant*.

[Note: BCD Annex VIII Part 3 point 58 (part)]

5.4.63

FCA PRA

R

The option in ■ BIPRU 5.4.62 R is not available in respect of a *firm* using the *master netting agreement internal models approach*.

[Note: BCD Annex VIII Part 3 point 58 (part)]

5.4.64

FCA PRA

R

Core market participant means the following entities:

- (1) the entities mentioned in ■ BIPRU 5.4.2 R (2) *exposures* to which are assigned a 0% *risk weight* under the *standardised approach* to credit risk;
- (2) *institutions*;
- (3) other financial companies (including insurance companies) *exposures* which are assigned a 20% *risk weight* under the *standardised approach*;

- (4) regulated *CIUs* that are subject to capital or leverage requirements;
- (5) regulated pension funds; and
- (6) a *recognised clearing house* or *designated clearing house*.

[Note: *BCD* Annex VIII Part 3 point 58 (part)]

5.4.65

FCA PRA

R

If under the *CRD implementation measure* for a particular *EEA State* with respect to point 58 of Part 3 of Annex VIII of the *Banking Consolidation Directive* (Conditions for applying the 0% volatility adjustment) the treatment set out in that point is permitted to be applied in the case of *repurchase transactions* or *securities lending or borrowing transactions* in *securities* issued by the domestic government of that *EEA State*, then a *firm* may adopt the same approach to the same transactions.

[Note: *BCD* Annex VIII Part 3 point 59]

Financial collateral comprehensive method: Calculating risk-weighted exposure amounts

5.4.66

FCA PRA

R

Under the *standardised approach* E^* as calculated under ■ BIPRU 5.4.28 R must be taken as the *exposure* value for the purposes of ■ BIPRU 3.2.20 R to ■ BIPRU 3.2.26 R. In the case of off-balance sheet items listed in ■ BIPRU 3.7, E^* must be taken as the value to which the percentages indicated in ■ BIPRU 3.2.1 R and ■ BIPRU 3.7.2 R must be applied to arrive at the *exposure* value.

[Note: *BCD* Annex VIII Part 3 point 60]

5.5 Other funded credit risk mitigation

Deposits with third parties: Eligibility

5.5.1

FCA PRA

R

Cash on deposit with, or *cash assimilated instruments* held by, a third party *institution* in a non-custodial arrangement and pledged to a *lending firm* may be recognised as eligible credit protection.

[Note: BCD Annex VIII Part 1 point 23]

Deposits with third parties: Minimum requirements

5.5.2

FCA PRA

R

To be eligible for the treatment set out at ■ BIPRU 5.5.3 R, the protection referred to in ■ BIPRU 5.5.1 R must satisfy the following conditions:

- (1) the borrower's claim against the third party *institution* is openly pledged or assigned to the *lending firm* and such pledge or assignment is legally effective and enforceable in all relevant jurisdictions;
- (2) the third party *institution* is notified of the pledge or assignment;
- (3) as a result of the notification, the third party *institution* is able to make payments solely to the *lending firm* or to other parties with the *lending firm's* consent; and
- (4) the pledge or assignment is unconditional and irrevocable.

[Note: BCD Annex VIII Part 2 point 12]

Deposits with third parties: Calculating the effects of the credit risk mitigation

5.5.3

FCA PRA

R

Where the conditions set out in ■ BIPRU 5.5.2 R are satisfied, credit protection falling within the terms of ■ BIPRU 5.5.1 R may be treated as a guarantee by the third party *institution*.

[Note: BCD Annex VIII Part 3 point 79]

5.5.4

FCA PRA

R

Life insurance policies: Eligibility

Life insurance policies pledged to a *lending firm* may be recognised as eligible credit protection.

[Note: BCD Annex VIII Part 1 point 24]

5.5.5

FCA PRA

R

Life insurance policies: Minimum requirements

For life insurance policies pledged to a *lending firm* to be recognised the following conditions must be met:

- (1) the party providing the life insurance must be subject to Directive 2002/83/EC and Directive 2001/17/EC of the European Parliament and of the Council, or is subject to supervision by a competent authority of a third country which applies supervisory and regulatory arrangements at least equivalent to those applied in the Community;
- (2) the life insurance policy is openly pledged or assigned to the *lending firm*;
- (3) the party providing the life insurance is notified of the pledge or assignment and as a result may not pay amounts payable under the contract without the consent of the *lending firm*;
- (4) the *surrender value* is declared by the company providing the life insurance and is non-reducible;
- (4A) the *surrender value* must be paid in a timely manner upon request;
- (4B) the *surrender value* must not be requested without the consent of the *lending firm*;
- (5) the *lending firm* must have the right to cancel the policy and receive the surrender value in a timely way in the event of the default of the borrower;
- (6) the *lending firm* is informed of any non-payments under the policy by the policyholder;
- (7) the credit protection must be provided for the maturity of the loan. Where this is not possible because the insurance relationship ends before the loan relationship expires, the *lending firm* must ensure that the amount deriving from the insurance contract serves the *lending firm* as security until the end of the duration of the credit agreement; and
- (8) the pledge or assignment must be legally effective and enforceable in all jurisdictions which are relevant at the time of the conclusion of the credit agreement.

[Note: BCD Annex VIII Part 2 point 13 (part)]

5.5.6

FCA PRA

R

Where it is not possible for a *firm* to meet the condition set out in ■ BIPRU 5.5.5 R (7), because the insurance relationship ends before the loan relationship expires, the *firm* must ensure that the amount deriving from the insurance contract serves the *firm* as security until the end of the duration of the credit agreement.

[Note: BCD Annex VIII Part 2 point 13 (part)]

Life insurance policies: Calculating the effects of the credit risk mitigation

5.5.7

FCA PRA

R

- (1) Where the conditions set out in ■ BIPRU 5.5.5 R are satisfied, the portion of the *exposure* collateralised by the current *surrender value* of credit protection falling within the terms of ■ BIPRU 5.5.4 R must be either:
 - (a) subject to the *risk weights* specified in (3) where the *exposure* is subject to the *standardised approach* to credit risk; or
 - (b) assigned an *LGD* of 40% where the *exposure* is subject to the *IRB approach* but not subject to the *firm's* own estimates of *LGD*.
- (2) In case of a currency mismatch, the current *surrender value* must be reduced according to ■ BIPRU 5.7.17 R and ■ BIPRU 5.7.18R, the value of the credit protection being the current *surrender value* of the life insurance policy.
- (3) For the purpose of (1)(a), the following *risk weights* must be assigned on the basis of the *risk weight* assigned to a senior unsecured *exposure* to the company providing the life insurance:
 - (a) a *risk weight* of 20%, where the senior unsecured *exposure* to the company providing the life insurance is assigned a *risk weight* of 20%;
 - (b) a *risk weight* of 35%, where the senior unsecured *exposure* to the company providing the life insurance is assigned a *risk weight* of 50%;
 - (c) a *risk weight* of 70%, where the senior unsecured *exposure* to the company providing the life insurance is assigned a *risk weight* of 100%; and
 - (d) a *risk weight* of 150%, where the senior unsecured *exposure* to the company providing the life insurance is assigned a *risk weight* of 150%.

[Note: BCD Annex VIII Part 3 point 80]

5.5.8

FCA PRA

R

Instruments purchased on request: Eligibility

Instruments issued by third party *institutions* which will be repurchased by that *institution* on request may be recognised as eligible credit protection.

[Note: *BCD* Annex VIII Part 1 point 25]

Instruments purchased on request: Calculating the effects of the credit risk mitigation

5.5.9

FCA PRA

R

Instruments eligible under ■ BIPRU 5.5.8 R may be treated as a guarantee by the issuing *institution*.

[Note: *BCD* Annex VIII Part 3 point 81]

5.5.10

FCA PRA

R

For the purposes of ■ BIPRU 5.5.9 R, the value of the credit protection recognised is the following:

- (1) where the instrument will be repurchased at its face value, the value of the protection is that amount; or
- (2) where the instrument will be repurchased at market price, the value of the protection is the value of the instrument valued in the same way as the *debt securities* specified in ■ BIPRU 5.4.5 R.

[Note: *BCD* Annex VIII Part 3 point 82]

Credit linked notes

5.5.11

FCA PRA

R

Investments in credit linked notes issued by a *lending firm* may be treated as cash collateral.

[Note: *BCD* Annex VIII Part 3 point 3]

5.6 Master netting agreements

Eligibility

5.6.1

FCA PRA

R

- (1) For a *firm* adopting the *financial collateral comprehensive method*, the effects of bilateral netting contracts covering *repurchase transactions, securities or commodities lending or borrowing transactions*, and/or other *capital market-driven transactions* with a counterparty may be recognised.
- (2) Without prejudice to ■ BIPRU 14 to be recognised the collateral taken and *securities or commodities* borrowed within such agreements must comply with the eligibility requirements for collateral set out at ■ BIPRU 5.4.2 R to ■ BIPRU 5.4.8 R.

[Note: BCD Annex VIII Part 1 point 5]

Minimum requirements

5.6.2

FCA PRA

R

For master netting agreements covering *repurchase transactions* and/or *securities or commodities lending or borrowing transactions* and/or other *capital market-driven transactions* to be recognised for the purposes of ■ BIPRU 5, they must:

- (1) be legally effective and enforceable in all relevant jurisdictions, including in the event of the bankruptcy or insolvency of the counterparty;
- (2) give the non-defaulting party the right to terminate and close-out in a timely manner all transactions under the agreement upon the event of default, including in the event of the bankruptcy or insolvency of the counterparty; and
- (3) provide for the netting of gains and losses on transactions closed out under a master agreement so that a single net amount is owed by one party to the other.

[Note: BCD Annex VIII Part 2 point 4]

5.6.3 **R** In addition the minimum requirements for the recognition of financial collateral under the *financial collateral comprehensive method* set out in **■ BIPRU 5.4.9 R** must be fulfilled.

FCA **PRA**

[Note: *BCD* Annex VIII Part 2 point 5]

Calculation of the fully adjusted exposure value: the supervisory volatility adjustments approach and the own estimates of volatility adjustments approach

5.6.4 **R** **■ BIPRU 5.6.5 R** to **■ BIPRU 5.6.11 R** set out the calculation of the fully adjusted *exposure* value under the *supervisory volatility adjustments approach* and the *own estimates of volatility adjustments approach*.

FCA **PRA**

5.6.5 **R** In calculating the 'fully adjusted *exposure* value' (E^*) for the *exposures* subject to an eligible master netting agreement covering *repurchase transactions* and/or *securities or commodities lending or borrowing transactions* and/or other *capital market-driven transactions*, a firm must calculate the volatility adjustments to be applied in the manner set out in **■ BIPRU 5.6.6 R** to **■ BIPRU 5.6.11 R** either using the *supervisory volatility adjustments approach* or the *own estimates of volatility adjustments approach* as set out in **■ BIPRU 5.4.30 R** to **■ BIPRU 5.4.65 R** for the *financial collateral comprehensive method*. For the use of the *own estimates of volatility adjustments approach* the same conditions and requirements apply as under the *financial collateral comprehensive method*.

FCA **PRA**

[Note: *BCD* Annex VIII Part 3 point 5]

5.6.6 **R** A firm must calculate the net position in each type of *security* or *commodity* by subtracting from the total value of the *securities* or *commodities* of that type lent, sold or provided under the master netting agreement, the total value of *securities* or *commodities* of that type borrowed, purchased or received under the agreement.

FCA **PRA**

[Note: *BCD* Annex VIII Part 3 point 6]

5.6.7 **R** For the purposes of **■ BIPRU 5.6.6 R**, type of *security* means *securities* which are issued by the same entity, have the same issue date, the same maturity and are subject to the same terms and conditions and are subject to the same liquidation periods as indicated in **■ BIPRU 5.4.30 R** to **■ BIPRU 5.4.65 R**.

FCA **PRA**

[Note: *BCD* Annex VIII Part 3 point 7]

5.6.8 **R** A firm must calculate the net position in each currency other than the settlement currency of the master netting agreement by subtracting from the total value of *securities* denominated in that currency lent, sold or provided under the master netting agreement added to the amount of cash in that currency lent or transferred under the agreement, the total value of *securities* denominated in that currency borrowed, purchased or received

FCA **PRA**

under the agreement added to the amount of cash in that currency borrowed or received under the agreement.

[Note: BCD Annex VIII Part 3 point 8]

5.6.9

FCA PRA

R

A *firm* must apply the volatility adjustment appropriate to a given type of *security* or cash position to the absolute value of the positive or negative net position in the *securities* of that type.

[Note: BCD Annex VIII Part 3 point 9]

5.6.10

FCA PRA

R

A *firm* must apply the foreign exchange risk (fx) volatility adjustment to the net positive or negative position in each currency other than the settlement currency of the master netting agreement.

[Note: BCD Annex VIII Part 3 point 10]

5.6.11

FCA PRA

R

E^* must be calculated according to the following formula:

$$E^* = \max \{0, [(\sum(E) - \sum(C)) + \sum(|\text{net position in each security}| \times H_{\text{sec}}) + (\sum|E_{\text{fx}}| \times H_{\text{fx}})]\}$$

where:

- (1) (where *risk weighted exposure amounts* are calculated under the *standardised approach*) E is the *exposure* value for each separate *exposure* under the agreement that would apply in the absence of the credit protection;
- (2) C is the value of the *securities* or *commodities* borrowed, purchased or received or the cash borrowed or received in respect of each such *exposure*;
- (3) $\sum(E)$ is the sum of all Es under the agreement;
- (4) $\sum(C)$ is the sum of all Cs under the agreement;
- (5) E_{fx} is the net position (positive or negative) in a given currency other than the settlement currency of the agreement as calculated under ■ BIPRU 5.6.8 R;
- (6) H_{sec} is the volatility adjustment appropriate to a particular type of *security*;
- (7) H_{fx} is the foreign exchange volatility adjustment; and
- (8) E^* is the fully adjusted *exposure* value.

[Note: BCD Annex VIII Part 3 point 11]

Calculation of the fully adjusted exposure value: the master netting agreement internal models approach

5.6.12

FCA PRA

R

■ BIPRU 5.6.16 R to ■ BIPRU 5.6.28 G apply to a *firm* that has a *master netting agreement internal models approach permission* and set out the calculation of the effects of *credit risk mitigation* under the *master netting agreement internal models approach*.

5.6.13

FCA PRA

G

A *firm* that wishes to use the *master netting agreement internal models approach* will need to apply to the *appropriate regulator* for a *master netting agreement internal models approach permission*. ■ BIPRU 1.3 sets out the requirements and procedures relating to those applications.

5.6.14

FCA PRA

G

A *master netting agreement internal models approach permission* will amend, to the extent set out in the *master netting agreement internal models approach permission*, ■ BIPRU 5.6.1 R so as to provide that, with the exceptions provided in ■ BIPRU 5.6, a *firm* must use the *master netting agreement internal models approach* for the purposes of the calculations specified in ■ BIPRU 5.6.

5.6.15

FCA PRA

G

A *firm* which has been granted a *VaR model waiver* will still need to make an application to the *appropriate regulator* for a *master netting agreement internal models approach permission*. However, the application should generally be straightforward as a *firm* which is able to satisfy the requirements for a *VaR model waiver* should usually also be able to satisfy the requirements for a *master netting agreement internal models approach permission*.

[Note: BCD Annex VIII Part 3 point 14]

5.6.16

FCA PRA

R

The *master netting agreement internal models approach* is an alternative to using the *supervisory volatility adjustments approach* or the *own estimates of volatility adjustments approach* in calculating volatility adjustments for the purpose of calculating the 'fully adjusted exposure value' (E^*) resulting from the application of an eligible master netting agreement covering *repurchase transactions, securities or commodities lending or borrowing transactions* and/or other *capital market-driven transactions* other than derivative transactions. The *master netting agreement internal models approach* takes into account correlation effects between security positions subject to a master netting agreement as well as the liquidity of the instruments concerned. The internal model used for the *master netting agreement internal models approach* must provide estimates of the potential change in value of the unsecured *exposure* amount ($\Sigma E - \Sigma C$).

[Note: BCD Annex VIII Part 3 point 12 (part)]

5.6.17

FCA PRA

R

A *firm* may also use the internal model used for the *master netting agreement internal models approach* for *margin lending transactions* if

the transactions are covered under the *firm's master netting agreement internal models approach permission* and the transactions are covered by a bilateral master netting agreement that meets the requirements set out in ■ BIPRU 13.7.

[Note: BCD Annex VIII Part 3 point 12 (part)]

5.6.18

FCA PRA

R

A *firm* may use the *master netting agreement internal models approach* independently of the choice it has made between the *standardised approach* and the *IRB approach* for the calculation of *risk weighted exposure amounts*. However, if a *firm* uses the *master netting agreement internal models approach*, it must do so for all counterparties and *securities*, excluding immaterial portfolios where it may use the *supervisory volatility adjustments approach* or the *own estimates of volatility adjustments approach* as set out in ■ BIPRU 5.4.30 R to ■ BIPRU 5.4.65 R.

[Note: BCD Annex VIII Part 3 point 13]

5.6.19

FCA PRA

R

- (1) A *firm* must be able to satisfy the *appropriate regulator* that the *firm's* risk management system for managing the risks arising on the transactions covered by the master netting agreement is conceptually sound and implemented with integrity and that, in particular, the minimum qualitative standards in (2) - (11) are met.
- (2) The internal risk-measurement model used for calculation of potential price volatility for the transactions is closely integrated into the daily risk-management process of the *firm* and serves as the basis for reporting risk *exposures* to senior management of the *firm*.
- (3) The *firm* has a risk control unit that is independent from business trading units and reports directly to senior management. The unit must be responsible for designing and implementing the *firm's* risk-management system. It must produce and analyse daily reports on the output of the risk-measurement model and on the appropriate measures to be taken in terms of position limits.
- (4) The daily reports produced by the risk-control unit are reviewed by a level of management with sufficient authority to enforce reductions of positions taken and of overall risk *exposure*.
- (5) The *firm* has sufficient staff skilled in the use of sophisticated models in the risk control unit.
- (6) The *firm* has established procedures for monitoring and ensuring compliance with a documented set of internal policies and

controls concerning the overall operation of the risk-measurement system.

- (7) The *firm's* models have a proven track record of reasonable accuracy in measuring risks demonstrated through the back-testing of its output using at least one year of data.
- (8) The *firm* frequently conducts a rigorous programme of stress testing and the results of these tests are reviewed by senior management and reflected in the policies and limits it sets.
- (9) The *firm* must conduct, as part of its regular internal auditing process, an independent review of its risk-measurement system. This review must include both the activities of the business trading units and of the independent risk-control unit.
- (10) At least once a year, the *firm* must conduct a review of its risk management system.
- (11) The internal model used for the *master netting agreement internal models approach* must meet the requirements set out in ■ BIPRU 13.6.65 R to ■ BIPRU 13.6.67 R.

[Note: BCD Annex VIII Part 3 point 16]

5.6.19A

FCA PRA

G

This paragraph provides *guidance* in relation to ■ BIPRU 5.6.19R (8). In carrying out the stress testing programme, a *firm* should evaluate the simultaneous impact of individual stress scenarios on its *counterparty exposures*, its *positions* and the aggregate amount of margin calls that it would receive. A *firm's* stress scenarios should take into account the possibility that the liquidation period may be substantially longer than 5 days for *repurchase transactions* and securities lending or borrowing transactions, and 10 days for other types of *securities financing transactions*.

5.6.20

FCA PRA

R

The calculation of the potential change in value must be subject to the following minimum standards:

- (1) at least daily calculation of the potential change in value;
- (2) a 99th percentile, one-tailed confidence interval;
- (3) a 5-day equivalent liquidation period, except in the case of transactions other than securities *repurchase transaction* or *securities lending or borrowing transactions* where a 10-day equivalent liquidation period should be used;
- (4) an effective historical observation period of at least one year except where a shorter observation period is justified by a significant upsurge in price volatility; and

(5) three-monthly data set updates.

[Note: BCD Annex VIII Part 3 point 17]

5.6.21

FCA PRA

R

The internal risk-measurement model must capture a sufficient number of risk factors in order to capture all material price risks.

[Note: BCD Annex VIII Part 3 point 18]

5.6.22

FCA PRA

R

A *firm* may use empirical correlations within risk categories and across risk categories provided that it is able to satisfy the *appropriate regulator* that the *firm's* system for measuring correlations is sound and implemented with integrity.

[Note: BCD Annex VIII Part 3 point 19]

5.6.23

FCA PRA

G

The *appropriate regulator* will not grant a *master netting agreement internal models approach permission* if it is not satisfied that the standards in ■ BIPRU 5.6.19 R to ■ BIPRU 5.6.22 R are met.

5.6.24

FCA PRA

R

The fully adjusted *exposure* value (E^*) for a *firm* using the *master netting agreement internal models approach* must be calculated according to the following formula:

$$E^* = \max \{0, [(\sum E - \sum C) + (VaR \text{ output of the internal models})]\}$$

where

- (1) (where *risk weighted exposure amounts* are calculated under the *standardised approach*) E is the *exposure* value for each separate *exposure* under the agreement that would apply in the absence of the credit protection;
- (2) C is the value of the *securities* borrowed, purchased or received or the cash borrowed or received in respect of each such *exposure*;
- (3) $\sum (E)$ is the sum of all Es under the agreement; and
- (4) $\sum (C)$ is the sum of all Cs under the agreement.

[Note: BCD Annex VIII Part 3 point 20]

5.6.25

FCA PRA

R

In calculating *risk weighted exposure amounts* using the *master netting agreement internal models approach*, a *firm* must use the previous *business day's* model output.

[Note: BCD Annex VIII Part 3 point 21]

5.6.26

FCA PRA

G

No changes should be made to the internal model used for the *master netting agreement internal models approach* unless the change is not material. Material changes to such a model will require a variation of the *master netting agreement internal models approach permission*. Materiality is measured against the model as it was at the time that the *master netting agreement internal models approach permission* was originally granted or, any later date set out in the *master netting agreement internal models approach permission* for this purpose. If a *firm* is considering making material changes to such a model then it should notify the *appropriate regulator* at once.

5.6.27

FCA PRA

G

If a *firm* ceases to meet the requirements of ■ BIPRU 5 in relation to the *master netting agreement internal models approach*, the *firm* should notify the *appropriate regulator* at once.

5.6.28

FCA PRA

G

The *appropriate regulator* is likely to revoke a *master netting agreement internal models approach permission* if a *firm* ceases to meet the requirements of ■ BIPRU 5 in relation to the *master netting agreement internal models approach*.

Calculation of risk weighted exposure amounts under the standardised approach

5.6.29

FCA PRA

R

- (1) A *firm* must under the *standardised approach* calculate *risk weighted exposure amounts* for *repurchase transactions* and/or *securities or commodities lending or borrowing transactions* and/or other *capital market-driven transactions* covered by master netting agreements under this *rule*.
- (2) E^* as calculated under ■ BIPRU 5.6.5 R to ■ BIPRU 5.6.25 R must be taken as the *exposure* value of the *exposure* to the counterparty arising from the transactions subject to the master netting agreement for the purposes of ■ BIPRU 3.2.20 R to ■ BIPRU 3.2.26 R.

[Note: BCD Annex VIII Part 3 point 22]

5.7 Unfunded credit protection

Eligibility

5.7.1

FCA PRA

R

The following parties may be recognised as eligible providers of *unfunded credit protection*:

- (1) central governments and *central banks*;
- (2) regional governments or local authorities;
- (3) *multilateral development banks*;
- (4) *international organisations exposures* which are assigned a 0% *risk weight* under the *standardised approach*;
- (5) *public sector entities, claims* on which are treated as claims on *institutions* or central governments under the *standardised approach*;
- (6) *institutions*;
- (7) other corporate entities, including *parent undertakings, subsidiary undertakings* and affiliate corporate entities of the *firm*, that have a credit assessment by an *eligible ECAI* associated with *credit quality step 2* or above under the *rules* for the *risk weighting of exposures to corporates* under the *standardised approach*.

[Note: BCD Annex VIII Part 1 point 26]

Types of credit derivatives

5.7.2

FCA PRA

R

The following types of credit derivatives, and instruments that may be composed of such credit derivatives or that are economically effectively similar, may be recognised as eligible;

- (1) credit default swaps;
- (2) total return swaps; and

- (3) credit linked notes to the extent of their cash funding.

[Note: BCD Annex VIII Part 1 point 30]

5.7.3

FCA PRA

R

Where a *firm* buys credit protection through a total return swap and records the net payments received on the swap as net income, but does not record offsetting deterioration in the value of the asset that is protected (either through reductions in fair value or by an addition to reserves), the credit protection must not be recognised as eligible.

[Note: BCD Annex VIII Part 1 point 31]

Internal hedges

5.7.4

FCA PRA

R

When a *firm* conducts an internal hedge using a credit derivative - i.e. hedges the credit risk of an *exposure* in the *non-trading book* with a credit derivative booked in the *trading book* - in order for the protection to be recognised as eligible for the purposes of ■ BIPRU 4.10 or ■ BIPRU 5 the credit risk transferred to the *trading book* must be transferred out to a third party or parties. In such circumstances, subject to the compliance of such transfer with the requirements for the recognition of *credit risk mitigation* set out in ■ BIPRU 4.10 or ■ BIPRU 5, the *rules* for the calculation of *risk weighted exposure amounts* and *expected loss* amounts where *unfunded credit protection* is acquired set out in ■ BIPRU 4.10 or ■ BIPRU 5 must be applied.

[Note: BCD Annex VIII Part 1 point 32]

Minimum requirements: General

5.7.5

FCA PRA

R

■ BIPRU 5.7.6 R to ■ BIPRU 5.7.10 R deal with requirements common to guarantees and credit derivatives.

5.7.6

FCA PRA

R

Subject to ■ BIPRU 5.7.9 R, for the credit protection deriving from a guarantee or credit derivative to be recognised the following conditions must be met:

- (1) the credit protection must be direct;
- (2) the extent of the credit protection must be clearly defined and incontrovertible;
- (3) the credit protection contract must not contain any clause, the fulfilment of which is outside the direct control of the lender, that:
 - (a) would allow the protection provider unilaterally to cancel the protection;
 - (b) would increase the effective cost of protection as a result of deteriorating credit quality of the protected *exposure*;

(c) could prevent the protection provider from being obliged to pay out in a timely manner in the event that the original obligor fails to make any payments due; or

(d) could allow the maturity of the credit protection to be reduced by the protection provider; and

(4) it must be legally effective and enforceable in all jurisdictions which are relevant at the time of the conclusion of the credit agreement.

[Note: BCD Annex VIII Part 2 point 14]

5.7.7

FCA PRA

G

For the purposes of ■ BIPRU 5.7.6 R (3)(a), payment of premiums and other monies due under the contract is within the control of the *lending firm*. So a clause that allows the protection provider unilaterally to cancel the contract after a reasonable period due to non payment of such monies will not mean that the condition in that *rule* is not met.

Minimum requirements: Operational requirements

5.7.8

FCA PRA

R

A *firm* must be able to satisfy the *appropriate regulator* that it has systems in place to manage potential concentration of risk arising from the *firm's* use of guarantees and credit derivatives. The *firm* must be able to demonstrate how its strategy in respect of its use of credit derivatives and guarantees interacts with its management of its overall risk profile.

[Note: BCD Annex VIII Part 2 point 15]

Minimum requirements: Sovereign and other public sector counter-guarantees

5.7.9

FCA PRA

R

Where an *exposure* is protected by a guarantee which is counter-guaranteed by a central government or *central bank*, a regional government or local authority or a *public sector entity* claims on which are treated as claims on the central government in whose jurisdiction they are established under the *standardised approach*, a *multilateral development bank* or an *international organisation*, to which a 0% *risk weight* is assigned under or by virtue of the *standardised approach*, or a *public sector entity*, claims on which are treated as claims on *credit institutions* under the *standardised approach*, the *exposure* may be treated as protected by a guarantee provided by the entity in question provided the following conditions are satisfied:

- (1) the counter-guarantee covers all credit risk elements of the claim;
- (2) both the original guarantee and the counter-guarantee meet the requirements for guarantees set out in ■ BIPRU 5.7.6 R, ■ BIPRU 5.7.8 R and ■ BIPRU 5.7.11 R, except that the counter-guarantee need not be direct; and

- (3) the *firm* is able to satisfy the *appropriate regulator* that the cover is robust and that nothing in the historical evidence suggests that the coverage of the counter-guarantee is less than effectively equivalent to that of a direct guarantee by the entity in question.

[Note: BCD Annex VIII Part 2 point 16]

5.7.10

FCA PRA

R

The treatment of ■ BIPRU 5.7.9 R applies, also, to an *exposure* which is not counter-guaranteed by an entity listed in that *rule* if the *exposure's* counter-guarantee is in its turn directly guaranteed by one of the listed entities and the conditions listed in ■ BIPRU 5.7.9 R are satisfied.

[Note: BCD Annex VIII Part 2 point 17]

Additional requirements for guarantees

5.7.11

FCA PRA

R

For a guarantee to be recognised the following conditions must also be met:

- (1) on the qualifying default of and/or non-payment by the counterparty, the *lending firm* must have the right to pursue, in a timely manner, the guarantor for any monies due under the claim in respect of which the protection is provided;
- (2) payment by the guarantor must not be subject to the *lending firm* first having to pursue the obligor;
- (3) in the case of *unfunded credit protection* covering residential mortgage loans, the requirements in ■ BIPRU 5.7.6 R (3)(c) and in this *rule* have only to be satisfied within 24 months;
- (4) the guarantee must be an explicitly documented obligation assumed by the guarantor;
- (5) subject to (6), the guarantee must cover all types of payments the obligor is expected to make in respect of the claim; and
- (6) where certain types of payment are excluded from the guarantee, the recognised value of the guarantee must be adjusted to reflect the limited coverage.

[Note: BCD Annex VIII Part 2 point 18]

5.7.12

FCA PRA

R

In the case of guarantees provided in the context of mutual guarantee schemes recognised for these purposes by another EEA *competent authority* under a *CRD implementation measure* with respect to point 19 of Part 2 of Annex VIII of the *Banking Consolidation Directive* or provided by or counter-guaranteed by entities referred to in ■ BIPRU 5.7.9 R, the requirements in ■ BIPRU 5.7.11 R (1) - ■ (3) will be satisfied where either of the following conditions are met:

- (1) the *lending firm* has the right to obtain in a timely manner a provisional payment by the guarantor calculated to represent a robust estimate of the amount of the economic *loss*, including losses resulting from the non-payment of interest and other types of payment which the borrower is obliged to make, likely to be incurred by the *lending firm* proportional to the coverage of the guarantee; or
- (2) the *lending firm* is able to demonstrate to the *appropriate regulator* that the loss-protecting effects of the guarantee, including losses resulting from the non-payment of interest and other types of payments which the borrower is obliged to make, justify such treatment.

[Note: BCD Annex VIII Part 2 point 19]

Additional requirements for credit derivatives

5.7.13

FCA PRA

R

For a credit derivative to be met the following conditions must also be met.

- (1) Subject to (2), the credit events specified under the credit derivative must at a minimum include:
 - (a) the failure to pay the amounts due under the terms of the underlying obligation that are in effect at the time of such failure (with a grace period that is closely in line with or shorter than the grace period in the underlying obligation);
 - (b) the bankruptcy, insolvency or inability of the obligor to pay its debts, or its failure or admission in writing of its inability generally to pay its debts as they become due, and analogous events; and
 - (c) the restructuring of the underlying obligation involving forgiveness or postponement of principal, interest or fees that results in a credit loss event (i.e. value adjustment or other similar debit to the profit and loss account).
- (2) Where the credit events specified under the credit derivative do not include restructuring of the underlying obligation as described in (1)(c), the credit protection may nonetheless be recognised subject to a reduction in the recognised value as specified in ■ BIPRU 5.7.16 R.
- (3) In the case of credit derivatives allowing for cash settlement a robust valuation process must be in place in order to estimate loss reliably. There must be a clearly specified period for obtaining post-credit-event valuations of the underlying obligation.

- (4) If the protection purchaser's right and ability to transfer the underlying obligation to the protection provider is required for settlement, the terms of the underlying obligation must provide that any required consent to such transfer may not be unreasonably withheld.
- (5) The identity of the parties responsible for determining whether a credit event has occurred must be clearly defined. This determination must not be the sole responsibility of the protection provider. The protection buyer must have the right/ability to inform the protection provider of the occurrence of a credit event.

[Note: BCD Annex VIII Part 2 point 20]

5.7.14

FCA PRA

R

A mismatch between the underlying obligation and the reference obligation under the credit derivative (i.e. the obligation used for the purposes of determining cash settlement value or the deliverable obligation) or between the underlying obligation and the obligation used for purposes of determining whether a credit event has occurred is permissible only if the following conditions are met:

- (1) the reference obligation or the obligation used for purposes of determining whether a credit event has occurred, as the case may be, ranks *pari passu* with or is junior to the underlying obligation; and
- (2) the underlying obligation and the reference obligation or the obligation used for purposes of determining whether a credit event has occurred, as the case may be, share the same obligor (i.e., the same legal entity) and there are in place legally enforceable cross-default or cross-acceleration clauses.

[Note: BCD Annex VIII Part 2 point 21]

Unfunded credit protection: Valuation

5.7.15

FCA PRA

R

■ BIPRU 5.7.16 R to ■ BIPRU 5.7.19 R set out the provisions applying to the valuation of *unfunded credit protection*.

5.7.16

FCA PRA

R

- (1) The value of *unfunded credit protection* (G) is the amount that the protection provider has undertaken to pay in the event of the default or non-payment of the borrower or on the occurrence of other specified credit events.
- (2) In the case of credit derivatives which do not include as a credit event restructuring of the underlying obligation involving forgiveness or postponement of principal, interest or fees that result in a credit loss event (e.g. value adjustment, the making of a value adjustment or other similar debit to the profit and loss account):

- (a) where the amount that the protection provider has undertaken to pay is not higher than the *exposure* value, the value of the credit protection calculated under (1) must be reduced by 40%; or
- (b) where the amount that the protection provider has undertaken to pay is higher than the *exposure* value, the value of the credit protection must be no higher than 60% of the *exposure* value.

[Note: BCD Annex VIII Part 3 point 83]

5.7.17

FCA PRA

R

Where *unfunded credit protection* is denominated in a currency different from that in which the *exposure* is denominated (a currency mismatch) the value of the credit protection must be reduced by the application of a volatility adjustment H_{FX} as follows:

$$G^* = G \times (1 - H_{FX})$$

where:

- (1) G is the nominal amount of the credit protection;
- (2) G^* is G adjusted for any *foreign currency* risk; and
- (3) H_{FX} is the volatility adjustment for any currency mismatch between the credit protection and the underlying obligation.

[Note: BCD Annex VIII Part 3 point 84 (part)]

5.7.18

FCA PRA

R

Where there is no currency mismatch:

$$G^* = G$$

[Note: BCD Annex VIII Part 3 point 84 (part)]

5.7.19

FCA PRA

R

The volatility adjustments to be applied for any currency mismatch may be calculated based on the *supervisory volatility adjustments approach* or the *own estimates of volatility adjustments approach* as set out in ■ BIPRU 5.4.30 R to ■ BIPRU 5.4.65 R.

[Note: BCD Annex VIII Part 3 point 85]

Calculating risk weighted exposure amounts and expected loss amounts

5.7.20

FCA PRA

R

■ BIPRU 5.7.21 R to ■ BIPRU 5.7.28 R set out the provisions applying to the calculation of *risk weighted exposure amounts*.

5.7.21

FCA PRA

R

Calculating risk weighted exposure amounts: Partial protection - tranching

Where a *firm* transfers a part of the risk of a loan in one or more *tranches*, BIPRU 9 applies. Materiality thresholds on payments below which no payment shall be made in the event of loss are considered to be equivalent to retained first loss positions and to give rise to a *tranching* transfer of risk.

[Note: BCD Annex VIII Part 3 point 86]

5.7.22

FCA PRA

R

Calculating risk-weighted exposure amounts : The standardised approach

■ BIPRU 5.7.23 R to ■ BIPRU 5.7.25 R set out the provisions applying to the calculation of *risk weighted exposure amounts* under the *standardised approach* in the case of *unfunded credit protection*.

Calculating risk weighted exposure amounts: standardised approach: Full protection

5.7.23

FCA PRA

R

For the purposes of ■ BIPRU 3.2.20 R to ■ BIPRU 3.2.26 R, *g* shall be the *risk weight* to be assigned to an *exposure*, the *exposure* value (*E*) of which is fully protected by *unfunded credit protection* (G_A), where:

- (1) *g* is the *risk weight* of *exposures* to the protection provider as specified under the *standardised approach*;
- (2) G_A is the value of G^* as calculated under ■ BIPRU 5.7.17 R further adjusted for any maturity mismatch as laid down in ■ BIPRU 5.8; and
- (3) *E* is the *exposure* value according to ■ BIPRU 3.2.1 R to ■ BIPRU 3.2.3 R and ■ BIPRU 13; for this purpose the *exposure* value of an off-balance sheet item listed in ■ BIPRU 3.7.2 R shall be 100% of its value rather than the *exposure* value indicated in ■ BIPRU 3.2.1 R.

[Note: BCD Annex VIII Part 3 point 87]

Calculating risk weighted exposure amounts: Standardised approach: Partial protection - equal seniority

5.7.24

FCA PRA

R

Where the protected amount is less than the *exposure* value and the protected and unprotected portions are of equal seniority - i.e. the *firm* and the protection provider share losses on a pro-rata basis, proportional regulatory capital relief is afforded. For the purposes of ■ BIPRU 3.2.20 R to ■ BIPRU 3.2.26 R *risk weighted exposure amounts* must be calculated in accordance with the following formula:

$$(E - G_A) \times r + G_A \times g$$

where:

- (1) E is the *exposure* value; according to ■ BIPRU 3.2.1 R to ■ BIPRU 3.2.3 R and ■ BIPRU 13; for this purpose, the *exposure* value of an off-balance sheet item listed in ■ BIPRU 3.7.2 R shall be 100% of its value rather than the *exposure* value indicated in ■ BIPRU 3.2.1 R;
- (2) G_A is the value of G^* as calculated under ■ BIPRU 5.7.17 R further adjusted for any maturity mismatch as laid down in ■ BIPRU 5.8;
- (3) r is the *risk weight* of *exposures* to the obligor as specified under the *standardised approach*; and
- (4) g is the *risk weight* of *exposures* to the protection provider as specified under the *standardised approach*.

[Note: BCD Annex VIII Part 3 point 88]

Calculating risk weighted exposure amounts: standardised approach: Sovereign guarantees

5.7.25

FCA PRA

R

A *firm* may apply the treatment provided for in ■ BIPRU 3.4.5 R to ■ BIPRU 3.4.7 R to *exposures* or parts of *exposures* guaranteed by the central government or *central bank*, where the guarantee is denominated in the domestic currency of the borrower and the *exposure* is funded in that currency.

[Note: BCD Annex VIII Part 3 point 89]

Calculating risk-weighted exposure amounts and expected loss amounts: Basket CRM techniques

5.7.26

FCA PRA

R

■ BIPRU 5.7.27 R to ■ BIPRU 5.7.28 R set out the provisions applying to the calculation of *risk weighted exposure amount* and *expected loss* amounts where *basket credit risk mitigation* techniques are used.

First-to-default credit derivatives

5.7.27

FCA PRA

R

Where a *firm* obtains credit protection for a number of *exposures* under terms that the first default among the *exposures* will trigger payment and that this credit event will terminate the contract, the *firm* may modify the calculation of the *risk weighted exposure amount* and, as relevant, the *expected loss* amount of the *exposure* which would in the absence of the credit protection produce the lowest *risk weighted exposure amount* under the *standardised approach* or the *IRB approach* as appropriate in accordance with ■ BIPRU 4.10 or ■ BIPRU 5, but only if the *exposure* value is less than or equal to the value of the credit protection.

[Note: BCD Annex VIII Part 6 point 1]

5.7.28

FCA PRA

R

Nth-to-default credit derivatives

Where the *n*th default among the *exposures* triggers payment under the credit protection provided by a credit derivative, a *firm* purchasing the protection may only recognise the protection for the calculation of *risk weighted exposure amounts* and, as relevant, *expected loss* amounts if protection has also been obtained for defaults 1 to *n*-1 or when *n*-1 defaults have already occurred. In such cases the methodology must follow that set out in ■ BIPRU 5.7.27 R for first-to-default derivatives appropriately modified for *n*th-to-default products.

[Note: BCD Annex VIII Part 6 point 2]

5

5.8 Maturity mismatches

5.8.1

FCA PRA

R

For the purposes of calculating *risk weighted exposure amounts*, a maturity mismatch occurs when the residual maturity of the credit protection is less than that of the protected *exposure*. Protection of less than three months residual maturity, the maturity of which is less than the maturity of the underlying *exposure*, must not be recognised.

[Note: BCD Annex VIII Part 4 point 1]

5.8.2

FCA PRA

R

Where there is a maturity mismatch the credit protection must not be recognised where the original maturity of the protection is less than 1 year.

[Note: BCD Annex VIII Part 4 point 2 (part)]

Definition of maturity

5.8.3

FCA PRA

R

Subject to a maximum of 5 years, the effective maturity of the underlying is the longest possible remaining time before the obligor is scheduled to fulfil its obligations. Subject to ■ BIPRU 5.8.4 R, the maturity of the credit protection is the time to the earliest date at which the protection may terminate or be terminated.

[Note: BCD Annex VIII Part 4 point 3]

5.8.4

FCA PRA

R

Where there is an option to terminate the protection which is at the discretion of the protection seller, the maturity of the protection must be taken to be the time to the earliest date at which that option may be exercised. Where there is an option to terminate the protection which is at the discretion of the protection buyer and the terms of the arrangement at origination of the protection contain a positive incentive for the *firm* to call the transaction before contractual maturity, the maturity of the protection must be taken to be the time to the earliest date at which that option may be exercised; otherwise such an option may be considered not to affect the maturity of the protection.

[Note: BCD Annex VIII Part 4 point 4]

5.8.5

FCA PRA

R

Where a credit derivative is not prevented from terminating prior to expiration of any grace period required for a default on the underlying obligation to occur as a result of a failure to pay the maturity of the protection must be reduced by the amount of the grace period.

[Note: BCD Annex VIII Part 4 point 5]

Valuation of protection: Transactions subject to funded credit protection - financial collateral simple method

5.8.6

FCA PRA

R

■ BIPRU 5.8.7 R sets out the calculation for the valuation of transactions subject to *funded credit protection* under the *financial collateral simple method*.

5.8.7

FCA PRA

R

Where there is a mismatch between the maturity of the *exposure* and the maturity of the protection, the collateral must not be recognised.

[Note: BCD Annex VIII Part 4 point 6]

Valuation of protection: Transactions subject to funded credit protection - financial collateral comprehensive method

5.8.8

FCA PRA

R

■ BIPRU 5.8.9 R sets out the calculation for the valuation of transactions subject to *funded credit protection* under the *financial collateral comprehensive method*.

5.8.9

FCA PRA

R

- (1) The maturity of the credit protection and that of the *exposure* must be reflected in the adjusted value of the collateral according to the following formula:

$$C_{VAM} = C_{VA} \times (t-t^*) / (T-t^*)$$

where:

- (a) C_{VA} is the volatility adjusted value of the collateral as specified in ■ BIPRU 5.4.28 R or the amount of the *exposure*, whichever is the lowest;
- (b) t is the number of years remaining to the maturity date of the credit protection calculated in accordance with ■ BIPRU 5.8.3 R to ■ BIPRU 5.8.5 R, or the value of T , whichever is the lower;
- (c) T is the number of years remaining to the maturity date of the *exposure* calculated in accordance with ■ BIPRU 5.8.3 R to ■ BIPRU 5.8.5 R, or 5 years, whichever is the lower; and
- (d) t^* is 0.25.

- (2) C_{VAM} must be taken as C_{VA} further adjusted for maturity mismatch to be included in the formula for the calculation of the fully adjusted value of the *exposure* (E^*) set out at ■ BIPRU 5.4.28 R.

[Note: BCD Annex VIII Part 4 point 7]

Valuation of protection: Transactions subject to unfunded credit protection

5.8.10

FCA PRA

R

■ BIPRU 5.8.11 R sets out the calculation for the valuation of transactions subject to *unfunded credit protection*.

5.8.11

FCA PRA

R

- (1) The maturity of the credit protection and that of the *exposure* must be reflected in the adjusted value of the credit protection according to the following formula:

$$G_A = G^* \times (t-t^*) / (T-t^*)$$

where:

- (a) G^* is the amount of the protection adjusted for any currency mismatch;
 - (b) G_A is G^* adjusted for any maturity mismatch;
 - (c) t is the number of years remaining to the maturity date of the credit protection calculated in accordance with ■ BIPRU 5.8.3 R to ■ BIPRU 5.8.5 R, or the value of T , whichever is the lower;
 - (d) T is the number of years remaining to the maturity date of the *exposure* calculated in accordance with ■ BIPRU 5.8.3 R to ■ BIPRU 5.8.5 R, or 5 years, whichever is the lower; and
 - (e) t^* is 0.25.
- (2) G_A is then taken as the value of the protection for the purposes of ■ BIPRU 5.7.16 R to ■ BIPRU 5.7.25 R.

[Note: BCD Annex VIII Part 4 point 8]

5.9 Combinations of credit risk mitigation in the standardised approach

5.9.1

FCA PRA

R

In the case where a *firm* calculating *risk weighted exposure amounts* under the *standardised approach* has more than one form of *credit risk mitigation* covering a single *exposure* (e.g. a *firm* has both collateral and a guarantee partially covering an *exposure*), the *firm* must subdivide the *exposure* into parts covered by each type of *credit risk mitigation* tool (e.g. a part covered by collateral and a portion covered by guarantee) and the *risk weighted exposure amount* for each portion must be calculated separately in accordance with the provisions of the *standardised approach* and ■ BIPRU 5.

[Note: BCD Annex VIII Part 5 point 1]

5.9.2

FCA PRA

R

When credit protection provided by a single protection provider has differing maturities, a similar approach to that described in ■ BIPRU 5.9.1 R must be applied.

[Note: BCD Annex VIII Part 5 point 2]

Chapter 6

Operational risk

6.1 Operational risk: Application and purpose

Application

6.1.1

FCA PRA

R

■ BIPRU 6 applies to a *BIPRU firm* except for:

- (1) a *BIPRU limited licence firm*; and
- (2) a *BIPRU limited activity firm*.

6.1.2

FCA PRA

G

A *BIPRU limited licence firm* or *BIPRU limited activity firm* that wishes to calculate an *operational risk capital requirement* in accordance with this chapter for the purposes of its *capital resources requirement* should apply for a *waiver* to modify ■ GENPRU 1.1 or seek a variation to its *permission* so that it is treated as a *full scope BIPRU investment firm*.

Purpose

6.1.3

FCA PRA

G

The purpose of ■ BIPRU 6 is:

- (1) to detail the requirement to hold capital to cover *operational risk* losses and have appropriate systems and controls in place to manage *operational risk*; and
- (2) to explain how to calculate the *operational risk capital requirement*, or ORCR.

6.1.4

FCA PRA

G

■ BIPRU 6 implements:

- (1) Articles 102 to 104;
- (2) Article 105, in part; and
- (3) Annex X;

of the *Banking Consolidation Directive*.

6.2 Operational risk: Methodologies and systems

The definition of ORCR

6.2.1 **R** The *operational risk capital requirement (ORCR)* for a *firm* is an amount calculated in accordance with:

FCA **PRA**

- (1) the *basic indicator approach* (see ■ BIPRU 6.3); or
- (2) the *standardised approach* (see ■ BIPRU 6.4).

[Note: BCD Article 102(1)]

6.2.2 **G** The simplest method of calculating the ORCR is the *basic indicator approach* and a *firm* should use this approach if it does not, or is not permitted to, use another approach.

FCA **PRA**

6.2.3 **G** A *firm* does not need a *waiver* to use the *standardised approach*. However there are eligibility conditions that a *firm* should satisfy if it is to use this approach. If it does not satisfy them, it should not use this approach.

FCA **PRA**

6.2.4 **G** A *firm* may apply to the *appropriate regulator* for a *waiver* from ■ BIPRU 6.2.1 R in order to use its own *advanced measurement approach* for the calculation of its ORCR (see ■ BIPRU 6.5). If the *waiver* is granted, the ORCR will be an amount determined in accordance with such *waiver*.

FCA **PRA**

[Note: BCD Article 105(1)]

Restrictions on changing the approach used for calculating ORCR

6.2.5 **R** A *firm* that calculates its ORCR using the *standardised approach* must not change to calculating its ORCR using the *basic indicator approach*.

FCA **PRA**

[Note: BCD Article 102(2) (part)]

6.2.6 **G** A *firm* may apply to the *appropriate regulator* for a *waiver* from ■ BIPRU 6.2.5 R where it can demonstrate good cause for changing to the *basic indicator approach*.

FCA **PRA**

[Note: BCD Article 102(2) (part)]

6.2.7

FCA PRA

R

A firm that calculates its ORCR using an *advanced measurement approach* must not change to calculating its ORCR using the *standardised approach* or the *basic indicator approach*.

[Note: BCD Article 102(3) (part)]

6.2.8

FCA PRA

G

A firm may apply to the *appropriate regulator* for a *waiver* from ■ BIPRU 6.2.7 R where it can demonstrate good cause for changing to the *standardised approach* or the *basic indicator approach* as the case may be.

[Note: BCD Article 102(3) (part)]

Combination of different methodologies

6.2.9

FCA PRA

R

Without prejudice to any other conditions that may be imposed by a firm's *AMA permission*, where a firm's *AMA permission* allows it to use an *advanced measurement approach* in combination with either the *basic indicator approach* or the *standardised approach*, the firm must comply with the following conditions:

- (1) all *operational risks* of the firm are captured;
- (2) the firm must be able to satisfy the *appropriate regulator* with respect to the methodology used to cover different activities, geographical locations or other relevant divisions determined on an internal basis; and
- (3) ■ BIPRU 6.4.1 R and ■ BIPRU 6.5.6 R must be complied with for the part of activities covered by the *standardised approach* and *advanced measurement approaches* respectively.

[Note: BCD Article 102(4) and Annex X, Part 4 point 1]

6.2.10

FCA PRA

G

Where a firm's *AMA permission* allows it to use an *advanced measurement approach* in combination with either the *basic indicator approach* or the *standardised approach*, the *appropriate regulator* may impose additional conditions on a case by case basis as follows:

- (1) on the date of implementation of an *advanced measurement approach*, a significant part of the firm's *operational risks* are captured by the *advanced measurement approach*; and
- (2) the firm is obliged to roll out the *advanced measurement approach* to a material part of its operations within a time schedule set out in its *AMA permission*.

[Note: BCD Annex X, Part 4 point 2]

6.2.11

FCA PRA

R

A *firm* applying for an *AMA permission* to use a combination of different approaches must be able to show that:

- (1) at the date of implementation of the *advanced measurement approach*, approximately 50% (or more) of the *firm's operational risk* is captured under the *AMA*; and
- (2) the *firm* has committed to roll out the *advanced measurement approach* for around 85% (or more) of its *operational risk*, subject to the remaining percentage not being concentrated in a single operation, within a timescale set out in the *AMA permission*.

6.2.12

FCA PRA

R

For the determination of its *ORCR*, a *firm* must not use any of the following combinations of methodologies:

- (1) the *basic indicator approach* with the *standardised approach*;
- (2) the *basic indicator approach* with the *alternative standardised approach*; or
- (3) the *standardised approach* with the *alternative standardised approach* for the same business line.

6.2.13

FCA PRA

G

A *firm* may apply to the *appropriate regulator* for a *waiver* from ■ BIPRU 6.2.12 R (1) and ■ BIPRU 6.2.12 R (2) in exceptional circumstances, such as the recent acquisition of new business, which require a transition period for the roll out of the *standardised approach* (or the *alternative standardised approach*). In this event, a *firm* will need to make a commitment to roll out the *standardised approach* (or the *alternative standardised approach*) within a time schedule agreed with the *appropriate regulator*.

[Note: BCD Annex X, Part 4 points 3 and 4]

6.3 Operational risk: Basic indicator approach

ORCR

6.3.1

FCA PRA

R

The *ORCR* under the *basic indicator approach* is equal to 15% of the relevant indicator defined in this section.

[Note: *BCD* Article 103 and Annex X, Part 1 point 1]

Relevant indicator: General

6.3.2

FCA PRA

R

- (1) The relevant indicator is the three-year average of the sum of:
 - (a) a *firm's* net interest income; and
 - (b) a *firm's* net non-interest income.
- (2) The three-year average must be calculated on the basis of the last three yearly observations at the end of the financial year. When audited figures are not available, business estimates may be used.
- (3) If for any given observation, the sum of a *firm's* net interest income and net non-interest income is negative or equal to zero, this figure must be excluded from both the numerator and denominator when calculating the three year average. The relevant indicator must be calculated as the sum of the positive figures divided by the number of positive figures.

[Note: *BCD* Annex X, Part 1 points 2 to 4]

Relevant indicator: An example calculation

6.3.3

FCA PRA

G

If a *firm* has:

- (1) two positive yearly relevant indicators of £20 each; and
- (2) the final yearly observation shows a negative figure of £5; then

the relevant indicator is calculated as £20, being £40 (sum of positive figures) divided by 2 (number of positive figures).

6.3.4

FCA PRA

G

Relevant indicator: Insufficient income data

A *firm* that does not have sufficient income data to meet the three-year requirement (e.g. a start-up) may use its forecasted gross income projections for all or part of the three year time period when calculating its relevant indicator.

6.3.5

FCA PRA

R

Relevant indicator: Application of accounting categories

- (1) This *rule* applies to a *firm* that is subject to the *Bank Accounts Directive*.
- (2) Based on accounting categories for the profit and loss account of *credit institutions* under Article 27 of the *Bank Accounts Directive*, the relevant indicator in ■ BIPRU 6.3.2 R must be expressed as the sum of the elements listed in the table in ■ BIPRU 6.3.6 R.
- (3) Each element in the table in ■ BIPRU 6.3.6 R must be included in the sum with its positive or negative sign.

[Note: BCD Annex X, Part 1 point 5]

6.3.6

FCA PRA

R

Table: Relevant indicators This table belongs to ■ BIPRU 6.3.5 R

1	Interest receivable and similar income
2	Interest payable and similar charges
3	Income from shares and other variable/fixed-yield securities.
4	Commissions/fees receivable
5	Commission/fees payable
6	Net profit or net loss on financial operations
7	Other operating income

6.3.7

FCA PRA

G

Income from a *participation* held in an *undertaking* by the *firm* or a *subsidiary undertaking* of the *firm* should not be included in the relevant indicator calculations, to ensure that intra-group dividends and other intra-group income flows are not double counted.

6.3.8

FCA PRA

G

Income received under an operating lease should be included as gross income less depreciation, not as gross rental income.

6.3.9

FCA PRA

G

- (1) If a *firm* considers that, due to exceptional circumstances, using a three year average to calculate the relevant indicator would lead to a major overestimation of its ORCR, the *firm* may apply for a *waiver* from ■ BIPRU 6.3.2 R.
- (2) Exceptional circumstances might include stopping or selling a major business line.

Qualifications

6.3.10

FCA PRA

R

- (1) The relevant indicator for the *basic indicator approach* must be calculated before the deduction of any provisions and operating expenses.
- (2) Operating expenses must include fees paid for outsourcing services rendered by third parties which are not a *parent undertaking* or *subsidiary undertaking* of the *firm* or a *subsidiary undertaking* of a *parent undertaking* which is also the *parent undertaking* of the *firm*. Expenditure on the outsourcing of services rendered by third parties may reduce the relevant indicator if the expenditure is incurred by an undertaking subject to supervision under, or equivalent to, the *Banking Consolidation Directive*.

[Note: *BCD Annex X, Part 1 point 7*]

6.3.11

FCA PRA

G

The definition of 'outsourcing' for the purposes of ■ BIPRU 6.3.10 R (2) is set out in detail in a Joint Forum paper of the Basel Committee on Banking Supervision entitled "Outsourcing in Financial Services" dated February 2005 and can be summarised as meaning a *firm's* use of a third party to perform activities on a continuing basis that would normally be undertaken by the *firm*, now or in the future and can be the initial transfer of an activity (or part of that activity) from the *firm* to a third party or a further transfer of an activity (or part thereof) from one third party service provider to another.

6.3.12

FCA PRA

R

The following elements must not be used in the calculation of the relevant indicator:

- (1) realised profits/losses from the sale of *non-trading book* items;
- (2) income from extraordinary or irregular items; and
- (3) income derived from insurance.

[Note: *BCD Annex X, Part 1 point 8 (part)*]

6.3.13

FCA PRA

R

When revaluation of trading items is part of the profit and loss statement, revaluation may be included in the calculation of the relevant indicator.

[Note: *BCD Annex X, Part 1 point 8 (part)*]

6.3.14

FCA PRA

R

When Article 36(2) of the *Bank Accounts Directive* is applied, revaluation booked in the profit and loss account must be included in the calculation of the relevant indicator.

[Note: *BCD Annex X, Part 1 point 8 (part)*]

6.3.15

FCA PRA

R

When a *firm* is subject to an accounting framework different from the one established by the *Bank Accounts Directive*, it must calculate the relevant income indicator on the basis of internal data that best reflect the definition in this section.

[Note: *BCD Annex X, Part 1 points 6 and 9*]

General risk management standards

6.3.16

FCA PRA

G

- (1) In common with all *BIPRU firms*, a *firm* calculating its *ORCR* using the *basic indicator approach* is required to meet the general risk management standards set out in ■ SYSC 4.1.1 R to ■ SYSC 4.1.2 R and ■ SYSC 7.1.16 R.
- (2) In meeting those general risk management standards, a *firm* that undertakes market-related activities should be able to demonstrate to the *appropriate regulator* that it has considered the Committee of European Banking Supervisors' Guidelines on the management of operational risk in market-related activities, published in October 2010. These can be found at [http://www.eba.europa.eu/documents/Publications/Standards---Guidelines/2010/Management-of-op-risk/CEBS-2010-216-\(Guidelines-on-the-management-of-op-.aspx](http://www.eba.europa.eu/documents/Publications/Standards---Guidelines/2010/Management-of-op-risk/CEBS-2010-216-(Guidelines-on-the-management-of-op-.aspx)

6

6.4 Operational risk: Standardised approach

Eligibility

6.4.1

FCA PRA

R

- (1) To be eligible for the *standardised approach*, a *firm* must meet the qualifying criteria set out in this *rule*, in addition to the general risk management standards set out in ■ SYSC 4.1.1 R to ■ SYSC 4.1.2 R and ■ SYSC 7.1.16 R .
- (2) A *firm* must have a well-documented assessment and management system for *operational risk* with clear responsibilities for the system assigned within the *firm*. The system must identify the *firm's* exposures to *operational risk* and track relevant *operational risk* data, including material loss data.
- (3) A *firm's* *operational risk* assessment and management system must be subject to regular independent review.
- (4) A *firm's* *operational risk* assessment system must be closely integrated into the *firm's* risk management processes. Its output must be an integral part of the process of monitoring and controlling the *firm's* *operational risk* profile.
- (5) A *firm* must implement a system of management reporting that provides *operational risk* reports to relevant functions within the *firm*. A *firm* must have procedures in place for taking appropriate action in response to the information contained in such reports.

[Note: BCD Article 104(6) and Annex X, Part 2 point 12 (part)]

6.4.1A

FCA PRA

G

In meeting the general risk management standards referred to in ■ BIPRU 6.4.1 R (1), a *firm* that undertakes market-related activities should be able to demonstrate to the *appropriate regulator* that it has considered the Committee of European Banking Supervisors' Guidelines on the management of operational risk in market-related activities, published in October 2010. These can be found at [http://www.eba.europa.eu/documents/Publications/Standards---Guidelines/2010/Management-of-op-risk/CEBS-2010-216-\(Guidelines-on-the-management-of-op-.aspx](http://www.eba.europa.eu/documents/Publications/Standards---Guidelines/2010/Management-of-op-risk/CEBS-2010-216-(Guidelines-on-the-management-of-op-.aspx)

6.4.2 **R** A *firm* must comply with the criteria in ■ BIPRU 6.4.1 R having regard to the size and scale of its activities and to the principle of proportionality.

FCA PRA

[Note: BCD Annex X, Part 2 point 12 (part)]

Business lines

6.4.3 **R** Under the *standardised approach*, a *firm* must divide its activities into a number of business lines as set out in this section.

FCA PRA

[Note: BCD Article 104(1)]

6.4.4 **G** The list of activities in ■ BIPRU 6.4.15 R is not a complete definition of the activities within a business line and it may be possible for an activity to be allocated to a business line other than the one to which it is attributed in ■ BIPRU 6.4.15 R.

FCA PRA

6.4.5 **R** For each business line, a *firm* must calculate a capital requirement for *operational risk* as a certain percentage of a relevant indicator, in accordance with the *rules* in this section.

FCA PRA

[Note: BCD Article 104(2)]

ORCR calculated using the standardised approach

6.4.6 **R** The ORCR under the *standardised approach* is calculated as the three-year average of the yearly summations of the capital requirements across the business lines referred to in ■ BIPRU 6.4.15 R.

FCA PRA

[Note: BCD Annex X, Part 2 point 1 (part)]

6.4.7 **R** In any given year, negative capital requirements (resulting from negative gross income) in any business line may offset positive capital requirements in other business lines without limit. However, where the aggregate of the capital requirements across all business lines within a given year is negative, the input to the numerator for that year must be zero.

FCA PRA

[Note: BCD Annex X, Part 2 point 1 (part)]

6.4.8 **G** (1) If a *firm* considers that, due to exceptional circumstances, using a three year average to calculate the relevant indicator would lead to a major overestimation of its ORCR, the *firm* may apply for a *waiver* from ■ BIPRU 6.4.5 R.

FCA PRA

(2) Exceptional circumstances might include stopping or selling a major business line.

Relevant indicator

6.4.9 **R** The three year average in ■ BIPRU 6.4.6 R must be calculated on the basis of the last three twelve monthly observations at the end of the financial year. When audited figures are not available, business estimates may be used.

FCA PRA

[Note: BCD Annex X, Part 2 point 2]

Principles for business line mapping

6.4.10

FCA PRA

R

A *firm* must develop and document specific policies and criteria for mapping the relevant indicator for current business lines and activities into the framework for the *standardised approach*. The criteria must be reviewed and adjusted for new or changing business activities and risks as appropriate.

[Note: BCD Annex X, Part 2 point 4 (part)]

6.4.11

FCA PRA

R

- (1) The principles for business line mapping that a *firm* must meet are set out in this *rule*.
- (2) All activities must be mapped into the business lines in a mutually exclusive and jointly exhaustive manner.
- (3) Any activity which cannot be readily mapped into the business line framework, but which represents an ancillary function to an activity included in the framework, must be allocated to the business line it supports. If more than one business line is supported through the ancillary activity, an objective mapping criterion must be used (e.g., proportional allocation of the indicators).
- (4) If an activity cannot be mapped into a particular business line then the business line yielding the highest charge for the *firm* must be used. The same business line equally applies to any associated ancillary activity.
- (5) A *firm* may use internal pricing methods to allocate the relevant indicator between business lines.
- (6) The mapping of activities into business lines for *operational risk* capital purposes must be consistent with the definitions of business lines used by the *firm* for credit and market risks.
- (7) Senior management must be responsible for the mapping policy.
- (8) The mapping process to business lines must be subject to independent review.

[Note: BCD Annex X, Part 2 point 4 (part)]

6.4.12

FCA PRA

G

A *firm* that is mapping activities to a business line should take into account:

- (1) the activities listed in respect of each business line in the table in
 - BIPRU 6.4.15 R; and

(2) the organisation of the *firm's* business in respect of that business line.

6.4.13

FCA PRA

G

A *firm* should take into account its business and organisation when mapping activities to the business lines in the table in ■ BIPRU 6.4.15 R.

6.4.14

FCA PRA

R

For the purposes of ■ BIPRU 6.4.11 R (5), costs generated in one business line which are imputable to a different business line may be reallocated to the business line to which they pertain, for instance by using a treatment based on internal transfer costs between two business lines.

[Note: BCD Annex X, Part 2 point 4 (part)]

6.4.15

FCA PRA

R

Table: Percentages applying to the income indicator of individual business lines

This table belongs to ■ BIPRU 6.4.3 R

Business line	List of activities	Percentage
Corporate finance	<ul style="list-style-type: none"> • Underwriting of financial instruments and/or placing of financial instruments on a firm commitment basis • Services related to underwriting • Investment advice • Advice to <i>undertakings</i> on capital structure, industrial strategy and related matters and advice and services relating to the mergers and the purchase of <i>undertakings</i> • Investment research and financial analysis and other forms of general recommendation relating to transactions in financial instruments 	18%
Trading and sales	<ul style="list-style-type: none"> • Dealing on own account • Money broking • Reception and transmission of orders in relation to one or more financial instruments 	18%

6

Business line	List of activities	Percentage
	<ul style="list-style-type: none"> • Execution of orders on behalf of clients • Placing of financial instruments on a best efforts basis • Operation of <i>multilateral trading facilities</i> 	
Retail brokerage (Activities with individual physical persons or with a <i>retail SME</i> as defined under the <i>standardised approach to credit risk</i>)	<ul style="list-style-type: none"> • Reception and transmission of orders in relation to one or more financial instruments • Execution of orders of behalf of clients • Placing of financial instruments without a firm commitment basis 	12%
Commercial banking	<ul style="list-style-type: none"> • Acceptance of deposits and other repayable funds • Lending • Financial leasing • Guarantees and commitments 	15%
Retail banking (Activities with an individual physical persons or with a <i>retail SME</i> as defined under the <i>standardised approach to credit risk</i>)	<ul style="list-style-type: none"> • Acceptance of deposits and other repayable funds • Lending • Financial leasing • Guarantees and commitments 	12%
Payment and settlement	<ul style="list-style-type: none"> • Money transmission services • Issuing and administering means of payment 	18%
Agency services	<ul style="list-style-type: none"> • Safekeeping and administration of financial instruments for the account of clients including custodianship and related services 	15%

Asset management	<p>such as cash/collateral management</p> <ul style="list-style-type: none"> • Portfolio management • UCITS management and other forms of asset management 	12%

The alternative standardised approach

6.4.16

FCA PRA

G

Under the *alternative standardised approach*, a firm using the *standardised approach* may use alternative indicators for retail banking and commercial banking business lines if it complies with ■ BIPRU 6.4.17 R to ■ BIPRU 6.4.21 R.

[Note: BCD Annex X, Part 2 point 3]

Eligibility for the alternative standardised approach

6.4.17

FCA PRA

R

To be eligible to use the *alternative standardised approach*, a firm must meet the following conditions, in addition to the general risk management standards set out in ■ SYSC 4.1.1 R to ■ SYSC 4.1.2 R and ■ SYSC 7.1.16 R :

- (1) the firm must meet the eligibility criteria for the *standardised approach* in ■ BIPRU 6.4.1 R;
- (2) the firm must be overwhelmingly active in retail and/or commercial banking activities, which must account for at least 90% of its income; and
- (3) the firm must be able to demonstrate that a significant proportion of its retail and/or commercial banking activities comprise loans associated with a high *probability of default*, and that the *alternative standardised approach* provides an improved basis for assessing the *operational risk*.

[Note: BCD Article 104(3) and Annex X, Part 2 points 5 and 8 to 11]

6.4.18

FCA PRA

G

In relation to ■ BIPRU 6.4.17 R (3), the *appropriate regulator's* view is that a high *probability of default* is equal to or greater than 3.5%.

ORCR calculated using the alternative standardised approach

6.4.19

FCA PRA

R

- (1) The relevant indicators under the *alternative standardised approach* are the same as for the *standardised approach* except for the two following business lines:
 - (a) retail banking; and

(b) commercial banking.

(2) For retail banking and commercial banking, the *ORCR* must be calculated as a normalised income indicator equal to the three-year average of the total nominal amount of loans and advances multiplied:

(a) by 0.035, and then

(b) by the appropriate business line percentage set out in
■ BIPRU 6.4.15 R.

[Note: *BCD* Annex X, Part 2 point 6]

6.4.20

FCA PRA

R

For the retail and/or commercial banking business lines, the loans and advances must consist of the total drawn amounts in the corresponding credit portfolios.

[Note: *BCD* Annex X, Part 2 point 7 (part)]

6.4.21

FCA PRA

R

For the commercial banking business line, the securities held in the *non-trading book* must also be included.

[Note: *BCD* Annex X, Part 2 point 7 (part)]

6.5 Operational risk: Advanced measurement approaches

Application

6.5.1 **R** ■ BIPRU 6.5 applies to a *BIPRU firm* with an *AMA permission*.

FCA **PRA**

AMA permissions: general

6.5.2 **G** The rules in *GENPRU* and *BIPRU* do not allow a *firm* to use the *advanced measurement approach*. A *firm* that wishes to use an *advanced measurement approach*, based on the *firm's* own *operational risk* measurement systems, for the calculation of its *ORCR* should therefore apply for *AMA permission* to use the *advanced measurement approach* as explained in ■ BIPRU 1.3.

FCA **PRA**

6.5.3 **G** The *appropriate regulator* will not grant a *firm* an *AMA permission* to use the *advanced measurement approach* if the *firm* does not meet the standards in ■ BIPRU 6.5.5 R.

FCA **PRA**

6.5.4 **G** An *AMA permission* will generally modify ■ BIPRU 6.2.1 R (Calculation of *ORCR*) by amending, to the extent set out in the *AMA permission*, the calculation of the *ORCR* of the *firm* to be calculated in accordance with ■ BIPRU 6.5.

FCA **PRA**

Minimum standards

6.5.5 **R** A *firm* must be able to satisfy the *appropriate regulator* that it meets:

FCA **PRA**

- (1) the general risk management standards in ■ SYSC 4.1.1 R to ■ SYSC 4.1.2 R and ■ SYSC 7.1.16 R;
- (2) the qualitative standards set out in this section; and
- (3) the quantitative standards set out in this section.

[Note: *BCD* Article 105(2) and Annex X Part 3 point 1]

6.5.5A **G** In meeting the general risk management standards referred to in ■ BIPRU 6.5.5 R (1), a *firm* that undertakes market-related activities should be able to demonstrate compliance with the Committee of European Banking Supervisors' Guidelines on the management of operational risk in market-related activities, published in October 2010. These can be found at [http://www.eba.europa.eu/documents/Publications/Standards---Guidelines/2010/Management-of-op-risk/CEBS-2010-216-\(Guidelines-on-the-management-of-op-.aspx](http://www.eba.europa.eu/documents/Publications/Standards---Guidelines/2010/Management-of-op-risk/CEBS-2010-216-(Guidelines-on-the-management-of-op-.aspx)

FCA **PRA**

6.5.5B

FCA PRA

G

In meeting the general risk management standards referred to in ■ BIPRU 6.5.5R (1), a *firm* with AMA approval should be able to demonstrate to the *appropriate regulator* that it has considered and complies with Section III of the European Banking Authority's Guidelines on the Advanced Measurement Approach (AMA) - Extensions and Changes published in January 2012. These can be found at [http://eba.europa.eu/cebs/media/Publications/Standards%20and%20Guidelines/2012/EBA-BS-2011-209-final-\(EBA-GL-on-AMA-extensions-and-changes\).pdf](http://eba.europa.eu/cebs/media/Publications/Standards%20and%20Guidelines/2012/EBA-BS-2011-209-final-(EBA-GL-on-AMA-extensions-and-changes).pdf)

Qualitative standards

6.5.6

FCA PRA

R

- (1) This *rule* sets out the qualitative standards that a *firm's operational risk* measurement system must meet.
- (2) A *firm's internal operational risk* measurement system must be closely integrated into its day-to-day risk management processes.
- (3) A *firm* must have an independent risk management function for *operational risk*.
- (4) There must be regular reporting of *operational risk* exposures and loss experience. The *firm* must have procedures for taking appropriate corrective action.
- (5) A *firm's* risk management system must be well documented. The *firm* must have a routine in place for ensuring compliance and policies for the treatment of non-compliance.
- (6) A *firm's operational risk* management processes and measurement systems must be subject to regular reviews performed by internal and/or external auditors.
- (7) A *firm* must ensure that in respect of its *operational risk* measurement system:
 - (a) its internal validation processes are operating in a satisfactory manner; and
 - (b) the data flows and processes associated with the risk measurement system are transparent and accessible.

[Note: BCD Annex X Part 3 points 2 to 7]

6.5.7

FCA PRA

G

For the purposes of ■ BIPRU 6.5.6 R (2), a *firm* should be able to show that:

- (1) its *operational risk* measurement systems and processes provide benefits to the *firm* and are not limited to determining regulatory capital;
- (2) the *operational risk* measurement system and framework forms part of the systems and controls it has in place; and

- (3) the *operational risk* measurement system and framework are capable of adapting to the changes in the business of the *firm* and evolving as the *firm* gains experience of risk management techniques.

6.5.8

FCA PRA

G

For the purposes of ■ BIPRU 6.5.6 R (3), a *firm* should be able to show that the independent risk management function is sufficiently separate from the business units of the *firm* to allow its professional judgement and recommendations to be effective and impartial.

6.5.9

FCA PRA

G

For the purposes of ■ BIPRU 6.5.6 R (4), a *firm* should ensure that:

- (1) its *governing body* or *designated committee* (where one is used) possesses a general understanding of the *firm's AMA*; and
- (2) its senior management possesses a good understanding of the *firm's AMA* and its operation.

6.5.10

FCA PRA

G

- (1) A *firm's governing body* or *designated committee* may choose to approve only material aspects of the *firm's AMA* and material changes to the *firm's AMA*.
- (2) Where a *firm's governing body* or *designated committee* chooses to approve only material aspects of the *firm's AMA* and material changes to the *firm's AMA*:
 - (a) the *firm's governing body* or *designated committee* should define the *firm's* overall approach to the *AMA* and approve a policy statement defining that approach; and
 - (b) the *firm* should define and document the process for approval of non-material aspects of the *firm's AMA*.

6.5.11

FCA PRA

G

For the purposes of ■ BIPRU 6.5.6 R (7), a *firm* should develop and adopt an internal validation methodology of its *operational risk* measurement system and management processes that:

- (1) is proportionate and appropriate to the business of the *firm*;
- (2) takes into account changing market and operating conditions of the *firm*;
- (3) encompasses both quantitative and qualitative methods of the *firm's operational risk* measurement system;
- (4) is periodically assessed by the *firm*;
- (5) is subject to regular independent review to ensure effective implementation; and
- (6) is clearly documented.

6.5.12

FCA PRA

R

Quantitative standards: process

- (1) This *rule* sets out the quantitative standards that a *firm's operational risk* measurement system must meet with respect to process.
- (2) A *firm* must calculate its capital requirement as comprising both expected loss and unexpected loss, unless the *firm* can demonstrate that expected loss is adequately captured in its internal business practices.
- (3) The *operational risk* measure of a *firm* must capture potentially severe tail events, achieving a soundness standard comparable to a 99.9% confidence interval over a one year period.
- (4) The *operational risk* measurement system of a *firm* must have certain key elements to meet the soundness standard set out in (2) and (3). These elements must include the use of internal data, external data, scenario analysis and factors reflecting the business environment and internal control systems as set out in ■ BIPRU 6.5.21 R to ■ BIPRU 6.5.25 R.
- (5) A *firm* must have a well documented approach for weighting the use of the four elements in (4) in its overall risk measurement system.
- (6) A *firm's* risk measurement system must capture the major drivers of risk affecting the shape of the tail of the loss estimates.
- (7) A *firm* must only recognise correlations in *operational risk* losses across individual *operational risk* estimates to the extent they are set out in its *AMA permission*. The *firm* must validate its correlation assumptions using appropriate quantitative and qualitative techniques.
- (8) A *firm's* risk measurement system must be internally consistent and must avoid the multiple counting of qualitative assessments or risk mitigants recognised in other areas of the capital adequacy framework.

[Note: BCD Annex X Part 3 points 8 to 10, 11 (part) and 12]

6.5.13

FCA PRA

R

For the purposes of ■ BIPRU 6.5.12 R (7), the *firm* must be able to show that its system for measuring correlations is sound, implemented with integrity, and takes into account the uncertainty surrounding any such correlation estimates, particularly in periods of stress.

[Note: BCD Annex X Part 3 point 11 (part)]

6.5.14

FCA PRA

G

A *firm* should be able to satisfy the *appropriate regulator* that it has considered the following with respect to its *operational risk* measurement systems:

- (1) whether the choice of distributions used provides both a good fit with the data and an ability adequately to account for rare events;
- (2) whether the estimated parameters and capital numbers used for the simulated inclusion or exclusion of unusually large losses are sufficiently robust;
- (3) the co-dependency, or independency, of assumptions governing the relationships between risk types and between business lines;
- (4) the number of simulations or iterations required during model execution to provide reasonably stable capital results;
- (5) the emergence of different data types, such as the combination of internal and external loss data, based on different degrees of credibility; and
- (6) the methodologies used for the purposes of achieving a soundness standard comparable to a 99.9% confidence interval.

6.5.15

FCA PRA

G

For the purposes of ■ BIPRU 6.5.12 R (2), a *firm* should be able to show that its *operational risk* measurement systems that capture expected loss are:

- (1) clearly documented;
- (2) sound, implemented with integrity and consistently applied, and take into account uncertainty surrounding expected loss;
- (3) subject to regular reviews by the *firm* of the reasonableness of the expected loss estimates and comparisons with subsequent outcomes; and
- (4) based on justifiable assumptions for capturing and reviewing the reasonableness of the expected loss estimates.

6.5.16

FCA PRA

G

For the purposes of ■ BIPRU 6.5.15 G, the *firm* should use the business management definition it uses for the purposes of identifying an expected loss.

6.5.17

FCA PRA

G

Where a *firm* is using a combination of budgeting and pricing for the purposes of the *operational risk* measurement system for capturing expected loss, a *firm* should be able to show that:

- (1) the process is transparent, can be repeated and provides support to the *firm's* management of its business;
- (2) to a reasonable degree of certainty, budgeted resources for the relevant year cover budgeted expected losses;
- (3) its forecasting takes into account both historic performance and drivers which may affect future trends; and

- (4) the forecasting in (3) is monitored on a periodic basis and adjusted as appropriate.

6.5.18

FCA PRA

G

For the purposes of ■ BIPRU 6.5.12 R (3), a *firm* should be able to show that in respect of its *operational risk* measurement system:

- (1) the methodology for obtaining a soundness standard comparable to a 99.9% confidence level is practical and appropriate;
- (2) it has assessed its overall model outputs as sufficiently robust; and
- (3) it reviews its methodology on an ongoing basis.

6.5.19

FCA PRA

G

For the purpose of developing and reviewing its methodology for obtaining a soundness standard comparable to a 99.9% confidence level, a *firm* should consider whether any of the following are appropriate:

- (1) stress testing;
- (2) sensitivity analysis;
- (3) scenario analysis;
- (4) back testing; and
- (5) boot-strapping techniques.

6.5.20

FCA PRA

G

Where a *firm* is using scaling for the purposes of the *operational risk* measurement system, it should be able to show that the methodology used is robust and based on assumptions that are meaningful and credible.

Quantitative standards: internal data

6.5.21

FCA PRA

R

- (1) This *rule* sets out the quantitative standards that a *firm's operational risk* measurement system must meet with respect to internal data.
- (2) A *firm's* internally generated *operational risk* measures must be based on a minimum historical observation period of five years. When a *firm* first moves to the *advanced measurement approach*, a three year historical observation period may be used.
- (3) A *firm* must be able to map its historical internal loss data into the business lines defined in ■ BIPRU 6.4.15 R and into the event type categories defined in ■ BIPRU 6.5.25 R, and must be able to provide this data to the *appropriate regulator* upon request. Loss events which affect the entire *firm* may be allocated to an additional business line 'corporate items' due to exceptional circumstances. The *firm* must have documented, objective

criteria for allocating losses to the specified business lines and event types. A *firm's operational risk* losses that are related to credit risk and have historically been included in the internal credit risk databases must be recorded in the *operational risk* databases and be separately identified. Such losses will not be subject to the ORCR, as long as they continue to be treated as credit risk for the purposes of calculating the *capital resources requirement*. *Operational risk* losses that are related to market risks must be included in the scope of the capital requirement for *operational risk*.

- (4) A *firm's* internal loss data must be comprehensive in that it captures all material activities and exposures from all appropriate sub-systems and geographic locations. A *firm* must be able to demonstrate that any excluded activities or exposures, both individually and in combination, would not have a material impact on the overall risk estimates. A *firm* must define appropriate minimum loss thresholds for internal loss data collection.
- (5) Aside from information on gross loss amounts, a *firm* must collect information about the date of the event, any recoveries of gross loss amounts, as well as some descriptive information about the drivers or causes of the loss event.
- (6) A *firm* must have specific criteria for assigning loss data arising from an event in a centralised function or an activity that spans more than one business line, as well as from related events over time.
- (7) A *firm* must have documented procedures for assessing the ongoing relevance of historical loss data, including those situations in which judgement overrides, scaling or other adjustments may be used, to what extent they may be used and who is authorised to make such decisions.

[Note: BCD Annex X Part 3 points 13 to 18]

Quantitative standards: external data

- (1) This *rule* sets out the quantitative standards that a *firm's operational risk* measurement system must meet with respect to external data.
- (2) A *firm's operational risk* measurement system must use relevant external data, especially when there is reason to believe that the *firm* is exposed to infrequent, yet potentially severe, losses. A *firm* must have a systematic process for determining the situations for which external data should be used and the methodologies used to incorporate the data in its measurement system. The conditions

6.5.22

FCA PRA

R

and practices for external data use should be regularly reviewed, documented and subject to periodic independent review.

[Note: BCD Annex X Part 3 point 19]

Quantitative standards: scenario analysis

6.5.23

FCA PRA

R

- (1) This *rule* sets out the quantitative standards that a *firm's operational risk* measurement system must meet with respect to scenario analysis.
- (2) A *firm* must use scenario analysis of expert opinion in conjunction with external data to evaluate its exposure to high severity events. Over time, such assessments must be validated and re-assessed through comparison to actual loss experience to ensure their reasonableness.

[Note: BCD Annex X Part 3 point 20]

Quantitative standards: business environment and internal control factors

6.5.24

FCA PRA

R

- (1) This *rule* sets out the quantitative standards that a *firm's operational risk* measurement system must meet with respect to business environment and internal control factors.
- (2) A *firm's firm-wide* risk assessment methodology must capture key business environment and internal control factors that can change its *operational risk* profile.
- (3) A *firm* must be able to justify the choice of each factor as a meaningful driver of risk, based on experience and involving the expert judgment of the affected business areas.
- (4) The sensitivity of risk estimates to changes in the factors and the relative weighting of the various factors must be well reasoned. In addition to capturing changes in risk due to improvements in risk controls, the framework must also capture potential increases in risk due to greater complexity of activities or increased business volume.
- (5) A *firm* must document this framework and make it subject to independent review within the *firm* and make it available for review by supervisors.
- (6) Over time, a *firm* must validate and re-assess the process and the outcomes through comparison to actual internal loss experience and relevant external data.

[Note: BCD Annex X Part 3 points 21 to 24]

6.5.25

FCA PRA

R

Loss event type classification

Table: Loss event type classification

This table belongs to ■ BIPRU 6.5.21 R (3).

Event-Type Category	Definition
Internal fraud	Losses due to acts of a type intended to defraud, misappropriate property or circumvent regulations, the law or company policy, excluding diversity/ discrimination events, which involves at least one internal party
External fraud	Losses due to acts of a type intended to defraud, misappropriate property or circumvent the law, by a third party
Employee Practices and Workplace Safety	Losses arising from acts inconsistent with employment, health or safety laws or agreements, from payment of personal injury claims, or from diversity/discrimination events
Clients, Products & Business Practices	Losses arising from an unintentional or negligent failure to meet a professional obligation to specific clients (including fiduciary and suitability requirements), or from the nature or design of a product
Damage to Physical Assets	Losses arising from loss or damage to physical assets from natural disaster or other events
Business disruption and system failures	Losses arising from disruption of business or system failures
Execution, Delivery & Process Management	Losses from failed transaction processing or process management, from relations with trade counterparties and vendors

[Note: BCD Annex X Part 5 Table 3]

Impact of insurance and risk transfer mechanisms

- (1) A firm may recognise the impact of insurance for the purposes of its operational risk measurement system subject to the conditions set out in this rule and ■ BIPRU 6.5.27 R.
- (2) The provider must be authorised to provide insurance or re-insurance.

6.5.26

FCA PRA

R

PAGE 25

6

- (3) The provider must have a minimum claims paying ability rating by an *eligible ECAI* associated with *credit quality step 3* or above under the rules for the risk weighting of exposures to *firms* under the *standardised approach* to credit risk .

[Note: BCD Annex X Part 3 points 25 to 26]

6.5.27

FCA PRA

R

- (1) A *firm* must ensure that its insurance and its insurance framework meet the conditions in this *rule*.
- (2) The insurance policy must have an initial term of no less than one year. For policies with a residual term of less than one year the *firm* must make appropriate haircuts to reflect the declining residual term of the policy, up to a full 100% haircut for policies with a residual term of 90 days or less.
- (3) The insurance policy must have a minimum notice period for cancellation of the contract of 90 days.
- (4) The insurance policy must contain no exclusions or limitations based upon supervisory actions or, in the case of a failed *firm*, that preclude the *firm*, its receiver or liquidator from recovering for damages suffered or expenses incurred by the *firm*, except in respect of events occurring after the initiation of receivership or liquidation proceedings in respect of the *firm*. The insurance policy may exclude coverage for any fine, penalty or punitive damages resulting from actions by a *competent authority* or *third country competent authority*.
- (5) The risk mitigation calculations must reflect the insurance coverage in a manner that is transparent in its relationship to, and consistent with, the actual likelihood and impact of loss used in the overall determination of the *ORCR*.
- (6) The insurance must be provided by a third party entity. In the case of insurance through captives and affiliates, the exposure must be laid off to an independent third party entity, for example through reinsurance that meets the eligibility criteria.
- (7) The framework for recognising insurance must be well reasoned and documented.
- (8) The methodology for recognising insurance must capture the following elements through discounts or haircuts in the amount of insurance recognition:
- (a) the residual term of a policy, where less than one year, as noted in (2);
 - (b) a policy's cancellation terms, where less than one year;

- (c) mismatches in coverage of insurance policies; and
- (d) the uncertainty of payment.

(9) The capital alleviation arising from the recognition of insurances and other risk transfer mechanisms must not exceed 20% of the capital requirement before the recognition of risk mitigation techniques.

[Note: BCD Annex X Part 3 points 27 to 29]

6.5.28

FCA PRA

G

For the purposes of ■ BIPRU 6.5.27 R (7), a *firm* should be able to demonstrate that the mitigating effect of the insurance is appropriate and relevant to the *firm's* business.

6.5.29

FCA PRA

G

For the purposes of ■ BIPRU 6.5.27 R (9), a *firm* should be able to set out clearly how it made its assessment of the appropriate level of capital alleviation, including any assumptions made by the *firm* and how the insurances and other risk transfer mechanisms have been factored into the *firm's* risk measurement system.

6.5.30

FCA PRA

R

A *firm* may recognise a risk transfer mechanism other than insurance to the extent that a noticeable risk mitigating effect is achieved and the risk transfer mechanism is included in the *firm's* AMA permission.

[Note: BCD Annex X Part 3 point 25]

6.5.30A

FCA PRA

G

A *firm* that recognises the impact of insurance and operational risk mitigation techniques for the purposes of its *operational risk* measurement system should be able to show that it has considered the Commission of European Banking Supervisors' guidelines on operational risk mitigation techniques published in December 2009. This can be found at <http://www.c-eps.org/documents/Publications/Standards---Guidelines/2009/Operational-risk-mitigation-techniques/Guidelines.aspx>.

Use of an advanced measurement approach on a groupwide basis

6.5.31

FCA PRA

R

Where an EEA parent institution and its subsidiary undertakings or an EEA parent financial holding company and its subsidiary undertakings use an advanced measurement approach on a unified basis for the parent undertaking and its subsidiary undertakings, the qualifying criteria set out in ■ BIPRU 6.5 may be met by the parent undertaking and its subsidiary undertakings considered together where permitted by the AMA permission.

[Note: BCD Article 105(4)]

6.5.32

FCA PRA

G

Where the AMA is used on a unified basis for the parent undertaking and its subsidiary undertakings, and approval and reporting of the AMA are carried out at the group level, the qualifying criteria in ■ BIPRU 6.5 may be met if:

- (1) the subsidiary undertakings have delegated to the governing body or designated committee of the EEA parent institution or EEA parent financial holding company responsibility for approval of the AMA;

-
- (2) the *governing body* or *designated committee* of the *EEA parent institution* or *EEA parent financial holding company* approves either:
- (a) all aspects of the *AMA*, and material changes; or
 - (b) all aspects of the *AMA* that are material in the context of the group, and material changes to those, and a policy statement defining the overall approach to the *AMA*.

Chapter 7

Market risk

7.1 Application, purpose, general provisions and non-standard transactions

Application

7.1.1 **R** This chapter applies to a *BIPRU firm*.

FCA **PRA**

Purpose

7.1.2 **G** The purpose of this chapter is to implement Annexes I, III, IV and V of the *Capital Adequacy Directive*.

FCA **PRA**

General provisions: Obligation to calculate PRR

7.1.3 **R** A *firm* must calculate a *PRR* in respect of:

FCA **PRA**

- (1) all its *trading book positions*;
- (2) all *positions* falling within ■ BIPRU 7.5.3 R (Scope of the foreign exchange PRR calculation), whether or not in the *trading book*; and
- (3) all *positions in commodities* (including *physical commodities*) whether or not in the *trading book*;

even if no treatment is provided for that *position* in the other sections of this chapter.

7.1.4 **R** A *firm* must calculate a *PRR* for any *position* falling into ■ BIPRU 7.1.3 R using:

FCA **PRA**

- (1) the *PRR* calculations contained in ■ BIPRU 7; or
- (2) another method provided the *firm* is able to demonstrate that in all circumstances the calculation being employed results in a higher *PRR* for the *position* than would be required under (1).

General provisions: Non-trading book items

7.1.5 **G** *Positions* in instruments which are *non-trading book* items should be treated under ■ BIPRU 3 (Standardised credit risk), ■ BIPRU 4 (The IRB approach) or ■ BIPRU 13 (Financial derivatives, SFTs and long settlement transactions) unless deducted as an

FCA **PRA**

illiquid asset. If they fall into ■ BIPRU 7.1.3R(2) or ■ (3) they also give rise to a *PRR charge*.

General provisions: Frequency of calculation

7.1.6

FCA PRA

R

A *firm* must be able to monitor its total *PRR* on an intra-day basis, and, before executing any trade, must be able to re-calculate *PRR* to the level of detail necessary to establish whether or not the *firm's capital resources* exceed its *capital resources requirement*.

7.1.7

FCA PRA

G

A *firm* may rely on intra-day limits for the purposes of ■ BIPRU 7.1.6R.

Purpose of rules for non-standard transactions and instruments for which no PRR treatment has been specified

7.1.8

FCA PRA

G

The methodologies which have been developed for calculating *PRR charges* have been based on existing instruments and assume instruments with standard characteristics. However, as a result of innovation and because there are instruments which, although based on a standard contract, contain structural features which would make the *rules* in the rest of this chapter inappropriate, flexible *rules* are required. The *rules* in this section about transactions for which no *PRR* treatment has been specified and non-standard transactions are designed to address this.

Instruments for which no PRR treatment has been specified

7.1.9

FCA PRA

R

Where a *firm* has a *position* for which no *PRR* treatment has been specified, it must calculate the *PRR* for that *position* in accordance with ■ BIPRU 7.1.12R-■ BIPRU 7.1.13R.

7.1.10

FCA PRA

R

If ■ BIPRU 7.1.9 R applies, a *firm* must document its policies and procedures for calculating the *PRR* for that *position* of that type in its *trading book policy statement*.

7.1.11

FCA PRA

G

Under ■ BIPRU 1.2.30 R (2) a *firm* should notify the *appropriate regulator* as soon as is reasonably practicable if its *trading book policy statement* is subject to significant changes. Therefore if a *firm* makes a change in accordance with ■ BIPRU 7.1.10R it should consider whether it is necessary to report it to the *appropriate regulator*.

7.1.12

FCA PRA

R

A *firm* may calculate the *PRR* for a *position* falling into ■ BIPRU 7.1.9R by applying by analogy the *rules* relating to the calculation of the *interest rate PRR*, the *equity PRR*, the *commodity PRR*, the *foreign currency PRR*, the *option PRR* or the *collective investment undertaking PRR* if doing so is appropriate and if the *position* and *PRR item* are sufficiently similar to those that are covered by those *rules*.

7.1.13

FCA PRA

R

Where a *firm* has a *position* for which no *PRR* treatment has been specified and it is not applying ■ BIPRU 7.1.12R, it must calculate a *PRR* of an appropriate percentage of the current value of the *position* calculated under ■ GENPRU 1.3 (Valuation).

Instruments in non-standard form

7.1.14

FCA PRA

R

- (1) If a *firm* has a *position*:
- (a) in a *PRR item* in non-standard form; or
 - (b) that is part of a non-standard arrangement; or
 - (c) that, taken together with other *positions* (whether or not they are subject to *PRR charges* under ■ BIPRU 7), gives rise to a non-standard *market risk*;
- the *firm* must notify the *appropriate regulator* of that fact and of details about the *position*, *PRR item*, arrangements and type of risk concerned.
- (2) Except as (1) provides to the contrary, (1) applies to a *position* that is subject to a *PRR* under ■ BIPRU 7.1.3R.
- (3) The question of what is non-standard for the purposes of (1) must be judged by reference to the standards:
- (a) prevailing at the time the *rule* is being applied; and
 - (b) of *firms* generally who carry on business which gives rise to *PRRs* under ■ BIPRU 7 rather than merely by reference to the *firm's* own business.

7.1.15

FCA PRA

R

If a *firm* has a *position* or combination of *positions* falling into ■ BIPRU 7.1.14R and the *PRR* relating to that *position* or *positions* materially underestimates the *market risk* incurred by the *firm* to which they give rise, the *firm* must calculate the *PRR* for that *position* or *positions* under ■ BIPRU 7.1.13R.

Meaning of appropriate percentage for non-standard transactions

7.1.16

FCA PRA

A

- (1) In ■ BIPRU 7.1.13R and, to the extent that that *rule* applies ■ BIPRU 7.1.13R, ■ BIPRU 7.1.15R, an "appropriate percentage" is:
- (a) 100%; or
 - (b) a percentage which takes account of the characteristics of the *position* concerned and of discussions with the *appropriate regulator* or a predecessor regulator under the Banking Act 1987 or the Financial Services Act 1986.
- (2) Compliance with (1) may be relied on as tending to establish compliance with ■ BIPRU 7.1.13R or, insofar as it incorporates the requirements relating to an appropriate percentage, ■ BIPRU 7.1.15R.

- (3) Contravention of (1) may be relied on as tending to establish contravention with ■ BIPRU 7.1.13 R or, insofar as it incorporates the requirements relating to an appropriate percentage, ■ BIPRU 7.1.15 R.

Stress testing and scenario analyses of trading book positions

7.1.17

FCA PRA

R

A *firm* must conduct a regular programme of stress testing and scenario analysis of its *trading book positions*, both at the trading desk level and on a *firm-wide* basis. The results of these tests must be reviewed by senior management and reflected in the policies and limits the *firm* sets.

7.1.17A

FCA PRA

G

The *firm's* stress testing programme should be comprehensive in terms of both risk and *firm* coverage, and appropriate to the size and complexity of *trading book positions* held.

7.1.18

FCA PRA

R

In carrying out the stress tests and scenario analyses required by ■ BIPRU 7.1.17 R, a *firm* must incorporate and take into account any other relevant stress tests and scenario analyses that it is required to carry out under any other provision of the *Handbook*, and in particular under ■ BIPRU 7.10.72 R where the *firm* has a *VaR model permission*.

7.1.19

FCA PRA

G

This paragraph gives *guidance* in relation to the stress testing programme that a *firm* must carry out in relation to its *trading book positions*.

- (1) The frequency of the stress testing of *trading book positions* should be determined by the nature of the *positions*.
- (2) The stress testing should include shocks which reflect the nature of the portfolio and the time it could take to hedge out or manage risks under severe market conditions.
- (3) The *firm* should have procedures in place to assess and respond to the results of the stress testing programme. In particular, stress testing should be used to evaluate the *firm's* capacity to absorb losses or to identify steps to be taken by the *firm* to reduce risk.
- (4) As part of its stress testing programme, the *firm* should consider how prudent valuation principles (see ■ GENPRU 1.3) will be met in a stressed scenario.

7.1.20

FCA PRA

G

The stress testing and scenario analysis under ■ BIPRU 7.1.17 R should be taken into account under the *overall Pillar 2 rule*.

7.2 Interest rate PRR

General rule

7.2.1

FCA PRA

R

- (1) A *firm* must calculate its *interest rate PRR* under ■ BIPRU 7.2 by:
 - (a) identifying which *positions* must be included within the *interest rate PRR* calculation;
 - (b) deriving the net *position* in each debt *security* in accordance with ■ BIPRU 7.2.36R-■ BIPRU 7.2.41R;
 - (c) including these net *positions* in the *interest rate PRR* calculation for *general market risk* and the *interest rate PRR* calculation for *specific risk*; and
 - (d) summing all *PRRs* calculated for *general market risk* and *specific risk*.
- (2) A *firm* must calculate its *interest rate PRR* by adding the amount calculated under (1) to the amount calculated under the basic *interest rate PRR* calculation under ■ BIPRU 7.3.45R.
- (3) All net *positions*, irrespective of their signs, must be converted on a daily basis into the *firm's base currency* at the prevailing spot exchange rate before their aggregation.
- (4) Net *positions* must be classified according to the currency in which they are denominated. A *firm* must calculate the capital requirement for *general market risk* and *specific risk* in each individual currency separately.

7.2.2

FCA PRA

G

The *interest rate PRR* calculation divides the interest rate risk into the risk of loss from a general move in market interest rates, and the risk of loss from an individual debt *security's* price changing for reasons other than a general move in market interest rates. These are called *general market risk* and *specific risk* respectively.

7.2.3

FCA PRA

R

Scope of the interest rate PRR calculation

A firm's interest rate PRR calculation must:

- (1) include all *trading book positions* in *debt securities*, *preference shares* and *convertibles*, except:
 - (a) *positions* in *convertibles* which have been included in the firm's *equity PRR* calculation;
 - (b) *positions* fully deducted as a *material holding* under the calculations under the *capital resources table*, in which case the firm may exclude them; or
 - (c) *positions* hedging an *option* which is being treated under ■ BIPRU 7.6.26R (Table: Appropriate treatment for equities, debt securities or currencies hedging options);
- (2) include notional *positions* arising from *trading book positions* in the instruments listed in the table in ■ BIPRU 7.2.4R; and
- (3) (if the firm is the transferor of *debt securities* or guaranteed rights relating to title to *debt securities* in a *repurchase agreement* or the lender of *debt securities* in a *debt securities* lending agreement) include such *debt securities* if those *debt securities* meet the criteria for inclusion in the *trading book*.

7.2.4

FCA PRA

R

Table: Instruments which result in notional positions

This table belongs to ■ BIPRU 7.2.3R(2)

Instrument	See
<i>Futures, forwards</i> or <i>synthetic futures</i> on <i>debt securities</i>	BIPRU 7.2.13 R
<i>Futures, forwards</i> or <i>synthetic futures</i> on <i>debt indices</i> or <i>baskets</i>	BIPRU 7.2.14R
<i>Interest rate futures</i> or <i>forward rate agreements (FRAs)</i>	BIPRU 7.2.18 R
<i>Interest rate swaps</i> or <i>foreign currency swaps</i>	BIPRU 7.2.21R
<i>Deferred start interest rate swaps</i> or <i>foreign currency swaps</i>	BIPRU 7.2.24R
The interest rate leg of an <i>equity swap</i> (unless the firm calculates the <i>interest rate PRR</i> on the instrument using the basic <i>interest rate PRR</i> calculation in BIPRU 7.3 (Equity PRR and basic interest rate PRR for equity derivatives))	BIPRU 7.2.27R

Instrument	See
The cash leg of a <i>repurchase agreement</i> or a <i>reverse repurchase agreement</i>	BIPRU 7.2.30R
Cash borrowings or deposits	BIPRU 7.2.31 R
<i>Options</i> on a <i>debt security</i>, a basket of <i>debt securities</i>, a <i>debt security index</i>, an <i>interest rate</i> or an <i>interest rate future</i> or <i>swap</i> (including an <i>option on a future on a debt security</i>) (unless the <i>firm</i> calculates a <i>PRR</i> on the <i>option</i> under BIPRU 7.6 (Option PRR))	BIPRU 7.2.32R
Dual currency bonds	BIPRU 7.2.33R
<i>Foreign currency futures</i> or <i>forwards</i>	BIPRU 7.2.34R
<i>Gold futures</i> or <i>forwards</i>	BIPRU 7.2.34R
<i>Forwards, futures</i> or <i>options</i> (except <i>cliquets</i>) on an <i>equity</i>, basket of <i>equities</i> or <i>equity index</i> (unless the <i>firm</i> calculates the <i>interest rate PRR</i> on the instrument using the basic <i>interest rate PRR</i> calculation in BIPRU 7.3)	BIPRU 7.2.34R
Credit derivatives	BIPRU 7.11
<i>A warrant must be treated in the same way as an option</i>	

7.2.5

FCA PRA

G

■ BIPRU 7.2.3R(1) includes a *trading book position* in *debt security*, *preference share* or *convertible* that is subsequently repo'd under a *repurchase agreement* or lent under a stock lending agreement. Clearly, if the *security* had initially been obtained via a *reverse repurchase agreement* or stock borrowing agreement, the *security* would not have been included in the *PRR* calculation in the first place.

7.2.6

FCA PRA

G

■ BIPRU 7.2.3R(1) includes *net underwriting positions* or *reduced net underwriting position* in *debt securities*.

7.2.7

FCA PRA

G

Firms are reminded that the table in ■ BIPRU 7.6.5R (Table: Appropriate PRR calculation for an option or warrant) divides *options* and *warrants* on interest rates, *debt securities* and interest rate *futures* and *swaps* into:

- (1) those which must be treated under ■ BIPRU 7.6 (Option PRR); and
- (2) those which must be treated under either ■ BIPRU 7.2 or ■ BIPRU 7.6, the *firm* being able to choose whether ■ BIPRU 7.2 or ■ BIPRU 7.6 is used.

7.2.8

FCA PRA

G

Cliquets on *equities*, baskets of *equities* or *equity* indices do not attract an *interest rate PRR*. The table in ■ BIPRU 7.2.4R excludes them from the scope of the *interest rate PRR* calculation in ■ BIPRU 7.2 and ■ BIPRU 7.3.45R excludes them from the basic *interest rate PRR* calculation in ■ BIPRU 7.3 (Equity PRR and basic interest rate PRR for equity derivatives).

7.2.9

FCA PRA

G

The table in ■ BIPRU 7.2.4R shows that *equity derivatives* are excluded from ■ BIPRU 7.2's *PRR* calculation if they have been included in the basic *interest rate PRR* calculation in ■ BIPRU 7.3 (see ■ BIPRU 7.3.45R).

Derivation of notional positions: General approach

7.2.10

FCA PRA

G

■ BIPRU 7.2.11 R - ■ BIPRU 7.2.35R convert the instruments listed in the table in ■ BIPRU 7.2.4R into notional *positions* in:

- (1) the underlying debt *security*, where the instrument depends on the price (or yield) of a specific debt *security*; or
- (2) notional debt *securities* to capture the pure interest rate risk arising from future payments and receipts of cash (including notional payments and receipts) which, because they are designed to represent pure *general market risk* (and not *specific risk*), are called *zero-specific-risk securities*; or
- (3) both (1) and (2).

7.2.11

FCA PRA

R

- (1) For the purposes of calculating *interest rate PRR*, unless specified otherwise, a *firm* must derive the value of notional *positions* as follows:
 - (a) notional *positions* in actual debt *securities* must be valued as the nominal amount underlying the contract at the current market price of the debt *security*; and
 - (b) *positions* in *zero-specific-risk securities* must be valued using one of the two methods in (2).
- (2) A *firm* must use one of the following two methods for all *positions* arising under (1)(b) and must use the same method for all *positions* denominated in the same currency:
 - (a) the present value approach, under which the *zero-specific-risk security* is assigned a value equal to the present value of all the future cash flows that it represents; or
 - (b) the alternative approach, under which the *zero-specific-risk security* is assigned a value equal to:
 - (i) the market value of the underlying notional *equity position* in the case of an *equity derivative*;
 - (ii) the notional principal amount in the case of an interest rate or *foreign currency swap*; or

- (iii) the notional amount of the future cash flow that it represents in the case of any other *CRD financial instrument*.

7.2.12

FCA PRA

R

A *firm* must use ■ BIPRU 7.2.11R(2)(a) in respect of any *positions* that it includes in the *interest rate duration method*.

Derivation of notional positions: Futures, forwards or synthetic futures on a debt security

7.2.13

FCA PRA

R

Futures, forwards or synthetic futures on a single debt *security* must be treated as follows:

- (1) a purchased *future, synthetic future or forward* is treated as:
 - (a) a notional long *position* in the underlying debt *security* (or the cheapest to deliver (taking into account the conversion factor) where the contract can be satisfied by delivery of one from a range of *securities*); and
 - (b) a notional short *position* in a zero coupon *zero-specific-risk security* with a maturity equal to the expiry date of the *future or forward*; and
- (2) a sold *future, synthetic future or forward* is treated as:
 - (a) a notional short *position* in the underlying *security* (or the cheapest to deliver (taking into account the conversion factor) where the contract can be satisfied by delivery of one from a range of *securities*); and
 - (b) a notional long *position* in a zero coupon *zero-specific-risk security* with a maturity equal to the expiry date of the *future, synthetic future or forward*.

Derivation of notional positions: Futures, forwards or synthetic futures on a basket or index of debt securities

7.2.14

FCA PRA

R

Futures, forwards or synthetic futures on a basket or index of debt *securities* must be converted into *forwards* on single debt *securities* as follows (and then the resulting *positions* must be treated under ■ BIPRU 7.2.13R):

- (1) *futures, synthetic futures or forwards* on a single currency basket or index of debt *securities* must be treated as either:
 - (a) a series of *forwards*, one for each of the constituent debt *securities* in the basket or index, of an amount which is a proportionate part of the total underlying the contract according to the weighting of the relevant debt *security* in the basket; or

- (b) a single *forward* on a notional debt *security*; and
- (2) *futures, synthetic futures* or *forwards* on multiple currency baskets or indices of debt *securities* must be treated as either:
 - (a) a series of *forwards* (using the method described in (1)(a)); or
 - (b) a series of *forwards*, each one on a notional debt *security* to represent one of the currencies in the basket or index, of an amount which is a proportionate part of the total underlying the contract according to the weighting of the relevant currency in the basket.

7.2.15
FCA PRA

G Under ■ BIPRU 7.2.14R(2)(b), a *forward* on basket of three Euro denominated debt *securities* and two Dollar denominated debt *securities* would be treated as a *forward* on a single notional Euro denominated debt *security* and a *forward* on a single notional Dollar denominated debt *security*.

7.2.16
FCA PRA

R The notional debt *securities* in ■ BIPRU 7.2.14R are assigned a *specific risk position risk adjustment* and a *general market risk position risk adjustment* equal to the highest that would apply to the debt *securities* in the basket or index.

7.2.17
FCA PRA

G The debt *security* with the highest *specific risk position risk adjustment* within the basket might not be the same as the one with the highest *general market risk position risk adjustment* . ■ BIPRU 7.2.16R requires a *firm* to select the highest percentages even where they relate to different debt *securities* in the basket or index, and regardless of the proportion of those debt *securities* in the basket or index.

Derivation of notional positions: Interest rate futures and forward rate agreements (FRAs)

7.2.18
FCA PRA

R Interest rate *futures* or *FRAs* must be treated as the two notional *positions* (one long, one short) shown in the table in ■ BIPRU 7.2.19R.

7.2.19
FCA PRA

R Table: Interest rate futures and FRAs

This table belongs to ■ BIPRU 7.2.18R

	A short <i>position</i> in a zero coupon zero-specific-risk <i>security</i>	A long <i>position</i> in a zero coupon zero-specific-risk <i>security</i>
Where the <i>firm</i> buys an interest rate <i>future</i> or sells an <i>FRA</i>	Maturity equals the expiry date of the <i>future</i> (or settlement date of the <i>FRA</i>)	Maturity equals the expiry date of the <i>future</i> (or settlement date of the <i>FRA</i>) plus the maturity of the notional borrowing/deposit

	A short <i>position</i> in a zero coupon <i>zero-specific-risk security</i>	A long <i>position</i> in a zero coupon <i>zero-specific-risk security</i>
Where the <i>firm</i> sells an interest rate <i>future</i> or buys an <i>FRA</i>	Maturity equals the expiry date of the <i>future</i> (or settlement date of the <i>FRA</i>) plus the maturity of the notional borrowing/deposit	Maturity equals the expiry date of the <i>future</i> (or settlement date of the <i>FRA</i>)

7.2.20

FCA PRA

G

- (1) The following example illustrates ■ BIPRU 7.2.18R and ■ BIPRU 7.2.19R in conjunction with ■ BIPRU 7.2.11R (the last *rule* determines the value of notional *positions*). A *firm* sells £1mn notional of a 3v6 *FRA* at 6%. This results in:
- (a) a short *position* in a *zero-specific-risk security* with a zero coupon, three month maturity, and a nominal amount of £1million; and
 - (b) a long *position* in a *zero-specific-risk security* with a zero coupon, six month maturity, and nominal amount of £1,015,000 (i.e. notional plus interest at 6% over 90 days).
- (2) If a *firm* were to apply the approach in ■ BIPRU 7.2.11R(2)(a) the two nominal amounts would have to be present valued.

Derivation of notional positions: Interest rate swaps or foreign currency swaps

7.2.21

FCA PRA

R

Interest rate *swaps* or *foreign currency swaps* without deferred starts must be treated as the two notional *positions* (one long, one short) shown in the table in ■ BIPRU 7.2.22R.

7.2.22

FCA PRA

R

Table: Interest rate and foreign currency swaps

This table belongs to ■ BIPRU 7.2.21R

	Paying leg (which must be treated as a short <i>position</i> in a <i>zero-specific-risk security</i>)	Receiving leg (which must be treated as a long <i>position</i> in a <i>zero-specific-risk security</i>)
Receiving fixed and paying floating	Coupon equals the floating rate and maturity equals the reset date	Coupon equals the fixed rate of the <i>swap</i> and maturity equals the maturity of the <i>swap</i>
Paying fixed and receiving floating	Coupon equals the fixed rate of the <i>swap</i> and maturity equals	Coupon equals the floating rate and maturity equals the reset date

	Paying leg (which must be treated as a short <i>position in a zero-specific-risk security</i>)	Receiving leg (which must be treated as a long <i>position in a zero-specific-risk security</i>)
	the maturity of the swap	
Paying floating and receiving floating	Coupon equals the floating rate and maturity equals the reset date	Coupon equals the floating rate and maturity equals the reset date

7.2.23

FCA PRA

G

For a *foreign currency swap*, the two notional *zero-specific-risk securities* would be denominated in different currencies. A *foreign currency swap* is also included in the *foreign currency PRR* calculation.

Derivation of notional positions: Deferred start interest rate swaps or foreign currency swaps

7.2.24

FCA PRA

R

Interest rate *swaps* or *foreign currency swaps* with a deferred start must be treated as the two notional *positions* (one long, one short) shown in the table in ■ BIPRU 7.2.25R.

7.2.25

FCA PRA

R

Table: Deferred start interest rate and foreign currency swaps

This table belongs to ■ BIPRU 7.2.24R

	Paying leg (which must be treated as a short <i>position in a zero-specific-risk security with a coupon equal to the fixed rate of the swap</i>)	Receiving leg (which must be treated as a long <i>position in a zero-specific-risk security with a coupon equal to the fixed rate of the swap</i>)
Receiving fixed and paying floating	maturity equals the start date of the swap	maturity equals the maturity of the swap
Paying fixed and receiving floating	maturity equals the maturity of the swap	maturity equals the start date of the swap

7.2.26

FCA PRA

G

An example of ■ BIPRU 7.2.24R is as follows. A *firm* enters into a five year *swap* which starts in two year's time. The *firm* has contracted to receive 6% and pay six month Libor on a principal amount of £1 million. This results in a long *position* in a 7 year debt *security* and a short *position* in a 2 year debt *security*. Both have a coupon of 6%. ■ BIPRU 7.2.24R deals with the capital treatment of the delayed start date; once the *swap* has started, ■ BIPRU 7.2.21R applies.

7.2.27

FCA PRA

R

Derivation of notional positions: Swaps where only one leg is an interest rate leg (e.g. equity swaps)

A *firm* must treat a *swap* with only one interest rate leg as a notional position in a *zero-specific-risk security*:

- (1) with a coupon equal to that on the interest rate leg;
- (2) with a maturity equal to the date that the interest rate will be reset; and
- (3) which is a long *position* if the *firm* is receiving interest payments and short if making interest payments.

7.2.28

FCA PRA

G

■ BIPRU 7.2.27R includes *equity swaps*, *commodity swaps* and any other *swap* where only one leg is an interest rate leg.

Derivation of notional positions: Cash legs of repurchase agreements and reverse repurchase agreements

7.2.29

FCA PRA

G

Firms are reminded that for the purposes of ■ BIPRU 7.2.30R, a *repurchase agreement* includes a sell/buy back or stock lending; and a *reverse repurchase agreement* includes a buy/sell back or a stock borrowing.

7.2.30

FCA PRA

R

The forward cash leg of a *repurchase agreement* or *reverse repurchase agreement* must be treated as a notional position in a *zero-specific-risk security* which:

- (1) is a short notional *position* in the case of a *repurchase agreement*; and a long notional *position* in the case of a *reverse repurchase agreement*;
- (2) has a value equal to the market value of the cash leg;
- (3) has a maturity equal to that of the *repurchase agreement* or *reverse repurchase agreement*; and
- (4) has a coupon equal to:
 - (a) zero, if the next interest payment date coincides with the maturity date; or
 - (b) the interest rate on the contract, if any interest is due to be paid before the maturity date.

7.2.31

FCA PRA

R

Derivation of notional positions: Cash borrowings and deposits

A cash borrowing or deposit must be treated as a notional *position* in a zero coupon *zero-specific-risk security* which:

- (1) is a short *position* in the case of a borrowing and a long *position* in the case of a deposit;
- (2) has a value equal to the market value of the borrowing or deposit;
- (3) has a maturity equal to that of the borrowing or deposit, or the next date the interest rate is reset (if earlier); and
- (4) has a coupon equal to:
 - (a) zero, if the next interest payment date coincides with the maturity date; or
 - (b) the interest rate on the borrowing or deposit, if any interest is due to be paid before the maturity date.

Derivation of notional positions: Options and warrants

7.2.32

FCA PRA

R

- (1) Where included in the *PRR* calculation in ■ BIPRU 7.2 (see the table in ■ BIPRU 7.2.4R), *options* and *warrants* must be treated in accordance with this *rule*.
- (2) An *option* or *warrant* on a debt *security*, a basket of debt *securities* or a debt *security* index must be treated as a *position* in that debt *security*, basket or index.
- (3) An *option* on an interest rate must be treated as a *position* in a zero coupon *zero-specific-risk security* with a maturity equal to the sum of the time to expiry of the *option* and the length of the period for which the interest rate is fixed.
- (4) An *option* on a *future* - where the *future* is based on an interest rate or debt *security* - must be treated as:
 - (a) a long *position* in that *future* for purchased call *options* and written put *options*; and
 - (b) a short *position* in that *future* for purchased put *options* and written call *options*.
- (5) An *option* on a *swap* must be treated as a deferred starting *swap*.

Derivation of notional positions: Bonds where the coupons and principal are paid in different currencies

7.2.33

FCA PRA

R

Where a debt *security* pays coupons in one currency, but will be redeemed in a different currency, it must be treated as:

- (1) a debt *security* denominated in the coupon's currency; and
- (2) a *foreign currency forward* to capture the fact that the debt *security's* principal will be repaid in a different currency from that in which it pays coupons, specifically:
 - (a) a notional forward sale of the coupon currency and purchase of the redemption currency, in the case of a long *position* in the debt *security*; or
 - (b) a notional forward purchase of the coupon currency and sale of the redemption currency, in the case of a short *position* in the debt *security*.

Derivation of notional positions: Interest rate risk on other futures, forwards and options

7.2.34

FCA PRA

R

Other *futures, forwards, options* and *swaps* treated under ■ BIPRU 7.2 must be treated as *positions* in *zero-specific-risk securities*, each of which:

- (1) has a zero coupon;
- (2) has a maturity equal to that of the relevant contract; and
- (3) is long or short according to the table in ■ BIPRU 7.2.35R.

7.2.35

FCA PRA

R

Table: Interest rate risk on other futures, forwards, options and swaps

This table belongs to ■ BIPRU 7.2.34R.

Instrument	Notional positions		
<i>foreign currency forward or future</i>	a long <i>position</i> denominated in the currency purchased	and	a short <i>position</i> denominated in the currency sold
<i>Gold forward or future</i>	a long <i>position</i> if the <i>forward or future</i> involves an actual (or notional) sale of gold	or	a short <i>position</i> if the <i>forward or future</i> involves an actual (or notional) purchase of gold
<i>Equity forward or future, or option</i>	A long <i>position</i> if the contract in-	or	A short <i>position</i> if the contract in-

Instrument	Notional <i>positions</i>	
(unless the <i>interest rate PRR</i> is calculated under the basic <i>interest rate PRR</i> calculation in BIPRU 7.3)	volves an actual (or notional) sale of the underlying <i>equity</i>	volves an actual (or notional) purchase of the underlying <i>equity</i>

Deriving the net position in each debt security: General

7.2.36

FCA PRA

R

The net *position* in a debt *security* is the difference between the value of the *firm's* long *positions* (including notional *positions*) and the value of its short *positions* (including notional *positions*) in the same debt *security*.

Deriving the net position in each debt security: Netting positions in the same debt security

7.2.37

FCA PRA

R

- (1) A *firm* must not net *positions* (including notional *positions*) unless those *positions* are in the same debt *security*. This *rule* sets out the circumstances in which debt *securities* may be treated as the same for these purposes.
- (2) Subject to (3) long and short *positions* are in the same debt *security*, and a debt *security* is the same as another if and only if:
 - (a) they enjoy the same rights in all respects; and
 - (b) are fungible with each other.
- (3) Long and short *positions* in different tranches of the same debt *security* may be treated as being in the same debt *security* for the purpose of (1) where:
 - (a) the tranches enjoy the same rights in all respects; and
 - (b) the tranches become fungible within 180 days and thereafter the debt *security* of one tranche can be delivered in settlement of the other tranche.

Deriving the net position in each debt security: Netting the cheapest to deliver security with other deliverable securities

7.2.38

FCA PRA

R

A *firm* may net a short notional *position* in the cheapest to deliver *security* arising from a short *future* or *forward* (see ■ BIPRU 7.2.13R(2)(a)) under which the seller has a choice of which debt *security* it may use to settle its obligations against a long *position* in any deliverable *security* up to a maximum of 90% of the common nominal amounts. The residual long and short nominal amounts must be treated as separate long and short *positions*.

7.2.39

FCA PRA

R

The netting permitted by ■ BIPRU 7.2.38R only relates to where the *firm* has sold the *future* or *forward*. It does not relate to where the *firm* has bought a *future* or *forward*.

Deriving the net position in each debt security: Netting zero-specific-risk securities with different maturities

7.2.40

FCA PRA

R

A *firm* may net a notional long *position* in a *zero-specific-risk security* against a notional short *position* in a *zero-specific-risk security* if:

- (1) they are denominated in the same currency;
- (2) their coupons do not differ by more than 15 basis points; and
- (3) they mature:
 - (a) on the same day, if they have residual maturities of less than one month;
 - (b) within 7 days of each other, if they have residual maturities of between one month and one year; and
 - (c) within 30 days of each other, if they have residual maturities in excess of one year.

Deriving the net position in each debt security: Reduced net underwriting positions in debt securities

7.2.41

FCA PRA

R

A *firm* must not net a *reduced net underwriting position* in a debt *security* with any other debt *security position*.

7.2.42

FCA PRA

G

■ BIPRU 7.2.41R only relates to *reduced net underwriting position*.

Deriving the net position in the correlation trading portfolio

7.2.42A

FCA PRA

R

A *correlation trading portfolio* may only consist of *securitisation positions* and *nth-to-default credit derivatives* that meet the following criteria:

- (1) the *positions* are neither *resecuritisation positions*, nor *options* on a *securitisation position*, nor any other derivatives of *securitisation exposures* that do not provide a pro-rata share in the proceeds of a *securitisation tranche*;
- (2) all reference instruments are either single-name instruments, including single-name credit derivatives, for which a liquid two-way market exists, or commonly traded indices based on reference entities which meet this criterion;
- (3) the *positions* do not fall under the exposure classes outlined in ■ BIPRU 3.2.9 R (8) (retail claims or contingent retail claims) and

■ BIPRU 3.2.9 R (9) (claims or contingent claims secured on real estate property); and

(4) the *positions* do not reference a claim on a *special purpose vehicle*.

7.2.42B

FCA PRA

R

Positions which are not *securitisation positions* or nth-to-default credit derivatives may be included in the *correlation trading portfolio* only if they hedge other such *positions* in this portfolio and a liquid two-way market exists for the relevant *position* or its reference entities.

7.2.42C

FCA PRA

R

For the purposes of ■ BIPRU 7.2.42A R (2) and ■ BIPRU 7.2.42B R, a two-way market may be deemed to exist only where there are independent, bona fide offers to buy and sell, so that a price reasonably related to the last sales price or current bona fide competitive bid and offer quotations can be determined within one *business day* and settled at that price within a relatively short time conforming to trade custom.

7.2.42D

FCA PRA

R

A *firm* must calculate both the net long and the net short *positions* in the *correlation trading portfolio* by applying ■ BIPRU 7.2.36 R and ■ BIPRU 7.2.37 R or, where applicable, ■ BIPRU 7.11.13 R to ■ BIPRU 7.11.17 R.

Specific risk calculation

7.2.43

FCA PRA

R

- (1) A *firm* must calculate the *specific risk* portion of the *interest rate PRR* for each debt *security* by multiplying the market value of the individual net *position* (ignoring the sign) by the *appropriate position risk adjustment* from the table in ■ BIPRU 7.2.44R or as specified by ■ BIPRU 7.2.45R - ■ BIPRU 7.2.48L R or by ■ BIPRU 7.11.13 R - ■ BIPRU 7.11.17 R.
- (2) Notional *positions* in *zero-specific-risk securities* do not attract *specific risk*.
- (3) For the purpose of (1), a *firm* may cap the product of multiplying the individual net *position* by the *appropriate position risk adjustment* at the maximum possible default-risk-related loss. For a short *position* in a credit derivative, a *firm* may calculate the maximum possible default-risk-related loss as a change in value due to the underlying names immediately becoming default-risk-free.

7.2.44

FCA PRA

R Table: specific risk position risk adjustments

This table belongs to ■ BIPRU 7.2.43R.

Issuer	Residual maturity	Position risk adjustment
Debt securities issued or guaranteed by central governments, issued by <i>central banks, international organisations, multilateral development banks</i> or <i>EEA States'</i> regional governments or local authorities which would qualify for <i>credit quality step 1</i> or which would receive a 0% risk weight under the <i>standardised approach</i> to credit risk.	Any	0%
(A) Debt securities issued or guaranteed by central governments, issued by <i>central banks, international organisations, multilateral development banks</i> or <i>EEA States'</i> regional governments or local authorities which would qualify for <i>credit quality step 2</i> or 3 under the <i>standardised approach</i> to credit risk.	Zero to six months over 6 and up to and including 24 months Over 24 months	0% 1% 1%
(B) Debt securities issued or guaranteed by <i>institutions</i> which would qualify for <i>credit quality step 1</i> or 2 under the <i>standardised approach</i> to credit risk.		
(C) Debt securities issued or guaranteed by <i>institution</i> which would qualify for <i>credit quality step 3</i> under BIPRU 3.4.34 R (Exposures to institutions: Credit assessment based method) or which would do so if it had an original effective maturity of three months or less.		
(D) Debt securities issued or guaranteed by <i>corporates</i> which would qualify for <i>credit quality step 1</i> , 2 or 3 under the <i>standardised approach</i> to credit risk.		
(E) Other <i>qualifying debt securities</i> (see BIPRU 7.2.49R)		
(A) Debt securities issued or guaranteed by central governments, issued by <i>central banks</i> ,	Any	8%

Issuer	Residual maturity	Position risk adjustment
<p><i>international organisations, multilateral development banks or EEA States' regional governments or local authorities or institutions which would qualify for credit quality step 4 or 5 under the standardised approach to credit risk.</i></p> <p>(B) Debt securities issued or guaranteed by corporates which would qualify for credit quality step 4 under the standardised approach to credit risk.</p> <p>(C) Exposures for which a credit assessment by a nominated ECAI is not available.</p>		
<p>(A) Debt securities issued or guaranteed by central governments, issued by central banks, international organisations, multilateral development banks or EEA States' regional governments or local authorities or institution which would qualify for credit quality step 6 under the standardised approach to credit risk.</p>	Any	12%
<p>(B) Debt securities issued or guaranteed by corporate which would qualify for credit quality step 5 or 6 under the standardised approach to credit risk.</p> <p>(C) An instrument that shows a particular risk because of the insufficient solvency of the issuer of liquidity. This paragraph applies even if the instrument would otherwise qualify for a lower position risk adjustment under this table.</p>		
<p>Note: The question of what a corporate is and of what category a debt security falls into must be decided under the rules relating to the standardised approach to credit risk.</p>		

[Note: CAD Annex I point 14 Table 1]

To the extent that a firm applies the IRB approach, to qualify for a credit quality step for the purpose of the table in ■ BIPRU 7.2.44R the obligor of the exposure must have an internal rating with a PD equivalent to or lower than that associated with the appropriate credit quality step under the standardised approach to credit risk.

7.2.46

FCA PRA

R

A *debt security* issued by a non-qualifying issuer must receive a *specific risk position risk adjustment* of 8% or 12% according to the table in ■ BIPRU 7.2.44R. However a *firm* must apply a higher *specific risk position risk adjustment* to such a *debt security* and/or not recognise offsetting for the purposes of defining the extent of *general market risk* between such a *security* and any other *debt securities* to the extent that doing otherwise would not be a prudent treatment of *specific risk* or *general market risk*.

7.2.46A

FCA PRA

G

■ BIPRU 7.2.43 R includes both actual and notional *positions*. However, notional *positions* in a *zero-specific-risk security* do not attract *specific risk*. For example:

- (1) interest-rate *swaps*, *foreign-currency swaps*, *FRAs*, interest-rate *futures*, *foreign-currency forwards*, *foreign-currency futures*, and the cash leg of *repurchase agreements* and *reverse repurchase agreements* create notional *positions* which will not attract *specific risk*; while
- (2) *futures*, *forwards* and *swaps* which are based on the price (or yield) of one or more *debt securities* will create at least one notional *position* that attracts *specific risk*.

Specific risk: securitisations and resecuritisations

7.2.48

G

[deleted]

7.2.48A

FCA PRA

R

- (1) Subject to (3), a *firm* must calculate the *specific risk* portion of the *interest rate PRR* for each *securitisation* and *resecuritisation position* by multiplying the market value of the individual net *position* (ignoring the sign) by the *appropriate position risk adjustment* from the table in ■ BIPRU 7.2.48D R or ■ BIPRU 7.2.48E R, or in accordance with ■ BIPRU 7.2.48F R, as applicable.
- (2) In calculating the *specific risk* capital charge of an individual net *securitisation* or *resecuritisation position*, a *firm* may cap the product of the weight and the individual net position at the maximum possible default-risk-related loss. For a short position, that limit may be calculated as a change in value due to the underlying names immediately becoming default-risk-free.

- (3) For a transitional period ending on 31 December 2013, where a *firm* holds *securitisation* and *resecuritisation* positions, other than positions included in the *correlation trading portfolio*, it must calculate:
 - (a) the total *specific risk* capital charges that would apply just to the net long positions; and
 - (b) the total *specific risk* capital charges that would apply just to the net short positions.

The total *specific risk* capital charge for *securitisation* and *resecuritisation* positions will be the higher of (3)(a) and (3)(b).

7.2.48B FCA PRA R

The *firm* must report to the *appropriate regulator* the total sum of its weighted net long and net short *securitisation* and *resecuritisation* positions, broken down by types of underlying assets.

7.2.48C FCA PRA R

When calculating the PRR of a *protection seller* in *securitisation* and *resecuritisation* credit derivatives, a *firm* must apply ■ BIPRU 7.11.3 R.

7.2.48D FCA PRA R

Table: specific risk position risk adjustments - standardised approach

Credit quality step	1	2	3	4 (only for credit assessments other than short-term credit assessments)	All other credit quality steps
---------------------	---	---	---	--	--------------------------------

<i>Securitisations</i>	1.6%	4%	8%	28%	100%
<i>Resecuritisations</i>	3.2%	8%	18%	52%	100%

A *firm* may only apply the *position risk adjustments* in this table where it would have to calculate a *risk weighted exposure amount* in accordance with the *standardised approach to securitisation and resecuritisation positions* if such *positions* were in its *non-trading book* under BIPRU 9. The *appropriate position risk adjustment* is calculated as 8% of the *risk weight* that would apply to the *position* under the *standardised approach* in BIPRU 9.11.2 R, subject to the requirements of BIPRU 9.9 to BIPRU 9.11, where appropriate.

7

7.2.48E

FCA PRA

R

Table: specific risk Position Risk Adjustments - IRB approach

Credit Quality Step		Securitisation positions			Resecuritisation positions	
Credit assessments other than short term	Short-term credit assessments	A	B	C	D	E
1	1	0.56%	0.96%	1.6%	1.6%	2.4%
2		0.64%	1.20%	2%	2%	3.2%
3		0.8%	1.44%	2.8%	2.8%	4%
4	2	0.96%	1.6%		3.2%	5.2%
5		1.60%	2.8%		4.8%	8%
6		2.8%	4%		8%	12%
7	3	4.8%	6%		12%	18%
8		8%			16%	28%
9		20%			24%	40%
10		34%			40%	52%
11		52%			60%	68%
all other unrated		100%				

A firm may only apply the *position risk adjustments* in this table where it would have to calculate a *risk weighted exposure amount* in accordance with the *IRB approach to securitisation and resecuritisation positions* if such positions were in its *non-trading book* under BIPRU 9. The *appropriate position risk adjustment* is calculated as 8% of the *risk weight* that would apply to the *position* under the *IRB approach* in BIPRU 9.12.11 R, subject to the requirements in BIPRU 9.12 where appropriate.

7.2.48F

FCA PRA

R

- (1) A firm may use the *supervisory formula method* to calculate the *appropriate position risk adjustment* for *specific risk* where:
- the firm is permitted to apply the *supervisory formula method* to the same *position* if it was held in its *non-trading book* in accordance with ■ BIPRU 9.12; or
 - otherwise, the firm is expressly permitted by its *VaR model permission* to apply the *supervisory formula method* to calculate the *appropriate position risk adjustment* for *specific risk*.

- (2) The *appropriate position risk adjustment* under the *supervisory formula method* must be calculated by multiplying the *risk weight* calculated according to ■ BIPRU 9.12.21 R by 8%.
- (3) Where relevant, estimates of *PDs* and *LGDs* as inputs to the *supervisory formula method* must be determined in accordance with ■ BIPRU 4.
- (4) Where expressly permitted by its *VaR model permission*, a *firm* may use the approach outlined in ■ BIPRU 7.10.55A R to ■ BIPRU 7.10.55S G (Incremental Risk Charge) to determine *PDs* and *LGDs* as inputs to the *supervisory formula method*.

7.2.48G

FCA PRA

R

Where a *securitisation position* in the *trading book* is subject to an increased *risk weight* in accordance with ■ BIPRU 9.15, the *appropriate position risk adjustment* must be calculated as 8% of the *risk weight* that would apply to the *position* in accordance with ■ BIPRU 9.15.

7.2.48H

FCA PRA

G

Originators, *investors* and *sponsors* of *securitisations* in the *trading book* will have to meet the requirements of ■ BIPRU 9.3.1A R, ■ BIPRU 9.3.15 R to ■ BIPRU 9.3.20 R and ■ BIPRU 9.15.

7.2.48I

FCA PRA

G

- (1) Subject to ■ BIPRU 7.2.48J G, ■ BIPRU 9.15.9 R and ■ BIPRU 9.15.10 R, where the investor, *originator* or *sponsor* of a *securitisation* fails to meet any of the requirements in ■ BIPRU 9.3.18 R to ■ BIPRU 9.3.20 R (Disclosure requirements) and ■ BIPRU 9.15.11 R to ■ BIPRU 9.15.16 R (investor due diligence requirements) in any material respect by reason of its negligence or omission, the *appropriate regulator* will use its powers under section 55J (Variation etc. on the Authority's own initiative) of the *Act* to impose an additional capital charge in accordance with ■ BIPRU 7.2.48 GR. The additional capital charge imposed will be progressively increased with each relevant, subsequent infringement of the requirements in ■ BIPRU 9.3.18 R to ■ BIPRU 9.3.20 R and ■ BIPRU 9.15.11 R to ■ BIPRU 9.15.16A R, up to a maximum of 1250% *risk weight*.
- (2) Subject to ■ BIPRU 9.3.22 G, ■ BIPRU 9.15.9 R and ■ BIPRU 9.15.10 R, where a *credit institution* fails to meet in any material respect the requirements in ■ BIPRU 9.15.16A R (Group level requirements), the *appropriate regulator* may consider using its powers under section 55J (Variation etc on the Authority's own initiative) of the *Act* in the manner described in (1). In order to calculate the *risk weights* that would apply to the *credit institution*, the *appropriate regulator* may treat the *securitisation* investments of the *subsidiary undertaking* as if they were *securitisation positions* held directly by the *credit institution*.

7.2.48J

FCA PRA

G

When calculating the additional capital charge it will impose under ■ BIPRU 7.2.48G R, the *appropriate regulator* will take into account the exemption of certain *securitisations* from the scope of ■ BIPRU 9.15.3 R under ■ BIPRU 9.15.9 R and ■ BIPRU 9.15.10 R and, if those exemptions are relevant, it will reduce the capital charge it would otherwise impose.

7.2.48K

FCA PRA

R

A *securitisation exposure* in the *trading book* that would be subject to deduction in accordance with ■ GENPRU 2.2. (Capital resources) or to a 1250% *risk weight* in accordance with ■ BIPRU 9 (Securitisation) is subject to a capital charge that is no less than that set out under those provisions, capped at the maximum possible default-risk-related loss. Unrated liquidity facilities are subject to a capital charge that is no less than that set out in ■ BIPRU 9.

Specific risk: correlation trading portfolio

7.2.48L

FCA PRA

R

- (1) Where a *firm* holds a *position* in the *correlation trading portfolio*, it must calculate:
 - (a) The total *specific risk* capital charges that would apply just to the net long *positions* of the *correlation trading portfolio*; and
 - (b) The total *specific risk* capital charges that would apply just to the net short *positions* of the *correlation trading portfolio*.
- (2) The higher of (1)(a) and (1)(b) will be the *specific risk* capital charge for the *correlation trading portfolio*.
- (3) In calculating the *specific risk* capital charge of an individual net *position* in the *correlation trading portfolio*, a *firm* may cap the product of multiplying the individual net *position* by the *appropriate position risk adjustment* at the maximum possible default-risk-related loss. For a short *position*, a *firm* may calculate the maximum possible default-risk-related loss as a change in value due to the underlying names immediately becoming default-risk-free.

Definition of a qualifying debt security

7.2.49

FCA PRA

R

A *debt security* is a *qualifying debt security* if:

- (1) it qualifies for a *credit quality step* under the *standardised approach* to credit risk corresponding at least to investment grade; or
- (2) it has a *PD* which, because of the solvency of the issuer, is not higher than that of the *debt securities* referred to under (1) under the *IRB approach*; or
- (3) it is a *debt security* for which a credit assessment by a *nominated ECAI* is unavailable and which meets the following conditions:
 - (a) it is considered by the *firm* to be sufficiently liquid;

- (b) it is of investment quality, according to the *firm's* own discretion, at least equivalent to that of the *debt securities* referred to under (1); and
 - (c) it is listed on at least one *regulated market* or *designated investment exchange*; or
- (4) it is a *debt security* issued by an *institution* subject to the capital adequacy requirements set out in the *Banking Consolidation Directive* that satisfies the following conditions:
- (a) it is considered by the *firm* to be sufficiently liquid;
 - (b) its investment quality is, according to the *firm's* own discretion, at least equivalent to that of the assets referred to under (1) above; or
- (5) it is a *debt security* issued by an *institution* that is deemed to be of equivalent or higher credit quality than that associated with *credit quality step 2* under the *standardised approach* to credit risk and that is subject to supervision and regulatory arrangements comparable to those under the *Capital Adequacy Directive*.

7.2.50

FCA PRA

R

A *firm* must not treat a *debt security* as a *qualifying debt security* if it would be prudent to consider that the *debt security* concerned is subject to too high a degree of *specific risk* for it to be treated as a *qualifying debt security*.

7.2.51

FCA PRA

G

The manner in which a *firm* assesses a *debt security* for the purpose of treatment as a *qualifying debt security* will be subject to scrutiny by the *appropriate regulator*. The *appropriate regulator* may take action to overturn the *firm's* judgement if it considers that the *debt security* should not be treated as a *qualifying debt security*.

General market risk calculation: General

7.2.52

FCA PRA

R

A *firm* must calculate the *general market risk* portion of the *interest rate PRR* for each currency using either:

- (1) the *interest rate simplified maturity method*;
- (2) the *interest rate maturity method*; or
- (3) the *interest rate duration method*.

7.2.53

FCA PRA

R

■ BIPRU 7.2.52R(3) is subject to ■ BIPRU 7.2.54R.

7.2.54

FCA PRA

R

A *firm* must not use the *interest rate duration method* for index-linked *securities*. Instead, these *securities* must:

- (1) be attributed a coupon of 3%; and

- (2) be treated separately under either the *interest rate simplified maturity method* or the *interest rate maturity method*.

General market risk calculation: Simplified maturity method

7.2.55

FCA PRA

G

The *interest rate simplified maturity method* weights individual net *positions* to reflect their price sensitivity to changes in interest rates. The weights are related to the coupon and the residual maturity of the instrument (or the next interest rate re-fix date for floating rate items).

7.2.56

FCA PRA

R

Under the *interest rate simplified maturity method*, the portion of the *interest rate PRR* for *general market risk* equals the sum of each individual net *position* (long or short) multiplied by the *appropriate position risk adjustment* in the table in ■ BIPRU 7.2.57R. A *firm* must assign its net *positions* to the appropriate maturity bands in the table in ■ BIPRU 7.2.57R on the basis of residual maturity in the case of fixed-rate instruments and on the basis of the period until the interest rate is next set in the case of instruments on which the interest rate is variable before final maturity.

7.2.57

FCA PRA

R

Table: general market risk Position Risk Adjustments

This table belongs to ■ BIPRU 7.2.56R.

Zone	Maturity band		<i>position risk adjustment</i>
	Coupon of 3% or more	Coupon of less than 3%	
One	0 ; 1 month	0 ; 1 month	0.00%
	> 1 ; 3 months	> 1 ; 3 months	0.20%
	> 3 ; 6 months	> 3 ; 6 months	0.4%
	> 6 ; 12 months	> 6 ; 12 months	0.7%
Two	> 1 ; 2 years	> 1.0 ; 1.9 years	1.25%
	> 2 ; 3 years	> 1.9 ; 2.8 years	1.75%
	> 3 ; 4 years	> 2.8 ; 3.6 years	2.25%
Three	> 4 ; 5 years	> 3.6 ; 4.3 years	2.75%
	> 5 ; 7 years	> 4.3 ; 5.7 years	3.25%
	> 7 ; 10 years	> 5.7 ; 7.3 years	3.75%
	> 10 ; 15 years	> 7.3 ; 9.3 years	4.5%
	> 15 ; 20 years	> 9.3 ; 10.6 years	5.25%
	> 20 years	> 10.6 ; 12.0 years	6.00%
		> 12.0 ; 20.0 years	8.00%

Zone	Maturity band		<i>position risk adjustment</i>
	Coupon of 3% or more	Coupon of less than 3%	
	> 20 years		12.50%

General market risk calculation: The maturity method

7.2.58

FCA PRA

G

The *interest rate maturity method* builds on the *interest rate simplified maturity method* by partially recognising offsetting *positions*. ■ BIPRU 7.2.61G provides an illustration of the *interest rate maturity method*.

7.2.59

FCA PRA

R

Under the *interest rate maturity method*, the portion of the *interest rate PRR* for *general market risk* is calculated as follows:

- (1) Step 1: each net *position* is allocated to the appropriate maturity band in the table in ■ BIPRU 7.2.57R and multiplied by the corresponding *position risk adjustment*;
- (2) Step 2: weighted long and short *positions* are matched within:
 - (a) the same maturity band;
 - (b) the same zone (using unmatched *positions* from (a)); and
 - (c) different zones (using unmatched *positions* from (b) and matching between zones 1 and 2 and 2 and 3 before zone 1 and 3); and
- (3) Step 3: the portion of the *interest rate PRR* for *general market risk* is the sum of:
 - (a) 10% of the total amount matched within maturity bands;
 - (b) 40% of the amount matched within zone 1 under (2)(b);
 - (c) 30% of the amount matched within zones 2 & 3 under (2)(b);
 - (d) 40% of the amounts matched between zones 1 and 2, and between zones 2 and 3;
 - (e) 150% of the amount matched between zones 1 and 3; and
 - (f) 100% of the weighted *positions* remaining unmatched after (2)(c).

PAGE
29

7.2.60

FCA PRA

G

The table in ■ BIPRU 7.2.57R distinguishes between debt *securities* with a coupon of less than 3% and those with coupon in excess of 3%. However, this does not mean that the *firm* has to do a separate *general market risk* calculation for each; it merely ensures that when allocating debt *securities* to a particular band, their coupons are taken into account as well as their maturities. So for example, a 21 year 6% debt *security* falls into the same band as an 11 year 2% debt *security*. They are both weighted at 6%, and can be matched

under ■ BIPRU 7.2.59R(2)(a) (the first part of step two of the *interest rate maturity method* calculation) because they fall within the same band.

7.2.61

FCA PRA

G

This paragraph sets out an example of a calculation under the *interest rate maturity method*. In this example, a firm with a £ sterling base currency is processing its euro denominated positions.

General market risk calculation: Duration method

G

The *interest rate duration method* produces a more accurate measure of interest rate risk than the maturity methods but it is also more complex to calculate.

7.2.62

FCA PRA

7.2.63

FCA PRA

R

- (1) A firm must use the following formula to calculate modified duration for the purpose of the *interest rate duration method*:

$$\text{Modified duration} = \frac{D}{(1 + r)}$$

(2)

For the purposes of the formula in (1):

$$D = \frac{\sum_{t=1}^m \frac{tC_t}{(1+r)^t}}{\sum_{t=1}^m \frac{C_t}{(1+r)^t}}$$

(3) For the purpose of the formulae in (1) and (2):

- (a) C_t =cash payment at time t
- (b) m =total maturity
- (c) r =yield to maturity. In the case of a fixed-rate debt *security* a *firm* must take the current mark to market of the debt *security* and thence calculate its yield to maturity, which is the implied discount rate for that instrument. In the case of a floating rate instrument, a *firm* must take the current mark to market of the debt *security* and thence calculate its yield on the assumption that the principal is due on the date that the interest rate can next be changed.
- (d) t =time

7.2.64

FCA PRA

R

Under the *interest rate duration method*, the portion of the *interest rate PRR* for *general market risk* is calculated as follows:

- (1) Step 1: allocate each net *position* to the appropriate duration zone in the table in ■ BIPRU 7.2.65R and multiply it by:
 - (a) its modified duration (using the formula in ■ BIPRU 7.2.63R); and
 - (b) the appropriate assumed interest rate change in the table in ■ BIPRU 7.2.65R;
- (2) Step 2: match weighted long and short *positions*:
 - (a) within zones; and
 - (b) across zones (using unmatched *positions* from (2)(a) and following the process in ■ BIPRU 7.2.59R (2)(c)); and
- (3) Step 3: calculate the portion of the *interest rate PRR* for *general market risk* as the sum of:
 - (a) 100% of the weighted *positions* remaining unmatched after (2)(b);
 - (b) 2% of the matched weighted *position* in each zone;
 - (c) 40% of the matched weighted *position* between zones 1 and 2, and between zones 2 and 3; and

(d) 150% of the matched weighted *position* between zones 1 and 3.

7.2.65

FCA PRA

R

Table: Assumed interest rate change in the interest rate duration method

This table belongs to ■ BIPRU 7.2.64R

Zone	Modified Duration	Assumed interest rate change (percentage points)
1	0 ; 12 months	1.00
2	> 12 months ; 3.6 years	0.85
3	> 3.6 years	0.70

7.2.66

FCA PRA

R

If a *firm* uses the *interest rate duration method* it must do so on a consistent basis.

7.3 Equity PRR and basic interest rate PRR for equity derivatives

General rule

7.3.1

R

FCA PRA

- (1) A *firm* must calculate its *equity PRR* by:
- (a) identifying which *positions* must be included within the *PRR* calculation (see ■ BIPRU 7.3.2R);
 - (b) deriving the net *position* in each *equity* in accordance with ■ BIPRU 7.3.23R;
 - (c) including each of those net *positions* in either the *simplified equity method* (see ■ BIPRU 7.3.29R) or, subject to ■ BIPRU 7.3.27R, the *standard equity method* (see ■ BIPRU 7.3.32R); and
 - (d) summing the *PRR* on each net *position* as calculated under the *simplified equity method* and *standard equity method*.
- (2) All net *positions*, irrespective of their signs, must be converted on a daily basis into the *firm's base currency* at the prevailing spot exchange rate before their aggregation.

Scope of the equity PRR calculation

7.3.2

R

FCA PRA

A *firm's equity PRR* calculation must:

- (1) include all *trading book positions* in *equities*, unless:
 - (a) the *position* is fully deducted as a *material holding* under the calculations under the *capital resources table*, in which case the *firm* may exclude it; or
 - (b) the *position* is hedging an *option* or *warrant* which is being treated under ■ BIPRU 7.6.26R (Table: Appropriate treatment for equities, debt securities or currencies hedging options);
- (2) include notional *positions* arising from *trading book positions* in the instruments listed in the table in ■ BIPRU 7.3.3R; and

- (3) (if the *firm* is the transferor of *equities* or guaranteed rights relating to title to *equities* in a *repurchase agreement* or the lender of *equities* in an *equities* lending agreement) include such *equities* if those *equities* meet the criteria for inclusion in the *trading book*.

7.3.3

FCA PRA

R

Table: Instruments which result in notional positions

This table belongs to ■ BIPRU 7.3.2R(2)

Instrument	See
Depository receipts	BIPRU 7.3.12R
<i>Convertibles</i> where:	
(a) the <i>convertible</i> is trading at a market price of less than 110% of the underlying <i>equity</i> ; and the first date at which conversion can take place is less than three months ahead, or the next such date (where the first has passed) is less than a year ahead; or	BIPRU 7.3.13R
(b) the conditions in (a) are not met but the <i>firm</i> includes the <i>convertible</i> in its <i>equity PRR</i> calculation rather than including it in its <i>interest rate PRR</i> calculation set out in BIPRU 7.2 (Interest rate PRR).	
<i>Futures, forwards, CFDs and synthetic futures on a single equity</i>	BIPRU 7.3.14R
<i>Futures, forwards, CFDs and synthetic futures on a basket of equities or equity index</i>	BIPRU 7.3.15R
<i>equity legs of an equity swap</i>	BIPRU 7.3.19R
<i>Options or warrants on a single equity, an equity future, a basket of equities or an equity index (unless the firm calculates a PRR on the option or warrant under BIPRU 7.6).</i>	BIPRU 7.3.21R

7.3.4

FCA PRA

G

■ BIPRU 7.3.2R(1) includes a *trading book position* in an *equity* that is subsequently repo'd under a *repurchase agreement* or lent under a stock lending agreement. Clearly, if the *equity* had initially been obtained via a *reverse repurchase agreement* or stock

borrowing agreement, the *equity* would not have been included in the *trading book* in the first place.

7.3.5

FCA PRA

G

■ BIPRU 7.3.2R(1) includes *net underwriting positions* or *reduced net underwriting positions* in *equities*. ■ BIPRU 7.3.27R requires a *firm* to use the *simplified equity method* in the case of *reduced net underwriting positions*. In the case of *net underwriting positions* that have not been reduced according to ■ BIPRU 7.8.27R (Calculating the reduced net underwriting position), there is no such restriction; a *firm* can choose which of the two *equity* methods to use.

7.3.6

FCA PRA

G

Firms are reminded that the table in ■ BIPRU 7.6.5R (Table: Appropriate PRR calculation for an option or warrant) divides *equity options* and *warrants* into:

- (1) those which must be treated under ■ BIPRU 7.6 (Option PRR); and
- (2) those which must be treated under either ■ BIPRU 7.3 or ■ BIPRU 7.6, the *firm* being able to choose whether ■ BIPRU 7.3 or ■ BIPRU 7.6 is used.

7.3.7

FCA PRA

G

The table in ■ BIPRU 7.3.3R does not require every *convertible* to be included in ■ BIPRU 7.3's *PRR* calculation. Where a *convertible* is not included in this *PRR* calculation, ■ BIPRU 7.2.3R (1) (Scope of the interest rate PRR calculation) requires that it be included in the ■ BIPRU 7.2 *PRR* calculation.

7.3.8

FCA PRA

G

Some of the instruments listed in the table in ■ BIPRU 7.3.3R are also included in a *firm's interest rate PRR* calculation. For simplicity, a *firm* may use the *interest rate PRR* calculation in ■ BIPRU 7.3 rather than the calculation in ■ BIPRU 7.2 (Interest rate PRR). ■ BIPRU 7.3.44G explains this in more detail.

Derivation of notional positions: General approach

7.3.9

FCA PRA

G

■ BIPRU 7.3.10R - ■ BIPRU 7.3.21R convert the instruments listed in the table in ■ BIPRU 7.3.3R into notional *positions* in individual *equities*, *equity* baskets or *equity* indices.

7.3.10

FCA PRA

R

Unless specified otherwise, the value of each notional *equity position* equals the quantity of that *equity* underlying the instrument multiplied by the current market value of the *equity*.

7.3.11

FCA PRA

G

- (1) An example of ■ BIPRU 7.3.10R is as follows. The current market value of a particular *equity* is £2.50. If a *firm* contracts to sell this *equity* in five year's time for £3 it would treat the notional short *equity position* as having a value of £2.50 when calculating the *equity PRR*.
- (2) In effect, the forward *position* has been treated as being equivalent to a spot *position* for the purposes of calculating *equity PRR*. To capture the risk that the forward price changes relative to the spot price, forward *equity positions* are included in the *firm's interest rate PRR* calculation (see ■ BIPRU 7.3.45R or the table in ■ BIPRU 7.2.4R (Table: Instruments which result in notional positions)).

7.3.12

FCA PRA

R

Derivation of notional positions: Depository receipts

A depository receipt must be treated as a notional *position* in the underlying *equity*.

7.3.13

FCA PRA

R

Derivation of notional positions: Convertibles

Where a *convertible* is included in ■ BIPRU 7.3's PRR calculation (see the table in ■ BIPRU 7.3.3R):

- (1) it must be treated as a *position* in the *equity* into which it converts; and
- (2) the *firm's equity PRR* must be adjusted by making:
 - (a) an addition equal to the current value of any loss which the *firm* would make if it did convert to *equity*; or
 - (b) a deduction equal to the current value of any profit which the *firm* would make if it did convert to *equity* (subject to a maximum deduction equal to the PRR on the notional *position* underlying the *convertible*).

Derivation of notional positions: Futures, forwards and CFDs on a single equity

7.3.14

FCA PRA

R

A *future* (including a *synthetic future*), *forward* or *CFD* on a single *equity* must be treated as a notional *position* in that *equity*.

Derivation of notional positions: Futures, forwards and CFDs on equity indices or baskets

7.3.15

FCA PRA

R

A *future* (including a *synthetic future*), *forward* or *CFD* on an *equity* index or basket must be treated as either:

- (1) a *position* in each of the underlying *equities*; or
- (2) the *positions* shown in the table in ■ BIPRU 7.3.16R.

7.3.16

FCA PRA

R

Table: Instruments which result in notional positions

This table belongs to ■ BIPRU 7.3.15R(2)

	Under the <i>simplified equity method</i> (BIPRU 7.3.29R)	Under the <i>standard equity method</i> (BIPRU 7.3.32R)
Only one country in the index or	One <i>position</i> in the index or basket	One <i>position</i> in the index or basket

	Under the <i>simplified equity method</i> (BIPRU 7.3.29R)	Under the <i>standard equity method</i> (BIPRU 7.3.32R)
basket (see BIPRU 7.3.32R)		
More than one country in the index or basket	One <i>position</i> in the index or basket	Several notional- or al basket <i>positions</i>, one for each country
		One notional basket <i>position</i> in a separate, notional country

7.3.17

FCA PRA

G

An example of ■ BIPRU 7.3.16R is as follows. A *firm* decides to treat a FTSE Eurotop 300 *future* under the *standard equity method*, and furthermore, chooses to treat it as one notional *position*. The table in ■ BIPRU 7.3.16R requires that this notional *position* be treated as if it were from a separate notional country rather than any of the countries to which the underlying *equities* are from.

7.3.18

FCA PRA

R

The notional *positions* created under ■ BIPRU 7.3.15R have the following values:

- (1) where only one notional *position* is created, it has a value equal to the total market value of the *equities* underlying the contract; or
- (2) where more than one notional *position* is created, each one has a value which reflects the relevant *equity's* or country's contribution to the total market value of the *equities* underlying the contract.

Derivation of notional positions: Equity legs of equity swaps

7.3.19

FCA PRA

R

The *equity* leg of an *equity swap* must be treated as a *position* in the underlying *equity, equity basket* or *equity index*, which is:

- (1) long, if the *firm* has contracted to receive any increase and pay any decrease in the value of the underlying *equities* or *equity index*; and
- (2) short, if the *firm* has contracted to receive any decrease and pay any increase in the value of the underlying *equities* or *equity index*.

7.3.20

FCA PRA

G

The interest rate leg of an *equity swap* is included in a *firm's interest rate PRR* calculation (see the table in ■ BIPRU 7.2.4R (Table: Instruments which result in notional positions)) unless it is treated under ■ BIPRU 7.3.45R.

7.3.21

FCA PRA

R

Derivation of notional positions: Options

If included in ■ BIPRU 7.3's PRR calculation (see the table in ■ BIPRU 7.3.3R), *options* must be treated as follows:

- (1) an *option* on a single *equity* must be treated as a notional *position* in that *equity*;
- (2) an *option* on a basket of *equities* or *equity* index must be treated as a *future* on that basket or index; and
- (3) an *option* on an *equity future* must be treated as:
 - (a) a long *position* in that *future*, for purchased call *options* and written put *options*; and
 - (b) a short *position* in that *future*, for purchased put *options* and written call *options*.

7.3.22

FCA PRA

R

Deriving the net position in each equity

The net *position* in each *equity* is the difference between the value of the *firm's* long *positions* (including notional *positions*) and the value of its short *positions* (including notional *positions*) in the same *equity*.

7.3.23

FCA PRA

R

- (1) When deriving the net *position* in each *equity*, a *firm* must not net long and short *positions* except in accordance with this *rule*.
- (2) Subject to (3), a *firm* may net long and short *positions* in the same *equity*. Two *equities* are the same if and only if they:
 - (a) enjoy the same rights in all respects; and
 - (b) are fungible with each other.
- (3) Long and short *positions* in different tranches of the same *equity* may be treated as being in the same *equity* for the purpose of (1), where:
 - (a) the tranches enjoy the same rights in all respects; and
 - (b) the tranches become fungible with each other within 180 days, and thereafter the *equity* of one tranche can be delivered in settlement of the other tranche.

7.3.24

FCA PRA

R

A *firm* must not net a *reduced net underwriting position* with any other *equity position*.

7.3.25

FCA PRA

G

■ BIPRU 7.3.24R only relates to *reduced net underwriting position*.

Simplified and standard equity methods

7.3.26

FCA PRA

G

■ BIPRU 7.3.1R (1) requires that the net *position* in each *equity* be included in either the *simplified equity method* or the *standard equity method*, subject to the restriction in ■ BIPRU 7.3.27R. A *firm* does not have to use the same method for all *equities*.

7.3.27

FCA PRA

R

A *firm* must use the *simplified equity method* for *reduced net underwriting positions*.

7.3.28

FCA PRA

G

A *firm* may use either method for a *net underwriting position*; ■ BIPRU 7.3.27R only relates to *reduced net underwriting positions*.

Simplified equity method

7.3.29

FCA PRA

R

Under the *simplified equity method*, the PRR for each *equity*, *equity index*, or *equity basket* equals the market value of the net *position* (ignoring the sign) multiplied by the *appropriate position risk adjustment* from the table in ■ BIPRU 7.3.30R. The result must be converted into the *firm's base currency* at current spot *foreign currency* rates.

7.3.30

FCA PRA

R

Table: simplified equity method *position risk adjustments*

This table belongs to ■ BIPRU 7.3.29R

Instrument	Position risk adjustment
Single equities	16%
Qualifying equity indices (see BIPRU 7.3.38R)	8%
All other equity indices or baskets	16%

If it is necessary to distinguish between the *specific risk position risk adjustment* and the *general market risk position risk adjustment*, the *specific risk position risk adjustment* for the first and third rows is 8% and that for the second row is 0%. The rest of the *position risk adjustment* in the second column is the *general market risk position risk adjustment*

Standard equity method

7.3.31

FCA PRA

G

The *standard equity method* divides the risk of loss from a *firm's equity positions* into the risk of loss from a general move in a country's *equity* market and the risk of loss from an individual *equity's* price changing relative to that country's *equity* market. These are called *general market risk* and *specific risk* respectively.

7.3.32

FCA PRA

R

Under the *standard equity method*, a *firm* must:

- (1) group *equity positions* into country portfolios as follows:
 - (a) a *position* in an individual *equity* belongs to:
 - (i) the country it is listed in;

- (ii) any of the countries it is listed in, if more than one; or
- (iii) the country it was issued from, if unlisted;

(b) a *position* in an *equity* basket or index that is treated under ■ BIPRU 7.3.15R(2), is allocated to one or more country portfolios based on the countries to which the underlying *equities* belong to under (a) or a notional country provided for in the table in ■ BIPRU 7.3.16R; and

(2) sum:

- (a) the *PRRs* for *specific risk* calculated under ■ BIPRU 7.3.33R; and
- (b) the *PRRs* for *general market risk* for each country portfolio as calculated under ■ BIPRU 7.3.41R and ■ BIPRU 7.3.42R.

Standard equity method: Specific risk

7.3.33

FCA PRA

R

Under the *standard equity method*, a *firm* must calculate a *PRR* for *specific risk* based on the net *position* in each *equity*, *equity* index or *equity* basket by multiplying its market value (ignoring the sign) by the *appropriate position risk adjustment* from the table in ■ BIPRU 7.3.34R.

7.3.34

US	S&P 500, Dow Jones Industrial Average, NASDAQ Composite, Russell 2000

Standard equity method: General market risk: General

7.3.40

R

Under the *standard equity method*, a *firm* must apply approach one, as set out in ■ BIPRU 7.3.41R, to each country portfolio (or part portfolio) unless the conditions in ■ BIPRU 7.3.42R(3) are met, in which case the *firm*

FCA PRA

may instead apply approach two, as set out in ■ BIPRU 7.3.42R, to the relevant country portfolios (or part portfolios).

Standard equity method: General market risk: Approach One: No offset between different country portfolios

7.3.41
FCA PRA

R

Under approach one as referred to in ■ BIPRU 7.3.40R, the *PRR* for *general market risk* equals the net value (ignoring the sign) of the country portfolio multiplied by 8%.

Standard equity method: General market risk: Approach Two: Limited offset between different country portfolios

7.3.42
FCA PRA

R

(1) Under approach two as referred to in ■ BIPRU 7.3.40R, the *PRR* for *general market risk* is calculated using the following formula:

$$\sqrt{(8\% * CP_1)^2 + (8\% * CP_2)^2 + (8\% * CP_3)^2 + \dots + (8\% * CP_n)^2}$$

- (2) In the formula in (1) CP_i denotes the net value of i th country portfolio (converted to the *firm's base currency* using current spot *foreign currency* rates).
- (3) The conditions referred to in ■ BIPRU 7.3.40R that must be met for a *firm* to be able to use approach two as referred to in ■ BIPRU 7.3.40R are as follows:
 - (a) at least four country portfolios are included (that is: $n \geq 4$);
 - (b) only country portfolios for countries which are full members of the *OECD*, Hong Kong or Singapore are included;
 - (c) no individual country portfolio comprises more than 30% of the total gross value of country portfolios included; and
 - (d) the total net value of country portfolios included equals zero, that is:

$$\sum_i CP_i = 0$$

7.3.43
FCA PRA

G

In order to meet ■ BIPRU 7.3.42R(3)(d), it is likely that part of a country portfolio will have to be excluded from approach two under ■ BIPRU 7.3.42R (and therefore included in approach one under ■ BIPRU 7.3.41R), even if that country portfolio meets ■ BIPRU 7.3.42R(3)(a) - ■ (c).

Basic interest rate calculation for equity instruments

7.3.44
FCA PRA

G

A *basic interest rate PRR* calculation is included in ■ BIPRU 7.3 for a *firm* that does not wish to use the calculation in ■ BIPRU 7.2 (Interest rate PRR). However, it tends to result in higher charges than the methods in ■ BIPRU 7.2, largely because the *interest rate PRR* is calculated on each notional *equity position* separately and then summed without offsetting long and short *positions*.

7.3.45

FCA PRA

R

This rule applies to a *firm* that does not include a *forward*, *future*, *option* or *swap* on an *equity*, basket of *equities* or *equity* index in the calculation of its *interest rate PRR* calculation under ■ BIPRU 7.2 (Interest rate PRR). However it does not apply to cliquet as defined in ■ BIPRU 7.6.18R (Table: Option PRR: methods for different types of option). A *firm* must calculate the *interest rate PRR* for a *position* being treated under this rule as follows:

- (1) multiply the market value of the notional *equity position* underlying the instrument by the appropriate percentage from the table in ■ BIPRU 7.3.47R; and
- (2) sum the results from (1), ignoring the sign.

7.3.46

FCA PRA

G

Cliquets on *equities*, baskets of *equities* or *equity* indices do not attract an *interest rate PRR*. ■ BIPRU 7.3.45R excludes them from the basic *interest rate PRR* calculation and the table in ■ BIPRU 7.2.4R (Table: Instruments which result in notional positions) excludes them from the scope of the *interest rate PRR* calculation in ■ BIPRU 7.2 (Interest rate PRR).

7.3.47

FCA PRA

R

Table: Percentages used in the basic interest rate PRR calculation for equity instruments

> 1 ; 2 years	1.25
> 2 ; 3 years	1.75
> 3 ; 4 years	2.25
> 4 ; 5 years	2.75
> 5 ; 7 years	3.25
> 7 ; 10 years	3.75
> 10 ; 15 years	4.50
> 15 ; 20 years	5.25
> 20 years	6.00

Additional capital charge in relation to equity indices

7.3.48

FCA PRA

R

If a *firm* nets off *positions* in one or more of the *equities* constituting an *equity* index *future*, *forward* or *CFD* against one or more *positions* in the *equity* index *future*, *forward* or *CFD* itself, the *firm* must apply an additional *equity PRR* to the netted *position* to cover the risk of loss caused by the value of the *future*, *forward* or *CFD* not moving fully in line with

that of its constituent *equities*. The same applies if a *firm* holds opposite *positions* in a *future, forward* or *CFD* on an *equity* index that are not identical in respect of either their maturity or their composition or both.

7.4 Commodity PRR

General rule

7.4.1

FCA PRA

R

A *firm* must calculate its *commodity PRR* by:

- (1) identifying which *commodity position* must be included within the scope of the *PRR* calculation (see ■ BIPRU 7.4.2R);
- (2) expressing each such *position* in terms of the standard unit of measurement of the *commodity* concerned;
- (3) expressing the spot price in each *commodity* in the *firm's base currency* at current spot foreign exchange rates;
- (4) calculating an individual *PRR* for each *commodity* (see ■ BIPRU 7.4.20R); and
- (5) summing the resulting individual *PRRs*.

Scope of the commodity PRR calculation

7.4.2

FCA PRA

R

A *firm's commodity PRR* calculation must, regardless of whether the *positions* concerned are *trading book* or *non-trading book positions*:

- (1) include *physical commodity positions*;
- (2) (if the *firm* is the transferor of *commodities* or guaranteed rights relating to title to *commodities* in a *repurchase agreement* or the lender of *commodities* in a *commodities* lending agreement) include such *commodities*;
- (3) include notional *positions* arising from *positions* in the instruments listed in the table in ■ BIPRU 7.4.4R; and
- (4) exclude *positions* constituting a *stock financing* transaction.

7.4.3

FCA PRA

R

Gold *positions* are excluded from the scope of the *commodity PRR*. Instead, they are included within the scope of the foreign exchange *PRR* (■ BIPRU 7.5).

7.4.4

FCA PRA

R Table: Instruments which result in notional positions

This table belongs to ■ BIPRU 7.4.2R(3)

<i>Forwards, futures, CFDs, synthetic futures and options on a single commodity (unless the firm calculates a PRR on the option under BIPRU 7.6 (Option PRR))</i>	BIPRU 7.4.8R
A commitment to buy or sell a single commodity at an average of spot prices prevailing over some future period	BIPRU 7.4.10R
<i>Forwards, futures, CFDs, synthetic futures and options on a commodity index (unless the firm calculates an PRR on the option under BIPRU 7.6)</i>	BIPRU 7.4.13R - BIPRU 7.4.14R
<i>Commodity swaps</i>	BIPRU 7.4.16R - BIPRU 7.4.17R
A warrant relating to a commodity must be treated as an option on a commodity.	

7.4.5

FCA PRA

G

■ BIPRU 7.4.2R includes a *trading book position* in a *commodity* that is subsequently repo'd under a *repurchase agreement* or lent under a stock lending agreement. Clearly, if the *commodity* had initially been obtained via a *reverse repurchase agreement* or stock borrowing agreement, the *commodity* would not have been included in the *trading book* in the first place.

7.4.6

FCA PRA

G

Firms are reminded that the table in ■ BIPRU 7.6.5R (Table: Appropriate PRR calculation for an option or warrant) divides *commodity options* into:

- (1) those which must be treated under ■ BIPRU 7.6; and
- (2) those which must be treated under either ■ BIPRU 7.4 or ■ BIPRU 7.6 (Option PRR), the *firm* being able to choose whether ■ BIPRU 7.4 or ■ BIPRU 7.6 is used.

Derivation of notional positions: General

7.4.7

FCA PRA

G

■ BIPRU 7.4.8R - ■ BIPRU 7.4.19G convert the instruments listed in the table in ■ BIPRU 7.4.4R into notional *positions* in the relevant *commodities*. These notional *positions* are expressed in terms of quantity (tonnes, barrels, etc), not value. The maturity of the *position* is only relevant where the *firm* is using the *commodity maturity ladder approach* or the *commodity extended maturity ladder approach*.

7.4.8

FCA PRA

R

Derivation of notional positions: Futures, forwards, CFDs and options on a single commodity

Where a *forward, future, CFD, synthetic future* or *option* (unless already included in the *firm's option PRR* calculation) settles according to:

- (1) the difference between the price set on trade date and that prevailing at contract expiry, the notional *position*:
 - (a) equals the total quantity underlying the contract; and
 - (b) has a maturity equal to the expiry date of the contract; and
- (2) the difference between the price set on trade date and the average of prices prevailing over a certain period up to contract expiry, there is a notional *position* for each of the reference dates used in the averaging period to calculate the average price, which:
 - (a) equals a fractional share of the total quantity underlying the contract; and
 - (b) has a maturity equal to the relevant reference date.

7.4.9

FCA PRA

G

- (1) The following example illustrates ■ BIPRU 7.4.8R (2).
- (2) A *firm* buys a Traded Average Price Option (TAPO - a type of Asian option) allowing it to deliver 100 tonnes of Grade A copper and receive \$1,750 in June. If there were 20 *business days* in June the short notional *positions* will each:
 - (a) equal 5 tonnes per day (1/20 of 100 tonnes); and
 - (b) have a maturity equal to one of the *business days* in June (one for each day).
- (3) In this example as each *business day* in June goes by the quantity per day for the remaining days does not change (5 tonnes per day) only the days remaining changes. Therefore, halfway through June there are ten, 5 tonne short notional *positions* remaining each for the ten remaining *business days* in June.

Derivation of notional positions: Buying or selling a single commodity at an average of spot prices prevailing in the future

7.4.10

FCA PRA

R

Commitments to buy or sell at the average spot price of the *commodity* prevailing over some period between trade date and maturity must be treated as a combination of:

- (1) a *position* equal to the full amount underlying the contract with a maturity equal to the maturity date of the contract which is:
 - (a) long, where the *firm* will buy at the average price; or
 - (b) short, where the *firm* will sell at the average price; and

- (2) a series of notional *positions*, one for each of the reference dates where the contract price remains unfixed, each of which:
 - (a) is long if the *position* under (1) is short, or short if the *position* under (1) is long;
 - (b) equals a fractional share of the total quantity underlying the contract; and
 - (c) has a maturity date of the relevant reference date.

7.4.11

FCA PRA

G

The following guidance provides an example of ■ BIPRU 7.4.10R. In January, a *firm* agrees to buy 100 tonnes of copper for the average spot price prevailing during the 20 *business days* in February, and will settle on 30 June. After entering into this agreement, the *firm* faces the risk that the average price for February increases relative to that for 30 June. Therefore, as highlighted in the table below:

- (1) the short *positions* reflect the fact that this could occur because any one of the remaining forward prices for February increase; and
- (2) the long *position* reflects the fact that this loss could occur because the forward price for 30 June falls.

7.4.12

FCA PRA

G

Table: Example of buying at the average spot price prevailing in the future

This table belongs to ■ BIPRU 7.4.11G

	Application of BIPRU 7.4.10R(1)	Application of BIPRU 7.4.10R(2)
From trade date to start of averaging period	Long <i>position</i> in 100 tonnes of copper with a maturity of 30 June.	A series of 20 notional short <i>positions</i> each equal to 5 tonnes of copper. Each <i>position</i> is allocated a maturity equal to one of the <i>business days</i> in February (one for each day).
During averaging period	Long <i>position</i> in 100 tonnes of copper with a maturity of 30 June.	As each <i>business day</i> goes by in February the price for 5 tonnes of copper is fixed and so there will be one less notional short <i>position</i> .
After averaging period	Long <i>position</i> in 100 tonnes of copper with a maturity of 30 June.	No short <i>positions</i> .

7.4.13

FCA PRA

R

Derivation of notional positions: CFDs and options on a commodity index
Commodity index futures and *commodity index options* (unless the *option* is included in the *firm's option PRR* calculation), must be treated as follows:

- (1) Step 1: the total quantity underlying the contract must be either:

- (a) treated as a single notional *commodity position* (separate from all other *commodities*); or
 - (b) divided into notional *positions*, one for each of the constituent *commodities* in the index, of an amount which is a proportionate part of the total underlying the contract according to the weighting of the relevant *commodity* in the index;
- (2) Step 2: each notional *position* determined in Step 1 must then be included:
- (a) when using the *commodity simplified approach* (■ BIPRU 7.4.24R), without adjustment; or
 - (b) when using the *commodity maturity ladder approach* (■ BIPRU 7.4.25R) or the *commodity extended maturity ladder approach* (■ BIPRU 7.4.32R), with the adjustments in ■ BIPRU 7.4.14R.

7.4.14

FCA PRA

R

Table: Treatment of commodity index futures and commodity index options

This table belongs to ■ BIPRU 7.4.13R(2)(b)

Construction of index	Notional <i>position</i> (or <i>positions</i>) and maturity
Spot level of index is based on the spot price of each constituent <i>commodity</i>	Each quantity determined in Step 1 as referred to in BIPRU 7.4.13R is assigned a maturity equal to the expiry date of the contract.
Spot level of index is based on an average of the forward prices of each constituent <i>commodity</i>	Each quantity determined in Step 1 as referred to in BIPRU 7.4.13R is divided (on a pro-rata basis) into a series of forward <i>positions</i> to reflect the impact of each forward price on the level of the index. The maturity of each forward <i>position</i> equals the maturity of the relevant forward price determining the level of the index when the contract expires.

7.4.15

FCA PRA

G

- (1) An example of using ■ BIPRU 7.4.13R and the table in ■ BIPRU 7.4.14R is as follows.
- (2) A *firm* is long a three-month *commodity index future* where the spot level of the index is based on the one, two and three month forward prices of aluminium, copper, tin, lead, zinc and nickel (18 prices in total).
- (3) Step 1: the *firm* should decide whether to treat the full quantity underlying the contract as a single notional *commodity position* or disaggregate it into notional *positions* in aluminium, copper, tin, lead, zinc and nickel. In this case the *firm*

decides to disaggregate the contract into notional *positions* in aluminium, copper, tin, lead, zinc and nickel.

- (4) Step 2: if the *firm* uses the *commodity simplified approach*, nothing more need be done to arrive at the notional *position*. In this case the *firm* uses the *commodity maturity ladder approach* and so subdivides each *position* in each metal into three because the level of the index is based on the prevailing one, two and three month forward prices. Since the *future* will be settled in three months' time at the prevailing level of the index, the three *positions* for each metal will have maturities of four, five and six months respectively.

Derivation of notional positions: Commodity swaps

7.4.16
FCA PRA

R

A *firm* must treat a *commodity swap* as a series of notional *positions*, one *position* for each payment under the *swap*, each of which:

- (1) equals the total quantity underlying the contract;
- (2) has a maturity corresponding to the payment date; and
- (3) is long or short according to ■ BIPRU 7.4.17R.

7.4.17
FCA PRA

R

Table: Treatment of commodity swaps

This table belongs to ■ BIPRU 7.4.16R

	Receiving amounts which are unrelated to any <i>commodity's</i> price	Receiving the price of <i>commodity 'b'</i>
Paying amounts which are unrelated to any <i>commodity's</i> price	N/A	Long <i>positions</i> in <i>commodity 'b'</i>
Paying the price of <i>commodity 'a'</i>	Short <i>positions</i> in <i>commodity 'a'</i>	Short <i>positions</i> in <i>commodity 'a'</i> and long <i>positions</i> in <i>commodity 'b'</i>

7.4.18
FCA PRA

G

The table in ■ BIPRU 7.4.17R shows that where the legs of the *swap* are in different *commodities*, a series of forward *positions* are created for each *commodity* (that is, a series of short *positions* in *commodity 'a'* and a series of long *positions* in *commodity 'b'*).

7.4.19
FCA PRA

G

The table in ■ BIPRU 7.4.17R also covers the case where one leg is unrelated to any *commodity's* price. This leg may be subject to a *PRR* under another part of ■ BIPRU 7; for example, an interest rate based leg would have to be included in a *firm's interest rate PRR* calculation.

Calculating the PRR for each commodity: General

7.4.20

FCA PRA

R

A *firm* must calculate a *commodity PRR* for each *commodity* separately using either the *commodity simplified approach* (■ BIPRU 7.4.24R), the *commodity maturity ladder approach* (■ BIPRU 7.4.25R) or the *commodity extended maturity ladder approach* (■ BIPRU 7.4.32R).

7.4.21

FCA PRA

R

A *firm* must use the same approach for a particular *commodity* but need not use the same approach for all *commodities*.

7.4.22

FCA PRA

R

- (1) A *firm* must treat *positions* in different grades or brands of the same *commodity-class* as different *commodities* unless they:
 - (a) can be delivered against each other; or
 - (b) are close substitutes and have price movements which have exhibited a stable correlation coefficient of at least 0.9 over the last 12 months.
- (2) If a *firm* relies on (1)(b) it must then monitor compliance with the conditions in that paragraph on a continuing basis.

7.4.23

FCA PRA

R

If a *firm* intends to rely on the approach in ■ BIPRU 7.4.22R(1)(b):

- (1) it must notify the *appropriate regulator* in writing at least 20 *business days* prior to the date the *firm* starts relying on it; and
- (2) the *firm* must, as part of the notification under (1), provide to the *appropriate regulator* the analysis of price movements on which it relies.

Calculating the PRR for each commodity: Simplified approach

7.4.24

FCA PRA

R

A *firm* which calculates a *commodity PRR* using the *commodity simplified approach* must do so by summing:

- (1) 15% of the net *position* multiplied by the spot price for the *commodity*; and
- (2) 3% of the gross *position* (long plus short, ignoring the sign) multiplied by the spot price for the *commodity*;

(and for these purposes the excess of a *firm's* long (short) *positions* over its short (long) *positions* in the same *commodity* (including notional *positions* under ■ BIPRU 7.4.4R) is its net *position* in each *commodity*).

Calculating the PRR for each commodity: Maturity ladder approach

7.4.25

FCA PRA

R

A *firm* using the *commodity maturity ladder approach* must calculate the *commodity PRR* following the steps in ■ BIPRU 7.4.26R and then sum all spread charges, carry charges and outright charges that result. A *firm* must use a separate maturity ladder for each *commodity*.

7.4.26

FCA PRA

R

- (1) A *firm* must calculate the charges referred to in ■ BIPRU 7.4.25R as follows.
- (2) Step 1: offset long and short *positions* maturing:
 - (a) on the same day; or
 - (b) (in the case of *positions* arising under contracts traded in markets with daily delivery dates) within 10 *business days* of each other.
- (3) Step 2: allocate the *positions* remaining after step 1 to the appropriate maturity band in the table in ■ BIPRU 7.4.28R (*physical commodity positions* are allocated to band 1).
- (4) Step 3: match long and short *positions* within each band. In each instance, calculate a spread charge equal to the matched amount multiplied first by the spot price for the *commodity* and then by the spread rate of 3%.
- (5) Step 4: carry unmatched *positions* remaining after step 3 to another band where they can be matched, then match them. Do this until all matching possibilities are exhausted. In each instance, calculate:
 - (a) a carry charge equal to the carried *position* multiplied by the spot price for the *commodity*, the carry rate of 0.6% and the number of bands by which the *position* is carried; and
 - (b) a spread charge equal to the matched amount multiplied by the spot price for the *commodity* and the spread rate of 3%.
- (6) Step 5: calculate the outright charge on the remaining *positions* (which will either be all long *positions* or all short *positions*). The outright charge equals the remaining *position* (ignoring the sign) multiplied by the spot price for the *commodity* and the outright rate of 15%.

7.4.27

FCA PRA

G

The matched amount in ■ BIPRU 7.4.26R is the lesser (ignoring the sign) of either the total long *position* or the total short *position*. For example, a band with 1000 long and 700 short results in a matched amount of 700. The unmatched amount would be 300.

7.4.28

FCA PRA

R

Table: Maturity bands for the maturity ladder approach

This table belongs to ■ BIPRU 7.4.26R

Band	Maturity of <i>position</i>
Band 1	0 ; 1 month

PAGE
52

Band	Maturity of <i>position</i>
Band 2	> 1 month ; 3 months
Band 3	> 3 months ; 6 months
Band 4	> 6 months ; 1 year
Band 5	> 1 year ; 2 years
Band 6	> 2 years ; 3 years
Band 7	> 3 years

7.4.29

FCA PRA

G

■ BIPRU 7.4.30G is an example illustrating the calculation of the *commodity PRR* on an individual *commodity* using the *commodity maturity ladder approach* (■ BIPRU 7.4.26R). After the *firm* has carried out the pre-processing required by ■ BIPRU 7.4.26R(2) (that is, step 1), it follows steps 2 to 5 as shown below. Because the *firm* is using the *commodity maturity ladder approach* the spread rate is 3%, the carry rate is 0.6% and the outright rate is 15%. The example assumes that the spot price for the *commodity* is £25.

7.4.30

FCA PRA

G

Table: Example illustrating the commodity maturity ladder approach

This table belongs to ■ BIPRU 7.4.29G

Band	Step 2 Allocate remaining <i>positions</i> to appropriate maturity bands	Step 3 Match within bands. Each matched amount incurs a spread charge.	Step 4a Carry across bands. Each carried amount incurs a carry charge.	Step 4b Match within band. Each matched amount incurs a spread charge.	Step 6 Remaining <i>position(s)</i> incur an outright charge.
0 ≤ 1 month					
>1 month ≤ 3 months	1000 long 700 short	700 matched	300 carried		
>3 months ≤ 6 months					
>6 months ≤ 1 year					
>1 year ≤ 2 years	600 short	Nothing matched	100 carried	400 matched	200 short remains
>2 years ≤ 3 years					
> 3 years	100 long	Nothing matched			
Spread charges	700*£25*3% + 400*£25*3%			=	£825
Carry charges	300*£25*0.6%*3 + 100*£25*0.6%*2			=	£165
Outright charge	200*£25*15%			=	£750
					<u>£1740</u>

Calculating the PRR for each commodity: Extended maturity ladder approach

7.4.31

FCA PRA

R

A *firm* may use the *commodity extended maturity ladder approach* to calculate the *commodity PRR* for a particular *commodity* provided the *firm*:

- (1) has a diversified *commodities* portfolio;
- (2) undertakes significant *commodities* business;
- (3) is not yet in a position to use the *VaR model approach* to calculate *commodity PRR*; and
- (4) at least twenty *business days* before the date the *firm* uses that approach notifies the *appropriate regulator* in writing of:
 - (a) its intention to use the *commodity extended maturity ladder approach*; and
 - (b) the facts and matters relied on to demonstrate that the *firm* meets the criteria in (1) - (3).

7.4.32

FCA PRA

R

A *firm* using the *commodity extended maturity ladder approach* must calculate its *commodity PRR* by:

- (1) following the same steps as in ■ BIPRU 7.4.26R but using the rates from the table in ■ BIPRU 7.4.33R rather than those in ■ BIPRU 7.4.26R; and
- (2) summing all spread charges, carry charges and outright charge that result.

7.4.33

FCA PRA

R

Table: Alternative spread, carry and outright rates

This table belongs to ■ BIPRU 7.4.32R

	Precious metals (excluding gold)	Base metals	Softs (agricultural)	Other (including energy)
Spread rate (%)	2	2.4	3	3
Carry rate (%)	0.3	0.5	0.6	0.6
Outright rate (%)	8	10	12	15

7.4.34

FCA PRA

G

For the purposes of ■ BIPRU 7.4.31R(1) a *firm* has a diversified *commodity* portfolio where it holds *positions* in more than one *commodity* in each of the categories set out in the table in ■ BIPRU 7.4.33R and holds *positions* across different maturities in those individual *commodities*. A *firm* would not have a diversified *commodity* portfolio if it held *positions* in only one *commodity* in each of the categories set out in the table in ■ BIPRU 7.4.33R. This is because the rates in the table in ■ BIPRU 7.4.33R assume *firms* have *positions* in more than one of that category's *commodities*. Different *commodities* within a given category are likely to exhibit different volatilities, so where a *firm* does not have a diversified *commodity* portfolio in that category, the rates applying to that category might underestimate the regulatory capital required for a certain *commodity* at certain times.

7.4.35

FCA PRA

G

What constitutes significant business in ■ BIPRU 7.4.31R(2) will vary from *firm* to *firm*. The more regularly the *firm* undertakes trades in *commodities* and the more consistently it has *positions* in the relevant *commodity*, the more likely it is to be undertaking significant business for the purposes of ■ BIPRU 7.4.31R(2).

7.4.36

FCA PRA

R

Where a *firm* is:

- (1) treating a *commodity* index *derivative* as if it was based on a single separate *commodity* (see ■ BIPRU 7.4.13R(1)(a)); and
- (2) using the *commodity* extended maturity ladder approach to calculate the *commodity* PRR for that *commodity*;

it must determine which index constituent incurs the highest rate in the table in ■ BIPRU 7.4.33R and apply that rate to the notional *position* for the purposes of ■ BIPRU 7.4.32R.

7.4.37

FCA PRA

G

Where an index is only based on precious metals, ■ BIPRU 7.4.13R and ■ BIPRU 7.4.36R allow the *firm* to treat the single notional *position* as precious metal for the purposes of ■ BIPRU 7.4.32R. However, if the index contained a mix of precious metals and base metals the *firm* would have to treat the notional *position* under ■ BIPRU 7.4.36R as a base metal because base metals attract a higher rate than precious metals in the table in ■ BIPRU 7.4.33R.

Liquidity and other risks

7.4.38

FCA PRA

R

If a short *position* to which ■ BIPRU 7.4 applies falls due before a long *position* to which ■ BIPRU 7.4 applies, a *firm* must also guard against the risk of a shortage of liquidity which may exist in some markets.

7.4.39

FCA PRA

G

In particular, where ■ BIPRU 7.4.38R applies and the short *position* constitutes a material *position* compared to a *firm's* total *commodity* *positions*, it should consider a further *commodity* PRR charge in respect of that *position* depending on the likelihood of a shortage of liquidity in that market.

7.4.40

FCA PRA

R

A *firm* must safeguard against other risks, apart from the delta risk, associated with *commodity* options.

7.4.41

FCA PRA

R

The interest-rate and foreign-exchange risks not covered by other provisions of ■ BIPRU 7.4 or by the provisions of ■ BIPRU 7.2 (Interest rate PRR) or ■ BIPRU 7.5 (Foreign currency PRR) must be included in the calculation of *general market risk* for traded debt securities and in the calculation of *foreign currency PRR*.

7.5 Foreign currency PRR

General rule

7.5.1

FCA PRA

R

A *firm* must calculate its *foreign currency PRR* by:

- (1) identifying which *foreign currency* and *gold positions* to include in the *PRR* calculation;
- (2) calculating the net open *position* in each currency in accordance with this section (including where necessary the *base currency* calculated in the same way as it is for *foreign currencies*) and in gold;
- (3) calculating the *open currency position* for *foreign currencies* as calculated under ■ BIPRU 7.5.19R and the net gold position (see ■ BIPRU 7.5.20R); and
- (4) multiplying the sum of the absolutes of that *open currency position* and that net gold *position* by 8%.

7.5.2

FCA PRA

G

An example of the operation of ■ BIPRU 7.5.1R is as follows. A *firm* has an *open currency position* of £100 and a net gold *position* of £50. The sum (ignoring the sign) is £150, and so the *foreign currency PRR* is £12.

Scope of the foreign currency PRR calculation

7.5.3

FCA PRA

R

A *firm's foreign currency PRR* calculation must include the following items regardless of whether they are *trading book* or *non-trading book positions*:

- (1) all gold *positions*;
- (2) all spot *positions* in *foreign currency* (that is, all asset items less all liability items, including accrued interest, in the *foreign currency* in question);
- (3) all forward *positions* in *foreign currency*;
- (4) all *CRD financial instruments* and other items which are denominated in a *foreign currency*;

(5) irrevocable guarantees (and similar instruments) that are certain to be called and likely to be irrecoverable to the extent they give rise to a *position* in gold or *foreign currency*; and

(6) notional *positions* arising from the instruments listed in the table in ■ BIPRU 7.5.5R.

7.5.4

FCA PRA

R

(1) The following are excluded from a *firm's foreign currency PRR* calculation:

(a) *foreign currency* assets which have been deducted in full from the *firm's capital resources* under the calculations under the *capital resources table*;

(b) *positions* hedging (a);

(c) *positions* that a *firm* has deliberately taken in order to hedge against the adverse effect of the exchange rate on the ratio of its *capital resources* to its *capital resources requirement*; and

(d) transactions to the extent that they fully hedge net future *foreign currency* income or expenses which are known but not yet accrued.

(2) If a *firm* uses an exclusion under (1) it must:

(a) notify the *appropriate regulator* before it makes use of it;

(b) include in the notification in (a) the terms on which the relevant item will be excluded;

(c) not change the terms of the exclusion under (b); and

(d) document its policy on the use of that exclusion in its *trading book policy statement*.

(3) A *position* may only be excluded under (1)(b) or (c) if it is of a non-trading or structural nature.

7.5.5

FCA PRA

R

Table: instruments which result in notional foreign currency positions

This table belongs to ■ BIPRU 7.5.3R(6).

Instruments	See
<i>Foreign currency futures, forwards, synthetic futures and CFDs</i>	BIPRU 7.5.11R
<i>Foreign currency swaps</i>	BIPRU 7.5.13R
<i>Foreign currency options or warrants (unless the firm calculates a</i>	BIPRU 7.5.15R

Instruments	See
<i>PRR on the option or warrant under BIPRU 7.6 (Option PRR).</i>	
<i>Gold futures, forwards, synthetic futures and CFDs</i>	BIPRU 7.5.16R
<i>Gold options (unless the firm calculates a PRR on the option under BIPRU 7.6).</i>	BIPRU 7.5.17R
<i>Positions in CIUs</i>	BIPRU 7.5.18R

7.5.6

FCA PRA

G

Firms are reminded that the table in ■ BIPRU 7.6.5R (Table: Appropriate PRR calculation for an option or warrant) divides *foreign currency options* and *warrants* into:

- (1) those which must be treated under ■ BIPRU 7.6 (Option PRR); and
- (2) those which must be treated under either ■ BIPRU 7.5 or ■ BIPRU 7.6, the *firm* being able to choose whether ■ BIPRU 7.5 or ■ BIPRU 7.6 is used.

7.5.7

FCA PRA

R

When determining the currency of denomination *firms* must:

- (1) use the currency in which the *firm* accounts for the instrument where an instrument is quoted in more than one currency; and
- (2) treat depository receipts as *positions* in the underlying *security*.

7.5.8

FCA PRA

G

Instruments denominated in a foreign currency include, amongst other things, assets and liabilities (including accrued interest); *non-foreign currency derivative*; *net underwriting positions*; *reduced net underwriting positions*; and irrevocable guarantees (or similar instruments) that are certain to be called.

7.5.9

FCA PRA

R

Where a contract is based on a basket of currencies, the *firm* can choose either to derive notional *positions* in each of the constituent currencies or treat it as a single notional *position* in a separate notional currency.

Derivation of notional positions: General

7.5.10

FCA PRA

G

■ BIPRU 7.5.11R - ■ BIPRU 7.5.18R derive notional currency *positions* for the instruments listed in the table in ■ BIPRU 7.5.5R.

Derivation of notional positions: Foreign exchange forwards, futures, CFDs and synthetic futures

7.5.11

FCA PRA

R

- (1) A *firm* must treat a *foreign currency forward*, *future*, *synthetic future* or *CFD* as two notional currency *positions* as follows:
 - (a) a long notional *position* in the currency which the *firm* has contracted to buy; and

- (b) a short notional *position* in the currency which the *firm* has contracted to sell.
- (2) In (1) the notional *positions* have a value equal to either:
- (a) the contracted amount of each currency to be exchanged in the case of a *forward, future, synthetic future* or *CFD* held in the *non-trading book*; or
 - (b) the present value of the amount of each currency to be exchanged in the case of a *forward, future, synthetic future* or *CFD* held in the *trading book*.

7.5.12

FCA PRA

G

- (1) The following example illustrates ■ BIPRU 7.5.11R. In this example, a *firm* contracts to sell \$106 for €108 in one year's time and the present values of each cash flow are \$100 and €100 respectively.

- (2) In the *non-trading book*, this *forward* would be treated as a combination of a €108 long *position* and a \$106 short *position*.
- (3) In the *trading book*, this *forward* would be treated as a combination of a €100 long *position* and a \$100 short *position*.
- (4) *Firms* are reminded that *foreign currency forwards* held in the *trading book* should also be included in the *firm's interest rate PRR* calculation (see ■ BIPRU 7.2.4R (Instruments which result in notional *positions* for the purpose of the *interest rate PRR*)).

Derivation of notional positions: Foreign currency swaps

7.5.13

FCA PRA

R

- (1) A *firm* must treat a *foreign currency swap* as:
- (a) a long notional *position* in the currency in which the *firm* has contracted to receive interest and principal; and
 - (b) a short notional *position* in the currency in which the *firm* has contracted to pay interest and principal.
- (2) In (1) the notional *positions* have a value equal to either:
- (a) the nominal amount of each currency underlying the *swap* if it is held in the *non-trading book*; or
 - (b) the present value amount of all cash flows in the relevant currency in the case of a *swap* held in the *trading book*.

7.5.14

FCA PRA

G

- (1) The following example illustrates ■ BIPRU 7.5.13R. In this example a *firm* enters into a five year *foreign currency swap* where it contracts to pay six month US\$ Libor on \$100 in return for receiving 6% fixed on €100. The present values of each leg are \$100 and €98 respectively.
- (2) In the *non-trading book*, this *swap* would be treated as a combination of a €100 long *position* and a \$100 short *position*.
- (3) In the *trading book*, this *swap* would be treated as a combination of a €98 long *position* and a \$100 short *position*.
- (4) *Firms* are reminded that *foreign currency swaps* held in the *trading book* should also be included in the *firm's interest rate PRR* calculation (see ■ BIPRU 7.2.4R (Instruments which result in notional *positions* for the purpose of the *interest rate PRR*)).

Derivation of notional positions: Foreign currency options and warrants

7.5.15

FCA PRA

R

Where included in ■ BIPRU 7.5's *PRR* calculation (see the table in ■ BIPRU 7.5.5R), a *foreign currency option* or *warrant* must be treated as a *foreign currency forward*.

Derivation of notional positions: Gold forwards, futures, synthetic futures and CFDs

7.5.16

FCA PRA

R

A *forward*, *future*, *synthetic future* or *CFD* on gold must be treated as a notional *position* in gold with a value equal to the amount of gold underlying multiplied by the current spot price for gold.

Derivation of notional positions: Gold options

7.5.17

FCA PRA

R

If included in the *PRR* calculation under ■ BIPRU 7.5 (see the table in ■ BIPRU 7.5.5R), a *gold option* must be treated as a *gold forward*.

Derivation of notional positions: CIUs

7.5.18

FCA PRA

R

- (1) This *rule* deals with *positions* in *CIUs*.
- (2) The actual *foreign currency positions* of a *CIU* must be included in a *firm's foreign currency PRR* calculation under ■ BIPRU 7.5.1 R.
- (3) A *firm* may rely on third party reporting of the *foreign currency positions* in the *CIU*, where the correctness of this report is adequately ensured.
- (4) If a *firm* is not aware of the *foreign currency positions* in a *CIU*, the *firm* must assume that the *CIU* is invested up to the maximum extent allowed under the *CIUs* mandate in *foreign currency* and the *firm* must, for *trading book positions*, take account of the maximum indirect exposure that it could achieve by taking leveraged *positions* through the *CIU* when calculating its *foreign currency PRR*. This must be done by proportionally increasing the

position in the *CIU* up to the maximum exposure to the underlying investment items resulting from the investment mandate.

- (5) The assumed *position* of the *CIU* in *foreign currency* calculated in accordance with ■ BIPRU 7.5.18R(4) must be treated as a separate currency according to the treatment of investments in gold, subject to the modification that, if the direction of the *CIUs* investment is available, the total long *position* may be added to the total long open *foreign currency position* and the total short *position* may be added to the total short open *foreign currency position*. No netting is allowed between such *positions* prior to this calculation.

Open currency position

7.5.19

FCA PRA

R

A *firm* must calculate its *open currency position* by:

- (1) calculating the net *position* in each *foreign currency*;
- (2) converting each such net *position* into its *base currency* equivalent at current spot rates;
- (3) summing all short net *positions* and summing all long net *positions* calculated under (1) and (2); and
- (4) selecting the larger sum (ignoring the sign) from (3).

Net gold position

7.5.20

FCA PRA

R

A *firm* must calculate its net gold *position* by:

- (1) valuing all gold *positions* using the prevailing spot price for gold (regardless of the maturity of the *positions*);
- (2) offsetting long and short *positions*; and
- (3) converting the resulting net *position* into the *base currency* equivalent using the current spot *foreign currency* rate.

7.6 Option PRR

Option PRR calculation

7.6.1

FCA PRA

R

A *firm* must calculate its *option PRR* by:

- (1) identifying which *option positions* must be included within the scope of the *option PRR* calculation under ■ BIPRU 7.6.3R - ■ BIPRU 7.6.5R;
- (2) calculating the derived *position* in each *option* in accordance with ■ BIPRU 7.6.9R - ■ BIPRU 7.6.15R;
- (3) calculating the *PRR* for each derived *position* in accordance with ■ BIPRU 7.6.16R - ■ BIPRU 7.6.31R;
- (4) summing all of the *PRRs* calculated in accordance with (3).

7.6.2

FCA PRA

G

Firms are reminded that the table in ■ BIPRU 7.2.4R (Instruments which result in notional *positions* for the purposes of the *interest rate PRR*) and the table in ■ BIPRU 7.3.3R (Instruments which result in notional *positions* for the purposes of the *equity PRR*) also require an *interest rate PRR* to be calculated for *options* on *equities*, baskets of *equities* or *equities* indices. The interaction between ■ BIPRU 7.6 and the rest of Chapter 7 is illustrated in ■ BIPRU 7.6.33G.

Scope of the option PRR calculation

7.6.3

FCA PRA

R

Except as permitted under ■ BIPRU 7.6.5R, a *firm's option PRR* calculation must include:

- (1) each *trading book position* in an *option* on an *equity*, interest rate or debt *security*;
- (2) each *trading book position* in a *warrant* on an *equity* or debt *security*;
- (3) each *trading book position* in a *CIU*; and
- (4) each *trading book* and *non-trading book position* in an *option* on a *commodity*, currency or gold.

7.6.4

FCA PRA

G

■ BIPRU 7.6.3R(2) includes *net underwriting positions* or *reduced net underwriting positions* in warrants.

7.6.5

FCA PRA

R

Table: Appropriate PRR calculation for an option or warrant

This table belongs to ■ BIPRU 7.6.3R

Option type (see BIPRU 7.6.18R) or warrant	PRR calculation
<p>American option, European option, Bermudan option, Asian option or warrant for which the <i>in the money</i> percentage (see BIPRU 7.6.6R) is equal to or greater than the <i>appropriate position risk adjustment</i> (see BIPRU 7.6.7R and BIPRU 7.6.8R)</p>	<p>Calculate either an <i>option PRR</i>, or the most appropriate to the underlying position of:</p> <ul style="list-style-type: none"> (a) an <i>equity PRR</i>; or (b) an <i>interest rate PRR</i>; or (c) a <i>commodity PRR</i>; or (d) a <i>foreign currency PRR</i>; or (e) a <i>collective investment undertaking PRR</i>.
<p>American option, European option, Bermudan option, Asian option or warrant:</p> <ul style="list-style-type: none"> (a) for which the <i>in the money</i> percentage (see BIPRU 7.6.6R) is less than the <i>appropriate position risk adjustment</i> (see BIPRU 7.6.7R and BIPRU 7.6.8R); or (b) that is <i>at the money</i>; or (c) that is <i>out of the money</i>. 	<p>Calculate an <i>option PRR</i></p>
<p>All other types of <i>option</i> listed in BIPRU 7.6.18R (regardless of whether <i>in the money</i>, <i>at the money</i> or <i>out of the money</i>).</p>	<p>Calculate an <i>option PRR</i></p>

The in the money percentage

7.6.6

FCA PRA

R

(1) The *in the money* percentage is calculated in accordance with this rule.

(2) For a call option:

$$* 100$$

Strike price of the option

(3) For a put option:

$$* 100$$

Strike price of the *option*

- (4) In the case of an *option* on a basket of *securities* a *firm* may not treat the *option* as being *in the money* by the relevant percentage so as to enable the *firm* not to apply an *option PRR* under ■ BIPRU 7.6.5R unless the conditions in ■ BIPRU 7.6.5R are satisfied with respect to each kind of underlying investment.
- (5) (4) also applies to an *option* on a *CIU* if a *firm* is using one of the *CIU look through methods*.

The appropriate position risk adjustment

7.6.7

FCA PRA

R

- (1) The *appropriate position risk adjustment* for a *position* is that listed in the table in ■ BIPRU 7.6.8R against the relevant underlying *position*.
- (2) If the *firm* uses the *commodity extended maturity ladder approach* or the *commodity maturity ladder approach* for a particular *commodity* under ■ BIPRU 7.4 (Commodity PRR) the *appropriate position risk adjustment* for an *option* on that *commodity* is the outright rate applicable to the underlying *position* (see ■ BIPRU 7.4.26R (Calculating the PRR for each commodity: Maturity ladder approach) and ■ BIPRU 7.4.33R (Table: Alternative spread, carry and outright rates)).
- (3) If a *firm* does not have *commodity positions* treated under ■ BIPRU 7.4 or does not have *positions* in the *commodity* in question treated under ■ BIPRU 7.4 the restrictions in ■ BIPRU 7.4 that regulate when a *firm* can and cannot use a particular method of calculating the *commodity PRR* apply for the purpose of establishing the *appropriate position risk adjustment* for the purposes of ■ BIPRU 7.6.
- (4) If a *firm* is using one of the *CIU look through methods* for an *option* on a *CIU* the leveraging requirements in ■ BIPRU 7.7 (Position risk requirements for collective investment undertakings) apply (see ■ BIPRU 7.7.11R). For this purpose the amount of the *appropriate position risk adjustments* under ■ BIPRU 7.6.6R(5) is increased by the amount of that leveraging (expressed as a percentage) as calculated under ■ BIPRU 7.7, subject to a maximum *appropriate position risk adjustment* of 32%.

7.6.8

FCA PRA

R Table: Appropriate position risk adjustment

This table belongs to ■ BIPRU 7.6.7R

Underlying <i>position</i>	Appropriate <i>position risk adjustment</i>
<i>Equity</i>	The <i>position risk adjustment</i> applicable to the underlying <i>equity</i> or <i>equity</i> index in the table in BIPRU 7.3.30R (Simplified equity method)
<i>Interest rate</i>	The sum of the <i>specific risk position risk adjustment</i> (see BIPRU 7.2.43R to BIPRU 7.2.51G (Specific risk calculation)) and the <i>general market risk position risk adjustment</i> (as set out in BIPRU 7.2.57R (General market risk position risk adjustments)) applicable to the underlying <i>position</i>
<i>Debt securities</i>	The sum of the <i>specific risk position risk adjustment</i> (see BIPRU 7.2.43R to BIPRU 7.2.51G (Specific risk calculation)) and the <i>general market risk position risk adjustment</i> (as set out in the table in BIPRU 7.2.57R (General market risk position risk adjustments)) applicable to the underlying <i>position</i>
<i>Commodity</i>	18% (unless BIPRU 7.6.7R requires otherwise)
<i>Currency</i>	8%
<i>Gold</i>	8%
<i>CIU</i>	32% (subject to BIPRU 7.6.6R and BIPRU 7.6.7R)

Calculating derived positions

7.6.9

FCA PRA

R A *firm* must calculate the derived *position* specified in the table in ■ BIPRU 7.6.13R for each *position* included in its *option PRR* calculation.**Netting positions**

7.6.10

FCA PRA

R A *firm* may calculate a derived *position* for its net *position* in an *option* or a *warrant*, if the relevant *options* or *warrants* are identical or may be treated as identical under ■ BIPRU 7.6.11R or ■ BIPRU 7.6.12R.

7.6.11

FCA PRA

R A *firm* may treat *options* or *warrants* as identical if they have the same strike price, maturity (except for an interest rate cap or floor - see ■ BIPRU 7.6.12R) and underlying.

7.6.12

FCA PRA

R

A *firm* may treat as identical a purchased interest rate cap (or floor) and a written interest rate cap (or floor) only if they mature within 30 days of each other and all other terms are identical (a cap may not be netted against a floor).

Derived positions

7.6.13

FCA PRA

R

Table: Derived positions

This table belongs to ■ BIPRU 7.6.9R

Underlying	Option (or warrant)	Derived <i>position</i>
<i>Equity</i>	<i>Option (warrant) on a single equity or option on a future/forward on a single equity</i>	A notional <i>position</i> in the actual <i>equity</i> underlying the contract valued at the current market price of the <i>equity</i> .
	<i>Option (warrant) on a basket of equities or option on a future/forward on a basket of equities</i>	A notional <i>position</i> in the actual <i>equities</i> underlying the contract valued at the current market price of the <i>equities</i> .
	<i>Option (warrant) on an equity index or option on a future/forward on an equity index</i>	A notional <i>position</i> in the index underlying the contract valued at the current market price of the index.
Interest rate	<i>Option on an interest rate or an interest rate future/FRA</i>	A zero coupon <i>zero-specific-risk security</i> in the currency concerned with a maturity equal to the sum of the time to expiry of the contract and the length of the period on which the settlement amount of the contract is calculated valued at the notional amount of the contract.
	<i>Option on an interest rate swap</i>	A zero coupon <i>zero-specific-risk security</i> in the currency concerned with a maturity equal to the length of the <i>swap</i> valued at the notional principal amount.
	Interest rate cap or floor	A zero coupon <i>zero-specific-risk security</i> in the

7

Underlying	Option (or warrant)	Derived <i>position</i>
Debt securities		currency concerned with a maturity equal to the remaining period of the cap or floor valued at the notional amount of the contract.
	<i>Option (warrant) on a debt security or option on a future/forward on a debt security</i>	The underlying debt security with a maturity equal to the time to expiry of the <i>option</i> valued as the nominal amount underlying the contract at the current market price of the debt security.
	<i>Option (warrant) on a basket of debt securities or option on a future/forward on a basket of debt securities</i>	A notional <i>position</i> in the actual debt securities underlying the contract valued at the current market price of the debt securities.
Commodity	<i>Option (warrant) on an index of debt securities or option on a future/forward on an index of debt securities</i>	A notional <i>position</i> in the index underlying the contract valued at the current market price of the index.
	<i>Option on a commodity or option on a future/forward on a commodity</i>	An amount equal to the tonnage, barrels or kilos underlying the <i>option</i> with (in the case of a <i>future/forward</i> on a <i>commodity</i>) a maturity equal to the expiry date of the <i>forward</i> or <i>Futures</i> contract underlying the <i>option</i> . In the case of an <i>option</i> on a <i>commodity</i> the maturity of the <i>position</i> falls into Band 1 in the table in BIPRU 7.4.28R (Table: Maturity bands for the maturity ladder approach).

Underlying	Option (or warrant)	Derived <i>position</i>
	<i>Option on a commodity swap</i>	An amount equal to the tonnage, barrels or kilos underlying the <i>option</i> with a maturity equal to the length of the <i>swap</i> valued at the notional principal amount.
<i>CIU</i> (These provisions about <i>CIUs</i> are subject to BIPRU 7.6.35R)	<i>Option (warrant) on a single CIU or option on a future/forward on a single CIU</i>	A notional <i>position</i> in the actual <i>CIU</i> underlying the contract valued at the current market price of the <i>CIU</i> .
	<i>Option (warrant) on a basket of CIUs or option on a future/forward on a basket of CIUs</i>	A notional <i>position</i> in the actual <i>CIUs</i> underlying the contract valued at the current market price of the <i>CIUs</i> .
Gold	<i>Option on gold or option on a future/forward on gold</i>	An amount equal to the troy ounces underlying the <i>option</i> with (in the case of a <i>future/forward</i> on gold) a maturity equal to the expiry date of the <i>forward</i> or <i>futures</i> contract underlying the <i>option</i> .
Currency	Currency <i>option</i>	The amount of the underlying currency that the <i>firm</i> will receive if the <i>option</i> is exercised converted at the spot rate into the currency that the <i>firm</i> will sell if the <i>option</i> is exercised.

Combinations of options which can be treated as one option

A *firm* may treat (for the purpose of calculating an *option PRR* under ■ BIPRU 7.6) an *option* strategy listed in the table in ■ BIPRU 7.6.15R as the single *position* in a notional *option* specified against that strategy in the table in ■ BIPRU 7.6.15R, if:

- (1) each element of the strategy is transacted with the same *counterparty*;
- (2) the strategy is documented as a single structure;

7.6.14

FCA PRA

R

- (3) the underlying for each part of the composite *position* (including any actual holding of the underlying) is the same under the *PRR identical product netting rules*;
- (4) the netting achieved does not result overall in a greater degree of netting in the calculation of the *market risk capital requirement* than would be permitted under the other *standard market risk PRR rules*;
- (5) each *option* in the structure has the same maturity and underlying; and
- (6) the constituent parts of the structure form an indivisible single contract, so that neither party can unwind or default on one part of the structure without doing so for the contract as a whole;

except that (1) and (6) only apply to the extent possible with respect to any part of the composite *position* held by the *firm* that consists of an actual holding of the underlying.

7.6.15

FCA PRA

R

Table: Option strategies

This table belongs to ■ BIPRU 7.6.14R

Option strategy (and an example)	Notional option (and rule it must be treated under)
Bull Spread (e.g. buy 100 call and sell 101 call)	One purchased option (treat under BIPRU 7.6.20R)
Bear Spread (e.g. sell 100 put and buy 101 put)	One written option (treat under BIPRU 7.6.21R)
Synthetic Long Call (e.g. long underlying and buy 100 put)	One purchased option (treat under BIPRU 7.6.20R or BIPRU 7.6.24R)
Synthetic Short Call (e.g. short underlying and sell 100 put)	One written option (treat under BIPRU 7.6.21R or BIPRU 7.6.24R)
Synthetic Long Put (e.g. short underlying and buy 100 call)	One purchased option (treat under BIPRU 7.6.20R or BIPRU 7.6.24R)

Option strategy (and an example)	Notional option (and rule it must be treated under)
Synthetic Short Put (e.g. buy underlying and sell 100 call)	One written option (treat under BIPRU 7.6.21R or BIPRU 7.6.24R)
Long Straddle (e.g. buy 100 call and buy 100 put)	One purchased option (treat under BIPRU 7.6.20R)
Short Straddle (e.g. sell 100 call and sell 100 put)	One written option (treat under BIPRU 7.6.21R but with no reduction for the amount the option is out of the money)
Long Strangle (e.g. buy 101 call and buy 99 put)	One purchased option (treat under BIPRU 7.6.20R)
Short Strangle (e.g. sell 99 call and sell 101 put)	One written option (treat under BIPRU 7.6.21R but with no reduction for the amount the option is out of the money)
Long Butterfly (e.g. buy one 100 call, sell two 101 calls, and buy one 102 call)	One purchased option (treat under BIPRU 7.6.20R)
Short Butterfly (e.g. sell one 100 put, buy two 101 puts, and sell one 102 put)	One written option (treat under BIPRU 7.6.21R but with no reduction for the amount the option is out of the money)

The option PRR for an individual positions

7.6.16

FCA PRA

R

A firm must calculate the *option PRR* for each individual derived *option position* using the method specified in the table in ■ BIPRU 7.6.18R, or, if more than one method is permitted, using one of those methods.

7.6.17

FCA PRA

R

A firm must convert its *positions* into its *base currency* in accordance with the procedures that apply for whichever of the other *PRR charges* is appropriate (see ■ BIPRU 7.2.1R(3), ■ BIPRU 7.3.1R(2), ■ BIPRU 7.4.1R(3), ■ BIPRU 7.5.19R(2), ■ BIPRU 7.5.20R(3) and ■ BIPRU 7.7.1R(3)).

7.6.18

FCA PRA

R Table: Option PRR: methods for different types of option

This table belongs to ■ BIPRU 7.6.16R

Option	Description	Method
<i>American option</i>	An <i>option</i> that may be exercised at any time over an extended period up to its expiry date.	<i>Option standard method or option hedging method if appropriate</i>
<i>European option</i>	An <i>option</i> that can only be exercised at expiry.	
<i>Bermudan option</i>	A cross between an <i>American option</i> and <i>European option</i> . The <i>Bermudan option</i> can only be exercised at specific dates during its life.	
<i>Asian option</i>	The buyer has the right to exercise at the average rate or price of the underlying over the period (or part of the period) of the <i>option</i> . One variant is where the payout is based on the average of the underlying against a fixed strike price; another variant is where the payout gives at expiry the price of the underlying against the average price over the <i>option</i> period.	<i>Option standard method or option hedging method if appropriate</i>
<i>Barrier option</i>	An <i>option</i> which is either cancelled or activated if the price of the underlying reaches a pre-set level regardless of the price at which the underlying may be trading at the expiry of the <i>option</i> . The knock-out type is cancelled if the underlying price or rate trades through the trigger; while the	

Option	Description	Method
Corridor option	<p>knock-in becomes activated if the price moves through the trigger.</p> <p>Provides the holder with a pay-out for each day that the underlying stays within a defined range chosen by the investor.</p>	
Ladder option	<p>Provides the holder with guaranteed pay-outs if the underlying trades through a pre-agreed price(s) or rate(s) at a certain point(s) in time, regardless of future performance.</p>	
Lock-in option	<p>An option where the pay-out to the holder is locked in at the maximum (or minimum) value of the underlying that occurred during the life of the option.</p>	
Look-back option	<p>A European style option where the strike price is fixed in retrospect, that is at the most favourable price (i.e. the lowest (highest) price of the underlying in the case of a call (put)) during the life of the option.</p>	
Forward starting option	<p>An option that starts at a future date.</p>	
Compound option	<p>An option where the underlying is itself an option (i.e. an option on an option).</p>	<p>Option standard method or option hedging method if appropriate</p>
Interest rate cap	<p>An interest rate option or series of options under which a counterparty contracts to pay any interest costs arising as</p>	<p>Option standard method, but no reduction for the amount the option is out of the money is permitted</p>

Option	Description	Method
	<p>a result of an increase in rates above an agreed rate: the effect being to provide protection to the holder against a rise above that agreed interest rate.</p>	
Interest rate floor	<p>An interest rate <i>option</i> or series of <i>options</i> under which a counterparty contracts to pay any lost income arising as a result of a fall in rates below an agreed rate: the effect being to provide protection to the holder against a fall below that agreed interest rate.</p>	
Performance option	<p>An <i>option</i> based on a reference basket comprising any number of assets, where the payout to the holder could be one of the following: the maximum of the worst performing asset, or 0; the maximum of the best performing asset, or 0; the maximum of the spreads between several pairs of the assets, or 0.</p>	<p><i>Option standard method</i> or <i>option hedging method</i> - using the highest <i>position risk adjustment</i> of the individual assets in the basket</p>
Quanto	<p>Quanto stands for "Quantity Adjusted Option". A quanto is an instrument where two currencies are involved. The payoff is dependent on a variable that is measured in one of the currencies and the payoff is made in the other currency.</p>	<p>Subject to BIPRU 7.6.31R, the <i>option standard method</i></p>

Option	Description	Method
<i>Cliquet option</i>	A <i>cliquet option</i> consists of a series of forward starting <i>options</i> where the strike price for the next exercise date is set equal to a positive constant times the underlying price as of the previous exercise date. It initially acts like a vanilla <i>option</i> with a fixed price but as time moves on, the strike is reset and the intrinsic value automatically locked in at pre-set dates. If the underlying price is below the previous level at the reset date no intrinsic value is locked in but the strike price will be reset to the current price attained by the underlying. If the underlying price exceeds the current level at the next reset the intrinsic value will again be locked in.	<i>Option standard method</i> for a purchased cliquet, or the method specified in BIPRU 7.6.30R for a written cliquet
<i>Digital option</i>	A type of <i>option</i> where the pay-out to the holder is fixed. The most common types are all-or-nothing and one-touch <i>options</i> . All-or-nothing will pay out the fixed amount if the underlying is above (call) or below (put) a set value at expiry. The one-touch will pay the fixed amount if the underlying reaches a fixed point any time before expiry.	The method specified in BIPRU 7.6.29 R
<i>Any other option or warrant</i>		The method specified for the type of instrument whose description

Option	Description	Method
		it most closely resembles.

7.6.19

FCA PRA

G

- (1) The *option standard method* is described in ■ BIPRU 7.6.20R - ■ BIPRU 7.6.22R.
- (2) The *option hedging method* is described in ■ BIPRU 7.6.23G - ■ BIPRU 7.6.28R.

The standard method: Purchased options and warrants

7.6.20

FCA PRA

R

Under the *option standard method*, the PRR for a purchased *option* or *warrant* is the lesser of:

- (1) the market value of the derived *position* (see ■ BIPRU 7.6.9R) multiplied by the *appropriate position risk adjustment* (see ■ BIPRU 7.6.8R); and
- (2) the market value of the *option* or *warrant*.

The standard method: Written options and warrants

7.6.21

FCA PRA

R

Under the *option standard method*, the PRR for a written *option* or *warrant* is the market value of the derived *position* (see ■ BIPRU 7.6.9R) multiplied by the *appropriate position risk adjustment* (see ■ BIPRU 7.6.8R). This result may be reduced by the amount the *option* or *warrant* is *out of the money* (subject to a maximum reduction to zero).

The standard method: Underwriting or sub-underwriting an issue of warrants

7.6.22

FCA PRA

R

Under the *option standard method*, the PRR for *underwriting* or *sub-underwriting* an issue of *warrants* is the *net underwriting position* (or *reduced net underwriting position*) multiplied by the current market price of the underlying *securities* multiplied by the *appropriate position risk adjustment*, but the result can be limited to the value of the *net underwriting position* (or *reduced net underwriting position*) calculated using the issue price of the *warrant*.

The hedging method

7.6.23

FCA PRA

G

The *option hedging method* involves the *option PRR* being calculated on a combination of the *option* and its hedge.

7.6.24

FCA PRA

R

Under the *option hedging method* a *firm* must calculate the *option PRR* for individual *positions* as follows:

- (1) for an *option* or *warrant* on an *equity*, basket of *equities* or *equity* index and its *equity* hedge(s), the *firm* must, to the extent

specified or permitted in the table in ■ BIPRU 7.6.26R, use the calculation in the table in ■ BIPRU 7.6.27R;

- (2) for an *option* or *warrant* on a debt *security*, basket of debt *securities* or debt *security* index and its debt *security* hedge(s), the *firm* must, to the extent specified or permitted in the table in ■ BIPRU 7.6.26R, use the calculation in the table in ■ BIPRU 7.6.27R;
- (3) for an *option* on gold and its gold hedge, the *firm* must, to the extent specified or permitted in the table in ■ BIPRU 7.6.26R, use the calculation in the table in ■ BIPRU 7.6.27R; and
- (4) for an *option* on a currency and its currency hedge, the *firm* must, to the extent specified or permitted in the table in ■ BIPRU 7.6.26R, use the calculation in the table in ■ BIPRU 7.6.28R.

7.6.25

FCA PRA

R

- (1) A *firm* may not use the *option hedging method* for:
 - (a) an interest rate *option* and its hedge; or
 - (b) a *commodity option* and its hedge; or
 - (c) a *CIU option* and its hedge.
- (2) A *firm* may only use the *option hedging method* if the item underlying the *option* or *warrant* is the same as the hedge of the *option* or *warrant* under the *PRR identical product netting rules*.

7.6.26

FCA PRA

R

Table: Appropriate treatment for equities, debt securities or currencies hedging options

This table belongs to ■ BIPRU 7.6.24R

Hedge	PRR calculation for the hedge	Limits (if hedging method is used)	Naked <i>position</i>
An <i>equity</i> (hedging an <i>option</i> or <i>warrant</i>)	The <i>equity</i> must be treated in either BIPRU 7.3 (equity <i>PRR</i>) or the <i>option hedging method</i> (see the table in BIPRU 7.6.27R)	The <i>option hedging method</i> must only be used up to the amount of the hedge that matches the notional amount underlying the <i>option</i> or <i>warrant</i>	To the extent that the amount of the hedge (or <i>option</i> or <i>warrant</i>) exceeds the notional amount underlying the <i>option</i> or <i>warrant</i> (or hedge), a <i>firm</i> must apply an <i>equity PRR</i> , interest rate <i>PRR</i> or <i>foreign currency PRR</i> (or the <i>op-</i>

Hedge	PRR calculation for the hedge	Limits (if hedging method is used)	Naked <i>position</i> <i>standard method</i>)
A debt security (hedging an option or warrant)	The debt security must be treated in BIPRU 7.2 (interest rate PRR) or the option hedging method (see the table in BIPRU 7.6.27R)	As for the first row	As for the first row
Gold (hedging a gold option)	The gold must be treated in either BIPRU 7.5 (Foreign currency PRR) or the option hedging method (see the table in BIPRU 7.6.27R)	As for the first row	As for the first row
A currency or currencies (hedging a currency option)	The currency must be treated in either BIPRU 7.5 (Foreign currency PRR) or the option hedging method (see the table in BIPRU 7.6.28R)	As for the first row	As for the first row

7.6.27

FCA PRA

R

Table: The hedging method of calculating the PRR (equities, debt securities and gold)

This table belongs to ■ BIPRU 7.6.24R(1) - ■ (3)

PRR				
	Option or warrant position	In the money by more than the position risk adjustment	In the money by less than the position risk adjustment	Out of the money or at the money
Long in security or gold	Long put	Zero	Wp	X
	Short call	Y	Y	Z

		PRR		
Short in <i>security</i> or gold	Long call	Zero	Wc	X
	Short put	Y	Y	Z
Where:				
Wp means	{ (<i>position risk adjustment</i> -100%) x The underlying <i>position</i> valued at strike price}		+	The market value of the underlying <i>position</i>
Wc means	{(100% + <i>position risk adjustment</i> x The underlying <i>position</i> valued at strike price}		-	The market value of the underlying <i>position</i>
X means	The market value of the underlying <i>position</i> multiplied by the <i>appropriate position risk adjustment</i>			
Y means	The market value of the underlying <i>position</i> multiplied by the <i>appropriate position risk adjustment</i> . This result may be reduced by the market value of the <i>option</i> or <i>warrant</i> , subject to a maximum reduction to zero.			
Z means	The <i>option hedging method</i> is not permitted; the <i>option standard method</i> must be used.			

7.6.28

FCA PRA

R

Table: The hedging method of calculating the PRR (currencies)

This table belongs to ■ BIPRU 7.6.24R(4)

PRR			
<i>Option position</i>	<i>In the money by more than 8%</i>	<i>In the money by less than 8%</i>	<i>Out of the money or at the money</i>
Long calls & long puts	Zero	W _L	X
Short calls & short puts	Zero	Y	X
Where:			
W _L means	(1.08% x U)	-	The market value of the underlying <i>position</i>
U means	The amount of the underlying currency that the <i>firm</i> will receive if the <i>option</i> is exercised, converted at the strike price into the currency that the <i>firm</i> will sell if the <i>option</i> is exercised		
X means	The market value of the underlying <i>position</i> multiplied by 8%.		

PRR

Y means The market value of the underlying *position* multiplied by 8%. This result may be reduced by the market value of the *option*, subject to a maximum reduction to zero.

Specific methods and treatments: Digital options

7.6.29

FCA PRA

R

The *option PRR* for a digital *option* is the maximum loss of the *option*.

Specific methods and treatments: Written cliquet options

7.6.30

FCA PRA

R

The *option PRR* for a written cliquet *option* is the market value of the derived *position* (see ■ BIPRU 7.6.9R) multiplied by the *appropriate position risk adjustment* (see ■ BIPRU 7.6.8R) multiplied by F+1 (see the following provisions of this paragraph). This result may be reduced by the amount the *option* is *out of the money* (subject to a maximum reduction to zero). The *option PRR* for a written cliquet *option* is therefore defined by the following formula:

[*position risk adjustment* * underlying * (F + 1)] - OTM

where:

$$(1) \quad F = \min \left[FR, \max \left(\frac{FR}{2}, Y \right) \right]$$

(2) FR= Number of forward re-sets

(3) Y= Years to maturity

(4) OTM= the amount by which the *option* is *out of the money*

Specific methods and treatments: Quantos

7.6.31

FCA PRA

R

If the pay-out to the holder of a quanto *option* is fixed at the inception of the transaction a *firm* must add 8% to the *position risk adjustment* when applying the *option standard method*.

Interaction with other chapters

7.6.32

FCA PRA

G

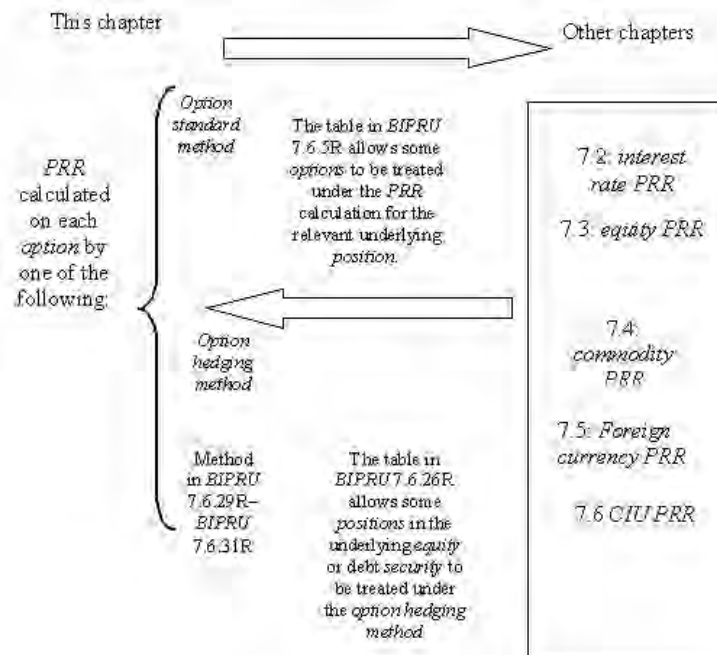

The application of an *option PRR* to a *position* does not prevent any of the other *PRR charges* from applying if they would otherwise do so. In particular if a *firm* applies an *option PRR* to an *equity derivative* an *interest rate PRR* will also generally apply.

7.6.33

FCA PRA

G

The following diagram illustrates the relationship between ■ BIPRU 7.6 and the rest of ■ BIPRU 7.

Options on a commodity

7.6.34

FCA PRA

R

■ BIPRU 7.4.38R to ■ BIPRU 7.4.41R (Liquidity and other risks) apply to *commodity options* treated under ■ BIPRU 7.6 as well as to those treated under ■ BIPRU 7.4 (Commodity PRR).

Options on a CIU

7.6.35

FCA PRA

R

For the purpose of identifying the appropriate treatment for the purpose of ■ BIPRU 7.6.5R, the underlying *position* for the purpose of ■ BIPRU 7.6.8R and the derived *position* under ■ BIPRU 7.6.13R a *firm* may choose between treating an *option* on a *CIU* as being:

- (1) a *position* in the *CIU* itself; or
- (2) (if the conditions in ■ BIPRU 7.7 (Position risk requirements for collective investment undertakings) for the use of the method in question are satisfied) *positions* in the underlying investments or assumed *positions* arising through the use of the *standard CIU look through method* or the *modified CIU look through method*.

7.6.36

FCA PRA

G

- (1) This paragraph gives an example of how the *appropriate position risk adjustment* should be calculated for the purpose of deciding whether or not an *option* on a *CIU* is sufficiently *in the money* for the *firm* to have a choice whether or not to apply an *option PRR*. This example assumes that there is no leveraging (see ■ BIPRU 7.7.11R (CIU modified look through method)).
- (2) Say that the *CIU* contains underlying *equity position* and the *firm* is using one of the *CIU look through methods*. The *appropriate position risk adjustment* for some is 8% and for the others is 12%. The *firm* should identify the highest

appropriate position risk adjustment for the underlyings. In this case it is 12%. Therefore in this case the *option* would need to be *in the money* by more than 12% in order for the *firm* to have a choice between applying the *option PRR* or one of the other *PRR charges*.

- (3) However if the *firm* is not using one of the *CIU look through methods* the *option* would need to be *in the money* by more than 32% in order for the *firm* to have a choice between applying the *option PRR* or the *CIU PRR*.

7.6.37

FCA PRA

G

■ BIPRU 7.6.10R - ■ BIPRU 7.6.12R are subject to ■ BIPRU 7.7.3R (netting). ■ BIPRU 7.7.4R (use of third party) applies for the purpose of ■ BIPRU 7.6.

7.7 Position risk requirements for collective investment undertakings

Collective investment undertaking PRR calculation

7.7.1

R

FCA PRA

A *firm* must calculate its *CIU PRR* by:

- (1) identifying which *CIU positions* must be included within the scope of the *PRR* calculation (see ■ BIPRU 7.7.2R);
- (2) identifying which *CIU positions* are to be subject to the *CIU PRR* and which *positions* are to be subject to one of the other *PRR charges*;
- (3) converting on a daily basis net *positions* into the *firm's base currency* at the prevailing spot exchange rate before their aggregation;
- (4) calculating an individual *PRR* for each *position* in a *CIU* (see ■ BIPRU 7.7.5R);
- (5) summing the resulting individual *PRRs*.

Scope of the PRR calculation for collective investment undertakings

7.7.2

R

FCA PRA

- (1) A *firm's PRR* calculation must include all *trading book positions* in *CIUs*.
- (2) A *firm's CIU PRR* calculation must include all *trading book positions* in *CIUs* unless they are treated under one of the *CIU look through methods* and included in the *PRR* calculations for the relevant underlying investments or subject to an *option PRR*.
- (3) A *firm's PRR* calculation for *CIUs* must include notional *positions* arising from *trading book positions* in *options* or *warrants* on *collective investment undertakings*.

General rules

7.7.3

R

FCA PRA

Unless noted otherwise, no netting is permitted between the underlying investments of a *CIU* and other *positions* held by a *firm* for the purposes of calculating the *PRR charge* for a *position* in a *CIU*.

7.7.4

FCA PRA

R

A *firm* may rely on a third party to calculate and report *PRR* capital requirements for *position* risk (*general market risk* and *specific risk*) for *positions* in *CIUs* falling within ■ BIPRU 7.7.9R and ■ BIPRU 7.7.11R, in accordance with the methods set out in ■ BIPRU 7.7, provided that the correctness of the calculation and the report is adequately ensured.

Calculation of the collective investment undertaking PRR

7.7.5

FCA PRA

R

Without prejudice to other provisions in ■ BIPRU 7.7, a *position* in a *CIU* is subject to a *collective investment undertaking PRR* (*general market risk* and *specific risk*) of 32%. Without prejudice to provisions in ■ BIPRU 7.5.18R (*Foreign currency PRR* for *CIUs*) or, if the *firm* has a *VaR model permission*, ■ BIPRU 7.10.44R (*Commodity risks* and *VaR models*) taken together with ■ BIPRU 7.5.18R, where the modified gold treatment set out in those *rules* is used, a *position* in a *CIU* is subject to a *securities PRR* requirement for *position* risk (*general market risk* and *specific risk*) and a *foreign currency PRR* of no more than 40%.

Look through methods: General criteria

7.7.6

FCA PRA

R

A *firm* may determine the *securities PRR* requirement for *positions* in *CIUs* which meet the criteria set out in ■ BIPRU 7.7.7R, by one of the following methods:

- (1) the *standard CIU look through method* (■ BIPRU 7.7.4R and ■ BIPRU 7.7.7R - ■ BIPRU 7.7.10R); or
- (2) the *modified CIU look through method* (■ BIPRU 7.7.4R, ■ BIPRU 7.7.7R - ■ BIPRU 7.7.8R and ■ BIPRU 7.7.11R - ■ BIPRU 7.7.12R).

7.7.7

FCA PRA

R

The general eligibility criteria for using the methods in ■ BIPRU 7.7.4R and ■ BIPRU 7.7.9R - ■ BIPRU 7.7.11R, for *CIUs* issued by *companies* supervised or incorporated within the *EEA* are that:

- (1) the *CIU's* prospectus or equivalent document must include:
 - (a) the categories of assets the *CIU* is authorised to invest in;
 - (b) if investment limits apply, the relative limits and the methodologies to calculate them;
 - (c) if leverage is allowed, the maximum level of leverage; and
 - (d) if investment in OTC financial derivatives or repo-style transactions are allowed, a policy to limit counterparty risk arising from these transactions;
- (2) the business of the *CIU* must be reported in half-yearly and annual reports to enable an assessment to be made of the assets and liabilities, income and operations over the reporting period;

- (3) the units/shares of the *CIU* are redeemable in cash, out of the *undertaking's* assets, on a daily basis at the request of the unit holder;
- (4) investments in the *CIU* must be segregated from the assets of the *CIU* manager; and
- (5) there must be adequate risk assessment, by the investing *firm*, of the *CIU*.

7.7.8

FCA PRA

R

Third country *CIUs* are eligible if the requirements in ■ BIPRU 7.7.7R (1) - ■ BIPRU 7.7.7R (5) are met.

Standard CIU look through method: General

7.7.9

FCA PRA

R

- (1) Where a *firm* is aware of the underlying investments of the *CIU* on a daily basis the *firm* may look through to those underlying investments in order to calculate the *securities PRR* for *position* risk (*general market risk* and *specific risk*) for those *positions* in accordance with the methods set out in the *securities PRR* requirements or, if the *firm* has a *VaR model permission*, in accordance with the methods set out in ■ BIPRU 7.10 (Use of a Value at Risk Model).
- (2) Under this approach, *positions* in *CIUs* must be treated as *positions* in the underlying investments of the *CIU*. Netting is permitted between *positions* in the underlying investments of the *CIU* and other *positions* held by the *firm*, as long as the *firm* holds a sufficient quantity of units to allow for redemption/creation in exchange for the underlying investments.

Standard CIU look through method: Index or basket funds

7.7.10

FCA PRA

R

- (1) A *firm* may calculate the *securities PRR* for *position* risk (*general market risk* and *specific risk*) for *positions* in *CIUs* in accordance with the methods set out in the *securities PRR* requirements or, if the *firm* has a *VaR model permission*, in accordance with the methods set out in ■ BIPRU 7.10 (Use of a Value at Risk Model), to assumed *positions* representing those necessary to replicate the composition and performance of the externally generated index or fixed basket of *equities* or *debt securities* referred to in (a), subject to the following conditions:
 - (a) the purpose of the *CIU's* mandate is to replicate the composition and performance of an externally generated index or fixed basket of *equities* or *debt securities*; and
 - (b) a minimum correlation of 0.9 between daily price movements of the *CIU* and the index or basket of *equities* or *debt securities* it tracks can be clearly established over a minimum period of six months.

- (2) Correlation as referred to in (1)(b) means the correlation coefficient between daily returns on the *CIU* and the index or basket of *equities* or *debt securities* it tracks.

CIU modified look through method

7.7.11

FCA PRA

R

Where a *firm* is not aware of the underlying investments of the *CIU* on a daily basis, the *firm* may calculate the *securities PRR* for *position risk* (*general market risk* and *specific risk*) in accordance with the methods set out in the *securities PRR* requirements, subject to the following conditions:

- (1) it must be assumed that the *CIU* first invests to the maximum extent allowed under its mandate in the asset classes attracting the highest *securities PRR* for *position risk* (*general market risk* and *specific risk*), and then continues making investments in descending order until the maximum total investment limit is reached;
- (2) the *firm* must take account of the maximum indirect exposure that it could achieve by taking leveraged *positions* through the *CIU* when calculating its *securities PRR* for *position risk*, by proportionally increasing the *position* in the *CIU* up to the maximum exposure to the underlying investment items resulting from the investment mandate; and
- (3) should the *securities PRR* for *position risk* (*general market risk* and *specific risk*) under this approach exceed that set out in ■ BIPRU 7.7.5R, the *PRR charge* must be capped at that level.

7.7.12

FCA PRA

R

For the purpose of ■ BIPRU 7.7.11R (1) the *position* in the *CIU* must be treated as a direct holding in the assumed *position*.

CAD 1 models and VaR models

7.7.13

FCA PRA

G

Where ■ BIPRU 7.7 permits a *firm* to calculate the *PRR charge* for a *position* in a *CIU* using the *rules* in ■ BIPRU 7 relating to the underlying investment, a *firm* that has:

- (1) a *CAD 1 model waiver* that covers *positions* in *CIUs* may use the *rules* as modified by that *waiver*; and
- (2) a *VaR model permission* that covers *positions* in *CIUs* may use its *VaR model*.

Options on a CIU

7.7.14

FCA PRA

G

An *option* on a *CIU* should be treated in accordance with ■ BIPRU 7.6.35R to ■ BIPRU 7.6.37G (Options on a *CIU*).

7.8 Securities underwriting

General rules

7.8.1

FCA PRA

G

■ BIPRU 7.8 sets out the method for calculating a *net underwriting position* or *reduced net underwriting position*, which is then included in the *PRR* calculation in other parts of ■ BIPRU 7. It also deals with concentration risk. ■ BIPRU 7.8 only relates to new *securities*, which is defined in ■ BIPRU 7.8.12R.

7.8.2

FCA PRA

R

A *firm* which *underwrites* or *sub-underwrites* an issue of *securities* must, for the purposes of calculating its *market risk capital component* and its *concentration risk capital component*:

- (1) identify commitments to *underwrite* or *sub-underwrite* which give rise to an *underwriting position* (see ■ BIPRU 7.8.8R);
- (2) identify the time of *initial commitment* (see ■ BIPRU 7.8.13R); and
- (3) calculate the *net underwriting position* (set out in ■ BIPRU 7.8.17R), *reduced net underwriting position* or the *net underwriting exposure*.

7.8.3

FCA PRA

R

A *firm* must include the *net underwriting position* or *reduced net underwriting position* in whichever one or more of the following is or are relevant:

- (1) ■ BIPRU 7.2.3R (1) where *debt securities* are being underwritten;
- (2) ■ BIPRU 7.3.2R (1) where *equities* are being underwritten;
- (3) ■ BIPRU 7.6.22R where *warrants* are being underwritten; and
- (4) ■ BIPRU 7.5.3R where the *equities*, *debt securities* or *warrants* being underwritten are denominated in a *foreign currency*.

7.8.4

FCA PRA

R

A *firm* must comply with ■ BIPRU 7.8.3R from *initial commitment* (as determined under ■ BIPRU 7.8.8R) until the end of the fifth *business day* after *working day 0* (as determined under ■ BIPRU 7.8.23R).

7.8.5

FCA PRA

G

Sub-*underwriting* is a commitment given by one *firm* to someone other than the issuer or seller of the *securities* to sub-underwrite all or part of an issue of *securities*.

7.8.6

FCA PRA

G

The *net underwriting position* calculated in ■ BIPRU 7.8.17R will also be used in calculating the *net underwriting exposure* under ■ BIPRU 7.8.34R.

7.8.7

FCA PRA

G

The *net underwriting position* or *reduced net underwriting position* arising from *underwriting* or sub-*underwriting* a rights or *warrants* issue should be calculated using the current market price of the underlying *security* for the purposes of the *equity PRR* or *option PRR*. However, the *PRR* will be limited to the value of the *net underwriting position* calculated using the initial issue price of the rights or *warrants*. Where there is no market price because the rights or *warrants* are in relation to a new class of *securities* and the initial price has not been set the *net underwriting position* or *reduced net underwriting* is the amount of the commitment.

Commitment to underwriting securities

7.8.8

FCA PRA

R

- (1) For the purpose of ■ BIPRU 7.8.2R (1), a *firm* has a commitment to *underwrite* or sub-*underwrite* an issue of *securities* where:
 - (a) it gives a commitment to an issuer of *securities* to *underwrite* an issue of *securities*; or
 - (b) (where ■ BIPRU 7.8.12R (2) applies) it gives a commitment to a seller of *securities* to *underwrite* a sale of those *securities*; or
 - (c) it gives a commitment to a *person*, other than the issuer of *securities* or, if ■ BIPRU 7.8.12R (2) applies, the seller of the *securities*, to sub-*underwrite* an issue of *securities*; or
 - (d) it is a member of a syndicate or group that gives a commitment of the type described in (1)(a)-(c).
- (2) Unless a *rule* deals with them separately or the context otherwise requires, a provision of ■ BIPRU 7.8 that deals with *underwriting* also applies to sub-*underwriting*.

Exclusions from BIPRU 7.8

7.8.9

FCA PRA

G

- (1) Block trades, including bought deals, and private placements are not within the scope of ■ BIPRU 7.8 because they involve an outright purchase by the *firm* of the relevant *securities*.
- (2) For the purpose of ■ BIPRU 7.8 *securities* include debt and *equity* instruments and *convertibles* but excludes loans.

Grey market transactions

7.8.10

FCA PRA

R

- (1) A *firm* that buys and sells *securities* before issue is dealing in the grey market for the purposes of ■ BIPRU 7.8.

- (2) ■ BIPRU 7.8 does not apply to a *firm* with respect to its dealings in the grey market unless the *firm*:
 - (a) has an *underwriting* commitment to the issuer in respect of those *securities*; or
 - (b) has a sub-*underwriting* commitment in respect of those *securities* and is using the grey market solely for the purpose of reducing that sub-*underwriting* commitment.
- (3) ■ BIPRU 7.8 does not apply to a *firm* with respect to its dealings in the grey market if the transaction is undertaken by the proprietary trading part of the *firm* or is undertaken for proprietary trading purposes.
- (4) ■ BIPRU 7.8 does not apply to a *firm* with respect to its dealings in the grey market except as described in ■ BIPRU 7.8.17R.

7.8.11

FCA PRA

G

In ■ BIPRU 7.8 the grey market is the market in which dealers "buy" and "sell" *securities* ahead of issue. In reality the dealers are buying and selling promises to deliver the *securities* when issued.

7.8.12

FCA PRA

R

New securities

For the purposes of ■ BIPRU 7.8, a *firm* must treat *securities* as being new for the purposes of the definition of *underwriting* if they are:

- (1) *securities* that, prior to the allotment following the *underwriting*, were not in issue; or
- (2) *securities* that do not fall within (1) but that have not previously been offered for sale or subscription to the public and have not been admitted to trading on a market operated by a *recognised investment exchange* or an *overseas investment exchange*.

Time of initial commitment

7.8.13

FCA PRA

R

Subject to ■ BIPRU 7.8.14R, the time of *initial commitment* is the earlier of:

- (1) (in the case of *underwriting*) the time the *firm* agrees with the issuer of *securities* to *underwrite* those *securities*; or
- (2) (in the case of *underwriting* falling under ■ BIPRU 7.8.12R (2)) the time the *firm* agrees with the seller of *securities* to *underwrite* those *securities*; or
- (3) (in the case of sub-*underwriting*) the time the *firm* agrees with the *person* referred to ■ BIPRU 7.8.8R (1)(c) to sub-*underwrite* those *securities*; or

- (4) (in the case of ■ BIPRU 7.8.8R (1)(d)) the time the group or syndicate in question (or a member of that group or syndicate on behalf of the others) agrees with the issuer or other *person* to whom the commitment is given as referred to in ■ BIPRU 7.8.8R (1)(d) to *underwrite* or *sub-underwrite* the *securities* in question; or
- (5) (if the *firm* at that time has a commitment, whether legally or binding or not) the time the price and allocation of the issue or offer are set.

7.8.14

FCA PRA

R

If a *firm* has an irrevocable and unfettered right to withdraw from an *underwriting* commitment, exercisable within a certain period, the commitment commences (and thus the time of *initial commitment* occurs) when that right expires.

7.8.15

FCA PRA

G

Subject to the existence of a right described in ■ BIPRU 7.8.14R an *underwriting* commitment commences even if it is subject to formal, legal or other conditions that would normally be expected to be satisfied.

7.8.16

FCA PRA

G

A force majeure or material adverse change clause would not be a right of the sort referred to in ■ BIPRU 7.8.14R.

Calculating the net underwriting position

7.8.17

FCA PRA

R

A *firm* must calculate a *net underwriting position* by adjusting the gross amount it has committed to *underwrite* for:

- (1) any sales or sub-*underwriting* commitments received that have been confirmed in writing at the time of *initial commitment* (but excluding any sales in the grey market as defined in ■ BIPRU 7.8.10R (1));
- (2) any *underwriting* or sub-*underwriting* commitments obtained from others since the time of *initial commitment*;
- (3) any purchases or sales of the *securities* since the time of *initial commitment* (other than purchases or sales in the grey market as defined in ■ BIPRU 7.8.10R (1));
- (4) (in the case of sales in the grey market as defined in ■ BIPRU 7.8.10R (1)) any sales of the *securities* as at the time of *initial commitment* or since the time of *initial commitment* subject, in both cases, to the following conditions:
 - (a) any sales of the *securities* as at the time of *initial commitment* must be confirmed in writing at the time of *initial commitment*; and

(b) sales must be net of any purchases in the grey market as defined in ■ BIPRU 7.8.10R (1); and

(5) any allocation of *securities* granted or received, arising from the commitment to *underwrite* the *securities*, since the time of *initial commitment*.

7.8.18

R

FCA PRA

If the allocation of *securities* has not been fixed a *firm* must calculate the gross amount of its commitment, for the purposes of ■ BIPRU 7.8.17R, by reference to the maximum amount it has committed to *underwrite* until the time the allocation is set.

7.8.19

R

FCA PRA

An *underwriting* commitment may only be reduced under ■ BIPRU 7.8.17R on the basis of a formal agreement.

7.8.20

G

FCA PRA

Allocations may arise, after date of *initial commitment*, from the agreement to *underwrite*. For example obligations or rights may be allocated to or from the issuer, the *underwriting* group or syndicate.

Over-allotment options

7.8.21

R

FCA PRA

(1) This *rule* deals with the treatment of short *positions* that arise when a *firm* commits to distribute *securities* that it is *underwriting* in an amount that exceeds the allocation to the *firm* made by the issuer of the *securities* being *underwritten*.

(2) When calculating its *net underwriting position*, a *firm* may use an over-allotment option granted to it by the issuer of the *securities* being *underwritten* to reduce the short *positions* in (1).

(3) A *firm* may also use an over-allotment option granted to another member of the *underwriting* syndicate for the purpose in (2).

(4) (2) and (3) only apply from *working day 0*.

(5) (2) and (3) only apply to the extent that the treatment is consistent with the terms of the over-allotment option.

7.8.22

R

FCA PRA

Except as provided in ■ BIPRU 7.8.21R, a *firm* must not take into account an over-allotment option granted to it or another member of the *underwriting* syndicate in calculating its *net underwriting position*.

Working day 0

7.8.23

R

FCA PRA

For the purposes of ■ BIPRU 7.8 *working day 0* is the *business day* on which a *firm* that is *underwriting* or sub-*underwriting* becomes unconditionally committed to accepting a known quantity of *securities* at a specified price.

7.8.24

FCA PRA

G

For debt issues and *securities* which are issued in a similar manner, *working day 0* is the later of the date on which the *securities* are allotted and the date on which payment for them is due.

7.8.25

FCA PRA

G

For *equity* issues and *securities* which are issued in a similar manner, *working day 0* is the later of the date on which the offer becomes closed for subscriptions and the date on which the allocations are made public.

7.8.26

FCA PRA

G

For rights issues, *working day 0* is the first day after the date on which the offer becomes closed to acceptances for subscription.

Calculating the reduced net underwriting position

7.8.27

FCA PRA

R

To calculate the *reduced net underwriting position* a firm must apply the reduction factors in the table in ■ BIPRU 7.8.28R to the *net underwriting position* (calculated under ■ BIPRU 7.8.17R) as follows:

- (1) in respect of debt *securities*, a firm must calculate two *reduced net underwriting positions*; one for inclusion in the firm's *interest rate PRR specific risk* calculation (■ BIPRU 7.2.43R), the other for inclusion in its *interest rate PRR general market risk* calculation (■ BIPRU 7.2.52R); and
- (2) in respect of *equities*, a firm must calculate only one *reduced net underwriting position*, and then include it in the *simplified equity method* (see ■ BIPRU 7.3.29R).

7.8.28

FCA PRA

R

Table: Net underwriting position reduction factors

This table belongs to ■ BIPRU 7.8.27R

Underwriting timeline	Debt		Equity
	<i>General market risk</i>	<i>Specific risk</i>	
Time of initial commitment until working day 0	0%	100%	90%
<i>Working day 1</i>	0%	90%	90%
<i>Working day 2</i>	0%	75%	75%
<i>Working day 3</i>	0%	75%	75%
<i>Working day 4</i>	0%	50%	50%
<i>Working day 5</i>	0%	25%	25%
<i>Working day 6 and onwards</i>	0%	0%	0%

7.8.29

FCA PRA

G

The table in ■ BIPRU 7.8.30G gives an example of the *reduced net underwriting position* calculation. The example is based on the *firm* starting with a commitment to underwrite £100 million of a new *equity* issue. *Firms* are reminded that in the case of an *equity*, the *reduced net underwriting position* should be treated under the *simplified equity method* (see ■ BIPRU 7.8.27R (Simplified and standard equity methods) and ■ BIPRU 7.8.27R).

7.8.30

FCA PRA

G

Table: Example of the reduced net underwriting position calculation

This table belongs to ■ BIPRU 7.8.29G

Time	Net underwriting position (see BIPRU 7.8.17R)		Net underwriting position	Percentage reduction (see BIPRU 7.8.28R)	Reduced net underwriting position
At initial commitment 9.00am Monday	£100m gross amount is reduced by £20m due to sales/sub-underwriting commitments confirmed in writing at the time of initial commitment (see BIPRU 7.8.17R (1) and (4)).	=	£80m	90%	£8m
Post initial commitment 9.02am Monday	Remaining £80m is reduced by £40m due to further sales, sub-underwriting commitments obtained and allocations granted (see BIPRU 7.8.17R (2) - (5)).	=	£40m	90%	£4m
At the end of working day 1	Remaining £40m is reduced to £20m due to further sales.	=	£20m	90%	£2m
End of working day 3	Remaining £20m is reduced to £5m due to further sales.	=	£5m	75%	£1.25 m
End of working day 4	Remaining £5m is re-	=	£2m	50%	£1m

Time	Net underwriting position (see BIPRU 7.8.17R)	Percentage reduction (see BIPRU 7.8.28R)	Reduced net underwriting position
	duced to £2m due to further sales.		
End of working day 5	Remaining £2m is reduced to £1m due to further sales.	25%	£0.75 m
Start of working day 6	£1m remaining	0%	£1m

Large exposure risk from underwriting securities: Calculating the net underwriting exposure

7.8.31
FCA PRA

R For the purposes of calculating the total amount of its *trading book exposures* to a *person* for concentration risk purposes, a *firm* must include *net underwriting exposure* to that *person*.

7.8.32
FCA PRA

R A *firm* must include any other *exposures* arising out of *underwriting* (including any counterparty *exposures* to any sub-underwriters) for the purposes of calculating the total amount of its *trading book exposures* to a *person* for concentration risk purposes.

7.8.33
FCA PRA

R A *firm*, before entering into a new *underwriting* commitment, must be able to recalculate the *concentration risk capital component* to the level of detail necessary to ensure that the *firm's capital resources requirement* does not exceed the *firm's capital resources*.

7.8.34
FCA PRA

R Except where otherwise specified by a *requirement* on its *Part 4A permission*, a *firm* must calculate the *net underwriting exposure* to an issuer by applying the relevant reduction factors in the table in ■ BIPRU 7.8.35R to its *net underwriting position* calculated under ■ BIPRU 7.8.17R.

7.8.35
FCA PRA

R Table: Calculation of net underwriting exposure

This table belongs to ■ BIPRU 7.8.34R

Time	Reduction factor to be applied to net underwriting position
<i>Initial commitment to working day 0</i>	100%
<i>Working day 0</i>	100%

Time	Reduction factor to be applied to net underwriting position
<i>Working day 1</i>	90%
<i>Working day 2</i>	75%
<i>Working day 3</i>	75%
<i>Working day 4</i>	50%
<i>Working day 5</i>	25%
<i>Working day 6 onwards</i>	0%

7.8.36

FCA PRA

G

The effect of ■ BIPRU 7.8.34R is that there is no concentration limit for *net underwriting exposures* between *initial commitment* and the end of *working day 0*, except where specified by a *requirement* on a *firm's Part 4A permission*.

Large exposure risk from underwriting securities: Monitoring and reporting concentration risk

7.8.37

FCA PRA

R

For the purposes of concentration risk monitoring only, a *firm* must report its *net underwriting exposure* both before and after the application of the reduction factors in the table in ■ BIPRU 7.8.35R.

Risk management

7.8.38

FCA PRA

R

A *firm* must take reasonable steps to establish and maintain such systems and controls to monitor and manage its *underwriting* and *sub-underwriting* business as are appropriate to the nature, scale and complexity of its *underwriting* and *sub-underwriting* business. In particular, a *firm* must have systems to monitor and control its *underwriting exposures* between the time of the *initial commitment* and *working day one* in the light of the nature of the risks incurred in the markets in question.

7.8.39

FCA PRA

G

A *firm* should take reasonable steps to:

- (1) allocate responsibility for the management of its *underwriting* and *sub-underwriting* business;
- (2) allocate adequate resources to monitor and control its *underwriting* and *sub-underwriting* business;
- (3) satisfy itself that its systems to monitor *exposure* to counterparties will calculate, revise and update its *exposure* to each counterparty arising from its *underwriting* or *sub-underwriting* business;
- (4) satisfy itself of the suitability of each *person* who performs functions for it in connection with the *firm's underwriting* and *sub-underwriting* business having regard to the *person's* skill and experience; and
- (5) satisfy itself that its procedures and controls to monitor and manage its *underwriting* business address, on an on-going basis, the capacity of *sub-underwriters* to meet *sub-underwriting* commitments.

7.9 Use of a CAD 1 model

Introduction

7.9.1

FCA PRA

G

A *firm* is required under ■ GENPRU 2.1.52 R (Calculation of the *market risk capital requirement*) to calculate its *market risk capital requirement* using the rules in ■ BIPRU 7. However, the *appropriate regulator* may at the *firm's* request modify ■ GENPRU 2.1.52 R to allow the *firm* to calculate all or part of the *PRR* for the *positions* covered by that model by using a *CAD 1 model* (for *options* risk aggregation and/or interest rate pre-processing) or a *VaR model* (value at risk model) instead. ■ BIPRU 7.10 (Use of a Value at Risk Model) deals with *VaR model permissions*.

7.9.2

FCA PRA

G

The purpose of ■ BIPRU 7.9 is to provide *guidance* on the *appropriate regulator's* policy for granting *CAD 1 model waivers* under section 138A of the *Act* (Modification or waiver of rules). The policy recognises that *CAD 1 models* may vary across *firms* but, as a minimum, the *appropriate regulator* will need to be satisfied:

- (1) about the quality of the internal controls and risk management relating to the model (see ■ BIPRU 7.9.19G - ■ BIPRU 7.9.23G for further details);
- (2) about the quality of the model standards; and
- (3) that the *CAD 1 model* captures and produces an accurate measure of the risks inherent in the portfolio covered by the *CAD 1 model* (see ■ BIPRU 7.9.25G - ■ BIPRU 7.9.53G for further details).

7.9.3

FCA PRA

G

■ BIPRU 7.9 also explains how the output from the *CAD 1 model* is fed into the *market risk capital requirement* calculation.

7.9.4

FCA PRA

G

If a *CAD 1 model waiver* is granted by the *appropriate regulator*, the *waiver* will contain certain requirements. In order adequately to address individual circumstances, these may differ from what is set out in ■ BIPRU 7.9. The *waiver* will also identify the *rules* to which the *waiver* applies and the scope of model recognition granted to the *firm*.

7.9.5

FCA PRA

G

Waivers permitting the use of models in the calculation of *PRR* will not be granted if that would be contrary to the *CAD*. Any *waiver* which is granted will only be granted on terms that are compatible with the *CAD*. Accordingly, the only *waivers* permitting the use of models in calculating *PRR* that the *appropriate regulator* is likely to grant are *CAD 1 model waivers* and *VaR model permissions*.

7.9.6

FCA PRA

G

Scope of CAD 1 models

The *appropriate regulator* recognises two types of *CAD 1 model*. The table in ■ BIPRU 7.9.7G describes them.

7.9.7

FCA PRA

G

Table: Types of CAD 1 model

This table belongs to ■ BIPRU 7.9.6G

	Options risk aggregation models	Interest rate pre-processing models
Brief description and eligible instruments	Analyse and aggregate <i>options</i> risks for: <ul style="list-style-type: none"> • interest rate <i>options</i>; • equity <i>options</i>; • foreign currency <i>options</i>; • commodity <i>options</i>; and • <i>CIU options</i>. 	May be used to calculate duration weighted <i>positions</i> for: <ul style="list-style-type: none"> • interest rate <i>futures</i>; • forward rate agreements (<i>FRAs</i>); • forward commitments to buy or sell debt <i>securities</i>; • <i>options, swaps</i> or <i>warrants</i> on interest rates or debt <i>securities</i> and <i>options</i> on such <i>swaps</i>; • amortising bonds; • equity <i>futures, forwards, warrants</i> and <i>options</i> (but only in relation to the interest rate risk inherent in these products); and • foreign currency <i>futures, forwards, swaps</i> and <i>options</i>, but only in relation to the interest rate risk inherent in these products.
The output and how it is used in the <i>PRR</i> calculation	Depending on the type of model and the requirements in the <i>CAD 1 model waiver</i> granted, the outputs from an <i>options</i> risk aggregation model are used as an input to the <i>market risk capital requirement</i> calculation.	Depending on the type of model and the requirements in the <i>CAD 1 model waiver</i> granted, the individual sensitivity figures produced by this type of <i>CAD 1 model</i> are either input into the calculation of <i>interest rate PRR</i> under the <i>interest rate duration method</i> (see BIPRU 7.2.63R) or are converted into notional <i>position</i> and input into the calculation of <i>interest rate PRR</i> under the <i>interest rate maturity method</i> (see BIPRU 7.2.59R).

7.9.8

FCA PRA

G

Currently the *appropriate regulator* only envisages allowing recognition for *options* on *CIUs* if the *CIU* satisfies one of the following conditions:

- (1) it is a *regulated collective investment scheme*; or

- (2) the *firm* can demonstrate that it has characteristics that are similar to or better than an *undertaking* in (1) from the point of view of transparency and liquidity.

The CAD 1 model waiver application and review process

7.9.9

FCA PRA

G

Details of the general *waiver* process are set out in ■ SUP 8 (Waiver and modification of rules). Further details of the *waiver* process applicable to certain *waivers* relating to BIPRU (including *CAD 1 model waivers*) can be found in ■ BIPRU 1.3 (Applications for advanced approaches). Because of the complexity of a *CAD 1 model waiver*, it is recommended that, as set out in ■ SUP 8.3.4 G and ■ BIPRU 1.3.21 G, a *firm* contact its usual contact at the *appropriate regulator* to discuss its proposed application. It should also be noted that the *waiver* recognition process in the case of a *CAD 1 model* may take longer than the timescales indicated in ■ SUP 8.3.5 G.

7.9.10

FCA PRA

G

In order to consider a *CAD 1 model waiver* request, the *appropriate regulator* may undertake a review to ensure that it is adequate and appropriate for the *PRR* calculation.

7.9.11

FCA PRA

G

The model review process may be conducted through a series of visits covering various aspects of the *firm's* control and IT environment. Before these visits the *appropriate regulator* may ask the *firm* to provide some information relating to its *waiver* request accompanied by some specified background material. The model review visits are organised on a timetable that allows a *firm* being visited sufficient time to arrange the visit and provide the appropriate pre-visit information.

7.9.12

FCA PRA

G

As part of the model review process, the following may be reviewed: organisational structure and personnel; details of the *firm's* market position in the relevant products; profit and risk information; valuation and reserving policies; operational controls; IT systems; model release and control procedures; risk management and control framework; risk appetite and limit structure and future developments relevant to model recognition.

7.9.13

FCA PRA

G

The *appropriate regulator* will normally require meetings with senior management and staff from the front office, financial control, risk management, operations, systems development, information technology and audit areas.

7.9.14

FCA PRA

G

A review by a *skilled person* may be used before a *CAD 1 model waiver* is granted to supplement the *waiver* process or after the *waiver* has been granted to review the *CAD 1 model*.

7.9.15

FCA PRA

G

If the *appropriate regulator* grants a *CAD 1 model waiver*, the *waiver* direction will specify the particular *rule* which has been modified, and set out the requirements subject to which the *waiver* has been granted. These requirements may include:

- (1) the details of the calculation of *PRR*;
- (2) the *CAD 1 model waiver* methodology to be employed;

- (3) the products covered by the model (e.g. *option* type, maturity, currency); and
- (4) any notification requirements relating to the *CAD 1 model waiver*.

7.9.16

FCA PRA

G

Where a *firm* operates any part of its *CAD 1 model* outside the *United Kingdom*, the *appropriate regulator* may take into account the results of any review of that model carried out by any overseas regulator concerned. The *appropriate regulator* may wish to receive information directly from that regulator.

Maintenance of model recognition

7.9.17

FCA PRA

G

No changes should be made to a *CAD 1 model* unless the change is not material. Material changes to a *CAD 1 model* will require a renewed *waiver* to be issued. Materiality is measured from the time that the *waiver* is granted or, if the *waiver* has been varied in accordance with section 138A of the *Act*, any later time that may be specified in the *waiver* for these purposes. If a *firm* is considering making material changes to its *CAD 1 model*, then it should notify the *appropriate regulator* at once. If a *firm* wishes to change the products covered by the model it should apply for a variation of its *CAD 1 model waiver*.

7.9.18

FCA PRA

G

If the *CAD 1 model* ceases to meet the requirements of the *waiver*, the *firm* should notify the *appropriate regulator* at once. The *appropriate regulator* may then revoke the *waiver* unless it is varied in accordance with section 138A of the *Act*. If the *CAD 1 model waiver* contains conditions it is a condition of using the *CAD 1 model approach* that the *firm* should continue to comply with those conditions.

Risk management standards

7.9.19

FCA PRA

G

A *firm* with a complex portfolio is expected to demonstrate more sophistication in its modelling and risk management than a *firm* with a simple portfolio.

7.9.20

FCA PRA

G

A *firm* should be able to demonstrate that the risk management standards set out in ■ BIPRU 7.9 are satisfied by each legal entity with respect to which the *CAD 1 model approach* is being used (even though they are expressed to refer only to a *firm*). This is particularly important for *subsidiary undertakings* in *groups* subject to matrix management where the business lines cut across legal entity boundaries.

7.9.21

FCA PRA

G

- (1) A *firm* should have a conceptually sound risk management system which is implemented with integrity and should meet the minimum standards set out in this paragraph.
- (2) A *firm* should have a risk control unit that is independent of business trading units and reports directly to senior management. The unit should be responsible for designing and implementing the *firm's* risk management system. It should produce and analyse daily reports on the risks run by the business and on the appropriate measures to be taken in terms of the trading limits.
- (3) A *firm's* senior management should be actively involved in the risk control process and the daily reports produced by the risk control unit should be reviewed by a level of management with sufficient authority to enforce reductions of *positions* taken by individual traders as well as in the *firm's* overall risk exposure.

- (4) The risk control group should have a sufficient number of staff with appropriate skills in the use of models.
- (5) A *firm* should have established procedures for monitoring and ensuring compliance with a documented set of appropriate internal policies and controls concerning the overall operation of the risk measurement and control framework. This should take into account the front, middle and back office functions.
- (6) A *firm* should conduct, as part of its regular internal audit process, a review of the systems and controls relating to its *CAD 1 model*. This review should include the valuation process, compliance with the *CAD 1 model waiver's* scope and the activities of the business trading units and the risk control units. This review should be undertaken by staff independent of the areas being reviewed.

7.9.22

FCA PRA

G

In assessing whether the risk management and control framework is implemented with integrity, the *appropriate regulator* will consider the IT systems used to run the *CAD 1 model* and associated calculations. The assessment will include, where appropriate:

- (1) feeder systems; risk aggregation systems; the integrity of the data (i.e. whether it is complete, coherent and correct); reconciliations and checks on completeness of capture; and
- (2) system development, change control and documentation; security and audit trails; system availability and contingency procedures; network adequacy.

7.9.23

FCA PRA

G

A *firm* should take appropriate steps to ensure that it has adequate controls relating to:

- (1) the derivation of the *PRR* from the *CAD 1 model* output;
- (2) *CAD 1 model* development, including independent validation;
- (3) reserving;
- (4) valuation (see ■ GENPRU 1.3 (Valuation)), including independent validation; and
- (5) the adequacy of the IT infrastructure.

Model standards

7.9.24

FCA PRA

G

A *firm* should take appropriate steps to ensure that its *CAD 1 model* captures and produces an accurate measure of the risks inherent in the portfolio covered by the *CAD 1 model*. These risks may include, but are not limited to, gamma, vega and rho.

Options risk aggregation models

7.9.25

FCA PRA

G

For a *firm* to obtain a *CAD 1 model waiver* for its *options* risk aggregation model, it should have in place an appropriate *options* valuation model.

7.9.26

FCA PRA

G

The *appropriate regulator* does not specify the methodology that a *firm* should employ in order to produce the appropriate outputs from its *options* risk aggregation CAD 1 model. However, ■ BIPRU 7.9.27G - ■ BIPRU 7.9.43G provide details of how a *firm* could meet the requirement to capture gamma, vega and rho risks using a scenario matrix approach. Where a *firm* adopts the scenario matrix approach then the standards set out in ■ BIPRU 7.9.27G - ■ BIPRU 7.9.43G should be followed. The *firm* should also take into account other risks not captured by the scenario matrix approach. If a *firm* does not use the scenario matrix approach it should use an equivalent methodology. If a *firm* uses an equivalent methodology it should be able to demonstrate that the approach used meets the requirements of ■ BIPRU 7.9.

7.9.27

FCA PRA

G

A scenario matrix is an approach by which an *options* portfolio is revalued given a number of simultaneous shifts in both the spot level of the underlying and the implied volatility.

7.9.28

FCA PRA

G

The scenario matrix approach may be employed for all types of *options* on all types of underlying asset.

7.9.29

FCA PRA

G

- (1) This paragraph provides an outline of the initial steps to be taken when using the scenario matrix approach.
- (2) A value for an *option* should be obtained using the *firm's options* valuation model.
- (3) The inputs into the *options* valuation model for implied volatility of the underlying asset and the price of the underlying asset should then be altered so that a new value for the *option* is obtained (details of the amount by which the implied volatility and the price of the underlying should be amended are set out in ■ BIPRU 7.9.30G - ■ BIPRU 7.9.36G).
- (4) The difference between the original value of the *option* and the new value obtained following the alterations should be input into the appropriate cell in the matrix. The value in the central cell where there is no change in implied volatility or price of the underlying should therefore be zero.
- (5) The process of obtaining a new price for the *option* should be repeated until the matrix is completed.

7.9.30

FCA PRA

G

The alteration to the implied volatility (known as the implied volatility shift) referred to in ■ BIPRU 7.9.29G (3) may be a proportional shift. The size of the shift depends on the remaining life of the *option* and the asset class of the underlying. The table in ■ BIPRU 7.9.32G sets out the shifts that should be applied where a proportional shift is used. Alternatively, a *firm* may use a single shift across all maturities or use an absolute rather than a proportional implied volatility shift. Where a single shift or an absolute shift is used it should be at least as conservative as the proportional shifts. Any use of a single shift or an absolute shift should be reviewed and, if necessary updated, on a regular basis.

7.9.31

FCA PRA

G

A *firm* may choose to use a less detailed term structure than that in the table in ■ BIPRU 7.9.32G, but the shifts used should be no less conservative than those set out in that table. For example, a *firm* that uses one <3 month band, rather than the two bands (< 1 month and 1-3 months) set out in the table, should use the most conservative shift set out in the table for the bands covered. In this example that shift is 30%.

7.9.32

FCA PRA

G

Table: proportional implied volatility shifts

This table belongs to ■ BIPRU 7.9.30G

Remaining life of option	Proportional shift	
	<i>Equities, foreign currency and commodities</i>	Interest rates and <i>CIUs</i>
≤ 1 month	30%	30%
> 1 ≤ 3 months	20%	20%
> 3 ≤ 6 months	15%	15%
> 6 ≤ 9 months	12%	12%
> 9 ≤ 12 months	9%	9%
> 1 ≤ 2 years	6%	9%
> 2 ≤ 4 years	4.5%	9%
> 4 years	3%	9%

7.9.33

FCA PRA

G

The size of the underlying price/rate shift depends on the asset class of the underlying as referred to in ■ BIPRU 7.9.29G (3) and is set out in the table in ■ BIPRU 7.9.34 G.

7.9.34

FCA PRA

G

Table: underlying price/rate shifts

This table belongs to ■ BIPRU 7.9.33G

Underlying asset class	Shift
<i>Equities</i>	±8%
<i>Foreign currency</i>	±8%
<i>Commodities</i>	±15%, (but a <i>firm</i> may use the percentages applicable under the <i>commodity extended maturity ladder approach</i> if it would qualify under BIPRU 7.4 (Commodity PRR) to use that approach).
Interest rates	±100bp (but a <i>firm</i> may use the sliding scale of shifts by maturity as applicable to the <i>interest rate duration method</i>).
<i>CIU</i>	±32%, (but a <i>firm</i> may use the percentages applicable to the underlyings if the <i>firm</i> applies one of the <i>CIU look through methods</i> under BIPRU 7.7 (Position risk requirements for collective investment undertakings)).

7.9.35

FCA PRA

G

The shifts outlined in the table in ■ BIPRU 7.9.34G are the maximum shifts required; in addition there will be a number of intermediate shifts as a result of the minimum matrix size criteria set out in ■ BIPRU 7.9.36G.

7.9.36

FCA PRA

G

The minimum size of the scenario matrix should be 3x7, that is, three observations for implied volatility (including the actual implied volatility) and seven observations for the price of the underlying (including the actual price of the underlying). A *firm* should be able to justify its choice of granularity. Greater granularity may be required where the portfolio contains, for example, a large proportion of barrier *options*.

7.9.37

FCA PRA

G

- (1) A different scenario matrix should be set up for each underlying asset type in accordance with this paragraph.
- (2) For *equities* (including single *equities*, baskets and indices) there should be a separate matrix for each national market or non-decomposed basket or non-decomposed multi-national index.
- (3) For *foreign currency* products there should be a separate matrix for each currency pair where appropriate.
- (4) For *commodity* products there should be a separate matrix for each *commodity*. The question whether two items are the same *commodity* should be decided in accordance with ■ BIPRU 7.4 (Commodity PRR).
- (5) For interest rate products there should be a separate matrix for each currency. In addition, a *firm* should not offset the gamma and vega exposures (except in the circumstances set out in ■ BIPRU 7.9.38G) arising from any one of the following types of product with the gamma and vega exposures arising from any of the other products in the list:
 - (a) swaptions (*options* on interest rates);
 - (b) interest rate *options* (including *options* on exchange-traded deposit or bill *futures*);
 - (c) bond *options* (including *options* on exchange-traded bond *futures*); and
 - (d) other types of *options* required by the CAD 1 model *waiver* to form their own separate class of underlying asset.
- (6) The other types of *options* referred to in (5)(d) will generally be exotic *options* that do not fall easily into (5)(a) - (c).
- (7) For *CIUs* there should be a separate matrix for each *CIU* fund. If the *firm* applies one of the *CIU look through methods* under ■ BIPRU 7.7 (Position risk requirements for collective investment undertakings), then (1) - (6) apply based on what the underlyings are.

7.9.38

FCA PRA

G

A *firm* may offset gamma and vega exposures arising from the products listed in ■ BIPRU 7.9.37G (5) where it can demonstrate that it trades different types of interest rate-related *options* as a portfolio and takes steps to control the basis risk between different types of implied volatility. To the extent that this is the case an individual matrix is not required for each of the products listed in ■ BIPRU 7.9.37G (5) and a combined scenario matrix may be used.

7.9.39

FCA PRA

G

Where it is imprudent fully to offset long-dated and short-dated vega exposure owing to the risk of non-parallel shifts in the yield curve, a *firm* should use an appropriate number

of scenario matrices to take account of non-parallel shifts in the yield curve according to the maturity of the *option* or underlying.

7.9.40

FCA PRA

G

Following the steps outlined in ■ BIPRU 7.9.29G, a *firm* then removes the portion of the values in the matrix that can be attributed to the effect that delta has had on the change in the value of the *option* (a process known as delta-stripping).

7.9.41

FCA PRA

G

Once the effect of delta has been removed from the matrix, the values left in the matrix relate to gamma and vega risk. A *firm's* PRR in relation to gamma and vega risk on the individual *option* is the absolute of the most negative cell in the scenario matrix produced. Where all cells are positive the PRR is zero. The total PRR for the gamma and vega risk on the portfolio of *options* is a simple sum of the individual requirements. This amount should then be fed into a *firm's* PRR calculation.

7.9.42

FCA PRA

G

The values that have been obtained for the delta-equivalent *positions* of instruments included in the scenario matrix should then be treated in the same way as *positions* in the underlying. Where the delta obtained relates to interest rate *position* risk, the delta equivalent *positions* may be fed into the *firm's* interest rate pre-processing model to the extent that the *positions* fall within the scope of interest rate pre-processing models as set out in ■ BIPRU 7.9.7G and provided that the *firm's* CAD 1 model waiver allows the *firm's* CAD 1 model to be used in this way. Alternatively, the delta obtained should be fed into the standard PRR calculations in ■ BIPRU 7.2 (Interest rate PRR), ■ BIPRU 7.3 (Equity PRR and basic interest rate PRR for equity derivatives), ■ BIPRU 7.4 (Commodity PRR) or ■ BIPRU 7.5 (Foreign currency PRR) as appropriate.

7.9.43

FCA PRA

G

In using the scenario matrix approach, none of the steps followed will take specific account of a *firm's* exposure to rho risk. Where a *firm* can demonstrate that for interest rate-related *options* the rho sensitivity is effectively included in the delta sensitivities produced, there is no separate capital requirement relating to rho. For all other *options* except *commodity options*, a *firm* should calculate a rho sensitivity ladder by currency using its CAD 1 model and either feed this into the *interest rate maturity method* or *interest rate duration method* calculation or, where the *firm's* CAD 1 model waiver allows the *firm's* CAD 1 model to be used in this way, feed that ladder into an interest rate pre-processing model. Generally a CAD 1 model does not need to deal specifically with rho risk for *commodity options*.

Interest rate pre-processing models

7.9.44

FCA PRA

G

To the extent that a *firm's* CAD 1 model waiver is for the use of an interest rate pre-processing model the *firm* should use it for the pre-processing of the instruments set out in ■ BIPRU 7.9.7G, from which the residual *positions* are fed into the *interest rate maturity method* or *interest rate duration method* calculation.

7.9.45

FCA PRA

G

There are a number of different methods of constructing pre-processing models but all should comply with ■ BIPRU 7.9.45G - ■ BIPRU 7.9.53G. All pre-processing models should generate *positions* that have the same sensitivity to defined interest rate changes as the underlying cash flows.

7.9.46

FCA PRA

G

In an interest rate pre-processing model each transaction is converted into its constituent cash flows. The cash flows are discounted using zero coupon rates derived from the *firm's* own yield curves.

7.9.47

FCA PRA

G

The cash flows are then calculated again using the *firm's* own yield curve shifted by the amount set out in ■ BIPRU 7.9.49G.

7.9.48

FCA PRA

G

The difference between the present values calculated using the *firm's* own yield curve and those calculated using the *firm's* curve shifted under ■ BIPRU 7.9.47G are known as the sensitivity figures. Alternatively, a *firm* may shift the yield curve by one basis point and multiply up the sensitivity figures by the appropriate amount in order to achieve the shifts set out in ■ BIPRU 7.9.47G. These sensitivity figures are then allocated to each of the 15 maturity bands set out in ■ BIPRU 7.9.49G.

7.9.49

FCA PRA

G

Table: yield curve shifts

This table belongs to ■ BIPRU 7.9.47G

Zone	Modified duration	Assumed interest rate change (percentage points)
1	0 ĩ 1 months	1.00
	> 1 ĩ 3 months	1.00
	> 3 ĩ 6 months	1.00
	> 6 ĩ 12 months	1.00
2	> 1.0 ĩ 1.9 years	0.90
	> 1.9 ĩ 2.8 years	0.85
	> 2.8 ĩ 3.6 years	0.85
3	> 3.6 ĩ 4.3 years	0.75
3	> 4.3 ĩ 5.7 years	0.70
	> 5.7 ĩ 7.3 years	0.70
	> 7.3 ĩ 9.3 years	0.70
	> 9.3 ĩ 10.6 years	0.70
	> 10.6 ĩ 12 years	0.70
	> 12.0 ĩ 20 years	0.70
	> 20 years	0.70

7.9.50

FCA PRA

G

Sensitivity figures calculated by a *firm* using an interest rate pre-processing model are usually produced in the format of a net sensitivity by maturity bucket or by discrete gridpoint. These maturity buckets or gridpoints should then be allocated to the 15 bands set out in ■ BIPRU 7.9.49G. The number of maturity buckets or gridpoints used to represent a yield curve can be referred to as granularity. The granularity should always be adequate to capture the material curve risk in the portfolio. Curve risk can be defined as the risk associated with holding long and short *positions* at different points along the yield curve.

7.9.51

FCA PRA

G

Positive and negative amounts placed in each of the different maturity bands in ■ BIPRU 7.9.49G under the sensitivity calculation in ■ BIPRU 7.9.50G should then be netted off to produce one figure for each of the bands. There is no capital requirement for this netting process.

7.9.52

FCA PRA

G

The individual sensitivity figures produced should then be input into the *interest rate duration method* calculation. The individual sensitivity figures for each band should be included with the other *positions* in the appropriate column in the table in ■ BIPRU 7.2.65R (Table: Assumed interest rate change in the interest rate duration method).

7.9.53

FCA PRA

G

Instead of using the approach in ■ BIPRU 7.9.52G a *firm* may use an approach based on the *interest rate maturity method*, making appropriate adjustments to the sensitivity figures.

7.10 Use of a Value at Risk Model

Application

7.10.1 **R** ■ BIPRU 7.10 applies to a *firm* with a *VaR model permission*.

FCA **PRA**

Introduction and purpose

7.10.2 **G** ■ BIPRU 7.10 provides details of when the *appropriate regulator* expects to allow a *firm* to use a *VaR model* (value at risk model) for the purpose of calculating part or all of its *PRR*. It introduces the concept of a *VaR model*, the methodology behind it and the link to the *standard market risk PRR rules*. It then goes on to detail the application and review process. The bulk of ■ BIPRU 7.10 specifies the model standards and risk management standards that *firms* will be required to meet in order to use a *VaR model*. It further stipulates requirements for stress testing, backtesting, capital calculations and finally the reporting standards expected by the *appropriate regulator*.

7.10.3 **G** The models described in ■ BIPRU 7.10 are described as VaR models in order to distinguish them from *CAD 1 models*, which are dealt with in ■ BIPRU 7.9 (Use of a CAD 1 model). A *VaR model* is a risk management model which uses a statistical measure to predict profit and loss movement ranges with a confidence interval. From these results *PRR charges* can be calculated. The standards described in ■ BIPRU 7.10, and which will be applied by the *appropriate regulator*, are based on and implement Annex V of the *Capital Adequacy Directive*.

7.10.4 **G** The aim of the *VaR model approach* is to enable a *firm* with adequate risk management systems to be subject to a *PRR* requirement that is more closely aligned with the risks to which it is subject than the *PRR* requirements generated by the *standard market risk PRR rules*. This provides a *firm* with an incentive to measure market risks as accurately and comprehensively as possible. It is crucial that those responsible for managing *market risk* at a *firm* should be aware of the assumptions and limitations of the *firm's VaR model*.

7.10.5 **G** There are a number of general methodologies for calculating *PRR* using a *firms*. The *appropriate regulator* does not prescribe any one method of computing *VaR measures*. Moreover, it does not wish to discourage any *firm* from developing alternative risk measurement techniques. A *firm* should discuss the use of any alternative techniques used to calculate *PRR* with the *appropriate regulator*.

7.10.6 **G** A *firm* should not use the *VaR model approach* to calculate *PRR* unless it has a *VaR model permission*. If a *firm* does not have such a permission it should use the *standard market risk PRR rules*. Therefore, a *firm* needs to apply for a *VaR model permission* in

order to calculate its *PRR* using a *VaR model* instead of (or in combination with) the *standard market risk PRR rules*.

Conditions for granting a VaR model permission

7.10.7

FCA PRA

G

A *waiver* or other permission allowing the use of models in the calculation of *PRR* will not be granted if that would be contrary to the *Capital Adequacy Directive* and any *VaR model permission* which is granted will only be granted on terms that are compatible with the *Capital Adequacy Directive*. Accordingly, the *appropriate regulator* is likely only to grant a *waiver* or other permission allowing the use of models in the calculation of *PRR* if it is a *VaR model permission* or a *CAD 1 model waiver*.

7.10.8

FCA PRA

G

■ BIPRU 7.10 sets out the minimum standards that the *appropriate regulator* expects *firms* to meet before granting a *VaR model permission*. The *appropriate regulator* will not grant a *VaR model permission* unless it is satisfied that the requirements of ■ BIPRU 7.10 are met and it is satisfied about the procedures in place at a *firm* to calculate the *model PRR*. In particular the *appropriate regulator* will not normally grant a *VaR model permission* unless it is satisfied about the quality of:

- (1) the internal controls and risk management relating to the *VaR model* (see ■ BIPRU 7.10.56G - ■ BIPRU 7.10.82R);
- (2) the *VaR model* standards (see ■ BIPRU 7.10.24R- ■ BIPRU 7.10.55G); and
- (3) stress testing and backtesting procedures relating to a *VaR model* (see, in addition to (2), ■ BIPRU 7.10.83R - ■ BIPRU 7.10.112G).

7.10.9

FCA PRA

G

The *appropriate regulator* recognises that the nature of *VaR models* will vary between *firms*. The scope of and the requirements and conditions set out in a *VaR model permission* may therefore differ in substance or detail from ■ BIPRU 7.10 in order to address individual circumstances adequately. However any differences will only be allowed if they are compliant with the *Capital Adequacy Directive*. A *VaR model permission* will implement any such variation by modifying ■ BIPRU 7.10. A *VaR model permission* may also include additional conditions to meet the particular circumstances of the *firm* or the model.

The VaR model permission application and review process

7.10.10

FCA PRA

G

Details of the general process for applying for a *VaR model permission* are set out in ■ BIPRU 1.3 (Applications for advanced approaches). Because of the complexity of a *VaR model permission*, it is recommended that a *firm* discuss its proposed application with its usual contact at the *appropriate regulator* before it makes the application.

7.10.11

FCA PRA

G

In order for a *VaR model permission* to be granted, the *appropriate regulator* is likely to undertake a review to ensure that it is adequate and appropriate for the *PRR* calculation.

7.10.12

FCA PRA

G

The *VaR model* review process may be conducted through a series of visits covering various aspects of a *firm's* control and IT environment. Before these visits the *appropriate regulator* may ask the *firm* to provide some information relating to the *firm's VaR model permission* request accompanied by some specified background

material. The *VaR model* review visits are organised on a timetable that allows the *firm* being visited sufficient time to arrange the visit and provide the appropriate pre-visit information.

7.10.13

FCA PRA

G

As part of the process for dealing with an application for a *VaR model permission* the following may be reviewed: organisational structure and personnel; details of the *firm's* market position in the relevant products; revenue and risk information; valuation and reserving policies; operational controls; information technology systems; model release and control procedures; risk management and control framework; risk appetite and limit structure; future developments relevant to model recognition.

7.10.14

FCA PRA

G

A visit will usually involve the *appropriate regulator* wishing to meet *senior management* and staff from the front office, financial control, risk management, operations, systems development, information technology and internal audit areas.

7.10.15

FCA PRA

G

The *appropriate regulator* may complement its own review of a *VaR model permission* request with one or more reviews by a *skilled person* under section 166 of the *Act* (Reports by skilled persons). Such a review may also be used where a *VaR model permission* has been granted to ensure that the requirements ■ BIPRU 7.10 and of the *VaR model permission* continue to be met.

Conditions for a VaR model outside the United Kingdom

7.10.16

FCA PRA

G

Where a *VaR model* used outside the *United Kingdom* differs from that used in the *United Kingdom* the *appropriate regulator* may request details of the reasons for using different models.

7.10.17

FCA PRA

G

Where a *firm* operates any part of its *VaR model* outside the *United Kingdom*, the *appropriate regulator* may take into account the results of the home supervisor's review of that model. The *appropriate regulator* may wish to receive information directly from the home supervisor.

Scope of VaR models

7.10.18

FCA PRA

R

A *firm* must use the *VaR model approach* to calculate the *PRR* for a *position*:

- (1) to the extent that the risks in relation to that *position* are within the scope of the *VaR model permission* (see ■ BIPRU 7.10.136R (Link to standard *PRR* rules: Incorporation of the model output into the capital calculation)); and
- (2) if the *position* is of a type that comes within the scope of the *VaR model permission*.

7.10.19

FCA PRA

G

In accordance with ■ BIPRU 7.10.18R (1) a *VaR model permission* will set out the risk categories that it covers, which are expected to be one or more of the following types:

- (1) interest rate *general market risk*;

- (2) interest rate *specific risk* (in conjunction with interest rate *general market risk*);
- (3) *equity general market risk*;
- (4) *equity specific risk* (in conjunction with *equity general market risk*);
- (5) *CIU risk*;
- (6) *foreign currency risk*; and
- (7) *commodity risk*.

7.10.20

FCA PRA

G

A *VaR model permission* will generally set out the broad classes of *position* within its scope. It may also specify how individual products within one of those broad classes may be brought into or taken out of the scope of the *VaR model permission*.

7.10.21

FCA PRA

G

The broad classes of *position* referred to in ■ BIPRU 7.10.20G are as follows:

- (1) linear products, which comprise *securities* with linear pay-offs (e.g. bonds and *equities*) and *derivative* products which have linear pay-offs in the underlying risk factor (e.g. interest rate *swaps*, *FRAs*, total return *swaps*);
- (2) European, American and Bermudan put and call *options* (including caps, floors and swaptions) and *investments* with these features (see ■ BIPRU 7.6.18R (Table: Option PRR: methods for different types of option) for an explanation of some of these terms);
- (3) Asian *options*, digital *options*, single barrier *options*, double barrier *options*, lookback *options*, forward starting *options*, compound *options* and *investments* with these features (see ■ BIPRU 7.6.18R for an explanation of some of these terms); and
- (4) all other *option* based products (e.g. basket *options*, quantos, outperformance *options*, timing *options*) and *investments* with these features (see ■ BIPRU 7.6.18R for an explanation of some of these terms).

7.10.22

FCA PRA

G

The categorisation described in ■ BIPRU 7.10.21G may be amended or replaced in the case of a particular *firm's VaR model permission*.

7.10.23

FCA PRA

G

It is the *appropriate regulator's* view that, where a *firm* uses a *VaR model* for one risk category as described in ■ BIPRU 7.10.19G, it is good practice to extend its model over time to calculate all of its *PRR* risk categories. A *firm* will typically be expected to have a realistic plan in place to do this.

Model standards: General

7.10.24

FCA PRA

R

A *firm* must comply with the minimum standards set out in ■ BIPRU 7.10.26R - ■ BIPRU 7.10.53R in calculating the *model PRR*.

7.10.25

FCA PRA

G

The *appropriate regulator* accepts that the scope and nature of *VaR models* varies across *firms*. This means that different *firms* are likely to calculate different estimates of *market risk* for the same portfolio. Systematic differences are due to length of data series, choice of methodology (historical or Monte Carlo simulation or variance-covariance method or a hybrid of these), differences in aggregating risks within and across broad risk factors, the treatment of *options* and other non-linear products and the specification of risk factors.

Model standards: Frequency of calculations and confidence level

7.10.26

FCA PRA

R

The *model PRR* must be computed at least once every *business day*, using a 99% one-tailed confidence limit.

7.10.27

FCA PRA

G

A *firm* may meet the requirement in ■ BIPRU 7.10.26R by using different model parameters and employing a suitable adjustment mechanism to produce a figure which is equivalent to the figure produced using the parameters set out in ■ BIPRU 7.10.26R. For example, a *firm's* model may use a 95% one-tailed confidence limit if the *firm* has a mechanism to convert the output of the model to reflect a 99% one-tailed confidence limit.

7.10.27A

FCA PRA

R

Stressed VaR must be calculated at least weekly, using a 99% one-tailed confidence limit.

Model standards: Holding period

7.10.28

FCA PRA

R

In calculating the *VaR number*, a *firm* must either use a ten *business day* holding period, or use a holding period converted to a ten *business day* holding period. However if the *firm's VaR model permission* specifies that the *firm* must use a specific method, the *firm* must do so.

7.10.29

FCA PRA

G

If a *firm* uses a holding period other than 10 *business days* and converts the resulting *VaR measure* to a ten *business day* equivalent measure, it should be able to justify the choice of conversion technique. For example, the square root of time method will usually be justifiable. The *appropriate regulator* considers it good practice ultimately to move towards the application of an actual ten *business day* holding period, rather than using different holding periods.

Model standards: Observation period

7.10.30

FCA PRA

R

Subject to ■ BIPRU 7.10.31R, the calculation of *VaR numbers* must be based on an effective historical observation period that is the longest possible consistent with a prudent *VaR number*. That period must be at least one year or such longer period as may be set out in the *firm's VaR model permission*. However if using that prescribed observation period does not result in a sufficiently prudent way of calculating a *VaR measure* or a component of a *VaR measure* the *firm* must shorten this observation period until the observation period is consistent with a prudent *VaR number*.

7.10.30A

FCA PRA

R

The *stressed VaR* measure must be based on inputs calibrated to historical data from a continuous twelve-month period of significant financial stress relevant to the *firm's* portfolio. The choice of that historical period will be subject to the *appropriate regulator's* approval and will form part of a *firm's VaR model permission*.

7.10.30B
FCA PRA

R

A *firm* must review the selection of the *stressed VaR* historical observation period at least annually.

Model standards: Data series

7.10.31
FCA PRA

R

A *firm* must ensure that the data series used by its *VaR model* is reliable. Where a reliable data series is not available, proxies or any other reasonable value-at-risk measurement technique must be used. A *firm* must be able to demonstrate that the technique is appropriate and does not materially understate the modelled risks.

7.10.32
FCA PRA

G

A data series is unreliable if it has, for example, missing data points, or data points which contain stale data. Reliable data series may be difficult to obtain for new products (for example an instrument of longer dated tenor that did not previously trade) and for less liquid risk factors or *positions*. With regard to less liquid risk factors or *positions*, a *firm* may use a combination of prudent valuation techniques and alternative *VaR* estimation techniques to ensure there is a sufficient cushion against risk over the close out period which takes account of the illiquidity of the risk factor or *position*.

7.10.33
FCA PRA

R

- (1) If a weighting scheme or other similar method is used to calculate *VaR numbers*, then the effective observation period must be at least one year. Where a weighting scheme is used, the weighted average time lag of the individual observations must not be less than six *Months*.
- (2) If a specific observation period or weighted average time lag is specified in a *firm's VaR model permission*, the *firm* must comply with that if it is longer than the period specified in (1).
- (3) However, if a weighting scheme in (1) or (2) would result in imprudent *VaR numbers* then the weighting scheme must be adjusted so that it is consistent with a prudent *VaR number*.

7.10.34
FCA PRA

R

A *firm* must update data sets in accordance with the frequency set out in its *VaR model permission*. If volatility in market prices or rates necessitates more frequent updating in order to ensure a prudent calculation of the *VaR measure* the *firm* must do so.

7.10.35
FCA PRA

G

The minimum updating frequency for the current *VaR measure* that can be specified in a *VaR model permission* is monthly.

Model standards: Aggregation across risk categories

7.10.36
FCA PRA

R

The process for determining and implementing correlations within and across risk categories must be sound, implemented with integrity and consistent with the terms of the *firm's VaR model permission*.

7.10.37
FCA PRA

R

In aggregating *VaR measures* across risk or product categories, a *firm* must not use the square root of the sum of the squares approach unless the assumption of zero correlation between these categories is empirically justified. If correlations between risk categories are not empirically

justified, the *VaR measures* for each category must simply be added in order to determine its aggregate *VaR measure*. But to the extent that a *firm's VaR model permission* provides for a different way of aggregating *VaR measures*:

- (1) that method applies instead of this *rule*; and
- (2) if the correlations between risk categories used for that purpose cease to be empirically justified then the *firm* must notify the *appropriate regulator* at once.

Model standards: Risk factors: Introduction

7.10.38

FCA PRA

G

Subject to ■ BIPRU 7.10.53R (Model standards: Materiality), a *VaR model* should capture and accurately reflect all material risks arising on the underlying portfolio on a continuing basis insofar as those risks are within the scope of the *VaR model permission*. This should encompass *general market risk* and, to the extent that this comes within the scope of the *VaR model permission*, *specific risk*. A *firm* should ensure that the *VaR model* has sufficient risk factor granularity to be able to capture all such material risks and that these are properly documented and specified.

Model standards: Risk factors: General

7.10.39

FCA PRA

R

In the case of *general market risk* and risks with respect to which the *standard market risk PRR rules* do not distinguish between *general market risk* and *specific risk*, a *firm's VaR model* must capture a sufficient number of risk factors in relation to the level of activity of the *firm* and in particular the risks set out in ■ BIPRU 7.10.40R - ■ BIPRU 7.10.44R.

7.10.39A

FCA PRA

R

A *firm* must incorporate risk factors that are included in its pricing model in its *VaR model*. A *firm's VaR model* must capture nonlinearities for *options* and other products, as well as correlation risk and *basis risk*. Where proxies for risk factors are used they must show a good track record for the actual *position* held. In addition, ■ BIPRU 7.10.40 R to ■ BIPRU 7.10.44 R apply for individual risk types.

7.10.39B

FCA PRA

R

A *firm* with a *VaR model permission* must justify to the *appropriate regulator* any omissions of risk factors from its *VaR model*, if they are included in its pricing model.

7.10.40

FCA PRA

R

For interest rate risk, a *VaR model* must incorporate a set of risk factors corresponding to the interest rate curves in each currency in which the *firm* has interest rate sensitive *positions*. A *firm* must ensure that it captures the variations of volatility of rates along the yield curve. In order to achieve this, a *firm* must divide the yield curves of, at a minimum, the major currencies and markets in which it has material interest rate exposures into a minimum of six maturity segments. The *VaR model* must also capture the risk of less than perfectly correlated movements between different yield curves.

- 7.10.41** **R** For *equity* risk, a *VaR model* must use a separate risk factor at least for each of the *equity* markets in which the *firm* has material *positions*.
FCA **PRA**
- 7.10.42** **R** For *foreign currency* risk, a *VaR model* must incorporate risk factors corresponding to the individual *foreign currencies*, including gold, in which the *firm's positions* are denominated.
FCA **PRA**
- 7.10.43** **R** For *commodity* risk, the *VaR model* must use a separate risk factor at least for each *commodity* in which the *firm* has material *positions*. The *VaR model* must also capture the risk of less than perfectly correlated movements between similar, but not identical, *commodities* and the exposure to changes in forward prices arising from maturity mismatches. It must also take account of market characteristics, notably delivery dates and the scope provided to traders to close out positions.
FCA **PRA**
- 7.10.44** **R**
- (1) For *CIUs* the actual *foreign currency positions* of the *CIU* must be taken into account.
 - (2) A *firm* may rely on third party reporting of the *foreign currency position* of the *CIU*, where the correctness of this report is adequately ensured.
 - (3) If a *firm* is not aware of the *foreign currency positions* in a *CIU*, this *position* must be carved out and treated in **■ BIPRU 7.5.18R** (Derivation of notional *positions* in *CIUs* for the *foreign currency PRR*).
- 7.10.45** **G**
- (1) This paragraph contains *guidance* on the inclusion of *CIUs* in a *VaR model*.
 - (2) The *appropriate regulator* may allow all types of *CIU* to be included within the scope of a *firm's VaR model permission*.
 - (3) **■ BIPRU 7.10** does not distinguish between *specific risk* and *general market risk* for *positions* in *CIUs*. Therefore even if *specific risk* is not otherwise included within the scope of a *firm's VaR model permission*, a *firm* should be able to demonstrate that its *VaR model* captures *specific risk*.
 - (4) A *firm* should also be able to demonstrate that its *VaR model* adequately captures correlations, concentration risk and risks associated with the illiquidity of the *CIU* itself should this be deemed necessary (see **■ BIPRU 7.10.32G**).
 - (5) A *firm* may use a look-through approach, under which the *VaR model* estimates are based on the underlying *positions*. If a *firm* uses a look through approach it should also ensure that all the relevant risk factors relating to the underlying *positions* are captured. **■ BIPRU 7.7** (Position risk requirements for collective investment undertakings) sets out *rules* relating to the look through approach when a *firm* is using the *VaR model approach*.

Model standards: Risk factors: Specific risk

7.10.46

R

FCA PRA

- (1) If a *firm's VaR model* covers the calculation of *PRR* with respect to *specific risk* the *firm* must meet the *VaR specific risk minimum requirements* in addition to the other requirements of ■ BIPRU 7.10.
- (2) The *VaR model* must explain the historical price variation in the portfolios concerned.
- (3) The *VaR model* must capture concentration in terms of magnitude and changes of composition of the portfolios concerned.
- (4) The *VaR model* must be robust to an adverse environment.
- (5) The *VaR model* must capture name-related basis risk. That is the *firm* must be able to demonstrate that the *VaR model* is sensitive to material idiosyncratic differences between similar but not identical *positions*.
- (6) The *VaR model* must capture event risk.
- (7) In addition to the other requirements in ■ BIPRU 7.10, a *firm* must have an approach in place to capture, in the calculation of its capital requirements, the *incremental risk charge* of its *trading book positions* that is incremental to the default and migration risk captured by the *VaR measures*, as specified in ■ BIPRU 7.10.55A R to ■ BIPRU 7.10.55S G and ■ BIPRU 7.10.107R (Backtesting: Specific risk backtesting).
- (8) [deleted]

7.10.47

G

FCA PRA

This paragraph provides *guidance* on ■ BIPRU 7.10.46R (3). Take as an example a *VaR model* based on a factor model or on a historical simulation model. The ability of the model to explain price variation could be demonstrated by a statistical comparison over the same period of time between actual price changes on the portfolio and the profit and loss impact of risk factors included within the model. A *firm* may wish to include an estimate of residual variation not explained by the model.

7.10.48

R

FCA PRA

- (1) [deleted]
- (2) A *firm's VaR model* must conservatively assess the risk arising from less liquid *positions* and *positions* with limited price transparency under realistic market scenarios. In addition, the *VaR model* must meet minimum data standards. Proxies must be appropriately conservative and may be used only where available data is insufficient or is not reflective of the true volatility of a *position* or portfolio.

7.10.49

R

FCA PRA

As techniques and best practices evolve, a *firm* must avail itself of these advances.

7.10.50 **R** [deleted]

7.10.51 **R** [deleted]

7.10.52 **R** [deleted]

Model standards: Materiality

7.10.53 **R**
FCA PRA A *firm's VaR model* must capture accurately all material price risks for *positions* within the scope of its *VaR permission*, including risks relating to *options* or *option-like positions*. The *firm* must ensure that, if its *VaR model* does not accurately capture any material risk, the *firm* has *capital resources* adequate to cover that risk. These capital resources must be additional to those required to meet its *capital resources requirement*.

7.10.54 **G**
FCA PRA For example, **■** BIPRU 7.10.53R might involve creating and documenting a prudent incremental *PRR charge* for the risk not captured in the *VaR model* and holding sufficient *capital resources* against this risk. In that case the *firm* should hold *capital resources* at least equal to its *capital resources requirement* as increased by adding this incremental charge to the *model PRR*. Alternatively the *firm* may make valuation adjustments through its profit and loss reserves to cover this material risk. These reserves should be transparent to *senior management* and auditable. The reserves should also be consistent with **■** GENPRU 1.3 (Valuation) while not being excessive in relation to the principles of mark-to-market accounting. Therefore, a *firm* should be able to satisfy the *appropriate regulator* that all material risks are adequately addressed, whether this be through the *VaR model*, through taking an incremental *PRR charge* or through making an adjustment through profit and loss reserves.

7.10.55 **G**
FCA PRA A *firm* is expected ultimately to move towards full revaluation of *option* positions. For portfolios containing path dependent *options*, an instantaneous price shock applied to a static portfolio will be acceptable provided that the risks not captured by such an approach are not material. Where a risk is immaterial and does not justify further *capital resources*, that immaterial risk should still be documented.

Incremental risk charge: Scope and parameters

7.10.55A **R**
FCA PRA A *firm* must demonstrate that its *incremental risk charge* meets soundness standards comparable to those under the *IRB approach*, assuming a constant level of risk and adjusted, where appropriate, to reflect the impact of liquidity, concentrations, hedging and optionality.

7.10.55B **R**
FCA PRA The *incremental risk charge* must cover all *positions* which are subject to a capital charge for interest-rate *specific risk* in accordance with the *firm's VaR model permission*, except *securitisation positions* and *nth-to-default credit derivatives*. Where permitted by its *VaR model permission*, a *firm* may choose consistently to include all listed *equity positions* and *derivatives positions* based on listed *equities* for which that inclusion is consistent with how the *firm* internally measures and manages risk, but the approach must reflect the impact of correlations between default and migration events, and it must not reflect the impact of diversification between default and migration events and other market risk factors.

7.10.55C **R** The *firm's* approach to capture the *incremental risk charge* must measure losses due to default and internal or external ratings migration at the 99.9% confidence interval over a capital horizon of one year.

7.10.55D **R** The *firm's* correlation assumptions must be supported by the analysis of objective data in a conceptually sound framework. The approach to capture the *incremental risk charge* must appropriately reflect *issuer* concentrations. Concentrations that can arise within and across product classes under stressed conditions must also be reflected.

7.10.55E **R** The *firm's* approach must be based on the assumption of a constant level of risk over the one-year capital horizon, implying that given individual *trading book positions* or sets of *positions* that have experienced default or migration over their liquidity horizon are re-balanced at the end of their liquidity horizon to attain the initial level of risk. Alternatively, a *firm* may choose consistently to use a one-year constant *position* assumption.

Incremental risk charge: Liquidity horizons

7.10.55F **R** (1) The *firm's* liquidity horizons for calculating *incremental risk charge* must be set according to the time required to sell the *position* or to hedge all material and relevant price risks in a stressed market, having particular regard to the size of the *position*.

(2) Liquidity horizons must reflect actual practice and experience during periods of both systematic and idiosyncratic stresses. The liquidity horizon must be measured under conservative assumptions and must be sufficiently long that the act of selling or hedging, in itself, would not materially affect the price at which the selling or hedging would be executed.

7.10.55G **R** The determination of the appropriate liquidity horizon for a *position* or set of *positions* is subject to a floor of three months. The determination of the appropriate liquidity horizon for a *position* or set of *positions* must take into account a *firm's* internal policies relating to valuation adjustments and the management of stale *positions*.

7.10.55H **R** When a *firm* determines liquidity horizons for sets of *positions* rather than for individual *positions*, the criteria for defining sets of *positions* must be defined in a way that meaningfully reflects differences in liquidity. The liquidity horizons must be greater for *positions* that are concentrated, reflecting the longer period needed to liquidate those *positions*.

7.10.55I **R** The liquidity horizon for a *securitisation* warehouse must reflect the time to build, sell and securitise the assets, or to hedge the material risk factors, under stressed market conditions.

Incremental risk charge: Hedges

7.10.55J

FCA PRA

R

- (1) Hedges may be incorporated into the calculation of a *firm's incremental risk charge*. *Positions* may be netted only when long and short *positions* refer to the same financial instrument.
- (2) Hedging or diversification effects associated with long and short *positions* involving different instruments or different securities of the same obligor, as well as long and short *positions* in different *issuers*, may only be recognised by explicitly modelling gross long and short *positions* in the different instruments.
- (3) A *firm* must reflect the impact of material risks that could occur during the interval between the hedge's maturity and the liquidity horizon, as well as the potential for significant basis risks in hedging strategies by product, seniority in the capital structure, internal or external rating, maturity, vintage and other differences in the instruments. A *firm* must reflect a hedge only to the extent that it can be maintained even as the obligor approaches a credit or other event.

7.10.55K

FCA PRA

R

For *trading book positions* that are hedged via dynamic hedging strategies, a rebalancing of the hedge within the liquidity horizon of the hedged position may be recognised only if the *firm*:

- (1) chooses to model rebalancing of the hedge consistently over the relevant set of *trading book positions*;
- (2) demonstrates that the inclusion of rebalancing results in a better risk measurement;
- (3) demonstrates that the markets for the instruments serving as hedges are liquid enough to allow for this rebalancing even during periods of stress; and
- (4) reflects in the capital charge any residual risks resulting from dynamic hedging strategies.

Incremental risk charge: Nonlinear positions and model risk

7.10.55L

FCA PRA

R

- (1) The *incremental risk charge* must reflect the nonlinear impact of *options*, structured credit derivatives and other *positions* with material nonlinear behaviour with respect to price changes.
- (2) The *firm* must also consider the amount of model risk inherent in the valuation and estimation of price risks associated with those products.

7.10.55M

FCA PRA

R

The *incremental risk charge* must be based on objective and up-to-date data.

Incremental risk charge: Validation

7.10.55N

R

FCA PRA

A *firm* must validate its approach to *incremental risk charge*. In particular, a *firm* must:

- (1) validate that its modelling approach for correlations and price changes is appropriate for its portfolio, including the choice and weights of its systematic risk factors;
- (2) perform a variety of stress tests (not limited to the range of events experienced historically), including sensitivity analysis and scenario analysis, to assess the qualitative and quantitative reasonableness of the approach, with particular regard to the treatment of concentrations; and
- (3) apply appropriate quantitative validation including relevant internal modelling benchmarks.

7.10.55O

R

FCA PRA

A *firm's* approach for *incremental risk charge* must be consistent with the *firm's* internal risk management methodologies for identifying, measuring, and managing trading risks.

Incremental risk charge: Documentation and frequency of calculation

7.10.55P

R

FCA PRA

A *firm* must document its approach for the *incremental risk charge* clearly, setting out its correlation and other modelling assumptions.

7.10.55Q

R

FCA PRA

A *firm* must calculate its *incremental risk charge* at least weekly.

Incremental risk charge: Internal approaches based on different parameters

7.10.55R

R

FCA PRA

A *firm* may use an approach for *incremental risk charge* that does not comply with all the requirements in ■ BIPRU 7.10.55A R to ■ BIPRU 7.10.55P R, only if:

- (1) such an approach is consistent with the *firm's* internal methodologies for identifying, measuring, and managing risks; and
- (2) the *firm* can demonstrate that its approach results in a capital requirement that is at least as high as it would be if based on an approach in full compliance with the requirements in ■ BIPRU 7.10.55A R to ■ BIPRU 7.10.55P R.

7.10.55S

G

FCA PRA

The *appropriate regulator* will review at least annually any approach taken by the *firm* under ■ BIPRU 7.10.55R R.

All price risk measure: General requirements

7.10.55T

R

FCA PRA

As part of its *VaR model permission*, the *appropriate regulator* may authorise a *firm* to use the *all price risk measure* to calculate an additional

capital charge in relation to *positions* in its *correlation trading portfolio* if it meets the following minimum standards:

- (1) it adequately captures all price risks at a 99.9% confidence interval over a capital horizon of one year under the assumption of a constant level of risk, and adjusted, where appropriate, to reflect the impact of liquidity, concentrations, hedging and optionality;
- (2) it adequately captures the following risks:
 - (a) the cumulative risk arising from multiple defaults, including the ordering of defaults, in *tranche* products;
 - (b) credit *spread risk*, including the gamma and cross-gamma effects;
 - (c) volatility of implied correlations, including the cross effect between spreads and correlations;
 - (d) *basis risk*, including both:
 - (i) the basis between the spread of an index and those of its constituent single names; and
 - (ii) the basis between the implied correlation of an index and that of bespoke portfolios;
 - (e) recovery-rate volatility, as it relates to the propensity for recovery rates to affect *tranche* prices; and
 - (f) to the extent that the *all price risk measure* incorporates benefits from dynamic hedging, the risk of hedge slippage and the potential costs of rebalancing those hedges.

7.10.55U **R**
FCA PRA

The amount of the capital charge for the *correlation trading portfolio* calculated in accordance with the *all price risk measure* must not be less than 8% of the capital charge that would result from applying ■ BIPRU 7.2.48L **R** to all *positions* in the *correlation trading portfolio* subject to the *all price risk measure*.

7.10.55V **R**
FCA PRA

A *firm* may include in its *all price risk measure positions* that are jointly managed with *positions* in the *correlation trading portfolio* and would otherwise be included in the *incremental risk charge*. In that case, the *firm* must exclude these *positions* from the calculation of its *incremental risk charge*.

7.10.55W **R**
FCA PRA

A *firm* must have sufficient market data to ensure that it fully captures the salient risks of the *positions* in its *all price risk measure* in accordance with the standards set out in ■ BIPRU 7.10.55T **R**.

7.10.55X **R**
FCA PRA A *firm* must demonstrate through backtesting or other appropriate means that its *all price risk measure* can appropriately explain the historical price variation of these *positions*. A *firm* must be able to demonstrate to the *appropriate regulator* that it can identify the *positions* within its *correlation trading portfolio*, in relation to which it is authorised to use the *all price risk measure*, separately from those other *positions* in relation to which it is not authorised to do so.

7.10.55Y **R**
FCA PRA A *firm* must calculate the capital charge under the *all price risk measure* at least weekly.

All price risk measure: Stress testing

7.10.55Z **R**
FCA PRA (1) For *positions* within its *correlation trading portfolio* in relation to which a *firm* may use the *all price risk measure*, a *firm* must regularly apply a set of specific, predetermined stress scenarios. These stress scenarios must examine the effects of stress to default rates, recovery rates, credit spreads, and correlations on the profit and loss of the *correlation trading portfolio*.

(2) A *firm* must apply the stress scenarios in (1) at least weekly and report the results to the *appropriate regulator* in accordance with
 ■ BIPRU 7.10.129 R.

7.10.55ZA **R**
FCA PRA If the results of the stress tests carried out in accordance with
 ■ BIPRU 7.10.55Z R indicate a material shortfall in the amount of capital required under the *all price risk measure*, a *firm* must notify the *appropriate regulator* of this circumstance by no later than two *business days* after the *business day* on which the material shortfall occurred.

7.10.55ZB **G**
FCA PRA The *appropriate regulator* may use its powers under section 55J (Variation etc. on the Authority's own initiative) of the *Act* to impose on the *firm* a capital add-on to cover the material shortfall reported under ■ BIPRU 7.10.55ZA R.

7.10.55ZC **G**
FCA PRA The *all price risk measure* is based on the *incremental risk charge*. Therefore, when applying the *all price risk measure*, a *firm* should have regard to the requirements in
 ■ BIPRU 7.10.55A R to ■ BIPRU 7.10.55R R.

Risk management standards: Introduction

7.10.56 **G**
FCA PRA A *firm* with a complex portfolio is expected to demonstrate greater sophistication in its modelling and risk management than a *firm* with a simple portfolio. For example, a *firm* will be expected to consider, where necessary, varying degrees of liquidity for different risk factors, the complexity of risk modelling across time zones, product categories and risk factors. Some trade-off is permissible between the sophistication and accuracy of the model and the conservatism of underlying assumptions or simplifications.

7.10.57 **G**
FCA PRA A *firm* should be able to demonstrate that it meets the risk management standards set out in the *VaR model permission* on a legal entity basis. This is particularly important for a *subsidiary undertaking* in a *group* subject to matrix management where the business lines cut across legal entity boundaries.

Risk management standards: General requirement

7.10.58

FCA PRA

R

A *firm* must have a conceptually sound risk management system surrounding the use of its *VaR model* that is implemented with integrity and that in particular meet the qualitative standards set out in ■ BIPRU 7.10.59R - ■ BIPRU 7.10.82R.

Risk management standards: Use requirement

7.10.59

FCA PRA

R

A *firm* must base its *model PRR* calculation on the output of the *VaR model* which is used for its internal risk management rather than one developed specifically to calculate its *PRR*.

7.10.60

FCA PRA

R

The *VaR model* must be fully integrated into the daily risk management process of the *firm*, and serve as the basis for reporting risk exposures to *senior management* of the *firm*.

7.10.61

FCA PRA

G

A *firm's VaR model* output should be an integral part of the process of planning, monitoring and controlling a *firm's market risk* profile. The *VaR model* should be used in conjunction with internal trading and exposure limits. The links between these limits and the *VaR model* should be consistent over time and understood by *senior management*. The *firm* should regard risk control as an essential aspect of the business to which significant resources need to be devoted.

Risk management standards: Risk control unit

7.10.62

FCA PRA

R

A *firm* must have a risk control unit which is independent from business trading units and which reports directly to *senior management*. It:

- (1) must be responsible for designing and implementing the *firm's* risk management system;
- (2) must produce and analyse daily reports on the output of the *VaR model* and on the appropriate measures to be taken in terms of the trading limits; and
- (3) conduct the initial and on-going validation of the *VaR model*.

Risk management standards: Senior management

7.10.63

FCA PRA

R

A *firm's governing body* and *senior management* must be actively involved in the risk control process, and the daily reports produced by the risk control unit must be reviewed by a level of management with sufficient authority to enforce both reductions of *positions* taken by individual traders as well as in the *firm's* overall risk exposure.

7.10.64

FCA PRA

G

It is the responsibility of a *firm's* own management to ensure the accuracy and integrity of its *VaR model*. This responsibility includes obtaining appropriate independent validation of the *VaR model*.

7.10.65

FCA PRA

R

Risk management standards: Skilled staff

A *firm* must have sufficient numbers of staff skilled in the use of sophisticated models in the trading, risk control, audit and back office areas.

7.10.66

FCA PRA

R

Risk management standards: Controls and compliance

A *firm* must establish, document and maintain policies, controls and procedures to an auditable standard:

- (1) concerning the operation of its *VaR model approach*; and
- (2) for monitoring and ensuring compliance with the policies, controls and procedures in (1).

7.10.67

FCA PRA

R

Risk management standards: Documentation

A *VaR model* must be adequately documented.

7.10.68

FCA PRA

G

- (1) An example of documents required by ■ BIPRU 7.10.67R may be a manual that describes the basic principles of the risk management framework, clearly setting out empirical techniques, principles and assumptions used within it.
- (2) This documentation should be of sufficient detail for the *appropriate regulator* to be able to develop a clear understanding of how the *VaR model* works from that documentation on its own.

7.10.69

FCA PRA

R

Risk management standards: Track record

A *firm's VaR model* must have a proven track record of acceptable accuracy in measuring risk.

7.10.70

FCA PRA

R

Risk management standards: Development validation

Adequate procedures must be in place to ensure that model changes are validated before being introduced.

7.10.71

FCA PRA

G

The procedures in ■ BIPRU 7.10.70R need not necessarily rely on backtesting using a back-run of recreated data.

7.10.72

FCA PRA

R

Risk management standards: Stress testing

- (1) A *firm* must frequently conduct a rigorous programme of stress testing. The results of these tests must be reviewed by *senior management* and reflected in the policies and limits the *firm* sets.
- (2) The programme must particularly address:
 - (a) concentration risk;
 - (b) illiquidity of markets in stressed market conditions;
 - (c) one way markets;

- (d) event and jump to default risks;
- (e) non linearity of products;
- (f) deep out of the money *positions*;
- (g) *positions* subject to the gapping of prices;
- (h) full revaluation, or a reliable approximation, of *positions*;
- (i) instant shocks as well as effects of longer term periods of stress;
- (j) calibration changes under stressed conditions;
- (k) secondary risk factors (such as volatility);
- (l) basis risk;
- (m) systemic and localised stresses; and
- (n) other risks that may not be captured appropriately in the *VaR model* (for example, recovery rate uncertainty, implied correlations and skew risk).

- (3) The shocks applied must reflect the nature of the portfolios and the time it could take to hedge out or manage risks under severe market conditions.

7.10.73

FCA PRA

G

The stress testing under ■ BIPRU 7.10.72R should be taken into account under the *overall Pillar 2 rule*.

7.10.73A

FCA PRA

G

The *firm's* stress testing programme should be comprehensive in terms of both risk and *firm* coverage, and appropriate to the size and complexity of *trading book positions* held.

Risk management standards: Valuation

7.10.74

FCA PRA

R

A *firm* must have procedures to ensure that the valuation of assets and liabilities is appropriate, that valuation uncertainty is identified and appropriate reserving is undertaken where necessary.

Risk management standards: Risk review

7.10.75

FCA PRA

R

At least once a year, a *firm* must conduct, as part of its regular internal audit process, a review of its risk management process. This review must include both the activities of the business trading units and of the independent risk control unit, and must be undertaken by suitably qualified staff independent of the areas being reviewed. This review must consider, at a minimum:

- (1) the adequacy of the documentation of the risk management system and process;

- (2) the organisation of the risk control unit;
- (3) the integration of *market risk* measures into daily risk management;
- (4) the integrity of the management information system;
- (5) the process for approving risk pricing models and valuation systems used in front and back offices;
- (6) the validation of any significant changes in the risk management process;
- (7) the scope of risks and products captured by the *VaR model*;
- (8) the accuracy and completeness of *position* data;
- (9) the process used to ensure the consistency, timeliness, independence and reliability of data sources (including the independence of such data sources);
- (10) the accuracy and appropriateness of volatility and correlation assumptions;
- (11) reserving policies and the accuracy of the valuation procedures and risk sensitivity calculations;
- (12) the process employed to evaluate the *VaR model's* accuracy, including the programme of backtesting;
- (13) the controls surrounding the development of the *VaR model*; and
- (14) the process employed to produce the calculation of the *model PRR*.

Risk management standards: Validation and backtesting

7.10.76

FCA PRA

G

The *appropriate regulator* will require a period of initial monitoring or live testing before a *VaR model* can be recognised. This will be agreed on a *firm by firm* basis.

7.10.77

FCA PRA

G

In assessing the *firm's VaR model* and risk management, the *appropriate regulator* has regard to the results of internal model validation procedures used by the *firm* to assess the *VaR model*.

7.10.78

FCA PRA

R

A *firm* must have processes in place to ensure that its *VaR model* has been adequately validated by suitably qualified parties independent of the development process to ensure that it is conceptually sound and adequately captures all material risks. This validation must be conducted when the *VaR model* is initially developed and when any significant changes are made to the *VaR model*. The validation must also be conducted on a periodic basis but especially where there have been any significant structural

changes in the market or changes to the composition of the portfolio which might lead to the *VaR model* no longer being adequate. As techniques and best practices evolve, a *firm* must avail itself of these advances. Model validation must not be limited to backtesting, but must, at a minimum, also include the following:

- (1) tests to demonstrate that any assumptions made within the *VaR model* are appropriate and do not underestimate or overestimate the risk (including testing of the validity of the assumptions and approximations underlying the *VaR model*);
- (2) in addition to the regulatory backtesting programmes, a *firm* must carry out its own model validation tests in relation to the risks and structures of its portfolios, such as statistical validation techniques and other methods of measuring performance and validity;
- (3) the use of hypothetical portfolios to ensure that the *VaR model* is able to account for particular structural features that may arise, for example material basis risks and concentration risk; and
- (4) investigation of the limitations of the *VaR model* including testing of the accuracy of parts of the *VaR model* as well as of the whole.

7.10.79

FCA PRA

G

- (1) In addition to regulatory backtesting programs, testing for model validation should be carried out using additional tests which may include for example:
 - (a) testing carried out using hypothetical changes in portfolio value that would occur were end of day positions to remain unchanged;
 - (b) testing carried out for longer periods than required for the regular backtesting programme (for example, 3 years);
 - (c) testing carried out using confidence intervals other than the 99 percent interval required under the quantitative requirements in ■ BIPRU 7.10; and
 - (d) testing of parts of portfolios.
- (2) A longer time period generally improves the power of backtesting. However a longer time period may not be desirable if the *VaR model* or market conditions have changed to the extent that historical data is no longer relevant.

7.10.80

FCA PRA

G

Further material on backtesting can be found in ■ BIPRU 7.10.91G - ■ BIPRU 7.10.112G.

7.10.81

FCA PRA

G

Risk management standards: Information technology

In assessing whether the *VaR model* is implemented with integrity as described in ■ BIPRU 7.10.58R (Stress testing), the *appropriate regulator* will consider in particular

the information technology systems used to run the model and associated calculations. The assessment may include:

- (1) feeder systems; risk aggregation systems; time series databases; the *VaR model* system; stress testing system; the backtesting system including profit and loss cleaning systems where appropriate; data quality; reconciliations and checks on completeness of capture;
- (2) system development, change control and documentation; security and audit trails; system availability and contingency procedures; network adequacy; and
- (3) operational statistics relating to the *VaR model* production process, including, for example, statistics relating to timeliness, number of re-runs required and the reliability of data feeds.

Risk management standards: Controls

7.10.82

FCA PRA

R

A *firm* must ensure that it has adequate controls relating to:

- (1) the derivation of the *model PRR*;
- (2) the integrity of the backtesting programme, including the calculation of the profit and loss account;
- (3) the integrity and appropriateness of the *VaR model*, including the *VaR model's* geographic coverage and the completeness of data sources;
- (4) the *VaR model's* initial and ongoing development, including independent validation;
- (5) the valuation models, including independent validation; and
- (6) the adequacy, security and integrity of the information technology infrastructure.

Stress testing

7.10.83

FCA PRA

R

■ BIPRU 7.10.84G-■ BIPRU 7.10.90G relate to stress testing of a *VaR model* (see ■ BIPRU 7.10.72R (Risk management standards: Stress testing)).

7.10.84

FCA PRA

G

Stress testing is a way of identifying the risk to a *firm* posed by a breakdown of model assumptions or by low-probability events. Where stress tests reveal unacceptable vulnerability to a given set of circumstances, a *firm* should take prompt steps to manage those risks appropriately, for example by hedging against the outcome or reducing the size of the *firm's* *exposure*.

PAGE
127

7.10.85

FCA PRA

R

A *firm* must have the capacity to run daily stress tests.

<p>7.10.86 FCA PRA</p>	<p>R</p>	<p>Stress testing must involve identifying market scenarios or other low probability events in all types of risks that generate the greatest losses on a <i>firm's</i> portfolio.</p>
<p>7.10.87 FCA PRA</p>	<p>R</p>	<p>A <i>firm</i> must periodically and actively identify all the worst case scenarios that are relevant to its portfolio. Scenarios used must be appropriate to test the effect of adverse movements in market volatilities and correlations and the effect of any change in the assumptions underlying the <i>VaR model</i>. Scenarios involving low probability market events must nevertheless be plausible.</p>
<p>7.10.88 FCA PRA</p>	<p>R</p>	<p>Stress testing must capture non-linear effects.</p>
<p>7.10.89 FCA PRA</p>	<p>R</p>	<p>A <i>firm</i> must have procedures to assess and respond to the results produced from stress testing. In particular, stress testing results must be:</p> <ol style="list-style-type: none"> (1) used to evaluate its capacity to absorb such losses or identify steps to be taken to reduce risk; and (2) communicated routinely to <i>senior management</i> and periodically to the <i>governing body</i>.
<p>7.10.90 FCA PRA</p>	<p>G</p>	<p>A <i>firm</i> may want to conduct the more complex stress tests at longer intervals or on an ad hoc basis.</p>
<p>7.10.90A FCA PRA</p>	<p>R</p>	<p>A <i>firm</i> must also carry out reverse stress tests.</p>
<p>Backtesting: Introduction</p>		
<p>7.10.91 FCA PRA</p>	<p>G</p>	<p>Backtesting is the process of comparing value-at-risk risk measures to portfolio performance. It is intended to act as one of the mechanisms for the ongoing validation of a <i>firm's VaR model</i> and to provide incentives for <i>firms</i> to improve their <i>VaR measures</i>.</p>
<p>7.10.92 FCA PRA</p>	<p>G</p>	<p>It is a condition for granting a <i>VaR model permission</i> that a <i>firm</i> should have a backtesting programme in place and should provide three months of backtesting history.</p>
<p>7.10.93 FCA PRA</p>	<p>G</p>	<p>Backtesting conducted only at a whole portfolio level using a single measure of profit and loss has limited power to distinguish an accurate <i>VaR model</i> from an inaccurate one. Backtesting should therefore be regarded as an additional safeguard rather than a primary validation tool. Such testing does however form the basis of the <i>appropriate regulator's plus factor</i> system. The test has been chosen as the basis of the backtesting regime because of its simplicity. A <i>firm</i> will therefore be expected to complement this backtesting with more granular backtesting analysis and involving more than one measure of profit and loss (i.e. both a <i>profit and loss figure</i> and a <i>hypothetical profit and loss figure</i>).</p>

7.10.94 **R** A *firm* must have the capacity to analyse and compare its *profit and loss figures* and *hypothetical profit and loss figures* to the *VaR measure*, both at the level of the whole portfolio covered by the *VaR model permission* and at the level of individual books that contain material amounts of risk.
FCA **PRA**

7.10.94A **R** At a minimum, backtesting of *hypothetical profit and loss figures* must be used for regulatory backtesting and also to calculate *plus factors*.
FCA **PRA**

7.10.95 **G** Backtesting of *hypothetical profit and loss figures* is also used for model validation and for reporting to the *appropriate regulator*.
FCA **PRA**

Backtesting: Basic testing requirements

7.10.96 **R** At a minimum, a *firm* must, on each *business day*, compare each of its 250 most recent *business days' hypothetical profit and loss figures* (ending with the *business day* preceding the *business day* in question) with the corresponding *one-day VaR measures*.
FCA **PRA**

7.10.97 **G** Generally the *positions* underlying the profit and loss account and *VaR measures* should not be materially different.
FCA **PRA**

Backtesting: One day VaR measure

7.10.98 **R** The *one-day VaR measure* for a particular *business day* is the *VaR number* for that *business day* calibrated to a one *business day* holding period and a 99% one-tailed confidence level.
FCA **PRA**

Backtesting: Calculating the profit and loss

7.10.99 **G** The ultimate purpose of backtesting is to assess whether capital is sufficient to absorb actual losses. Actual daily profit and loss means the day's profit and loss arising from trading activities within the scope of the *VaR model permission*. This measure should, however, be 'cleaned' using ■ BIPRU 7.10.100R inclusion in profit and loss of non-modelled factors.
FCA **PRA**

7.10.100 **R** The *profit and loss figure* for a particular *business day* is the *firm's* actual profit or loss for that day in respect of the trading activities within the scope of the *firm's VaR model permission*, adjusted by stripping out:

- (1) fees and commissions;
- (2) brokerage;
- (3) additions to and releases from reserves which are not directly related to *market risk* (e.g. administration reserves); and
- (4) any inception profit exceeding an amount specified for this purpose in the *firm's VaR model permission* (where inception profit is defined as any profit arising immediately on entering into a new transaction).

7.10.101 **G** The definition of *profit and loss figure* may be amended or replaced in an individual *VaR model permission* if the *firm* can demonstrate to the *appropriate regulator* that the alternative method meets the spirit and purpose of the provisions in ■ BIPRU 7.10 about the *profit and loss figure*.
FCA **PRA**

7.10.102 **G** The *appropriate regulator* will review as part of a *firm's VaR model permission* application the processes and documentation relating to the derivation of profit and loss used for backtesting. A *firm's* documentation should clearly set out the basis for cleaning profit and loss. To the extent that certain profit and loss elements are not updated every day (for example certain reserve calculations) the documentation should clearly set out how such elements are included in the profit and loss series.
FCA **PRA**

Backtesting: Definition of backtesting exception

7.10.103 **R** A *backtesting exception* is deemed to have occurred for any *business day* if the *hypothetical profit and loss figure* for that *business day* shows a loss, which in absolute magnitude, exceeds the *one-day VaR measure* for that *business day*. The only exception is if that *business day* is identified in the *firm's VaR model permission* as giving rise to an excluded *backtesting exception*.
FCA **PRA**

Backtesting: Obligation to notify the appropriate regulator

7.10.104 **R** If a *backtesting exception* occurs, the *firm* must notify its usual supervisory contact at the *appropriate regulator* orally by close of business two *business days* after the *business day* for which the *backtesting exception* occurred. Within five *business days* following the end of each *Month*, the *firm* must submit to the *appropriate regulator* a written account of the previous *Month's backtesting exceptions* (if any). This explanation must include the causes of the *backtesting exceptions*, an analysis of whether the *backtesting exception* indicate a deficiency in the *firm's VaR model* and the *firm's* planned response (if any).
FCA **PRA**

Backtesting: Summary of the backtesting cycle

- 7.10.105** **G**
- (1) This paragraph gives *guidance* on the backtesting calculation and reporting process in ■ BIPRU 7.10.96R - ■ BIPRU 7.10.104R.
 - (2) Let the day on which the loss referred to in ■ BIPRU 7.10.100R is made be day *n*. The value-at-risk measure for that day will be calculated on day *n-1*, or overnight between day *n-1* and day *n*. Profit and loss figures are produced on day *n+1*, and backtesting also takes place on day *n+1*. The *firm's* supervisor should be notified of any *backtesting exceptions* by close of business on day *n+2*.
 - (3) Any *backtesting exception* initially counts for the purpose of the calculation of the *plus factor* even if subsequently the *appropriate regulator* agrees to exclude it under the process described in ■ BIPRU 7.10.106G. Thus, where the *firm* experiences a *backtesting exception* and already has four or more *backtesting exceptions* for the previous 250 *business days*, changes to the *multiplication factor* arising from changes to the *plus factor* become effective at *n+3* (using the time-line terminology in (2)).

7.10.106

FCA PRA

G

Backtesting: Process for disregarding backtesting exceptions

- (1) This paragraph gives *guidance* on the process for excluding *backtesting exceptions* as referred to in ■ BIPRU 7.10.103R.
- (2) The *appropriate regulator* will respond flexibly to *backtesting exceptions*. However, the *appropriate regulator's* starting assumption will be that a *backtesting exception* should be taken into account for the purpose of the calculation of *plus factors*. If the *firm* believes that a *backtesting exception* should not count for that purpose, then it should seek a variation of its *VaR model permission* in order to exclude that particular *backtesting exception*. The *appropriate regulator* will then decide whether to agree to such a variation.
- (3) One example of when a *firm's backtesting exception* might properly be disregarded is when it has arisen as a result of a risk that is not captured in its *VaR model* but against which *capital resources* are already held.

7.10.107

FCA PRA

R

Backtesting: Specific risk backtesting

If a *firm's VaR model permission* covers *specific risk*, the *firm* must validate its *VaR model* through backtesting aimed at assessing whether *specific risk* is being accurately captured. This backtesting must be carried out in accordance with the provisions of its *VaR model permission*. If the *VaR model permission* provides for this backtesting to be performed on the basis of relevant sub-portfolios, these must be chosen in a consistent manner.

7.10.108

FCA PRA

G

Specific risk backtesting involves the backtesting of a standalone *specific risk VaR* measure against a profit and loss series determined by reference to exposure risk factors categorised as *specific risk*. Alternatively *specific risk* backtesting may take the form of regular backtesting of trading books and portfolios that are predominantly exposed to risk factors categorised as *specific risk*. The precise requirements for *specific risk* backtesting will be specified in the *firm's VaR model permission* as will the definition of a *specific risk backtesting exception*.

Backtesting: Multiple exceptions

7.10.109

FCA PRA

R

If ten or more *backtesting exceptions* or ten or more *specific risk backtesting exceptions* are recorded in a 250 *business day* period, a *firm* must take immediate corrective action.

7.10.110

FCA PRA

G

Where backtesting reveals severe problems with the basic integrity of the *VaR model*, the *appropriate regulator* may withdraw model recognition. In particular, if ten or more *backtesting exceptions* are recorded in a 250 *business day* period, the *appropriate regulator* may apply a *plus factor* greater than one or the *appropriate regulator* may consider revoking a *firm's VaR model permission*. The *appropriate regulator* may also consider revoking a *firm's VaR model permission* if ten or more *specific risk backtesting exceptions* occur in such a period.

Backtesting: Hypothetical profit and loss

7.10.111

FCA PRA

R

A *firm* must perform backtesting against a *hypothetical profit and loss figure* with respect to each *business day*. A *hypothetical profit and loss figure* for a *business day* means the *hypothetical profit and loss figure* that

would have occurred for that *business day* if the portfolio on which the *VaR number* for that *business day* is based remained unchanged.

7.10.112

FCA PRA

G

- (1) A *hypothetical profit and loss figure* is based on the day's change in the value of the same portfolio that was used to generate the value-at-risk forecast.
- (2) [deleted]
- (3) The *firm* may also need to calculate a *hypothetical profit and loss figure* in order to produce profit attribution reports and to analyse the cause of *backtesting exceptions*.

7.10.112A

FCA PRA

G

The definition of *hypothetical profit and loss figure* may be amended or replaced in an individual *VaR model permission* if the *firm* can demonstrate to the *appropriate regulator* that the alternative method meets the spirit and purpose of the provisions in ■ BIPRU 7.10 about the *hypothetical profit and loss figure*.

Capital calculations: General

7.10.113

FCA PRA

R

The *model PRR* is, for any *business day* (the "relevant" *business day*), calculated in accordance with the following formula:

- (1) the higher of:
 - (a) the *VaR number* for the relevant *business day*; and
 - (b) the average of its daily *VaR numbers* for each of the 60 *business days* ending with the relevant *business day*, multiplied by the *multiplication factor* for the relevant *business day*; and
- (2) (in the case of a *VaR model permission* that covers *specific risk*) the higher of:
 - (a) the *incremental risk charge* for the relevant *business day*; and
 - (b) the average of the twelve-week *incremental risk charge*; and
- (3) the higher of:
 - (a) the latest *stressed VaR number*; and
 - (b) the average of the *firm's* daily *stressed VaR number* for the 60 *business days* ending with the relevant *business day*, multiplied by the *multiplication factor* applied to the *stressed VaR measure* for the relevant *business day*; and
- (4) (in the case of a *VaR model permission* that covers *all price risk measure*) the higher of:
 - (a) the *all price risk measure* for the relevant *business day*; and

(b) the average of the twelve-week *all price risk measure*.

7.10.114

FCA PRA

R

For any day that is not a *business day*, the *model PRR* is the amount for the prior *business day*.

7.10.115

FCA PRA

R

The *VaR number* for any *business day* means the *VaR measure*, in respect of the previous *business day's* close-of-business *positions* in products coming within the scope of the *VaR model permission*, calculated by the *VaR model* and in accordance with ■ BIPRU 7.10 and any methodology set out in the *VaR model permission*. The *VaR number* must not be calculated taking into account matters on the *business day* for which it is the *VaR number*.

7.10.116

FCA PRA

R

The *incremental risk charge* for any *business day* means the *incremental risk charge* required under the provisions in ■ BIPRU 7.10 about *specific risk*, in respect of the previous *business day's* close-of-business *positions* with respect to which those provisions apply.

7.10.116A

FCA PRA

R

The *all price risk measure* for any *business day* means the *all price risk measure* required under the provisions in ■ BIPRU 7.10 about *specific risk* for the *correlation trading portfolio*.

7.10.117

FCA PRA

G

The following equation expresses ■ BIPRU 7.10.113R mathematically:

$$PRR_{VaR} = \text{Max} \left\{ VaR_t, fx \frac{1}{60} \sum_{i=0}^{59} VaR_{t-i} \right\} + \text{Max} \left\{ SVaR_t, sx \frac{1}{y} \sum_{i=0}^{y-1} SVaR_{t-i} \right\} + \text{Max} \left\{ IRC_t, \frac{1}{z} \sum_{i=0}^{z-1} IRC_{t-i} \right\} + \text{Max} \left\{ APR_t, \frac{1}{w} \sum_{i=0}^{w-1} APR_{t-i} \right\}$$

where:

- (1) PRR_{VaR} is a firm's model PRR;
- (2) VaR_t represents the previous day's value-at-risk figure;
- (3) VaR_{t-i} represents the value-at-risk calculated for *i* business days earlier;
- (4) *f* is the multiplication factor for VaR;
- (5) $SVaR_t$ represents the latest stressed VaR figure;
- (6) $SVaR_{t-i}$ represents the stressed VaR calculated for *i* business days earlier;
- (7) *s* is the multiplication factor for stressed VaR;
- (8) *y* is the number of times the stressed VaR was calculated in the last 60 business days;
- (9) IRC_t represents the latest incremental risk charge;
- (10) IRC_{t-i} represents the incremental risk charge calculated for *i* business days earlier;

- (11) z is the number of times the *incremental risk charge* was calculated in the last 12 weeks;
- (12) APR_t represents the latest *all price risk measure*;
- (13) APR_{t-i} represents the *all price risk measure* calculated for i *business days* earlier; and
- (14) w is the number of times the *all price risk measure* was calculated in the last 12 weeks.

Capital calculations: Multiplication factors

- 7.10.118** **R** The *multiplication factor*, for VaR and *stressed VaR*, for any *business day* is the sum of the *minimum multiplication factor* and the *plus factor* for that day.
FCA PRA
- 7.10.119** **R** The *minimum multiplication factor*, for VaR and *stressed VaR*, is three or any higher amount the *VaR model permission* defines it as.
FCA PRA
- 7.10.120** **G** The *minimum multiplication factor*, for VaR and *stressed VaR*, will never be less than three. If the *appropriate regulator* does set the *minimum multiplication factor*, for VaR and *stressed VaR*, above three the *VaR model permission* will have a table that sets out the reasons for that add on and specify how much of the add on is attributable to each reason (see ■ BIPRU 7.10.121R). If there are weaknesses in the *VaR model* that may otherwise be considered a breach of the minimum standards referred to in ■ BIPRU 7.10.24R the *appropriate regulator* may apply such an add on to act as a mitigant for those weaknesses.
FCA PRA
- 7.10.121** **R** Something that would otherwise be a breach of the minimum standards in ■ BIPRU 7.10.26R - ■ BIPRU 7.10.53R is not a breach to the extent that that thing is identified in the *firm's VaR permission* as a reason for an increase in the *minimum multiplication factor*, for VaR and *stressed VaR*, above 3.
FCA PRA
- 7.10.122** **G** Typically, any add on will be due to a specific weakness in systems and controls identified during the *appropriate regulator's* review that the *appropriate regulator* does not consider material enough to justify withholding overall model recognition. The *firm* will be expected to take action to address the reasons for any add on. The *appropriate regulator* will then review these periodically and, where satisfactory action has been taken, the add on will be removed through a variation of the *VaR model permission*.
FCA PRA
- 7.10.123** **G** The *plus factor* system is designed so that the more often a *VaR model* has under-predicted losses in the past, the higher should be the capital requirement based on the *VaR model*. It is intended to provide a capital incentive for the *firm* to continue to improve the accuracy of its *VaR model*.
FCA PRA
- 7.10.124** **R** The table in ■ BIPRU 7.10.125R sets out the *plus factors* to be added to the *minimum multiplication factor*, for VaR and *stressed VaR*, for any
FCA PRA

business day. It is based on the number of *backtesting exceptions* that occurred during the backtesting period as referred to in ■ BIPRU 7.10.96R (Backtesting: Basic testing requirements) ending three *business days* preceding the *business day* for which the *model PRR* is being calculated.

7.10.125

FCA PRA

R

Table: Backtesting plus factors

This table belongs to ■ BIPRU 7.10.124R

Zone	Number of recorded exceptions	Plus factor
Green	4 or less	0.00
Yellow	5	0.40
	6	0.50
	7	0.65
	8	0.75
	9	0.85
Red	10 or more	1.00

7.10.126

FCA PRA

G

A *VaR model* that correctly predicts a one-tailed 99% confidence level is expected to produce, on average, 2.5 *backtesting exceptions* every 250 days. Random events may cause the number of *backtesting exceptions* actually observed to vary. The *plus factor* system is designed to take this into account. Hence *plus factors* are only imposed on the *firm* if it has five or more recorded *backtesting exceptions*. Therefore, where a *backtesting exception* appears to be caused simply by chance, it will not be appropriate for a *VaR model permission* to be varied to exclude that *backtesting exception* as described in ■ BIPRU 7.10.106G (Backtesting: Process for disregarding backtesting exceptions).

Capital calculations: Specific risk surcharge: transitional requirements

7.10.127

FCA PRA

G

Firms who gained model recognition before 1 January 2007 will be permitted to calculate *PRR for specific risk* in accordance with the methodology they were permitted to use immediately before that date instead of capturing event and default risk in their models (see ■ BIPRU TP 14 (Market risk: VaR models)). This treatment will not be available to a *firm* that gains model recognition after that date.

Reporting procedures and requirements

7.10.128

FCA PRA

G

A *VaR model permission* will contain requirements for what the *firm* should report to the *appropriate regulator* and the procedures for reporting. The precise requirements will vary from *VaR model permission* to *VaR model permission*.

■ BIPRU 7.10.129R-■ BIPRU 7.10.130R set out what the *appropriate regulator* regards as the standard requirements.

7.10.129

FCA PRA

R

A *firm* must, no later than the number of *business days* after the end of each quarter specified in the *VaR model permission* for this purpose, submit, in respect of that quarter, a report to the *appropriate regulator* about the operation of the *VaR model*, the systems and controls relating to it and

any changes to the *VaR model* and those systems and controls. Each report must outline as a minimum the following information in respect of that quarter:

- (1) methodological changes and developments to the *VaR model*;
- (2) the introduction of all new pricing models used in connection with the *VaR model* and any changes to any pricing models used in connection with the *VaR model*, including details of any material associated valuation or risk management issues;
- (3) a summary of backtesting performance against *profit and loss figures* (if calculated) and *hypothetical profit and loss figures*, which must be provided in electronic format as stipulated by the *VaR model permission*;
- (4) (if the *VaR model permission* covers *specific risk*) the results of the *specific risk* backtesting including *specific risk backtesting exceptions*;
- (5) any change to any feeder or pre-processing systems in connection with the *VaR model*, including changes to any of the systems set out in the list described in ■ BIPRU 7.10.131G (1) (as it exists at the date of the *VaR model permission*), and any introduction of a new such system;
- (6) any changes to the products coming within the scope of the *VaR model*;
- (7) any material changes or additions to any of the matters referred to in the *firm's* internal documentation in relation to the *VaR model* (as it exists at the date of the *VaR model permission*) or to any matters subsequently notified under (7);
- (8) any changes in *senior management*;
- (9) an up-to-date list of products covered by the *VaR model permission* showing all changes made since the *VaR model permission* was granted;
- (10) where applicable (nil returns are not required), details of:
 - (a) any use of a changed historical observation period in accordance with ■ BIPRU 7.10.30R or any change in the use of any weighting scheme as described in ■ BIPRU 7.10.33R;
 - (b) any data series becoming unreliable as described in ■ BIPRU 7.10.31R and any subsequent use of alternative value-at-risk measurement techniques;

- (c) the frequency of updating data sets being increased in accordance with ■ BIPRU 7.10.34R;
 - (d) any change in the method employed to derive 10-day *VaR measure* (see ■ BIPRU 7.10.28R);
 - (e) to the extent that the use of correlations is permitted by a *firm's VaR model permission*, a summary of any notifications that are required under ■ BIPRU 7.10.37R; and
 - (f) the *VaR model* not accurately capturing risks (as referred to in ■ BIPRU 7.10.53R) and any steps taken under ■ BIPRU 7.10.53R ; and
- (11) the results of the stress tests on the *firm's correlation trading portfolio* under ■ BIPRU 7.10.55Z R, including a comparison to the current capital charge.

7.10.130

FCA PRA

R

A *firm* must provide to, and discuss with, the *appropriate regulator* details of any significant planned changes to the *VaR model* before those changes are implemented. These details must include information about the nature of the change and an estimate of the impact on *VaR numbers* and the *incremental risk charge*.

Updating the VaR model permission

7.10.131

FCA PRA

G

The *VaR model permission* will generally contain a list of the following:

- (1) feeder systems and pre-processing systems;
- (2) products covered by the *VaR model permission*; and
- (3) the *firm's* internal documentation in relation to the *VaR model*.

7.10.132

FCA PRA

G

The information in ■ BIPRU 7.10.131G will vary over time. It is therefore not included in a *VaR model permission* as a *rule* but for information only. The *appropriate regulator* will update that information regularly in accordance with information supplied under ■ BIPRU 7.10.129R. That updating will not amount to a variation of the *VaR model permission*.

Link to standard PRR rules: Incorporation of the model output into the capital calculation

7.10.133

FCA PRA

G

A *VaR model permission* will modify ■ GENPRU 2.1.52 R (Calculation of the *market risk capital requirement*) to provide that a *firm* should calculate its *market risk capital requirement* in accordance with ■ BIPRU 7.10 to the extent set out in the *VaR model permission*.

7.10.134

FCA PRA

G

By modifying ■ GENPRU 2.1.52 R (Calculation of the *market risk capital requirement*) to allow the *firm* to use the *VaR model* to calculate all or part of its *PRR* for certain positions, the *appropriate regulator* is treating it like an *application rule*. The modification means

that the *PRR* calculation set out in ■ BIPRU 7.10 supersedes the *standard market risk PRR rules* for products and risks coming within the scope of the *VaR model permission*.

7.10.135
FCA PRA

R To the extent that a *position* does not fall within the scope of a *firm's VaR model permission* the *firm* must calculate the *PRR* under the *standard market risk PRR rules* or, as applicable, those provisions as modified by the *firm's CAD 1 waiver*.

7.10.136
FCA PRA

- R**
- (1) This *rule* applies to a *position* of a type that comes within the scope of a *firm's VaR model permission*.
 - (2) Subject to ■ BIPRU 7.10.136A R, if, where the *standard market risk PRR rules* apply, a *position* is subject to a *PRR charge* and the *firm's VaR model permission* says that it covers the risks to which that *PRR charge* relates, the *firm* must, for those risks, calculate the *PRR* for that *position* under the *VaR model approach* rather than under the *standard market risk PRR rules*.
 - (3) If, where the *standard market risk PRR rules* apply, a *position* is subject to one or more *PRR charges* and the *firm's VaR model permission* does not cover all the risks to which those *PRR charges* relate, the *firm* must calculate the *PRR* for that *position* under the *VaR model approach* (for those risks that are covered) and under the *standard market risk PRR rules* (for those other risks).
 - (4) Where the *standard market risk PRR rules* distinguish between *specific risk* and *general market risk* a *firm's VaR model permission* covers *specific risk* to the extent that it says it does. If the *firm's VaR model permission* does not cover *specific risk*, ■ BIPRU 7.10.143R and ■ BIPRU 7.10.144R apply.
 - (5) If a *firm's VaR model permission* covers *positions* in *CIUs* it covers *specific risk* with respect to those *positions*.

7.10.136A
FCA PRA

R A *firm* must calculate the *market risk capital requirement* for *securitisation positions* and *positions* in the *correlation trading portfolio* in accordance with the *standard market risk PRR rules*, with the exception of those *positions* subject to the *all price risk measure*.

7.10.137
FCA PRA

R A *firm* may exclude from the *VaR model approach* immaterial risks within the scope of its *VaR model approach*. If a *firm* does so it must instead apply the *standard market risk PRR rules* to those risks.

7.10.138
FCA PRA

- R**
- (1) If a *firm* calculates its *market risk capital requirement* using a combination of the *standard market risk PRR rules* and either the *VaR model approach* or the *VaR model approach* with the *CAD 1 model approach* the *PRR* from each method must be added together.

- (2) A *firm* must take appropriate steps to ensure that all of the approaches are applied in a consistent manner.

7.10.139

G

FCA PRA

An example of the effect of ■ BIPRU 7.10.138R is that where a *firm* normally calculates the PRR for a particular portfolio using a *VaR model*, a *firm* should not switch to the *standard market risk PRR rules* purely to achieve a more attractive PRR.

7.10.140

R

FCA PRA

If:

- (1) the *standard market risk PRR rules* provide for a choice of which of the *PRR charges* to use or specify that one type must be used in some circumstances and that another type must be used in other circumstances;
- (2) one of those types is disapplied under ■ BIPRU 7.10.136R; and
- (3) the other type is not disapplied;

the *firm*:

- (4) must use the *VaR model approach* if under the *standard market risk PRR rules* the *firm* must use the *standard market risk PRR rules* in (2); and
- (5) may use the *VaR model approach* if under the *standard market risk PRR rules* the *firm* may use the *standard market risk PRR rules* in (2).

7.10.141

G

FCA PRA

The treatment of a *convertible* is an example of a situation in which ■ BIPRU 7.10.140R applies. The table in ■ BIPRU 7.3.3R (Table: Instruments which result in notional positions) shows that there are circumstances in which under the *standard market risk PRR rules* a *firm* should calculate an *equity PRR* and that there are circumstances in which a *firm* may choose between calculating an *equity PRR* and an *interest rate PRR*. ■ BIPRU 7.10.140R would be relevant if a *firm's VaR model permission* only covers one of *equity risk* and *interest rate risk*.

7.10.142

R

FCA PRA

The *standard market risk PRR rules* for the *option PRR* are only disapplied to the extent that the derived positions arising under ■ BIPRU 7.6.13R (Table: Derived positions) come within the scope of the *VaR model permission*.

Link to standard PRR rules: General market risk only

7.10.143

R

FCA PRA

If a *firm's VaR model permission* covers *interest rate general market risk* but not *interest rate specific risk*, the *firm* must calculate the *interest rate PRR* so far as it relates to *interest rate specific risk* in accordance with the *standard market risk PRR rules* except that the *firm* must not use the basic *interest rate PRR calculation* in ■ BIPRU 7.3.45R (Basic interest rate calculation for equity instruments).

7.10.144

FCA PRA

R

Link to standard PRR rules: General market risk only

If a *firm's VaR model permission* covers *equity general market risk* but not *equity specific risk*, the *firm* must calculate the *equity PRR* so far as it relates to *equity specific risk* in accordance with the *standard market risk PRR rules* except that the *PRR for equity specific risk* must be calculated under the *standard equity method*.

7.10.145

FCA PRA

R

Link to standard PRR rules: Miscellaneous

- (1) To the extent that a *firm's VaR model permission* does not allow it to use an approach set out in ■ BIPRU 7.10 the relevant provisions in ■ BIPRU 7.10 do not apply to that *firm*.
- (2) If a provision of the *Handbook* refers to ■ BIPRU 7.10, that reference must, in the case of a particular *firm* with a *VaR model permission*, be treated as excluding provisions of ■ BIPRU 7.10 that do not apply under the *VaR model permission* and as taking into account any modifications to ■ BIPRU 7.10 made by the *VaR model permission*. Such references also include requirements and conditions contained in the *VaR model permission* but not ■ BIPRU 7.10 and to the *rules* modified by the *VaR model permission*.

7.10.146

FCA PRA

R

Requirement to use value at risk methodology

A *VaR model* must be a value-at-risk model. It must provide an estimate of the worst expected loss on a portfolio resulting from market movements over a period of time with the specified confidence level.

7.10.147

FCA PRA

G

Ceasing to meet the requirements of BIPRU 7.10

If a *firm* ceases to meet any of the requirements set out in ■ BIPRU 7.10, the *appropriate regulator's* policy is that the *VaR model permission* should cease to have effect. In part this will be achieved by making it a condition of a *firm's VaR model permission* that it complies at all times with the minimum standards referred to in ■ BIPRU 7.10.26R - ■ BIPRU 7.10.53R. Even if they are not formally included as conditions, the *appropriate regulator* is likely to consider revoking the *VaR model permission* if the requirements are not met.

7.10.148

FCA PRA

R

If a *firm* ceases to meet the conditions or requirements in its *VaR model permission* or ■ BIPRU 7.10 it must notify the *appropriate regulator* at once.

Changes to a VaR model

7.10.149

FCA PRA

R

A *firm* may change its *VaR model* to such extent as it sees fit, except that it must not make a change that (either on its own or together with other changes since the date of *VaR model permission*) would:

- (1) be inconsistent with *VaR model permission* or ■ BIPRU 7.10; or

-
- (2) mean that backtesting in accordance with ■ BIPRU 7.10 and the *VaR model permission* would result in the use of data that is inappropriate for the purposes of measuring the performance of the *VaR model*.

7.11 Credit derivatives in the trading book

Scope

7.11.1

FCA PRA

R

This section applies to the treatment of credit derivatives in the *trading book*.

Establishment of positions created by credit derivatives: Treatment of the protection seller

7.11.2

FCA PRA

R

■ BIPRU 7.11.3R - ■ BIPRU 7.11.11R relate to the treatment of the *protection seller* for the purpose of calculating the *securities PRR*. Positions are determined in accordance with ■ BIPRU 7.11.4R - ■ BIPRU 7.11.11R.

7.11.3

FCA PRA

R

- (1) When calculating the *PRR* of the *protection seller*, unless specified differently by other *rules* and subject to (2), the notional amount of the credit derivative contract must be used. For the purpose of calculating the *specific risk PRR charge*, other than for total return swaps, the maturity of the credit derivative contract is applicable instead of the maturity of the obligation.
- (2) When calculating the *PRR* of the *protection seller*, a *firm* may choose to replace the notional value of the credit derivative by the notional value adjusted for changes in the *market value* of the credit derivative since trade inception.

7.11.4

FCA PRA

R

A total return swap creates a long *position* in the *general market risk* of the reference obligation and a short *position* in the *general market risk* of a *zero-specific-risk security* with a maturity equivalent to the period until the next interest fixing and which is assigned a 0% *risk weight* under the *standardised approach* to credit risk. It also creates a long *position* in the *specific risk* of the reference obligation.

7.11.5

FCA PRA

R

A credit default swap does not create a *position* for *general market risk*. For the purposes of *specific risk*, a *firm* must record a synthetic long *position* in an obligation of the reference entity, unless the derivative is rated externally and meets the conditions for a *qualifying debt security*, in which case a long *position* in the derivative is recorded. If premium or interest payments are due under the product, these cash flows must be represented as notional *positions* in *zero-specific-risk securities*.

7.11.6 **R** A single name credit linked note creates a long *position* in the *general market risk* of the note itself, as an interest rate product. For the purpose of *specific risk*, a synthetic long *position* is created in an obligation of the reference entity. An additional long *position* is created in the issuer of the note. Where the credit linked note has an external rating and meets the conditions for a *qualifying debt security*, a single long *position* with the *specific risk* of the note need only be recorded.

7.11.7 **R** In addition to a long *position* in the *specific risk* of the issuer of the note, a multiple name credit linked note providing proportional protection creates a *position* in each reference entity, with the total notional amount of the contract assigned across the *positions* according to the proportion of the total notional amount that each exposure to a reference entity represents. Where more than one obligation of a reference entity can be selected, the obligation with the highest *risk weighting* determines the *specific risk*.

7.11.8 **R** Where a multiple name credit linked note has an external rating and meets the conditions for a *qualifying debt security*, a single long *position* with the *specific risk* of the note need only be recorded.

7.11.9 **R** A first-asset-to-default credit derivative creates a *position* for the notional amount in an obligation of each reference entity. If the size of the maximum credit event payment is lower than the *PRR* requirement under the method in the first sentence of this *rule*, the maximum payment amount may be taken as the *PRR* requirement for *specific risk*.

7.11.10 **R** A second-asset-to-default credit derivative creates a *position* for the notional amount in an obligation of each reference entity less one (that with the lowest *specific risk PRR* requirement). If the size of the maximum credit event payment is lower than the *PRR* requirement under the method in the first sentence of this *rule*, this amount may be taken as the *PRR* requirement for *specific risk*.

7.11.11 **R** If an *n*th-to-default derivative is externally rated and meets the conditions for a *qualifying debt security*, then the *protection seller* need only calculate one *specific risk* charge reflecting the rating of the derivative. The *specific risk* charge must be based on the *securitisation PRAs* in ■ BIPRU 7.2 as applicable.

Establishment of positions created by credit derivatives: Treatment of the protection buyer

7.11.12 **R** For the *protection buyer*, the *positions* are determined as the mirror principle of the *protection seller*, with the exception of a credit linked note (which entails no short *position* in the issuer). If at a given moment there is a call option in combination with a *step-up*, such moment is treated as the maturity of the protection. In the case of first-to-default credit derivatives and *n*th to default credit derivatives, the treatment in ■ BIPRU 7.11.12AR and ■ BIPRU 7.11.12B R applies instead of the mirror principle .

[Note: CAD Annex I point 8.B]

7.11.12A **R**
FCA PRA

Where a *firm* obtains credit protection for a number of reference entities underlying a credit derivative under the terms that the first default among the assets will trigger payment and that this credit event will terminate the contract, the *firm* may off-set specific risk for the reference entity to which the lowest specific risk percentage charge among the underlying reference entities applies according to the Table in ■ BIPRU 7.2.44R.

[Note: CAD Annex I point 8.B]

7.11.12B **R**
FCA PRA

Where the n^{th} default among the exposures triggers payment under the credit protection, the *protection buyer* may only off-set specific risk if protection has also been obtained for defaults 1 to $n-1$ or when $n-1$ defaults have already occurred. In those cases, the methodology set out in ■ BIPRU 7.11.12AR for first-to-default credit derivatives must be followed, appropriately modified for n^{th} -to-default products.

[Note: CAD Annex I point 8.B]

Deriving the net position in each debt security: Credit derivatives

7.11.12C **R**
FCA PRA

A *firm* must calculate both the net long and the net short positions in credit derivatives by applying ■ BIPRU 7.2.36 R and ■ BIPRU 7.2.37 R and, where applicable, ■ BIPRU 7.2.42A R to ■ BIPRU 7.2.42C R or ■ BIPRU 7.11.13 R to ■ BIPRU 7.11.17 R.

Recognition of hedging provided by credit derivatives

7.11.13 **R**
FCA PRA

(1) ■ BIPRU 7.11.14R - ■ BIPRU 7.11.17R relate to *specific risk PRR* for *trading book positions* hedged by credit derivatives for the purposes of the calculation of the *securities PRR*.

(2) A *firm* may take an allowance for protection provided by credit derivatives for the purposes in (1) in accordance with the principles set out in the *rules* referred to in (1).

(3) [deleted]

7.11.14 **R**
FCA PRA

(1) A *firm* may take full allowance when the value of two legs always move in the opposite direction and broadly to the same extent.

(2) This will be the case in the following situations:

- (a) the two legs consist of completely identical instruments; or
- (b) a long cash *position* is hedged by a total rate of return swap (or vice versa) and there is an exact match between the reference obligation and the underlying exposure (i.e., the cash *position*).

- (3) The maturity of the swap itself may be different from that of the underlying exposure for the purposes of (2)(b).
- (4) In these situations, a *firm* must not apply a *specific risk PRR* to either side of the *position*.

7.11.15

FCA PRA

R

An 80% offset may be applied when the value of two legs always move in the opposite direction and where there is an exact match in terms of the reference obligation, the maturity of both the reference obligation and the credit derivative, and the currency of the underlying exposure. In addition, key features of the credit derivative contract must not cause the price movement of the credit derivative materially to deviate from the price movements of the cash *position*. To the extent that the transaction transfers risk, an 80% *specific risk* offset may be applied to the side of the transaction with the higher *PRR*, while the *specific risk* requirements on the other side are zero.

7.11.16

FCA PRA

R

- (1) A *firm* may take partial allowance when the value of two legs usually move in the opposite direction. This would be the case in the situations set out in (2) - (4).
- (2) The first situation referred to in (1) is that the *position* falls under ■ BIPRU 7.11.16 R (2)(b) but there is an asset mismatch between the reference obligation and the underlying exposure. However, the *positions* meet the following requirements:
 - (a) the reference obligation ranks *pari passu* with or is junior to the underlying obligation; and
 - (b) the underlying obligation and reference obligation share the same obligor and have legally enforceable cross-default or cross-acceleration clauses.
- (3) The second situation referred to in (1) is that the *position* falls under ■ BIPRU 7.11.14 R (2)(a) or ■ BIPRU 7.11.15 R but there is a currency or maturity mismatch between the credit protection and the underlying asset (currency mismatches must be included in the normal reporting with respect to the *foreign currency PRR*).
- (4) The third situation referred to in (1) is that the *position* falls under ■ BIPRU 7.11.15 R but there is an asset mismatch between the cash *position* and the credit derivative. However, the underlying asset is included in the (deliverable) obligations in the credit derivative documentation.
- (5) In each of those situations, rather than adding the *specific risk PRR* requirements for each side of the transaction, only the higher of the two *PRR* requirements applies.

7.11.17 **R** In all situations not falling under ■ BIPRU 7.11.14 R - ■ BIPRU 7.11.16 R, a firm must assess a *specific risk PRR charge* against both sides of the positions.
FCA **PRA**

Specific risk calculation

7.11.18 **R** [deleted]

7.11.19 **R** [deleted]

7.11.20 **R** The *specific risk* portion of the *interest rate PRR* for credit derivatives in the *trading book* must be calculated in accordance with ■ BIPRU 7.2.43 R to ■ BIPRU 7.2.46A G (Specific risk calculation), ■ BIPRU 7.2.48A R to ■ BIPRU 7.2.48K R (Specific risk: securitisations and re-securitisations), ■ BIPRU 7.2.48L R (Specific risk: Correlation trading portfolio), ■ BIPRU 7.2.49 R to ■ BIPRU 7.2.51 G (Definition of a qualifying debt security) and the other provisions of ■ BIPRU 7.11, as applicable.

PAGE
147**Valuation**

7.11.59	G	■ GENPRU 1.3.29 R - ■ GENPRU 1.3.35 G (General requirements: Valuation adjustments or reserves) are particularly relevant for a <i>firm</i> trading credit derivatives, especially for credit default swaps that are also <i>securitisation positions</i> .
---------	----------	---

FCA **PRA**

Other risks relating to credit derivatives

- 7.11.60** **R** **FCA** **PRA** A *firm* must be able to describe, demonstrate and explain to the *appropriate regulator* its trading strategies in relation to credit derivatives both in theory and in practice.
- 7.11.61** **G** **FCA** **PRA** ■ BIPRU 7.11.62 G - ■ BIPRU 7.11.63 G cover risks relating to credit derivatives that may not be captured in this section. This *guidance* is of particular relevance to the *overall financial adequacy rule*, the *overall Pillar 2 rule* and the *general stress and scenario testing rule*.
- 7.11.62** **G** **FCA** **PRA** ■ BIPRU 7.11.5 R requires a *firm* to recognise any premiums payable or receivable under the contract as notional *zero-specific-risk securities*. These *positions* are then entered into the *general market risk* framework. As premium payments paid under such contracts are contingent on no credit event occurring, a credit event could significantly change the *general market risk* capital requirement. A *firm* should consider, under the *overall Pillar 2 rule*, whether this risk means that the capital requirements under this section materially understate the *firm's general market risk* position.
- 7.11.63** **G** **FCA** **PRA** If a *firm* recognises profits on a non-accrual basis it should consider whether the capital requirements for its credit derivatives business adequately cover the risk that any recognised profit may not be achieved due to a credit event occurring. This includes *positions* for which the *firm* may have a perfect hedge in place.
- 7.11.64** **G** [deleted]

Chapter 8

Group risk consolidation

8.1 Application

8.1.1

FCA PRA

R

This chapter applies to:

- (1) a *BIPRU firm* that is a member of a *UK consolidation group*;
- (2) a *BIPRU firm* that is a member of a *non-EEA sub-group*; and
- (3) [deleted]
- (4) a *firm* that is not a *BIPRU firm* and is a *parent financial holding company in a Member State in a UK consolidation group*.

8.1.2

FCA PRA

R

This chapter does not apply to a *firm* in ■ BIPRU 8.1.1 R (1) to ■ BIPRU 8.1.1R (3) which is a member of the *UK consolidation group* or *non-EEA sub-group* if the interest of the relevant *UK consolidation group* or *non-EEA sub-group* in that *firm* is no more than a *participation*.

Purpose

8.1.3

FCA PRA

G

This chapter implements articles 71, 73(1) and (2), 125, 126, 127(1), 133 and 134 of the *Banking Consolidation Directive* and articles 2 (in part), 22-27 and 37(1) (in part) of the *Capital Adequacy Directive*.

How this chapter is organised

8.1.4

FCA PRA

G

■ BIPRU 8.2 sets out the definition of *UK consolidation group* and the basic requirement to apply financial resources and concentration risk requirements to that group on a consolidated basis.

8.1.5

FCA PRA

G

■ BIPRU 8.3 sets out the definition of a *non-EEA sub-group* and the basic requirement to apply financial resources and concentration risk requirements to that group on a consolidated basis.

8.1.6

FCA PRA

G

■ BIPRU 8.4 sets out how a group of *CAD investment firms* can apply for a *waiver* from consolidated capital requirements although remaining subject to consolidated supervision (including reporting requirements).

- 8.1.7** FCA PRA G ■ BIPRU 8.5 sets out the basis for including and excluding *undertakings* within the group for the purposes of consolidation.
- 8.1.8** FCA PRA G ■ BIPRU 8.6 sets out the calculation of the *consolidated capital resources* of a group and the limits that apply.
- 8.1.9** FCA PRA G ■ BIPRU 8.7 sets out the calculation of the *consolidated capital resources requirement* of a group.
- 8.1.10** FCA PRA G ■ BIPRU 8.8 deals with the application of *advanced prudential calculation approach* on a consolidated basis.
- 8.1.11** FCA PRA G ■ BIPRU 8.9 sets out consolidated concentration risk requirements.
- Consolidation requirements for BIPRU firms elsewhere in the Handbook**
- 8.1.12** FCA PRA G ■ SYSC 12 (Group risk systems and controls requirement) deals with systems and controls requirements for groups.
- 8.1.13** FCA PRA G ■ GENPRU 1.2 (Adequacy of financial resources) deals with the detail about how
 ■ GENPRU 1.2 applies on a consolidated basis although the underlying requirement to apply it on a consolidated basis is in ■ BIPRU 8.2 and ■ BIPRU 8.3.
- 8.1.14** FCA PRA G ■ BIPRU 11 (Disclosure) itself deals with how that chapter is applied on a consolidated basis.
- 8.1.15** FCA PRA G ■ GENPRU 3.1 (Cross sector groups) deals with *financial conglomerates*.
- 8.1.16** FCA PRA G ■ GENPRU 3.2 (Prudential rules for third country groups) deals, amongst other things, with banking and investment services groups headed by a *parent undertaking* outside the *EEA*.

8.2 Scope and basic consolidation requirements for UK consolidation groups

Main consolidation rule for UK consolidation groups

8.2.1

FCA PRA

R

A *firm* that is a member of a *UK consolidation group* must comply, to the extent and in the manner prescribed in ■ BIPRU 8.5, with the obligations laid down in ■ GENPRU 1.2 (Adequacy of financial resources), the *main BIPRU firm Pillar 1 rules* (but not the *base capital resources requirement*) and ■ BIPRU 10 (Large exposures requirements) on the basis of the consolidated financial position of:

- (1) where either Test 1A or Test 1B in ■ BIPRU 8 Annex 1 R (Decision tree identifying a UK consolidation group) apply, the *parent institution in a Member State in the UK consolidation group*; or
- (2) where either Test 1C or Test 1D in ■ BIPRU 8 Annex 1 R apply, the *parent financial holding company in a Member State*.

8.2.2

FCA PRA

R

Further to ■ BIPRU 8.2.1 R, a *firm* that is a member of a *UK consolidation group* must at all times ensure that the *consolidated capital resources* of the *UK consolidation group* are equal to or exceed its *consolidated capital resources requirement*.

8.2.3

FCA PRA

G

The *base capital resources requirement* does not apply on a consolidated basis.

Definition of UK consolidation group

8.2.4

FCA PRA

R

A *firm's UK consolidation group* means a group that is identified as a *UK consolidation group* in accordance with the decision tree in ■ BIPRU 8 Annex 1 R (Decision tree identifying a UK consolidation group); the members of that group are:

- (1) where either Test 1A or Test 1B in ■ BIPRU 8 Annex 1 R apply, the members of the *consolidation group* made up of the *sub-group of the parent institution in a Member State* identified in ■ BIPRU 8 Annex 1 R together with any other *person* who is a member of that *consolidation group* because of a *consolidation Article 12(1) relationship* or an *Article 134 relationship*; or

- (2) where either Test 1C or Test 1D in ■ BIPRU 8 Annex 1 R apply, the members of the *consolidation group* made up of the *sub-group* of the *parent financial holding company in a Member State* identified in ■ BIPRU 8 Annex 1 R together with any other *person* who is a member of that *consolidation group* because of a *consolidation Article 12(1) relationship* or an *Article 134 relationship*;

in each case only *persons* included under ■ BIPRU 8.5 (Basis of consolidation) are included in the *UK consolidation group*.

8.2.5

FCA PRA

R

For the purposes of this chapter, what would otherwise be a *UK consolidation group* is not a *UK consolidation group* if all the members of that *UK consolidation group* wholly form part of another *UK consolidation group*.

8.2.6

FCA PRA

G

■ BIPRU 8 Annex 2 G (Examples of how to identify a UK consolidation group) sets out examples of how to identify a *UK consolidation group*.

8.2.7

FCA PRA

G

■ BIPRU 8 Annex 1 R (Decision tree identifying a UK consolidation group) shows that Articles 125 and 126 of the *Banking Consolidation Directive* are important in deciding whether the *appropriate regulator* is obliged to supervise a group or part of a group and hence whether that group or part of a group is a *UK consolidation group*. ■ BIPRU 8 Annex 4 G (Text of Articles 125 and 126 of the *Banking Consolidation Directive*) sets out these articles together with an explanation of how those articles should be read in the case of a group which also contains *CAD investment firms*.

8.3 Scope and basic consolidation requirements for non-EEA sub-groups

Main consolidation rule for non-EEA sub-groups

8.3.1

FCA PRA

R

- (1) A *BIPRU firm* that is a *subsidiary undertaking* of a *BIPRU firm* or of a *financial holding company* must apply the requirements laid down in ■ GENPRU 1.2 (Adequacy of financial resources), the *main BIPRU firm Pillar 1 rules* (but not the *base capital resources requirement*) and ■ BIPRU 10 (Large exposures requirements) on a sub-consolidated basis if the *BIPRU firm*, or the *parent undertaking* where it is a *financial holding company*, have a *third country banking or investment services undertaking* as a *subsidiary undertaking* or hold a *participation* in such an *undertaking*.
- (2) (1) only applies if the *appropriate regulator* is required by the *Banking Consolidation Directive* or the *Capital Adequacy Directive* to supervise the group established under (1) under Article 73(2) of the *Banking Consolidation Directive* (Non-EEA sub-groups).

8.3.2

FCA PRA

R

Further to ■ BIPRU 8.3.1 R, a *firm* that is a member of a *non-EEA sub-group* must at all times ensure that the *consolidated capital resources* of that *non-EEA sub-group* are equal to or exceed its *consolidated capital resources requirement*.

8.3.3

FCA PRA

G

The *base capital resources requirement* does not apply on a consolidated basis.

8.3.4

FCA PRA

G

The *sub-group* identified in ■ BIPRU 8.3.1 R is called a *non-EEA sub-group*.

How to identify a non-EEA sub-group

8.3.5

FCA PRA

G

■ BIPRU 8 Annex 3 G (Examples of how to identify a non-EEA sub-group) sets out examples of how to identify a *non-EEA sub-group*.

8.3.6

FCA PRA

G

The remainder of this section sets out a process for identifying a *non-EEA sub-group* in straightforward cases.

8.3.7

FCA PRA

G

A *firm* will not be a member of a *non-EEA sub-group* unless it is also a member of a *UK consolidation group*. So the first step is to identify each *undertaking* in the *firm's UK consolidation group* that satisfies the following conditions:

- (1) it is an *institution, financial institution or asset management company* whose head office is outside the EEA (a *third country banking or investment services undertaking*);
- (2) one of the following applies:
 - (a) it is a *subsidiary undertaking* of a *BIPRU firm* in that *UK consolidation group*; or
 - (b) a *BIPRU firm* in that *UK consolidation group* holds a *participation* in it; and
- (3) that *BIPRU firm* is not a *parent institution in a Member State*.

8.3.8

FCA PRA

G

The *sub-group* of the *BIPRU firm* identified in ■ BIPRU 8.3.7 G (2)(a) or ■ BIPRU 8.3.7 G (2)(b) is a potential *non-EEA sub-group*.

8.3.9

FCA PRA

G

If more than one *BIPRU firm* is a direct or indirect *parent undertaking* in accordance with ■ BIPRU 8.3.7 G (2)(a) then the *sub-groups* of each of them are all potential *non-EEA sub-groups*. This is illustrated in example three in ■ BIPRU 8 Annex 3 G (Examples of how to identify a non-EEA sub-group), where the *sub-group* of UK bank 1 and the *sub-group* of UK bank 2 are potential *non-EEA sub-groups*.

8.3.10

FCA PRA

G

Similarly if there is more than one *BIPRU firm* that holds a *participation* in the *third country banking or investment services undertaking* in accordance with ■ BIPRU 8.3.7 G (2)(b) then the *sub-group* of each such *BIPRU firm* is a potential *non-EEA sub-group*.

8.3.11

FCA PRA

G

The effect of ■ BIPRU 8.3.7 G (3) is that a *non-EEA sub-group* cannot be headed by a *parent institution in a Member State*. This is illustrated in example one of ■ BIPRU 8 Annex 3 G (Examples of how to identify a non-EEA sub-group).

8.3.12

FCA PRA

G

The *firm* should then identify each *undertaking* in the *firm's UK consolidation group* that satisfies the following conditions:

- (1) it is an *institution, financial institution or asset management company* whose head office is outside the EEA (a *third country banking or investment services undertaking*);
- (2) one of the following applies:
 - (a) it is a *subsidiary undertaking* of a *financial holding company* in that *UK consolidation group*; or
 - (b) a *financial holding company* in that *UK consolidation group* holds a *participation* in it;

- (3) the head office of that *financial holding company* is in the *United Kingdom*; and
- (4) that *financial holding company* has a *subsidiary undertaking* that is a BIPRU firm.

8.3.13

FCA PRA

G

The *sub-group* of the *financial holding company* identified in ■ BIPRU 8.3.12 G (2)(a) or ■ BIPRU 8.3.12 G (2)(b) is a potential *non-EEA sub-group*.

8.3.14

FCA PRA

G

The *financial holding company* identified in ■ BIPRU 8.3.12 G may be a *parent financial holding company in a Member State*. This is illustrated by example 2 of ■ BIPRU 8 Annex 3 G (Examples of how to identify a non-EEA sub-group).

8.3.15

FCA PRA

G

If more than one *financial holding company* is a direct or indirect *parent undertaking* in accordance with ■ BIPRU 8.3.12 G (2)(a) then the *sub-groups* of each of them are all potential *non-EEA sub-groups*.

8.3.16

FCA PRA

G

Similarly if there is more than one *financial holding company* that holds a *participation* in the *third country banking or investment services undertaking* in accordance with ■ BIPRU 8.3.12 G (2)(b) then the *sub-group* of each such *financial holding company* is a potential *non-EEA sub-group*.

8.3.17

FCA PRA

G

The *firm* should apply the process in ■ BIPRU 8.3.12 G to a *third country banking or investment services undertaking* even though it may be also be part of a potential *non-EEA sub-group* under ■ BIPRU 8.3.7 G.

8.3.18

FCA PRA

G

Having identified potential *non-EEA sub-groups* for each *third country banking or investment services undertaking* in its *UK consolidation group* the *firm* should then eliminate overlapping potential *non-EEA sub-groups* in the following way. If:

- (1) one potential *non-EEA sub-group* is contained within a wider potential *non-EEA sub-group*; and
- (2) the *third country banking or investment services undertakings* in the two potential *non-EEA sub-groups* are the same;

then the smaller potential *non-EEA sub-group* is eliminated.

8.3.19

FCA PRA

G

If there is a chain of three or more potential *non-EEA sub-groups*, each with the same *third country banking or investment services undertakings*, the elimination process may remove all but the highest. This is illustrated in example three in ■ BIPRU 8 Annex 3 G (Examples of how to identify a non-EEA sub-group). In this example there are four potential *non-EEA sub-groups* and the elimination process results in just one remaining (the one headed by the *UK parent financial holding company in a Member State*).

8.3.20

FCA PRA

G

Each remaining potential *non-EEA sub-group* is a *non-EEA sub-group*, even though it may be part of a wider *non-EEA sub-group*.

8.3.21

FCA PRA

G

Examples four and five in ■ BIPRU 8 Annex 3 G (Examples of how to identify a *non-EEA sub-group*) show how the same group may contain two *non-EEA sub-groups* even though the smaller potential *non-EEA sub-group* is part of a bigger one. The reason for there being two *non-EEA sub-groups* in these examples is that one of the *third country banking or investment services undertakings* is not a member of both potential *non-EEA sub-groups*.

8.3.22

FCA PRA

G

If a *UK consolidation group* is headed by a *parent financial holding company in a Member State* the result of the elimination process may be that a *firm's UK consolidation group* contains only one *non-EEA sub-group* and that the *non-EEA sub-group* is the same as the *UK consolidation group*. In theory that means that there are two sets of consolidation requirements, one in relation to the *UK consolidation group* and one in relation to the *non-EEA sub-group*. However as the *UK consolidation group* and the *non-EEA sub-group* are the same, in practice this means that the additional *non-EEA sub-group* consolidation disappears. This is illustrated in example three in ■ BIPRU 8 Annex 3 G (Examples of how to identify a *non-EEA sub-group*). The effect of ■ BIPRU 8.3.7 G (3) is that this is not the case if the *UK consolidation group* is headed by a *parent institution in a Member State*, as illustrated in example 1 in ■ BIPRU 8 Annex 3 G.

8.3.23

FCA PRA

G

Even where the requirements for a *non-EEA sub-group* are absorbed into those for the *UK consolidation group* a *firm* should still make clear in its regulatory reporting that the consolidation figures relate to a *UK consolidation group* and a *non-EEA sub-group* and that they both contain the same members.

8.3.24

FCA PRA

G

The examples in this section have so far assumed that the only *EEA State* involved is the *United Kingdom*. If a potential *non-EEA sub-group* that would otherwise be regulated by the *appropriate regulator* contains a potential *non-EEA sub-group* in another *EEA State* then the *United Kingdom* one is eliminated if the *third country banking or investment services undertaking* in the *UK* potential *non-EEA sub-group* and the potential *non-EEA sub-group* in the other *EEA State* are the same. The intention here is that the *EEA competent authority* closest to the *third country banking or investment services undertaking* should be responsible for the *non-EEA sub-group* subconsolidation. Example 6 in ■ BIPRU 8 Annex 3 G (Examples of how to identify a *non-EEA sub-group*) illustrates this situation.

8.4 CAD Article 22 groups and investment firm consolidation waiver

Application

8.4.1
FCA

R This section applies to a *BIPRU investment firm* with an *investment firm consolidation waiver*.

The effect of an investment firm consolidation waiver and the conditions for getting one

8.4.2
FCA

G A *BIPRU investment firm* may apply for a *waiver* of the requirement in this chapter to apply capital requirements on a consolidated basis. Such a *waiver* is called an *investment firm consolidation waiver*.

8.4.3
FCA

G An *investment firm consolidation waiver* will waive the application of **■** BIPRU 8.2.1 R and **■** BIPRU 8.2.2 R (if it applies with respect to a *UK consolidation group*) or **■** BIPRU 8.3.1 R and **■** BIPRU 8.3.2 R (if it applies with respect to a *non-EEA sub-group*). The effect will be to switch off this chapter with respect to the group in question apart from this section.

8.4.4
FCA

G The *FCA* will not grant an *investment firm consolidation waiver* unless:

- (1) the *UK consolidation group* or *non-EEA sub-group* meets the conditions for being a *CAD Article 22 group*;
- (2) the *FCA* is satisfied that each *BIPRU firm* in the *UK consolidation group* or *non-EEA sub-group* will be able to meet its capital requirements using the calculation of *capital resources* in **■** GENPRU 2 Annex 6 R (Capital resources table for a *BIPRU investment firm* with a waiver from consolidated supervision); and
- (3) the *firm* demonstrates that the requirements in **■** BIPRU 8.4.11 R to **■** BIPRU 8.4.18 R will be met.

8.4.5
FCA

G The standards in **■** BIPRU 8.4.4 G are minimum standards. Satisfaction of these conditions does not automatically mean the *FCA* will give an *investment firm consolidation waiver*. The *FCA* will in addition also apply the tests in Section 138A of the *Act* (Modification or waiver of rules).

8.4.6

FCA

G

■ SUP 8 (Waiver and modification of rules) and ■ BIPRU 1.3 (Application for advanced approaches) are also relevant to applications for an *investment firm consolidation waiver*.

Meeting the terms of an investment firm consolidation waiver

8.4.7

FCA

R

If a *firm* has an *investment firm consolidation waiver* with respect to its *UK consolidation group* or *non-EEA sub-group* but that *UK consolidation group* or *non-EEA sub-group* ceases to meet the definition of a *CAD Article 22 group* the *firm* must comply with the rest of this chapter rather than this section notwithstanding the *investment firm consolidation waiver*.

8.4.8

FCA

G

Compliance with the capital requirements set out in ■ BIPRU 8.4.11 R is a condition under the *Capital Adequacy Directive* for the exemption from capital requirements. Thus if they are breached the *FCA* is likely to revoke the *investment firm consolidation waiver*.

Definition of a CAD Article 22 group

8.4.9

FCA

R

- (1) A *CAD Article 22 group* means a *UK consolidation group* or *non-EEA sub-group* that meets the conditions in this rule.
- (2) There must be no *bank*, *building society* or *credit institution* in the *UK consolidation group* or *non-EEA sub-group*.
- (3) Each *CAD investment firm* in the *UK consolidation group* or *non-EEA sub-group* which is an *EEA firm* must use the definition of own funds given in the *CRD implementation measure* of its *EEA State* for Article 16 of the *Capital Adequacy Directive*.
- (4) Each *CAD investment firm* in the *UK consolidation group* or *non-EEA sub-group* must be a:
 - (a) *limited activity firm*; or
 - (b) *limited licence firm*.
- (5) Each *CAD investment firm* in the *UK consolidation group* or *non-EEA sub-group* which is an *EEA firm* must:
 - (a) meet the requirements imposed by the *CRD implementation measures* of its *EEA State* for Articles 18 and Article 20 of the *Capital Adequacy Directive* on an individual basis; and
 - (b) deduct from its own funds any contingent liability in favour of other members of the *UK consolidation group* or *non-EEA sub-group*.
- (6) Each *BIPRU investment firm* in the *UK consolidation group* or *non-EEA sub-group* must comply with the *main BIPRU firm Pillar 1 rules* on an individual basis.

8.4.10

FCA

G

■ GENPRU 2.2 (Capital resources) says that a *BIPRU investment firm* with an *investment firm consolidation waiver* should calculate its *capital resources* on a solo basis using ■ GENPRU 2 Annex 6 R (Capital resources table for a BIPRU investment firm with a waiver from consolidated supervision). ■ GENPRU 2 Annex 6 R requires a *BIPRU investment firm* to deduct contingent liabilities in favour of other members of the *UK consolidation group* or *non-EEA sub-group*. Therefore ■ BIPRU 8.4.9 R (5)(b) only imposes the requirement to deduct them on *EEA firms*.

Capital adequacy obligations relating to a CAD Article 22 group: General rule

8.4.11

FCA

R

If a *firm* has an *investment firm consolidation waiver*, it must ensure that any *financial holding company* in the *UK consolidation group* or the *non-EEA sub-group* that is the *UK parent financial holding company in a Member State* of a *CAD investment firm* in the *UK consolidation group* or *non-EEA sub-group* has capital resources, calculated under ■ BIPRU 8.4.12 R, in excess of the sum of the following (or any higher amount specified in the *investment firm consolidation waiver*):

- (1) the sum of the solo notional capital resources requirements for each *CAD investment firm*, *financial institution*, *asset management company* and *ancillary services undertaking* in the *UK consolidation group* or the *non-EEA sub-group*, as calculated in accordance with ■ BIPRU 8.4.13 R; and
- (2) the total amount of any contingent liability in favour of *CAD investment firms*, *financial institutions*, *asset management companies* and *ancillary services undertakings* in the *UK consolidation group* or *non-EEA sub-group*.

Capital adequacy obligations relating to a CAD Article 22 group: Capital resources

8.4.12

FCA

R

A *firm* must calculate the capital resources of the *parent financial holding company in a Member State* for the purpose of ■ BIPRU 8.4.11 R as follows:

- (1) the capital resources are the sum of *capital resources* calculated at stages D (Total tier one capital before deductions) and I (Total tier two capital) of the version of the *capital resources table* in ■ GENPRU 2 Annex 4 R (Capital resources table for a BIPRU investment firm deducting material holdings) as adjusted in accordance with this *rule*;
- (2) *capital resources* at stage D must not include *innovative tier one capital resources*, but they may be included at stage I if (5) allows this;

- (3) the amount of the items which may be included at stage I must not exceed the amount calculated at stage D of the *capital resources table*;
- (4) the amount of the items which may be included in *lower tier two capital* in stage I must not exceed 50% of the amount calculated at stage D of the *capital resources table*; and
- (5) ■ GENPRU 2.2.25 R (Limits on the use of different forms of capital: Use of higher tier capital in lower tiers) and ■ GENPRU 2.2.27 R (Use of *innovative tier one capital* in lower stages of capital) apply.

Capital adequacy obligations relating to a CAD Article 22 group: Capital resources requirement

8.4.13

FCA

R

The solo notional capital resources requirement as referred to in ■ BIPRU 8.4.11 R (1) is calculated in the same way as:

- (1) (if each *CAD investment firm* in the *UK consolidation group* or *non-EEA sub-group* is a *limited licence firm*) the *capital resources requirement* for a *BIPRU limited licence firm*; or
- (2) (in any other case) the *capital resources requirement* for a *BIPRU limited activity firm*.

8.4.14

FCA

R

A *firm* must exclude *material holdings* in the notional calculation of the *credit risk capital requirement* for the purposes of ■ BIPRU 8.4.13 R. A *firm* must identify whether it has any *material holdings* and the amount of them in accordance with ■ GENPRU 2.2 (Capital resources) and ■ GENPRU 2 Annex 4 R (Capital resources table for a BIPRU investment firm deducting material holdings).

8.4.15

FCA

G

The notional capital resources requirement calculated under ■ BIPRU 8.4.13 R need not include a credit charge for *material holdings*. However it should include one for *illiquid assets*.

8.4.16

FCA

R

Intra-group *exposures* must not be netted for the purpose of ■ BIPRU 8.4.11 R.

Capital adequacy obligations relating to a CAD Article 22 group: Advanced prudential calculation approaches

8.4.17

FCA

R

A *firm* may not use an *advanced prudential calculation approach* for the purpose of ■ BIPRU 8.4.11 R.

**Additional rules that apply to a firm with an investment firm
consolidation waiver**

8.4.18

FCA

R

If a *firm* has an *investment firm consolidation waiver*, it must:

- (1) ensure that each *CAD investment firm* in the *UK consolidation group* or *non-EEA sub-group* which is a *firm* or an *EEA firm* has in place systems to monitor and control the sources of capital and funding of all the members in the *UK consolidation group* or *non-EEA sub-group*;
- (2) notify the *FCA* of any serious risk that could undermine the financial stability of the *UK consolidation group* or *non-EEA sub-group*, as soon as the *firm* becomes aware of that risk, including those associated with the composition and sources of the capital and funding of members of the *UK consolidation group* or *non-EEA sub-group*;
- (3) report the amount of the *consolidated capital resources* and *consolidated capital resources requirement* of the *UK consolidation group* or *non-EEA sub-group* on a periodic basis as set out in the *investment firm consolidation waiver*;
- (4) report any *large exposures* risks of members of the *UK consolidation group* or *non-EEA sub-group* including any *undertakings* not located in an *EEA State* on a periodic basis set out in the *investment firm consolidation waiver*;
- (5) notify the *FCA* immediately it becomes aware that the *UK consolidation group* or *non-EEA sub-group* has ceased to meet the conditions for being a *CAD Article 22 group*; and
- (6) notify the *FCA* immediately it becomes aware of any breach of
■ BIPRU 8.4.11 R.

8.4.19

FCA

G

Although an *investment firm consolidation waiver* switches off most of this chapter, a *firm* should still carry out the capital adequacy calculations in ■ BIPRU 8.3 to ■ BIPRU 8.8 as if those parts of this chapter still applied to the *UK consolidation group* or *non-EEA sub-group* and report these to the *FCA* . It should also still monitor *large exposure* risk on a consolidated basis.

8.5 Basis of consolidation

Undertakings to be included in consolidation

8.5.1

FCA PRA

R

A *firm* must include only the following types of *undertaking* in a *UK consolidation group* or *non-EEA sub-group* for the purposes of this chapter:

- (1) a *BIPRU firm*;
- (2) an *institution*;
- (3) a *financial institution*;
- (4) an *asset management company*;
- (5) a *financial holding company*; and
- (6) an *ancillary services undertaking*.

8.5.2

FCA PRA

G

Although an *undertaking* falling outside ■ BIPRU 8.5.1 R will not be included in a *UK consolidation group* or *non-EEA sub-group* it may be relevant in deciding whether one *undertaking* in the *banking sector* or the *investment services sector* is a *subsidiary undertaking* of another with the result that they should be included in the same *UK consolidation group* or *non-EEA sub-group*.

8.5.3

FCA PRA

G

An example of ■ BIPRU 8.5.2 G is as follows. Say that the *undertaking* at the head of a *bank's UK group* is a *parent financial holding company in a Member State*. One of its *subsidiary undertakings* is the *bank*. The *parent financial holding company in a Member State* also has an *insurer* as a *subsidiary undertaking*. That *insurer* has several *investment firms* as *subsidiary undertakings*. Say that the *UK group* is not a *financial conglomerate*. The *UK consolidation group* will include the *parent financial holding company in a Member State* and the *bank*. It will also include the *investment firms* that are *subsidiary undertakings* of the *insurer*. This is because the *investment firms* are *subsidiary undertakings* of the *parent financial holding company in a Member State* through the *parent financial holding company in a Member State's holding in the insurer*. However it will not include the *insurer* itself.

Basis of inclusion of undertakings in consolidation

8.5.4

FCA PRA

R

A *firm* must include any *subsidiary undertaking* in the *UK consolidation group* or *non-EEA sub-group* in full in the calculations in this chapter.

8.5.5

FCA PRA

R

In carrying out the calculations for the purposes of this chapter a *firm* must only include the relevant proportion of an *undertaking* that is a member of the *UK consolidation group* or *non-EEA sub-group*:

- (1) by virtue of a *consolidation Article 12(1) relationship*;
- (2) by virtue of an *Article 134 relationship*; or
- (3) because the group holds a *participation* in it.

8.5.6

FCA PRA

R

In ■ BIPRU 8.5.5 R, the relevant proportion is either:

- (1) (in the case of a *participation*) the proportion of *shares* issued by the *undertaking* held by the *UK consolidation group* or the *non-EEA sub-group*; or
- (2) (in the case of a *consolidation Article 12(1) relationship* or an *Article 134 relationship*), such proportion (if any) as stated in the *Part 4A permission* of the *firm*.

Basis of inclusion of UCITS investment firms in consolidation

8.5.7

FCA PRA

R

■ GENPRU 2.1.46 R (Adjustment of the variable capital requirement calculation for UCITS investment firms) does not apply for the purpose of this chapter.

8.5.8

FCA PRA

G

In general a *UCITS investment firm* only calculates its capital and concentration risk requirements in relation to its *designated investment business* and does not calculate them with respect to *scheme management activity*. The effect of ■ BIPRU 8.5.7 R is that this does not apply on a consolidated basis. For the purpose of this chapter the calculations are carried with respect to the whole of the activities of a *UCITS investment firm*.

Exclusion of undertakings from consolidation: Balance sheet size

8.5.9

FCA PRA

R

A *firm* may, having first notified the *appropriate regulator* in writing in accordance with ■ SUP 15.7 (Form and method of notification), exclude an *institution, asset management company, financial institution or ancillary services undertaking* that is a *subsidiary undertaking* in, or an *undertaking* in which a *participation* is held by, the *UK consolidation group* or *non-EEA sub-group* if the balance sheet total of that *undertaking* is less than the smaller of the following two amounts:

- (1) 10 million Euros;
- (2) 1% of the balance sheet total of the *parent undertaking* or the *undertaking* that holds the *participation*.

8.5.10

FCA PRA

R

A *firm* must include *undertakings*, to which ■ BIPRU 8.5.9 R would otherwise apply, if the balance sheet total of those *undertakings* taken together breaches the limit in ■ BIPRU 8.5.9 R.

8.5.11

FCA PRA

G

Exclusion of undertakings from consolidation: Other reasons

Article 73(1) of the *Banking Consolidation Directive* allows the *appropriate regulator* to decide to exclude an *institution, financial institution, asset management company* or *ancillary services undertaking* that is a *subsidiary undertaking* in, or an *undertaking* in which a *participation* is held by, the *UK consolidation group* or *non-EEA sub-group* for the purposes of this chapter in the following circumstances:

- (1) where the head office of the *undertaking* concerned is situated in a country outside the *EEA* where there are legal impediments to the transfer of the necessary information; or
- (2) where, in the opinion of the *appropriate regulator*, the *undertaking* concerned is of negligible interest only with respect to the objectives of monitoring *institutions*; or
- (3) where, in the opinion of the *appropriate regulator*, the consolidation of the financial situation of the *undertaking* concerned would be inappropriate or misleading as far as the objectives of the supervision of *institutions* are concerned.

8.5.12

FCA PRA

G

If a *firm* wishes to exclude an *undertaking* on the basis of any of the grounds set out in ■ BIPRU 8.5.11 G it should apply to the *appropriate regulator* for a *waiver*. The *appropriate regulator* will consider such applications in the light of the criteria in Section 138A of the *Act*.

8.5.13

FCA PRA

G

If several *undertakings* meet the criteria in ■ BIPRU 8.5.11 G (2), the *appropriate regulator* will not agree to a *waiver* to exclude them all from consolidation where collectively they are of non-negligible interest with respect to the objectives of the supervision of *institutions*.

Information about excluded undertakings

8.5.14

FCA PRA

G

The *appropriate regulator* may require a *firm* to provide information about the *undertakings* excluded from consolidation of the *UK consolidation group* or *non-EEA sub-group* pursuant to this section.

8.6 Consolidated capital resources

General

8.6.1

FCA PRA

R

A *firm* must calculate the *consolidated capital resources* of its *UK consolidation group* or its *non-EEA sub-group* by applying ■ GENPRU 2.2 (Capital resources) to its *UK consolidation group* or *non-EEA sub-group* on an accounting consolidation basis, treating the *UK consolidation group* or *non-EEA sub-group* as a single *undertaking*. The *firm* must adjust ■ GENPRU 2.2 in accordance with this section for this purpose.

Notification of issuance of capital instruments

8.6.1A

FCA PRA

R

This section applies to a *firm* if another member of its *group* intends to issue a *capital instrument* on or after 1 March 2012 for inclusion in the *firm's capital resources* or *consolidated capital resources* of its *UK consolidation group* or *non-EEA sub-group*.

8.6.1B

FCA PRA

R

A *firm* must notify the *appropriate regulator* in writing of the intention of another member of its *group* which is not a *firm* to issue a *capital instrument* which the *firm* intends to include within its *capital resources* or the *consolidated capital resources* of its *UK consolidation group* or *non-EEA sub-group* as soon as it becomes aware of the intention of the *group undertaking* to issue the *capital instrument*. When giving notice, a *firm* must:

- (1) provide details of the amount of capital to be raised through the intended issue and whether the capital is intended to be issued to external investors or within its *group*;
- (2) identify the stage of the *capital resources table* the *capital instrument* is intended to fall within;
- (3) include confirmation from a *senior manager* of the *firm* responsible for authorising the inclusion of the issue within *capital resources* or *consolidated capital resources* that the *capital instrument* complies with the *rules* applicable to instruments included in the stage of the *capital resources table* identified in (2); and

- (4) provide details of any features of the *capital instrument* which are novel, unusual or different from a *capital instrument* of a similar nature previously issued by the *firm* or widely available in the market or not specifically contemplated by ■ GENPRU 2.2.

This rule does not apply to a *firm* if a *group undertaking* intends to issue a *capital instrument* listed in ■ BIPRU 8.6.1E R.

8.6.1C

FCA PRA

R

A *firm* must provide a further notification to the *appropriate regulator* in writing including all the information required in ■ BIPRU 8.6.1BR (1) to ■ (4) as soon as it becomes aware of any changes that are proposed to the intended date of issue, amount of issue, type of investors, stage of capital or any other feature of the *capital instrument* previously notified to the *appropriate regulator*.

8.6.1D

FCA PRA

R

If a *group undertaking* proposes to establish a debt securities program for the issue of *capital instruments* which the *firm* intends to include within its *capital resources* or the *consolidated capital resources* of its UK *consolidation group* or *non-EEA sub-group*, it must:

- (1) notify the *appropriate regulator* of the establishment of the program; and

- (2) provide the information required by ■ BIPRU 8.6.1BR (1) to ■ (4);

as soon as it becomes aware of the proposed establishment. The *appropriate regulator* must be notified of any changes, in accordance with ■ BIPRU 8.6.1C R.

8.6.1E

FCA PRA

R

The *capital instruments* to which ■ BIPRU 8.6.1B R does not apply are:

- (1) ordinary *shares* issued by a *group undertaking* which:

- (a) are the most deeply subordinated *capital instrument* issued by that *group undertaking*;

- (b) meet the criteria set out in ■ GENPRU 2.2.83 R (2) and ■ GENPRU 2.2.83 R (3) and ■ GENPRU 2.2.83A R; and

- (c) are the same as ordinary *shares* previously issued by that *group undertaking*;

- (2) debt instruments issued from a debt securities program established by a *group undertaking*, provided the program was notified to the *appropriate regulator* prior to its first drawdown, in accordance with ■ BIPRU 8.6.1D R; and

- (3) *capital instruments* which are not materially different in terms of their characteristics and eligibility for inclusion in a particular tier of capital to *capital instruments* previously issued by a *group undertaking* for inclusion in the *firm's capital resources* or

consolidated capital resources of its UK consolidation group or non-EEA sub-group.

8.6.1F

FCA PRA

R

A *firm* must notify the *appropriate regulator* in writing, no later than the date of issue, of the intention of a *group undertaking* to issue a *capital instrument* listed in ■ BIPRU 8.6.1E R which the *firm* intends to include within its *capital resources* or the *consolidated capital resources* of its *UK consolidation group* or *non-EEA sub-group*. When giving notice a *firm* must:

- (1) provide the information set out at ■ BIPRU 8.6.1BR (1) to ■ (3); and
- (2) confirm that the terms of the *capital instrument* have not changed since the previous issue of that type of *capital instrument* by that *group undertaking*.

Limits on the use of different forms of capital

8.6.2

FCA PRA

R

The *capital resources gearing rules* apply for the purposes of calculating *consolidated capital resources*. They apply to the *UK consolidation group* or *non-EEA sub-group* on an accounting consolidation basis, treating the *UK consolidation group* or *non-EEA sub-group* as a single *undertaking*.

8.6.3

FCA PRA

G

As the various components of capital differ in the degree of protection that they offer, the *capital resources gearing rules* as applied on a consolidated basis place restrictions on the extent to which certain types of capital are eligible for inclusion in a *UK consolidation group* or *non-EEA sub-group's consolidated capital resources*.

■ GENPRU 2.2.25 R (Limits on the use of different forms of capital: Use of higher tier capital in lower tiers) also applies.

8.6.4

FCA PRA

G

The prohibition in ■ GENPRU 2.2 (Capital resources) on including *innovative tier one capital* in *tier one capital* for the purposes of meeting capital resources requirements applies under this section. However ■ GENPRU 2.2.27 R (*innovative tier one capital* may be included in *lower stages of capital* when excluded from *tier one capital*) also applies. So, for example, a *firm* should not include *consolidated indirectly issued capital* in *tier one capital* but should generally include it as *upper tier two capital*.

8.6.5

FCA PRA

G

The *rules* in ■ GENPRU 2.2 (Capital resources) on what *tier two capital* and *tier three capital* can be used for also apply under this section.

Calculation of consolidated capital resources if there is a building society in the group

8.6.6

FCA PRA

R

Where a *firm's UK consolidation group* or *non-EEA sub-group* includes a *building society*, the *firm* must calculate that group's *consolidated capital resources* using the calculation of *capital resources* for *building societies*.

Calculation of consolidated capital resources if there is a bank or credit institution in the group

8.6.7

FCA PRA

R

Where a *firm's UK consolidation group* or *non-EEA sub-group* includes a *bank* or *credit institution* but not a *building society*, the *firm* must calculate that group's *consolidated capital resources* using the calculation of *capital resources* for *banks*.

Calculation of consolidated capital resources for an investment firm group

8.6.8

FCA PRA

R

Where a *firm's UK consolidation group* or *non-EEA sub-group* does not include a *bank*, *building society* or *credit institution*, the *firm* must calculate that group's *consolidated capital resources* using the calculation of *capital resources* in ■ GENPRU 2 Annex 4 R (Capital resources table for a BIPRU investment firm deducting material holdings) or ■ GENPRU 2 Annex 5 (Capital resources table for a BIPRU investment firm deducting illiquid assets).

8.6.9

FCA PRA

R

A *firm* must give one *Month's* prior notice to the *appropriate regulator* before starting to use or stopping using the method in ■ GENPRU 2 Annex 5 (Capital resources table for a BIPRU investment firm deducting illiquid assets).

Treatment of minority interests

8.6.10

FCA PRA

R

- (1) This *rule* sets out how to determine whether minority interests in an *undertaking* in a *UK consolidation group* or *non-EEA sub-group* may be included in *tier one capital*, *tier two capital* or *tier three capital* for the purpose of calculating *consolidated capital resources* (each referred to as a "tier" of capital in this *rule*).
- (2) A *firm* must identify the item of capital of the *undertaking* in question that gives rise to that minority interest.
- (3) A *firm* must include the minority interest in the tier of capital in which that *undertaking* would have to include the capital referred to in (2) if it were a *firm* calculating its *capital resources* on a solo basis under whichever method applies to the group under ■ BIPRU 8.6.6 R to ■ BIPRU 8.6.8 R.
- (4) This *rule* does not apply to a minority interest created by *consolidated indirectly issued capital*.

Indirectly issued capital and group capital resources

8.6.11

FCA PRA

R

For the purposes of this chapter, ■ GENPRU 2.2.123 R to ■ GENPRU 2.2.137 R (Indirectly issued tier one capital (BIPRU firm only)) do not apply. A *firm* may only include *consolidated indirectly issued capital* in *consolidated capital resources* (whether as a minority interest or otherwise) in accordance with this section.

8.6.12

FCA PRA

R

Consolidated indirectly issued capital means any *capital instrument* issued by a member of the *UK consolidation group* or *non-EEA sub-group* where:

- (1) some or all of the following conditions are satisfied:
 - (a) that capital is issued to an *SPV*; or
 - (b) that capital is issued by an *SPV*; or
 - (c) the subscription for the capital issued by the member of the group in question is funded directly or indirectly by an *SPV*; and
- (2) any of the *SPVs* referred to in (1) is a member of the *UK consolidation group* or *non-EEA sub-group* or a *subsidiary undertaking* of any member of the *UK consolidation group* or *non-EEA sub-group*.

8.6.13

FCA PRA

R

A *firm* may only include *consolidated indirectly issued capital* in the *consolidated capital resources* of its *UK consolidation group* or *non-EEA sub-group* if:

- (1) it is issued by an *SPV* that is a member of the *UK consolidation group* or *non-EEA sub-group* to *persons* who are not members of the *UK consolidation group* or *non-EEA sub-group*; and
- (2) the conditions in ■ BIPRU 8.6.16 R to ■ BIPRU 8.6.18 R are satisfied.

8.6.14

FCA PRA

R

Consolidated indirectly issued capital that is eligible for inclusion in the *consolidated capital resources* of a *UK consolidation group* or *non-EEA sub-group* may only be included as a minority interest created by the *capital instrument* issued by the *SPV* referred to in ■ BIPRU 8.6.13 R. If it is eligible, it is *innovative tier one capital*.

8.6.15

FCA PRA

R

For the purposes of this section, an *undertaking* is an *SPV* if the main activity of the *SPV* is to raise funds for *undertakings* in:

- (1) (in the case of a *UK consolidation group*) that *UK consolidation group*; or
- (2) (in the case of a *non-EEA sub-group*) that *non-EEA sub-group* or any *UK consolidation group* of which it forms part.

8.6.16

FCA PRA

R

The *SPV* referred to in ■ BIPRU 8.6.13 R must satisfy the conditions in ■ GENPRU 2.2.127 R (Conditions that an *SPV* has to satisfy if indirectly issued capital is to be included in *capital resources* on a solo basis) as modified by the following:

- (1) references in ■ GENPRU 2.2.127 R (1) to being controlled by the *firm* are to being controlled by a member of the *firm's UK consolidation group* or *non-EEA sub-group* as the case may be; and
- (2) references to the *firm's group* are to the *firm's UK consolidation group* or *non-EEA sub-group* as the case may be.

8.6.17

FCA PRA

R

The capital issued by the *SPV* referred to in ■ BIPRU 8.6.13 R must satisfy the conditions in ■ GENPRU 2.2.129 R (Conditions that capital issued by an *SPV* has to satisfy if indirectly issued capital is to be included in *capital resources* on a solo basis) as modified by the following:

- (1) references to the *firm's group* are to the *firm's UK consolidation group* or *non-EEA sub-group* as the case may be;
- (2) the substitution obligation in ■ GENPRU 2.2.129 R (2) need not be the *firm's* but may apply to any member of the *UK consolidation group* or *non-EEA sub-group* as the case may be; and
- (3) that substitution obligation applies if the *consolidated capital resources* of the *UK consolidation group* or *non-EEA sub-group*, as the case may be, fall, or are likely to fall, below its *consolidated capital resources requirement*.

8.6.18

FCA PRA

R

The *SPV* referred to in ■ BIPRU 8.6.13 R must invest the funds raised from the issue of capital by the *SPV* by subscribing for capital resources issued by an *undertaking* that is a member of the *UK consolidation group* or *non-EEA sub-group*. Those capital resources must satisfy the following conditions:

- (1) those capital resources must at least comply with the requirements for *lower tier two capital*; and
- (2) the first call date or fixed maturity date (if any) of those capital resources must not arise before the first call date on the instrument issued by the *SPV*.

8.6.19

FCA PRA

R

In relation to the obligation to substitute described in ■ BIPRU 8.6.17 R (2), a *firm* must take all reasonable steps to ensure that the *undertaking* in question has at all times sufficient authorised and unissued *tier one instruments* other than *innovative tier one instruments* (and authority to issue them) to enable it to discharge the obligation to substitute.

8.6.20

FCA PRA

R

A *firm* must comply with the requirements set out in ■ GENPRU 2.2.135R (Notifying the *appropriate regulator* of unusual transactions in relation to indirectly issued capital) and ■ GENPRU 2.2.137 R (Contents of marketing documents in relation to indirectly issued capital) in relation to *consolidated indirectly issued capital* included in *consolidated capital resources*.

8.6.21

FCA PRA

R

Venture Capital Investments

Part 2 of stage M in the *capital resources table* for banks in ■ GENPRU 2 Annex 2 R and the *capital resources table* for building societies in ■ GENPRU 2 Annex 3 R is adjusted so as to read as follows in relation to the deduction of investments in *subsidiary undertakings* and *participations*:

Deductions from the totals of tier one and tier two	(M)
...	...
...	(Part 2 of stage M)
Investments in <i>subsidiary undertakings</i> and <i>participations</i> excluding:	
<p>(1) any amount which is already deducted as <i>material holdings</i> or <i>qualifying holdings</i>; and</p> <p>(2) any investment in an <i>undertaking</i> that meets the following conditions:</p> <p>(a) the investment has been made by a Venture Capital Investor and the <i>firm</i> is entitled to ignore (i) the Venture Capital Investor making that investment in accordance with GENPRU 2.2.209 R (2) or (ii) the Venture Capital Holding Company (or a proportion of it) which holds the Venture Capital Investor in accordance with GENPRU 2.2.209 R (3) for the purposes of determining whether there is a <i>material holding</i>;</p> <p>(b) the investment is a <i>venture capital investment</i>; and</p> <p>(c) the <i>undertaking</i> is not (i) a <i>credit institution</i> or (ii) <i>financial institution</i> the principal activity of which is to perform any activity other than the acquisition of holdings in other <i>undertakings</i>.</p>	

8.7 Consolidated capital resources requirements

General approach

8.7.1

FCA PRA

G

The calculation of the *consolidated capital resources requirement* of a firm's UK consolidation group or non-EEA sub-group involves taking the individual components that make up the *capital resources requirement* on a solo basis and applying them on a consolidated basis. Those components are the capital charge for credit risk (the *credit risk capital requirement*), the capital charge for market risk (the *market risk capital requirement*), the capital charge for operational risk (the *operational risk capital requirement*) and the *fixed overheads requirement*.

8.7.2

FCA PRA

G

Each of the capital charges in ■ BIPRU 8.7.1 G, as applied on a consolidated basis, is called a *consolidated requirement component*. The name of each *consolidated requirement component* reflects the solo capital charge on which it is based. Solo capital charges are called *risk capital requirements*. Thus for example the *consolidated requirement component* for market risk is called the *consolidated market risk requirement*. The calculation of the *consolidated market risk requirement* is based on the calculation of the capital charge for market risk that applies on a solo basis (the *market risk capital requirement*). So the *risk capital requirement* applicable to the *consolidated market risk requirement* is the *market risk capital requirement*.

8.7.3

FCA PRA

G

The first step is for a firm to identify what sort of group it belongs to as the calculation of the *consolidated capital resources requirement* differs between different types of groups. This is set out in ■ BIPRU 8 Annex 5 R (Decision tree for identifying the consolidated capital resources requirement of a UK consolidation group or a non-EEA sub-group).

■ BIPRU 8 Annex 5 R shows, for each type of group:

- (1) which of the *consolidated requirement components* apply and which do not; and
- (2) how to add up the different *consolidated requirement components* to reach the overall *consolidated capital resources requirement*.

8.7.4

FCA PRA

G

■ BIPRU 8 Annex 5 R (Decision tree for identifying the consolidated capital resources requirement of a UK consolidation group or a non-EEA sub-group) categorises groups by reference to what kind of *undertakings* they contain (*credit institutions, limited licence firms, limited activity firms* or *CAD full scope firms*).

8.7.5

FCA PRA

G

In general a firm should calculate each *consolidated requirement component* using the *appropriate regulator's rules*, even in the case of group members who are subject to the

capital requirements of an overseas regulator. However this section sets out certain circumstances in which a *firm* may use the capital requirements of an overseas regulator.

8.7.6

FCA PRA

G

■ BIPRU 8.8 (Advanced prudential calculation approaches) says that a *firm* should not apply an *advanced prudential calculation approach* on a consolidated basis unless the *advanced prudential calculation approach permission* allowing the *firm* to use the *advanced prudential calculation approach* specifically allows it to be used on consolidated basis.

8.7.7

FCA PRA

G

■ BIPRU 8.8 (Advanced prudential calculation approaches) has further details about how capital requirements are calculated on a consolidated basis if a *firm* uses an *advanced prudential calculation approach*.

8.7.8

FCA PRA

G

A *firm* has a choice about how it should apply a *risk capital requirement* to the group. It may do this by treating the whole of the group as a single entity and applying the *risk capital requirement* to the group (a line by line approach), calculating a separate *risk capital requirement* for each group member (an aggregation approach) or a mixture of the two.

8.7.9

FCA PRA

G

A *firm* may make the choice between an aggregation and a line by line approach differently for each *consolidated requirement component*. So for example a *firm* may decide to calculate the *consolidated market risk requirement* on an aggregation basis and the *consolidated fixed overheads requirement* on a line by line basis.

Method of calculation to be used

8.7.10

FCA PRA

R

A *firm* must calculate the *consolidated capital resources requirement* of its *UK consolidation group* or *non-EEA sub-group* in accordance with the method identified by the decision tree in ■ BIPRU 8 Annex 5 R (Decision tree for identifying the consolidated capital resources requirement of a UK consolidation group or a non-EEA sub-group).

Calculation of the consolidated requirement components

8.7.11

FCA PRA

R

A *firm* must calculate a *consolidated requirement component* by applying the *risk capital requirement* applicable to that *consolidated requirement component* to the *UK consolidation group* or *non-EEA sub-group* in accordance with ■ BIPRU 8.7.13 R. Except where ■ BIPRU 8.7.34 R to ■ BIPRU 8.7.38 R allow the requirements of another regulator to be used, the *risk capital requirement* must be calculated in accordance with the *appropriate regulator's rules*. The *risk capital requirement* applicable to a *consolidated requirement component* is the one specified in the second column of the table in ■ BIPRU 8.7.12 R.

8.7.12

FCA PRA

R

Table: Capital charges relating to consolidated requirement components

This table belongs to ■ BIPRU 8.7.11 R

<i>Consolidated requirement component</i>	<i>Rules on which the consolidated requirement component are based (the applicable risk capital requirement)</i>
<i>Consolidated credit risk requirement</i>	<i>Credit risk capital requirement</i>
<i>Consolidated fixed overheads requirement</i>	<i>Fixed overheads requirement</i>
<i>Consolidated market risk requirement</i>	<i>Market risk capital requirement</i>
<i>Consolidated operational risk requirement</i>	<i>Operational risk capital requirement</i>

Choice of consolidation method

8.7.13

FCA PRA

R

- (1) A *firm* must calculate a *consolidated requirement component* by using one of the methods in this *rule*.
- (2) Under the first method a *firm* must:
 - (a) apply the *risk capital requirement* set out in ■ BIPRU 8.7.12 R to each *undertaking* in the *UK consolidation group* or *non-EEA sub-group*; and
 - (b) add the *risk capital requirements* together.
- (3) Under the second method a *firm* must:
 - (a) treat the whole *UK consolidation group* or *non-EEA sub-group* as a single *undertaking*; and
 - (b) apply the *risk capital requirement* set out in ■ BIPRU 8.7.12 R to the group on an accounting consolidation basis.
- (4) The third method is a mixture of methods one and two. Under the third method a *firm* must:
 - (a) treat one or more parts of the *UK consolidation group* or *non-EEA sub-group* as separate single *undertakings*;
 - (b) apply the *risk capital requirement* set out in ■ BIPRU 8.7.12 R to each such part of the group on an accounting consolidation basis;
 - (c) apply the *risk capital requirement* set out in ■ BIPRU 8.7.12 R to each of the remaining *undertakings* in the *UK consolidation group* or *non-EEA sub-group* (if any); and
 - (d) add the *risk capital requirements* together.

(5) *A firm may use different methods for different consolidated requirement components.*

8.7.14

FCA PRA

G

An accounting consolidation basis means applying the *rules* in ■ BIPRU 8.7.12 R on a line by line consolidation basis rather than an aggregation basis.

8.7.15

FCA PRA

G

The provisions of this section on credit risk and *market risk* restrict the choice given by ■ BIPRU 8.7.13 R in certain circumstances.

Notifying the appropriate regulator of the choice of consolidation technique

8.7.16

FCA PRA

R

A firm must notify the appropriate regulator which method under ■ BIPRU 8.7.13 R it applies for which consolidated requirement component and to which parts of the UK consolidation group or non-EEA sub-group it is applying an aggregation approach and to which parts it is applying an accounting consolidation approach.

Special rules for the consolidated credit risk requirement

8.7.17

FCA PRA

R

■ BIPRU 8.7.18 G to ■ BIPRU 8.7.23 R relate to the calculation of the *consolidated credit risk requirement*.

8.7.18

FCA PRA

G

The *credit risk capital requirement* (on which the *consolidated credit risk requirement* is based) is split into three capital charges. One relates to credit risk in the *non-trading book* (the *credit risk capital component*). One relates to credit risk in the *trading book* (the *counterparty risk capital component*). The third is a capital charge for *exposures* in the *trading book* that exceed the limits in ■ BIPRU 10.5 (Limits on exposures). This is called the *concentration risk capital component*.

8.7.19

G

[deleted]

8.7.20

FCA PRA

R

A firm may use a combination of the CCR standardised method, the CCR mark to market method and the CCR internal model method on a permanent basis with respect to the firm's UK consolidation group or non-EEA sub-group for the purposes of calculating the consolidated credit risk requirement. In particular, where the firm is permitted to apply the CCR internal model method on a consolidated basis with respect to its UK consolidation group or non-EEA sub-group, it may combine the use of CCR standardised method and CCR mark to market method on a permanent basis for financial derivative instruments and long settlement transaction not covered by its CCR internal model method permission.

8.7.21

FCA PRA

R

■ BIPRU 9.4.1 R (Minimum requirements for recognition of significant credit risk transfer) as applied on a consolidated basis requires the transfer to be to a *person* outside the *UK consolidation group* or *non-EEA sub-group*.

8.7.22

FCA PRA

R

A *firm* must not use both the *financial collateral simple method* and the *financial collateral comprehensive method* with respect to its *UK consolidation group* or *non-EEA sub-group*.

8.7.23

FCA PRA

R

- (1) A *firm* may only treat an *exposure* as exempt under ■ BIPRU 3.2.25 R (Zero risk-weighting for intra-group exposures) as applied on a consolidated basis if the member of the *UK consolidation group* or *non-EEA sub-group* that has the *exposure*:
- (a) is a *BIPRU firm* and that *exposure* is exempt under ■ BIPRU 3.2.25 R as it applies to that *BIPRU firm* on a solo basis; or
 - (b) meets the conditions in ■ BIPRU 3.2.25 R (1)(d) (Condition relating to establishment in the *UK*) and that *exposure* would be exempt under (a) if that member was a *BIPRU firm*.
- (2) The notification obligation in ■ BIPRU 3.2.35 R applies.

Special rules for the consolidated market risk requirement

8.7.24

FCA PRA

R

For the purposes of calculating the *consolidated market risk requirement* of a *UK consolidation group* or *non-EEA sub-group*, a *firm* must apply ■ BIPRU 1.2.3 R (Definition of the trading book) and ■ BIPRU 1.2.17 R (Size thresholds for the purposes of the definition of the trading book) to the whole *UK consolidation group* or *non-EEA sub-group* as if the group were a single *undertaking*.

8.7.25

FCA PRA

R

A *firm* may not apply the second method in ■ BIPRU 8.7.13 R (3) (accounting consolidation for the whole group) or apply accounting consolidation to parts of its *UK consolidation group* or *non-EEA sub-group* under method three as described in ■ BIPRU 8.7.13 R (4)(a) for the purposes of the calculation of the *consolidated market risk requirement* unless the group or sub-group and the *undertakings* in that group or sub-group satisfy the conditions in this *rule*. Instead the *firm* must use the aggregation approach described in ■ BIPRU 8.7.13 R (2) (method one) or ■ BIPRU 8.7.13 R (4)(c). Those conditions are as follows:

- (1) each of the *undertakings* in that group or sub-group is an *institution* that is:
 - (a) a *BIPRU firm*;
 - (b) an *EEA firm*;
 - (c) a *recognised third country credit institution*; or
 - (d) a *recognised third country investment firm*;
- (2) each of the *undertakings* referred to in (1) that is a *BIPRU firm* has *capital resources* that are equal to or in excess of its *capital*

resources requirement and complies with ■ BIPRU 10 (Large exposures requirements);

- (3) each of the *undertakings* referred to in (1) that is an *EEA firm* complies with the *CRD implementation measures* in its *EEA State* that correspond to the requirements in (2);
- (4) each of the *undertakings* referred to in (1) that is a *recognised third country credit institution* or *recognised third country investment firm* complies with laws in the state or territory in which it has its head office that are equivalent to the requirements of the *Banking Consolidation Directive* or *Capital Adequacy Directive* relating to capital adequacy and concentration risk;
- (5) there is no material legal, regulatory or contractual impediment to the transfer of funds between those *undertakings* in that group or sub-group;
- (6) there is no material legal, regulatory or contractual impediment to mutual financial support between those *undertakings* in that group or sub-group;
- (7) the *market risk position* of the *undertakings* are monitored and managed on a co-ordinated basis; and
- (8) there is satisfactory allocation of capital within the group or sub-group.

Special rules for the consolidated operational risk requirement

8.7.26

FCA PRA

R

For the purposes of calculating the *consolidated operational risk requirement*, a *firm* must apply ■ BIPRU 6.2.9 R to ■ BIPRU 6.2.12 R (Combination of different methodologies) to the whole *UK consolidation group* or *non-EEA sub-group* as if the group were a single *undertaking*.

8.7.27

FCA PRA

R

- (1) This *rule* sets out how ■ BIPRU 6.3.2 R (3) (Negative figure arising in calculation of the relevant indicator under the *basic indicator approach*) applies on a consolidated basis.
- (2) If the calculation for any individual *undertaking* under method one in ■ BIPRU 8.7.13 R (2) (application of aggregation approach to the whole group) or method three as described in ■ BIPRU 8.7.13 R (4)(c) (mixture of aggregation and accounting consolidation) or for any sub-group created under method three as described in ■ BIPRU 8.7.13 R (4)(a) results in a figure of zero or a negative figure, that figure must be excluded.
- (3) If a *firm* is using method two in ■ BIPRU 8.7.13 R (accounting consolidation approach for the whole group), ■ BIPRU 6.3.2 R (3)

applies to the *UK consolidation group* or *non-EEA sub-group* as if it were a single *undertaking*.

- (4) (3) also applies to a sub-group created under method 3 as described in ■ BIPRU 8.7.13 R (4)(a).

Special rules for calculating specific consolidated requirement components

8.7.28

FCA PRA

G

■ BIPRU 8.7.21 R to ■ BIPRU 8.7.26 R are generally examples of the application of the general principles in ■ BIPRU 8.2.1 R (Main consolidation rule for UK consolidation groups) and ■ BIPRU 8.3.1 R (Main consolidation rule for non-EEA sub-groups). ■ BIPRU 8.7.20 R and ■ BIPRU 8.7.25 R are exceptions to those principles.

Elimination of intra-group transactions

8.7.29

FCA PRA

R

In accordance with ■ BIPRU 8.2.1 R and ■ BIPRU 8.3.1 R (The basic consolidation rules for a *UK consolidation group* or *non-EEA sub-group*), a *firm* may exclude that part of the *risk capital requirement* that arises as a result of:

- (1) (in respect of the *consolidated credit risk requirement*) intra-group balances; or
- (2) (in respect of the *consolidated operational risk requirement* and *consolidated fixed overheads requirement*) intra-group transactions;

with other *undertakings* in the *UK consolidation group* or *non-EEA sub-group*.

Other provisions about calculating risk capital requirements

8.7.30

FCA PRA

R

- (1) This rule applies when the rules applicable under ■ BIPRU 8.7.12 R apply differently for different types of *firms*.
- (2) Where a *firm's UK consolidation group* or *non-EEA sub-group* is a group identified at Stage 1 in ■ BIPRU 8 Annex 5 R (Decision tree for identifying the consolidated capital resources requirement of a UK consolidation group or a non-EEA sub-group), the rules that apply are those that apply to a *bank* that is a *BIPRU firm*.
- (3) Where a *firm's UK consolidation group* or *non-EEA sub-group* is a group identified at Stage 2 in ■ BIPRU 8 Annex 5 R, the rules that apply are those that apply to a *full scope BIPRU investment firm*.
- (4) Where a *firm's UK consolidation group* or *non-EEA sub-group* is a group identified at Stage 3 in ■ BIPRU 8 Annex 5 R, the rules that apply are those that apply to a *BIPRU limited activity firm*.

- (5) Where a *firm's UK consolidation group* or *non-EEA sub-group* is a group identified at Stage 4 in ■ BIPRU 8 Annex 5 R, the rules that apply are those that apply to a *BIPRU limited licence firm*.

8.7.31

FCA PRA

G

If a *firm* is calculating a *risk capital requirement* for an *undertaking* that is not a *BIPRU firm* it should calculate it as if the *undertaking* were a *BIPRU firm*.

8.7.32

FCA PRA

G

Similarly ■ BIPRU 8.7.30 R may have the effect that the *risk capital requirement* for a *BIPRU firm* is calculated differently from the way it is on a solo basis. Thus for example if the *risk capital requirement* is being calculated for a *BIPRU limited licence firm* that is a *subsidiary undertaking* of a *bank* the *risk capital requirement* should be calculated using the rules for a *bank*.

8.7.33

FCA PRA

G

A *firm* should not use an *advanced prudential calculation approach* for calculating a *risk capital requirement* unless this is permitted as explained in ■ BIPRU 8.8 (Advanced prudential calculation approaches).

Use of the solo requirements of another EEA competent authority

8.7.34

FCA PRA

R

A *firm* may calculate the *risk capital requirement* for an *institution* in the *firm's UK consolidation group* or *non-EEA sub-group* that is an *EEA firm* in accordance with the *CRD implementation measures* in the *EEA firm's EEA State* that correspond to the *appropriate regulator's rules* that would otherwise apply under this section if the *institution* is subject to those *CRD implementation measures*.

8.7.35

R

(1) [deleted]

(2) [deleted]

8.7.36

G

[deleted]

Use of the consolidated requirements of another EEA competent authority

8.7.37

FCA PRA

R

(1) This rule applies if:

- (a) a *firm* is applying an accounting consolidation approach to part of its *UK consolidation group* or *non-EEA sub-group* under method three as described in ■ BIPRU 8.7.13 R (4)(a); and
- (b) the part of the group in (a) constitutes the whole of a group subject to the consolidated capital requirements of a *competent authority* under the *CRD implementation measures* relating to consolidation under the *Banking Consolidation Directive* or the *Capital Adequacy Directive*.

(2) If the conditions in this rule are satisfied, a *firm* may apply the consolidated capital requirement in (1)(b) as the *risk capital requirement* for the group identified in (1)(a) so far as that

consolidated capital requirement corresponds to the *appropriate regulator's rules* that would otherwise apply under this section.

8.7.38 **R** [deleted]

Prohibition on using the standardised rules of a regulator outside the EEA

8.7.38A **R** (1) This *rule* applies to a *firm* if:

FCA **PRA**

- (a) an *institution* in its *UK consolidation group* or *non-EEA sub-group* is subject to any of the rules or requirements of, or administered by, a *third-country competent authority* applicable to its *financial sector* that correspond to the *sectoral rules* applicable to that *financial sector* ("corresponding sectoral rules"); or
- (b) a part of its *UK consolidation group* or *non-EEA sub-group* constitutes the whole of a group subject to the consolidated capital requirements of a *third-country competent authority* under the corresponding sectoral rules applicable to the *banking sector* or the *investment services sector* for a state or territory outside the *EEA*.

- (2) A *firm* may not use the requirements under any of the corresponding sectoral rules of a state or territory outside the *EEA* in order to calculate the *consolidated capital resources requirement* of its *UK consolidation group* or *non-EEA sub-group* for the purpose of this chapter.

Use of an advanced prudential calculation approach under the rules of an overseas regulator

8.7.39 **G** A *firm* should not use the requirements of an overseas regulator if that would involve the use of an *advanced prudential calculation approach* unless this is permitted under

FCA **PRA**

- BIPRU 8.8 (Advanced prudential calculation approaches).

8.8 Advanced prudential calculation approaches

General

8.8.1

FCA PRA

R

A *firm* must not apply any *advanced prudential calculation approach* for the purposes of this chapter unless it has an *advanced prudential calculation approach permission* and that *advanced prudential calculation approach permission* requires the *firm* to use that *advanced prudential calculation approach* for those purposes.

8.8.2

FCA PRA

G

■ BIPRU 1.3 (Applications for advanced approaches) deals with how to apply for an *advanced prudential calculation approach permission*.

Prohibition on using the rules of an overseas regulator

8.8.3

FCA PRA

R

Even if a *firm* has an *advanced prudential calculation approach permission* that allows it to use an *advanced prudential calculation approach* for the purposes of this chapter, the *firm* may not use the requirements of another state or territory to the extent they provide for that *advanced prudential calculation approach*. Therefore a *firm* may not use ■ BIPRU 8.7.34 R and ■ BIPRU 8.7.37 R (Use of the capital requirements of another EEA competent authority) if that would involve using an *advanced prudential calculation approach*.

Special provisions relating to the internal ratings based approach

8.8.4

FCA PRA

R

The conditions in ■ BIPRU 4.2.26 R (Combined use of methodologies under the IRB approach) apply to a *firm's UK consolidation group* or *non-EEA sub-group* as if that group were a single *undertaking*.

Special provisions relating to the advanced measurement approach

8.8.5

FCA PRA

R

■ BIPRU 6.5.27 R (6) (Insurance should be provided by a third party entity for the purposes of the advanced measurement approach) is amended to provide that the insurance must be provided by an *undertaking* that is not in the same *group* as the *firm* or other members of the *UK consolidation group* or *non-EEA sub-group*. In the case of insurance through captives and affiliates, the exposure must be laid off to an independent *undertaking* that is not in the same *group* as the *firm* or other members of the *UK consolidation group* or *non-EEA sub-group*, for example through reinsurance that meets the eligibility criteria.

8.8.6

FCA PRA

G

In the case of insurance through captives and affiliates, the *exposure* should be laid off outside the *firm's group* to an independent third party.

8.8.7

FCA PRA

G

■ BIPRU 8.7.26 R deals with the combination of the *advanced measurement approach* with other approaches to *operational risk* on a group level.

Special provisions relating to the CCR internal model method

8.8.8

FCA PRA

G

■ BIPRU 8.7.17 R deals with the combination of the *CCR internal model method* with other approaches to calculating exposure values on a group level.

Corporate governance arrangement for the IRB approach and the AMA

8.8.9

FCA PRA

G

The governance arrangements that apply to the *governing body*, the senior management and any *designated committee* of a *firm* in relation to the *IRB approach* or the *AMA* also apply to the body or *persons* with equivalent powers with respect to the *UK consolidation group* or *non-EEA sub-group*. Where the *parent undertaking* and its *subsidiary undertakings* use rating systems on a unified basis, the approval and reporting process described in ■ BIPRU 4.3.12 G (Approval and reporting arrangements for the *IRB approach* where rating systems are used on a unified group basis) and ■ BIPRU 6.5.32 G (Approval and reporting arrangements for the *AMA* where rating systems are used on a unified group basis) apply for the purpose of this paragraph too.

8.9A Consolidated large exposure requirements

Integrated groups: core UK group and non-core large exposures group

8.9A.1

R

FCA PRA

- (1) ■ BIPRU 10 (Large exposures) applies to a *firm's UK consolidation group* or (subject to (2)) *non-EEA sub-group* as if it were a single *undertaking*.
- (2) A *firm* may exempt the *exposures* of its *non-EEA sub-group* to its *core concentration risk group counterparty* or *non-core concentration risk group counterparty* from the limits in ■ BIPRU 10.5 (Limits on exposures) that apply to the *non-EEA sub-group* on a sub-consolidated basis.

8.9A.2

G

FCA PRA

The effect of ■ BIPRU 8.9A.1R (2) is that there is no limit on a sub-consolidated basis for *exposures* of a *firm's non-EEA sub-group* to its *core concentration risk group counterparty* or *non-core concentration risk group counterparty*. This is because those *exposures* are included in the *large exposure* limits that apply to the *firm's UK consolidation group*.

8.9A.3

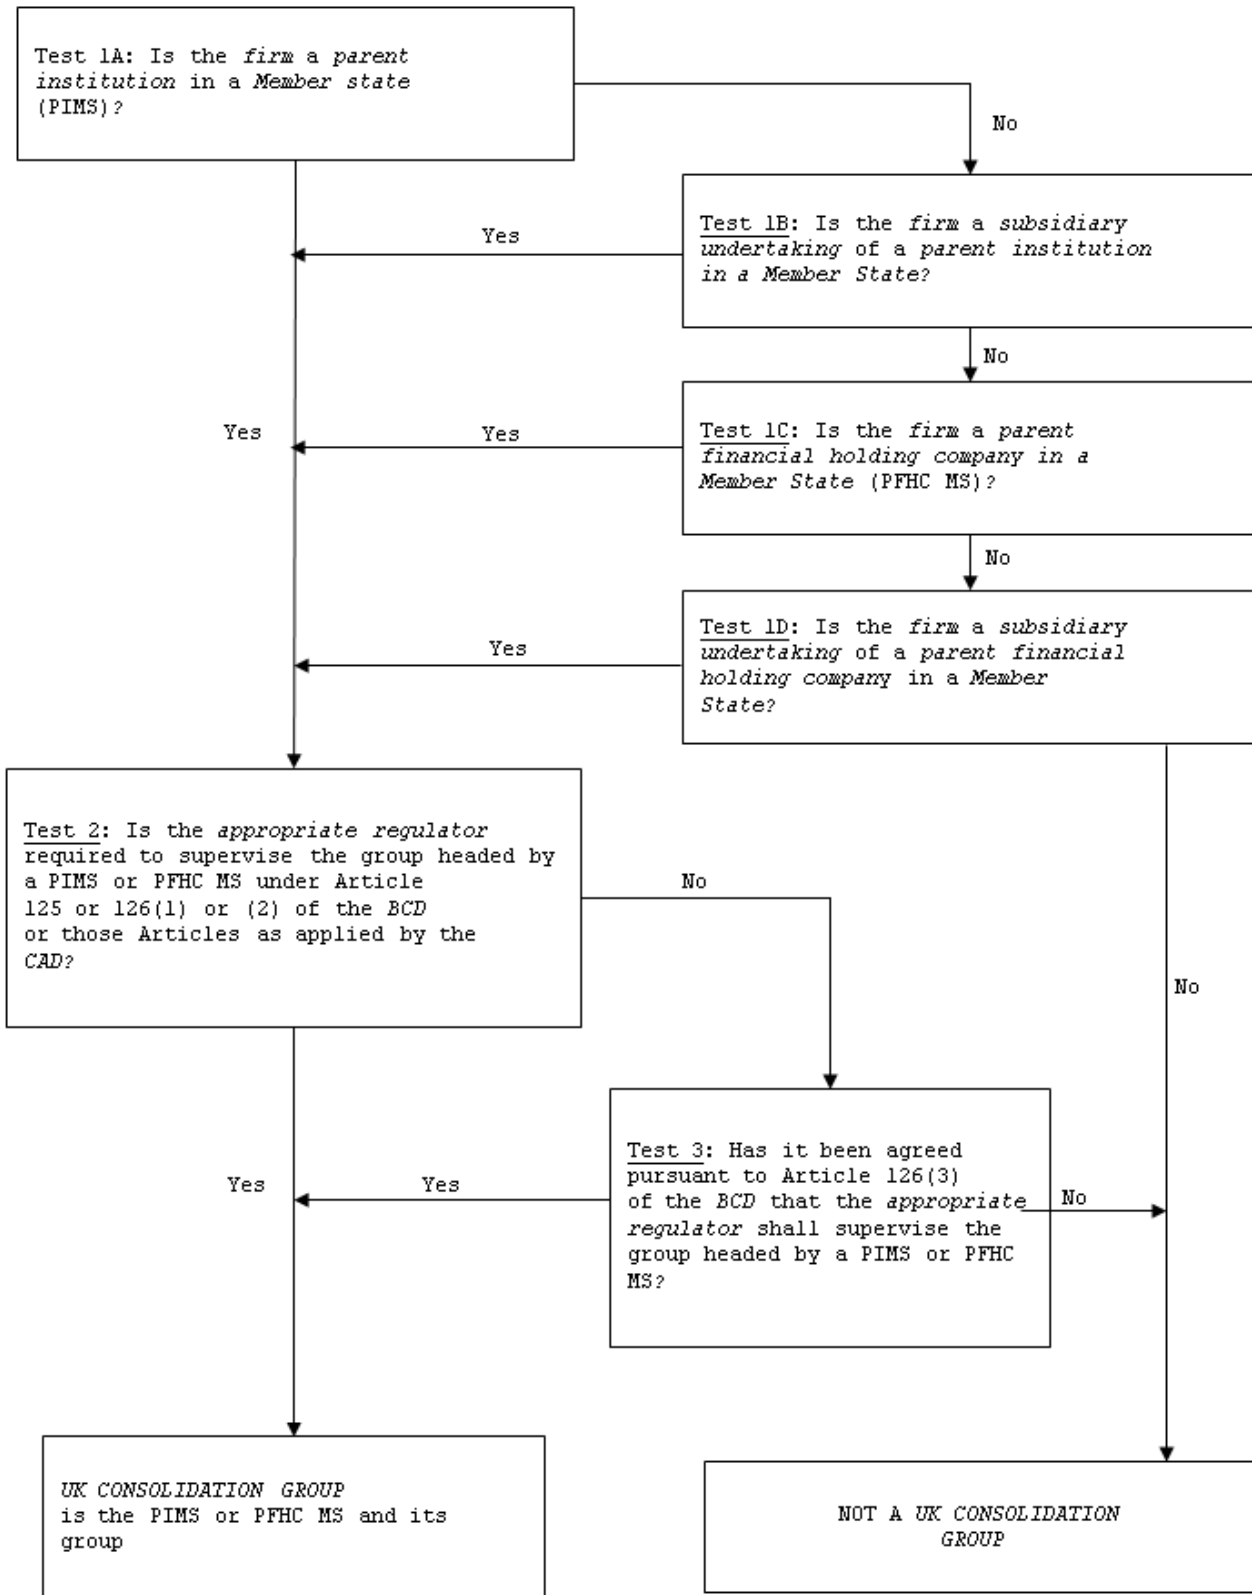

R

FCA PRA

In relation to a *firm*, *intra-group exposures* that are exempt under a *non-core large exposures group waiver* may be excluded when calculating the limits in ■ BIPRU 10.5 (Limits on exposures) that apply to the *UK consolidation group* or *non-EEA sub-group*, provided that the total amount of such *exposures* and the other *exposures* which are exempt under a *non-core large exposures group waiver* do not exceed the limit in ■ BIPRU 10.9A.7 R (Non-trading book backstop large exposure limit for non-core large exposures group).

Decision tree identifying a UK consolidation group

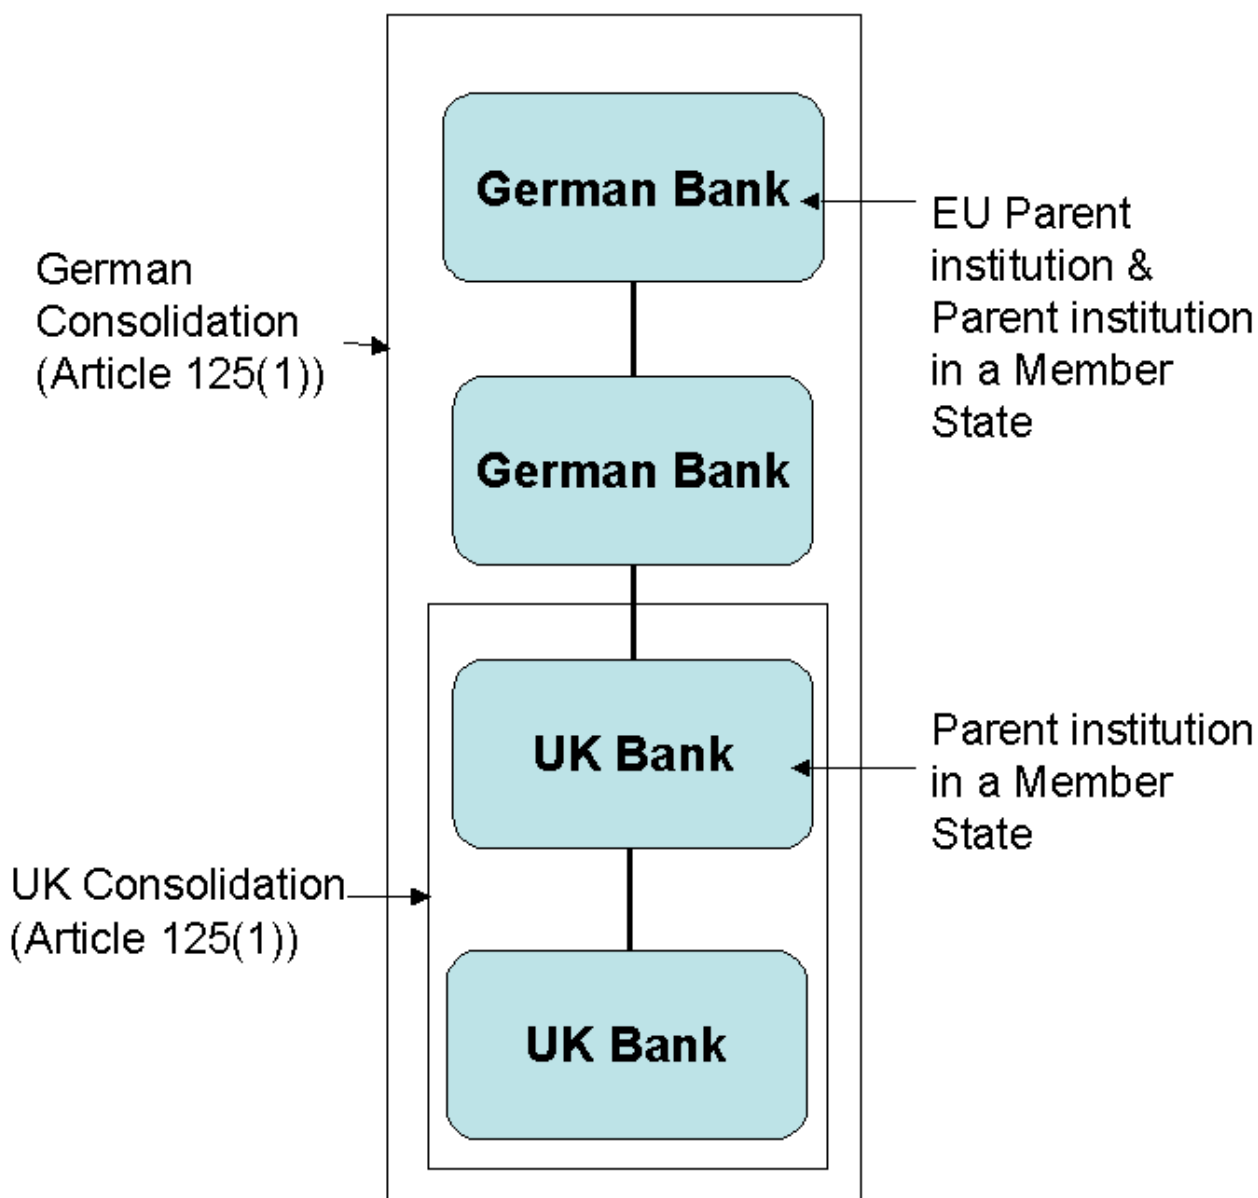

FCA PRA

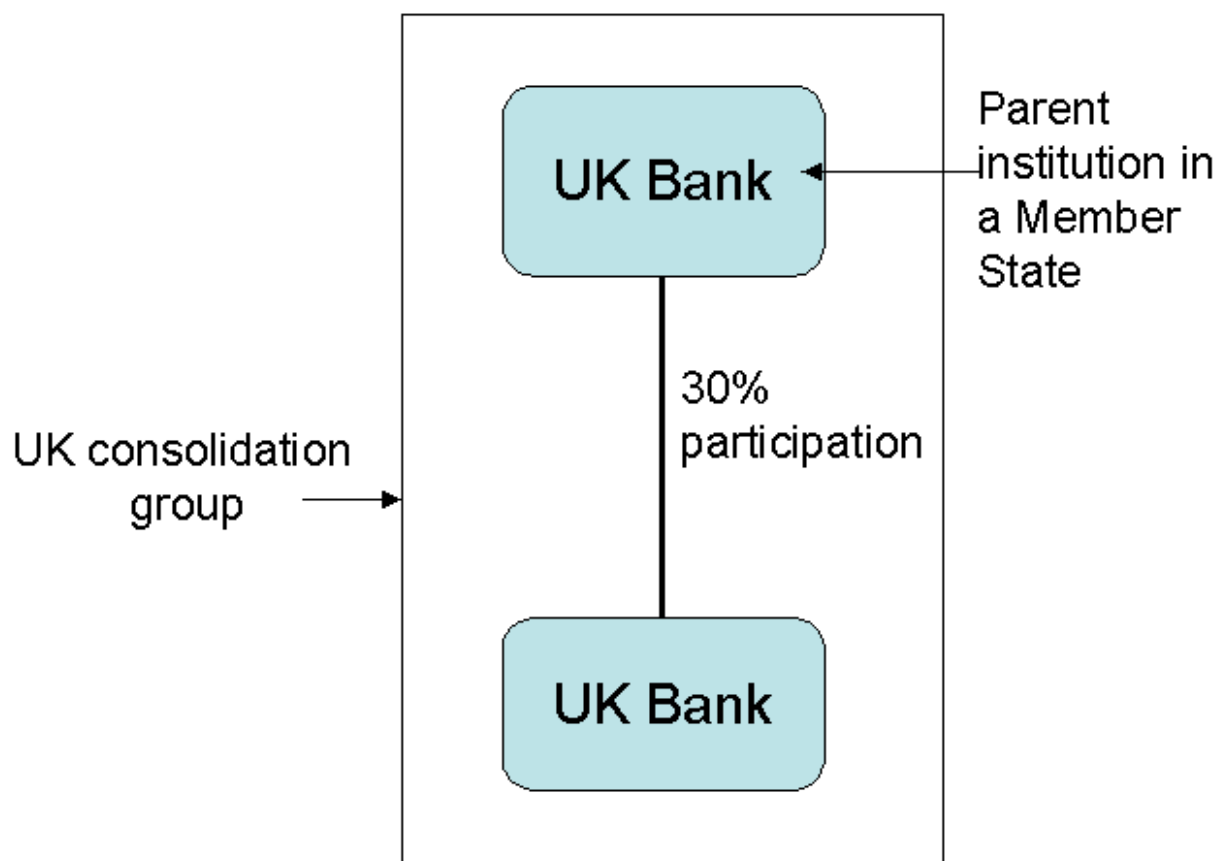

Examples of how to identify a UK consolidation group

FCA **PRA**

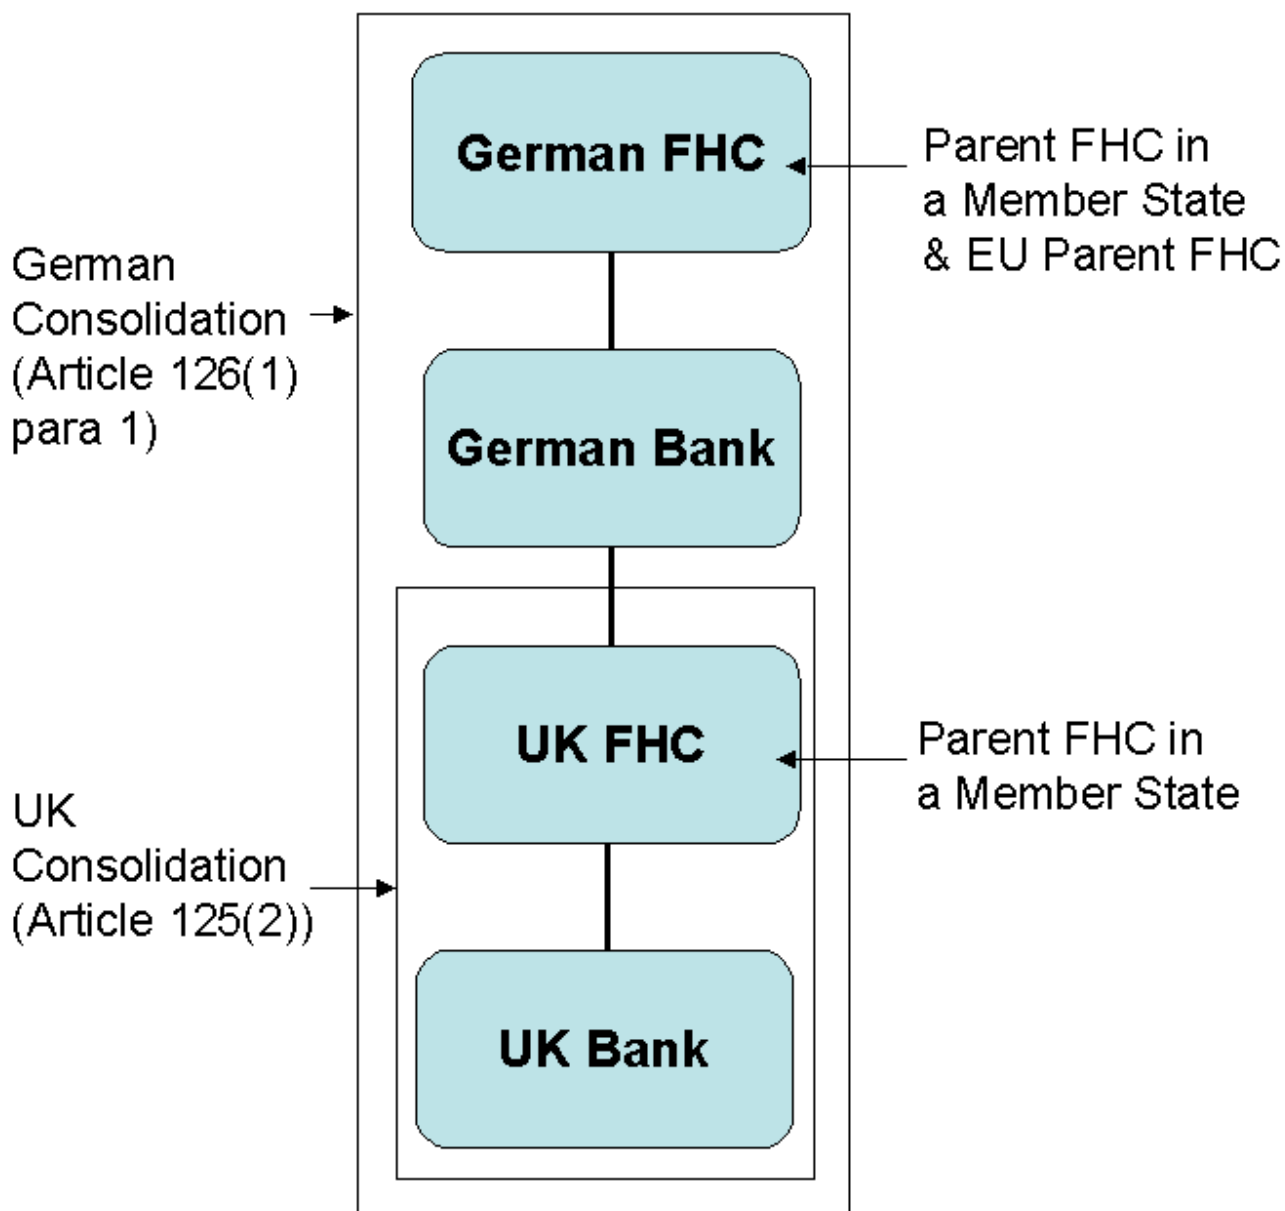

Example 1
(example of Article 125 (1))

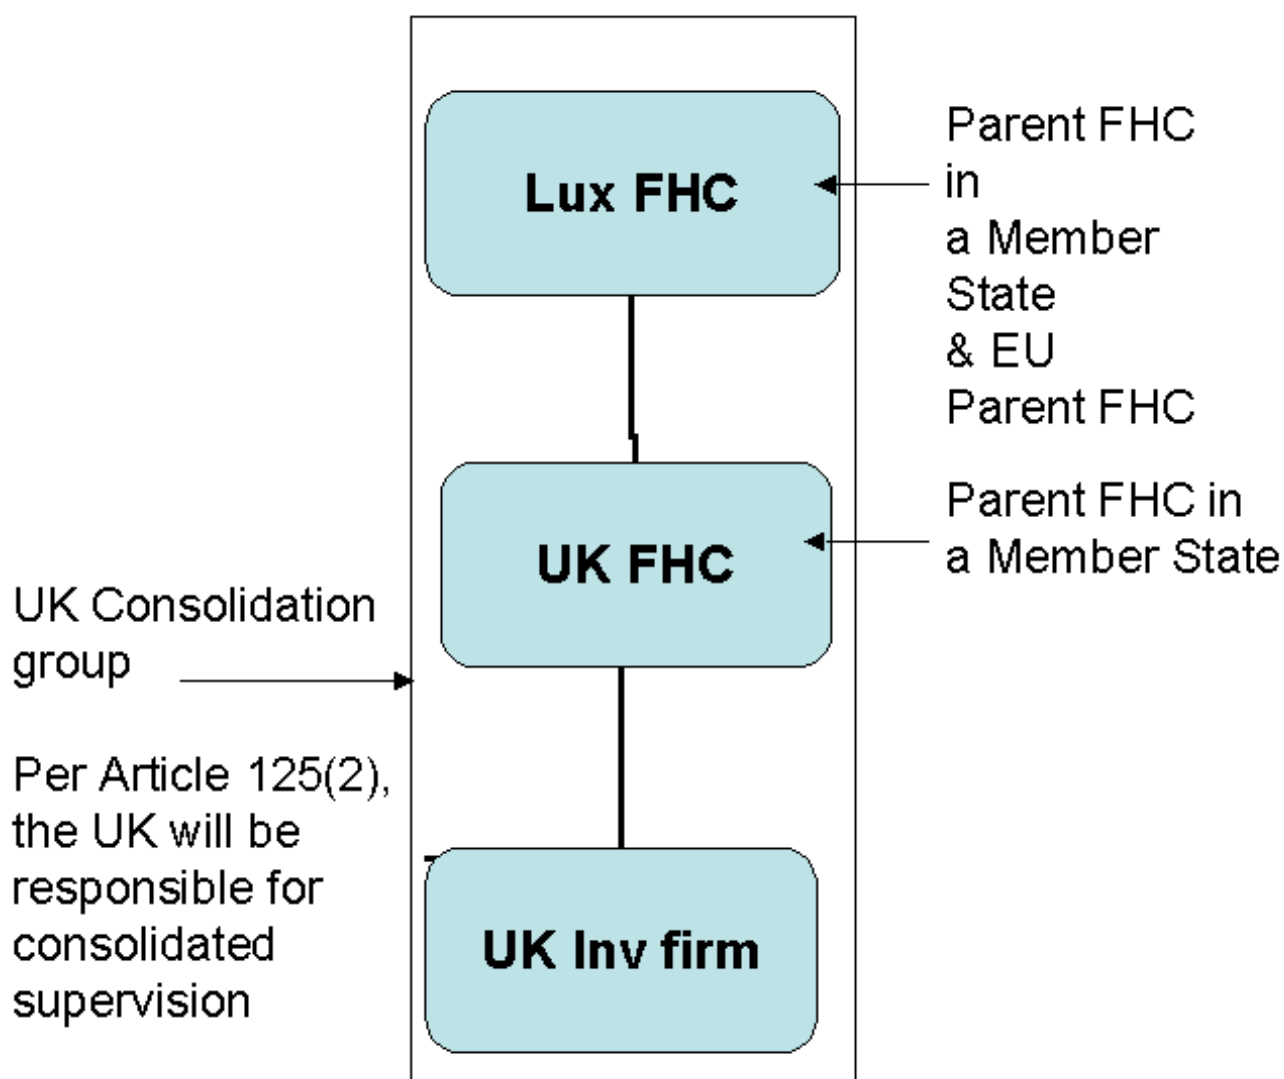

Example 2 (example of Article 125 (1))

Example 3 (example of Article 125 (2))

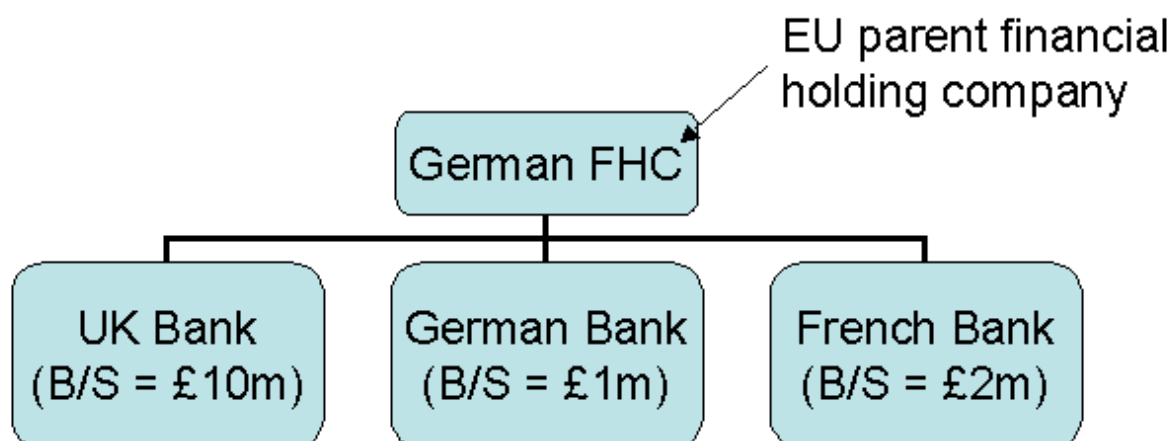

Example 4 (example of Article 125 (2))

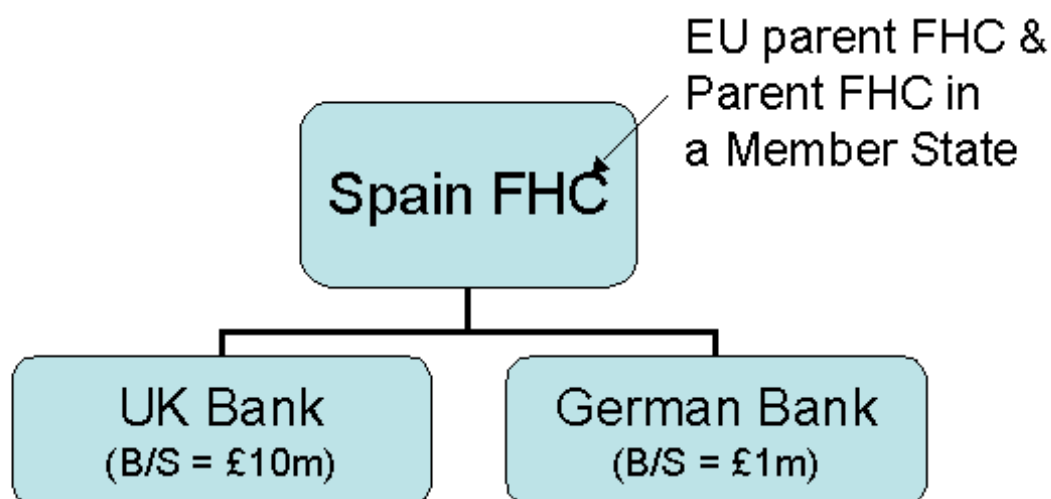

Example 5 (example of Article 126 (1) para 1)

Germany will be responsible for consolidated supervision

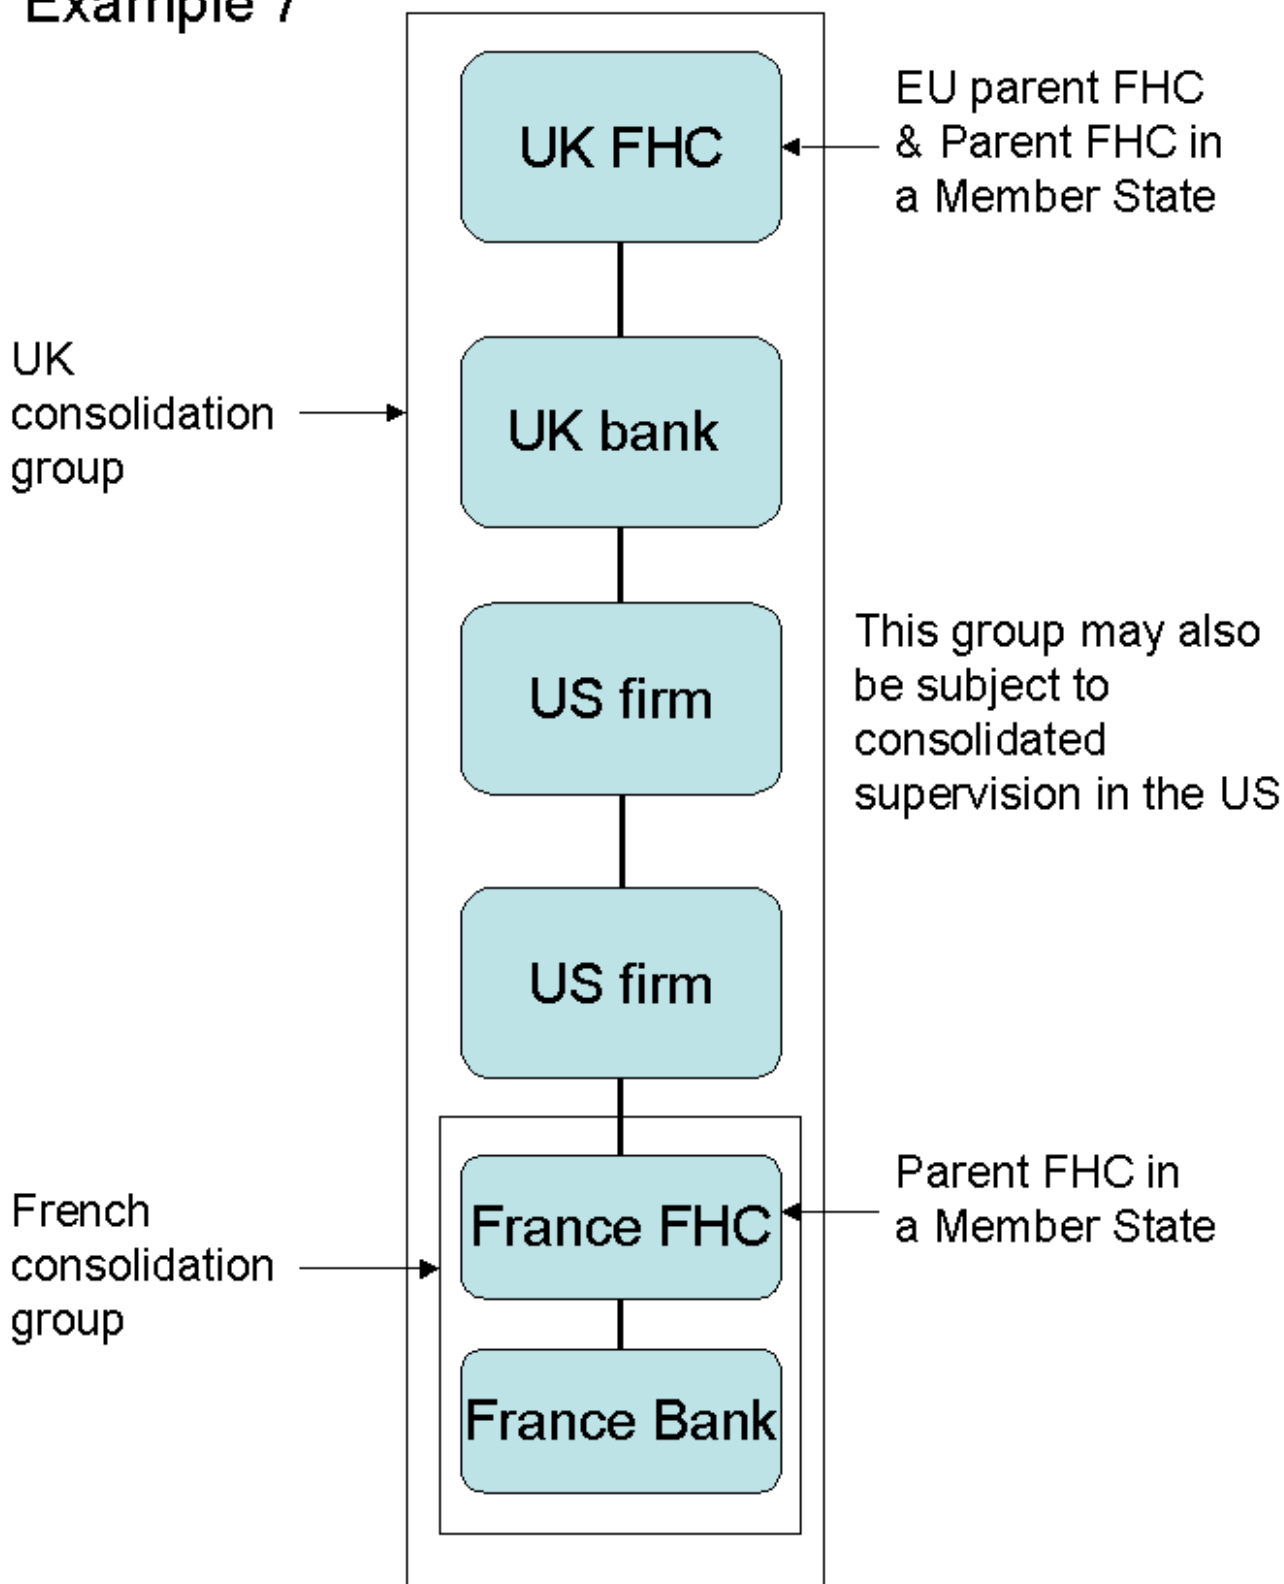

Example 6 (example of Article 126 (2))

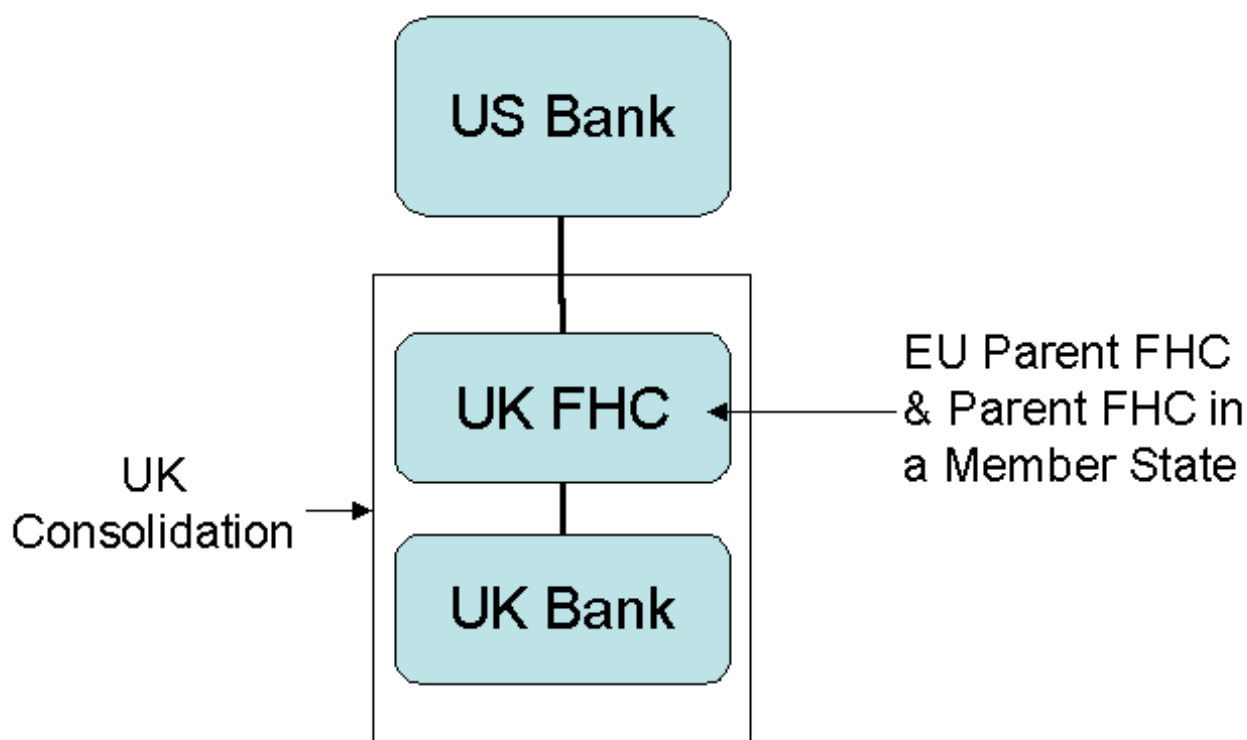

UK will be responsible for consolidated supervision

Example 7

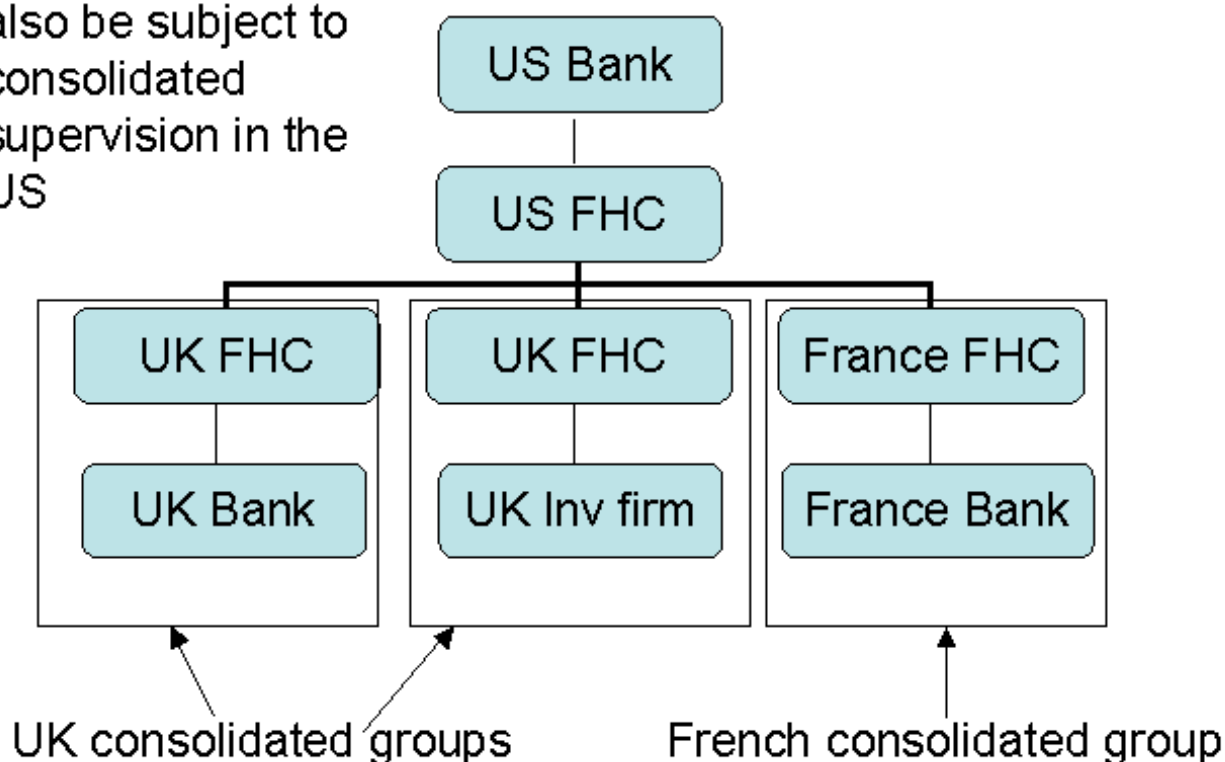

Example 8 (example of a group headed up by a non-EEA parent)

The UK firms, as well as being members of a UK consolidation group and subject to BIPRU 8, are members of a third country group and subject to GENPRU 3.2.

Example 9 (example of a group headed up by a non-EEA parent)

This group may
also be subject to
consolidated
supervision in the
US

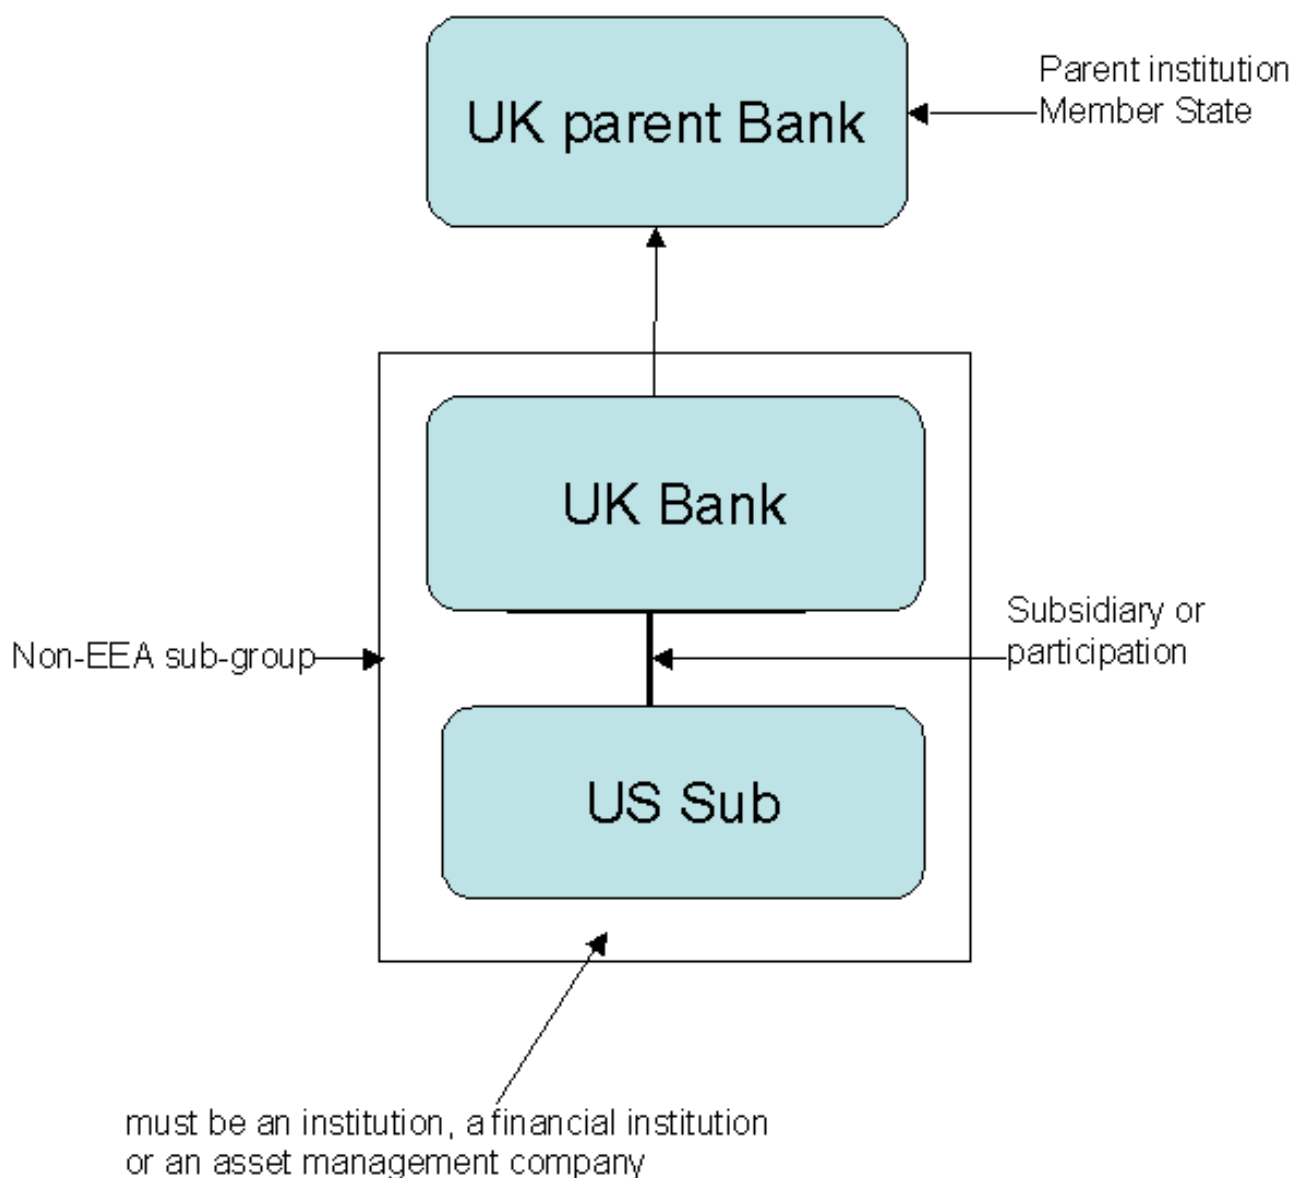

The UK firms, as well as being members of a UK consolidation group and subject to BIPRU 8, are members of a third country group and subject to GENPRU 3.2.

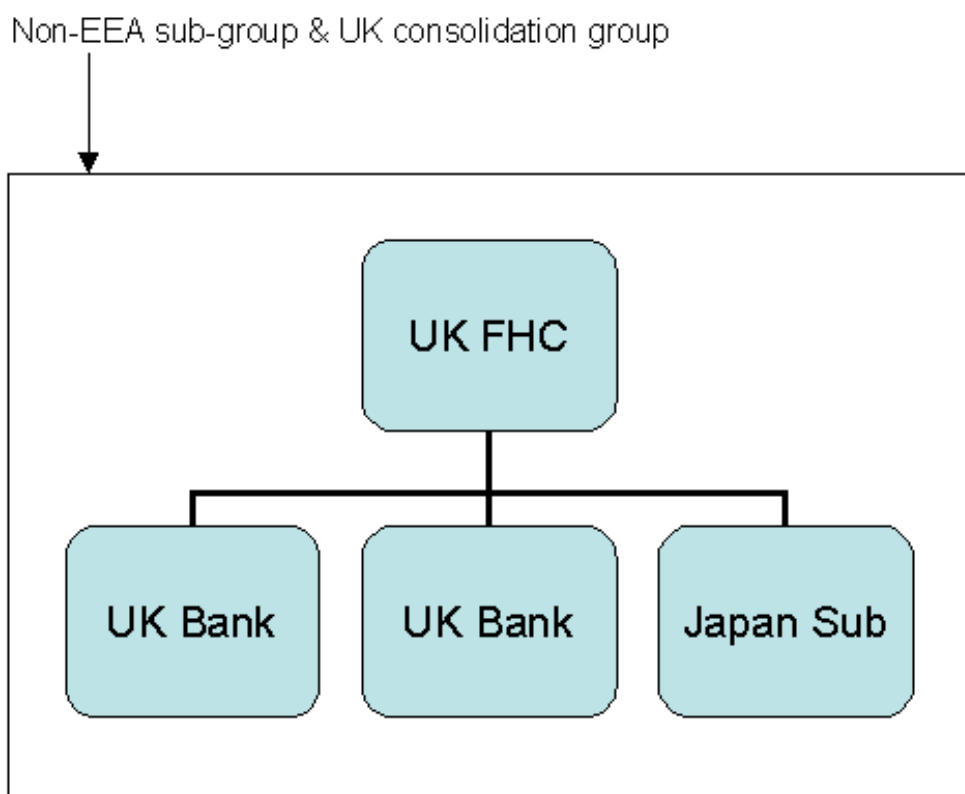

Examples of how to identify a non-EEA sub-group

Example 6

(example refers to BIPRU 8.3.24)

Text of Articles 125 and 126 of the Banking Consolidation Directive

FCA **PRA**

Article 125

1. Where a parent undertaking is a parent credit institution in a Member State or an EU parent credit institution, supervision on a consolidated basis shall be exercised by the competent authorities that authorised it under Article 6.
2. Where the parent of a credit institution is a parent financial holding company in a Member State or an EU parent financial holding company, supervision on a consolidated basis shall be exercised by the competent authorities that authorised that credit institution under Article 6.

Article 126

1. Where credit institutions authorised in two or more Member States have as their parent the same parent financial holding company in a Member State or the same EU parent financial holding company, supervision on a consolidated basis shall be exercised by the competent authorities of the credit institution authorised in the Member State in which the financial holding company was set up.

Where the parents of credit institutions authorised in two or more Member States comprise more than one financial holding company with head offices in different Member States and there is a credit institution in each of these States, supervision on a consolidated basis shall be exercised by the competent authority of the credit institution with the largest balance sheet total.
2. Where more than one credit institution authorised in the Community has as its parent the same financial holding company and none of these credit institutions has been authorised in the Member State in which the financial holding company was set up, supervision on a consolidated basis shall be exercised by the competent authority that authorised the credit institution with the largest balance sheet total, which shall be considered, for the purposes of this Directive, as the credit institution controlled by an EU parent financial holding company.
3. In particular cases, the competent authorities may by common agreement waive the criteria referred to in paragraphs 1 and 2 if their application would be inappropriate, taking into account the credit institutions and the relative importance of their activities in different countries, and appoint a different competent authority to exercise supervision on a consolidated basis. In these cases, before taking their decision, the competent authorities shall give the EU parent credit institution, or EU parent financial holding company, or credit institution with the largest balance sheet total, as appropriate, an opportunity to state its opinion on that decision.
4. [Omitted]

Note

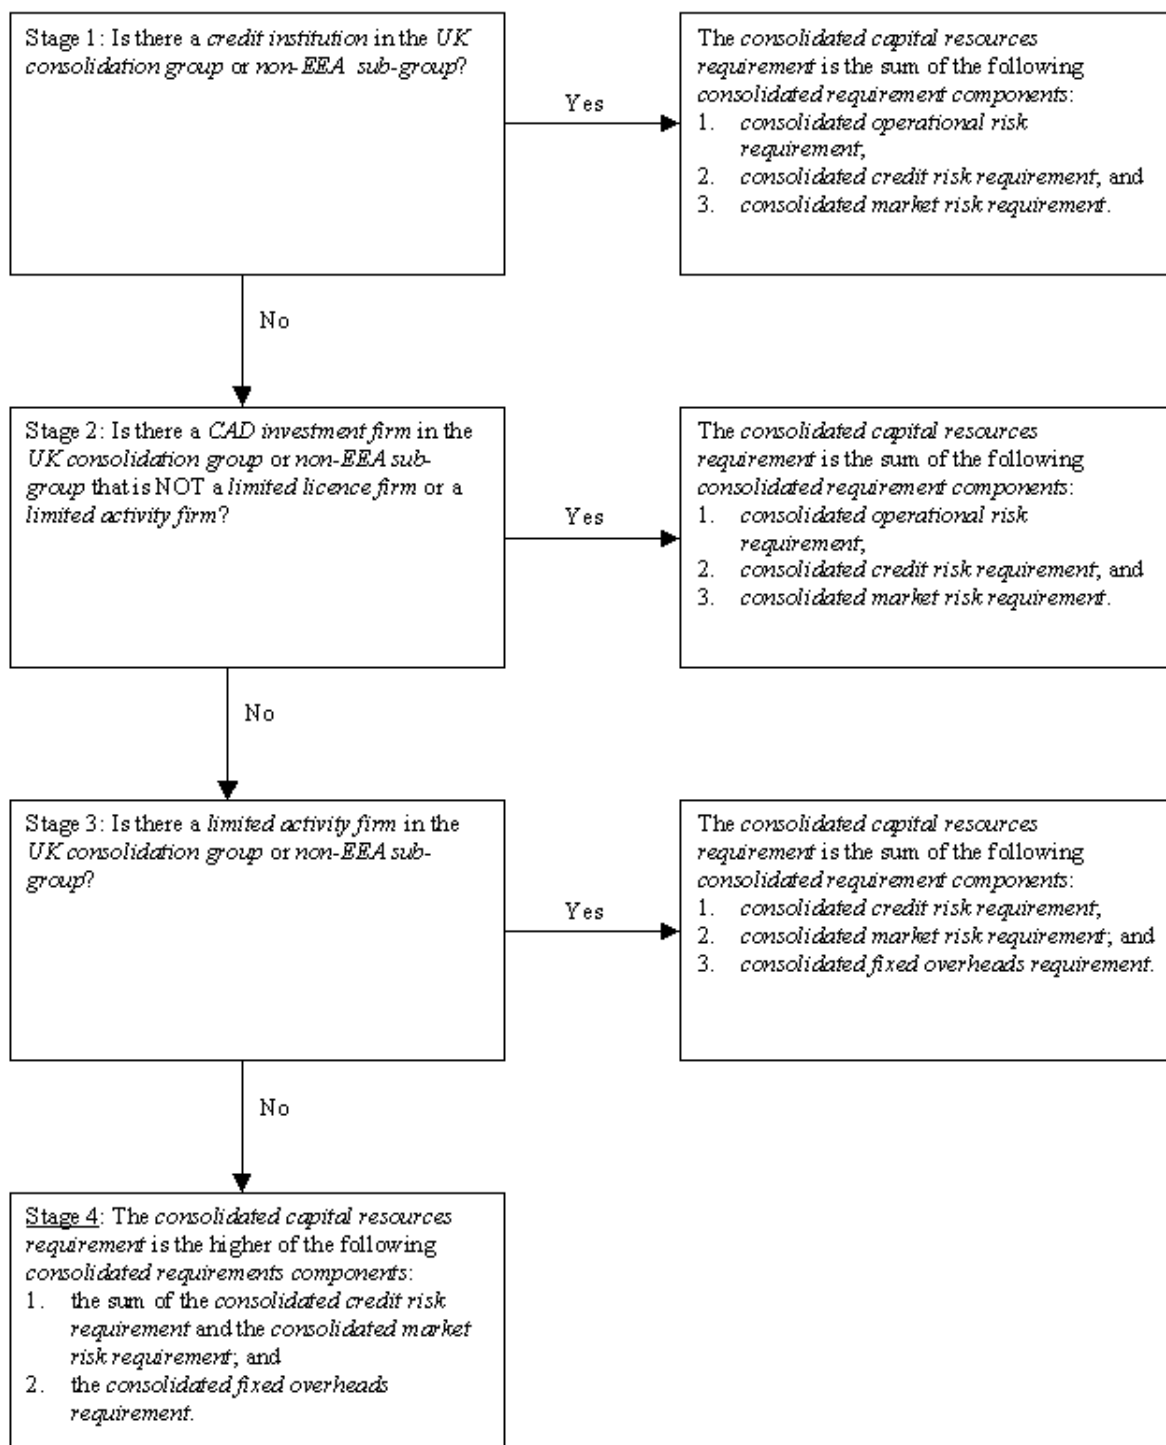

The *Capital Adequacy Directive* says that generally references in Articles 125 and 126 of the *Banking Consolidation Directive* to *credit institution* should be read as including ones to *CAD investment firms*. Also, the *Banking Consolidation Directive* and the *Capital Adequacy Directive* apply to the *EEA*. Therefore for the purposes of BIPRU 8 Articles 125 and 126 of the *Banking Consolidation Directive* should be read with the following adjustments:

- (1) a reference to a credit institution should be read as being one to a *credit institution* or *CAD investment firm*;
- (2) a reference to a parent credit institution in a Member State should be read as being one to a *parent institution in a Member State*;
- (3) a reference to a EU parent credit institution should be read as being one to an *EEA parent institution*;
- (4) a reference to a EU parent financial holding company should be read as being one to an *EEA parent financial holding company*;
- (5) a reference to a Member State should be read as being one to an *EEA State*;
- (6) a reference to a credit institution authorised in the Community should be read as being one to a *credit institution* or *CAD investment firm* authorised in an *EEA State*.

Parent financial holding company in a Member State and financial holding company have the same meaning as they do in the *Glossary*.

Decision tree for identifying the consolidated capital resources requirement of a UK consolidation group or a non-EEA sub-group.

Chapter 9

Securitisation

9.1 Application and purpose

Application

9.1.1

FCA PRA

R

■ BIPRU 9.1 applies to a *BIPRU firm*, with the exception of the *rules* in ■ BIPRU 9.3.15R to ■ BIPRU 9.3.20R (dealing with origination criteria and disclosure requirements) and the *rules* in ■ BIPRU 9.15 (dealing with requirements for investors) which apply exclusively to *credit institutions*.

Purpose

9.1.2

FCA PRA

G

The purpose of ■ BIPRU 9 is to implement:

- (1) Articles 94 to 96, paragraphs (1) and (5) of Article 97 , Article 99, Article 100(1) and Article 101;
- (2) Points 8 and 9 of Annex V; and
- (3) Parts 2, 3 (in part) and 4 of Annex IX;

of the *Banking Consolidation Directive*.

General obligations: Risk-weighted exposures

9.1.3

FCA PRA

R

A *firm* must calculate the *risk weighted exposure amount* for *securitisation positions* in accordance with ■ BIPRU 9.

9.1.4

FCA PRA

G

A *firm* should apply the *securitisation* framework set out in this chapter for determining regulatory capital requirements on *exposures* arising from *traditional securitisations* and from *synthetic securitisations* and from structures that contain features of both.

9.1.5

FCA PRA

G

Since transactions may be structured in many different ways, the capital treatment of a position should be determined on the basis of its economic substance rather than merely its legal form. A *firm* should look to the economic substance of a transaction to determine whether the *securitisation* framework is applicable for purposes of determining regulatory capital. A *firm* should consult the *appropriate regulator* when there is uncertainty about whether a given transaction should be considered a *securitisation*.

General obligations: Systems

9.1.6

FCA PRA

R

The risks arising from *securitisation* transactions in relation to which a *firm* is investor, *originator* or *sponsor*, including reputational risks, must be evaluated and addressed through appropriate policies and procedures, to ensure in particular that the economic substance of the transaction is fully reflected in risk assessment and management decisions.

[Note: BCD Annex V point 8]

9.1.7

FCA PRA

G

A *firm* that is a party to a *securitisation* should fully understand the risks it has assumed or retained. In particular it should do so in order that it can correctly determine in accordance with ■ BIPRU 9 the capital effects of the *securitisation*.

9.1.8

FCA PRA

G

The *appropriate regulator* expects an *originator* to continue to monitor any risks that it may be subject to when it has excluded the *securitised exposures* from its calculation of *risk weighted exposure amounts*. The *originator* should consider capital planning implications where risks may return and the impact that *securitisation* has on the quality of the remaining *exposures* held by the *originator*.

9.1.8A

FCA PRA

G

- (1) The *appropriate regulator* expects *firms* to conduct regular stress testing in relation to their *securitisation* activities and off-balance sheet *exposures*. The stress tests should consider the *firm-wide* impact of those activities and *exposures* in stressed market conditions and the implications for other sources of risk, for example, credit risk, concentration risk, counterparty risk, *market risk*, *liquidity risk* and reputational risk. Stress testing of *securitisation* activities should take into account both existing securitisations and pipeline transactions, as there is a risk that these would not be completed in a stressed market scenario.
- (2) The frequency and extent of the stress testing should be determined by the materiality of the *firm's* *securitisation* activities and off-balance sheet *exposures*.
- (3) A *firm* should have procedures in place to assess and respond to the results produced from the stress testing and these should be taken into account under the *overall Pillar 2 rule*.

Trading book and non-trading book

9.1.9

FCA PRA

G

■ BIPRU 9 deals with:

- (1) requirements for investors, *originators* and *sponsors* of *securitisations* of *non-trading book exposures*;
- (2) the calculation of *risk weighted exposure amount* for *securitisation* positions for the purposes of calculating either the *credit risk capital component* or the *counterparty risk capital component*; and
- (3) the requirements that investors, *originators* and *sponsors* of *securitisations* in the *trading book* will have to meet (■ BIPRU 9.3.1AR, ■ BIPRU 9.3.15R to ■ BIPRU 9.3.20R, ■ BIPRU 9.6.1A R and ■ BIPRU 9.15R).

9.1.10

FCA PRA

G

■ BIPRU 7 sets out the calculation of the *market risk capital requirement* for *securitisation* positions held in the *trading book*.

9.2 Approach to be used

9.2.1

FCA PRA

R

- (1) Where a *firm* uses the *standardised approach* set out in ■ BIPRU 3 (Standardised approach to credit risk) for the calculation of *risk weighted exposure amount* for the *standardised credit risk exposure class* to which the *securitised exposures* would otherwise be assigned under ■ BIPRU 3, then it must calculate the *risk weighted exposure amount* for a *securitisation position* in accordance with the *standardised approach to securitisations* set out in ■ BIPRU 9.9, ■ BIPRU 9.10, ■ BIPRU 9.11 and ■ BIPRU 9.13.
- (2) In all other cases it must calculate a *risk weighted exposure amount* in accordance with the *IRB approach to securitisations* set out in ■ BIPRU 9.9, ■ BIPRU 9.10, ■ BIPRU 9.12, ■ BIPRU 9.13 and ■ BIPRU 9.14.

[Note: *BCD Article 94*]

9.3 Requirements for originators and sponsors

9.3.1

FCA PRA

R

- (1) Where significant credit risk associated with *securitised exposures* has been transferred from the *originator* in accordance with the terms of ■ BIPRU 9.4 or ■ BIPRU 9.5, that *originator* may:
- (a) in the case of a *traditional securitisation*, exclude from its calculation of *risk weighted exposure amounts* and, as relevant, *expected loss amounts*, the *exposures* which it has *securitised*; and
 - (b) in the case of a *synthetic securitisation*, calculate *risk weighted exposure amounts* and, as relevant, *expected loss amounts* in respect of such *exposures*, in accordance with the provisions of ■ BIPRU 9.5.
- (2) Where (1) applies, the *originator* must calculate the *risk weighted exposure amounts* prescribed in this chapter for the positions it may hold in the *securitisation*.
- (3) Where the *originator* fails to transfer significant credit risk in accordance with (1), it need not calculate *risk weighted exposure amounts* for any positions it may hold in the *securitisation* in question.

[Note: BCD Article 95]

9.3.1A

FCA PRA

R

The provisions of ■ BIPRU 9.3.15R to ■ BIPRU 9.3.20R apply with respect to:

- (1) new *securitisations* issued on or after 1 January 2011; and
- (2) from 31 December 2014, to existing *securitisations* where new underlying exposures are added or substituted after that date.

[Note: BCD, Article 122a, paragraph 8]

9.3.2

PRA

G

A *credit institution* should have regard to the Committee of European Banking Supervisors Guidelines to Article 122a of the *Banking Consolidation Directive* when

considering its obligations under ■ BIPRU 9.3.15 R to ■ BIPRU 9.3.20 R and ■ BIPRU 9.15. The Guidelines can be found at <http://www.eba.europa.eu/Publications/Standards-Guidelines.aspx>.

9.3.3 **G** [deleted]

9.3.4 **G** [deleted]

9.3.5 **G** (1) [deleted]

(2) [deleted]

[deleted]

9.3.6 **G** An *originator* should not adjust its assessment of the transfer of risk in order to reflect uncertainties related to the effectiveness of a *securitisation* under ■ BIPRU 9.4 or ■ BIPRU 9.5. Instead the *originator* should treat the terms of ■ BIPRU 9.4 or ■ BIPRU 9.5 as not having been satisfied.

9.3.7 **R** Significant credit risk will be considered to have been transferred for *originators* in the following cases:

FCA **PRA**

- (1) the *risk weighted exposure amounts* of the *mezzanine securitisation positions* held by the *originator* in the *securitisation* do not exceed 50% of the *risk weighted exposure amounts* of all *mezzanine securitisation positions* existing in this *securitisation*;
- (2) where there are no *mezzanine securitisation positions* in a given *securitisation* and the *originator* can demonstrate that the exposure value of the *securitisation positions* that would be subject to deduction from *capital resources* or a 1250% *risk weight* exceeds a reasoned estimate of the expected loss on the *securitised exposures* by a substantial margin, the *originator* does not hold more than 20% of the exposure values of the *securitisation positions* that would be subject to deduction from *capital resources* or a 1250% *risk weight*.

[Note: BCD, Annex IX, Part 2, Point 1, paragraph 1a and Point 2 paragraph 2a]

9.3.8 **R** An *originator* must notify the *appropriate regulator* that it is relying on the deemed transfer of significant credit risk under ■ BIPRU 9.3.7R within a reasonable period before or after a relevant transfer, not being later than one month after the date of the transfer. The notification must include the following information:

FCA **PRA**

- (1) the *risk weighted exposure amount* of the *securitised exposures* and retained *securitisation positions*;

- (2) the *exposure* value of the *securitised exposures* and the retained *securitisation positions*;
- (3) details of the *securitisation positions*, including rating, *exposure* value broken down by *securitisation positions* sold and retained;
- (4) a statement that sets out why the *firm* is satisfied that the reduction in *risk weighted exposure amounts* is justified by a commensurate transfer of credit risk to third parties;
- (5) any relevant supporting documents, for example, a summary of the transaction.

9.3.9

FCA PRA

G

In the event that the *appropriate regulator* decides that the possible reduction in *risk weighted exposure amounts* which the *originator* would achieve by the *securitisation* referred to in ■ BIPRU 9.3.7R is not justified by a commensurate transfer of credit risk to third parties, it will use its powers under section 55J of the *Act* (Variation etc on the Authority's own initiative) to require the *firm* to increase its *risk weighted exposure amount* to an amount commensurate with the *appropriate regulator's* assessment of the transfer of credit risk to third parties.

9.3.10

FCA PRA

G

An *originator* may be granted a *waiver* of the requirements in ■ BIPRU 9.3.7R and ■ BIPRU 9.3.8R.

9.3.11

FCA PRA

D

An *originator's* application for a *waiver* of the requirements in ■ BIPRU 9.3.7R and ■ BIPRU 9.3.8R must demonstrate that the following conditions are satisfied:

- (1) it has policies and methodologies in place which ensure that the possible reduction of capital requirements which the *originator* achieves by the *securitisation* is justified by a commensurate transfer of credit risk to third parties; and
- (2) that such transfer of credit risk to third parties is also recognised for the purposes of the *originator's* internal risk management and its internal capital allocation.

[Note: BCD, Annex IX, Part 2, Point 1, paragraph 1c and Point 2 paragraph 2c]

9.3.12

FCA PRA

G

■ BIPRU 1.3.10 G sets out the *appropriate regulator's* approach to the granting of *waivers*. The conditions in ■ BIPRU 9.3.11D are minimum requirements. Satisfaction of those does not automatically mean the *appropriate regulator* will grant the relevant *waiver*. The *appropriate regulator* will in addition also apply the tests in section 138A (Modification or waiver of rules) of the *Act*.

9.3.13

FCA PRA

G

When considering an application for a *waiver* of the requirements in ■ BIPRU 9.3.7R and ■ BIPRU 9.3.8R, the *appropriate regulator* may undertake a visit to the *firm* in order to examine the *firm's* risk management and governance arrangements. Before such a visit, the *appropriate regulator* may request information from the *firm* additional or supplementary to that provided in the *waiver* application.

9.3.14

FCA PRA

G

An *originator* should clearly state the scope of the *waiver* of the requirements in ■ BIPRU 9.3.7R and ■ BIPRU 9.3.8R it is seeking in its application. For example, residential mortgage backed securities may be subdivided into prime and sub-prime with only one sub-category within the scope of the *waiver*. Relevant asset classes may therefore be defined according to a *firm's* internal usage of terms.

Origination criteria

9.3.15

PRA

R

A *credit institution*, whether acting as *sponsor* or *originator*, must apply the same sound and well-defined criteria used for credit-granting in respect of exposures held on their *trading* and *non-trading book* under ■ SYSC 7.1.9 R to exposures to be securitised. The criteria applied must include the processes for approving and, where relevant, amending, renewing and re-financing credits.

[Note: BCD, Article 122a, paragraph 6]

9.3.16

PRA

R

A *credit institution*, whether acting as *sponsor* or *originator*, must apply the same standards of analysis as are applied under ■ BIPRU 9.3.15R to participations or underwritings in *securitisation* issues purchased from third parties regardless of whether those participations or underwritings are to be held on their *trading* or *non-trading book*.

[Note: BCD, Article 122a, paragraph 6]

9.3.17

PRA

R

Where a *credit institution* as *originator* fails to meet the requirements under ■ BIPRU 9.3.15R to ■ BIPRU 9.3.16R, it may not rely on and apply ■ BIPRU 9.3.1R (1) to reduce its *risk weighted exposure amounts* or exclude the relevant securitised exposures from the calculation of its *risk weighted exposure amounts*, and, as relevant, *expected loss* amounts of those *exposures*.

[Note: BCD, Article 122a, paragraph 6]

Disclosure requirements

9.3.18

PRA

R

The *sponsor* or *originator credit institution* of a *securitisation* must disclose to investors the level of its commitment to maintain a net economic interest in the *securitisation* under ■ BIPRU 9.15.3R.

[Note: BCD, Article 122a, paragraph 7]

9.3.19

PRA

R

The *sponsor* or *originator credit institutions* of a *securitisation* must ensure that prospective investors have readily available access to all materially relevant data concerning it, including:

- (1) on the credit quality and performance of the individual underlying *exposures*;
- (2) cash flows and collateral supporting the *securitisation exposure*; and

- (3) such information as is necessary to conduct comprehensive and well-informed stress-tests on the cash flows and collateral values supporting the underlying *exposures*.

[Note: *BCD*, Article 122a, paragraph 7]

9.3.20

PRA

R

Under ■ BIPRU 9.3.19R, materially relevant data is determined as at the date of the *securitisation* and where appropriate due to the nature of the *securitisation* thereafter.

[Note: *BCD*, Article 122a, paragraph 7]

9.3.21

FCA PRA

G

Subject to ■ BIPRU 9.3.22G, ■ BIPRU 9.15.9R and ■ BIPRU 9.15.10R, where the *originator* or *sponsor* of a *securitisation* fails to meet any of the requirements in ■ BIPRU 9.3.18R to ■ BIPRU 9.3.20R (disclosure requirements) in any material respect by reason of its negligence or omission, the *appropriate regulator* will use its powers under section 55J (Variation etc on the Authority's own initiative) of the *Act* to impose an additional *risk weight* of no less than 250% (capped at 1250%) of the *risk weight* that would otherwise apply to the relevant *securitisation positions* under the *rules* in ■ BIPRU 9.11 to ■ BIPRU 9.14. The additional *risk weight* imposed will be progressively increased with each relevant, subsequent infringement of the requirements in ■ BIPRU 9.3.18R to ■ BIPRU 9.3.20R.

[Note: *BCD*, Article 122a, paragraph 5]

9.3.22

FCA PRA

G

When calculating the additional *risk weight* it will impose, the *appropriate regulator* will take into account the exemption of certain *securitisations* from the scope of ■ BIPRU 9.15.3R under ■ BIPRU 9.15.9R and ■ BIPRU 9.15.10R and, if those exemptions are relevant, reduce the *risk weight* it would otherwise impose.

[Note: *BCD*, Article 122a, paragraph 5]

9.4 Traditional securitisation

Minimum requirements for recognition of significant credit risk transfer

9.4.1

FCA PRA

R

The *originator* of a *traditional securitisation* may exclude *securitised exposures* from the calculation of *risk weighted exposure amounts* and *expected loss* amounts if either of the following conditions is fulfilled:

- (1) significant credit risk associated with the *securitised exposures* is considered to have been transferred to third parties; or
- (2) the *originator* applies a 1250% *risk weight* to all *securitisation positions* it holds in the *securitisation* or deducts these *securitisation positions* from *capital resources* according to
 - GENPRU 2.2.237 R;

and the transfer complies with the conditions in ■ BIPRU 9.4.2R
 ■ BIPRU 9.4.14R.

[Note: BCD Annex IX Part 2 point 1, paragraph 1]

9.4.2

FCA PRA

R

The *securitisation* documentation must reflect the economic substance of the transaction.

[Note: BCD Annex IX Part 2 point 1 (part)]

9.4.3

FCA PRA

R

The *securitised exposures* must be put beyond the reach of the *originator* and its creditors, including in bankruptcy and receivership. This must be supported by the opinion of qualified legal counsel.

[Note: BCD Annex IX Part 2 point 1 (part)]

9.4.4

FCA PRA

G

Legal counsel's opinions should be reviewed as necessary. For example, an opinion should be reviewed if a relevant statutory provision is amended or where a new decision or judgment of a court might have a bearing on the conclusions reached.

9.4.5

FCA PRA

R

The securities issued must not represent payment obligations of the *originator*.

[Note: BCD Annex IX Part 2 point 1 (part)]

9.4.6

FCA PRA

R

The transferee must be a *securitisation special purpose entity*.

[Note: BCD Annex IX Part 2 point 1 (part)]

9.4.7

FCA PRA

R

The *originator* must not maintain effective or indirect control over the transferred *exposures*.

[Note: BCD Annex IX Part 2 point 1 (part)]

9.4.8

FCA PRA

R

Where there is a *clean-up call option*, the following conditions must be satisfied:

- (1) the *clean-up call option* is exercisable at the discretion of the *originator*;
- (2) the *clean-up call option* may only be exercised when 10% or less of the original value of the *exposures securitised* remains unamortised; and
- (3) the *clean-up call option* is not structured to avoid allocating losses to *credit enhancement* positions or other positions held by investors and is not otherwise structured to provide *credit enhancement*.

[Note: BCD Annex IX Part 2 point 1 (part)]

9.4.9

FCA PRA

R

The *securitisation* documentation must not contain clauses that:

- (1) other than in the case of *early amortisation provisions*, require positions in the *securitisation* to be improved by the *originator* including but not limited to altering the underlying credit exposures or increasing the yield payable to investors in response to a deterioration in the credit quality of the *securitised exposures*; or
- (2) increase the yield payable to holders of positions in the *securitisation* in response to a deterioration in the credit quality of the underlying pool.

[Note: BCD Annex IX Part 2 point 1 (part)]

9.4.10

FCA PRA

R

For the purposes of ■ BIPRU 9.4.7 R, an *originator* will be considered to have maintained effective control over the transferred *exposures* if it has the right to repurchase from the transferee the previously transferred *exposures* in order to realise their benefits or if it is obligated to re-assume transferred risk. The *originator's* retention of servicing rights or obligations in respect of the *exposures* does not of itself constitute indirect control of the *exposures*.

[Note: BCD Annex IX Part 2 point 1 (part)]

9.4.11

FCA PRA

R

Significant credit risk will be considered to be transferred for an *originator* in the following cases:

- (1) the *risk weighted exposure amounts* of the *mezzanine securitisation positions* held by the *originator* in the *securitisation* do not exceed 50% of the *risk weighted exposure amounts* of all *mezzanine securitisation positions* existing in this *securitisation*;
- (2) where there are no *mezzanine securitisation positions* in a given *securitisation* and the *originator* can demonstrate that the exposure value of the *securitisation positions* that would be subject to deduction from *capital resources* or a 1250% *risk weight* exceeds a reasoned estimate of the expected loss on the *securitised exposures* by a substantial margin, the *originator* does not hold more than 20% of the exposure values of the *securitisation positions* that would be subject to deduction from *capital resources* or a 1250% *risk weight*.

[Note: BCD, Annex IX, Part 2, Point 1, paragraph 1a]

9.4.12

FCA PRA

R

An *originator* must notify the *appropriate regulator* that it is relying on the deemed transfer of significant credit risk under ■ BIPRU 9.4.11R within a reasonable period before or after a relevant transfer, not being later than one month after the date of the transfer. The notification must include the following information:

- (1) the *risk weighted exposure amount* of the *securitised exposures* and retained *securitisation positions*;
- (2) the *exposure* value of the *securitised exposures* and the retained *securitisation positions*;
- (3) details of the *securitisation positions*, including rating, *exposure* value broken down by *securitisation positions* sold and retained;
- (4) a statement that sets out why the *firm* is satisfied that the reduction in *risk weighted exposure amounts* is justified by a commensurate transfer of credit risk to third parties;
- (5) any relevant supporting documents, for example, a summary of the transaction.

PAGE
13

9.4.13

FCA PRA

G

In the event that the *appropriate regulator* decides that the possible reduction in *risk weighted exposure amounts* which the *originator* would achieve by the *securitisation* referred to in ■ BIPRU 9.4.11R is not justified by a commensurate transfer of credit risk to third parties, it will use its powers under section 55J (Variation etc on the Authority's own initiative) of the *Act* to require the *firm* to increase its *risk weight exposure amount* to an amount commensurate with the *appropriate regulator's* assessment of the transfer of credit risk to third parties.

- 9.4.14** FCA PRA G An *originator* may be granted a *waiver* of the requirements in ■ BIPRU 9.4.11R and ■ BIPRU 9.4.12R.
- 9.4.15** FCA PRA D An *originator's* application for a *waiver* of the requirements in ■ BIPRU 9.4.11R and ■ BIPRU 9.4.12R must demonstrate that the following conditions are satisfied.
- (1) it has policies and methodologies in place which ensure that the possible reduction of capital requirements which the *originator* achieves by the *securitisation* is justified by a commensurate transfer of credit risk to third parties; and
 - (2) that such a transfer of credit risk to third parties is also recognised for the purposes of all the *firm's* internal risk management and internal capital allocation.
- [Note: BCD, Annex IX, Part 2, Point 1, paragraph 1c]**
- 9.4.16** FCA PRA G ■ BIPRU 1.3.10 G sets out the *appropriate regulator's* approach to the granting of *waivers*. The conditions in ■ BIPRU 9.4.15D are minimum requirements. Satisfaction of those does not automatically mean the *appropriate regulator* will grant the relevant *waiver*. The *appropriate regulator* will in addition also apply the tests in section 138A (Modification or waiver of rules) of the *Act*.
- 9.4.17** FCA PRA G When considering an application for a *waiver* of the requirements in ■ BIPRU 9.4.11R and ■ BIPRU 9.4.12R, the *appropriate regulator* may undertake a visit to the *firm* in order to examine the *firm's* risk management and governance arrangements. Before such a visit, the *appropriate regulator* may request information from the *firm* additional or supplementary to that provided in the *waiver* application.
- 9.4.18** FCA PRA G An *originator* should clearly state the scope of the *waiver* of the requirements in ■ BIPRU 9.4.11R and ■ BIPRU 9.4.12R it is seeking in its application. For example, residential mortgage backed securities may be subdivided into prime and sub-prime with only one sub-category within the scope of the *waiver*. Relevant asset classes may therefore be defined according to a *firm's* internal usage of terms.

9.5 Synthetic securitisation

Minimum requirements for recognition of significant credit risk transfer

9.5.1

R

FCA PRA

- (1) An *originator* of a *synthetic securitisation* may calculate *risk weighted exposure amounts*, and, as relevant, *expected loss amounts*, for the *securitised exposures* in accordance with ■ BIPRU 9.5.3 R and ■ BIPRU 9.5.4 R, if either of the following conditions is fulfilled:
- (a) significant credit risk is considered to have been transferred to third parties, either through funded or unfunded credit protection; or
 - (b) the *originator* applies a 1250% *risk weight* to all *securitisation positions* he holds in this *securitisation* or deducts these *securitisation positions* from *capital resources* according to ■ GENPRU 2.2.237 R;

and the transfer complies with the conditions in (2)-(8).

[Note: BCD, Annex IX, Part 2, Point 2, paragraph 2]

- (2) The *securitisation* documentation must reflect the economic substance of the transaction.
- (3) The credit protection by which the credit risk is transferred must comply with the eligibility and other requirements under ■ BIPRU 5 (Credit risk mitigation) and, so far as applicable, ■ BIPRU 4.10 (Credit risk mitigation under the IRB approach) for the recognition of such credit protection. For the purposes of this *rule*, *securitisation special purpose entities* must not be recognised as eligible unfunded protection providers.
- (4) The instruments used to transfer credit risk must not contain terms or conditions that:
 - (a) impose significant materiality thresholds below which credit protection is deemed not to be triggered if a credit event occurs;
 - (b) allow for the termination of the protection due to deterioration of the credit quality of the underlying *exposures*;

- (c) other than in the case of *early amortisation provisions*, require positions in the *securitisation* to be improved by the *originator*; or
 - (d) increase the *originator's* cost of credit protection or the yield payable to holders of positions in the *securitisation* in response to a deterioration in the credit quality of the underlying pool.
- (5) An opinion must be obtained from qualified legal counsel confirming the enforceability of the credit protection in all relevant jurisdictions.

[Note: BCD Annex IX Part 2 point 2]

- (6) Significant credit risk will be considered to have been transferred if either of the following conditions is met:
- (a) the *risk weighted exposure amounts* of the *mezzanine securitisation positions* which are held by the *originator* in this *securitisation* do not exceed 50% of the *risk weighted exposure amounts* of all *mezzanine securitisation positions* existing in this *securitisation*;
 - (b) where there are no *mezzanine securitisation positions* in a given *securitisation* and the *originator* can demonstrate that the *exposure* value of the *securitisation positions* that would be subject to deduction from *capital resources* or a 1250% *risk weight* exceeds a reasoned estimate of the expected loss on the securitised exposures by a substantial margin, the *originator* does not hold more than 20% of the exposure values of the *securitisation positions* that would be subject to deduction from *capital resources* or a 1250% risk weight.

[Note: BCD, Annex IX, Part 2, Point 2, paragraph 2a]

- (7) An *originator* must notify the *appropriate regulator* that it is relying on the deemed transfer of significant credit risk under ■ BIPRU 9.5.1R (6) within a reasonable period before or after a relevant transfer, not being later than one month after the date of the transfer. The notification must include the following information:
- (a) the *risk weighted exposure amount* of the *securitised exposures* and retained *securitisation positions*;
 - (b) the *exposure* value of the *securitised exposures* and the retained *securitisation positions*;
 - (c) details of the *securitisation positions*, including rating, *exposure* value broken down by *securitisation positions* sold and retained;

- (d) a statement that sets out why the *firm* is satisfied that the reduction in *risk weighted exposure amounts* is justified by a commensurate transfer of credit risk to third parties;
- (e) any relevant supporting documents, for example, a summary of the transaction.

9.5.1A

FCA PRA

G

An *originator* may be granted a *waiver* of the requirements in ■ BIPRU 9.5.1R (6) and ■ (7).

9.5.1B

FCA PRA

D

An *originator's* application for a *waiver* of the requirements in ■ BIPRU 9.5.1R (6) and ■ (7) must demonstrate that the following conditions are satisfied:

- (1) it has policies and methodologies in place which ensure that the possible reduction of capital requirements which the *originator* achieves by the *securitisation* is justified by a commensurate transfer of credit risk to third parties; and
- (2) that such transfer of credit risk to third parties is also recognised for the purposes of all the *originator's* internal risk management and its internal capital allocation.

[Note: *BCD, Annex IX, Part 2, Point 2, paragraph 2c*]

9.5.1C

FCA PRA

G

■ BIPRU 1.3.10 G sets out the *appropriate regulator* approach to the granting of *waivers*. The conditions in ■ BIPRU 9.5.1BD are minimum requirements. Satisfaction of those does not automatically mean the *appropriate regulator* will grant the relevant *waiver*. The *appropriate regulator* will in addition also apply the tests in section 138A (Modification or waiver of rules) of the *Act*.

9.5.1D

FCA PRA

G

When considering an application for a *waiver* of the requirements in ■ BIPRU 9.5.1R (6) and ■ (7), the *appropriate regulator* may undertake a visit to the *firm* in order to examine the *firm's* risk management and governance arrangements. Before such a visit, the *appropriate regulator* may request information from the *firm* additional or supplementary to that provided in the *waiver* application.

9.5.1E

FCA PRA

G

An *originator* should clearly state the scope of the *waiver* of the requirements in ■ BIPRU 9.5.1R (6) and ■ (7) it is seeking in its application. For example, residential mortgage backed securities may be subdivided into prime and sub-prime with only one sub-category within the scope of the *waiver*. Relevant asset classes may therefore be defined according to a *firm's* internal usage of terms.

9.5.1F

FCA PRA

G

In the event that the *appropriate regulator* decides that the possible reduction in *risk weighted exposure amounts* which the *originator credit institution* would achieve by the *securitisation* referred to in ■ BIPRU 9.5.1R (6) is not justified by a commensurate transfer of credit risk to third parties, it will use its powers under section 55J (Variation etc on the Authority's own initiative) of the *Act* to require the *firm* to increase its *risk weight exposure amount* to an amount commensurate with the *appropriate regulator's* assessment of the transfer of credit risk to third parties.

Originators' calculation of risk-weighted exposure amounts for exposures securitised in a synthetic securitisation

9.5.2

FCA PRA

R

■ BIPRU 9.5.3 R-■ BIPRU 9.5.8 R apply to the calculation by an *originator* of *risk weighted exposure amounts* for *exposures securitised in a synthetic securitisation*.

9.5.3

FCA PRA

R

- (1) In calculating *risk weighted exposure amounts* for the *securitised exposures*, where the conditions in ■ BIPRU 9.5.1 R are met, the *originator* of a *synthetic securitisation* must, subject to the treatment of maturity mismatches set out in ■ BIPRU 9.5.6 R-■ BIPRU 9.5.8 R, use the relevant calculation methodologies set out in ■ BIPRU 9.9-■ BIPRU 9.14 and not those set out in ■ BIPRU 3 (Standardised credit risk) or ■ BIPRU 4 (IRB approach).
- (2) For *firms* calculating *risk weighted exposure amounts* and *expected loss* amounts under the *IRB approach*, the *expected loss* amount in respect of such *exposures* must be zero.
- (3) For clarity, this paragraph refers to the entire pool of *exposures* included in the *securitisation*.

[Note: BCD Annex IX Part 2 point 3 and point 4 (part)]

9.5.4

FCA PRA

R

Subject to the treatment of maturity mismatches set out in ■ BIPRU 9.5.6 R-■ BIPRU 9.5.8 R, the *originator* must calculate *risk weighted exposure amounts* in respect of all *tranches* in the *securitisation* in accordance with the provisions of ■ BIPRU 9.9-■ BIPRU 9.14. For example, where a *tranche* is transferred by means of unfunded credit protection to a third party, the *risk weight* of that third party must be applied to the *tranche* in the calculation of the *originators risk weighted exposure amount*.

[Note: BCD Annex IX Part 2 point 4 (part)]

Treatment of maturity mismatches in synthetic securitisations

9.5.5

FCA PRA

R

■ BIPRU 9.5.6 R-■ BIPRU 9.5.8 R apply to the treatment of maturity mismatches in a *synthetic securitisation*.

9.5.6

FCA PRA

R

For the purposes of calculating *risk weighted exposure amounts* in accordance with ■ BIPRU 9.5.3 R, any maturity mismatch between the credit protection by which the *tranching* is achieved and the *securitised exposures* must be taken into consideration in accordance with ■ BIPRU 9.5.7 R-■ BIPRU 9.5.8 R.

[Note: BCD Annex IX Part 2 point 5]

9.5.7

FCA PRA

R

The maturity of the *securitised exposures* must be taken to be the longest maturity of any of those *exposures* subject to a maximum of five years. The maturity of the credit protection must be determined in accordance with ■ BIPRU 5 (Credit risk mitigation) and, so far as relevant, ■ BIPRU 4.10 (Credit risk mitigation under the IRB approach).

[Note: BCD Annex IX Part 2 point 6]

9.5.8

FCA PRA

R

- (1) An *originator* must ignore any maturity mismatch in calculating *risk weighted exposure amounts* for *tranches* appearing pursuant to ■ BIPRU 9.9-■ BIPRU 9.14 with a *risk weight* of 1250%. For all other *tranches* the maturity mismatch treatment prescribed in ■ BIPRU 5.8 (Maturity mismatches) must be applied in accordance with the following formula:

$$RW^* \text{ is } [RW(SP) \times (t-t^*)/(T-t^*)] + [RW(Ass) \times (T-t)/(T-t^*)]$$

- (2) The following apply for the purposes of the formula in (1):
- (a) RW^* is *risk weighted exposure amounts*;
 - (b) $RW(Ass)$ is *risk weighted exposure amounts* for *exposures* if they had not been *securitised* calculated on a pro-rata basis;
 - (c) $RW(SP)$ is *risk weighted exposure amounts* calculated under ■ BIPRU 9.6.3 G as if there was no maturity mismatch;
 - (d) T is maturity of the underlying *exposures* expressed in years;
 - (e) t is maturity of credit protection expressed in years; and
 - (f) t^* is 0.25.

[Note: BCD Annex IX Part 2 point 7]

9.6 Implicit support

9.6.1

FCA PRA

R

An *originator* which, in respect of a securitisation in the *non-trading book*, has made use of ■ BIPRU 9.3.1 R in the calculation of *risk weighted exposure amounts*, or a *sponsor*, must not, with a view to reducing potential or actual losses to investors, provide support to the *securitisation* beyond its contractual obligations.

[Note: BCD Article 101(1)]

9.6.1A

FCA PRA

R

An *originator* which has sold instruments in its *trading book* to an *SSPE* and no longer holds *market risk capital requirements* for these instruments, or a *sponsor*, must not, with a view to reducing potential or actual losses to investors, provide support to the *securitisation* beyond its contractual obligations.

[Note: BCD Article 101(1)]

9.6.2

FCA PRA

R

If an *originator* or *sponsor* fails to comply with ■ BIPRU 9.6.1 R or ■ BIPRU 9.6.1A R in respect of a *securitisation*, it must:

- (1) hold capital against all of the *securitised exposures* associated with the *securitisation* transaction as if they had not been *securitised*; and
- (2) disclose publicly:
 - (a) that it has provided non-contractual support; and
 - (b) the regulatory capital impact of doing so.

[Note: BCD Article 101(2)]

9.6.3

FCA PRA

G

- (1) *Securitisation* documentation should make clear, where applicable, that any repurchase of *securitised exposures* or *securitisation positions* by the *originator* or *sponsor* beyond its contractual obligations is not mandatory and may only be made at fair market value. In general, any such repurchase should be subject to a *firm's* credit review and approval process, which should be adequate to ensure that the repurchase complies with ■ BIPRU 9.6.1 R.

- (2) If an *originator* or *sponsor* repurchases *securitised exposures* or *securitisation positions*, it should be able to satisfy the *appropriate regulator* that it has adequately considered the following:
 - (a) the price of the repurchase;
 - (b) the *firm's* capital and liquidity position before and after repurchase;
 - (c) the performance of the *securitised exposures*; and
 - (d) the performance of the issued securities;

and has concluded that, taking into account those factors and any other relevant factors, the repurchase is not structured to provide support.
- (3) A *firm* should keep adequate records of the matters in (1) and (2).

9.6.4

FCA PRA

G

If a *firm* is found to have provided implicit support to a *securitisation*, that fact increases the expectation that the *firm* will provide future support to its *securitisations* thus failing to achieve a significant transfer of risk. The *appropriate regulator* will consider taking appropriate measures to reflect this increased expectation after an instance of implicit support is found.

9.6.5

FCA PRA

G

A *firm* may need to consider three main situations to determine whether there is a breach of the prohibition against implicit support in ■ BIPRU 9.6.1 R:

- (1) support given under a contractual obligation;
- (2) support given under the contractual documentation for the *securitisation* which the *firm* is entitled, but not obliged, to give; and
- (3) support which is not provided for under the contractual documentation for the *securitisation*.

9.6.6

FCA PRA

G

- (1) The support described in ■ BIPRU 9.6.5 G (1) is permitted by ■ BIPRU 9.6.1 R.
- (2) The support described in ■ BIPRU 9.6.5 G (3) is not permitted by ■ BIPRU 9.6.1 R.
- (3) The support described in ■ BIPRU 9.6.5 G (2) may be permitted by ■ BIPRU 9.6.1 R under the following conditions:
 - (a) the fact that the *firm* may give it is expressly set out in the contractual and marketing documents for the *securitisation*;
 - (b) the nature of the support that the *firm* may give is precisely described in the documentation;
 - (c) the maximum degree of support that can be given can be ascertained at the time of the *securitisation* both by the *firm* and by a *person* whose only information comes from the marketing documents for the *securitisation*;
 - (d) the assessment of whether there has been significant risk transfer and the amount of that transfer is made on the basis that the *firm* will provide support to the maximum degree possible; and
 - (e) the *firm's capital resources* and *capital resources requirement* are adjusted at the time of the *securitisation* on the basis that the *firm* has provided

support to the maximum degree possible, whether by an immediate deduction from capital or appropriate *risk weighting*.

9.6.7**FCA** **PRA****G**

A waiver of the right to future margin income may not breach the prohibition against implicit support:

- (1) the degree of support that can be given can be defined precisely by reference to the *securitisation* contractual documentation, albeit the amount of support may not be ascertainable in absolute monetary terms; and
- (2) no adjustment to the *firm's capital resources* or *capital resources requirement* is required, as a *firm* should not in any case reflect future margin income in its income or *capital resources*.

9.6.8**FCA** **PRA****G**

For the purposes of ■ BIPRU 9.6.2 R (2), *firms* will be expected to include disclosure of implicit support in accordance with the general and technical requirements on public disclosure, as outlined in ■ BIPRU 11 (Disclosure).

9.7 Recognition of credit assessments of ECAIs

9.7.1

FCA PRA

R

An *ECAI's* credit assessment may be used to determine the *risk weight* of a *securitisation position* in accordance with ■ BIPRU 9.9 only if the *ECAI* is an *eligible ECAI*.

[Note: BCD Article 97(1)]

9.7.2

FCA PRA

R

- (1) A *firm* must not use a credit assessment of an *eligible ECAI* to determine the *risk weight* of a *securitisation position* in accordance with ■ BIPRU 9.9 unless it complies with the principles of credibility and transparency as elaborated in (2) to (6).
- (2) There must be no mismatch between the types of payments reflected in the credit assessment and the types of payment to which the *firm* is entitled under the contract giving rise to the *securitisation position* in question.
- (3) The credit assessment must be available publicly to the market. Credit assessments may only be treated as publicly available if:
 - (a) they have been published in a publicly accessible forum, and
 - (b) they are included in the *ECAI's* transition matrix.
- (4) Credit assessments that are made available only to a limited number of entities may not be treated as publicly available.
- (5) The credit assessment must not be based, or partly based, on unfunded support provided by the *firm* itself.
- (6) In the case of a credit assessment referred to in (5), the *firm* must consider the relevant position as if it were not rated and must apply the relevant treatment of unrated positions as set out in ■ BIPRU 9.11 and ■ BIPRU 9.12.

[Note: BCD Article 97(5) and Annex IX Part 3 point 1]

9.7.2A

FCA PRA

G

The requirements in ■ BIPRU 9.7.2R (5) and ■ (6) apply to situations where a *firm* holds *securitisation positions* which receive a lower *risk weight* by virtue of unfunded credit

protection provided by the *firm* itself acting in a different capacity in the *securitisation* transaction. The assessment of whether a *firm* is providing unfunded support to its *securitisation positions* should take into account the economic substance of that support in the context of the overall transaction and any circumstances in which the *firm* could become exposed to a higher credit risk in the absence of that support.

9.7.3

FCA PRA

G

The *guidance* in ■ BIPRU 3.3 (Recognition of ratings agencies) applies for the purposes of ■ BIPRU 9 as it does to *exposure risk weighting* in ■ BIPRU 3, save that the reference in ■ BIPRU 3.3 to the regulation 22 of the *Capital Requirements Regulations 2006* should be read as a reference to regulation 23 of the *Capital Requirements Regulations 2006* for the purposes of ■ BIPRU 9.

9.7.4

FCA PRA

G

Where ■ BIPRU 9.7.2R (5) applies to *securitisation positions* in an *ABCP programme*, the *firm* may be granted a *waiver* which allows it to use the *risk weight* assigned to a *liquidity facility* in order to calculate the *risk weighted exposure amount* for the positions in the *ABCP programme*, provided that the *liquidity facility* ranks *pari passu* with the positions in the *ABCP programme* so that they form overlapping positions and 100% of the commercial paper issued by the *ABCP programme* is covered by *liquidity facilities*. For the purposes of this provision, overlapping positions means that the positions represent, wholly or partially, an *exposure* to the same risk such that, to the extent of the overlap, there is a single *exposure*.

[Note: BCD, Annex IX, Part 4, Point 5]

9.8 Use of ECAI credit assessments for the determination of applicable risk weights

9.8.1 **R** The use of *ECAIs'* credit assessments for the calculation of a *firm's risk weighted exposure amounts* under ■ BIPRU 9 must be consistent and in accordance with ■ BIPRU 9.8.2 R ■ BIPRU 9.8.7 R. Credit assessments must not be used selectively.

FCA PRA

[Note: BCD Article 99]

9.8.2 **R** A *firm* may nominate one or more *eligible ECAIs* the credit assessments of which must be used in the calculation of its *risk weighted exposure amounts* under ■ BIPRU 9 (a *nominated ECAI*).

FCA PRA

[Note: BCD Annex IX Part 3 point 2]

9.8.3 **R** Subject to ■ BIPRU 9.8.5 R ■ BIPRU 9.8.7 R, a *firm* must use credit assessments from *nominated ECAIs* consistently in respect of its *securitisation positions*.

FCA PRA

[Note: BCD Annex IX Part 3 point 3]

9.8.4 **R** Subject to ■ BIPRU 9.8.5 R and ■ BIPRU 9.8.6 R, a *firm* must not use an *ECAI's* credit assessments for its positions in some *tranches* and another *ECAI's* credit assessments for its positions in other *tranches* within the same structure that may or may not be *rated* by the first *ECAI*.

FCA PRA

[Note: BCD Annex IX Part 3 point 4]

9.8.5 **R** Where a position has two credit assessments by *nominated ECAIs*, the *firm* must use the less favourable credit assessment.

FCA PRA

[Note: BCD Annex IX Part 3 point 5]

9.8.6 **R** Where a position has more than two credit assessments by *nominated ECAIs*, the two most favourable credit assessments must be used. If the two most favourable assessments are different, the least favourable of the two must be used.

FCA PRA

[Note: BCD Annex IX Part 3 point 6]

9.8.7

FCA PRA

R

- (1) Where credit protection eligible under ■ BIPRU 5 (Credit risk mitigation) and, if applicable, ■ BIPRU 4.10 (Credit risk mitigation under the IRB approach) is provided directly to the *SSPE*, and that protection is reflected in the credit assessment of a position by a *nominated ECAI*, the *risk weight* associated with that credit assessment may be used.
- (2) If the protection is not eligible under ■ BIPRU 5 (Credit risk mitigation) and, if applicable, ■ BIPRU 4.10 (Credit risk mitigation under the IRB approach), the credit assessment must not be recognised.
- (3) In the situation where the credit protection is not provided to the *SSPE* but rather is provided directly to a *securitisation position*, the credit assessment must not be recognised.

[Note: *BCD* Annex IX Part 3 point 7]

9.9 Calculation of risk-weighted exposure amounts for securitisation positions

9.9.1

FCA PRA

R

To calculate the *risk weighted exposure amount* of a *securitisation position*, the relevant *risk weight* must be assigned to the *exposure* value of the position in accordance with ■ BIPRU 9.9 - ■ BIPRU 9.14 based on the credit quality of the position.

[Note: BCD Article 96(1) (part) and Annex IX, Part 4 point 1]

9.9.2

FCA PRA

R

For the purpose of ■ BIPRU 9.9.1 R, the credit quality of a position may be determined by reference to an *ECAI* credit assessment or otherwise, as set out in ■ BIPRU 9.9 ■ BIPRU 9.14.

[Note: BCD Article 96(1) (part)]

9.9.3

FCA PRA

R

- (1) Where there is an *exposure* to different *tranches* in a *securitisation*, the *exposure* to each *tranche* must be considered a separate *securitisation position*.
- (2) The providers of credit protection to *securitisation positions* must be treated as holding positions in the *securitisation*.
- (3) *securitisation positions* include *exposures* to a *securitisation* arising from interest rate or currency derivative contracts.

[Note: BCD Article 96(2)]

9.9.4

FCA PRA

R

Subject to ■ BIPRU 9.9.5 R,

- (1) where a *firm* calculates *risk weighted exposure amounts* under the *standardised approach* to *securitisations* outlined in ■ BIPRU 9.11, the *exposure* value of an on-balance sheet *securitisation position* must be its balance sheet value;
- (2) where a *firm* calculates *risk weighted exposure amounts* under the *IRB approach* to *securitisations* outlined in ■ BIPRU 9.12, the *exposure* value of an on-balance sheet *securitisation position* must be measured gross of value adjustments;

- (3) the *exposure* value of an off-balance sheet *securitisation position* must be its nominal value multiplied by a conversion figure as prescribed in this chapter; and
- (4) the conversion figure referred to in (3) must be 100% unless otherwise specified.

[Note: BCD Annex IX Part 4 point 2]

9.9.5

FCA PRA

R

The *exposure* value of a *securitisation position* arising from a *financial derivative instrument* must be determined in accordance with ■ BIPRU 13 (Treatment of derivative instruments).

[Note: BCD Annex IX Part 4 point 3]

9.9.6

FCA PRA

R

Where a *securitisation position* is subject to funded credit protection, the *exposure* value of that position may be modified in accordance with and subject to the requirements of ■ BIPRU 5 (Credit risk mitigation) as further specified in ■ BIPRU 9.11.13 R and ■ BIPRU 9.14.

[Note: BCD Annex IX Part 4 point 4]

9.9.7

FCA PRA

R

Where a *securitisation position* is subject to funded or unfunded credit protection the *risk weight* to be applied to that position may be modified in accordance with ■ BIPRU 5 (Credit risk mitigation) and, if applicable, ■ BIPRU 4.10 (Credit risk mitigation under the IRB approach) read in conjunction with ■ BIPRU 9.14.

[Note: BCD Article 96(3)]

9.9.8

FCA PRA

R

- (1) Where a *firm* has two or more overlapping positions in a *securitisation* the *firm* must, to the extent that the positions overlap, include in its calculation of *risk weighted exposure amounts* only the position, or portion of a position, producing the higher *risk weighted exposure amounts*. The *firm* may also recognise such an overlap between capital charges for *specific risk* in relation to *positions* in the *trading book* and capital charges for positions in the *non-trading book*, provided that the *firm* is able to calculate and compare the capital charges for the relevant positions.
- (2) For the purposes of (1), overlapping means that the positions, wholly or partially, represent an *exposure* to the same risk such that to the extent of the overlap there is a single *exposure*.

[Note: BCD Annex IX Part 4 point 5]

9.9.9

FCA PRA

R

Subject to the provisions of *GENPRU* that deal with the deduction of *securitisation positions* at stage M in the relevant *capital resources*

table, the risk weighted exposure amount must be included in the firm's total of risk weighted exposure amounts for the purposes of the calculation of its credit risk capital requirement.

[Note: BCD Article 96(4)]

9.9.10**FCA** **PRA****G**

Where ■ BIPRU 9.7.2R (5) applies to *securitisation positions* in an ABCP programme, the firm may be granted a *waiver* in the terms described in ■ BIPRU 9.7.4 G.

[Note: BCD, Annex IX, Part 4, Point 5]

9.10 Reduction in risk-weighted exposure amounts

9.10.1

FCA PRA

R

■ BIPRU 9.10 applies as follows:

- (1) ■ BIPRU 9.10.2 R and ■ BIPRU 9.10.3 R apply to both the *standardised approach* and the *IRB approach*; and
- (2) ■ BIPRU 9.10.4 R ■ BIPRU 9.10.7 R apply to the *IRB approach*.

9.10.2

FCA PRA

R

In respect of a *securitisation position* in respect of which a 1250% *risk weight* is assigned, a *firm* may, as an alternative to including the position in its calculation of *risk weighted exposure amounts*, deduct from its *capital resources* the *exposure* value of the position. For these purposes, the calculation of the *exposure* value may reflect eligible funded protection in a manner consistent with ■ BIPRU 9.14.

[Note: BCD Annex IX Part 4 points 35, 74 and 75(b)]

9.10.3

FCA PRA

R

Where a *firm* applies ■ BIPRU 9.10.2 R, 12.5 times the amount deducted in accordance with that paragraph must, for the purposes of ■ BIPRU 9.11.5 R and ■ BIPRU 9.12.8 R, be subtracted from the amount specified in whichever of those *rules* applies as the maximum *risk weighted exposure amount* to be calculated by a *firm* to which one of those *rules* applies.

[Note: BCD Annex IX Part 4 point 36 and point 76]

9.10.4

FCA PRA

R

The *risk weighted exposure amount* of a *securitisation position* to which a 1250% *risk weight* is assigned may be reduced by 12.5 times the amount of any value adjustments made by the *firm* in respect of the *securitised exposures*.

[Note: BCD Annex IX Part 4 point 72 (part)]

9.10.5

FCA PRA

R

To the extent that value adjustments are taken account of for the purposes of ■ BIPRU 9.10.4 R they must not be taken account of for the purposes of the calculation indicated in ■ BIPRU 4.3.8 R (Treatment of expected loss amounts).

[Note: BCD Annex IX Part 4 point 72 (part)]

9.10.6

FCA PRA

R

The *risk weighted exposure amount* of a *securitisation position* may be reduced by 12.5 times the amount of any value adjustments made by the *firm* in respect of the position.

[Note: BCD Annex IX Part 4 point 73]

9.10.7

FCA PRA

R

For the purposes of ■ BIPRU 9.10.2 R (as it applies to the *IRB approach*):

- (1) the *exposure* value of the position may be derived from the *risk weighted exposure amounts* taking into account any reductions made in accordance with ■ BIPRU 9.10.4 R ■ BIPRU 9.10.6 R;
- (2) where the *supervisory formula method* is used to calculate *risk weighted exposure amounts* and $L < K_{IRBR}$ and $[L+T] > K_{IRBR}$ the position may be treated as two positions with L equal to K_{IRBR} for the more senior of the positions.

[Note: BCD Annex IX Part 4 point 75(a) and (c)]

9.11 Calculation of risk weighted exposure amounts under the standardised approach to securitisations

9.11.1

FCA PRA

R

Subject to ■ BIPRU 9.11.5 R, the *risk weighted exposure amount* of a rated *securitisation position* or *resecuritisation position* must be calculated by applying to the *exposure* value the *risk weight* associated with the *credit quality step* with which the credit assessment has been determined to be associated, as prescribed in ■ BIPRU 9.11.2 R .

[Note: BCD Annex IX Part 4 point 6]

9.11.2

FCA PRA

R

Table:

This table belongs to ■ BIPRU 9.11.1 R

<i>Credit Quality step</i>	1	2	3	4 (only for credit assessments other than short-term credit assessments)	All other credit quality steps
<i>Securitisation positions</i>	20%	50%	100%	350%	1250%
<i>Resecuritisation positions</i>	40%	100%	225%	650%	1250%

[Note: For mapping of the *credit quality step* to the credit assessments of *eligible ECAs*, refer to: <http://www.fca.org.uk/your-fca/documents/fsa-ecais-standardised-for-the-FCA> and <http://www.bankofengland.co.uk/publications/Documents/prabankingpolicy/2013/ecaissecuritisation.pdf> for the PRA]

[Note: BCD, Annex IX, Part 4, point 6, Table 1]

9.11.3

R

[deleted]

9.11.4

FCA PRA

R

Subject to ■ BIPRU 9.11.6 R ■ BIPRU 9.11.12 R, the *risk weighted exposure amount* of an *unrated securitisation position* must be calculated by applying a *risk weight* of 1250%.

[Note: BCD Annex IX Part 4 point 7]

Originator and sponsor firms

9.11.5

FCA PRA

R

For an *originator* or *sponsor*, the *risk weighted exposure amounts* calculated in respect of its positions in a *securitisation* may be limited to the *risk weighted exposure amounts* which would be calculated for the *securitised exposures* had they not been *securitised* subject to the presumed application of a 150% *risk weight* to all past due items and items belonging to regulatory high risk categories (see ■ BIPRU 3.4.104 R and ■ BIPRU 3 Annex 3 R) amongst the *securitised exposures*.

[Note: BCD Annex IX Part 4 point 8]

Treatment of unrated securitisation positions

9.11.6

FCA PRA

R

- (1) A *firm* having an *unrated securitisation position* may apply the treatment set out in this paragraph for calculating the *risk weighted exposure amount* for that position provided the composition of the pool of *exposures securitised* is known at all times.
- (2) A *firm* may apply the weighted-average *risk weight* that would be applied to the *securitised exposures* referred to in (1) under the *standardised approach* by a *firm* holding the *exposures* multiplied by a concentration ratio.
- (3) This concentration ratio is equal to the sum of the nominal amounts of all the *tranches* divided by the sum of the nominal amounts of the *tranches* junior to, or *pari passu* with, the *tranche* in which the position is held including that *tranche* itself.
- (4) The resulting *risk weight* must not be higher than 1250% or lower than any *risk weight* applicable to a *rated* more senior *tranche*.
- (5) Where the *firm* is unable to determine the *risk weights* that would be applied to the *securitised exposures* under the *standardised approach*, it must apply a *risk weight* of 1250% to the position.

[Note: BCD Annex IX Part 4 points 9 and 10]

9.11.7

FCA PRA

G

- (1) This provision contains *guidance* on the requirement in ■ BIPRU 9.11.6 R (1) that the composition of the pool of *exposures securitised* must be known at all times.
- (2) The composition should be known sufficiently at the time of purchase for the *firm* to be able accurately to calculate the *risk weighted exposure amounts* of the pool under the *standardised approach*.

- (3) Thereafter, any change to the composition of the pool during the life of the transaction that would lead to an increase in the *risk weighted exposure amount* of the pool of *exposures* under the *standardised approach* should be either:
 - (a) prohibited by the documentation; or
 - (b) included in the *firm's* capital calculations.
- (4) It would be sufficient for the purposes of (2) for the composition of the pool to be reported to the *firm* at least daily, via information service providers, secure web-sites or other appropriate sources.

Treatment of securitisation positions in a second loss tranche or better in an ABCP programme

9.11.8

FCA PRA

R

Subject to the availability of a more favourable treatment by virtue of the provisions concerning *liquidity facilities* in ■ BIPRU 9.11.10 R ■ BIPRU 9.11.12 R, a *firm* may apply to *securitisation positions* meeting the conditions set out in ■ BIPRU 9.11.9 R a *risk weight* that is the greater of:

- (1) 100%, or
- (2) the highest of the risk weights that would be applied to any of the *securitised exposures* under the *standardised approach* by a *firm* holding the *exposures*.

[Note: BCD Annex IX Part 4 point 11]

9.11.9

FCA PRA

R

For the treatment in ■ BIPRU 9.11.8 R to be available,:

- (1) the *securitisation position* must be in an *ABCP programme*;
- (2) the *securitisation position* must be in a *tranche* which is economically in a second loss position or better in the *securitisation* and the first loss *tranche* must provide meaningful *credit enhancement* to the second loss *tranche*;
- (3) the *securitisation position* must be of a quality the equivalent of investment grade or better; and
- (4) the *firm* in question must not hold a position in the first loss *tranche*.

[Note: BCD Annex IX Part 4 point 12]

Treatment of unrated liquidity facilities

9.11.10

FCA PRA

R

When the conditions in this paragraph have been met, and in order to determine its *exposure* value, a conversion figure of 50% may be applied to the nominal amount of a *liquidity facility*. The *risk weight* to be

applied is the highest *risk weight* that would be applied to any of the *securitised exposures* under the *standardised approach* by a *firm* holding the *exposures*. Those conditions are as follows:

- (1) the *liquidity facility* documentation must clearly identify and limit the circumstances under which the facility may be drawn;
- (2) it must not be possible for the facility to be drawn so as to provide credit support by covering losses already incurred at the time of draw for example, by providing liquidity in respect of *exposures* in default at the time of draw or by acquiring assets at more than fair value;
- (3) the facility must not be used to provide permanent or regular funding for the *securitisation*;
- (4) repayment of draws on the facility must not be subordinated to the claims of investors other than to claims arising in respect of interest rate or currency derivative contracts, fees or other such payments, nor be subject to waiver or deferral;
- (5) it must not be possible for the facility to be drawn after all applicable *credit enhancements* from which the *liquidity facility* would benefit are exhausted; and
- (6) the facility must include a provision that results in an automatic reduction in the amount that can be drawn by the amount of *exposures* that are in *default*, where *default* has the meaning given to it for the purposes of the *IRB approach*, or where the pool of *securitised exposures* consists of *rated* instruments, that terminates the facility if the average quality of the pool falls below investment grade.

[Note: BCD Annex IX Part 4 point 13]

Liquidity facilities that may be drawn only in the event of a general market disruption

9.11.11

R

[deleted]

Cash advance facilities

9.11.12

R

FCA PRA

To determine its *exposure* value, a conversion figure of 0% may be applied to the nominal amount of a *liquidity facility* that is unconditionally cancellable provided that the conditions set out at ■ BIPRU 9.11.10 R are satisfied and that repayment of draws on the facility are senior to any other claims on the cash flows arising from the *securitised exposures*.

[Note: BCD Annex IX Part 4 point 15]

**Standardised approach: recognition of credit risk mitigation on
securitisation positions**
.....

9.11.13

FCA PRA

R

Where a *firm* calculates the *risk weighted exposure amount* of a *securitisation position* under the *standardised approach*, where credit protection is obtained on a *securitisation position*, the calculation of *risk weighted exposure amounts* may be modified in accordance with ■ BIPRU 5 (Credit risk mitigation).

[Note: BCD Annex IX Part 4 point 34]

9.12 Calculation of risk-weighted exposure amounts under the IRB approach

9.12.1 **R** ■ BIPRU 9.12 applies to the calculation of *risk weighted exposure amounts of securitisation positions* under the *IRB approach*.
FCA **PRA**

[Note: BCD Annex IX Part 4 point 37 (part)]

Hierarchy of methods

9.12.2 **R** For a *rated position* or a position in respect of which an inferred *rating* may be used, the *ratings based method* must be used to calculate the *risk weighted exposure amount*.
FCA **PRA**

[Note: BCD Annex IX Part 4 point 38]

9.12.3 **R** For an *unrated position* the *supervisory formula method* must be used except where a *firm* uses the *ABCP internal assessment approach*.
FCA **PRA**

[Note: BCD Annex IX Part 4 point 39]

9.12.4 **G** In cases where both the *ABCP internal assessment approach* and the *supervisory formula method* are available, a firm should determine the most appropriate approach and apply that approach consistently.
FCA **PRA**

9.12.5 **R** A *firm* other than an *originator* or a *sponsor* may not use the *supervisory formula method* unless its *IRB permission* expressly permits it to do so.
FCA **PRA**

[Note: BCD Annex IX Part 4 point 40]

9.12.6 **R** Subject to any *IRB permission* of the type described in ■ BIPRU 9.12.28 G, in the case of an *originator* or *sponsor* unable to calculate K_{IRB} and which has not obtained approval to use the *ABCP internal assessment approach*, and in the case of other *firms* where they have not obtained approval to use the *supervisory formula method* or, for positions in *ABCP programmes*, the *ABCP internal assessment approach*, a *risk weight* of 1250% must be assigned to *securitisation positions* which are *unrated* and in respect of which an inferred *rating* may not be used.
FCA **PRA**

[Note: BCD Annex IX Part 4 point 41]

9.12.7

FCA PRA

R

Use of inferred ratings

When the following minimum operational requirements are satisfied a *firm* must attribute to an *unrated position* an inferred credit assessment equivalent to the credit assessment of those *rated positions* (the reference positions) which are the most senior positions which are in all respects subordinate to the *unrated securitisation position* in question:

- (1) the reference positions must be subordinate in all respects to the *unrated securitisation position*;
- (2) the maturity of the reference positions must be equal to or longer than that of the *unrated position* in question; and
- (3) on an ongoing basis, any inferred *rating* must be updated to reflect any changes in the credit assessment of the reference positions.

[Note: BCD Annex IX Part 4 point 42]

9.12.8

FCA PRA

R

Maximum risk-weighted exposure amounts

For an *originator*, a *sponsor*, or for other *firms* which can calculate K_{IRB} , the *risk weighted exposure amounts* calculated in respect of its positions in a *securitisation* may be limited to that which would produce an amount in respect of its *credit risk capital requirement* equal to the sum of 8% of the *risk weighted exposure amount* which would be produced if the *securitised* assets had not been *securitised* and were on the balance sheet of the *firm* plus the *expected loss* amounts of those *exposures*.

[Note: BCD Annex IX Part 4 point 45]

9.12.9

FCA PRA

R

Ratings based method

■ BIPRU 9.12.10 R to ■ BIPRU 9.12.19 R apply to the calculation of *risk weighted exposure amount* of *securitisation positions* under the *ratings based method*.

9.12.10

FCA PRA

R

Under the *ratings based method*, the *risk weighted exposure amount* of a *rated securitisation position* or *resecuritisation position* must be calculated by applying to the *exposure* value the *risk weight* associated with the *credit quality step* with which the credit assessment is associated as prescribed in ■ BIPRU 9.12.11 R multiplied by 1.06.

[Note: BCD Annex IX Part 4 point 46]

9.12.11

FCA PRA

R

Table:

This table belongs to ■ BIPRU 9.12.10 R

Credit Quality Step		Securitisation positions			Resecuritisation positions	
Credit assessments other than short term	Short-term credit assessments	A	B	C	D	E
1	1	7%	12%	20%	20%	30%
2		8%	15%	25%	25%	40%

R

[deleted]

9.12.13

FCA PRA

R

For the purposes of ■ BIPRU 9.12.10 R:

- (1) the weightings in column C of ■ BIPRU 9.12.11 R must be applied where the *securitisation position* is not a *resecuritisation position* and where the effective number of *exposures* securitised is less than six;
- (2) for the remainder of the *securitisation positions* that are not *resecuritisation positions*, the weightings in column B must be

applied unless the position is in the most senior *tranche* of a *securitisation*, in which case the weightings in column A must be applied; and

- (3) for *resecuritisation positions*, the weightings in column E must be applied unless the *resecuritisation position* is in the most senior *tranche* of the *resecuritisation* and none of the underlying *exposures* were themselves *resecuritisation exposures*, in which case column D must be applied.

[Note: BCD Annex IX Part 4 point 47(part)]

9.12.14

FCA PRA

R

When determining under ■ BIPRU 9.12.13 R whether a *tranche* is the most senior for these purposes, a *firm* need not take into consideration amounts due under interest rate or currency derivative contracts, fees due, or other similar payments.

[Note: BCD Annex IX Part 4 point 47 (part)]

9.12.15

FCA PRA

G

A senior *liquidity facility* need not be taken into account for the purposes of determining the most senior *tranche* under ■ BIPRU 9.12.13 R.

9.12.16

R

[deleted]

9.12.17

FCA PRA

R

In calculating the effective number of *exposures securitised*, multiple *exposures* to one obligor must be treated as one *exposure*. The effective number of *exposures* is calculated as:

$$N = \frac{((\sum_i) (EAD_i))^2}{(\sum_i) (EAD_i^2)}$$

where EAD_i represents the sum of the *exposure* values of all *exposures* to the i^{th} obligor. If the portfolio share associated with the largest *exposure*, C1, is available, the *firm* may compute N as $1/C1$.

The ABCP internal assessment approach

9.12.20

FCA PRA

R

(1) If:

- (a) a *firm's IRB permission* allows it to use this treatment; and
- (b) the conditions in (2)(16) are satisfied,

- a *firm* may attribute to an *unrated position* in an *asset backed commercial paper programme* a *derived rating* as laid down in (3).
- (2) Positions in the commercial paper issued from the programme must be *rated positions*.
 - (3) Under the *ABCP internal assessment approach*, the *unrated position* must be assigned by the *firm* to one of the rating grades described in (5). The position must be attributed a *derived rating* that is the same as the credit assessments corresponding to that *rating grade* as laid down in (5). Where this *derived rating* is, at the inception of the *securitisation*, at the level of investment grade or better, it must be treated in the same way as an eligible credit assessment by an *eligible ECAI* for the purposes of calculating *risk weighted exposure amounts*.
 - (4) The internal assessment methodology must be used in the *firms* internal risk management processes, including its decision making, management information and capital allocation processes.
 - (5) The *firms* internal assessment methodology must include rating grades. There must be a correspondence between such rating grades and the credit assessments of *eligible ECAIs*. This correspondence must be explicitly documented.
 - (6) The *firm* must be able to satisfy the *appropriate regulator* that its internal assessment of the credit quality of the position reflects the publicly available assessment methodology of one or more *eligible ECAIs*, for the *rating* of securities backed by the *exposures* of the type *securitised*.
 - (7) If a *firm's IRB permission* permits this, a *firm* need not comply with the requirement for the assessment methodology of the *ECAI* to be publicly available where it can demonstrate that due to the specific features of the *securitisation* for example its unique structure - there is as yet no publicly available *ECAI* assessment methodology.
 - (8) The *ECAIs*, the methodology of which must be reflected as required by (6), must include those *ECAIs* which have provided an external rating for the commercial paper issued from the programme. Quantitative elements such as stress factors used in assessing the position to a particular credit quality must be at least as conservative as those used in the relevant assessment methodology of the *ECAIs* in question.
 - (9) In developing its internal assessment methodology the *firm* must take into consideration relevant published ratings methodologies

of the *eligible ECAIs* that rate the commercial paper of the *ABCP programme*. This consideration must be documented by the *firm* and updated regularly, as outlined in (15).

- (10) The *ABCP programme* must have collections policies and processes that take into account the operational capability and credit quality of the servicer. The programme must mitigate seller/servicer risk through various methods, such as triggers based on current credit quality that would preclude commingling of funds.
- (11) The *ABCP programme* must incorporate structural features for example wind down triggers - into the purchase of *exposures* in order to mitigate potential credit deterioration of the underlying portfolio.
- (12) The *ABCP programme* must incorporate underwriting standards in the form of credit and investment guidelines. In deciding on an asset purchase, the programme administrator must consider the type of asset being purchased, the type and monetary value of the *exposures* arising from the provision of liquidity facilities and *credit enhancements*, the loss distribution, and the legal and economic isolation of the transferred assets from the entity selling the assets. A credit analysis of the asset sellers risk profile must be performed and must include analysis of past and expected future financial performance, current market position, expected future competitiveness, leverage, cash flow, and interest coverage, and debt rating. In addition, a review of the sellers underwriting standards, servicing capabilities, and collection processes must be performed.
- (13) The *ABCP programme's* underwriting standards must establish minimum asset eligibility criteria that, in particular,
 - (a) exclude the purchase of assets that are significantly past due or defaulted;
 - (b) limit excess concentration to individual obligor or geographic area; and
 - (c) limit the tenor of the assets to be purchased.
- (14) The aggregated estimate of loss on an asset pool that the *ABCP programme* is considering purchasing must take into account all sources of potential risk, such as credit risk and *dilution risk*. If the seller-provided *credit enhancement* is sized based on only credit-related losses, then a separate reserve must be established for *dilution risk*, if *dilution risk* is material for the particular *exposure* pool. In addition, in sizing the required enhancement level, the programme must review several years of historical

information, including losses, delinquencies, dilutions, and the turnover rate of the receivables.

- (15) Internal or external auditors, an ECAI, or the firm's internal credit review or risk management function must perform regular reviews of the internal assessment process and the quality of the internal assessments of the credit quality of the firms exposures to an ABCP programme. If the firms internal audit, credit review, or risk management functions perform the review, then these functions must be independent of the ABCP programme business line, as well as the customer relationship.
- (16) The firm must track the performance of its internal ratings over time to evaluate the performance of its internal assessment methodology and must make adjustments, as necessary, to that methodology when the performance of the exposures routinely diverges from that indicated by the internal ratings.

[Note: BCD Annex IX Part 4 points 43 and 44]

Supervisory formula method

9.12.21

FCA PRA

R

Subject to any permission of the type described in ■ BIPRU 9.12.28 G, under the supervisory formula method, the risk weight for a securitisation position must be the risk weight to be applied in accordance with ■ BIPRU 9.12.22 R. However, the risk weight must be no less than 20% for resecuritisation positions and no less than 7% for all other securitisation positions.

[Note: BCD Annex IX Part 4 point 52]

9.12.22

FCA PRA

R

- (1) Subject to any permission of the type described in ■ BIPRU 9.12.28 G, the risk weight to be applied to the exposure amount must be:

$$12.5 (S[L+T] - S[L]) / T$$

- (2) The remaining provisions of this paragraph define the terms used in the formulae in (1) and (3).

$$(3) \quad S[x] = \begin{cases} x & \text{when } x \leq K_{IRBR} \\ K_{IRBR} + K[x] - K[K_{IRBR}] + (d \cdot K_{IRBR} t^w) (1 - e^{-(K_{max} x / K_{min})}) & \text{when } K_{IRBR} < x \end{cases}$$

$$(4) \quad h = (1 - K_{IRBR} / ELGD)^N$$

$$(5) \quad c = K_{IRBR} / (1 - h)$$

$$(6) \quad v = \frac{(ELGD - K_{IRBR})K_{IRBR} + 0.25(1 - ELGD)K_{IRBR}}{N}$$

$$(7) \quad f = \left(\frac{v + \frac{K_{IRBR}^2}{1-h} - c^2}{1-h} \right) + \frac{(1 - K_{IRBR})K_{IRBR} - v}{(1-h)\tau}$$

$$(8) \quad g = \frac{(1-c)c}{f} - 1$$

$$(9) \quad a = g \cdot c$$

$$(10) \quad b = g \cdot (1-c)$$

$$(11) \quad d = 1 - (1-h) \cdot (1 - \text{Beta}[K_{IRBR}; a, b])$$

$$(12) \quad K[x] = (1-h) \cdot ((1 - \text{Beta}[x; a, b])x + \text{Beta}[x; a+1, b]c)$$

$$(13) \quad \tau = 1000,$$

$$(14) \quad \omega = 20.$$

(15) In these expressions, *Beta* [*x*; *a*, *b*] refers to the cumulative beta distribution with parameters *a* and *b* evaluated at *x*.

(16) *T* (the thickness of the *tranche* in which the position is held) is measured as the ratio of (a) the nominal amount of the *tranche* to (b) the sum of the *exposure* values of the *exposures* that have been *securitised*. For these purposes the *exposure* value of a *financial derivative instrument* must, where the current replacement cost is not a positive value, be the potential future credit exposure calculated in accordance with ■ BIPRU 13 (Treatment of derivative instruments).

(17) K_{IRBR} is the ratio of (a) K_{IRB} to (b) the sum of the *exposure* values of the *exposures* that have been *securitised*. K_{IRBR} is expressed in decimal form (for example, K_{IRB} equal to 15% of the pool would be expressed as K_{IRBR} of 0.15).

(18) *L* (the *credit enhancement* level) is measured as the ratio of the nominal amount of all *tranches* subordinate to the *tranche* in which the position is held to the sum of the *exposure* values of the *exposures* that have been *securitised*. Capitalised future income must not be included in the measured *L*. Amounts due

by counterparties to *financial derivative instruments* that represent *tranches* more junior than the *tranche* in question may be measured at their current replacement cost (without the potential future credit exposures) in calculating the enhancement level.

- (19) N is the effective number of exposures calculated in accordance with ■ BIPRU 9.12.17 R - ■ BIPRU 9.12.18 R. In the case of *resecuritisations*, the *firm* must look at the number of *securitisation exposures* in the pool and not the number of underlying *exposures* in original pools from which the underlying *securitisation exposures* stem.
- (20) ELGD, the *exposure-weighted average loss-given-default*, is calculated as follows:

$$ELGD = \frac{\sum_i LGD_i \cdot EAD_i}{\sum_i EAD_i}$$

- (21) In (20) LGD_i represents the average *LGD* associated with all *exposures* to the i^{th} obligor, where *LGD* is determined in accordance with ■ BIPRU 4. In the case of *resecuritisation*, an *LGD* of 100% must be applied to the *securitised* positions. When default risk and *dilution risk* for purchased receivables are treated in an aggregate manner within a *securitisation* (e.g. a single reserve or over-collateralisation is available to cover losses from either source), the *LGD* input must be constructed as a weighted average of the *LGD* for credit risk and the 75% *LGD* for *dilution risk*. The weights are the stand-alone capital charges for credit risk and *dilution risk* respectively.

[Note: BCD Annex IX Part 4 point 53 (part)]

Simplified inputs

9.12.23

FCA PRA

R

- (1) Under the *supervisory formula method*, if the *exposure* value of the largest *securitised exposure*, C_1 , is no more than 3% of the sum of the *exposure* values of the *securitised exposures*, then for the purposes of the *supervisory formula method* the *firm* may set *LGD* equal 50% and N equal to either:

(a)
$$N = \left(C_1 C_m + \left(\frac{C_m - C_1}{m - 1} \right)_{\max\{1 - m C_1, 0\}} \right)^{-1}$$

;or

(b) $N = 1 / C_1$.

- (2) C_m is the ratio of the sum of the *exposure* values of the largest 'm' *exposures* to the sum of the *exposure* values of the *exposures securitised*. The level of m may be set by the *firm*.

- (3) For *securitisations* involving *retail exposures*, the *supervisory formula method* may be implemented using the simplifications: $h = 0$ and $v = 0$.

[Note: BCD Annex IX Part 4 point 53 (part)]

9.12.24

FCA PRA

G

Where a *securitisation of retail exposures* has a sufficiently low value of N for the simplification in ■ BIPRU 9.12.23 R (3) to result in a material change in the capital charge as compared to the position if the approach in ■ BIPRU 9.12.23 R were not taken, a *firm* should discuss with the *appropriate regulator* the suitability of its use.

Liquidity Facilities

9.12.25

FCA PRA

R

The provisions in ■ BIPRU 9.12.26 R to ■ BIPRU 9.12.28 G apply for the purposes of determining the *exposure* value of an *unrated securitisation position* in the form of certain types of *liquidity facility*.

[Note: BCD Annex IX Part 4 point 55]

Liquidity facilities only available in the event of general market disruption

9.12.26

R

[deleted]

Cash advance facilities

9.12.27

FCA PRA

R

A conversion figure of 0% may be applied to the nominal amount of a *liquidity facility* that meets the conditions set out in ■ BIPRU 9.11.12 R.

[Note: BCD Annex IX Part 4 point 57]

Exceptional treatment for liquidity facilities where K_{IRB} cannot be calculated

9.12.28

FCA PRA

G

- (1) When it is not practical for the *firm* to calculate the *risk weighted exposure amounts* for the *securitised exposures* as if they had not been *securitised* and the position does not qualify for the *ABCP internal assessment approach*, a *firm* may apply to the *appropriate regulator* for a variation of its *IRB permission* under which, on an exceptional basis, it may temporarily apply the method in (2) for the calculation of *risk weighted exposure amounts* for an *unrated securitisation position* in the form of a *liquidity facility* that meets the conditions to be a *liquidity facility* set out in ■ BIPRU 9.11.10 R.
- (2) Under the method in this paragraph, the highest *risk weight* that would be applied under the *standardised approach* to any of the *securitised exposures* had they not been *securitised* may be applied to the *securitisation position* represented by the *liquidity facility*. To determine the *exposure* value of the position a conversion figure of 50% may be applied to the nominal amount of the *liquidity facility* if the facility has an original maturity of one year or less. In other cases a conversion factor of 100% must be applied.

[Note: BCD Annex IX Part 4 points 58 and 59]

9.13 Securitisations of revolving exposures with early amortisation provisions

9.13.1

FCA PRA

R

Where there is a *securitisation of revolving exposures* subject to an *early amortisation provision*, the *originator* must calculate an additional *risk weighted exposure amount* in accordance with this section in respect of the risk that the levels of credit risk to which it is exposed may increase following the operation of the *early amortisation provision*. Accordingly this section sets out how an *originator* must calculate a *risk weighted exposure amount* when it sells *revolving exposures* into a *securitisation* that contains an *early amortisation provision*.

[Note: BCD Article 100(1), Annex IX Part 4 points 16 and 68]

Additional capital requirements for securitisations of revolving exposures with early amortisation provisions

9.13.2

FCA PRA

R

A *firm* must calculate a *risk weighted exposure amount* in respect of the sum of the *originators* interest and the investors interest.

[Note: BCD Annex IX Part 4 point 17]

9.13.3

FCA PRA

R

For *securitisation* structures where the *securitised exposures* comprise *revolving exposures* and non-revolving *exposures*, an *originator* must apply the treatment set out in this section to that portion of the underlying pool containing *revolving exposures*.

[Note: BCD Annex IX Part 4 point 18]

9.13.4

FCA PRA

R

For the purposes of this section, subject to ■ BIPRU 9.13.6 R:

- (1) *originators* interest means the exposure value of that notional part of a pool of drawn amounts sold into a *securitisation*, the proportion of which in relation to the amount of the total pool sold into the structure determines the proportion of the cash-flows generated by principal and interest collections and other associated amounts which are not available to make payments to those having *securitisation positions* in the *securitisation*;
- (2) to qualify as such the *originators* interest may not be subordinate to the investors interest; and

- (3) investors interest means the exposure value of the remaining notional part of the pool of drawn amounts.

[Note: BCD Annex IX Part 4 point 19]

9.13.5

FCA PRA

R

Subject to ■ BIPRU 9.13.7 R, the *exposure* of the *originator* associated with its rights in respect of the *originators* interest must not be treated as a *securitisation position* but as a *pro rata exposure* to the *securitised exposures* as if they had not been *securitised*.

[Note: BCD Annex IX Part 4 point 20]

9.13.6

FCA PRA

R

- (1) For *firms* using the *IRB approach* set out in ■ BIPRU 4, this paragraph applies in place of ■ BIPRU 9.13.4 R.
- (2) For the purposes of this section, *originators* interest means the sum of:
- (a) the exposure value of that notional part of a pool of drawn amounts sold into a *securitisation*, the proportion of which in relation to the amount of the total pool sold into the structure determines the proportion of the cash-flows generated by principal and interest collections and other associated amounts which are not available to make payments to those having *securitisation positions* in the *securitisation*; and
 - (b) the exposure value of that part of the pool of undrawn amounts of the credit lines, the drawn amounts of which have been sold into the *securitisation*, the proportion of which to the total amount of such undrawn amounts is the same as the proportion of the exposure value described in (a) to the exposure value of the pool of drawn amounts sold into the *securitisation*.
- (3) To qualify as such the *originators* interest may not be subordinate to the investors interest.
- (4) Investors interest means the exposure value of the notional part of the pool of drawn amounts not falling within (2)(a) plus the exposure value of that part of the pool of undrawn amounts of credit lines, the drawn amounts of which have been sold into the *securitisation*, not falling within (2)(b).

[Note: BCD Annex IX Part 4 points 69 and 70]

9.13.7

FCA PRA

R

For *firms* using the *IRB approach* set out in ■ BIPRU 4, this paragraph applies in place of ■ BIPRU 9.13.5 R. The *exposure* of the *originator* associated with its rights in respect of that part of the *originators* interest described in ■ BIPRU 9.13.6 R (2)(a) must not be treated as a *securitisation*

position but as a pro rata *exposure* to the *securitised* drawn amounts as if they had not been *securitised* in an amount equal to that described in ■ BIPRU 9.13.6 R (2)(a). The *originator* must also be considered to have a pro rata exposure to the undrawn amounts of the credit lines, the drawn amounts of which have been sold into the *securitisation*, in an amount equal to that described in ■ BIPRU 9.13.6 R (2)(b).

[Note: BCD Annex IX Part 4 point 71]

Exemptions from early amortisation treatment

9.13.8

FCA PRA

R

Originators of the following types of *securitisation* are exempt from the capital requirement in ■ BIPRU 9.13.1 R:

- (1) *securitisations* of *revolving exposures* whereby investors remain fully exposed to all future draws by borrowers so that the risk on the underlying facilities does not return to the *originator* even after an early amortisation event has occurred; and
- (2) *securitisations* where any *early amortisation provision* is solely triggered by events not related to the performance of the *securitised* assets or the *originator*, such as material changes in tax laws or regulations.

[Note: BCD Annex IX Part 4 point 21]

Maximum capital requirement

9.13.9

FCA PRA

R

For an *originator* subject to the capital requirement in ■ BIPRU 9.13.1 R the total of the *risk weighted exposure amounts* in respect of its positions in the investors interest (as defined in ■ BIPRU 9.13.4 R or ■ BIPRU 9.13.6 R) and the *risk weighted exposure amounts* calculated under ■ BIPRU 9.13.1 R must be no greater than the greater of:

- (1) the *risk weighted exposure amounts* calculated in respect of its positions in the investors interest (as so defined); and
- (2) the *risk weighted exposure amounts* that would be calculated in respect of the *securitised exposures* by a *firm* holding the *exposures* as if they had not been *securitised* in an amount equal to the investors interest (as so defined).

[Note: BCD Annex IX Part 4 point 22]

9.13.10

FCA PRA

R

Deduction of net gains, if any, arising from the capitalisation of future income required under ■ GENPRU 2.2.90 R (Core tier one capital: profit and loss account and other reserves: Securitisation) must be treated outside the maximum amount indicated in ■ BIPRU 9.13.9 R.

[Note: BCD Annex IX Part 4 point 23]

Calculation of risk-weighted exposure amounts

9.13.11

FCA PRA

R

The *risk weighted exposure amount* to be calculated in accordance with ■ BIPRU 9.13.1 R must be determined by multiplying the amount of the investors interest (as defined in ■ BIPRU 9.13.4 R or ■ BIPRU 9.13.6 R) by the product of:

- (1) the appropriate conversion figure as indicated in ■ BIPRU 9.13.16 R, ■ BIPRU 9.13.19 R or ■ BIPRU 9.13.20 R; and
- (2) the weighted average *risk weight* that would apply to the *securitised exposures* if the *exposures* had not been *securitised*.

[Note: BCD Annex IX Part 4 point 24]

9.13.12

FCA PRA

R

An *early amortisation provision* must be treated as controlled for the purposes of this section where the following conditions are met:

- (1) the *originator* has an appropriate capital/liquidity plan in place to ensure that it has sufficient capital and liquidity available in the event of an early amortisation;
- (2) throughout the duration of the transaction there is a pro rata sharing between the *originators* interest and the investors interest (as defined in ■ BIPRU 9.13.4 R or ■ BIPRU 9.13.6 R) of payments of interest and principal, expenses, losses and recoveries based on the balance of receivables outstanding at one or more reference points during each month;
- (3) the amortisation period is considered sufficient for 90% of the total debt (*originators* and investors interest (as defined in ■ BIPRU 9.13.4 R or ■ BIPRU 9.13.6 R)) outstanding at the beginning of the early amortisation period to have been repaid or recognised as in default; and
- (4) the speed of repayment is no more rapid than would be achieved by straight-line amortisation over the period set out in (3).

[Note: BCD Annex IX Part 4 point 25]

9.13.13

FCA PRA

R

In the case of a *securitisation* meeting the following conditions:

- (1) it is subject to an *early amortisation provision*;
- (2) the *securitisation* is of *retail exposures* which are uncommitted and unconditionally cancellable without prior notice; and
- (3) the early amortisation is triggered by the *excess spread* level falling to a specified level

a *firm* must, to calculate the appropriate conversion figure referred to in ■ BIPRU 9.13.11 R, compare the three-month average *excess spread* level with the *excess spread* levels at which *excess spread* is required to be trapped.

[Note: BCD Annex IX Part 4 point 26]

9.13.14

R

FCA PRA

Where the *securitisation* does not require *excess spread* to be trapped, the trapping point is deemed to be 4.5 percentage points greater than the *excess spread* level at which an early amortisation is triggered.

[Note: BCD Annex IX Part 4 point 27]

9.13.15

R

FCA PRA

The conversion figure to be applied must be determined by the level of the actual three month average *excess spread* in accordance with ■ BIPRU 9.13.16 R.

[Note: BCD Annex IX Part 4 point 28]

9.13.16

R

FCA PRA

Table: Conversion figures

This table belongs to ■ BIPRU 9.13.15 R

	Securitisations subject to a controlled early amortisation provision	Securitisation subject to a non-controlled early amortisation provision
3 months average <i>excess spread</i>	Conversion figure	Conversion figure
Above level A	0%	0%
Level A	1%	5%
Level B	2%	15%
Level C	10%	50%
Level D	20%	100%
Level E	40%	100%

9.13.17

R

FCA PRA

In ■ BIPRU 9.13.16 R:

- (1) Level A means levels of *excess spread* less than 133.33% of the trapping level of *excess spread* but not less than 100% of that trapping level;
- (2) Level B means levels of *excess spread* less than 100% of the trapping level of *excess spread* but not less than 75% of that trapping level;

- (3) Level C means levels of *excess spread* less than 75% of the trapping level of *excess spread* but not less than 50% of that trapping level;
- (4) Level D means levels of *excess spread* less than 50% of the trapping level of *excess spread* but not less than 25% of that trapping level; and
- (5) Level E means levels of *excess spread* less than 25% of the trapping level of *excess spread*.

[Note: BCD Annex IX Part 4 point 29]

9.13.18

FCA PRA

G

In the case of a *securitisation* meeting the conditions in this paragraph, a *firm* may apply to the *appropriate regulator* for a *waiver* that would allow a treatment which approximates closely to that prescribed in ■ BIPRU 9.13.13 R to ■ BIPRU 9.13.17 R for determining the conversion figure indicated. If a *firm* wants such a *waiver*, it should satisfy the *appropriate regulator* that:

- (1) the *securitisation* is subject to an *early amortisation provision* of retail *exposures*;
- (2) those retail *exposures* are uncommitted and unconditionally cancellable without prior notice;
- (3) the *early amortisation* is triggered by a quantitative value in respect of something other than the three month average *excess spread*;
- (4) the *firm* can establish a quantitative measure equivalent, in relation to the value in (3), to the trapping level of *excess spread*; and
- (5) that treatment is a prudent measure of the risk that the levels of credit risk to which it is exposed may increase following the operation of the *early amortisation provision* (referred to in BIPRU 9.13.1R).

[Note: BCD Annex IX Part 4 point 30]

9.13.19

FCA PRA

R

All other *securitisations* subject to a controlled *early amortisation provision of revolving exposures* are subject to a credit conversion figure of 90%.

[Note: BCD Annex IX Part 4 point 32]

9.13.20

FCA PRA

R

All other *securitisations* subject to a non-controlled *early amortisation provision of revolving exposures* are subject to a credit conversion figure of 100%.

[Note: BCD Annex IX Part 4 point 33]

9.13.21

FCA PRA

R

Liquidity plans

A firm which is an *originator* of a revolving *securitisation* transaction involving *early amortisation provisions* should have liquidity plans to address the implications of both scheduled and early amortisation.

[Note: BCD Annex V point 9]

9

9.14 Recognition of credit risk mitigation on securitisation positions under the IRB approach

9.14.1

FCA PRA

R

This section applies to *credit risk mitigation* in relation to a *securitisation position* for a *firm* calculating *risk weighted exposure amounts* using the *IRB approach*.

[Note: BCD Annex IX Part 4 point 37 (part)]

9.14.2

FCA PRA

R

Where a *firm* uses the *ratings based method* to calculate the *risk weighted exposure amounts* of *securitisation positions*, the *firm* may recognise *credit risk mitigation* in accordance with ■ BIPRU 9.14.4 R to ■ BIPRU 9.14.6 R.

[Note: BCD Annex IX Part 4 point 51]

9.14.3

FCA PRA

R

Where a *firm* uses the *supervisory formula method* to calculate the *risk weighted exposure amounts* of *securitisation positions*, the *firm* may recognise *credit risk mitigation* in accordance with ■ BIPRU 9.14.4 R to ■ BIPRU 9.14.5 R and ■ BIPRU 9.14.7 R to ■ BIPRU 9.14.13 R.

[Note: BCD Annex IX Part 4 point 54]

Funded protection

9.14.4

FCA PRA

R

Eligible funded protection is limited to that which is eligible for the calculation of *risk weighted exposure amounts* under the *standardised approach* as laid down under ■ BIPRU 5 and recognition is subject to compliance with the relevant minimum requirements as laid down under ■ BIPRU 5.

[Note: BCD Annex IX Part 4 point 60]

Unfunded credit protection

9.14.5

FCA PRA

R

Eligible unfunded credit protection and unfunded protection providers are limited to those which are eligible under ■ BIPRU 5 (Credit risk mitigation) and ■ BIPRU 4.10 (Credit risk mitigation under the IRB approach) and recognition is subject to compliance with the relevant minimum requirements laid down under those provisions.

[Note: BCD Annex IX Part 4 point 61]

Credit risk mitigation under the ratings based method

9.14.6

FCA PRA

R

Where *risk weighted exposure amounts* are calculated using the *ratings based method*, the *exposure* value and/or the *risk weighted exposure amount* for a *securitisation position* in respect of which credit protection has been obtained may be modified in accordance with the provisions of ■ BIPRU 5 (Credit risk mitigation) as they apply for the calculation of *risk weighted exposure amounts* under the *standardised approach* set out in ■ BIPRU 3.

[Note: BCD Annex IX Part 4 point 62]

Credit risk mitigation under the supervisory formula method full credit protection

9.14.7

FCA PRA

R

■ BIPRU 9.14.8 R ■ BIPRU 9.14.10 R apply where *risk weighted exposure amounts* are calculated using the *supervisory formula method* where there is full credit protection.

[Note: BCD Annex IX Part 4 point 63 (part)]

9.14.8

FCA PRA

R

A *firm* must determine the effective *risk weight* of the position. It must do this by dividing the *risk weighted exposure amount* of the position by the *exposure* value of the position and multiplying the result by 100.

[Note: BCD Annex IX Part 4 point 63 (part)]

9.14.9

FCA PRA

R

In the case of funded credit protection, the *risk weighted exposure amount* of the *securitisation position* must be calculated by multiplying the funded protection-adjusted *exposure* amount of the position (E^* , as calculated under ■ BIPRU 5.4.28 R (3), taking the amount of the *securitisation position* to be E) by the effective *risk weight*.

[Note: BCD Annex IX Part 4 point 64]

9.14.10

FCA PRA

R

In the case of unfunded credit protection, the *risk weighted exposure amount* of the *securitisation position* must be calculated by multiplying G_A (the amount of the protection adjusted for any currency mismatch and maturity mismatch in accordance ■ BIPRU 5.7.23 R (2)) by the *risk weight* of the protection provider; and adding this to the amount arrived at by multiplying the amount of the *securitisation position* minus G_A by the effective *risk weight*.

[Note: BCD Annex IX Part 4 point 65]

Credit risk mitigation under the supervisory formula method partial protection

9.14.11

FCA PRA

R

■ BIPRU 9.14.12 R ■ BIPRU 9.14.13 R apply where *risk weighted exposure amounts* are calculated using the *supervisory formula method* where there is partial protection.

9.14.12

FCA PRA

R

If the *credit risk mitigation* covers the first loss or losses on a proportional basis on the *securitisation position*, a *firm* may apply ■ BIPRU 9.14.7 R to ■ BIPRU 9.14.10 R.

[Note: BCD Annex IX Part 4 point 66]

9.14.13

FCA PRA

R

In other cases the *firm* must treat the *securitisation position* as two or more positions with the uncovered portion being the position with the lower credit quality. For the purposes of calculating the *risk weighted exposure amount* for this position, the provisions in ■ BIPRU 9.12.22 R to ■ BIPRU 9.12.24 G apply subject to the modifications that T is adjusted to e^* in the case of funded credit protection; and to $T-g$ in the case of unfunded credit protection, where e^* denotes the ratio of E^* to the total notional amount of the underlying pool, where E^* is the adjusted *exposure amount* of the *securitisation position* calculated in accordance with ■ BIPRU 5.4.28 R (3) taking the amount of the *securitisation position* to be E; and g is the ratio of the nominal amount of credit protection (adjusted for any currency or maturity mismatch in accordance with the provisions of ■ BIPRU 5 (Credit risk mitigation)) to the sum of the *exposure amounts* of the *securitised exposures*. In the case of unfunded credit protection the *risk weight* of the protection provider must be applied to that portion of the position not falling within the adjusted value of T.

[Note: BCD Annex IX Part 4 point 67]

9.15 Requirements for investors

Application

9.15.1

PRA

R

Subject to ■ BIPRU 9.15.1A R, ■ BIPRU 9.15 applies to:

- (1) new *securitisations* issued on or after 1 January 2011; and
- (2) from 31 December 2014, to existing *securitisations* where new underlying *exposures* are added or substituted after that date.

[Note: BCD, Article 122a, paragraph 8]

9.15.1A

PRA

R

■ BIPRU 9.15.16A R and ■ BIPRU 9.15.16B R only apply to:

- (1) new *securitisations* issued on or after 31 December 2011; and
- (2) from 31 December 2014, to existing *securitisations* where new underlying *exposures* are added or substituted after that date.

9.15.1B

PRA

G

A *credit institution* should have regard to the Committee of European Banking Supervisors Guidelines to Article 122a of the *Banking Consolidation Directive* when considering its obligations under ■ BIPRU 9.3.15 R to ■ BIPRU 9.3.20 R and ■ BIPRU 9.15. The Guidelines can be found at <http://www.eba.europa.eu/Publications/Standards-Guidelines.aspx>.

Purpose

9.15.2

PRA

G

The purpose of ■ BIPRU 9.15 is to implement Article 122a of the *Banking Consolidation Directive*, with the exception of those parts of Article 122a that are implemented through the *rules* in ■ BIPRU 9.3.

Exposures to transferred credit risk

9.15.3

PRA

R

Subject to ■ BIPRU 9.15.9 R and ■ BIPRU 9.15.10R, a *credit institution*, other than when acting as an *originator*, a *sponsor* or original lender, will be exposed to the credit risk of a *securitisation position* in its *trading book* or *non-trading book* only if the *originator*, *sponsor* or original lender has explicitly disclosed to the *credit institution* that it will retain, on an *ongoing basis*, a material net economic interest which, in any event, must not be less than 5%.

[Note: *BCD*, Article 122a, paragraphs 1 and 3]

Retention of net economic interest

9.15.4

PRA

R

Retention of net economic interest means any of the following:

- (1) retention of no less than 5% of the nominal value of each of the *tranches* sold or transferred to the investors;
- (2) in the case of *securitisations of revolving exposures*, retention of the *originator's* interest of no less than 5% of the nominal value of the *securitised exposures*;
- (3) retention of randomly selected *exposures*, equivalent to no less than 5% of the nominal amount of the *securitised exposures*, where those *exposures* would otherwise have been *securitised* in the *securitisation* provided that the number of potentially *securitised exposures* is no less than 100 at origination;
- (4) retention of the first loss *tranche* and, if necessary, other *tranches* having the same or a more severe risk profile than those transferred or sold to investors and not maturing any earlier than those transferred or sold to investors, so that the retention equals in total no less than 5% of the nominal value of the *securitised exposures*.

[Note: *BCD*, Article 122a, paragraph 1]

9.15.5

PRA

R

Net economic interest is measured at the origination and must be maintained on an *ongoing basis*. It must not be subject to any *credit risk mitigation* or any short positions or any hedge. The net economic interest must be determined by the notional value for off-balance sheet items.

[Note: *BCD*, Article 122a, paragraph 1]

9.15.6

PRA

R

Multiple applications of the retention of net economic interest requirements for any given *securitisation* are not required.

[Note: *BCD*, Article 122a, paragraph 1]

9.15.7

PRA

R

Subject to ■ BIPRU 9.15.8R, where an *EEA* parent credit institution or an *EEA* financial holding company, or one of its *subsidiaries*, as an *originator* or a *sponsor*, *securitises exposures* from several *credit institutions, investment firms* or other *institutions* which are included within the scope of supervision on a consolidated basis, the requirement to retain a net economic interest referred to in ■ BIPRU 9.15.3R may be satisfied on the basis of the consolidated situation of the related *EEA* parent credit institution or *EEA* financial holding company.

[Note: *BCD*, Article 122a, paragraph 2]

9.15.8

PRA

R

■ BIPRU 9.15.7R only applies where the *credit institutions, investment firms* or *institutions* which created the *securitised exposures* have committed themselves to adhere to the requirements in ■ BIPRU 9.3.15R to ■ BIPRU 9.3.17R and deliver, in a timely manner, to the *originator* or *sponsor* and to the *EEA* parent credit institution or an *EEA* financial holding company the information needed to satisfy ■ BIPRU 9.3.18R to ■ BIPRU 9.3.20R.

[Note: *BCD*, Article 122a, paragraph 2]

9.15.9

PRA

R

■ BIPRU 9.15.3R does not apply where the *securitised exposures* are claims or contingent claims on, or fully, unconditionally and irrevocably guaranteed by:

- (1) central governments or *central banks*;
- (2) regional governments, local authorities and public sector entities of *EEA States*;
- (3) *institutions* to which a 50% *risk weight* or less is assigned under ■ BIPRU 3.4.31 R to ■ BIPRU 3.4.46 R; or
- (4) *multilateral development banks*.

[Note: *BCD*, Article 122a, paragraph 3]

9.15.10

PRA

R

The requirements in ■ BIPRU 9.15.3R do not apply with respect to the following:

- (1) transactions based on a clear, transparent and accessible index, where the underlying reference entities are identical to those that make up an index of entities that is widely traded, or are other tradable securities other than *securitisation positions*; or
- (2) syndicated loans, purchased receivables or credit default swaps where these instruments are not used to package and/or hedge a *securitisation* that is within the scope of ■ BIPRU 9.15.3 R.

[Note: *BCD*, Article 122a, paragraph 3]

Investor due diligence

9.15.11

PRA

R

Before investing, and as appropriate thereafter, a *credit institution* must be able to demonstrate to the *PRA* for each of its individual *securitisation positions*, that it has a comprehensive and thorough understanding of, and has implemented, formal policies and procedures appropriate to its *trading* and *non-trading book* and commensurate with the risk profile of its investments in *securitised positions* for analysing and recording:

- (1) information disclosed under ■ BIPRU 9.15.3R, by *originators* or *sponsors* to specify the net economic interest that they maintain, on an *ongoing basis*, in the *securitisation*;
- (2) the risk characteristics of the individual *securitisation position*;
- (3) the risk characteristics of the *exposures* underlying the *securitisation position*;
- (4) the reputation and loss experience in earlier *securitisations* of the *originators* or *sponsors* in the relevant *exposure* classes underlying the *securitisation position*;
- (5) the statements and disclosures made by the *originators* or *sponsors*, or their agents or advisors, about their due diligence on the *securitised exposures* and, where applicable, on the quality of the collateral supporting the *securitised exposures*;
- (6) where applicable, the methodologies and concepts on which the valuation of collateral supporting the *securitised exposures* is based and the policies adopted by the *originator* or *sponsor* to ensure the independence of the valuer; and
- (7) all the structural features of the *securitisation* that can materially impact the performance of the *credit institution's securitisation position*.

[Note: BCD, Article 122a, paragraph 4]

9.15.12

PRA

R

A *credit institution* must regularly perform its own stress tests appropriate to its *securitisation positions*.

[Note: BCD, Article 122a, paragraph 4]

9.15.13

PRA

R

For the purposes of ■ BIPRU 9.15.12R, a *credit institution* may rely on financial models developed by an *ECAI* provided that the *credit institution* can demonstrate, when requested by the *PRA*, that they took due care prior to investing to validate the relevant assumptions in and structuring of the models and to understand methodology, assumptions and results.

[Note: BCD, Article 122a, paragraph 4]

9.15.14

PRA

R

Monitoring requirements

A *credit institution*, other than when acting as *originator* or *sponsor* or original lender, must establish formal procedures appropriate to its *trading* and *non-trading book*, and commensurate with the risk profile of its investments in *securitised positions*, to monitor, on an *ongoing basis* and in a timely manner, performance information on the *exposures* underlying its *securitisation positions*.

[Note: BCD, Article 122a, paragraph 5]

9.15.15

PRA

R

- (1) Where relevant, the information required to be monitored under ■ BIPRU 9.15.14R must include:
- (a) the *exposure* type;
 - (b) the percentage of loans more than 30, 60 and 90 days past due, default rates, prepayment rates, loans in foreclosure;
 - (c) collateral type and occupancy;
 - (d) frequency distribution of credit scores or other measures of credit worthiness across underlying exposures;
 - (e) industry and geographical diversification; and
 - (f) frequency distribution of loan to value ratios with band widths that facilitate adequate sensitivity analysis.
- (2) Where underlying exposures are themselves *securitisation positions*, a *credit institution* must have the information set out in paragraph (1) not only on the underlying *securitisation tranches*, such as the issuer name and credit quality, but also on the characteristics and performance of the pools underlying those *securitisation tranches*.

[Note: BCD, Article 122a, paragraph 5]

9.15.16

PRA

R

A *credit institution* must have a thorough understanding of all structural features of a *securitisation transaction* that would materially impact the performance of its *exposures* to the *transaction*, such as the contractual waterfall and waterfall related triggers, credit enhancements, *liquidity* enhancements, market value triggers and deal-specific definition of default.

[Note: BCD, Article 122a, paragraph 5]

Group level requirements

9.15.16A

PRA

R

Subject to ■ BIPRU 9.15.16B R, a *credit institution* must ensure that any *undertaking* in relation to which the *credit institution* is a *parent undertaking*:

- (1) becomes exposed to the credit risk of a *securitisation* only where the *originator*, *sponsor* or original lender in the *securitisation* has explicitly disclosed to the *undertaking* that it will retain, on an *ongoing basis*, a material net economic interest which, in any event, must not be less than 5%, as set out in ■ BIPRU 9.15.3 R to ■ BIPRU 9.15.10 R;
- (2) complies before investing in a *securitisation*, and continues to comply thereafter, with the investor due diligence requirements set out in ■ BIPRU 9.15.11 R to ■ BIPRU 9.15.13 R; and

- (3) complies in relation to its investments in *securitisations* with the monitoring requirements set out in ■ BIPRU 9.15.14 R to ■ BIPRU 9.15.16 R.

9.15.16B

PRA

R

The requirements in ■ BIPRU 9.15.16A R do not apply in respect of *subsidiaries of a credit institution which are insurance undertakings, reinsurance undertakings or UCITS management companies.*

9.15.16C

PRA

G

The purpose of ■ BIPRU 9.15.16A R is to ensure that a *credit institution* meets the requirements in ■ BIPRU 9.15 at *group* level in relation to its *subsidiary undertakings*. In order to comply with this *rule*, a *credit institution* should be able to demonstrate to the *PRA* that it has put in place adequate *group* policies and procedures which its *subsidiary undertakings* must follow in order to materially meet the requirements for investors set out in ■ BIPRU 9.15, and that it regularly monitors compliance with those policies.

9.15.16D

PRA

G

Where a *credit institution* applies to the *PRA* for a *waiver* of ■ BIPRU 9.15.16A R in relation to its non-*EEA subsidiary undertakings*, the *PRA* may have regard in its assessment of the waiver tests under section 138A of the *Act* as to whether those *undertakings* are themselves subject to requirements in their jurisdiction similar to those set out in ■ BIPRU 9.15 and the extent to which complying with such requirements and ■ BIPRU 9.15.16A R would be unduly burdensome, including circumstances where it could create a substantial conflict for the *credit institution*.

9.15.16E

PRA

G

Without prejudice to ■ BIPRU 9.15.16A R, when assessing group risk in accordance with ■ GENPRU 1.2.30 R a *credit institution* should have regard to the potential risks arising from *securitisation* investment activities carried out by other *undertakings* within its *group*, such as *affiliated companies* and *undertakings* in which the *credit institution* has a participating interest. Where these *undertakings* are not subject to similar requirements as those set out in ■ BIPRU 9.15, the *PRA* may seek to address the potential risks arising from this situation for example by imposing a specific capital add-on in the *credit institution's ICG*.

Consequences of failure to meet requirements

9.15.17

PRA

G

- (1) Subject to ■ BIPRU 9.3.22 G, ■ BIPRU 9.15.9 R to ■ BIPRU 9.15.10 R and ■ BIPRU 9.15.18 G, where a *credit institution* fails to meet any of the requirements in ■ BIPRU 9.3.18 R to ■ BIPRU 9.3.20 R (disclosure requirements), and ■ BIPRU 9.15.11 R to ■ BIPRU 9.15.16 R (investor due diligence requirements) in any material respect by reason of its negligence or omission, the *PRA* will use its powers under section 55J (Variation etc on the Authority's own initiative) of the *Act* to impose an additional *risk weight* of no less than 250% (capped at 1250%) of the risk weight that would otherwise apply to the relevant *securitisation positions* under ■ BIPRU 9.11 to ■ BIPRU 9.14. The additional *risk weight* imposed will be progressively increased with each relevant, subsequent infringement of the requirements in ■ BIPRU 9.3.18 R to ■ BIPRU 9.3.20 R and ■ BIPRU 9.15.11 R to ■ BIPRU 9.15.16 R.

[Note: *BCD*, Article 122a, paragraph 5]

- (2) Subject to ■ BIPRU 9.3.22 G, ■ BIPRU 9.15.9 R to ■ BIPRU 9.15.10 R and ■ BIPRU 9.15.18 G, where a *credit institution* fails to meet in any material respect the requirements in ■ BIPRU 9.15.16A R (Group level requirements), the *PRA* may consider using its powers under section 55J (Variation etc on the Authority's own initiative) of the *Act* in the manner described in (1). In order to calculate the *risk weights* that would apply to the *credit institution*, the *PRA* may treat the *securitisation* investments of the *subsidiary undertaking* as if they were *securitisation positions* held directly by the *credit institution*.

9.15.18

PRA

G

When calculating the additional *risk weight* it will impose, the *PRA* will take into account the exemption of certain *securitisations* from the scope of ■ BIPRU 9.15.3R under ■ BIPRU 9.15.9R and ■ BIPRU 9.15.10R and, if those exemptions are relevant, reduce the *risk weight* it would otherwise impose.

[Note: *BCD*, Article 122a, paragraph 5]

Chapter 10

Large exposures requirements

10.1 Application and Purpose

Application

10.1.1

FCA PRA

R

(1) This chapter applies to a *BIPRU firm* unless it is:

- (a) a *BIPRU limited licence firm*; or
- (b) a *BIPRU limited activity firm*

(2) It applies irrespective of whether the *firm* adopts the *standardised approach* or the *IRB approach*. If it adopts the *IRB approach*, it applies irrespective of whether the *firm* adopts the *foundation IRB approach* or the *advanced IRB approach*.

[Note: *BCD Article 111(1) (part)* and *CAD Article 28(1)*]

Purpose

10.1.2

FCA PRA

G

This chapter sets out *rules and guidance* for *large exposures* and the *concentration risk capital component* (the *CNCOM*), implementing the *large exposures* requirements of articles 66(3) (in part) and 106 to 117 and paragraph 7 of Annex V of the *Banking Consolidation Directive* and articles 28 to 32 and Annex VI of the *Capital Adequacy Directive*.

10.1.3

FCA PRA

G

A *large exposure* may be in the form of a loan to a single borrower, or it may arise across many transactions involving different types of financial instruments with several *counterparties* within the same group of companies. Where a *firm's exposure* to its *counterparty* is large, it risks a large loss should the *counterparty* default. Such a loss may be sufficient on its own to threaten the solvency of the *firm*.

10.1.4

FCA PRA

G

The purpose of this chapter is to ensure that a *firm* manages its *exposure* to *counterparties* within appropriate limits set in relation to its *capital resources*.

10.1.5

R

[deleted]

10.2 Identification of exposures and recognition of credit risk mitigation

10.2.1

FCA PRA

R

Unless ■ BIPRU 10.2.2 R applies, an exposure is:

- (1) any of the items included in ■ BIPRU 3.2.9 R (Exposure classes for the purposes of the *standardised approach*) or the table in ■ BIPRU 3.7.2 R (Classification of off-balance-sheet items for the purposes of the *standardised approach*), whether held in the *trading book* or the *non-trading book*, without application of the *risk weight* or degrees of risk there provided for;

[Note: BCD Article 106(1) first paragraph]

- (2) any *exposure* arising from *financial derivative instruments*;

[Note: BCD Article 106(1) second paragraph (part)]

- (3) any *exposure* to an individual *counterparty* that arises in the *trading book* calculated by summing the following items:

- (a) the excess - where positive - of the *firm's* long *positions* over its short *positions* in all the *CRD financial instruments* issued by the *counterparty* in question, the net position of each of the different *CRD financial instruments* being calculated in accordance with the relevant method in ■ BIPRU 7;
- (b) the *firm's* net *underwriting exposure* to that *counterparty*; and
- (c) any *exposure* due to the transactions, agreements and contracts referred to in ■ BIPRU 14.2.2 R (List of *trading book exposures* that give rise to a *counterparty credit risk charge*).

[Note: CAD Article 29(1) first paragraph]

10.2.2

FCA PRA

R

An *exposure* does not include:

- (1) an *exposure* which is entirely deducted from a *firm's* *capital resources*; or

- (2) in the case of *foreign currency* transactions, *exposures* incurred in the ordinary course of settlement during the two *business days* following payment; or
- (3) in the case of transactions for the purchase or sale of *securities*, *exposures* incurred in the ordinary course of settlement during the five *business days* following payment or delivery of the *securities*, whichever is earlier ; or
- (4) in the case of the provision of money transmission including the execution of payment services, clearing and settlement in any currency and correspondent banking or financial instruments clearing, settlement and custody services to clients, delayed receipts in funding and other *exposures* arising from client activity which do not last longer than the following *business day*; or
- (5) in the case of the provision of money transmission including the execution of payment services, clearing and settlement in any currency and correspondent banking, intra-day *exposures* to *institutions* providing those services.

[Note: BCD Articles 106(1) third paragraph and 106(2)]

10.2.2A G
FCA PRA

The Committee of European Banking Supervisors (CEBS) has issued guidelines on the conditions applicable to the short-term *exposures* referred to in ■ BIPRU 10.2.2 R (4) and ■ (5) in order to be exempted from the *large exposures* limits in ■ BIPRU 10.5 (Limits on exposures). These guidelines can be found at: [http://www.c-eps.org/Publications/Standards-Guidelines/CEBS-Guidelines-on-Article-106\(2\)-\(c\)-and-\(d\)-of-D.aspx](http://www.c-eps.org/Publications/Standards-Guidelines/CEBS-Guidelines-on-Article-106(2)-(c)-and-(d)-of-D.aspx).

10.2.3 G

[deleted]

10.2.3A G
FCA PRA

- (1) An *exposure* does not include *exposures* outstanding with a *central counterparty* to which a *firm* has attributed an *exposure* value of zero for CCR in accordance with ■ BIPRU 13.3.13 R (Exposures to a central counterparty).
- (2) ■ BIPRU 13.3.13 R applies to derivative contracts and *long settlement transactions*, or to other *exposures* arising in respect of those contracts or transactions (but excluding an *exposure* arising from collateral held to mitigate losses in the event of default of other participants in the *central counterparty's* arrangements).

10.2.4 G

[deleted]

Calculation of exposures

10.2.5 FCA PRA R Subject to ■ BIPRU 10.2.6 R and ■ BIPRU 10.2.7 R, the value of a *firm's exposures*, whether in its *non-trading book* or its *trading book*, is the amount at risk calculated in line with ■ GENPRU 1.3 (Valuation).

10.2.6 FCA PRA R A *firm* must calculate the value of its *exposures* in its *trading book* in the manner laid down in ■ BIPRU 14 (Capital requirements for settlement and counterparty risk) for the calculation of *exposure* values. For these purposes the reference in ■ BIPRU 14.2.11 R (How to calculate exposure values and risk weighted exposure amounts for the purpose of calculating the counterparty risk capital component) to the provisions of the *IRB approach* does not apply.

[Note: CAD Article 29(1)(c) (part) and fourth paragraph]

10.2.7 FCA PRA R *Exposures* arising from *financial derivative instruments* must be calculated in accordance with one of the methods set out in ■ BIPRU 13 (Financial derivatives, SFTs and long settlement transactions). For the purposes of this chapter, ■ BIPRU 13.6.6 R (Scope of CCR internal model method) also applies.

[Note: BCD Article 106(1) second paragraph]

10.2.8 FCA PRA R A *firm* must not offset *exposures* in the *non-trading book* and *trading book* for the purpose of calculating *exposures* except to the extent permitted under the *standardised approach* or, if applicable, the *IRB approach*.

Recognition of credit risk mitigation

10.2.9 FCA PRA R Subject to this section, *funded credit protection* or *unfunded credit protection* that complies with the eligibility requirements and other minimum requirements set out in ■ BIPRU 5 (Credit risk mitigation) and, if relevant, ■ BIPRU 4.10 (The IRB approach: Credit risk mitigation) is permitted to be recognised for the purposes of calculating a *firm's exposure*. A *firm* utilising the methods below must still report to the *appropriate regulator* the gross value of its *exposures*.

[Note: BCD Articles 111(1) first paragraph (part) and 112(2)]

10.2.10 FCA PRA R For the purposes of this section, the use of own estimates for *LGDs* and *conversion factors* under the *IRB approach* for an *IRB exposure class* is referred to as the full IRB approach.

The financial collateral simple method under the standardised approach

10.2.11 FCA PRA G As indicated in ■ BIPRU 5.4.15 R (The financial collateral simple method), the *financial collateral simple method* is available only to *firms* using the *standardised approach* and only in relation to *exposures* for which they adopt the *standardised approach*.

10.2.12
FCA PRA

R

A *firm* may only recognise collateral for the purpose of ■ BIPRU 10.2.9R (Recognition of credit risk mitigation) if the collateral complies with the eligibility requirements and other minimum requirements set out in ■ BIPRU 5 (Credit risk mitigation) for the purposes of calculating the *risk weighted exposure amounts* under the *standardised approach* using the *financial collateral simple method* or, if applicable, the method in ■ BIPRU 5.5 (Other funded credit risk mitigation). In particular a *firm* may not recognise collateral for that purpose if it is not eligible under the *financial collateral simple method* or other applicable method.

[Note: BCD Article 112(2) (part)]

10.2.13
FCA PRA

G

For the purpose of ■ BIPRU 10.2.9R (Recognition of credit risk mitigation):

- (1) the requirements set out in ■ BIPRU 5 (Credit risk mitigation) include:
 - (a) the *securities* used as collateral should be valued at market price and should be either traded or effectively negotiable and regularly quoted on a *recognised investment exchange* or a *designated investment exchange*; and
 - (b) where there is a mismatch between the maturity of the *exposure* and the maturity of the credit protection, the collateral must not be recognised; and
- (2) where the issuer of *securities* used as collateral is an *institution*, that collateral may not constitute the *institution's capital resources*.

The financial collateral comprehensive method

10.2.14
FCA PRA

R

A *firm* which uses the *financial collateral comprehensive method* (but not under the full IRB approach (see ■ BIPRU 10.2.10R)) may calculate the value of its *exposures* to a *counterparty* or to a *group of connected clients* as being the fully adjusted value of the *exposures* to the *counterparty* or *group of connected clients* calculated in accordance with the *financial collateral comprehensive method* under ■ BIPRU 5 (Credit risk mitigation) and, if relevant, ■ BIPRU 4.10 (The IRB approach: Credit risk mitigation) taking into account the *credit risk mitigation*, volatility adjustments and any maturity mismatch (E*) in accordance with those *rules*.

[Note: BCD Article 114(1) first paragraph]

10.2.15
FCA PRA

G

The *rules* setting out the calculation of the effects of *credit risk mitigation* under the *financial collateral comprehensive method* are set out in ■ BIPRU 5.4.24 R to ■ BIPRU 5.4.66 R.

10.2.16
FCA PRA

R

For the purposes of ■ BIPRU 10.2.9R (Recognition of credit risk mitigation), a *firm* may use both the *financial collateral comprehensive*

method and the *financial collateral simple method* where it is permitted to use both those methods under ■ BIPRU 5.4.16 R.

[Note: BCD Article 117(1) last paragraph]

10.2.17
FCA PRA

G

As indicated in ■ BIPRU 5.4.16 R, a *firm* may be permitted to use both the *financial collateral comprehensive method* and the *financial collateral simple method* when such use is for the purposes of carrying out the sequential implementation of its *IRB approach* in accordance with ■ BIPRU 4.2.17 R to ■ BIPRU 4.2.19 R (Implementation of the internal ratings based approach) and in relation to an *IRB exposure class* or *exposures* which is exempt from the *IRB approach* in accordance with ■ BIPRU 4.2.26 R (Combined use of methodologies), and such use is expressly permitted by the *firm's IRB permission*.

10.2.18
FCA PRA

R

A *firm* may only recognise collateral for the purpose of ■ BIPRU 10.2.14R (Financial collateral comprehensive method) if the collateral complies with the eligibility requirements and other minimum requirements set out in ■ BIPRU 5 (Credit risk mitigation) and, if relevant, ■ BIPRU 4.10 (The IRB approach: Credit risk mitigation) for the purposes of calculating *risk weighted exposure amounts* under the *standardised approach* or, if applicable, the *IRB approach* using the *financial collateral comprehensive method*. In particular a *firm* may not recognise collateral for that purpose if it is not eligible under the *financial collateral comprehensive method*.

Firms using full IRB approach

10.2.19
FCA PRA

R

A *firm* that uses the full IRB approach (see ■ BIPRU 10.2.10R) may recognise the effects described in (1) in calculating the value of its *exposures* to a *counterparty* or to a *group of connected clients* for the purposes of ■ BIPRU 10.5 (Limits on exposures) if:

- (1) the *firm* is able to satisfy the *appropriate regulator* that it can estimate the effects of financial collateral on its *exposures* separately from other *LGD*-relevant aspects;
- (2) the *firm* is able to demonstrate the suitability of the estimates produced; and
- (3) the *firm's IRB permission* specifically allows it (also see ■ BIPRU 4.1.23 R (4)).

[Note: BCD Article 114(2) first and second paragraphs]

10.2.20
FCA PRA

R

If a *firm* that uses the full IRB approach (see ■ BIPRU 10.2.10R) uses its own estimates of the effects of financial collateral on its *exposures* for *large exposures* purposes, it must do so on a consistent basis and on a basis consistent with the approach adopted in the calculation of capital requirements. A *firm* may only use one of ■ BIPRU 10.2.14R (Financial collateral comprehensive method under standardised approach and IRB approach) and ■ BIPRU 10.2.19R (Own estimates of effects of financial collateral).

[Note: BCD Article 114(2) third and fourth paragraphs]

10.2.21 **R**
FCA PRA

If a *firm* relies on ■ BIPRU 10.2.19R (Own estimates of effects of financial collateral) the recognition of credit protection is subject to the relevant requirements of the *IRB approach*.

[Note: BCD Article 112(3)]

Stress testing of credit risk concentrations.....

10.2.22 **R**
FCA PRA

- (1) A *firm* which:
 - (a) uses the *financial collateral comprehensive method*; or
 - (b) calculates the value of its *exposures* in accordance with ■ BIPRU 10.2.19R (Own estimates of effects of financial collateral);

must conduct periodic stress tests of its credit risk concentrations including in relation to the realisable value of any collateral taken.
- (2) The stress tests required by this *rule* must address:
 - (a) risks arising from potential changes in market conditions that could adversely impact the *firm's* adequacy of *capital resources*; and
 - (b) risks arising from the realisation of collateral in stressed situations.
- (3) A *firm* must be able to satisfy the *appropriate regulator* that the stress tests it carries out under this *rule* are adequate and appropriate for the assessment of such risks.
- (4) In the event that a stress test carried out in accordance with this *rule* indicates a lower realisable value of collateral taken than would be permitted to be taken into account under ■ BIPRU 10.2.14R (Financial collateral comprehensive method) or ■ BIPRU 10.2.19R (Own estimates of effect of financial collateral) as appropriate, the value of collateral permitted to be recognised in calculating the value of *exposures* for the purposes of ■ BIPRU 10.5 (Limits on exposures) is the lower value.
- (5) A *firm* to which this *rule* applies must include in its strategy to address concentration risk:
 - (a) policies and procedures to address risks arising from maturity mismatches between *exposures* and any credit protection on those *exposures*;

- (b) policies and procedures in the event that a stress test indicates a lower realisable value of collateral than taken into account under ■ BIPRU 10.2.14R (Financial collateral comprehensive method) or ■ BIPRU 10.2.19R (Own estimates of effects of financial collateral); and
- (c) policies and procedures relating to concentration risk arising from the application of *credit risk mitigation* techniques, and in particular large indirect credit *exposures* (for example to a single issuer of *securities* taken as collateral).

[Note: BCD Article 114(3)]

10.2.23

FCA PRA

R

Unless, and to the extent, permitted under ■ BIPRU 10.6.3R (11) (Residential mortgages and leasing transactions) or ■ BIPRU 10.6.3R (12) (Commercial mortgages and leasing transactions), a *firm* must not take into account the following collateral for the purposes of this section:

- (1) amounts receivable linked to a commercial transaction or transactions with an original maturity of less than or equal to one year;
- (2) a physical item of a type other than those types indicated in ■ BIPRU 4.10.6 R to ■ BIPRU 4.10.12 R (Eligibility of real estate collateral); and
- (3) property leased under a leasing transaction.

[Note: BCD Article 112(4)]

10.2.24

FCA PRA

G

A *firm* should determine the frequency needed for the stress testing of its credit risk concentrations with emphasis on having sufficient frequency to maintain the currency of its capital calculations. In any case such testing should be carried out at least once a year.

10

10.3 Identification of counterparties

10.3.1

FCA PRA

R

An individual *counterparty* may be a natural or legal *person*.

10.3.2

FCA PRA

G

Examples of a *counterparty* include:

- (1) the *customer* or borrower; this includes governments, local authorities, public sector entities, individual trusts, corporations, unincorporated businesses (whether as *sole traders* or *partnerships*) and non-profit making bodies;
- (2) where the *firm* is providing a guarantee, the *person* guaranteed;
- (3) for a *derivatives* contract, the *person* with whom the contract was made;
- (4) for exchange traded contracts novated through a central clearing mechanism, that central clearing mechanism;
- (5) where a bill held by a *firm* has been accepted by a *credit institution*, the acceptor; and
- (6) where a *firm* is funding the activities of a *company* that trades on an exchange (whether as principal or on behalf of clients), that *company*.

Identification of counterparties for guaranteed and collateralised exposures

10.3.3

FCA PRA

R

(1) Where an exposure to a *counterparty* is:

- (a) guaranteed by a third party, a *firm* may treat the portion of the *exposure* which is guaranteed as having been incurred to the guarantor rather than to the *counterparty*, provided that the unsecured *exposure* to the guarantor would be assigned an equal or lower *risk weight* than a *risk weight* of the unsecured *exposure* to the *counterparty* under the *standardised approach*; or
- (b) secured by collateral issued by a third party, a *firm* may treat the portion of the *exposure* collateralised by the market value of recognised collateral as having been incurred to the third party rather than to the *counterparty*, provided that the collateralised portion of the *exposure* would be assigned an equal or lower *risk weight* than a *risk weight* of the

unsecured *exposure* to the *counterparty* under the *standardised approach*.

[Note: BCD Article 117(1)(a) and (b)]

- (2) In deciding whether or not to treat the *exposure* as an *exposure* to the third party a *firm* must ensure that the identification of *counterparties* for concentration risk purposes is applied in a consistent manner.
- (3) [deleted]
- (4) [deleted]
- (5) [deleted]
- (6) A guarantee or collateral may only be treated in accordance with (1) if the *firm* complies with the eligibility requirements and other minimum requirements set out in ■ BIPRU 5 (Credit risk mitigation) and, if applicable, ■ BIPRU 4.10 (The IRB approach: Credit risk mitigation) for the purposes of calculating *risk weighted exposure amounts*.
- (7) For the purpose of this *rule*, guarantee includes a credit derivative recognised under ■ BIPRU 5 and, if applicable, ■ BIPRU 4.10, other than a credit linked note.

[Note: BCD Article 112(1)]

- (1) If a *firm* treats an *exposure* to a *counterparty* as guaranteed, or secured by collateral issued, by a third party for the purposes of ■ BIPRU 5 (Credit risk mitigation), it should apply the same approach on a consistent basis when identifying a *counterparty* for the purposes of this chapter.
- (2) An example of the eligibility requirements and other minimum requirements set out in ■ BIPRU 5 as referred to in ■ BIPRU 10.3.3 R (6) is the requirement for a legal review in ■ BIPRU 5.2.3 R.
- (3) Where the guarantee is denominated in a currency different from that in which the *exposure* is denominated, the provisions on the treatment of currency mismatch for *unfunded credit protection* in ■ BIPRU 5.7 (Unfunded credit protection) and, if applicable, ■ BIPRU 4.10 (The IRB approach: Credit risk mitigation) are applicable for the calculation of the amount of the *exposure* deemed to be covered.

[Note: BCD Article 117(2)(a)]

- (4) Where there is a mismatch between the maturity of the *exposure* and the maturity of the protection provided by guarantee, ■ BIPRU 5.8 (Maturity mismatches) and, if applicable, ■ BIPRU 4.10 (The IRB approach: Credit risk mitigation) are applicable for the treatment for mismatch.

10.3.4

FCA PRA

G

10

[Note: BCD Article 117(2)(b)]

- (5) For the purpose of ■ BIPRU 10.3.3R (1), where there is a mismatch between the maturity of the *exposure* and the maturity of the protection provided by collateral, ■ BIPRU 5.8.7 R (Valuation of protection: Transactions subject to funded credit protection - financial collateral simple method) requires that the collateral must not be recognised.

[Note: BCD Article 117(1) second paragraph]

- (6) In relation to a guarantee, ■ BIPRU 5.7 (Unfunded credit protection) and, if applicable, ■ BIPRU 4.10 (The IRB approach: Credit risk mitigation) are applicable for the treatment of partial coverage.

[Note: BCD Article 117(2)(c)]

Groups of connected clients

10.3.5

FCA PRA

R

A group of connected clients means one of the following:

- (1) two or more *persons* who, unless it is shown otherwise, constitute a single risk because one of them, directly or indirectly, has control over the other or others; or
- (2) two or more *persons* between whom there is no relationship of control as set out in (1) but who are to be regarded as constituting a single risk because they are so interconnected that, if one of them were to experience financial problems, in particular funding or repayment difficulties, the other or all of the others would be likely to encounter funding or repayment difficulties.

[Note: Article 4(45) of the *Banking Consolidation Directive*]

10.3.5A

FCA PRA

R

Control in this context means control as defined in Article 1 of the Seventh Council Directive 83/349/EEC (the *Seventh Company Law Directive*) or a similar relationship between any *person* and an *undertaking*.

10.3.5B

FCA PRA

G

Where there is a relationship of control, there is a presumption of single risk unless shown otherwise.

10.3.6

FCA PRA

G

- (1) In identifying a *group of connected clients*, a *firm* should consider both third party *clients* and *counterparties* that are, or may be, connected to the *firm* itself.
- (2) Relationships between individual *counterparties* or between the *firm* and a *counterparty* which might be considered to constitute a single risk for the purposes of the definition of *group of connected clients* include:
 - (a) *undertakings* in the same *group*;

- (b) *companies* whose ultimate owner (whether wholly or significantly) is the same individual or individuals, and which do not have a formal group structure;
- (c) *companies* having common directors or management;
- (d) where the same *persons* significantly influence the *governing body* of each of the *undertakings*;
- (e) where the *firm* has an *exposure* to an *undertaking* that was not incurred for the clear commercial advantage of the *firm* or the *firm's group* and which is not on an arm's length basis;
- (f) *counterparties* linked by cross guarantees;
- (g) where it is likely that the financial problems of one *counterparty* would cause difficulties for the other *counterparty* or *counterparties* in terms of full and timely repayment of liabilities;
- (h) where the funding problems of one *counterparty* are likely to spread to another due to a one-way or two-way dependence on the same main funding source, which may be the *firm* itself;
- (i) where counterparties rely on the *firm* for their main funding source, for example through explicit or implicit liquidity support or credit support; and
- (j) where the insolvency or default of one of them is likely to be associated with the insolvency or default of the other(s).

10.3.7

FCA PRA

G

The *appropriate regulator* would not regard the normal business relationships between *companies* which are competitors, and to which none of the relationships listed in ■ BIPRU 10.3.6 G apply, as falling within the definition of *group of connected clients*.

10.3.8

R

[deleted]

10.3.8A

FCA PRA

G

- (1) The Committee of European Banking Supervisors (CEBS) has issued guidelines in relation to the definition of a *group of connected clients*, in particular with reference to the concepts of control and economic interconnection. These guidelines can be found at: <http://www.c-ebs.org/Publications/Standards-Guidelines/CEBS-Guidelines-on-the-revised-large-exposures-reg.aspx> - Part I .
- (2) In applying the CEBS guidelines in relation to *counterparties* that are connected to the *firm* itself, the *PRA* has issued guidance in respect of structured finance vehicles. This guidance can be found at <http://www.fsa.gov.uk/library/policy/policy/2012/12-21.shtml>.

Exposures to counterparties and groups of connected clients

10.3.9

FCA PRA

R

A firm's total exposure to a counterparty must be calculated by summing its exposures to that counterparty, including both trading book exposures and non-trading book exposures.

10.3.10

FCA PRA

R

A firm's total exposure to a group of connected clients must be calculated by summing its exposures to the individual persons within that group of

connected clients, including both trading book exposures and non-trading book exposures.

10.3.11 **R** [deleted]

Exposures to trustees

10.3.12 **G**
FCA PRA

If a *firm* has an *exposure* to a *person* ('A') when A is acting on his own behalf, and also an *exposure* to A when A acts in his capacity as trustee, custodian or general partner of an investment trust, unit trust, venture capital or other investment fund, pension fund or a similar fund (a "fund"), the *firm* may treat the latter *exposure* as if it was to the fund, unless such a treatment would be misleading.

10.3.13 **G**
FCA PRA

When considering whether the treatment described in **■ BIPRU 10.3.12 G** is misleading, factors a *firm* should consider include:

- (1) the degree of independence of control of the fund, including the relation of the fund's board and senior management to the *firm* or to other funds or to both;
- (2) the terms on which the *counterparty*, when acting as trustee, is able to satisfy its obligation to the *firm* out of the fund of which it is trustee;
- (3) whether the beneficial owners of the fund are connected to the *firm*, or related to other funds managed within the *firm's group*, or both; and
- (4) for a *counterparty* that is connected to the *firm* itself, whether the *exposure* arises from a transaction entered into on an arm's length basis.

10.3.14 **G**
FCA PRA

In deciding whether a transaction is at arm's length for the purposes of **■ BIPRU 10.3.6G (2)(f)**, **■ BIPRU 10.3.13 G (4)** and **■ BIPRU 10.10A.1R (1)(d)**, the following factors should be taken into account:

- (1) the extent to which the *person* to whom the *firm* has an *exposure* ('A') can influence the *firm's* operations, through e.g. the exercise of voting rights;
- (2) the management role of A where A is also a director of the *firm*; and
- (3) whether the *exposure* would be subject to the *firm's* usual monitoring and recovery procedures if repayment difficulties emerged.

Exposures to underlying assets

10.3.15 **R**
FCA PRA

Where under a transaction or scheme (for example, *securitisation positions* or claims in the form of *CIUs*) there is an *exposure* to underlying assets, a *firm* must assess the *exposure* to the transaction or scheme, or its underlying *exposures*, or both, in order to determine the existence of a *group of connected clients*. For the purpose of this *rule*, a *firm* must evaluate the economic substance and the risks inherent in the structure of the transaction.

[Note: *BCD* Article 106(3)]

10

PAGE 14

10.3.16

G

FCA PRA

The Committee of European Banking Supervisors (CEBS) has issued guidelines in relation to the treatment for *large exposures* purposes of schemes with *exposures* to underlying assets. These guidelines can be found at: <http://www.c-eps.org/Publications/Standards-Guidelines/CEBS-Guidelines-on-the-revised-large-exposures-reg.aspx> - Part II.

10.5 Limits on exposures

Definition of large exposure

10.5.1

FCA PRA

R

A *large exposure* of a *firm* means its *total exposure* to a *counterparty* or a *group of connected clients*, whether in the *firm's non-trading book* or *trading book* or both, which in aggregate equals or exceeds 10% of the *firm's capital resources*.

[Note: BCD Article 108]

Definition of capital resources

10.5.2

FCA PRA

R

A *firm* must calculate its *capital resources* for the purposes of this chapter in accordance with ■ GENPRU 2.2 (Capital resources) and ■ BIPRU 10.5.3 R to ■ BIPRU 10.5.5 R.

10.5.3

FCA PRA

R

Subject to ■ BIPRU 10.5.4 R, for the purposes of this chapter, a *firm's capital resources* mean *capital resources* calculated at stage (N) of the calculation in the *capital resources table* (Total tier one capital plus tier two capital after deductions).

10.5.4

FCA PRA

R

For the purposes of monitoring against the *trading book* limits and charge regime, as set out in ■ BIPRU 10.10A.2 R to ■ BIPRU 10.10A.11R (Intra-group exposures: Trading book limits) , and calculating a *firm's CNCOM*, a *firm's capital resources* may include *tier three capital resources*, in which case a *firm's capital resources* mean *capital resources* calculated at stage (T) of the *capital resources table* (Total capital after deductions).

10.5.5

FCA PRA

R

A *firm* must not take into account the following items:

- (1) surplus provisions (see ■ GENPRU 2.2.190 R to ■ GENPRU 2.2.193 R); or
- (2) *expected loss* amounts and other negative amounts (see ■ GENPRU 2.2.236 R); or
- (3) *securitisation positions* (see ■ GENPRU 2.2.237 R).

[Note: *BCD* Article 66(3)]

Large exposure limits

10.5.6

R

FCA PRA

A *firm* must ensure that the total amount of its *exposures* to the following does not exceed 25% of its *capital resources* (as determined under ■ BIPRU 10.5.2 R, ■ BIPRU 10.5.3 R and ■ BIPRU 10.5.5 R):

- (1) a *counterparty*; or
- (2) a *group of connected clients*

10.6 Exemptions

General exemptions

10.6.1

G

FCA PRA

This section applies to *exposures* in the *trading book* and the *non-trading book*.

10.6.2

R

FCA PRA

- (1) In ■ BIPRU 10.6.3 R and ■ BIPRU 10.6.4 R, references to guarantees include credit derivatives recognised under ■ BIPRU 5 (Credit risk mitigation) and, if applicable, ■ BIPRU 4.10 (The IRB approach: Credit risk mitigation), other than credit linked notes.

[Note: *BCD* Article 112(1)]

- (2) ■ BIPRU 10.3.3 R (6) (Compliance with minimum *credit risk mitigation* requirements) applies for the purpose of ■ BIPRU 10.6.3 R and ■ BIPRU 10.6.4 R.

10.6.3

R

FCA PRA

The following *exposures* are exempt from the limits described in ■ BIPRU 10.5 (Limits on exposures):

- (1) asset items constituting claims on central governments or *central banks* which claims would unsecured receive a 0% *risk weight* under the *standardised approach*;
- (2) asset items constituting claims on *international organisations* or *multilateral development banks* which claims would unsecured receive a 0% *risk weight* under the *standardised approach*;
- (3) asset items constituting claims carrying the explicit guarantees of central governments, *central banks*, *international organisations* or *multilateral development banks*, where unsecured claims on the entity providing the guarantee would receive a 0% *risk weight* under the *standardised approach*;
- (4) other *exposures* attributable to, or guaranteed by, central governments, *central banks*, *international organisations*, *multilateral development banks* or *public sector entities* where unsecured claims on the entity to which the *exposure* is attributable

10

or by which it is guaranteed would receive a 0% *risk weight* under the *standardised approach*;

- (5) [deleted]
- (6) [deleted]
- (7) asset items constituting claims on *EEA States'* regional governments or local authorities which claims would receive a 0% *risk weight* under the *standardised approach*;
- (8) other *exposures* to or guaranteed by *EEA States'* regional governments or local authorities claims on which would receive a 0% *risk weight* under the *standardised approach*;
- (9) [deleted]
- (10) [deleted]
- (11) loans secured by mortgages on residential property and leasing transactions under which the lessor retains full ownership of the residential property leased for as long as the lessee has not exercised his option to purchase, in all cases up to 50% of the value of the residential property concerned;
- (12) the following, where they would receive a 50% *risk weight* under the *standardised approach*, and only up to 50% of the value of the commercial property concerned:
 - (a) *exposures* secured by mortgages on offices or other commercial premises; and
 - (b) *exposures* related to property leasing transactions concerning offices or other commercial premises;
- (13) [deleted]
- (14) asset items and other *exposures* secured by collateral in the form of cash deposits placed with the *lending firm* or with a *credit institution* which is the *parent undertaking* or a *subsidiary undertaking* of the *lending firm*;
- (15) asset items and other *exposures* secured by collateral in the form of certificates of deposit issued by the *lending firm* or by a *credit institution* which is the *parent undertaking* or a *subsidiary undertaking* of the *lending firm* and lodged with either of them; and
- (16) *exposures* arising from undrawn credit facilities that are classified as low risk off-balance sheet items in ■ BIPRU 3.7.2 R

and provided that an agreement has been concluded with the *counterparty* or *group of connected clients* under which the facility may be drawn only if it has been ascertained that it will not cause the limit in ■ BIPRU 10.5.6 R (Limits on exposures) to be exceeded.

[Note: *BCD* Articles 113(3), 115(1) sub-paragraphs (a) and (b) and 115(2) sub-paragraphs (a) and (b)]

10.6.4

FCA PRA

R

For the purposes of ■ BIPRU 10.6.3R (11) (Loan secured by residential mortgages and leasing transactions):

- (1) the requirements set out in ■ BIPRU 3.4.64 R to ■ BIPRU 3.4.73 R (Requirements for recognition of real estate collateral) apply;
- (2) the value of the property must be calculated on the basis of prudent valuation standards laid down by law, regulation or administrative provisions;
- (3) valuation must be carried out at least once every three years;
- (4) the valuation *rules* set out in ■ BIPRU 3.4.77 R to ■ BIPRU 3.4.80 R apply; and
- (5) residential property means a residence to be occupied or let by the borrower.

10.6.29	G	<p>For the purposes of ■ BIPRU 10.6.3R (12), a 50% <i>risk weight</i> is not allowed under the <i>standardised approach</i> for commercial property based in the <i>UK</i>.</p>
10.6.30	R	<p>For the purposes of ■ BIPRU 10.6.3R (14) (Cash deposits) and ■ BIPRU 10.6.3R (15) (Certificates of deposit), a <i>firm</i> may only treat the asset items or other <i>exposures</i> as secured if the collateral complies with the eligibility requirements and other minimum requirements set out in ■ BIPRU 5 (Credit risk mitigation) and, if relevant, ■ BIPRU 4.10 (The IRB approach: Credit risk mitigation) for the purposes calculating a <i>firm's exposure</i>.</p>

10.6.31

FCA PRA

G

In relation to ■ BIPRU 10.6.3R (14) (Cash deposits) and ■ BIPRU 10.6.3R (15) (Certificates of deposit), the collateral may in some cases give rise to an *exposure* between the *lending firm* and the *credit institution*. Where this is the case, the *exposure* is considered to be an intra-group *exposure*. A *firm* may apply ■ BIPRU 10.8A (Intra-group exposures: core UK group) or ■ BIPRU 10.9A (Intra-group exposures: non-core large exposures group), as appropriate.

Institutional exemption

10.6.32

FCA PRA

R

Where a *counterparty* is an *institution* or where a *group of connected clients* includes one or more *institutions*:

- (1) the total amount of a *firm's exposures* to the same *counterparty* or *group of connected clients* may exceed 25% of the *firm's capital resources* so long as the total amount of such *exposures* does not exceed 150 million;
- (2) the *firm* must ensure that the total amount of its *exposures*, after taking into account the effect of *credit risk mitigation*, to other *persons* in that *group of connected clients* which are not *institutions* does not exceed 25% of the *firm's capital resources*;
- (3) where the amount of 150 million in (1) is higher than an amount equivalent to 25% of the *firm's capital resources*, the *firm* must ensure the following:
 - (a) the total amount of those *exposures* in (1) in relation to the same *counterparty* or *group of connected clients* does not exceed a reasonable limit in terms of the *firm's capital resources*; and
 - (b) in any case, the limit in this *rule* must not exceed 100% of the *firm's capital resources*; and

capital resources are as determined under ■ BIPRU 10.5.2 R, ■ BIPRU 10.5.3 R and ■ BIPRU 10.5.5 R (Stage (N) of the calculation in the *capital resources table* (Total tier one capital plus tier two capital after deductions)); and

- (4) for the purpose of (3), the *firm* must determine the limit consistently with the policies and procedures required under ■ BIPRU 10.12.3 R (Concentration risk policies).

[Note: BCD Article 111(1) second to fourth paragraphs]

10.6.33

FCA PRA

G

Article 111(4) of the *Banking Consolidation Directive* allows the *appropriate regulator* to waive the 100% limit on a case-by-case basis. The *appropriate regulator* will consider an application for such a *waiver* in the light of the criteria in section 138A of the *Act* (Modification or waiver of rules).

Sovereign large exposure waiver

10.6.34
FCA PRA

R

■ BIPRU 10.6.35R to ■ BIPRU 10.6.37G apply to a *BIPRU firm* if it has a *sovereign large exposure waiver*.

10.6.35
FCA PRA

R

A *firm* that has a *sovereign large exposure waiver* must exempt from the limits described in ■ BIPRU 10.5 (Limits on exposures) the *exposures* as specified in the *sovereign large exposure waiver*. It must do so to the extent specified in that waiver.

10.6.36
FCA PRA

R

For the purpose of the *sovereign large exposure waiver*, and in relation to a *firm*, the *exposures* referred to in ■ BIPRU 10.6.35R are limited to the following:

- (1) asset items constituting claims on *central banks* not within ■ BIPRU 10.6.3R (1), which are in the form of required minimum reserves held at those *central banks* which are denominated and funded in their national currencies; and
- (2) asset items constituting claims on central governments not within ■ BIPRU 10.6.3R (1), which are in the form of statutory liquidity requirements held in government securities denominated and funded in their national currencies.

[Note: BCD Article 113(4)(g) and (h)]

10.6.37
FCA PRA

G

As part of the process of applying for a *sovereign large exposure waiver*, a *firm* should agree with the *appropriate regulator* the amount of the *exposures* that may be exempted. In general, the *appropriate regulator* will expect the likelihood of the *firm's* liabilities (that fund the particular exempt *exposure*) falling alongside a fall in that *exposure* in an event of default to form one of the key considerations in discussions with the *firm* regarding the total amount of such exempt *exposures*. For this purpose, the *appropriate regulator* will expect the *firm* to demonstrate that, taking into account the aggregate of all *exposures* exempted under other *sovereign large exposure waivers* granted to the *firm*, the criteria in section 138A of the *Act* (Modification or waiver of rules) are satisfied in relation to the *sovereign large exposure waiver* under consideration.

10.8A Intra-group exposures: core UK group

Application

10.8A.1

R

FCA PRA

This section applies to a *firm* if:

- (1) it is a member of a *core UK group* (under ■ BIPRU 3.2.25 R and this section); and
- (2) it has a *core UK group waiver*.

Definition of core UK group

10.8A.2

R

FCA PRA

An *undertaking* is a member of a *firm's core UK group* if, in relation to the *firm*, that *undertaking* satisfies the following conditions:

- (1) it is a *core concentration risk group counterparty*;
- (2) it is an *institution, financial holding company, financial institution, asset management company or ancillary services undertaking*;
- (3) (in relation to a *subsidiary undertaking*) 100% of the voting rights attaching to the *shares* in its capital is held by the *firm* or a *financial holding company* (or a *subsidiary undertaking* of the *financial holding company*), whether individually or jointly, and that *firm* or *financial holding company* (or its *subsidiary undertaking*) must have the right to appoint or remove a majority of the members of the board of *directors*, committee of management or other governing body of the *undertaking*;
- (4) it is subject to the same risk evaluation, measurement and control procedures as the *firm*;
- (5) it is incorporated in the *United Kingdom*; and
- (6) there is no current or foreseen material practical or legal impediment to the prompt transfer of *capital resources* or repayment of liabilities from the *counterparty* to the *firm*.

10.8A.3
FCA PRA

G

In relation to ■ BIPRU 10.8A.2R (3), a *subsidiary undertaking* should generally be 100% owned and controlled by a single shareholder. However, if a *subsidiary undertaking* has more than one shareholder, that *undertaking* may be a member of the *core UK group* if all its shareholders are also members of that same *core UK group*.

10.8A.4
FCA PRA

G

If a *core concentration risk group counterparty* is of a type that falls within the scope of the Council Regulation of 29 May 2000 on insolvency proceedings (Regulation 1346/2000/EC) and it is established in the *United Kingdom* other than by incorporation, a *firm* wishing to include that *counterparty* in its *core UK group* may apply to the *appropriate regulator* for a *waiver* of ■ BIPRU 10.8A.2R (5) if it can demonstrate fully to the *appropriate regulator* that the *counterparty's* centre of main interests is situated in the *United Kingdom* within the meaning of that Regulation.

Minimum standards

10.8A.5
FCA PRA

R

- (1) For the purpose of ■ BIPRU 10.8A.2R (6), a *firm* must be able to demonstrate fully to the *appropriate regulator* the circumstances and arrangements, including legal arrangements, by virtue of which there are no material practical or legal impediments, and none are foreseen, to the prompt transfer of *capital resources* or repayment of liabilities from the *counterparty* to the *firm*.
- (2) In relation to a *counterparty* that is not a *firm*, the arrangements referred to in (1) must include a legally binding agreement with each *firm* that is a member of the *core UK group* that it will promptly on demand by the *firm* increase that *firm's capital resources* by an amount required to ensure that the *firm* complies with ■ GENPRU 2.1 (Calculation of capital resources requirements), ■ BIPRU 10 (Large exposures requirements) and any other requirements relating to *capital resources* or concentration risk imposed on a *firm* by or under the *regulatory system*.

10.8A.6
FCA PRA

G

The *appropriate regulator* will consider the following criteria when assessing whether the condition in ■ BIPRU 10.8A.2R (6) is going to be met:

- (1) the speed with which funds can be transferred or liabilities repaid to the *firm* and the simplicity of the method for the transfer or repayment;
- (2) whether there are any interests other than those of the *firm* in the *core concentration risk group counterparty* and what impact those other interests may have on the *firm's* control over the *core group concentration risk group counterparty* and the ability of the *firm* to require a transfer of funds or repayment of liabilities;
- (3) whether there are any tax disadvantages for the *firm* or the *core concentration risk group counterparty* as a result of the transfer of funds or repayment of liabilities;
- (4) whether the purpose of the *core concentration risk group counterparty* prejudices the prompt transfer of funds or repayment of liabilities;

- (5) whether the legal structure of the *core concentration risk group counterparty* prejudices the prompt transfer of funds or repayment of liabilities;
- (6) whether the contractual relationships of the *core concentration risk group counterparty* with the *firm* and other third parties prejudices the prompt transfer of funds or repayment of liabilities; and
- (7) whether past and proposed flows of funds between the *core concentration risk group counterparty* and the *firm* demonstrate the ability to make prompt transfer of funds or repayment of liabilities.

10.8A.7

FCA PRA

G

- (1) *Firms* are referred to the guidance relating to 0% *risk weights* for *exposures* within a *core UK group* under the *standardised approach* as follows:
 - (a) ■ BIPRU 3.2.28 G in respect of ■ BIPRU 10.8A.2R (3) on same risk evaluation, measurement and control procedures; and
 - (b) ■ BIPRU 3.2.30 G and ■ BIPRU 3.2.31 G in respect of ■ BIPRU 10.8A.2R (6) on prompt transfer of *capital resources* and repayment of liabilities.
- (2) For the purpose of ■ BIPRU 10.8A.5R (2), the obligation to increase the *firm's capital resources* may be limited to capital resources available to the *counterparty* and may reasonably exclude such amount of capital resources that, if transferred to the *firm*, would cause the *counterparty* to become balance sheet insolvent in the manner contemplated in section 123(2) of the Insolvency Act 1986.

Exemption for a core UK group

10.8A.8

FCA PRA

R

If this section applies, *exposures* between members of the *core UK group* are exempt from the limits described in ■ BIPRU 10.5 (Limits on exposures).

10.8A.9

FCA PRA

G

The *appropriate regulator* will expect a *firm* to which this section applies not to use any member of its *core UK group* which is not a *firm* to route lending or to have *exposures* to any third party in excess of the limits in ■ BIPRU 10.5 (Limits on exposures).

Calculation of capital resources for a core UK group

10.8A.10

FCA PRA

R

For the purposes of this section, a *firm* must calculate the capital resources of the *core UK group* in accordance with ■ GENPRU 3 Annex 1 R Part 2 (Method 2 of Annex 1 of the Financial Groups Directive (Deduction and aggregation Method)) and apply the limits set out in this section to those capital resources rather than the *capital resources* of the *firm*. For these purposes the definition of *solo capital resources* is adjusted so that the *rules* on which the calculation for each member of the *core UK group* is based are the ones that would apply under the procedure in ■ BIPRU 8.6.6 R to ■ BIPRU 8.6.9 R (Consolidated capital resources).

10.8A.11

FCA PRA

G

The calculation of capital resources under ■ GENPRU 3 Annex 1 R Part 2 (Method 2 of Annex 1 of the Financial Groups Directive (Deduction and aggregation Method)) is based on the *solo capital resources* of members of a *financial conglomerate*. The definition of *solo capital resources* depends on what type of *undertakings* the *financial conglomerate* contains. For example, if a *financial conglomerate* contains a bank the *solo capital resources*

calculation for every group member in the *banking sector* and the *investment services sector* is based on the *capital resources* calculation for *banks*. The purpose of ■ BIPRU 10.8A.10R is to apply the corresponding procedure that applies under ■ BIPRU 8.6 (Calculation of capital resources on a consolidated basis for BIPRU firms).

10.8A.12
FCA PRA

R

Notification

A *firm* must immediately notify the *appropriate regulator* in writing if it becomes aware that any *exposure* that it has treated as exempt under this section or any *counterparty* that it has been treating as a member of its *core UK group* has ceased to meet the conditions for application of the treatment in this section.

10.9A Intra-group exposures: non-core large exposures group

Application

10.9A.1

R

FCA PRA

This section applies to a *firm* if it has:

- (1) a *non-core large exposures group*; and
- (2) a *non-core large exposures group waiver*.

10.9A.2

G

[deleted]

Definition of non-core large exposures group

10.9A.3

R

FCA PRA

The *non-core large exposures group* of a *firm* consists of each *non-core concentration risk group counterparty* of the *firm* that is not a member of its *core UK group* but satisfies all other conditions for membership of the *firm's core UK group* except for the following:

- (1) ■ BIPRU 10.8A.2R (1) (Core concentration risk group counterparty);
- (2) ■ BIPRU 10.8A.2R (5) (Establishment in the United Kingdom); and
- (3) ■ BIPRU 10.8A.5R (2) (Capital maintenance arrangements).

Definition of non-core concentration risk group counterparty

10.9A.4

R

FCA PRA

A *non-core concentration risk group counterparty* (in relation to a *firm*) is a counterparty which is its *parent undertaking*, its *subsidiary undertaking* or a *subsidiary undertaking* of its *parent undertaking*, provided that (in each case) both the counterparty and the *firm* satisfy one of the following conditions:

- (1) they are included within the scope of consolidation on a full basis with respect to the same *UK consolidation group* and ■ BIPRU 8.3.1 R applies to the *firm* with respect to that *UK consolidation group*; or

- (2) they are included within the scope of consolidation on a full basis with respect to the same *group* by a *competent authority* of an *EEA State* other than the *United Kingdom* under the *CRD implementation measures* about consolidated supervision for that *EEA State*; or
- (3) they are included within the scope of consolidation on a full basis with respect to the same *group* by a *third country competent authority* under prudential rules for the *banking sector* or *investment services sector* of or administered by that *third country competent authority* and the *firm* or another *EEA firm* in that *group* has been notified in writing by the *appropriate regulator* or a *competent authority* of another *EEA State* pursuant to Article 143 of the *Banking Consolidation Directive* that that *group* is subject to equivalent supervision.

Revised large exposure limits for a non-core large exposures group

10.9A.5
FCA PRA

R

A *firm* to which this section applies must ensure that the *rules* listed in ■ BIPRU 10.9A.6R are complied with on a consolidated basis subject to the following modifications:

- (1) (if the *firm* is not a member of a *core UK group*) the *rules* apply in relation to *exposures* of the *firm* to its *non-core large exposures group* as if it is a single undertaking;
- (2) if the *firm* is a member of a *core UK group*:
 - (a) the *rules* apply in relation to its *core UK group* rather than in relation to the *firm*; and
 - (b) the *core UK group* and the *non-core large exposures group* must each be treated as a single undertaking.

10.9A.6
FCA PRA

R

The *rules* referred to in ■ BIPRU 10.9A.5R are:

- (1) ■ BIPRU 10.5.6 R (25% *large exposures* limit);
- (2) ■ BIPRU 10.10A.2 R (Trading book limits) other than ■ BIPRU 10.10A.2R (2) (CNCOM); and
- (3) ■ BIPRU 10.10A.3 R (500% limit for *trading book excess exposures*).

Non-trading book backstop limit for a non-core large exposures group

PAGE 35
10.9A.7
FCA PRA

R

A *firm* must ensure that the total amount of *non-trading book exposures* between:

- (1) itself and members of its *non-core large exposures group* does not exceed 100% of the *firm's capital resources*; or

- (2) if it is a member of a *core UK group*, the members of its *core UK group* and members of its *non-core large exposures group* does not exceed 100% of the capital resources of the *firm's core UK group*.

Concentrated exposures in a non-core large exposures group.....

10.9A.8 **R**
FCA PRA

- (1) Subject to the limit in **■ BIPRU 10.9A.7R** (Back-stop large exposures limit), a *firm* may concentrate its intra-group *exposure* to a particular member of its *non-core large exposures group* in excess of 25% of the capital resources of the *firm's core UK group*.
- (2) A *firm* may not apply (1) unless it has given prior written notice to the *appropriate regulator* that it intends to do so.
- (3) The written notice referred to in (2) must contain the following:
 - (a) an explanation on how the *firm* will ensure that it will still meet the requirement in **■ BIPRU 10.9A.7R** (Backstop large exposures limit) on a continuing basis when applying (1);
 - (b) details of the *counterparty*, the size of the *exposure* and the expected duration of the *exposure*; and
 - (c) an explanation of the reason for the *exposure*.
- (4) If a *firm* stops applying (1) it may start to apply it again if it notifies the *appropriate regulator* under (2) that it intends to do so.

Calculation of capital resources for a core UK group.....

10.9A.9 **R**
FCA PRA

■ BIPRU 10.8A.10R (Calculation of capital resources for a core UK group) applies for the purposes of this section in the same way that it applies for the purposes of **■ BIPRU 10.8A** (Intra-group exposures: core UK group).

Exemption for intra-group exposures on a solo basis.....

10.9A.10 **R**
FCA PRA

If this section applies to a *firm*, then subject to **■ BIPRU 10.10A.12** (Core UK group and non-core large exposures group: treatment of the trading book concentration risk excess), it may, on a solo basis, treat an *exposure* to a member of its *non-core large exposures group* as exempt from the limits in **■ BIPRU 10.5** (Limits on exposures).

10.9A.11 **G**
FCA PRA

The purpose of **■ BIPRU 10.9A.10R** is to reflect the fact that the limits in **■ BIPRU 10.5** (Limits on exposures), so far as they apply to a member of a *firm's non-core large exposures group*, are calculated on a consolidated basis with respect to a *firm's core UK group*. It is therefore necessary to switch them off on a purely solo basis.

10.9A.12

FCA PRA

R

Notification

A *firm* must immediately notify the *appropriate regulator* in writing if it becomes aware that any *exposure* that it has treated as exempt under this section or any *counterparty* that it has been treating as a member of its *non-core large exposures group* has ceased to meet the conditions for application of the treatment in this section.

- 10.10.2**
- 10.10.3**
- 10.10.4**

10.10A Trading book limits

Application

10.10A.1

R

FCA PRA

This section only applies to *exposures* in a *firm's trading book* to *counterparties* which fulfil the following conditions:

- (1) subject to (2), and in relation to a *firm*, a counterparty ('P') to whom the *firm* has an *exposure* and who fulfils at least one of the following conditions:
 - (a) P is *closely related* to the *firm*; or
 - (b) P is an *associate* of the *firm*; or
 - (c) the same *persons* significantly influence the *governing body* of P and of the *firm*; or
 - (d) the *firm* has an *exposure* to P that was not incurred for the clear commercial advantage of the *firm* or the *firm's group* and which is not on an arm's length basis;

- (2) where P is Business Growth Fund plc or another *financial institution* which makes *venture capital investments* and the *firm* is entitled to ignore that *financial institution* in accordance with ■ GENPRU 2.2.209 R (2) for the purposes of determining whether there is a *material holding*, (1) applies with the following modifications to the definition of *associate*:
 - (a) paragraph (3)(c) (community of interest) of that definition does not apply; and
 - (b) in applying paragraph (3)(a) (affiliated company) of that definition, paragraph (1)(e) (participating interests) of the definition of *group* does not apply.

PAGE
39

10.10A.1A

G

FCA PRA

In deciding whether a transaction is at arm's length for the purposes of

■ BIPRU 10.10A.1R (1)(d), the factors set out in ■ BIPRU 10.3.14 G should be taken into account.

Trading book limits

10.10A.2
FCA PRA

R

Exposures in a firm's trading book to counterparties falling within ■ BIPRU 10.10A.1 R are exempt from the 25% limit in ■ BIPRU 10.5.6 R (large exposures limit) if:

- (1) the total amount of the *exposures* on the *firm's non-trading book to counterparties* falling within ■ BIPRU 10.10A.1 R does not exceed the limit laid down in that *rule*, calculated with reference to the definition of *capital resources* calculated at stage (N) of the calculation in the *capital resources table* (Total tier one capital plus tier two capital after deductions) as set out in ■ BIPRU 10.5.2 R, ■ BIPRU 10.5.3 R and ■ BIPRU 10.5.5 R, so that the excess arises entirely on the *trading book*; and
- (2) the *firm* meets the additional capital requirements relating to the *concentration risk capital component (CNCOM)* in relation to the relevant *trading book exposures*.

10.10A.2A
FCA PRA

G

The applicable limit for the purposes of ■ BIPRU 10.10A.2R (1) is the total amount of the *exposures* on the *firm's non-trading book to counterparties* falling within ■ BIPRU 10.10A.1 R, even though there is no explicit limit to such *counterparties* in ■ BIPRU 10.5.6 R (large exposures limit).

10.10A.3
FCA PRA

R

A firm must ensure that the total amount of its trading book exposures to its counterparties falling within ■ BIPRU 10.10A.1 R does not exceed 500% of the firm's capital resources calculated at stage (T) of the capital resources table (Total capital after deductions).

How to calculate the concentration risk capital component

10.10A.4
FCA PRA

G

A firm's CNCOM should be calculated as part of its credit risk capital requirement (CRCR) in accordance with ■ GENPRU 2.1 (Calculation of capital resources requirements).

10.10A.5
FCA PRA

R

A firm's CNCOM is the sum of its individual counterparty CNCOMS.

10.10A.6
FCA PRA

R

An individual counterparty CNCOM is the amount a firm must calculate in accordance with ■ BIPRU 10.10A.8R with respect to its exposures to its counterparties falling within ■ BIPRU 10.10A.1 R .

10.10A.7
FCA PRA

G

A CNCOM calculation on a trading book exposure is in addition to, and not instead of, any capital requirement arising under the market risk capital requirement or counterparty risk capital component.

10.10A.8

R

FCA PRA

A firm must calculate its *individual counterparty CNCOM* for its *exposures* to its *counterparties* falling within ■ BIPRU 10.10A.1 R as follows:

- (1) break down its *total exposure* into its *trading book* and *non-trading book* components;
- (2) calculate 25% of the *firm's capital resources* calculated at stage (N) of the calculation in the *capital resources table* (Total tier one capital plus tier two capital after deductions) to determine the total amount of the *exposures* in the *firm's non-trading book* does not exceed this limit in accordance with ■ BIPRU 10.10A.2R (1);
- (3) calculate 25% of the *firm's capital resources* calculated at stage (T) of the *capital resources table* (Total capital after deductions) and deduct those parts of the *total exposure* which are in the *non-trading book* falling within the limit in (2);
- (4) a firm must allocate (in the order set out in (6)) *trading book exposures* to its *counterparties* falling within ■ BIPRU 10.10A.1 R to the unutilised portion of the 25% limit of the *firm's capital resources* calculated at stage (T) of the *capital resources table* (Total capital after deductions) remaining after deducting the *non-trading book exposures* in accordance with (3);
- (5) no further *trading book exposures* can be allocated once the 25% limit in (4) has been reached; the remaining *trading book exposures* constitute the *trading book concentration risk excess* with respect to its *counterparties* falling within ■ BIPRU 10.10A.1 R ;
- (6) for the purposes of (4), a firm must allocate the *trading book exposures* in the order of the level of capital requirements, starting with the lowest capital requirements for *specific risk* under the *market risk capital requirement* and/or the lowest capital requirements under the *counterparty risk capital component* and moving towards those *trading book exposures* with the highest capital requirements last;
- (7) the *individual counterparty CNCOM* is the sum of the capital requirements for each individual *exposure* included in the *trading book concentration risk excess* in accordance with (8) and (9) (each such capital requirement being an *individual CNCOM*);
- (8) if the *trading book concentration risk excess* has persisted for 10 *business days* or less (irrespective of the age of each component part), the *individual CNCOMs* must be calculated in accordance with this formula:

each *individual CNCOM* = capital requirement referred to in (6) 200%;

- (9) if the *trading book concentration risk excess* has persisted for more than 10 *business days* (irrespective of the age of each component part), the *individual CNCOMs* must be calculated in accordance with this formula:

each *individual CNCOM* = capital requirement referred to in (6) appropriate percentage in ■ BIPRU 10.10A.9R.

10.10A.9
FCA PRA

R

The appropriate percentage referred to in ■ BIPRU 10.10A.8R (9) must be established in accordance with the following:

- (1) the individual exposures included in the *trading book concentration risk excess* must be assigned to the bands in the first column of the table in ■ BIPRU 10.10A.10R;
- (2) the maximum amount that may be put in any band other than the last equals the percentage of the *firm's capital resources* in column 1 of that table;
- (3) no amount may be allocated to the second or any later band unless the one before has been filled;
- (4) *exposures* must be assigned to the bands in the order established by ■ BIPRU 10.10A.8R (6); and
- (5) for the purposes of (4), those *exposures* with the lowest capital requirements (as referred to in ■ BIPRU 10.10A.8R (6)) must be assigned first and those with the highest last.

Percentages applicable under BIPRU 10.10A.9R

10.10A.10
FCA PRA

R

This table belongs to ■ BIPRU 10.10A.9 R

<i>Trading book concentration risk excess</i> (as a percentage of the <i>firm's capital resources</i> calculated at stage (T) of the <i>capital resources table</i> (Total capital after deductions))	Percentage
Up to 40%	200%
Portion from 40% - 60%	300%
Portion from 60% - 80%	400%
Portion from 80% - 100%	500%
Portion from 100% - 250%	600%
Portion over 250%	900%

How CNCOM applies to the non-core large exposures group

10.10A.11
FCA PRA

R

A firm that has a *non-core large exposures group waiver* must meet the CNCOM in relation to *exposures* to members of its *non-core large exposures group* in accordance with this section, subject to the following:

- (1) in ■ BIPRU 10.10A.8 R, 25% is substituted with 100%; and
- (2) the excess *exposures* for the purpose of ■ BIPRU 10.10A.8R (9) must be assigned to the bands in the first column of the table in ■ BIPRU 10.10A.10 R beginning with the portion from 100% - 250%.

Core UK group and non-core large exposures group: treatment of the trading book concentration risk excess

10.10A.12
FCA PRA

R

- (1) This rule applies to a firm that has a *core UK group waiver* or a *non-core large exposures group waiver*.
- (2) A firm must calculate the CNCOM in relation to the *core UK group* in question in accordance with ■ BIPRU 10.10A.2 R (Trading book limits).
- (3) A firm must then calculate the percentage of the amount calculated under (2) which is attributable to *exposures* of the firm.
- (4) A firm must add the result of the calculation in (3) to the CNCOM applied to the firm on a solo basis in accordance with ■ BIPRU 10.10A.5R to ■ BIPRU 10.10A.11R (How to calculate the concentration risk capital component).

Examples

10.10A.13
FCA PRA

G

- (1) The table in ■ BIPRU 10.10A.14G sets out an example of a CNCOM calculation under ■ BIPRU 10.10A.8R.
- (2) ■ BIPRU 10 Annex 2 G (Examples of treatment of exposures under BIPRU 10) sets out examples of how the *large exposures* limits apply, particularly in relation to a *core UK group* and *non-core large exposures group*, taking into account various examples of firm's *exposure* profiles.

Example of a CNCOM calculation (all numbers 000s)

10.10A.14
FCA PRA

G

This table belongs to ■ BIPRU 10.10A.13G (1)

Capital resources position	
(1)	An firm's capital resources comprises:
	Tier one and tier two capital resources 1000
	Eligible tier three capital resources 100
	Amended capital resources 1100
(2)	The components of the large exposure comprise:

Capital resources position		
(a) <i>Non-trading book exposure</i>		200
(b) Mark to market value of <i>trading book</i> securities:		
	% <i>specific risk weight</i>	
Short: qualifying bond	1.00	(20)
Long: qualifying commercial paper	0.25	100
Long: equity	4.00	150
Long: qualifying convertible	1.60	30
Total net long securities position:		260
Total net large exposures position [(a) + (b)]		460
Calculating the exposure for which incremental capital is needed		
(3)	The short position in the qualifying bond is offset against the highest specific risk weight items - in this case equities:	
	Net long equity position (150- 20)	130
(4)	The remaining items are ranked according to specific risk weight.	
	% <i>specific risk weight</i>	Security
	0.25	Qualifying commercial paper 100
	1.60	Qualifying convertible 30
	4.00	Equity (net) 130
(5)	The 'headroom' between the <i>non-trading book</i> exposure and 25% of the amended <i>capital resources</i> is calculated.	
	25% of amended capital base (1100)	275
	<i>Non-trading book exposure</i>	200
	Headroom	75
(6)	Applying the securities positions in ascending order of specific <i>risk weight</i> , 75 of the 100 qualifying commercial paper may be counted before 25% of the amended capital base is reached.	
	The remaining 25 of qualifying commercial paper, along with 30 qualifying convertible and 130 equity (net) are traded securities <i>exposures</i> in excess of the limit and should therefore be covered by incremental capital. The amount of incremental capital should be included in the calculation for determining how much <i>trading book</i> capital a <i>firm</i> should have.	
(7)	If the excess <i>exposure</i> has been outstanding for 10 days or less, the specific <i>risk weights</i> for the elements over 25% of amended <i>capital resources</i> should be doubled.	
	The 25% limit (275) is taken up by 200 <i>non-trading book exposure</i> and 75 <i>trading book exposure</i> within the limit. These two items, when added to the items in bold below, total 460. 460 is the total net <i>large exposures</i> position as set out in (2) above.	
	Qualifying commercial paper 25 x 0.25% x 200% =	0.125

Capital resources position		
Qualifying convertible	30 x 1.60% x 200% =	0.960
Equity	130 x 4% x 200% =	10.400
Additional capital requirement		11.485
(8)	If the excess <i>exposure</i> has been outstanding for more than 10 days, the 25% limit (275) is taken up by 200 <i>non-trading book exposure</i> and 75 <i>trading book exposure</i> within the limit. These two items, when added to the items in bold below, total 460. 460 is the total net <i>large exposures</i> position as set out in (2) above.	
(a)	Over 25% and up to 40% of amended capital base at 200% (40% of 1100 = 440)	
	Amount of <i>trading book concentration risk excess</i> = 185	
	Appropriate % Multiplier Band = 200%	
	25 x 0.25% x 200% =	0.125
	30 x 1.60% x 200% =	0.960
	110 x 4.00% x 200% =	8.800
(b)	Excess exposure 40% - 60% of amended capital base at 300%	
	20 x 4.00% x 300% =	2.400
	Additional capital requirement [(a)+(b)]	12.285

10.11 [deleted]

10.11.1
10.11.2

10.12 Systems and controls and general

Systems and controls

10.12.1
FCA PRA

R

A *firm* must have sound administrative and accounting procedures and adequate internal control mechanisms for the purposes of identifying and recording all *large exposures* and subsequent changes to them, and for that of monitoring those *large exposures* in the light of the *firm's* own *exposure* policies.

10.12.2
FCA PRA

R

A *firm* must take reasonable care to establish and maintain adequate systems and controls to identify, monitor, and control *exposures* to a *parent undertaking* of the *firm*, a *subsidiary undertaking* of the *firm*, or a *subsidiary undertaking* of the *firm's* *parent undertaking*.

Concentration risk policies

10.12.3
FCA PRA

R

A *firm* must be able to demonstrate to the *appropriate regulator* that:

- (1) it has written policies and procedures to address and control the concentration risk arising from:
 - (a) *exposures* to *counterparties* and *groups of connected clients*;
 - (b) *counterparties* in the same economic sector or geographic region;
 - (c) the same activity or *commodity*; and
 - (d) the application of *credit risk mitigation* techniques, including in particular risks associated with large indirect credit exposures (for example to a single collateral issuer); and
- (2) those policies and procedures are implemented.

Reporting

PAGE 47
10.12.4
FCA PRA

R

Other than in relation to *repurchase transactions* or *securities or commodities lending or borrowing transactions*, *exposures* must be reported on a gross basis, not including the recognition of *credit risk mitigation*.

Artificial transactions

10.12.5

FCA PRA

R

In line with the general principle in ■ GENPRU 2.2.1 R (Purposive interpretation) a *firm* must not, with a view to avoiding the additional capital requirements that it would otherwise incur on *exposures* exceeding the limits laid down in ■ BIPRU 10.5 (Limits on exposures and large exposures) once those *exposures* have been maintained for more than ten *business days*:

- (1) temporarily transfer the *exposures* in question to another *person* (whether in the same *group* or not); or
- (2) undertake artificial transactions to close out the *exposure* during the ten *business day* period and create a new *exposure*.

10.12.6

FCA PRA

R

A *firm* must notify the *appropriate regulator* if it enters into a transfer, transaction or arrangement of the type mentioned in ■ BIPRU 10.12.5 R.

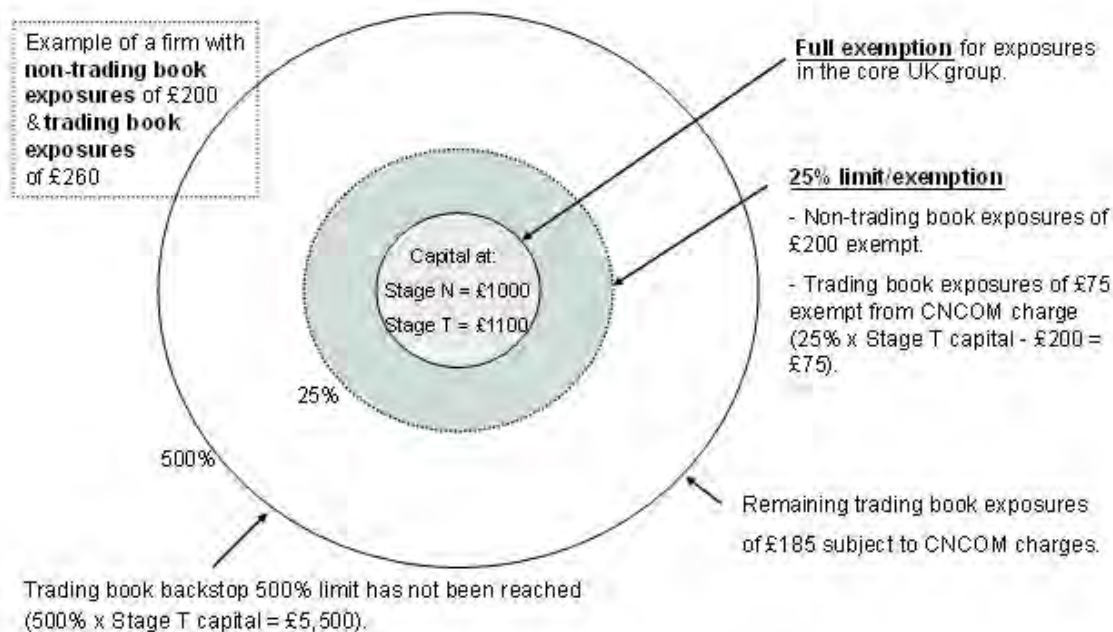

[deleted]

Examples of treatment of intra-group exposures under BIPRU 10

FCA PRA

Example 1

Intra group large exposures: CNCOM calculation
(example of BIPRU 10.10A.14 G)

CNCOM charges as follows:

Trading book exposures of £75 exempt from CNCOM, CNCOM band charges start at 25%.

If excess exposures are >10 days, CNCOM bands calculated as:

25% - 40%	(£275 - £440)	=	£165	@	200%
40% - 60%	(£ remainder)	=	£20	@	300%
			£185		

Example 2

Intra group large exposures: Overview of interaction between BIPRU 10.8A (Core UK group), BIPRU 10.9A (Non-core LE group) & BIPRU 10.10A (Trading book limits)

Example 3

Intra group large exposures: example of non-trading book exposures

Example of a firm with intra group **non-trading book exposures** of £100

Full exemption for exposures in the core UK group.

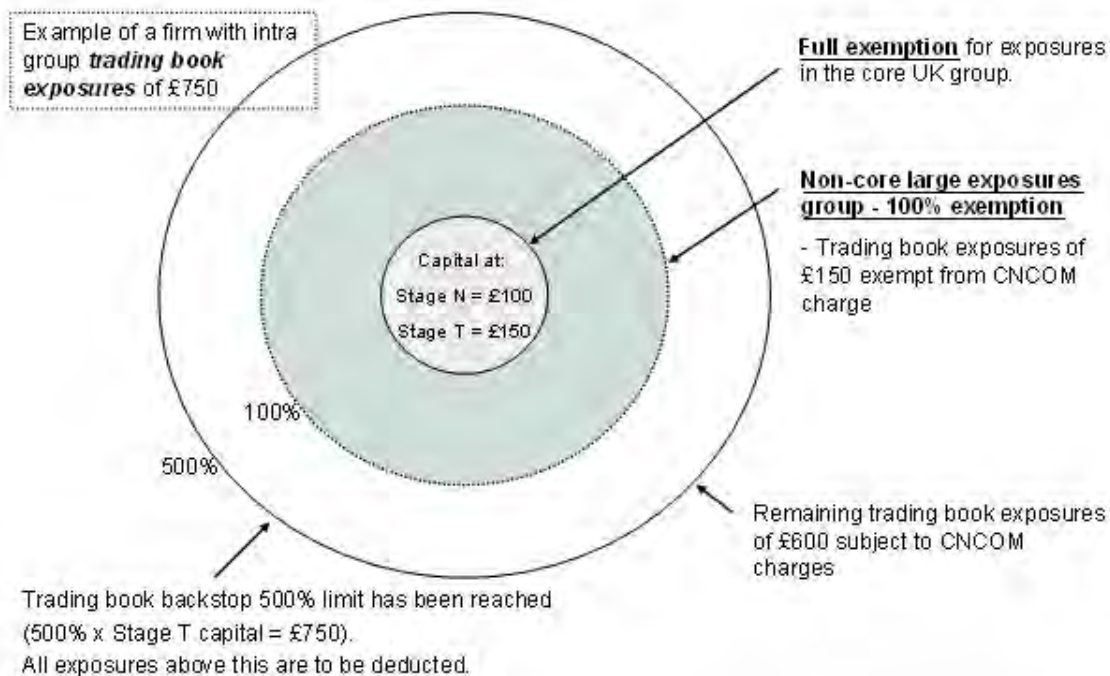

Non-core large exposures group - 100% limit

- Non-trading book exposures of £100

Non-trading book backstop of 100% limit has been reached (100% x Stage N capital = £100). All exposures above this are to be deducted.

Example 4

Intra group large exposures: example of trading book exposures

CNCOM charges as follows:

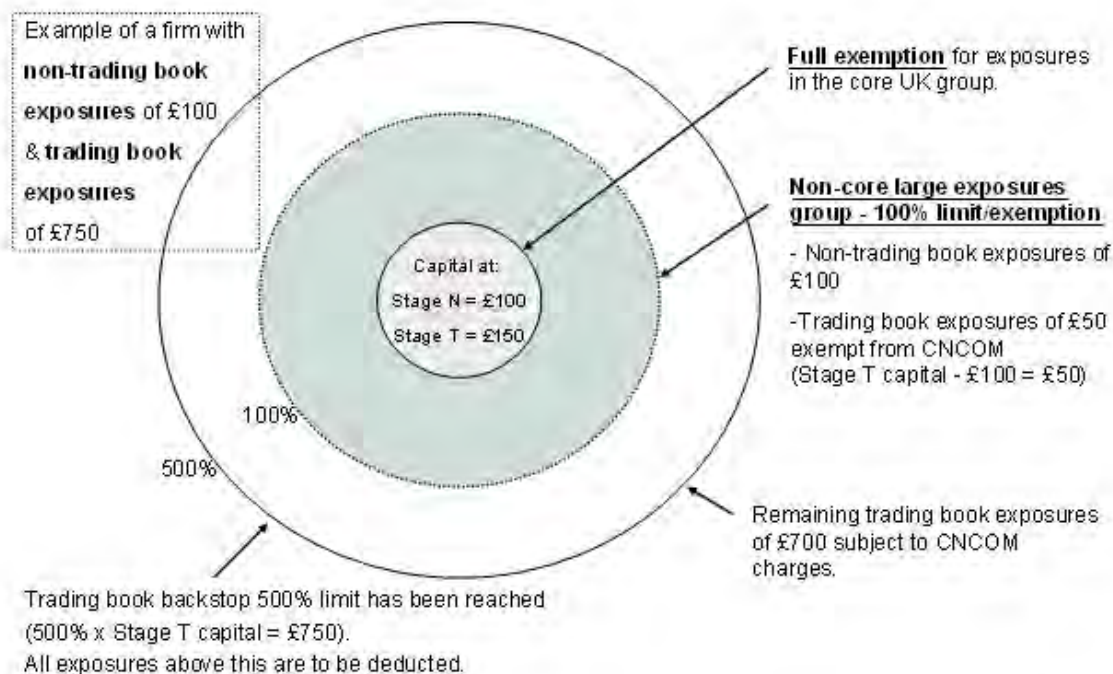

Trading book exposures of £150 exempt from CNCOM, CNCOM band charges start at 100%.

If excess exposures are >10 days, CNCOM bands calculated as:

100% - 250%	(£150 - £375)	=	£225	@	600%
>250%	(£ remainder)	=	£375	@	900%
			£600		

Example 5

Intra group large exposures: example of non-trading book & trading book exposures

CNCOM charges as follows:

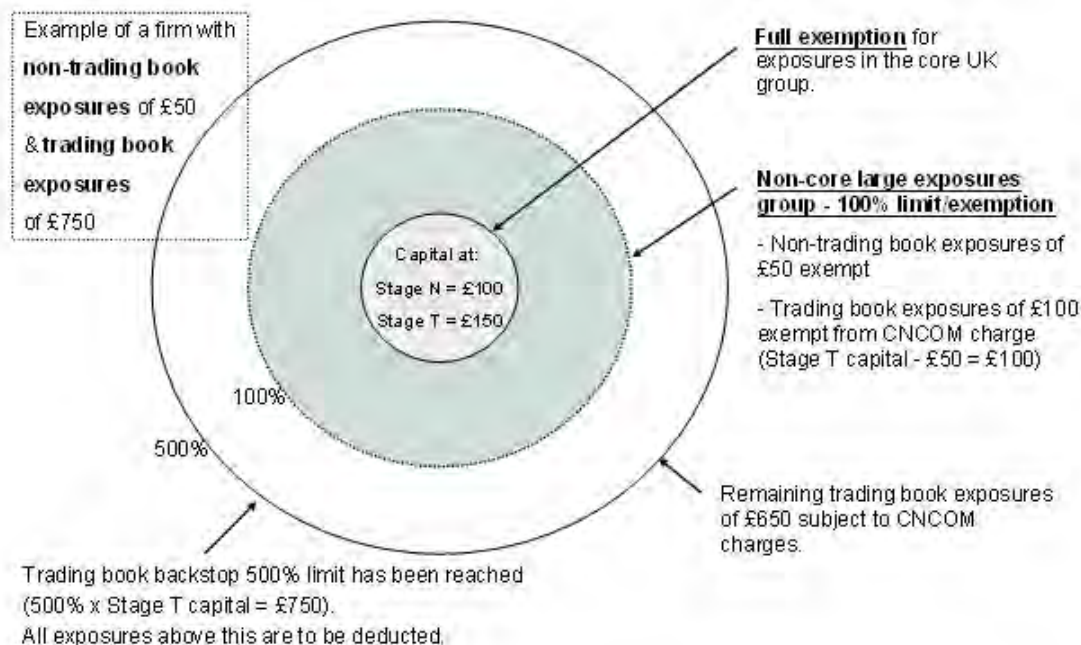

Trading book exposures of £50 exempt from CNCOM, CNCOM band charges start at 100%.

If excess exposures are >10 days, CNCOM bands calculated as:

100% - 250%	(£150 - £375)	=	£225	@ 600%
>250%	(£ remainder)	=	£475	@ 900%
			£700	

Example 6

Intra group large exposures: example of non-trading book & trading book exposures

CNCOM charges as follows:

Trading book exposures of £100 exempt from CNCOM, CNCOM band charges start at 100%,

If excess exposures are >10 days, CNCOM bands calculated as:

100% - 250%	(£150 - £375)	=	£225	@	600%
>250%	(£ remainder)	=	£425	@	900%
			£650		

Chapter 11

Disclosure (Pillar 3)

11.1 Application and purpose

Application

11.1.1

FCA PRA

R

■ BIPRU 11 applies to a *BIPRU firm*.

Purpose

11.1.2

FCA PRA

G

The purpose of BIPRU 11 is to implement:

- (1) (a) Article 68(3);
(b) Article 72;
(c) Articles 145 to 149; and
(d) Annex XII;
of the *Banking Consolidation Directive*; and
- (2) (a) Article 2, in part;
(b) Point 3 of Article 23, in part; and
(c) Article 39;
of the *Capital Adequacy Directive*.

11.2 Basis of disclosures

Disclosure on an individual basis

11.2.1

R

FCA PRA

The following must comply with the obligations laid down in ■ BIPRU 11.3 on an individual basis:

- (1) a *firm* which is neither a *parent undertaking* nor a *subsidiary undertaking*;
- (2) a *firm* which is excluded from a *UK consolidation group* or *non-EEA sub-group* pursuant to ■ BIPRU 8.5; and

[Note: BCD Article 68(3)]

- (3) a *firm* which is part of a *group* which has been granted an *investment firm consolidation waiver* under ■ BIPRU 8.4;

[Note: CAD.Article 23]

EEA parent institutions

11.2.2

R

FCA PRA

A *firm* which is an *EEA parent institution* must comply with the obligations laid down in ■ BIPRU 11.3 on the basis of its consolidated financial situation.

[Note: BCD Article 72(1)]

11.2.3

R

FCA PRA

A *firm* which is a significant subsidiary of an *EEA parent institution* must disclose the information specified in ■ BIPRU 11.4.5 R on an individual or sub-consolidated basis.

Firms controlled by an EEA parent financial holding company

11.2.4

R

FCA PRA

A *firm controlled by an EEA parent financial holding company* must comply with the obligations laid down in ■ BIPRU 11.3 on the basis of the consolidated financial situation of that *EEA parent financial holding company*.

[Note: BCD Article 72(2)]

11.2.5

FCA PRA

R

A *firm* which is a significant subsidiary of an *EEA parent financial holding company* must disclose the information specified in ■ BIPRU 11.4.5 R on an individual or sub-consolidated basis.

Waiver: Comparable disclosures provided on a consolidated basis by a parent undertaking established in a third country

11.2.6

FCA PRA

G

A *firm* which is included within comparable disclosures provided on a consolidated basis by a *parent undertaking* whose head office is not in an *EEA State* may apply for a *waiver* from the relevant disclosure requirements in ■ BIPRU 11.2.2 R - ■ BIPRU 11.2.5 R. The *appropriate regulator's* approach to granting *waivers* is set out in the Supervision manual (see ■ SUP 8).

[Note: BCD Article 72(3)]

11.2.7

FCA PRA

G

A *firm* applying for a *waiver* from one or more of the disclosure requirements in ■ BIPRU 11.2.2 R - ■ BIPRU 11.2.5 R will need to:

- (1) satisfy the *appropriate regulator* that it is included within comparable disclosures provided on a consolidated basis by a *parent undertaking* whose head office is not in an *EEA State*; and
- (2) notify the *appropriate regulator* of the location where the comparable disclosures are provided.

11.3 Disclosures: Information to be disclosed; Frequency, media and location of disclosures; Verification

Information to be disclosed

11.3.1

FCA PRA

R

A *firm* must publicly disclose the information laid down in ■ BIPRU 11.5 subject to the provisions laid down in ■ BIPRU 11.3.5 R to ■ BIPRU 11.3.7 R.

[Note: BCD Article 145(1), CAD Article 39]

11.3.2

FCA PRA

R

- (1) A *firm* which has an *IRB permission* must publicly disclose the information laid down in ■ BIPRU 11.6.1 R to ■ BIPRU 11.6.4 R.
- (2) A *firm* which recognises *credit risk mitigation* in accordance with ■ BIPRU 5 must publicly disclose the information laid down in ■ BIPRU 11.6.5 R.
- (3) A *firm* using the *advanced measurement approach* for the calculation of its *operational risk capital requirement* must publicly disclose the information laid down in ■ BIPRU 11.6.6 R.

[Note: BCD Article 145(2), CAD Article 39]

Disclosure policy

11.3.3

FCA PRA

R

- (1) A *firm* must adopt a formal policy to comply with the disclosure requirements laid down in ■ BIPRU 11.3.1 R and ■ BIPRU 11.3.2 R and have policies for assessing the appropriateness of its disclosures, including their verification and frequency.
- (2) A *firm* must also have policies for assessing whether its disclosures convey its risk profile comprehensively to market participants. Where those disclosures do not convey its risk profile comprehensively to market participants, a *firm* must publicly disclose the information necessary in addition to that required according to ■ BIPRU 11.3.3R (1). However, a *firm* may omit one or more items of information if those items are not, in the light of the criterion specified in ■ BIPRU 11.4.1 R, regarded as material, or if those items are, in the light of the criteria specified in ■ BIPRU 11.4.2 R and ■ BIPRU 11.4.3 R, regarded as proprietary or confidential.

[Note: BCD Article 145(3)]

Rating decisions

11.3.4

FCA PRA

R

A *firm* must, if requested, explain its rating decisions to SMEs and other corporate applicants for loans, providing an explanation in writing when asked. The administrative costs of the explanation have to be at an appropriate rate to the size of the loan.

[Note: BCD Article 145(4)]

Exemption from disclosure: Materiality

11.3.5

FCA PRA

R

A *firm* may omit one or more of the disclosures listed in ■ BIPRU 11.5 if the information provided by such disclosures is not, in the light of the criterion specified in ■ BIPRU 11.4.1 R, regarded as material.

[Note: BCD Article 146(1)]

Exemption from disclosure: Proprietary or confidential information

11.3.6

FCA PRA

R

A *firm* may omit one or more items of information included in the disclosures listed in ■ BIPRU 11.5 and ■ BIPRU 11.6 if those items include information which, in the light of the criteria specified in ■ BIPRU 11.4.2 R and ■ BIPRU 11.4.3 R, is regarded as proprietary or confidential.

[Note: BCD Article 146(2)]

11.3.7

FCA PRA

R

In the exceptional cases referred to in ■ BIPRU 11.3.6 R, a *firm* must:

- (1) state in its disclosures:
 - (a) the fact that the specific items of information are not disclosed; and
 - (b) the reason for non-disclosure; and
- (2) publish more general information about the subject matter of the disclosure requirement, except where these are to be classified as secret or confidential under the criteria set out in ■ BIPRU 11.4.2 R and ■ BIPRU 11.4.3 R.

[Note: BCD Article 146(3)]

Frequency of publication

11.3.8

FCA PRA

R

A *firm* must:

- (1) publish the disclosures required under ■ BIPRU 11.3.1 R to ■ BIPRU 11.3.5 R on an annual basis at a minimum;
- (2) publish disclosures as soon as practicable.

[Note: BCD Article 147(1)]

11.3.9

FCA PRA

R

A *firm* must also determine whether more frequent publication than is provided for in ■ BIPRU 11.3.8 R is necessary in the light of the criteria set out in ■ BIPRU 11.4.4 R.

[Note: BCD Article 147(2)]

Media and location of publication

11.3.10

FCA PRA

R

- (1) A *firm* may determine the appropriate medium, location and means of verification to comply effectively with the disclosure requirements laid down in ■ BIPRU 11.3.1 R to ■ BIPRU 11.3.4 R.
- (2) To the degree feasible, a *firm* must provide all disclosures in one medium or location.
- (3) Equivalent disclosures made by a *firm* under accounting, *listing* or other requirements may be deemed to constitute compliance with ■ BIPRU 11.3.1 R to ■ BIPRU 11.3.4 R.
- (4) If disclosures are not included in the financial statements, a *firm* must indicate where they can be found.

[Note: BCD Article 148]

11.4 Technical criteria on disclosure: General criteria

Criterion for materiality

11.4.1

FCA PRA

R

A *firm* must regard information as material in disclosures if its omission or misstatement could change or influence the assessment or decision of a user relying on that information for the purpose of making economic decisions.

[Note: BCD Annex XII Part 1 point 1]

Criteria: Proprietary or confidential information

11.4.2

FCA PRA

R

- (1) A *firm* must regard information as proprietary information if sharing that information with the public would undermine its competitive position.
- (2) Proprietary information may include information on products or systems which, if shared with competitors, would render a *firm's* investments therein less valuable.

[Note: BCD Annex XII Part 1 point 2]

11.4.3

FCA PRA

R

A *firm* must regard information as confidential if there are obligations to customers or other counterparty relationships binding the *firm* to confidentiality.

[Note: BCD Annex XII Part 1 point 3]

Criteria: Frequency of publication

11.4.4

FCA PRA

R

- (1) A *firm* must assess the need to publish some or all disclosures more frequently than annually in the light of the relevant characteristics of its business such as:
 - (a) scale of operations;
 - (b) range of activities;
 - (c) presence in different countries;
 - (d) involvement in different financial sectors;
 - (e) participation in international financial markets; and

(f) participation in payment, settlement and clearing systems.

(2) In making its assessment under (1) a *firm* must pay particular attention to the possible need for more frequent disclosure of:

- (a) items of information laid down in ■ BIPRU 11.5.3 R (2) and ■ BIPRU 11.5.3 R (5), and ■ BIPRU 11.5.4 R (2) - ■ BIPRU 11.5.4 R (5);
- (b) information on risk exposure and other items prone to rapid change.

[Note: BCD Annex XII Part 1 point 4]

Disclosures: Significant subsidiaries

11.4.5

FCA PRA

R

A *firm* which is a significant subsidiary of:

- (1) an *EEA parent institution*; or
- (2) an *EEA parent financial holding company*;

must disclose the information specified in ■ BIPRU 11.5.3 R to ■ BIPRU 11.5.4 R on an individual or sub-consolidated basis.

[Note: BCD Annex XII Part 1 point 5]

11.5 Technical criteria on disclosure: General requirements

Disclosure: Risk management objectives and policies

11.5.1

FCA PRA

R

A *firm* must disclose its risk management objectives and policies for each separate category of risk, including the risks referred to under ■ BIPRU 11.5.1 R to ■ BIPRU 11.5.17 R. These disclosures must include:

- (1) the strategies and processes to manage those risks;
- (2) the structure and organisation of the relevant risk management function or other appropriate arrangements;
- (3) the scope and nature of risk reporting and measurement systems; and
- (4) the policies for hedging and mitigating risk, and the strategies and processes for monitoring the continuing effectiveness of hedges and mitigants.

[Note: BCD Annex XII Part 2 point 1]

Disclosure: Scope of application of directive requirements

11.5.2

FCA PRA

R

A *firm* must disclose the following information regarding the scope of application of the requirements of the *Banking Consolidation Directive*:

- (1) the name of the *firm* which is the subject of the disclosures;
- (2) an outline of the differences in the basis of consolidation for accounting and prudential purposes, with a brief description of the entities that are:
 - (a) fully consolidated;
 - (b) proportionally consolidated;
 - (c) deducted from *capital resources*;
 - (d) neither consolidated nor deducted;

- (3) any current or foreseen material practical or legal impediment to the prompt transfer of *capital resources* or repayment of liabilities among the *parent undertaking* and its *subsidiary undertakings*;
- (4) the aggregate amount by which the actual *capital resources* are less than the required minimum in all *subsidiary undertakings* not included in the consolidation, and the name or names of such *subsidiary undertakings*; and
- (5) if applicable, the circumstance of making use of the provisions laid down in ■ BIPRU 2.1 (Solo consolidation waiver).

[Note: BCD Annex XII Part 2 point 2]

Disclosure: Capital resources

11.5.3

FCA PRA

R

A firm must disclose the following information regarding its *capital resources*:

- (1) summary information on the terms and conditions of the main features of all *capital resources* items and components thereof, including:
 - (a) *hybrid capital*;
 - (b) *capital instruments* which provide an incentive for the firm to redeem them; and
 - (c) *capital instruments* which the firm treats as *tier one capital* under ■ GENPRU TP8A;
- (2) *tier one capital resources*, with separate disclosure of:
 - (a) all positive items and deductions;
 - (b) the overall amount of *hybrid capital*, with specification of those instruments treated as *tier one capital* under ■ GENPRU TP 8A.1; and
 - (c) the overall amount of *capital instruments* that provide for an incentive to redeem them, with specification of those instruments treated as *tier one capital* under ■ GENPRU TP 8A.1;
- (3) the total amount (for the purposes of (3), the total amount must be stated gross of deductions) of:
 - (a) *tier two capital resources* plus any *innovative tier one capital resources*; and
 - (b) *tier three capital resources*;

- (4) deductions from *tier one capital resources* and *tier two capital resources*, with separate disclosure of items referred to in
 - GENPRU 2.2.236 R; and
- (5) total *capital resources*, net of deductions in ■ GENPRU 2.2 and limits laid down in ■ GENPRU 2.2.25 R to ■ GENPRU 2.2.30 R and ■ GENPRU 2.2.42 R to ■ GENPRU 2.2.50 R.

[Note: BCD Annex XII Part 2 point 3]

Disclosure: Compliance with BIPRU 3, BIPRU 4, BIPRU 6, BIPRU 7, BIPRU 10 and the overall Pillar 2 rule

11.5.4

FCA PRA

R

A *firm* must disclose the following information regarding compliance with ■ BIPRU 3, ■ BIPRU 4, ■ BIPRU 6, ■ BIPRU 7, ■ BIPRU 10 and the *overall Pillar 2 rule*:

- (1) a summary of the *firm's* approach to assessing the adequacy of its internal capital to support current and future activities;
- (2) for a *firm* calculating *risk weighted exposure amounts* in accordance with the *standardised approach* to credit risk, 8% of the *risk weighted exposure amounts* for each of the *standardised credit risk exposure classes*;
- (3) for a *firm* calculating *risk weighted exposure amounts* in accordance with the *IRB approach*, 8% of the *risk weighted exposure amounts* for each of the *IRB exposure classes*;

[Note: BCD Annex XII Part 2 point 4 (part)]

- (4) the *firm's* minimum capital requirements for the following:
 - (a) in respect of its *trading-book* business, its:
 - (i) *interest rate PRR*;
 - (ii) *equity PRR*;
 - (iii) *option PRR*;
 - (iv) *collective investment schemes PRR*;
 - (v) *counterparty risk capital component*;
 - (vi) *concentration risk capital component*; and
 - (b) in respect of all of its business activities, its:
 - (i) *commodity PRR*; and
 - (ii) *foreign currency PRR*;

- (5) its *operational risk capital requirement* calculated in accordance with the *basic indicator approach*, the *standardised approach* and the *advanced measurement approach* and disclosed separately.

[Note: BCD Annex XII Part 2 point 4(part)]

11.5.5

FCA PRA

R

For *retail exposures*, the requirement under ■ BIPRU 11.5.4 R (3) applies to each of the following categories:

- (1) *exposures to retail SMEs*;
- (2) *retail exposures* secured by real estate collateral;
- (3) *qualifying revolving retail exposures*; and
- (4) other *retail exposures*.

[Note: BCD Annex XII Part 2 point 4(part)]

11.5.6

FCA PRA

R

For *equity exposures*, the requirement under ■ BIPRU 11.5.4 R (3) applies to:

- (1) each of the approaches (the simple risk weight approach, the PD/LGD approach and the internal models approach) provided for in ■ BIPRU 4.7.5 R to ■ BIPRU 4.7.6 R, ■ BIPRU 4.7.9 R to ■ BIPRU 4.7.11 R, ■ BIPRU 4.7.14 R to ■ BIPRU 4.7.16 R, ■ BIPRU 4.7.24 R to ■ BIPRU 4.7.25 R;
- (2) exchange traded *exposures*, private *equity exposures* in sufficiently diversified portfolios, and other *exposures*;
- (3) *exposures* subject to supervisory transition regarding capital requirements; and
- (4) *exposures* subject to grandfathering provisions regarding capital requirements.

[Note: BCD Annex XII Part 2 point 4(part)]

11.5.7

FCA PRA

R

A *firm* must disclose the following information regarding its *exposure to counterparty credit risk*:

- (1) a discussion of the methodology used to assign internal capital and credit limits for counterparty credit *exposures*;
- (2) a discussion of policies for securing collateral and establishing credit reserves;
- (3) a discussion of policies with respect to *wrong-way risk exposures*;

- (4) a discussion of the impact of the amount of collateral the *firm* would have to provide given a downgrade in its credit rating;
- (5) gross positive fair value of contracts, netting benefits, netted current credit *exposure*, collateral held and 'net derivatives credit *exposure*', where 'net derivatives credit *exposure*' is the credit *exposure* on derivatives transactions after considering both the benefits from legally enforceable netting agreements and collateral arrangements;
- (6) measures for exposure value under the *CCR mark to market method*, the *CCR standardised method* or the *CCR internal model method*, whichever is applicable;
- (7) the notional value of credit derivative hedges, and the distribution of current credit *exposure* by types of credit *exposure*;
- (8) credit derivative transactions (notional), segregated between use for the *firm's* own credit portfolio, as well as in its intermediation activities, including the distribution of the credit derivatives products used, broken down further by protection bought and sold within each product group; and
- (9) the estimate of alpha (α) if the *firm's CCR internal model method permission* permits it to estimate α .

[Note: *BCD Annex XII Part 2 point 5*]

Disclosure: Credit risk and dilution risk

A *firm* must disclose the following information regarding its *exposure* to credit risk and *dilution risk*:

- (1) the definitions for accounting purposes of past due and impaired;
- (2) a description of the approaches and methods adopted for determining value adjustments and provisions;
- (3) the total amount of *exposures* after accounting offsets and without taking into account the effects of *credit risk mitigation*, and the average amount of the *exposures* over the period broken down by different types of *exposure* classes;
- (4) the geographic distribution of the *exposures*, broken down in significant areas by material *exposure* classes, and further detailed if appropriate;

11.5.8

FCA PRA

R

- (5) the distribution of the *exposures* by industry or counterparty type, broken down by *exposure* classes, and further detailed if appropriate;
- (6) the residual maturity breakdown of all the *exposures*, broken down by *exposure* classes, and further detailed if appropriate;
- (7) by significant industry or counterparty type, the amount of:
 - (a) impaired *exposures* and past due *exposures*, provided separately;
 - (b) value adjustments and provisions; and
 - (c) charges for value adjustments during the period;
- (8) the amount of the impaired *exposures* and past due *exposures*, provided separately, broken down by the significant geographical areas including, if practical, the amounts of value adjustments and provisions related to each geographical area;
- (9) the reconciliation of changes in the value adjustments and provisions for impaired *exposures*, shown separately; and
- (10) value adjustments and recoveries recorded directly to the income statement must be disclosed separately.

[Note: BCD Annex XII Part 2 point 6 (part)]

11.5.9

R

The information to be disclosed under ■ BIPRU 11.5.8 R (9) must comprise:

FCA **PRA**

- (1) a description of the type of value adjustments and provisions;
- (2) the opening balances;
- (3) the amounts taken against the provisions during the period;
- (4) the amounts set aside or reversed for estimated probable losses on *exposures* during the period, any other adjustments including those determined by exchange rate differences, business combinations, acquisitions and disposals of *subsidiary undertakings*, and transfers between provisions; and
- (5) the closing balances.

[Note: BCD Annex XII Part 2 point 6 (part)]

11.5.10

FCA PRA

R

Disclosure: Firms calculating risk weighted exposure amounts in accordance with the standardised approach

For a *firm* calculating *risk weighted exposure amounts* in accordance with the *standardised approach* to credit risk, the following information must be disclosed for each of the *standardised credit risk exposure classes*;

- (1) the names of the *nominated ECAIs* and export credit agencies and the reasons for any changes;
- (2) the *standardised credit risk exposure classes* for which each *ECAI* or export credit agency is used;
- (3) a description of the process used to transfer the issuer and issue credit assessments onto items not included in the *trading book*;
- (4) the association of the external rating of each *nominated ECAI* or export credit agency with the *credit quality steps* prescribed in ■ BIPRU 3, taking into account that this information need not be disclosed if the *firm* complies with the *credit quality assessment scale*; and
- (5) the *exposure* values and the *exposure* values after *credit risk mitigation* associated with each *credit quality step* prescribed in ■ BIPRU 3, as well as those deducted from *capital resources*.

[Note: BCD Annex XII Part 2 point 7]

Disclosure: Firms calculating risk weighted exposure amounts using the IRB approach

11.5.11

FCA PRA

R

A *firm* calculating *risk weighted exposure amounts* for *specialised lending exposures* in accordance with ■ BIPRU 4.5.8 R to ■ BIPRU 4.5.10 R or *equity exposures* in accordance with ■ BIPRU 4.7.9 R to ■ BIPRU 4.7.10 R (the simple risk weight approach) must disclose the *exposures* assigned:

- (1) to each category of the table in ■ BIPRU 4.5.9 R; or
- (2) to each *risk weight* mentioned in ■ BIPRU 4.7.9 R to ■ BIPRU 4.7.10 R.

[Note: BCD Annex XII Part 2 point 8]

Disclosure: Market risk

11.5.12

FCA PRA

R

A *firm* must disclose its *capital resources requirements* separately for each risk referred to in (1), (2) and (3):

- (1) in respect of its *trading-book* business, its:
 - (a) *interest rate PRR*;

- (b) *equity PRR*;
 - (c) *option PRR*;
 - (d) *collective investment schemes PRR*;
 - (e) *counterparty risk capital component*; and
 - (f) *concentration risk capital component*; and
- (2) in respect of all of its business activities, its:
- (a) *commodity PRR*; and
 - (b) *foreign currency PRR*; and
- (3) its specific interest-rate risk of *securitisation positions*.

[Note: *BCD* Annex XII Part 2 point 9]

Disclosure: Use of VaR model for calculation of market risk capital requirement

11.5.13

FCA PRA

R

The following information must be disclosed by a *firm* which calculates its *market risk capital requirement* using a *VaR model*:

- (1) for each sub-portfolio covered:
 - (a) the characteristics of the models used;
 - (b) a description of stress testing applied to the sub-portfolio;
 - (c) a description of the approaches used for back-testing and validating the accuracy and consistency of the internal models and modelling processes;
 - (d) for the capital charges calculated according to the *incremental risk charge* and the *all price risk measure* separately, the methodologies used and the risks measured through the use of an internal model, including a description of the approach used by the *firm* to determine liquidity horizons, the methodologies used to achieve a capital assessment that is consistent with the required soundness standard and the approaches used in the validation of the model;
- (2) the scope of the *firm's VaR model permission*;
- (3) a description of the extent and methodologies for compliance with the requirements set out in ■ GENPRU 1.3.13 R (2) and ■ GENPRU 1.3.13 R (3) and ■ GENPRU 1.3.14 R to ■ GENPRU 1.3.34 R;
- (4) the highest, the lowest and the mean of the following:
 - (a) the daily *VaR measures* over the reporting period and the *VaR measure* as per the period end;

- (b) the *stressed VaR* measures over the reporting period and the *stressed VaR* measure as per the period end;
 - (c) the capital charge according to the *incremental risk charge* over the reporting period and as per the period end;
 - (d) the capital charge according to the *all price risk measure* over the reporting period and as per the period end;
- (5) the amount of capital according to the *incremental risk charge* and the amount of capital according to the *all price risk measure* shown separately, together with the weighted average liquidity horizon for each sub-portfolio covered; and
- (6) a comparison of the daily end-of-day *VaR measures* to the one-day changes of the portfolio's value by the end of the subsequent *business day* together with an analysis of any important overshooting during the reporting period.

[Note: *BCD* Annex XII Part 2 point 10]

Disclosure: Operational risk

11.5.14

FCA PRA

R

The following information must be disclosed by a *firm* on *operational risk*:

- (1) the approaches for the assessment of the *operational risk capital requirement* that the *firm* qualifies for; and
- (2) if the *firm* uses the *advanced measurement approach*:
 - (a) a description of the methodology used in the *advanced measurement approach*, including a discussion of relevant internal and external factors considered in the *firm's* measurement approach; and
 - (b) in the case of partial use, the scope and coverage of the different methodologies used.

[Note: *BCD* Annex XII Part 2 point 11]

Disclosure: Non-trading book exposures in equities

11.5.15

FCA PRA

R

A *firm* must disclose the following information regarding the *exposures* in *equities* not included in the *trading book*:

- (1) the differentiation between *exposures* based on their objectives, including for capital gains relationship and strategic reasons, and an overview of the accounting techniques and valuation methodologies used, including key assumptions and practices affecting valuation and any significant changes in these practices;

- (2) the balance sheet value, the fair value and, for those exchange-traded, a comparison to the market price where it is materially different from the fair value;
- (3) the types, nature and amounts of exchange-traded *exposures*, private *equity exposures* in sufficiently diversified portfolios, and other *exposures*;
- (4) the cumulative realised gains or losses arising from sales and liquidations in the period; and
- (5) the total unrealised gains or losses, the total latent revaluation gains or losses, and any of these amounts included in *tier one*, *tier two* or *tier three capital resources*.

[Note: BCD Annex XII Part 2 point 12]

Disclosures: Exposures to interest rate risk in the non-trading book

11.5.16

FCA PRA

R

A *firm* must disclose the following information on its *exposure* to interest rate risk on positions not included in the *trading book*:

- (1) the nature of the interest rate risk and the key assumptions (including assumptions regarding loan prepayments and behaviour of non-maturity deposits), and frequency of measurement of the interest rate risk; and
- (2) the variation in earnings, economic value or other relevant measure used by the management for upward and downward rate shocks according to management's method for measuring the interest rate risk, broken down by currency.

[Note: BCD Annex XII Part 2 point 13]

Disclosures: Securitisation

11.5.17

FCA PRA

R

A *firm* calculating *risk weighted exposure amounts* in accordance with ■ BIPRU 9 or *capital resource requirements* according to ■ BIPRU 7.2.48A R to ■ BIPRU 7.2.48K R must disclose the following information, where relevant separately for its *trading book* and *non-trading book*:

- (1) a description of the *firm's* objectives in relation to *securitisation* activity;
- (1A) the nature of other risks, including *liquidity risk* inherent in securitised assets;
- (1B) the type of risks in terms of seniority of underlying *securitisation positions* and in terms of assets underlying these latter *securitisation positions* assumed and retained with *resecuritisation* activity;

- (2) the different roles played by the *firm* in the *securitisation* process;
- (3) an indication of the extent of the *firm's* involvement in each of them;
- (3A) a description of the processes in place to monitor changes in the credit and market risk of *securitisation exposures*, including how the behaviour of the underlying assets impacts *securitisation positions* and a description of how those processes differ for *resecuritisation positions*;
- (3B) a description of the *firm's* policy governing the use of hedging and unfunded protection to mitigate the risks of retained *securitisation* and *resecuritisation positions*, including identification of material hedge counterparties by relevant type of risk exposure;
- (4) the approaches to calculating *risk weighted exposure amounts* that the *firm* follows for its *securitisation* activities, including the types of *securitisation exposures* to which each approach applies;
- (4A) the types of *SSPEs* that the *firm*, as *sponsor*, uses to securitise third-party *exposures*, including whether, and in what form, and to what extent, the *firm* has *exposures* to these *SSPEs*, separately for on and off-balance sheet *exposures*, as well as a list of the entities that the *firm* manages, or advises, and that invest in either the *securitisation positions* that the *firm* has securitised or in *SSPEs* that the *firm* sponsors;
- (5) a summary of the *firm's* accounting policies for *securitisation* activities, including:
 - (a) whether the transactions are treated as sales or financings;
 - (b) the recognition of gains on sales;
 - (c) the methods, key assumptions, inputs and the changes from the previous period for valuing *securitisation positions*;
 - (d) the treatment of *synthetic securitisations* if this is not covered by other accounting policies;
 - (e) how assets awaiting *securitisation* are valued and whether they are recorded in the *firm's non-trading book* or *trading book*; and
 - (f) policies for recognising liabilities on the balance sheet for arrangements that could require the *firm* to provide financial support for securitised assets;

- (6) the names of the *ECAIs* used for *securitisations* and the types of *exposure* for which each agency is used;
- (6A) where applicable, a description of the *ABCP internal assessment approach* as set out in ■ BIPRU 9.12.20 R including the structure of the internal assessment process and relation between internal assessment and external ratings, the use of internal assessment other than for *ABCP internal assessment approach* capital purposes, the control mechanisms for the internal assessment process (including discussion of independence, accountability, and internal assessment process review), the *exposure* types to which the internal assessment process is applied and the stress factors used for determining *credit enhancement* levels, by *exposure* type;
- (6B) an explanation of significant changes to any of the quantitative disclosures in (8) and (13) to (15) since the last reporting period;
- (7) [deleted]
- (8) for the *non-trading book* and for *exposures securitised* by the *firm*, the amount of impaired and past due *exposures securitised*, and the losses recognised by the *firm* during the current period, broken down by *exposure* type;
- (9) [deleted]
- (10) [deleted]
- (11) [deleted]
- (12) [deleted]
- (13) separately for the *trading book* and the *non-trading book*, the following information broken down by *exposure* type:
 - (a) the total outstanding amount of *exposures securitised* by the *firm*, separately for *traditional securitisations* and *synthetic securitisations*, and *securitisations* for which the *firm* acts only as *sponsor*;
 - (b) the aggregate amount of on-balance sheet *securitisation positions* retained or purchased, and off-balance sheet *securitisation exposures*;
 - (c) the aggregate amount of assets awaiting *securitisation*;
 - (d) for securitised facilities subject to an *early amortisation provision*, the aggregate drawn-down *exposures* attributed to the *originator's* and investors' interests respectively, the aggregate *capital resources requirement* incurred by the *firm* against the *originator's* interest and the aggregate *capital*

resources requirement incurred by the *firm* against the investors' shares of drawn balances and undrawn lines;

- (e) the amount of *securitisation positions* that have been *risk weighted* at 1250% or deducted; and
 - (f) a summary of the *securitisation* activity of the current period, including the amount of *exposures securitised* and recognised gain or loss on sale;
- (14) separately for the *trading book* and the *non-trading book*, the following information:
- (a) the aggregate amount of *securitisation positions* retained or purchased and the associated *capital resources requirements*, broken down by *securitisation* and *resecuritisation exposures*, and further broken down into a meaningful number of *risk weight* or *capital resources requirement* bands, for each *capital resources requirement* approach used; and
 - (b) the aggregate amount of *resecuritisation exposures* retained or purchased, broken down according to the *exposure* before and after hedging or insurance, and the *exposure* to financial guarantors, broken down according to guarantor credit worthiness categories or guarantor name; and
- (15) for the *trading book*, the total outstanding *exposures securitised* by the *firm* and subject to a *market risk capital requirement*, broken down into *traditional* and *synthetic*, and by *exposure* type.

[Note: *BCD* Annex XII Part 2 point 14]

Disclosures: remuneration

A *firm* must disclose the following information, including regular, at least annual, updates, regarding its remuneration policy and practices for those categories of staff whose professional activities have a material impact on its risk profile:

- (1) information concerning the decision-making process used for determining the remuneration policy, including if applicable, information about the composition and the mandate of a remuneration committee, the external consultant whose services have been used for the determination of the remuneration policy and the role of the relevant stakeholders;
- (2) information on the link between pay and performance;
- (3) the most important design characteristics of the remuneration system, including information on the criteria used for

11.5.18

FCA PRA

R

performance measurement and risk adjustment, deferral policy and vesting criteria;

- (4) information on the performance criteria on which the entitlement to shares, options or variable components of remuneration is based;
- (5) the main parameters and rationale for any variable component scheme and any other non-cash benefits;
- (6) aggregate quantitative information on remuneration, broken down by business area;
- (7) aggregate quantitative information on remuneration, broken down by senior management and members of staff whose actions have a material impact on the risk profile of the *firm*, indicating the following:
 - (a) the amounts of remuneration for the financial year, split into fixed and variable remuneration, and the number of beneficiaries;
 - (b) the amounts and forms of variable remuneration, split into cash, shares, share-linked instruments and other types;
 - (c) the amounts of outstanding deferred remuneration, split into vested and unvested portions;
 - (d) the amounts of deferred remuneration awarded during the financial year, paid out and reduced through performance adjustments;
 - (e) new sign-on and severance payments made during the financial year, and the number of beneficiaries of those payments;
 - (f) the amounts of severance payments awarded during the financial year, number of beneficiaries and highest such award to a single person.

[Note: Paragraph 15 of Annex XII to the *Banking Consolidation Directive*.]

11.5.19

FCA PRA

G

The *appropriate regulator* would normally consider the requirements to publish disclosures in accordance with ■ BIPRU 11.3.8 R and ■ 11.3.9 R in respect of ■ BIPRU 11.5 as a whole to meet the requirement in paragraph 15 of Annex XII to the *Banking Consolidation Directive* to publish "regular, at least annual, updates" (as implemented in ■ BIPRU 11.5.18 R).

11.5.20

FCA PRA

R

- (1) A *firm* that is significant in terms of its size, internal organisation and the nature, scope and the complexity of its activities must also disclose the quantitative information referred to in ■ BIPRU 11.5.18 R at the level of *senior personnel*.
- (2) *Firms* must comply with the requirements set out in ■ BIPRU 11.5.18 R in a manner that is appropriate to their size,

internal organisation and the nature, scope and complexity of their activities and without prejudice to the *UK* or other national transposition of Directive 95/46/EC of the European Parliament and of the Council of 24 October 1995 on the protection of individuals with regard to the processing of personal data and on the free movement of such data.

[Note: Paragraph 15 of Annex XII to the *Banking Consolidation Directive*.]

[Note: The *appropriate regulator* has given *guidance* for the purpose of providing a framework for complying with the disclosure requirements of ■ BIPRU 11.5.18 R in accordance with the proportionality test set out in ■ BIPRU 11.5.20 R (2). The *guidance* divides firms into four levels, and indicates which requirements should be complied with for each level. This was published as finalised *guidance* FG12/19 'General Guidance on Proportionality' and is available at <http://www.bankofengland.co.uk/PRA/Pages/publications/default.aspx> . Feedback on CP10/27 and final rules' and is available at <http://www.bankofengland.co.uk/PRA/Pages/publications/default.aspx>]

11.5.21

FCA PRA

G

In the *appropriate regulator's* view, the exemptions from disclosure provided for in ■ BIPRU 11.3.5 R (materiality) and ■ BIPRU 11.3.6 R (proprietary or confidential information) are unlikely to apply to the disclosure required by ■ BIPRU 11.5.18 R (having regard, amongst other things, to the fact that the requirements set out in ■ BIPRU 11.5.18 R are to be complied with in the manner described in ■ BIPRU 11.5.20 R (2)).

11.6 Qualifying requirements for the use of particular instruments or methodologies

Disclosures: Firms using the IRB approach

11.6.1

R

FCA PRA

A firm calculating *risk weighted exposure amounts* in accordance with the *IRB approach* must disclose the following information:

- (1) the scope of the *firm's IRB permission*;
- (2) an explanation and review of:
 - (a) the structure of internal *rating systems* and relation between internal and external ratings;
 - (b) the use of internal estimates other than for calculating *risk weighted exposure amounts* in accordance with the *IRB approach*;
 - (c) the process for managing and recognising *credit risk mitigation*; and
 - (d) the control mechanisms for *rating systems* including a description of independence, accountability, and *rating systems* review;
- (3) a description of the internal ratings process, provided separately for the following *IRB exposure classes*:
 - (a) central governments and *central banks*;
 - (b) *institutions*;
 - (c) corporate, including SMEs, *specialised lending* and purchased corporate receivables;
 - (d) retail, for *exposures to retail SMEs exposures, retail exposures secured by real estate collateral, qualifying revolving retail exposures, and other retail exposures*; and
 - (e) *equities*;
- (4) the *exposure* values for each of the *IRB exposure classes*;

- (5) for each of the *IRB exposure classes* central governments and *central banks, institutions, corporate and equity*, and across a sufficient number of *obligor grades* (including *default*) to allow for a meaningful differentiation of credit risk, a *firm* must disclose:
- (a) the total *exposures* (for the *IRB exposure classes* central governments and *central banks, institutions and corporate exposures*, the sum of outstanding loans and *exposure* values for undrawn commitments; for *equity exposures*, the outstanding amount);
 - (b) for a *firm* using own *LGD* estimates for the calculation of *risk weighted exposure amounts*, the *exposure-weighted average LGD* in percentage;
 - (c) the *exposure-weighted average risk weight*; and
 - (d) for a *firm* using own estimates of *conversion factors* for the calculation of *risk weighted exposure amounts*, the amount of undrawn commitments and *exposure-weighted average exposure* values for each *IRB exposure class*;
- (6) for the *retail exposure* class and for each of the categories of:
- (a) *exposures to retail SMEs*;
 - (b) *retail exposures* secured by real estate collateral;
 - (c) *qualifying revolving retail exposures*; and
 - (d) other *retail exposures*;
- either the disclosures outlined under (5) (if applicable, on a pooled basis), or an analysis of *exposures* (outstanding loans and *exposure* values for undrawn commitments) against a sufficient number of *EL* grades to allow for a meaningful differentiation of credit risk (if applicable, on a pooled basis);
- (7) the actual value adjustments in the preceding period for each *IRB exposure class* (for *retail exposures*, for each of the categories in (6)(a) to (d)) and how they differ from past experience;
 - (8) a description of the factors that impacted on the loss experience in the preceding period (for example, whether the *firm* experienced higher than average *default* rates, or higher than average *LGDs* and *conversion factors*); and
 - (9) the *firm's* estimates against actual outcomes over a longer period including, at a minimum, information on estimates of losses against actual losses in each *IRB exposure class* (for *retail exposures*, for each of the categories in (6)(a) to (d)) over a

period sufficient to allow for a meaningful assessment of the performance of the internal rating processes for each *IRB exposure class* (for *retail exposures*, for each of the categories in (6)(a) to (d)).

[Note: *BCD Annex XII Part 3 point 1 (part)*]

11.6.2

FCA PRA

R

For the purposes of ■ BIPRU 11.6.1 R (3), the description must include the types of *exposure* included in the *IRB exposure class*, the definitions, methods and data for estimation and validation of *PD* and, if applicable, *LGD* and *conversion factors*, including assumptions employed in the derivation of these variables, and the descriptions of material deviations from the definition of *default*, including the broad segments affected by such deviations.

[Note: *BCD Annex XII Part 3 point 1 (part)*]

11.6.3

FCA PRA

R

For the purposes of ■ BIPRU 11.6.1 R (4), where a *firm* uses its own estimates of *LGDs* or *conversion factors* for the calculation of *risk weighted exposure amounts* for *exposures* falling into the *sovereign, institution and corporate IRB exposure class*, the *firm* must disclose those *exposures* separately from *exposures* for which it does not use such estimates.

[Note: *BCD Annex XII Part 3 point 1 (part)*]

11.6.4

FCA PRA

R

For the purposes of ■ BIPRU 11.6.1 R (9), where appropriate, a *firm* must further decompose the information to provide analysis of *PD* and, for a *firm* using own estimates of *LGDs* and/or *conversion factors*, *LGD* and *conversion factor* outcomes against estimates provided in the quantitative risk assessment disclosures under ■ BIPRU 11.6.1 R to ■ BIPRU 11.6.4 R.

[Note: *BCD Annex XII Part 3 point 1 (part)*]

Disclosures: Credit risk mitigation

11.6.5

FCA PRA

R

A *firm* applying *credit risk mitigation* techniques must disclose the following information:

- (1) the policies and processes for, and an indication of the extent to which the *firm* makes use of, on- and off-balance sheet netting;
- (2) the policies and processes for collateral valuation and management;
- (3) a description of the main types of collateral taken by the *firm*;
- (4) the main types of guarantor and credit derivative counterparty and their creditworthiness;
- (5) information about *market risk* or credit risk concentrations within the credit mitigation taken;

- (6) for *firms* calculating *risk weighted exposure amounts* using the *standardised approach* to credit risk or the *IRB approach*, but not providing own estimates of *LGDs* or *conversion factors* in respect of the *exposure* class, separately for each *exposure* class, the total *exposure* value (after, where applicable, on- or off-balance sheet netting) that is covered - after the application of volatility adjustments - by eligible financial collateral, and other eligible *collateral*; and
- (7) for *firms* calculating *risk weighted exposure amounts* using the *standardised approach* or the *IRB approach*, separately for each *exposure* class, the total *exposure* (after, where applicable, on- or off-balance sheet netting) that is covered by guarantees or credit derivatives; for *equity exposures*, this requirement applies to each of the approaches (the simple risk weight approach, the PD/LGD approach and the internal models approach) provided for in ■ BIPRU 4.7.5 R to ■ BIPRU 4.7.6 R, ■ BIPRU 4.7.9 R to ■ BIPRU 4.7.11 R, ■ BIPRU 4.7.14 R to ■ BIPRU 4.7.16 R, ■ BIPRU 4.7.24 R to ■ BIPRU 4.7.25 R.

[Note: BCD Annex XII Part 3 point 2]

Disclosure: Insurance for the purpose of mitigating operational risk.....

11.6.6

FCA PRA

R

A *firm* using the *advanced measurement approach* for the calculation of its *operational risk capital requirement* must disclose a description of the use of insurance and other risk transfer mechanisms for the purpose of mitigating the risk.

[Note: BCD Annex XII Part 3 point 3]

Chapter 12

Liquidity standards

12.1 Application

12.1.1

FCA PRA

R

Subject to ■ BIPRU 12.1.2R, ■ BIPRU 12 applies to:

- (1) a *BIPRU firm*;
- (2) an *incoming EEA firm* which:
 - (a) is a *full BCD credit institution*; and
 - (b) has a *branch* in the *United Kingdom*; and
- (3) a *third country BIPRU firm* which:
 - (a) is a *bank*; and
 - (b) has a *branch* in the *United Kingdom*.

12.1.2

FCA PRA

R

■ BIPRU 12.5 (Individual Liquidity Adequacy Standards), ■ BIPRU 12.6 (Simplified ILAS), ■ BIPRU 12.7 (Liquid assets buffer) and ■ BIPRU 12.9 (Individual liquidity guidance and regulatory intervention points) apply only to an *ILAS BIPRU firm*.

12.1.3

FCA PRA

G

A *firm* that is an *exempt full scope BIPRU investment firm* is not an *ILAS BIPRU firm*.

12.1.4

FCA PRA

R

- (1) An *exempt full scope BIPRU investment firm* is a *full scope BIPRU investment firm* that at all times has total net assets which are less than or equal to 50 million.
- (2) In this *rule*, total net assets are the sum of a *firm's* total *trading book* assets and its total *non-trading book* assets, less the sum of its called up share capital, reserves and minority interests.
- (3) For the purpose of (2), the value attributed to each of the specified balance sheet items must be that which is reported to the *FCA* in the *firm's* most recent *FCA001 data item*.

12.1.5

FCA PRA

G

The effect of ■ BIPRU 12.1.4R is therefore to require the *firm* to sum the values of cell entries 20A and 20B in *data item* FSA001 and deduct from that total the sum of the values of cell entries 42, 43 and 44 in the same *data item*.

12.1.6

FCA PRA

G

There are some provisions in other sections of ■ BIPRU 12 which apply only to an *ILAS BIPRU firm*. Where this is the case, the provision in question says so.

12.1.7

FCA PRA

R

In relation to an *incoming EEA firm* or a *third country BIPRU firm*, this chapter applies only with respect to the activities of the *firm's UK branch*.

12.2 Adequacy of liquidity resources

The overall liquidity adequacy rule

12.2.1

FCA PRA

R

- (1) A *firm* must at all times maintain liquidity resources which are adequate, both as to amount and quality, to ensure that there is no significant risk that its liabilities cannot be met as they fall due.
- (2) For the purpose of (1):
 - (a) a *firm* may not include liquidity resources that can be made available by other members of its *group*;
 - (b) an *incoming EEA firm* or a *third country BIPRU firm* may not, in relation to its *UK branch*, include liquidity resources other than those which satisfy the conditions in
 - BIPRU 12.2.3R;
 - (c) a *firm* may not include liquidity resources that may be made available through emergency liquidity assistance from a central bank (including the European Central Bank).

12.2.2

FCA PRA

G

■ BIPRU 12.2.1R is the *overall liquidity adequacy rule*.

Branch liquidity resources

12.2.3

FCA PRA

R

The conditions to which ■ BIPRU 12.2.1R (2)(b) refers are that the *firm's* liquidity resources are:

- (1) under the day-to-day control of the *UK branch's* senior management;
- (2) held in an account with one or more *custodians* in the sole name of the *UK branch*;
- (3) unencumbered; and
- (4) for the purpose of the *overall liquidity adequacy rule* only, attributed to the balance sheet of the *UK branch*.

12.2.4

FCA PRA

G

The effect of ■ BIPRU 12.2.1R (2)(b) and ■ BIPRU 12.2.3 R is to require an *incoming EEA firm* or a *third country BIPRU firm* to maintain a local operational liquidity reserve in relation to the activities of its *UK branch*. ■ BIPRU 12.9 contains further *guidance* on this point.

Liquidity resources: general

12.2.5

FCA PRA

G

For the purposes of the *overall liquidity adequacy rule*, liquidity resources are not confined to the amount or value of a *firm's* marketable, or otherwise realisable, assets. Rather, in assessing the adequacy of those resources, a *firm* should have regard to the overall character of the resources available to it which enable it to meet its liabilities as they fall due. Therefore, for the purposes of that *rule*, a *firm* should ensure that:

- (1) it holds sufficient assets which are marketable, or otherwise realisable;
- (2) it is able to generate funds from those assets in a timely manner;
- (3) it maintains a prudent funding profile in which its assets are of appropriate maturities, taking account of the expected timing of that *firm's* liabilities; and
- (4) it is able to generate unsecured funding of appropriate tenor in a timely manner.

12.2.6

FCA PRA

G

The *overall liquidity adequacy rule* is expressed to apply to each *firm* on a solo basis. Each *firm* must be able to satisfy that *rule* relying solely on its own liquidity resources. Where the *firm* is an *incoming EEA firm* or a *third country BIPRU firm*, compliance with the *overall liquidity adequacy rule* with respect to the *UK branch* must be achieved relying solely on liquidity resources that satisfy the conditions in ■ BIPRU 12.2.3R.

12.2.7

FCA PRA

G

The starting point, therefore, is that each *firm*, or where relevant its *UK branch*, must be self-sufficient in terms of its own liquidity adequacy. The *appropriate regulator* does, however, recognise that there are circumstances in which it may be appropriate for a *firm* or *branch* to rely on liquidity support provided by other entities in its *group* or from elsewhere within the *firm*. A *firm* wishing to rely on support of this kind, whether for itself or for its *UK branch*, may only do so with the consent of the *appropriate regulator*, given by way of a *waiver* under section 138A (Modification or waiver of rules) of the *Act* to the *overall liquidity adequacy rule*.

Liquid assets buffer and funding profile

12.2.8

FCA PRA

R

For the purposes of the *overall liquidity adequacy rule*, an *ILAS BIPRU firm* must also ensure that:

- (1) its liquidity resources contain an adequate buffer of high quality, unencumbered assets; and
- (2) it maintains a prudent funding profile.

12.2.9

FCA PRA

G

The purpose of ■ BIPRU 12.2.8R is to ensure that an *ILAS BIPRU firm* has a buffer of liquid assets which are available to meet those liabilities which fall due in periods of stress experienced by that *firm*. Those periods of stress may be both market-wide and idiosyncratic in nature. The *appropriate regulator* acknowledges that in periods of stress a *firm's* liquid assets buffer may be eroded.

12.2.10 FCA PRA G The *appropriate regulator* recognises, however, that it may take time for a *firm* to build a buffer which is of a sufficient size and quality to help reduce the effect of periods of stress on the *firm*. In particular, the *appropriate regulator* recognises that the transition from the *appropriate regulator's* liquidity regime in force immediately prior to the ■ BIPRU 12 regime is likely to be a gradual one for many *firms*. The *appropriate regulator* will seek to agree with a *firm* an appropriate period of time over which its liquid assets buffer ought to be built. The *appropriate regulator* will, in any event, incorporate into the *individual liquidity guidance* which it gives to the *firm* details of the steps that it expects the *firm* to take so that it may establish an appropriately robust liquid assets buffer.

12.2.11 FCA PRA R In complying with ■ BIPRU 12.2.8R, a *simplified ILAS BIPRU firm* must ensure that its liquid assets buffer is at least equal to the amount of liquidity resources required by the *simplified buffer requirement*.

12.2.12 FCA PRA G The *appropriate regulator* is likely to regard a *simplified ILAS BIPRU firm* whose liquid assets buffer accords with the *simplified buffer requirement* as having an adequate buffer of assets and a prudent funding profile for the purpose of ■ BIPRU 12.2.8R. Further *guidance* on this matter is provided in ■ BIPRU 12.6.5G.

12.2.13 FCA PRA G ■ BIPRU 12.7 contains more detailed *rules* and *guidance* about the type of assets that an *ILAS BIPRU firm* is permitted to hold in order to satisfy ■ BIPRU 12.2.8R.

Individual assessments of liquidity adequacy

12.2.14 FCA PRA G The adequacy of an *ILAS BIPRU firm's* liquidity resources needs to be assessed both by that *firm* and by the *appropriate regulator*. This process involves:

- (1) in the case of a *standard ILAS BIPRU firm*, an *Individual Liquidity Adequacy Assessment (ILAA)* which such a *firm* is obliged to carry out in accordance with ■ BIPRU 12.5;
- (2) in the case of a *simplified ILAS BIPRU firm*, an *Individual Liquidity Systems Assessment (ILSA)* which such a *firm* is obliged to carry out in accordance with ■ BIPRU 12.6; and
- (3) a *Supervisory Liquidity Review Process (SLRP)*, which is conducted by the *appropriate regulator*.

12.2.15 FCA PRA G ■ BIPRU 12.5 sets out the *ILAS* framework. That section describes some of the stress tests that a *standard ILAS BIPRU firm* must carry out in conducting its *ILAA* and identifies a number of sources of *liquidity risk* in relation to which a *firm* is required to assess the impact of those stresses. For a *standard ILAS BIPRU firm*, the requirements in ■ BIPRU 12.5 are in addition to the stress testing requirements in ■ BIPRU 12.4. The *rules* in ■ BIPRU 12.5 require a *standard ILAS BIPRU firm* to report the results of both sets of stress tests in its *ILAA*, while the *rules* in ■ BIPRU 12.6 require a *simplified ILAS BIPRU firm* to report those results in its *ILSA*.

12.2.16

FCA PRA

G

As part of its *SLRP*, the *appropriate regulator* will, having regard to the *liquidity risk* profile of the *firm*, consider:

- (1) the adequacy, both as to amount and quality, of the liquidity resources (including the liquid assets buffer) held by the *firm*; and
- (2) the degree of prudence reflected in the *firm's* funding profile.

12.2.17

FCA PRA

G

In assessing the adequacy of those resources, the *appropriate regulator* will consider a *firm's* overall ability to generate funding in a way that ensures that it can meet its liabilities as they fall due both in stressed and in ordinary business conditions.

12.2.18

FCA PRA

G

After completing a review of the *ILAA* as part of the *SLRP*, the *appropriate regulator* will give a *standard ILAS BIPRU firm individual liquidity guidance*, advising it of the amount and quality of liquidity resources which the *appropriate regulator* considers are appropriate having regard to the *liquidity risk* profile of the *firm*. In giving *individual liquidity guidance*, the *appropriate regulator* will also advise the *firm* of what it considers to be a prudent funding profile for the *firm*. In giving the *firm individual liquidity guidance* as to its funding profile, the *appropriate regulator* will consider the extent to which the *firm's* liabilities are adequately matched by assets of appropriate maturities. Although the *appropriate regulator* may have given a *firm individual liquidity guidance*, this does not remove the need for the *firm* to monitor its *liquidity risk* profile on an ongoing basis and to consider whether it should be holding liquidity resources that are greater in amount or higher in quality, or maintaining a more prudent funding profile, than those advised in its *individual liquidity guidance*.

12.2.19

FCA PRA

G

■ BIPRU 12.5 sets out in greater detail the *appropriate regulator's ILAS* regime. ■ BIPRU 12.9 sets out in greater detail the *appropriate regulator's* process for issuing an *ILAS BIPRU firm* with *individual liquidity guidance* and its approach to monitoring a *firm's* adherence to that *guidance* or, as the case may be, to the *simplified buffer requirement*.

12.3 Liquidity risk management

12.3.1

FCA PRA

G

The approach taken in ■ BIPRU 12.3 is to set out:

- (1) overarching systems and controls provisions in relation to a *firm's* management of its *liquidity risk*;
- (2) provisions outlining the responsibilities of that *firm's governing body* and *senior managers* for the oversight of *liquidity risk*;
- (3) more detailed provisions covering a number of specific areas, including:
 - (a) pricing *liquidity risk*;
 - (b) intra-day management of liquidity;
 - (c) management of collateral;
 - (d) management of liquidity across legal entities, business lines and currencies; and
 - (e) funding diversification and market access.

12.3.2

FCA PRA

G

■ BIPRU 12.4 contains further *rules* and *guidance* on stress testing and *contingency funding plans*. These are both extensions of the overarching systems and controls provisions in ■ BIPRU 12.3. In formulating the *rules* and *guidance* in these two sections, the *appropriate regulator* has taken account of the Principles for Sound Liquidity Management and Supervision dated September 2008 issued by the Basel Committee on Banking Supervision. It is intended that the content of ■ BIPRU 12.3 and ■ BIPRU 12.4 be consistent with those Principles.

12.3.3

FCA PRA

G

■ BIPRU 12.5.4R provides that, in relation to a *standard ILAS BIPRU firm*, it must include in its *ILAA* an assessment of its compliance with the standards set out in ■ BIPRU 12.3 and ■ BIPRU 12.4, including the results of the stress tests required by the *rules* in ■ BIPRU 12.4. A *simplified ILAS BIPRU firm* is not subject to ■ BIPRU 12.5 and consequently it is not required to prepare an *ILAA*. Instead, the *rules* in ■ BIPRU 12.6 provide that such a *firm* is to carry out an *ILSA*, being alone an assessment of that *firm's* compliance with the standards set out in ■ BIPRU 12.3 and ■ BIPRU 12.4.

Overarching liquidity systems and controls requirements

12.3.4

FCA PRA

R

A *firm* must have in place robust strategies, policies, processes and systems that enable it to identify, measure, manage and monitor *liquidity risk* over an appropriate set of time horizons, including intra-day, so as to ensure that it maintains adequate levels of liquidity buffers. These strategies, policies, processes and systems must be tailored to business lines, currencies and entities and must include adequate allocation mechanisms of liquidity costs, benefits and risks.

[Note: annex V paragraph 14 of the *Banking Consolidation Directive*]

12.3.4A

FCA PRA

G

The strategies, policies, processes and systems referred to in ■ BIPRU 12.3.4 R should include those which enable it to assess and maintain on an ongoing basis the amounts, types and distribution of liquidity resources that it considers adequate to cover:

- (1) the nature and level of the *liquidity risk* to which it is or might be exposed;
- (2) the risk that the *firm* cannot meet its liabilities as they fall due; and
- (3) in the case of an *ILAS BIPRU firm*, the risk that its liquidity resources might in the future fall below the level, or differ from the quality and funding profile, of those resources advised as appropriate by the *appropriate regulator* in that *firm's individual liquidity guidance* or, as the case may, its *simplified buffer requirement*.

12.3.5

FCA PRA

R

The strategies, policies, processes and systems referred to in ■ BIPRU 12.3.4 R must be proportionate to the complexity, risk profile and scope of operation of the *firm*, and the liquidity risk tolerance set by the *firm's governing body* in accordance with ■ BIPRU 12.3.8 R, and must reflect the *firm's* importance in each *EEA State*, in which it carries on business .

[Note: annex V paragraph 14a of the *Banking Consolidation Directive*]

12.3.6

FCA PRA

A

- (1) [deleted]
- (2) [deleted]
- (3) A *firm* should ensure that its strategies, policies, processes and systems in relation to *liquidity risk* enable it to identify, measure, manage and monitor its *liquidity risk* positions for:
 - (a) all sources of contingent liquidity demand (including those arising from off-balance sheet activities);
 - (b) all currencies in which that *firm* is active; and
 - (c) correspondent, custody and settlement activities.
- (4) [deleted]
- (5) A *firm* should ensure that it has in place early warning indicators to identify immediately the emergence of increased *liquidity risk*

or vulnerabilities, including indicators that signal whether embedded triggers in funding or security arrangements such as warranties, covenants, events of default, conditions precedent or terms having similar effect are likely to, or will, be breached, occur or fail to be satisfied, or contingent risks will or are likely to crystallise, in either case with the result that access to liquidity resources may be impaired.

- (6) A *firm* should ensure that it has in place reliable management information systems to provide its *governing body*, *senior managers* and other appropriate personnel with timely and forward-looking information on the liquidity position of the *firm*.
- (7) Contravention of any of (3), (5) and (6) may be relied upon as tending to establish contravention of ■ BIPRU 12.3.4R.

12.3.7

FCA PRA

G

As well as the *rules* in ■ BIPRU 12.3 requiring a *firm* to have robust systems to enable it to identify, measure, manage and monitor *liquidity risk*, an ILAS BIPRU *firm* is also subject to obligations in ■ SUP 16 (Reporting requirements) requiring it to report quantitative data about its liquidity position to the *appropriate regulator*. That chapter of SUP sets out the applicable *data items* and the *rules* governing the frequency of their submission to the *appropriate regulator*. Absent a *firm-specific liquidity stress* or a *market liquidity stress*, the *rules* in ■ SUP 16 do not require daily (weekly for a *low frequency liquidity reporting firm* and a *simplified ILAS BIPRU firm*) reporting of *data items*. An ILAS BIPRU *firm* should, however, note that those *rules* do require that it has systems in place to ensure that it is able at all times to meet the requirements for daily (or weekly as applicable) reporting of applicable *data items* even if there is no *firm-specific liquidity stress* or *market liquidity stress* and none is expected.

Governing body and senior management oversight: liquidity risk tolerance

12.3.8

FCA PRA

R

A *firm* must ensure that:

- (1) its *governing body* establishes that *firm's liquidity risk* tolerance and that this is appropriately documented;
- (2) its *liquidity risk* tolerance is appropriate for its business strategy and reflects its financial condition and funding capacity; and
- (3) its *liquidity risk* tolerance is communicated to all relevant business lines.

[Note: annex V paragraph 14a of the *Banking Consolidation Directive*]

12.3.9

FCA PRA

G

As part of the SLRP, the *appropriate regulator* will assess the appropriateness of the *liquidity risk* tolerance adopted by an ILAS BIPRU *firm* to ensure that this risk tolerance is consistent with maintenance by the *firm* of adequate liquidity resources for the purpose of the *overall liquidity adequacy rule*. The *appropriate regulator* will expect a *firm* to provide it with an adequately reasoned explanation for the level of *liquidity risk* which that *firm's governing body* has decided it should assume. In assessing the appropriateness of the *liquidity risk* tolerance adopted by a *firm*, the

appropriate regulator will consider whether the tolerance adopted is consistent with the *firm's* satisfaction of threshold condition 2E, 3D, 4E or 5E as applicable. Consistent with the *appropriate regulator's* statutory objectives under the *Act*, in assessing the appropriateness of a *firm's* adopted *liquidity risk* tolerance the *appropriate regulator* will also have regard to the role and importance of a *firm* in the *UK financial system*.

Governing body and senior management oversight: approval and review of arrangements

12.3.10 **R** A *firm* must ensure that its *governing body* approves the *firm's* strategies, policies, processes and systems relating to the management of *liquidity risk*, including those described in ■ BIPRU 12.3.4R.
FCA **PRA**

12.3.11 **R** A *firm* must ensure that its *governing body* reviews regularly (and not less frequently than annually):

- (1) the continued adequacy of any strategies, policies, processes and systems approved in accordance with ■ BIPRU 12.3.10R; and
- (2) the *firm's liquidity risk* tolerance.

12.3.12 **R** A *firm* must ensure that its *senior managers*:

- (1) continuously review that *firm's* liquidity position, including its compliance with the *overall liquidity adequacy rule*; and
- (2) report to its *governing body* on a regular basis adequate information as to that *firm's* liquidity position and its compliance with the *overall liquidity adequacy rule* and with ■ BIPRU 12.3.4R.

12.3.13 **G** Although a *firm's senior managers* are likely to develop strategies, policies and practices for the management of that *firm's liquidity risk*, it is the responsibility of a *firm's governing body* to approve those strategies, policies and practices as adequate. In determining the adequacy of those strategies, policies and practices, a *firm's governing body* should have regard to that *firm's liquidity risk* tolerance established in accordance with ■ BIPRU 12.3.8R.
FCA **PRA**

12.3.14 **G** The *appropriate regulator* will assess the adequacy of an *ILAS BIPRU firm's* liquidity risk management framework as part of the *SLRP*.
FCA **PRA**

Pricing liquidity risk

12.3.15 **A** (1) In relation to all significant business activities, a *firm* should ensure that it accurately quantifies liquidity costs, benefits and risks and fully incorporates them into:

- (a) product pricing;
- (b) performance measurement and incentives; and
- (c) the approval process for new products.

FCA **PRA**

- (2) For the purposes of (1), a *firm* should ensure that it:
 - (a) includes significant business activities whether or not they are accounted for on-balance sheet; and
 - (b) carries out the exercise of quantification and incorporation both in normal financial conditions and under the stresses required by ■ BIPRU 12.4.1R.
- (3) A *firm* should ensure that the liquidity costs, benefits and risks are clearly and transparently attributed to business lines and are understood by business line management.
- (4) Contravention of any of (1), (2) or (3) may be relied upon as tending to establish contravention of ■ BIPRU 12.3.4R.

12.3.16

FCA PRA

G

The incorporation of liquidity pricing into a *firm's* processes assists in aligning the risk-taking incentives of individual business lines within that *firm* with the *liquidity risk* to which the *firm* as a whole is exposed as a result of their activities. It is important that all significant business activities are addressed, including activities which involve the creation of contingent exposures which may not have an immediate balance sheet impact.

Intra-day management of liquidity

12.3.17

FCA PRA

R

A *firm* must actively manage its intra-day liquidity positions and any related risks so that it is able to meet its payment and settlement obligations on a timely basis.

12.3.18

FCA PRA

G

In complying with ■ BIPRU 12.3.17R, a *firm* should take into account all obligations arising from its acting as a custodian, a correspondent bank or a settlement agent.

12.3.19

FCA PRA

R

For the purposes of ■ BIPRU 12.3.17R, a *firm* must ensure that:

- (1) **it is able to meet its payment and settlement obligations on a timely basis under both normal financial conditions and under the stresses required by ■ BIPRU 12.4.1R; and**
- (2) **its arrangements for the management of intra-day liquidity enable it to identify and prioritise the most time-critical payment and settlement obligations.**

12.3.20

FCA PRA

G

The *appropriate regulator* considers that a *firm's* ability to meet its payment and settlement obligations on an intra-day basis is important not just for that *firm*, but also for the liquidity position of that *firm's* counterparties and for the smooth functioning of payment and settlement systems as a whole.

12.3.21

FCA PRA

A

- (1) A *firm* should ensure that its intra-day liquidity management arrangements enable it, in relation to the markets in which it is

active and the currencies in which it has significant positions, to:

- (a) measure expected daily gross liquidity inflows and outflows, anticipate the intra-day timing of these flows where possible, and forecast the range of potential net funding shortfalls that might arise at different points during the day;
- (b) monitor its intra-day liquidity positions against expected activities and available resources;
- (c) identify gross liquidity inflows and outflows attributable to any correspondent, custodian or settlement agency services provided by that *firm*;
- (d) manage the timing of its liquidity outflows such that priority is given to that *firm's* most time-critical obligations;
- (e) deal with unexpected disruptions to its intra-day liquidity flows;
- (f) acquire sufficient intra-day funding such that it is able to meet its most time-critical obligations when expected and other less time-critical obligations as soon as possible thereafter; and
- (g) manage and mobilise collateral as necessary for the purposes of achieving the aim in (f).

- (2) Contravention of any of (1)(a) to (g) may be relied upon as tending to establish contravention of ■ BIPRU 12.3.4R.

Management of collateral

12.3.22

FCA PRA

R

A *firm* must actively manage its collateral positions.

12.3.22A

FCA PRA

R

A *firm* must distinguish between pledged and unencumbered assets that are available at all times, in particular during emergency situations. A *firm* must also take into account the legal entity in which assets reside, the country where assets are legally recorded either in a register or in an account as well as their eligibility and must monitor how assets can be mobilised in a timely manner.

[Note: annex V paragraph 16 of the *Banking Consolidation Directive*]

12.3.22B

FCA PRA

R

A *firm* must also have regard to existing legal, regulatory and operational limitations to potential transfers of liquidity and unencumbered assets amongst entities, both within and outside the *EEA*.

[Note: annex V paragraph 17 of the *Banking Consolidation Directive*]

12.3.23

FCA PRA

R

For the purposes of ■ BIPRU 12.3.22R, a *firm* must, in relation to all currencies in which it has significant positions and all jurisdictions in which it carries on significant business activities, ensure that it:

- (1) can calculate all of its collateral positions, including assets currently provided as collateral, relative to the total amount of security required;
- (2) can calculate the amount of unencumbered assets available to it to be provided as collateral;
- (3) can mobilise collateral in a timely manner;
- (4) monitors the location of available collateral;
- (5) takes into account the extent to which counterparties with which it has deposited collateral may have re-hypothecated that collateral;
- (6) has access to adequately diversified sources of collateral;
- (7) assesses the eligibility of each major asset class that it holds for use as collateral with central banks;
- (8) assesses on an ongoing basis the acceptability of its assets to major counterparties and providers of funds in secured funding markets; and
- (9) monitors and manages the impact that the terms of existing funding or security arrangements, such as warranties, covenants, events of default, negative pledges and cross default clauses could have on its ability to mobilise collateral including for use in borrowing under any central bank facility (in particular, emergency liquidity assistance on a secured basis).

12.3.24

FCA PRA

G

For the purposes of ■ BIPRU 12.3.23R (8) and ■ (9), a *firm* should take into account the impact of the stresses that it conducts under ■ BIPRU 12.4.1R on the requirements which may be imposed on the provision of its assets as collateral (for example, haircuts) and also the availability of funds from private counterparties during such periods of stress.

12.3.25

FCA PRA

A

- (1) A *firm* should ensure that its arrangements for the management of *liquidity risk*:
 - (a) enable it to monitor shifts between intra-day and overnight or term collateral usage;
 - (b) enable it to appropriately adjust its calculation of available collateral to account for assets that are part of a tied hedge;

- (c) include adequate consideration of the potential for uncertainty around, or disruption to, intra-day asset flows; and
- (d) take into account the potential for additional collateral requirements under the terms of contracts governing existing collateral positions (for example, as a result of a deterioration in its own credit rating).

(2) Contravention of any of (1)(a) to (d) may be relied upon as tending to establish contravention of ■ BIPRU 12.3.4 R.

Managing liquidity across legal entities, business lines and currencies

12.3.26

FCA PRA

R

In complying with ■ BIPRU 12.3.4 R, a *firm* must ensure that:

- (1) it actively manages its *liquidity risk* exposures and related funding needs; and
- (2) it takes into account:
 - (a) the impact on its own liquidity position of its forming part of a *group*;
 - (b) the need to manage the liquidity position of individual business lines in addition to that of the *firm* as a whole; and
 - (c) the *liquidity risk* arising from its taking positions in foreign currencies; and
- (3) where it forms part of a *group*, it understands and has regard to any legal, regulatory, operational or other constraints on the transferability to it of funds and collateral by other entities in that *group*.

12.3.27

FCA PRA

R

A *firm* must develop methodologies for the identification, measurement, management and monitoring of funding positions. Those methodologies must include the current and projected material cash-flows in and arising from assets, liabilities, off-balance-sheet items, including contingent liabilities and the possible impact of reputational risk.

[Note: annex V paragraph 15 of the *Banking Consolidation Directive*]

12.3.28

FCA PRA

G

In its *liquidity risk* management plans, a *firm* should identify clearly its assumptions regarding the transferability of funds and collateral. A *firm* should expect that the *appropriate regulator* will scrutinise those assumptions.

Funding diversification and market access

12.3.29

FCA PRA

R

In complying with ■ BIPRU 12.3.4 R, a *firm* must ensure that it has access to funding which is adequately diversified, both as to source and tenor.

12.3.30
FCA PRA

R A *firm* must ensure that its *governing body*:

- (1) is aware of the composition, characteristics and degree of diversification of its assets and funding sources; and
- (2) regularly reviews its funding strategy in the light of any changes in the environment in which it operates.

12.3.31
FCA PRA

G

Funding diversification should not be considered an end in its own right. Rather, the purpose of diversification is to ensure that a *firm* has in place alternative sources of funding that strengthen its capacity to withstand a variety of severe yet plausible institution-specific and market-wide liquidity shocks.

12.3.32
FCA PRA

A

- (1) A *firm* should ensure that funding diversification is taken into account in that *firm's* business planning process.
- (2) A *firm* should ensure that its funding arrangements take into account correlations between market conditions and the ability to access funds from different sources.
- (3) A *firm* should ensure that in establishing adequate diversification it sets limits on its funding according to the following variables:
 - (a) maturity;
 - (b) nature of depositor or counterparty;
 - (c) levels of secured and unsecured funding;
 - (d) instrument type;
 - (e) securitisation vehicle;
 - (f) currency; and
 - (g) geographic market.
- (4) A *firm* should ensure that it maintains an ongoing presence in its chosen funding markets and strong relationships with its chosen providers of funds.
- (5) A *firm* should regularly test its capacity to raise funds quickly from its chosen funding sources to provide short, medium and long-term liquidity.
- (6) A *firm* should ensure that its *senior managers* identify the main factors that affect its ability to raise funds and should monitor those factors closely to ensure that their estimates of fund raising capacity remain valid.
- (7) Contravention of any of (1) to (6) may be relied upon as tending to establish contravention of **■** BIPRU 12.3.4 R.

12.4 Stress testing and contingency funding

12.4.-2

FCA PRA

R

A *firm* must consider different liquidity risk mitigation tools, including a system of limits and liquidity buffers in order to be able to withstand a range of different stress events and an adequately diversified funding structure and access to funding sources. Those arrangements must be reviewed regularly.

[Note: annex V paragraph 18 of the *Banking Consolidation Directive*]

Stress testing

12.4.-1

FCA PRA

R

A *firm* must consider alternative scenarios on liquidity positions and on risk mitigants and must review regularly the assumptions underlying decisions concerning the funding position. For these purposes, alternative scenarios must address, in particular, off-balance sheet items and other contingent liabilities, including those of *securitisation special purpose entities (SSPEs)* or other special purpose entities, in relation to which the *firm* acts as *sponsor* or provides material liquidity support.

[Note: annex V paragraph 19 of the *Banking Consolidation Directive*]

12.4.1

FCA PRA

R

In order to ensure compliance with the *overall liquidity adequacy rule* and with ■ BIPRU 12.3.4R and ■ BIPRU 12.4.-1 R , a *firm* must:

- (1) conduct on a regular basis appropriate stress tests so as to:
 - (a) identify sources of potential liquidity strain;
 - (b) ensure that current liquidity exposures continue to conform to the *liquidity risk* tolerance established by that *firm's governing body*; and
 - (c) identify the effects on that *firm's* assumptions about pricing; and
- (2) analyse the separate and combined impact of possible future liquidity stresses on its:
 - (a) cash flows;
 - (b) liquidity position;

(c) profitability; and

(d) solvency.

12.4.2

FCA PRA

R

In accordance with ■ BIPRU 12.3.11R, ■ BIPRU 12.4.-2 R and ■ BIPRU 12.4.-1 R, a *firm* must ensure that its *governing body* reviews regularly the stresses and scenarios tested to ensure that their nature and severity remain appropriate and relevant to that *firm*.

12.4.3

FCA PRA

G

Consistent with ■ BIPRU 12.3.5R, the *appropriate regulator* expects that the extent and frequency of such testing, as well as the degree of regularity of *governing body* review under ■ BIPRU 12.4.2R, should be proportionate to the nature scale and complexity of a *firm's* activities, as well as to the size of its liquidity risk exposures. Consistent with the *appropriate regulator's* statutory objectives under the *Act*, in assessing the adequacy of a *firm's* stress testing arrangements (including their frequency and the regularity of *governing body* review) the *appropriate regulator* will also have regard to the role and importance of that *firm* in the *UK financial system*. The *appropriate regulator* will, however, expect stress testing and *governing body* review to be carried out no less frequently than annually. The *appropriate regulator* expects that a *firm* will build into its stress testing arrangements the capability to increase the frequency of those tests in special circumstances, such as in volatile market conditions or where requested by the *appropriate regulator*.

12.4.4

FCA PRA

G

For the purposes of ■ BIPRU 12.4.2R, a review should take into account:

- (1) changes in market conditions;
- (2) changes in the nature, scale or complexity of the *firm's* business model and activities; and
- (3) the *firm's* practical experience in periods of stress.

12.4.5

A

(1) [deleted]

(2) [deleted]

12.4.5A

FCA PRA

R

A *firm* must consider the potential impact of institution-specific, market-wide and combined alternative scenarios. Different time horizons and varying degrees of stressed conditions must be considered.

[Note: annex V paragraph 20 of the *Banking Consolidation Directive*]

12.4.6

FCA PRA

G

The *appropriate regulator* expects every *firm*, including a *firm* with an apparently strong liquidity profile, to consider the potential impact of severe stress scenarios.

12.4.7

FCA PRA

G

In conducting its stress testing, a *firm* should also, where relevant, consider the impact of its chosen stresses on the appropriateness of its assumptions relating to:

- (1) correlations between funding markets;
- (2) the effectiveness of diversification across its chosen sources of funding;

- (3) additional margin calls and collateral requirements;
- (4) contingent claims, including potential draws on committed lines extended to third parties or to other entities in that *firm's group*;
- (5) liquidity absorbed by off-balance sheet vehicles and activities (including conduit financing);
- (6) the transferability of liquidity resources;
- (7) access to central bank market operations and liquidity facilities;
- (8) estimates of future balance sheet growth;
- (9) the continued availability of market liquidity in a number of currently highly liquid markets;
- (10) ability to access secured and unsecured funding (including retail *deposits*);
- (11) currency convertibility; and
- (12) access to payment or settlement systems on which the *firm* relies.

12.4.8

FCA	PRA
-----	-----

- (1) A *firm* should ensure that the results of its stress tests are:
 - (a) reviewed by its *senior managers*;
 - (b) reported to that *firm's governing body*, specifically highlighting any vulnerabilities identified and proposing appropriate remedial action;
 - (c) reflected in the processes, strategies and systems established in accordance with ■ BIPRU 12.3.4R;
 - (d) used to develop effective *contingency funding plans*;
 - (e) integrated into that *firm's* business planning process and day-to-day risk management; and
 - (f) taken into account when setting internal limits for the management of that *firm's liquidity risk* exposure.
- (2) Contravention of any of (1)(a) to (f) may be relied upon as tending to establish contravention of ■ BIPRU 12.3.4 R.

12.4.9

FCA	PRA
-----	-----

A *firm* must ensure that the results of its stress tests are reported to the *appropriate regulator* in a timely manner.

Contingency funding plans

12.4.10

FCA	PRA
-----	-----

A *firm* must adjust its strategies, internal policies and limits on *liquidity risk* and develop an effective *contingency funding plan*, taking into account the outcome of the alternative scenarios referred to in ■ BIPRU 12.4.-1 R.

12.4.11

FCA PRA

R

[Note: annex V paragraph 21 of the *Banking Consolidation Directive*]

In order to deal with liquidity crises, a *firm* must have in place contingency plans setting out adequate strategies and proper implementation measures in order to address possible liquidity shortfalls. Those plans must be regularly tested, updated on the basis of the outcome of the alternative scenarios set out in ■ BIPRU 12.4.-1 R, and be reported to and approved by the *firm's governing body*, so that internal policies and processes can be adjusted accordingly.

12.4.12

FCA PRA

G

[Note: annex V paragraph 22 of the *Banking Consolidation Directive*]

A *contingency funding plan* sets out a *firm's* strategies for addressing liquidity shortfalls in emergency situations. Its aim should be to ensure that, in each of the stresses required by ■ BIPRU 12.4.1R, it would still have sufficient liquidity resources to ensure that it can meet its liabilities as they fall due.

12.4.13

FCA PRA

R

A *firm* must ensure that its *contingency funding plan*:

- (1) outlines strategies, policies and plans to manage a range of stresses;
- (2) establishes a clear allocation of roles and clear lines of management responsibility;
- (3) is formally documented;
- (4) includes clear invocation and escalation procedures;
- (5) is regularly tested and updated to ensure that it remains operationally robust;
- (6) outlines how that *firm* will meet time-critical payments on an intra-day basis in circumstances where intra-day liquidity resources become scarce;
- (7) outlines that *firm's* operational arrangements for managing a retail funding run;
- (8) in relation to each of the sources of funding identified for use in emergency situations, is based on a sufficiently accurate assessment of:
 - (a) the amount of funding that can be raised from that source; and
 - (b) the time needed to raise funding from that source;
- (9) is sufficiently robust to withstand simultaneous disruptions in a range of payment and settlement systems;

12.4.14

FCA PRA

(10) outlines how that *firm* will manage both internal communications and those with its external stakeholders; and

(11) establishes mechanisms to ensure that the *firm's governing body* and *senior managers* receive management information that is both relevant and timely.

(1) In designing a *contingency funding plan* a *firm* should ensure that it takes into account:

- (a) the impact of stressed market conditions on its ability to sell or securitise assets;
- (b) the impact of extensive or complete loss of typically available market funding options;
- (c) the financial, reputational and any other additional consequences for that *firm* arising from the execution of the *contingency funding plan* itself;
- (d) its ability to transfer liquid assets having regard to any legal, regulatory or operational constraints; and
- (e) its ability to raise additional funding from central bank market operations and liquidity facilities.

(2) Contravention of any of (1)(a) to (e) may be relied upon as tending to establish contravention of ■ BIPRU 12.3.4R.

12.4.15

FCA PRA

A *firm* should ensure that its *contingency funding plan* takes into account the terms and conditions of any central bank liquidity facilities to which it has access, including both facilities that form part of normal liquidity management operations and emergency liquidity assistance on a secured basis. Where a *firm* includes in its *contingency funding plan* the use of central bank liquidity facilities it should consider the nature of those facilities, collateral eligibility, haircuts to which its collateral might be subject, terms in its existing or available funding arrangements which might impact its ability to access central bank facilities, operational arrangements for accessing those facilities and the potential reputational consequences for that *firm* in accessing them. In formulating its *contingency funding plan*, a *firm* should not rely on expectations it may have about future changes to central bank facilities, either in relation to their normal liquidity management operations or in relation to the availability of specific liquidity facilities in exceptional circumstances.

12.4.16

FCA PRA

The *appropriate regulator* expects that a *firm's contingency funding plan* will encompass a range of actions that the *firm* might take in anticipation of or in response to changes in its funding position. These changes could result from either *firm*-specific or general developments. The *appropriate regulator* anticipates that different actions in a *contingency funding plan* would be taken at different stages of a developing situation.

12.5 Individual Liquidity Adequacy Standards

Individual Liquidity Adequacy Assessment

12.5.1

FCA PRA

R

This section applies to a *standard ILAS BIPRU firm*.

12.5.2

FCA PRA

R

A *firm* must carry out an individual liquidity adequacy assessment (*ILAA*) in accordance with this section.

12.5.3

FCA PRA

G

In conducting its *ILAA*, a *firm* is obliged to comply with the stress testing and related requirements which appear in this section. The *rules* in this section also provide that in its *ILAA* a *firm* must include an assessment of the *firm's* compliance with the standards set out in ■ BIPRU 12.3 and ■ BIPRU 12.4.

12.5.4

FCA PRA

R

A *firm* must ensure that:

- (1) it regularly carries out an *ILAA*;
- (2) it makes a written record of its *ILAA*;
- (3) its *ILAA* is proportionate to the nature, scale and complexity of its activities;
- (4) its *ILAA* takes into account whole-*firm* and *group*-wide liquidity resources only to the extent that reliance on these is permitted by the *appropriate regulator*;
- (5) its *ILAA* includes an assessment of the results of the stress tests required by ■ BIPRU 12.5.6 R; and
- (6) its *ILAA* includes an assessment of the *firm's* compliance with ■ BIPRU 12.3 and ■ BIPRU 12.4, including the results of the stress tests required by the rules in ■ BIPRU 12.4.

12.5.5

FCA PRA

G

A *firm* should carry out an *ILAA* at least annually, or more frequently if changes in its business or strategy or the nature, scale or complexity of its activities or the operational environment suggest that the current level of liquidity resources is no longer adequate. A *firm* should expect that its usual supervisory contact at the *appropriate regulator* will ask for the *ILAA* to be submitted as part of the ongoing supervisory process.

12.5.6

FCA PRA

R

A *firm* must ensure that in carrying out its *ILAA* it considers how that *firm's* liquidity resources change as a result of:

- (1) the stress in ■ BIPRU 12.5.8 R (the first liquidity stress);
- (2) the stress in ■ BIPRU 12.5.11 R (the second liquidity stress); and
- (3) the first and second liquidity stresses occurring simultaneously.

ILAA stresses

12.5.7

FCA PRA

G

The *appropriate regulator* will review the results of a *firm's* *ILAA*, including the results of the stress tests required by ■ BIPRU 12.5.6R, as part of its *Supervisory Liquidity Review Process (SLRP)*. The *appropriate regulator's* review of the stress test results will assist it assessing the adequacy of a *firm's* liquidity resources relative to other *ILAS BIPRU firms* and, consequently, in calibrating the *individual liquidity guidance* that it gives to that *firm*. ■ BIPRU 12.9.2G sets out the *appropriate regulator's* approach to assessing the adequacy of a *firm's* liquidity resources and indicates that, among other factors, it will have regard to the *firm's* *ILAA*. It is not, therefore, the case that the amount of liquidity resources advised to the *firm* as being adequate in its *individual liquidity guidance* will necessarily equate to the amount needed to meet its liabilities as they fall due in the stresses required by ■ BIPRU 12.5.6R. The *appropriate regulator* will assess the adequacy of a *firm's* liquidity resources on a case-by-case basis and, accordingly, the amount of liquidity resources judged as adequate in the *firm's* *individual liquidity guidance* might be either above or below the amount needed to survive the stresses required by ■ BIPRU 12.5.6R.

First liquidity stress

12.5.8

FCA PRA

R

The first liquidity stress to which ■ BIPRU 12.5.6R refers is an unforeseen, name-specific, liquidity stress in which:

- (1) financial market participants and retail depositors consider that in the short-term the *firm* will be or is likely to be unable to meet its liabilities as they fall due;
- (2) the *firm's* counterparties reduce the amount of intra-day credit which they are willing to extend to it;
- (3) the *firm* ceases to have access to foreign currency spot and *swap* markets; and
- (4) over the longer-term the *firm's* obligations linked to its credit rating crystallise as a result of a reduction in that credit rating.

12.5.9

FCA PRA

R

For the purpose of ■ BIPRU 12.5.8R (1) to ■ (3), a *firm* must assume that the initial, short-term, period of stress lasts for at least two weeks.

12.5.10

FCA PRA

G

For the purpose of ■ BIPRU 12.5.8R (4), a *firm* should consider the effect of credit rating downgrades of varying degrees of severity. In doing so, it should also consider the cumulative effect of successive credit rating downgrades to its long-term credit rating.

12.5.11

FCA PRA

R

The second liquidity stress to which ■ BIPRU 12.5.6R refers is an unforeseen, market-wide liquidity stress of three *months* duration.

12.5.12

FCA PRA

R

For the purpose of ■ BIPRU 12.5.11R, a *firm* must assume that the second liquidity stress is characterised by:

- (1) uncertainty as to the accuracy of the valuation attributed to that *firm's* assets and those of its counterparties;
- (2) inability to realise, or ability to realise only at excessive cost, particular classes of assets, including those which represent claims on other participants in the financial markets or which were originated by them;
- (3) uncertainty as to the ability of a significant number of *firms* to ensure that they can meet their liabilities as they fall due; and
- (4) risk aversion among participants in the markets on which the *firm* relies for funding.

ILAA methodology

12.5.13

FCA PRA

R

In carrying out the liquidity stresses required by ■ BIPRU 12.5.6R, a *firm* must:

- (1) analyse each of the sources of risk identified in ■ BIPRU 12.5.14R;
- (2) record the evidence which supports any behavioural assumptions that it makes in carrying out those stress tests;
- (3) record the evidence which supports its assessment of the adequacy of its liquid assets buffer; and
- (4) identify those of the measures set out in its *contingency funding plan* that it would implement.

12.5.14

FCA PRA

R

The sources of risk referred to in ■ BIPRU 12.5.13R are:

- (1) wholesale secured and unsecured funding risk;
- (2) retail funding risk;
- (3) intra-day *liquidity risk*;
- (4) intra-group *liquidity risk*;
- (5) cross-currency *liquidity risk*;

- (6) off-balance sheet *liquidity risk*;
- (7) franchise-viability risk;
- (8) marketable assets risk;
- (9) non-marketable assets risk; and
- (10) funding concentration risk.

Wholesale secured and unsecured funding risk

12.5.15

FCA PRA

R

For the purpose of assessing its wholesale funding risk, a *firm* must estimate the gross wholesale outflows that could occur under the liquidity stresses required by ■ BIPRU 12.5.6R.

12.5.16

FCA PRA

R

In assessing its wholesale funding risk, a *firm* must:

- (1) identify its wholesale liabilities;
- (2) determine how those liabilities behave under normal financial conditions;
- (3) assess how they will behave under the stresses required by ■ BIPRU 12.5.6R; and
- (4) divide its wholesale liabilities into funding which the *firm* assesses as having a higher than average likelihood of withdrawal in response to actual or perceived changes in the *firm's* credit-worthiness (Type A wholesale funding) and other funding (Type B wholesale funding).

12.5.17

FCA PRA

G

In assessing how its liabilities behave under stress, the *firm* should categorise its liabilities according to value, maturity and estimated speed of outflow. The *firm* should bear in mind that wholesale funding risk may crystallise as an acute loss of funds in the short term, or as a longer-term gradual leakage of funds, or as both.

12.5.18

FCA PRA

G

In the *appropriate regulator's* view, Type A wholesale funding is likely to include at least funding which:

- (1) is accepted from a *credit institution*, local authority, *insurance undertaking*, pension fund, money market fund, asset manager (including a hedge fund manager), government-sponsored agency, sovereign government, or sophisticated non-financial corporation; or
- (2) is accepted through the treasury function of a sophisticated non-financial corporation which may be assumed to respond swiftly to negative news about a *firm's* credit-worthiness; or
- (3) is accepted on wholesale market terms as a part of a *firm's* money market operations; or

- (4) is accepted from a depositor with whom a *firm* does not have a long-established relationship or to whom a *firm* does not supply a range of services; or
- (5) is accepted from overseas counterparties (other than those in the country or territory of incorporation of a *firm's parent undertaking* or, in the case of a *UK branch*, of the *firm* of which it forms part); or
- (6) is obtained through unsecured debt instruments (such as certificates of deposit, medium-term notes and commercial paper); or
- (7) is not obtained through *repo* against assets of the type described in ■ BIPRU 12.7.2R (1) or ■ BIPRU 12.7.2R (2); or
- (8) is obtained from counterparties with a relatively low creditor seniority on the liquidation of the *firm*.

12.5.19

FCA PRA

R

For the purpose of ■ BIPRU 12.5.15R, a *firm* must assume that it is unable to roll any of its Type A wholesale funding in the first two weeks of the stresses.

Retail funding risk

12.5.20

FCA PRA

R

In this part of ■ BIPRU 12.5, retail funding is funding that is accepted from a *consumer*.

12.5.21

FCA PRA

R

For the purpose of assessing its retail funding risk, a *firm* must:

- (1) estimate the gross retail outflows that could occur under the liquidity stresses required by ■ BIPRU 12.5.6R;
- (2) identify the stress, or combination of stresses, to which it considers its retail funding to be most vulnerable and estimate the gross retail outflows that could occur under that stress or combination of stresses; and
- (3) divide its retail funding into funding which the *firm* assesses as having a higher than average likelihood of withdrawal in response to actual or perceived changes in the *firm's* credit-worthiness (Type A retail funding) and other funding (Type B retail funding).

12.5.22

FCA PRA

G

In general, the *appropriate regulator* expects a *firm's* retail funding to be less responsive than its wholesale funding to actual or perceived changes in the *firm's* credit-worthiness. However, a *firm* should nevertheless make its own assessment of the relative responsiveness of its wholesale and retail funding.

12.5.23

FCA PRA

G

For the purposes of assessing behaviour under stress, a *firm* should categorise its retail liabilities according to: value, maturity, estimated speed of outflow, product type, interest rate applied and any other factor that it considers relevant to its retail *deposit* structure.

12.5.24

FCA PRA

G

A *firm* should also be mindful that its retail funding profile is unlikely to be constant. In carrying out its *ILAA*, a *firm* should have regard to any changes to its retail funding profile since the previous *ILAA* and also to the possible impact of any future changes on its ability to maintain retail funding during periods of stress. In its *ILAA* submission to the *appropriate regulator*, a *firm* should include an analysis of:

- (1) its retail funding profile as at the date of its *ILAA*;
- (2) its retail funding profile over the twelve *months* preceding its *ILAA*;
- (3) its projected retail funding profile over the twelve *months* following the date of its *ILAA*; and
- (4) its approach to assessing which of its retail funding it has classed as Type A retail funding and which as Type B retail funding.

12.5.25

FCA PRA

G

In the *appropriate regulator's* view Type A retail funding is likely to include at least funding which:

- (1) has been accepted through the internet; or
- (2) is considered to have a more than average sensitivity to interest rate changes (such as a *deposit* whose acceptance can reasonably be attributed to the use of price-focused advertising by the *firm* accepting the *deposit*); or
- (3) in relation to any individual depositor exceeds to a significant extent the amount of that individual's *deposits* with the accepting *firm* that are covered by a national deposit guarantee scheme; or
- (4) is not accepted from a depositor with whom the *firm* has had a long relationship; or
- (5) is accepted from retail depositors who can access their *deposits* before their residual contractual maturity subject to a loss of interest or payment of another form of early access charge (as a general proposition, the behaviour of liabilities to retail depositors is likely to depend in part on the contractual terms and conditions which give rise to those liabilities); or
- (6) is not held in an account which is maintained for transactional purposes.

Intra-day liquidity risk

12.5.26

FCA PRA

R

For the purpose of assessing its intra-day *liquidity risk* arising from its direct participation in a payment or settlement system, a *firm* must in relation to each such system in which it participates:

- (1) calculate on an intra-day basis the net amounts of collateral and cash required by that *firm* to fund participation in that system; and
- (2) estimate how the amounts in (1) could change under the liquidity stresses required by ■ BIPRU 12.5.6 R.

- 12.5.27** **G** For the purpose of calculating the net amounts of collateral and cash under **■ BIPRU 12.5.26R**, a *firm* should separately analyse:
- FCA PRA**
- (1) the amounts of collateral and cash needed in relation to both its own payments and those of its customers; and
 - (2) the intra-day timing of the payment of cash and the posting of the collateral, including the time at which the demand for its collateral and cash is greatest.
- 12.5.28** **G** For the purpose of **■ BIPRU 12.5.26R**, a *firm* should ensure that it takes into account, in both normal financial conditions and in periods of stress, the effect of:
- FCA PRA**
- (1) other participants in a payment system withholding some or all of the payments expected from them; and
 - (2) its customers increasing either or both the volume and value of their payments.
- 12.5.29** **R** At the same time as it carries out the calculation and estimation in **■ BIPRU 12.5.26 R**, a *firm* which participates directly in one or more payment or settlement systems must also estimate the impact on its liquidity position of the customer to which it has the largest intra-day credit exposure defaulting on its payment obligations to the *firm*:
- FCA PRA**
- (1) under normal financial conditions; and
 - (2) under the stresses required by **■ BIPRU 12.5.6 R**.
- 12.5.30** **G** For the purpose of **■ BIPRU 12.5.29R**, a *firm* should assume that the effect of that default is that the exposure is rolled overnight.
- FCA PRA**
- 12.5.31** **R** A *firm* must, as part of its *ILAA* submission to the *appropriate regulator* :
- FCA PRA**
- (1) identify those payment and settlement systems in which it is a direct participant; and
 - (2) provide details of the intra-day credit policies that it applies, including the criteria against which it sets credit limits, when extending credit to a customer which is not a direct participant in the payment or settlement system in question.
- 12.5.32** **G** For the purpose of **■ BIPRU 12.5.31R**, the *appropriate regulator* would expect a *firm*, in relation to each payment or settlement system in which it participates directly, to provide details of:
- FCA PRA**
- (1) that *firm's* charges for providing intra-day credit;
 - (2) any collateral requirements which it applies to its customers;

- (3) the credit limits that it imposes (and the circumstances, if any, in which credit may be provided notwithstanding a limit breach);
- (4) the extent to which the customers of that *firm* make use of the credit extended to them; and
- (5) where relevant, the points during the day at which a customer is required to settle, or provide assets as collateral to cover, that *firm*'s credit exposure to it.

12.5.33

FCA PRA

R

■ BIPRU 12.5.34R applies to a *firm* which:

- (1) is not a direct participant in a given payment or settlement system;
- (2) is a customer of a *firm* that is a direct participant in such a system for the purposes of gaining access to that system; and
- (3) receives intra-day credit from that participant *firm* or prefunds its account with such a *firm*.

12.5.34

FCA PRA

R

For the purpose of assessing its intra-day *liquidity risk* a *firm* to which ■ BIPRU 12.5.33R applies must assess the effect on its own position of a participant *firm* from which it receives intra-day credit or with which it has a prefunded account being unable to perform its obligations to that *firm*:

- (1) under normal financial conditions; and
- (2) under the stresses required by ■ BIPRU 12.5.6 R.

12.5.35

FCA PRA

G

As part of its *ILAA* submission to the *appropriate regulator*, a *firm* to which ■ BIPRU 12.5.33R applies should include:

- (1) details of any alternative arrangements that it has in place to ensure that it continues to be able to meet its liabilities as they fall due in the circumstances set out in ■ BIPRU 12.5.34R; and
- (2) details of the policies governing the use of intra-day credit provided to it by a *firm* which is a direct participant in a given payment or settlement system, including details of the criteria against which that participant will decide whether to reduce or cease the provision of intra-day credit.

Intra-group liquidity risk

12.5.36

FCA PRA

R

Where a *firm* has an *intra-group liquidity modification* permitting it to rely on liquidity from other members of its *group* in order to satisfy the *overall liquidity adequacy rule*, or may be exposed to calls on its own liquidity resources from others in its *group*, then in assessing its *intra-group liquidity risk* it must:

- (1) take into account:

- (a) the extent to which it and other entities in its *group* have access to central bank funding;
 - (b) in relation to any *group* entity on which a *firm* relies for liquidity support, the legal and regulatory regime to which that entity is subject, in particular that covering liquidity regulation; and
 - (c) the contractual arrangements governing any agreed forms of intra-*group* liquidity support (including committed funding lines); and
- (2) assume that in periods of stress, *group* entities will not repay loans or *deposits* made by the *firm* to them, but that the *firm* will meet its liabilities that fall due to other *group* entities during the period of the relevant stress.

12.5.37

FCA PRA

G

For the purpose of ■ BIPRU 12.5.36R, a *firm* should consider the full range of legal and regulatory restrictions on the availability to it of liquidity support from other members of its *group*. A *firm* should ensure that it understands restrictions in force in other jurisdictions, as well as the potential for such restrictions to be imposed in the future, as to the allowable size of intra-*group* exposures. A *firm* should also consider the circumstances in which it may find itself obliged to transfer liquidity resources to other entities in its *group*.

12.5.38

FCA PRA

R

In relation to an *incoming EEA firm* or *third country BIPRU firm* which does not have a *whole-firm liquidity modification*, that *firm* must assess the risk that its *UK branch* may be exposed to calls on liquidity under its control from its head office:

- (1) in normal financial conditions; and
- (2) under the liquidity stresses required by ■ BIPRU 12.5.6 R.

12.5.39

FCA PRA

G

In complying with ■ BIPRU 12.5.38R a *firm* is therefore assessing its exposure to inter-office *liquidity risk*, rather than intra-*group liquidity risk*. It is the *appropriate regulator's* assessment of the *firm's* inter-office *liquidity risk* that is one of the factors that will inform the *appropriate regulator's* decision as to the appropriate size for the *firm's* local operational liquidity reserve (as described in ■ BIPRU 12.2).

Cross-currency liquidity risk

12.5.40

FCA PRA

R

For the purpose of assessing its cross-currency *liquidity risk*, a *firm* must:

- (1) in relation to each currency in which it has significant positions, calculate its gross outflows and gross inflows having regard to their respective maturities;

- (2) where it identifies a net outflow in (1), assess how it will fund that outflow; and
- (3) estimate how the amounts in (1) and the assessment in (2) could change under the liquidity stresses required by ■ BIPRU 12.5.6R.

12.5.41

FCA PRA

R

A *firm* must, as part of its *ILAA* submission to the *appropriate regulator*, in relation to each currency in which it has significant positions:

- (1) identify the type of financial instruments which that firm uses to raise funding in that currency;
- (2) identify the main counterparties which provide funding to that *firm* in that currency; and
- (3) describe the arrangements that it has in place to fund net outflows in that currency on a timely basis.

Off-balance sheet liquidity risk

12.5.42

FCA PRA

R

For the purpose of assessing its off-balance sheet *liquidity risk*, a *firm* must:

- (1) identify all off-balance sheet activities that might affect its cash flows;
- (2) calculate the effect on its cash flows of those activities in normal financial conditions; and
- (3) estimate the effect on its cash flows of those activities under the liquidity stresses required by ■ BIPRU 12.5.6R.

12.5.43

FCA PRA

R

For the purpose of ■ BIPRU 12.5.42R, a *firm* must take into account the circumstances in which it may choose to provide liquidity support in respect of its off-balance sheet activities beyond its contractual obligations (if any) to do so.

12.5.44

FCA PRA

R

For the purpose of ■ BIPRU 12.5.42R, a *firm* must in particular consider the impact on its cash flows of:

- (1) *derivatives* positions;
- (2) contingent liabilities;
- (3) commitments given; and
- (4) liquidity facilities to support securitisation programmes.

12.5.45

FCA PRA

G

In relation to *derivatives* positions, a *firm* should:

- (1) assess the effect on its cash flows arising from the maturity, exercise and repricing of *derivatives* in which it holds a position, including the impact of counterparties:
 - (a) who may require the posting of additional margin or collateral in the event of a decline in that *firm's* credit rating;
 - (b) who may require the posting of additional margin or collateral (or the return to them of margin or collateral) in the event of a change in the value of a *derivative* or of the posted collateral;
 - (c) who (in the case of those that are any of a *recognised investment exchange*, a *designated investment exchange* or a *recognised clearing house*) may require the posting of additional margin in volatile market conditions;
 - (d) who may choose to terminate an *OTC derivative* which they have entered into with the *firm* rather than post additional margin or collateral;
 - (e) who, in periods of name-specific liquidity stress experienced by the *firm*, may choose to terminate out of the money *derivatives* which they have entered into with that *firm*; and
 - (f) who, in periods of stress, may choose to post less liquid collateral than would likely be the case in normal financial conditions; and
- (2) assume that under the stresses required by ■ BIPRU 12.5.6 R there may be uncertainty as to the accuracy of the valuation attributed to a *derivative* contract.

12.5.46

FCA PRA

G

In relation to its contingent liabilities, a *firm* should:

- (1) calculate the impact on its cash flows of those of its contingent obligations that will be triggered in normal financial conditions; and
- (2) estimate the impact on its cash flows of those of its contingent obligations that may be triggered under the liquidity stresses required by ■ BIPRU 12.5.6 R.

12.5.47

FCA PRA

G

For the purpose of ■ BIPRU 12.5.46G, a *firm* should therefore assess the impact on its cash flows of the triggering of contingent obligations contained in all contractual documentation to which it is party, including: acceptances, endorsements, guarantees, underwriting agreements, standby letters of credit, documentary credits, warrants, indemnities, undrawn note issuance facilities and other revolving credit facilities. A *firm* should also assess the degree of concentration in its total contingent liabilities as respects obligations arising from particular types of contract, counterparty and market sector.

12.5.48

FCA PRA

G

In relation to its commitments (other than liquidity facilities to support securitisation programmes)), a *firm* should:

- (1) calculate its maximum contractual exposure arising from those commitments;

- (2) calculate the effect on its cash flows of the drawing of those commitments in normal financial conditions; and
- (3) estimate the effect on its cash flows of the drawing of those commitments under the liquidity stresses required by ■ BIPRU 12.5.6 R.

12.5.49

FCA PRA

G

For the purpose of ■ BIPRU 12.5.48G, a firm should:

- (1) consider its contractual exposure to the following types of commitment: committed funding facilities, undrawn loans and advances to wholesale counterparties, mortgages that have been agreed but not yet been drawn down, credit cards, overdrafts (and other retail lending facilities);
- (2) ensure that its analysis of each type of commitment is sufficiently granular to enable that *firm* to:
 - (a) assess the circumstances in which counterparties will draw down;
 - (b) identify the extent of any correlations as between counterparties in deciding whether or not to draw down;
 - (c) identify the extent to which decisions by the *firm's* counterparties to draw down may be correlated to a decline in the *firm's* own liquidity resources; and
 - (d) assess the proportion of its total commitments attributable to particular counterparties; and
- (3) assess the extent to which draw down requires the counterparty in question to deliver to the *firm* collateral in the form of marketable assets, while also assessing the anticipated effect of such a requirement on:
 - (a) the likelihood that the counterparty in question will draw down; and
 - (b) the *firm's* liquidity position if the counterparty in question delivers collateral on draw down; and
- (4) assess the impact on its cash flows of its commitment counterparties experiencing liquidity stress at the same time as that *firm* is subject to the stresses required by ■ BIPRU 12.5.6 R.

12.5.50

FCA PRA

G

In relation to liquidity facilities to support securitisation programmes, a *firm* should:

- (1) assess the extent of its contractual obligations to provide liquidity support to sponsored and third-party structured vehicles;
- (2) identify the circumstances in which support will, or is likely to, be called; and
- (3) assess the impact on that *firm's* cash flows of such support being called:
 - (a) in normal financial conditions; and
 - (b) under the liquidity stresses required by ■ BIPRU 12.5.6R.

12.5.51 FCA PRA G For the purpose of ■ BIPRU 12.5.50G (2), a *firm* should consider the impact of the following events on the likelihood of a call for liquidity support: inability of a vehicle to roll over commercial paper (due either to disruption in the CP market or to concern as to the quality of the assets securitised) and, in relation to sponsored vehicles, concern as to the solvency of that *firm* as sponsor and, separately, the possibility of draw down of undrawn commitments entered into by the sponsored vehicle in its own right.

Franchise-viability risk

12.5.52 FCA PRA R For the purposes of assessing its franchise-viability risk, a *firm* must assess, under the liquidity stresses required by ■ BIPRU 12.5.6 R, the liquidity resources required to maintain its core business franchise and reputation.

12.5.53 FCA PRA G Franchise-viability risk is the risk that in the stresses required by ■ BIPRU 12.5.6R a *firm* may not have sufficient liquidity resources to maintain its core business franchise and reputation.

12.5.54 FCA PRA G In complying with ■ BIPRU 12.5.52R, a *firm* should assess the extent to which it can and realistically will:

- (1) restrict new retail lines without significantly damaging customer relationships;
- (2) restrict new wholesale lending without significantly damaging its ability to resume such lending following the period of stress in question;
- (3) cease to provide liquidity support to its sponsored vehicles;
- (4) decline to exercise call *options* whose effect if not exercised might be to cause market participants to question the *firm's* ability to continue to meet its liabilities as they fall due; and
- (5) continue any regular programme of buying back its issued debt.

12.5.55 FCA PRA G For the purpose of ■ BIPRU 12.5.54G (5), a *firm* may wish to continue repurchasing its debt to help demonstrate that a two-way market continues to be made in its paper and, more generally, in order to maintain the long-term viability of its debt issuance programme. Equally, a *firm* may wish to continue repaying retail depositors before the contractual maturity of those *deposits* in order to maintain confidence in its ability to continue to meet its liabilities as they fall due.

Marketable assets risk

12.5.56 FCA PRA R For the purpose of assessing its exposure to marketable assets risk, a *firm* must assess how the marketable assets comprised in its liquidity resources will behave:

- (1) under normal financial conditions; and
- (2) under the liquidity stresses identified in ■ BIPRU 12.5.6R, including an assessment of the effect of these stresses on:

- (a) its ability to derive funding from its marketable assets in a timely fashion;
- (b) the potential for using those assets as collateral to raise secured funding and the size of the haircut likely to be required by a counterparty;
- (c) the likelihood and extent of forced-sale loss; and
- (d) the effect on its business activities of any changes in (a) to (c) identified as likely to result from those liquidity stresses.

12.5.57

FCA PRA

G

In complying with ■ BIPRU 12.5.56R, a *firm* should consider all marketable assets which count towards its liquidity resources for the purposes of meeting the *overall liquidity adequacy rule*. A firm should therefore include in this assessment any assets that it holds in its liquid assets buffer.

12.5.58

FCA PRA

G

The *appropriate regulator* regards as marketable those of a *firm's* assets that it is able to sell outright or *repo*. For liquidity management purposes, a *firm* would ordinarily expect to hold a stock of assets of this kind in order to reduce the likelihood that it may need to borrow unsecured at short notice. To the extent that these assets may behave differently under stress conditions than under normal financial conditions, a *firm* is subject to marketable assets risk.

12.5.59

FCA PRA

G

As a general proposition, the speed with which a *firm* may be able to realise a marketable asset, and the price impact of doing so, will depend to a significant extent on the volume of those assets which that *firm* wishes to realise and the market conditions prevailing at the time.

12.5.60

FCA PRA

G

The behaviour of a *firm's* marketable assets under conditions of stress is likely to depend on a number of different factors, including:

- (1) the depth and competitiveness of the market for the marketable asset in question, the size of the bid-offer spread, the presence of committed market-makers, the nature of the information available to potential counterparties, the degree of structural complexity of the assets in question and the assets eligibility in central bank market operations and liquidity facilities; and
- (2) that *firm's* operational capability to generate funding from those assets in a timely manner.

12.5.61

FCA PRA

G

In considering its operational capability to generate funding from assets, a *firm* should be aware that its capability in this regard is likely to depend on:

- (1) whether it has in place arrangements for *repo*;
- (2) the extent to which that *firm* already holds a significant proportion of the market for the marketable asset in question;
- (3) the extent to which that *firm* periodically realises some or all of its holdings of that asset; and

- (4) that *firm's* accounting treatment and valuation of that asset.

12.5.62

FCA PRA

R

For the purpose of its *ILAA* submission to the *appropriate regulator*, a *firm* must provide the *appropriate regulator* with an analysis of the profile of its marketable assets as at the date of submission in a way that:

- (1) separately identifies its marketable assets according to asset class, maturity, currency, their eligibility for use in central bank monetary operations and liquidity facilities and any other characteristic that it uses in its liquidity management; and
- (2) assesses the degree of diversification achieved across its marketable assets.

Non-marketable assets risk

12.5.63

FCA PRA

R

For the purpose of assessing its exposure to non-marketable assets risk, a *firm* must assess how the non-marketable assets in its liquidity resources will behave:

- (1) under normal financial conditions; and
- (2) under the liquidity stresses required by ■ BIPRU 12.5.6 R, including an assessment of the effect of these stresses on:
 - (a) the *firm's* ability to derive funding from its non-marketable assets; and
 - (b) the impact on the *firm's* liquidity position of any consequences for its funding ability identified in (a).

12.5.64

FCA PRA

G

In complying with ■ BIPRU 12.5.63R, a *firm* should consider all non-marketable assets which count towards its liquidity resources for the purposes of meeting the *overall liquidity adequacy rule*.

12.5.65

FCA PRA

G

■ BIPRU 12.2.5 G notes that a *firm* should include in its liquidity resources sufficient assets which are marketable or otherwise realisable. The *appropriate regulator* considers those assets which are capable of realisation, but other than through *repo* or outright sale, as non-marketable assets. To the extent that these assets may behave differently under stress conditions than under normal financial conditions, a *firm* is subject to non-marketable assets risk. Different forms of non-marketable assets risk arise, particularly in relation to:

- (1) retail loans; and
- (2) unsecured wholesale assets.

12.5.66

FCA PRA

G

In addition to realising a *firm's* marketable assets, a *firm* can meet its outflows in part by expected inflows from maturing non-marketable assets such as retail loans. Inflows

from these assets (principal and interest) may in stressed conditions be affected by counterparty behaviour, exposing that *firm* to non-marketable assets risk.

12.5.67

FCA PRA

R

For the purpose of assessing its exposure to non-marketable assets risk a *firm* must assess the extent to which the behaviour of inflows from retail loans under the liquidity stresses required by ■ BIPRU 12.5.6R may differ from that suggested by their contractual terms.

12.5.68

FCA PRA

G

For the purpose of the assessment in ■ BIPRU 12.5.67R, a *firm* should ensure that it assesses repayment behaviour at a level of granularity sufficient to enable it to draw informed conclusions about its liquidity exposure. The *appropriate regulator* would expect a *firm's* assessment to analyse separately the non-marketable assets risk associated with each of its relevant products and with each type of counterparty from whom it is expecting repayments.

12.5.69

FCA PRA

G

For the purpose of the assessment in ■ BIPRU 12.5.67R, a *firm* should in particular have regard to the risk associated with:

- (1) repayment defaults; and
- (2) exercise by its counterparties of contractual rights to repay before the expected maturity date or to delay repayment beyond that date.

12.5.70

FCA PRA

G

A *firm* may also use its unsecured wholesale assets to generate liquidity, otherwise than by outright sale or *repo*. A *firm* may, for example, choose to generate funding from some of the assets included in its liquidity resources by using them in securitisation or covered bond programmes. Assets that are typically used to raise liquidity in this manner include residential mortgage loans; commercial mortgage and other loans; credit card and automobile receivables, which have been packaged for the wholesale markets. To the extent that the ability to fund from these non-marketable assets may be limited under stressed conditions, a *firm* may be exposed to non-marketable assets risk.

12.5.71

FCA PRA

G

The assessment required by ■ BIPRU 12.5.63R is particularly important for a *firm* which:

- (1) ordinarily does not raise funding from its non-marketable assets in this way; or
- (2) places proportionately greater reliance on securitisation programmes as compared to other funding strategies to generate liquidity.

12.5.72

FCA PRA

R

In complying with ■ BIPRU 12.5.63R, a *firm* must in particular assess the non-marketable assets risk associated with asset securitisations, having regard to:

- (1) the existence of early amortisation triggers and the consequences of their operation; and
- (2) its financing of assets which are warehoused prior to their securitisation.

12.5.73

FCA PRA

G

A *firm* which chooses to warehouse assets in the way described in ■ BIPRU 12.5.72R should consider the particular risks that arise from the method of financing that it uses to pre-fund those assets. For example, financing of warehoused assets by means of short-term (rather than long-term) funding is more likely to put that *firm* under liquidity pressure in the event that its proposed securitisation is not completed (either at all, or at the expected date).

Funding concentration risk

12.5.74

FCA PRA

G

A *firm* with a sufficiently flexible funding strategy should be able to reduce its *liquidity risk* by diversifying its liquidity resources.

12.5.75

FCA PRA

R

As part of its ILAA, a *firm* must assess the impact on the degree of diversification in its liquidity resources of the stresses required by ■ BIPRU 12.5.6R.

12.5.76

FCA PRA

G

For the purpose of ■ BIPRU 12.5.75R, a *firm* should take into account the extent to which its liquidity resources are diversified according to:

- (1) type of instrument and product;
- (2) currency;
- (3) counterparty;
- (4) liability term structure; and
- (5) market for their realisation (provided that such market is open to the *firm* as counterparty).

12.5.77

FCA PRA

G

A *firm* should be aware that the degree of diversification in its liquidity resources can be compromised, particularly in periods of stress, by a number of factors, including:

- (1) reduced or terminated funding provision from some counterparties as a result of that *firm's* credit-rating being downgraded or its financial condition deteriorating;
- (2) disputes over the terms of legally binding commitments to lend which delay the provision of funding;
- (3) markets previously used by the *firm* for raising funding ceasing to be open or operating but at reduced capacity;
- (4) reliance on a small number of brokers to access funding sources; and
- (5) positive correlations in the behaviour of different instruments and products.

12.6 Simplified ILAS

12.6.1

FCA PRA

G

The *appropriate regulator* recognises that it may not always be appropriate to apply ■ BIPRU 12.5 (Individual Liquidity Adequacy Standards) to every *ILAS BIPRU firm*. For a *firm* which operates a relatively simple business model, it may instead be appropriate to allow the *firm* to calculate the size and content of its liquid assets buffer according to a simplified approach prescribed in the *Handbook* in advance of any review of that *firm's liquidity risk* conducted by the *appropriate regulator*. This section sets out the *simplified ILAS* approach to maintaining a liquid assets buffer and a *firm* that operates that approach is a *simplified ILAS BIPRU firm*.

12.6.2

FCA PRA

R

An *ILAS BIPRU firm* that wishes to operate the *simplified ILAS* approach must:

- (1) satisfy the conditions in ■ BIPRU 12.6.6R to ■ BIPRU 12.6.8R; and
- (2) obtain a *simplified ILAS waiver* from the *appropriate regulator*.

12.6.3

FCA PRA

G

A *firm* will therefore lose the benefit of its *simplified ILAS waiver* if it ceases to satisfy the conditions in ■ BIPRU 12.6.6R to ■ BIPRU 12.6.8R. Consistent with *Principle 11* (Relations with regulators), if a *firm* anticipates that it may breach those conditions, it should notify the *appropriate regulator* promptly.

12.6.4

FCA PRA

R

A *simplified ILAS BIPRU firm* must calculate the size of its *simplified buffer requirement* in accordance with ■ BIPRU 12.6.9R to ■ BIPRU 12.6.18R.

12.6.5

FCA PRA

G

The *appropriate regulator* is likely to regard a *simplified ILAS BIPRU firm* whose liquid assets buffer accords with the *simplified buffer requirement* as having an adequate buffer of assets and a prudent funding profile for the purpose of ■ BIPRU 12.2.8R. However, the *simplified ILAS* approach does not relieve a *simplified ILAS BIPRU firm* from the obligation to hold liquidity resources which are adequate for the purpose of meeting the *overall liquidity adequacy rule* or from the obligation in ■ BIPRU 12.3.4R to assess and maintain on an ongoing basis the adequacy of its liquidity resources. Consequently, where a *firm's* own assessment of the adequacy of its liquidity resources indicates that its liquid assets buffer should be larger in size than that produced by the application of the *simplified buffer requirement*, the *appropriate regulator* will expect that *firm* to maintain a liquid assets buffer which is consistent with the results of its own assessment. Equally, following any review by the *appropriate regulator* of the *liquidity risk* to which a *simplified ILAS BIPRU firm* is exposed, the *appropriate regulator* may give that *firm individual liquidity guidance* advising it that its liquid assets buffer should be bigger than that which is produced by the application of the *simplified buffer requirement*.

12.6.6

FCA PRA

R

Simplified ILAS conditions

The first condition is that:

- (1) no less than 75% of the *firm's* total liabilities are accounted for by retail *deposits* and :
 - (a) the *firm's* total assets do not exceed 250 million; or
 - (b) the *firm's* total assets do not exceed 1 billion and no less than 70% of those assets are accounted for by:
 - (i) assets of the kind that fall into ■ BIPRU 12.7.2 R and which the *firm* counts towards its *simplified buffer requirement*; and
 - (ii) retail loans; or
 - (c) no less than 70% of the *firm's* total assets are accounted for by retail loans; or
 - (d) no less than 70% of the *firm's* total assets are accounted for by:
 - (i) *money-market instruments* with a residual contractual maturity of three *months* or less; or
 - (ii) *sight deposits* held with a *credit institution*; or
 - (iii) *term deposits* with a residual contractual maturity of three *months* or less held with a *credit institution*; or
- (2) no less than 80% of the *firm's* total liabilities are accounted for by liabilities owed to its *parent undertaking* and the amount of the *firm's* total assets does not exceed 1 billion.
 - (a) [deleted]
 - (b) [deleted]
 - (c) [deleted]
- (3) [deleted]

12.6.6A

FCA PRA

R

For the purpose of ■ BIPRU 12.6.6 R, a *firm* must calculate:

- (1) its total assets by reference to its most recent 001 *data item*; and
- (2) its retail loans as the total of its lending to the retail sector recorded in cell 11A in its most recent 015 *data item*.

12.6.7

FCA PRA

R

In this section :

- (1) a retail *deposit* is a *deposit* accepted from a *consumer*; and
- (2) SME *deposits* are *deposits* accepted from, and account balances where the account holders are, *small and medium-sized enterprises* (or *partnerships* or *sole traders* or *charities* which would be *small and medium-sized enterprises* if they were companies).

12.6.8

FCA PRA

R

The second condition is that no less than 99.5% of the *firm's* total assets and no less than 99.5% of its total liabilities are denominated in sterling, euros or United States dollars.

Size of the simplified buffer requirement

12.6.9

FCA PRA

R

- (1) A *simplified ILAS BIPRU firm* must ensure that the size of its liquid assets buffer is at all times greater than or equal to 50% of the amount produced by adding:
 - (a) the wholesale net cash outflow component;
 - (b) the retail and SME *deposit* component; and
 - (c) the credit pipeline component.
- (2) This is the *simplified buffer requirement*.

The wholesale net cash outflow component

12.6.10

FCA PRA

R

- (1) The wholesale net cash outflow component is a *firm's* peak cumulative wholesale net cash outflow over the next three *months* where the peak is established by:
 - (a) calculating the daily wholesale net cash flow by reference to a *firm's* wholesale assets maturing that day and its wholesale liabilities falling due on that day;
 - (b) for each of the *business days* in the next three *months*, calculating the cumulative total of such daily net cash flows as at the *business day* in question; and
 - (c) identifying the minimum cumulative total figure out of all of the cumulative total figures calculated in accordance with (b).
- (2) The figure identified in (1)(c) is the peak cumulative wholesale net cash outflow.
- (3) For the purpose of calculating the peak cumulative wholesale net cash outflow, a *firm* must:
 - (a) exclude from the calculation in (1)(a) cash flows attributable to *repo* and reverse *repo*, forward sales, forward purchases, redemptions and any other transactions entered into by the

firm where the security leg of the transaction in question is in respect of securities of the type described in

■ BIPRU 12.7.2R (1) and ■ (2);

- (b) include wholesale cash outflows in that calculation according to their earliest contractual maturity;
- (c) exclude wholesale cash flows attributable to reserves in the form of sight deposits with a central bank and *designated money market funds* that it includes in its liquid assets buffer in accordance with the *rules* on asset eligibility in ■ BIPRU 12.7; and
- (d) exclude any retail *deposits* or SME *deposits*.

The retail and SME deposit component

12.6.11

FCA PRA

R

- (1) The retail and SME *deposit* component is the sum represented by:
 - (a) 20% of a *firm's* Type A retail *deposits*;
 - (b) 10% of a *firm's* Type B retail *deposits* ; and
 - (c) 20% of a *firm's* SME *deposits*.
- (2) A *firm* must:
 - (a) assess the likelihood that retail *deposits* that it holds will be withdrawn in response to actual or perceived changes in the *firm's* credit-worthiness;
 - (b) calculate the amount of retail *deposits* that it assesses as having a higher than average likelihood of withdrawal in the circumstances described in (a) (Type A retail *deposits*); and
 - (c) class all other of its retail *deposits* as Type B retail *deposits*.

12.6.12

FCA PRA

G

In the *appropriate regulator's* view, a Type A retail *deposit* is likely to include one which:

- (1) has been accepted through the internet; or
- (2) is considered to have a more than average sensitivity to interest rate changes (such as a deposit whose acceptance can reasonably be attributed to the use of price-focused advertising by the *firm* accepting the *deposit*); or
- (3) in relation to any individual depositor exceeds to a significant extent the amount of that individuals *deposits* with the accepting *firm* that are covered by a national deposit guarantee scheme; or
- (4) is not accepted from a depositor with whom the *firm* has had a long relationship; or

- (5) is accepted from retail depositors who can access their *deposits* before their residual contractual maturity subject to a loss of interest or payment of another form of early access charge (as a general proposition, the behaviour of liabilities to retail depositors is likely to depend in part on the contractual terms and conditions which give rise to those liabilities); or
- (6) is not held in an account which is maintained for transactional purposes.

12.6.13

FCA PRA

R

Before applying for a *simplified ILAS waiver*, a *firm* must prepare a written policy statement recording its approach to assessing the likelihood of withdrawal of its retail *deposits* in the circumstances described in ■ BIPRU 12.6.11R (2)(a) and ensure that:

- (1) the *firm's governing body* approves and conducts appropriate reviews of the policy statement; and
- (2) the *firm* submits a copy of the policy statement to its usual supervisory contact at the *appropriate regulator*.

12.6.14

FCA PRA

G

In considering a *firm's* application for a *simplified ILAS waiver*, the *appropriate regulator* will take into account the *firm's* policy statement submitted to it under ■ BIPRU 12.6.13R and form a view about the appropriateness of the assumptions on which the policy statement is based. Where a policy statement submitted after the grant of a *simplified ILAS waiver* reflects a materially different assessment to that set out in the policy statement considered as part of a *firm's waiver* application, a *firm* should expect that the *appropriate regulator* will wish to review the continued appropriateness of the *firm's simplified ILAS waiver* and in so doing will re-examine afresh all matters to which it had regard when the *waiver* in question was granted. The *appropriate regulator* expects a *firm* to review the appropriateness of its policy statement as often as is necessary and in any event no less frequently than annually. A *firm* should always review the continued appropriateness of its policy statement following a material change to the nature of the *firm's* business. Where a *firm* updates or otherwise changes its policy statement it should submit promptly to the *appropriate regulator* the new document.

The credit pipeline component

12.6.15

FCA PRA

R

The credit pipeline component is the sum represented by 25% of a *firm's* credit facilities offered to its *customers* but which are yet to be drawn down, including:

- (1) offers to make loans secured on residential property;
- (2) overdraft facilities; and
- (3) credit card facilities.

Buffer securities restriction

12.6.16

FCA PRA

R

- (1) A *simplified ILAS BIPRU firm* may only include in its liquid assets buffer eligible government and *designated multilateral development bank* debt securities up to the value of the *buffer securities restriction*.

- (2) For the purpose of calculating the *buffer securities restriction*, a *firm* must:
 - (a) calculate its daily net flow in government and *designated multilateral development bank* debt securities eligible as classes of assets for inclusion in the *firm's* liquid assets buffer;
 - (b) for each of the *business days* in the next three *months* calculate the cumulative total of such daily securities flows, including the opening balance, as at the *business day* in question; and
 - (c) identify the minimum cumulative total figure out of all of the cumulative total figures calculated in accordance with (b).

- (3) For the purpose of (2)(a), a *firm* must include :
 - (a) all contractual inflows and outflows of eligible debt securities arising from *repo*, reverse *repo*, forward sales, forward purchases, redemptions and any other transactions involving those securities; and
 - (b) those cash flows excluded under ■ BIPRU 12.6.10 R (3)(a).

12.6.17

FCA PRA

G

In mathematical terms the calculation in ■ BIPRU 12.6.9R and ■ BIPRU 12.6.16R may be represented as follows:

Liquidity Buffer \geq (Wholesale net cash outflow component + Retail and SME deposit component + Credit pipeline component) $\times 0.5$

Liquidity buffer	$FSA048_{18,1} + FSA048_{19,1} + FSA048_{6,1} + FSA048_{6,2} + FSA048_{25,2} + FSA048_{34,2}$ $+ \inf \{f(x) : x = 1,2,3..y\}$ <p>where :</p> $f(x) = \sum_{m=1}^x FSA047_{6,m} + \sum_{m=1}^x FSA047_{25,m} + \sum_{m=1}^x FSA047_{34,m}$
Retail and SME deposit component	$\left(0.2 \times \sum_{n=33}^{54} \sum_{m=1}^{10} FSA048_{n,m} \right) + \left(0.1 \times \sum_{m=1}^{10} FSA048_{55,m} \right)$
Credit pipeline component	$0.25 \times \left(\sum_{n=39}^{69} FSA048_{n,1} \right)$
Wholesale net cash outflow component	$\min \left(0, \left(\sum_{n=20}^{22} FSA048_{n,1} \right) + \left(\sum_{n=26}^{30} FSA048_{n,2} \right) + \left(\sum_{n=35}^{39} FSA048_{n,2} \right) + \left(\sum_{n=44}^{51} FSA048_{n,1} \right) + \left(\sum_{m=1}^5 FSA048_{52,m} \right) + FSA048_{36,1} + \inf \{g(x) : x = 1,2,3..y\} \right)$ <p>where :</p> $g(x) = \sum_{m=1}^y \left[\left(\sum_{n=20}^{23} FSA047_{n,m} \right) + \left(\sum_{n=26}^{30} FSA047_{n,m} \right) + \left(\sum_{n=35}^{51} FSA047_{n,m} \right) + FSA047_{57,m} \right]$

Where :

y = number of business days in three months

FSAxxx_{m,n} = The entry in FSAXXX row m column n

inf {f(x) : x = 1,2,3} represents the greatest lower bound of the function f(x) over the range x = 1,2,3

Foreign currency positions

12.6.18

FCA PRA

R

- (1) Subject to (3), a *simplified ILAS BIPRU firm* that has assets or liabilities denominated in either or both euros and United States dollars must carry out separate calculations under ■ BIPRU 12.6.9R in relation to its positions in each of those currencies, in addition to that which it carries out in relation to its sterling positions (if any).
- (2) A *firm* to which (1) applies must ensure that, for the purpose of meeting the *simplified buffer requirement*, it holds in its liquid assets buffer assets denominated in either or both euros and United States dollars (as relevant) greater than or equal to the amount produced by the calculation in the corresponding currency required under (1), in addition to any sterling liquid assets that it is required to hold in its buffer in respect of its sterling positions.
- (3) Paragraph (1) does not apply to a *simplified ILAS BIPRU firm* that hedges fully its positions in either or both euros and United States dollars such that the *firm* is not exposed to any cross-currency *liquidity risk* in respect of those positions.

Content of the simplified ILAS liquid assets buffer

12.6.19

FCA PRA

G

The *rules* in ■ BIPRU 12.7 set out the sorts of assets that are eligible for the liquid assets buffer of an *ILAS BIPRU firm*. Every *ILAS BIPRU firm* may include in its buffer reserves in the form of sight deposits at a central bank and high quality debt securities issued by governments and *designated multilateral development banks* subject to the eligibility rules in ■ BIPRU 12.7. ■ BIPRU 12.7 provides that a *simplified ILAS BIPRU firm* may also include in its buffer investments in a *designated money market fund*.

12.6.20

FCA PRA

G

A *simplified ILAS BIPRU firm* may include in the liquid assets buffer any combination of the eligible assets permitted by the *rules* in ■ BIPRU 12.7.

ILSA

12.6.21

FCA PRA

R

- (1) A *simplified ILAS BIPRU firm* must regularly carry out an *ILSA* which contains an assessment of the *firm's* compliance with the standards set out in ■ BIPRU 12.3 and ■ BIPRU 12.4, including the results of the stress tests required by the rules in ■ BIPRU 12.4.
- (2) The *firm* must make a written record of its *ILSA*.
- (3) The *ILSA* must be proportionate to the nature, scale and complexity of that *firm's* activities.
- (4) The *ILSA* must take into account *group-wide* liquidity resources only to the extent that reliance on these is permitted by the *appropriate regulator*.

12.6.22

FCA PRA

G

For the purpose of ■ BIPRU 12.6.21R, a *firm* should carry out an *ILSA* at least annually, or more frequently if changes in its business or strategy or the nature, scale or complexity of its activities or the operational environment suggest that the current level of liquidity resources is no longer adequate. A *firm* should expect that the *firm's* usual supervisory contact at the *appropriate regulator* will ask for the *ILSA* to be submitted as part of the ongoing supervisory process.

12.7 Liquid assets buffer

12.7.1

FCA PRA

G

■ BIPRU 12.2 provides that an *ILAS BIPRU firm* must ensure that its liquidity resources contain an adequate buffer of high quality, unencumbered assets. ■ BIPRU 12.7 describes in more detail the nature of the assets that are eligible for inclusion in that buffer. The *rules* in this section provide that some types of assets are eligible for use only by a *simplified ILAS BIPRU firm*.

12.7.2

FCA PRA

R

For the purpose of satisfying ■ BIPRU 12.2.8R, a *firm* to which this section applies may include in its liquid assets buffer only:

- (1) high quality debt securities issued by a government or central bank;
- (2) securities issued by a *designated multilateral development bank*;
- (3) reserves in the form of sight deposits with a central bank of the kind specified in ■ BIPRU 12.7.5R and ■ BIPRU 12.7.6R; and
- (4) in the case of a *simplified ILAS BIPRU firm* only, investments in a *designated money market fund*.

12.7.3

FCA PRA

R

Subject to ■ BIPRU 12.7.4R, for the purpose of ■ BIPRU 12.7.2R (1), a *firm* may include only a debt security which is:

- (1) issued by the central government or central bank of an *EEA State*;
or
- (2) issued by the central government or central bank of Canada, the Commonwealth of Australia, Japan, Switzerland or the United States of America.

12.7.4

FCA PRA

R

For the purpose of ■ BIPRU 12.7.3R, a *firm* may not include a debt security unless:

- (1) the central government or central bank in question has been assessed by at least two *eligible ECAIs* as having a credit rating associated with *credit quality step 1* in the *credit quality assessment scale* published by the *appropriate regulator* for the purpose of BIPRU 3 (The Standardised Approach: mapping of the

ECAIs credit assessments to credit quality steps (Long term mapping)); and

- (2) that debt security is either:
 - (a) denominated in the domestic currency of the country in question; or
 - (b) denominated in a currency other than the domestic currency, provided it is denominated in any of Canadian dollars, euros, Japanese yen, sterling, Swiss francs or United States dollars.

12.7.5

FCA PRA

R

Subject to ■ BIPRU 12.7.6R, for the purpose of ■ BIPRU 12.7.2R (3) a *firm* may include only reserves in the form of sight deposits held by the *firm* with the central bank of:

- (1) an *EEA State*; or
- (2) Canada, the Commonwealth of Australia, Japan, Switzerland or the United States of America.

12.7.6

FCA PRA

R

For the purpose of ■ BIPRU 12.7.5R, a *firm* may not include reserves held at a central bank unless:

- (1) the central bank in question has been assessed by at least two *eligible ECAs* as having a credit rating associated with *credit quality step 1* in the *credit quality assessment scale* published by the *appropriate regulator* for the purpose of ■ BIPRU 3 (The Standardised Approach: mapping of the ECAs credit assessments to credit quality steps (Long term mapping)); and
- (2) those reserves are denominated in the domestic currency of the central bank in question.

12.7.6A

FCA PRA

R

For the purpose of ■ BIPRU 12.7.2R (2), a *firm* may not include securities issued by a *designated multilateral development bank* unless:

- (1) the *designated multilateral development bank* in question has been assessed by at least two *eligible ECAs* as having a credit rating associated with *credit quality step 1* in the *credit quality assessment scale* published by the *appropriate regulator* for the purpose of ■ BIPRU 3 (The Standardised Approach: mapping of the ECAs' credit assessments to credit quality steps (Long term mapping)); and
- (2) those securities are denominated in any of Canadian dollars, euros, Japanese yen, sterling, Swiss francs or United States dollars.

12.7.7

FCA PRA

G

It is important that a *firm* identifies and understands the range of central bank facilities in which it is eligible to participate. A *firm* may be eligible to participate in some facilities of this kind by virtue of its having a *branch* in a particular country. In addition to identifying the central bank facilities to which it has access, a *firm* should ensure that it has in place appropriate legal and administrative arrangements to enable it to draw on those facilities in a timely manner.

12.7.8

FCA PRA

G

In deciding on the precise composition of its liquid assets buffer, a *firm* should ensure that it tailors the contents of the buffer to the needs of its business and the *liquidity risk* that it faces. In particular, a *firm* should ensure that it holds assets in its buffer which can be realised with the speed necessary to meet its liabilities as they fall due. In doing so, a *firm* should have regard to the currencies in which its liabilities are denominated and should take into account the potential effect of stressed conditions on its ability to access spot and *swap* foreign exchange markets in a manner consistent with the settlement cycles of foreign exchange settlement systems. A *firm* should have regard to the results of its *ILAA* or, as the case may be, its *ILSA*, in assessing the speed with which its liabilities fall due in stressed and non-stressed conditions.

12.7.9

FCA PRA

R

For the purposes of ■ BIPRU 12.7.2R (1) and ■ (2), a *firm* must only count securities:

- (1) which are unencumbered;
- (2) (a) to which it has legal title; or
 - (b) to which a *central bank* has legal title but which meet the requirements of ■ BIPRU 12.7.9AR (1), subject to ■ BIPRU 12.7.9AR (2); and
- (3) which that *firm* realises on a regular basis.

12.7.9A

FCA PRA

R

- (1) For the purposes of ■ BIPRU 12.7.9R (2)(b) the requirements are that:
 - (a) the securities are in excess of the amount of collateral required to be held by that *central bank*; and
 - (b) the *firm* is entitled to regain legal title to such securities without any encumbrance.
- (2) The *firm* may only count securities that meet the requirements of ■ BIPRU 12.7.9R and ■ BIPRU 12.7.9AR (1) from the point in time when the *firm* would regain legal title to the securities from the *central bank*, subsequent to any required notice period.
- (3) For the purposes of ■ BIPRU 12.7.9AR (2) any required notice period is deemed to commence on the first *business day* that the *central bank* could receive notice from the *firm*.

12.7.10

FCA PRA

G

The *appropriate regulator* regards as encumbered any asset which the *firm* in question has provided as collateral. Therefore, where assets have been used as collateral in this way (for example, in a *repo*), they should not be included in the *firms* liquid assets buffer.

However, any assets provided by the *firm* to a *central bank* as collateral which meet the requirements in ■ BIPRU 12.7.9A R will be recognised as unencumbered by the for the purposes of ■ BIPRU 12.7.9R (1). For the avoidance of doubt, there is no need for notice to have actually been served to meet the requirements in ■ BIPRU 12.7.9AR (2).

12.7.11

FCA PRA

R

- (1) For the purpose of ■ BIPRU 12.7.9R (3), a *firm* must periodically realise a proportion of the assets in its liquid assets buffer through *repo* or outright sale to the market.
- (2) [deleted]
- (3) A *firm* must ensure that in carrying out such periodic realisation:
 - (a) it does so without reference to the *firm's* day-to-day liquidity needs;
 - (b) it realises in varying amounts the assets in its liquid assets buffer;
 - (c) the cumulative effect of its periodic realisation over any twelve *month* period is that a significant proportion of the assets in its liquid assets buffer is realised; and
 - (d) in *repo* to the market it enters into transactions of varying durations.
- (4) A *firm* must establish and maintain a written policy setting out its approach to periodic realisation of its assets.
- (5) A *firm* must also ensure that it periodically tests its operational ability to raise funds, through the use of central bank liquidity facilities to which it has access, using a proportion of those of its assets not in its liquid assets buffer.

12.7.12

FCA PRA

G

The *appropriate regulator* will, as part of its review of a *firm's* ILAA or, as the case may be, its ILSA, assess the adequacy of a *firm's* periodic realisation policy and its implementation in practice.

12.8 Cross-border and intra-group management of liquidity

12.8.1

FCA PRA

G

Every *firm* subject to ■ BIPRU 12 is subject to the *overall liquidity adequacy rule*. The effect of that rule is that every *firm* is required to be self-sufficient in terms of liquidity adequacy and to be able to satisfy that rule relying on its own liquidity resources. Where the *firm* is an *incoming EEA firm* or *third country BIPRU firm* compliance with the *overall liquidity adequacy rule* with respect to the *UK branch* must be achieved relying solely on liquidity resources that satisfy the conditions in ■ BIPRU 12.2.3 R.

12.8.2

FCA PRA

G

However, the *appropriate regulator* recognises that there may be circumstances in which it would be appropriate for a *firm* to rely on liquidity resources which can be made available to it by other members of its *group*, or for a *firm* to rely on liquidity resources elsewhere in the *firm* for the purposes of ensuring that its *UK branch* has adequate liquidity resources in respect of the activities carried on from the *branch*. Where the *appropriate regulator* is satisfied that the statutory tests in section 138A (Modification or waiver of rules) of the *Act* are met, the *appropriate regulator* will consider modifying the *overall liquidity adequacy rule* to permit reliance on liquidity support of this kind.

12.8.3

FCA PRA

G

■ BIPRU 12.8 provides *guidance* on two types of modification to the *overall liquidity adequacy rule* and to other *rules* in ■ BIPRU 12 for which the *appropriate regulator* considers a *firm* may wish to apply, namely:

- (1) an *intra-group liquidity modification*; and
- (2) a *whole-firm liquidity modification*.

12.8.4

FCA PRA

G

In considering whether the statutory tests in section 138A of the *Act* have been met, the *appropriate regulator* will, amongst others, have regard to the factors detailed below in relation to an *intra-group liquidity modification* (of the kind permitting the inclusion in a *firm's* liquidity resources of *parent undertaking* liquidity support) and a *whole-firm liquidity modification*. In practice it is likely that the *appropriate regulator* will view these as preconditions to the grant of an *intra-group liquidity modification* of that type or a *whole-firm liquidity modification* and will therefore ordinarily need to be satisfied fully that each has been adequately addressed. They include matters on which the *appropriate regulator* will need to reach agreement with the *Home State regulator*, *third country competent authority*, or other relevant supervisor, and also matters which it will need to agree directly with a *firm* or the *parent undertaking* of a *firm*. It is likely that a number of these matters will be reflected as requirements or conditions in the modification.

12.8.5 FCA PRA G This section represents merely an indication of the matters to which the *appropriate regulator* will have regard in considering an application for a *whole-firm liquidity modification* or an *intra-group liquidity modification*. In considering such an application, the will always take into account anything that it reasonably considers to be relevant for the purposes of assessing whether the statutory tests in section 138A of the *Act* are met. In doing so, it will have regard to the role and importance of a *firm* or *UK branch* in the *UK financial system*.

12.8.6 FCA PRA G The *appropriate regulator* anticipates that an application to modify the *overall liquidity adequacy rule* may be accompanied by an application to waive or modify other rules in ■ BIPRU 12 (for example, the stress testing and *contingency funding plan rules* in ■ BIPRU 12.4). The *appropriate regulator* offers some *guidance* in this section on applications of this type.

Intra-group liquidity modification: general

12.8.7 FCA PRA G The *appropriate regulator* recognises that a *firm* may be part of a wider *group* which manages its liquidity on a *group-wide* basis. A *firm* which considers that the statutory tests in section 138A of the *Act* are met may apply for an *intra-group liquidity modification* permitting it to rely on liquidity support from elsewhere in its *group*. Until a *firm* has such a modification it will need to meet the *overall liquidity adequacy rule* from its own liquidity resources. The effect of an *intra-group liquidity modification* is to modify the *overall liquidity adequacy rule* to recognise the extent to which the *appropriate regulator* is prepared to accept liquidity resources from other entities in a *firm's* group for the purposes of the *firm's* own compliance with the *overall liquidity adequacy rule*. ■ BIPRU 12.8.11G offers additional *guidance* on the likely extent of this recognition.

12.8.8 FCA PRA G ■ BIPRU 12.8.14 G to ■ BIPRU 12.8.20 G set out the *appropriate regulator's* likely approach in considering an application for an *intra-group liquidity modification* in which a *firm* seeks to rely on support from a *parent undertaking* which is constituted under the law of a country or territory outside the *United Kingdom*.

12.8.9 FCA PRA G The *appropriate regulator* may also consider an application for an *intra-group liquidity modification* where a *firm* wishes to rely on liquidity resources from an entity in its *group* other than an *overseas parent undertaking*. The *appropriate regulator* recognises that a *firm* incorporated in the *United Kingdom* and to which ■ BIPRU 12 applies may wish to rely on liquidity support from another such *firm*. In practice, the *appropriate regulator* anticipates that a *firm* applying for an *intra-group liquidity modification* in these circumstances will be asking for permission to rely on support from its *parent undertaking* in the *United Kingdom*. In any event, the *appropriate regulator* will consider such applications on a case-by-case basis and will apply the approach outlined in ■ BIPRU 12.8.14 G to ■ BIPRU 12.8.20 G where relevant and by analogy.

12.8.10 FCA PRA G The also recognises that a *firm* incorporated in the *United Kingdom* and to which ■ BIPRU 12 applies may wish to rely on liquidity support from a *subsidiary undertaking* of that *firm* which is incorporated in a country or territory outside the *United Kingdom*. The *appropriate regulator* is, however, likely to consider that an application for an *intra-group liquidity modification* that contemplates reliance for liquidity support on only, or mostly, an applicant *firm's* overseas *subsidiary undertakings* is unlikely to satisfy the tests in section 138A of the *Act*. As a general principle, and unless persuaded otherwise by an applicant *firm's* arguments in support of its application for an

intra-group liquidity modification, the *appropriate regulator* is likely to take the view that a *firm's* overseas *subsidiary undertakings* are likely to be constrained in their ability to provide meaningful levels of liquidity support to their *parent undertaking*.

12.8.11

FCA PRA

G

In each application for an *intra-group liquidity modification*, the *appropriate regulator* will consider the extent to which it is appropriate to modify the *overall liquidity adequacy rule* to allow reliance by an applicant *firm* on liquidity resources elsewhere in a *firm's* *group*. However, it is unlikely that the *appropriate regulator* would consider the conditions in section 138A of the *Act* to be met in circumstances in which the *overall liquidity adequacy rule* was modified to allow unlimited reliance on liquidity resources that are not the applicant *firm's* own. As a general principle, the *appropriate regulator* is likely to wish to ensure that, having regard to the results of an applicant *firm's* ILAA:

- (1) once modified, the *overall liquidity adequacy rule* still requires the *firm* to have adequate liquidity resources to enable it to wind down its business in an orderly and controlled manner in circumstances in which its business ceases to be viable; and
- (2) the amount of liquidity support permitted in the modification is a reasonable one having regard to the total liquidity resources of the *group* entity on which it is proposed that reliance should be placed.

12.8.12

FCA PRA

G

In determining the appropriate duration of an *intra-group liquidity modification*, the *appropriate regulator* will have regard to the role and importance of the *firm* in question in the *UK financial system*. In some cases, the *appropriate regulator* may take the view that an *intra-group liquidity modification* covering a *firm* whose role and importance in the *UK financial system* are significant ought to be reviewed more regularly than one granted in respect of a less systemically significant *firm*. The *appropriate regulator* will consider this issue in determining the appropriate duration of such a modification.

12.8.13

FCA PRA

G

In modifying the *overall liquidity adequacy rule* by means of an *intra-group liquidity modification*, the *appropriate regulator* may also modify the stress testing and *contingency funding plan rules* in ■ BIPRU 12.4 such that an applicant *firm* may achieve compliance with those *rules* by its *parent undertaking* conducting *group-wide* stress testing and preparing a *group-wide contingency funding plan* which gives adequate recognition to the position of the applicant *firm*.

Consideration of an application for an intra-group liquidity modification

12.8.14

FCA PRA

G

■ BIPRU 12.8.15 G to ■ BIPRU 12.8.20 G set out some of the matters on which the *appropriate regulator* will expect to be satisfied before granting an *intra-group liquidity modification* where permission is sought to rely on support from an *overseas parent undertaking* which is itself subject to a regime of liquidity regulation.

12.8.15

FCA PRA

G

In relation to the regime of liquidity regulation imposed by the authority that regulates for liquidity purposes an applicant *firm's* *parent undertaking* which is constituted under the law of a country or territory outside the *United Kingdom*, the *appropriate regulator* will ordinarily expect to be satisfied that:

- (1) the regime of liquidity regulation to which that *undertaking* is subject delivers outcomes as regards the regulation of that *undertaking's* *liquidity risk* that are broadly equivalent to those intended by ■ BIPRU 12; and

- (2) there is clarity as to any legal constraints imposed by the authority which regulates that *undertaking* for liquidity purposes on the provision of liquidity from that *undertaking* to the applicant *firm*.

12.8.16

FCA PRA

G

It will not always be the case that an applicant *firm* wishes to rely on a *parent undertaking*, or other *group* entity, that is itself subject to a regime of liquidity regulation, whether or not equivalent to the *appropriate regulator's*. In assessing a *firm's* application for an *intra-group liquidity modification*, the *appropriate regulator* will always have regard to the regulatory framework to which the entity on which it is proposed to rely for liquidity support is subject. Other things being equal, however, the *appropriate regulator* is more likely to be persuaded that the tests in section 138A of the *Act* are met in circumstances in which the entity on which it is proposed to rely for liquidity support is itself subject to an appropriate degree of regulation. Even where the *parent undertaking*, or other *group* entity, in question is subject to a regime of liquidity regulation, the *appropriate regulator* will in principle be more likely to grant an *intra-group liquidity modification* in circumstances in which the applicant *firm* does not accept a significant amount of retail *deposits*.

12.8.17

FCA PRA

G

In relation to an applicant *firm* wishing to rely on liquidity support from a *parent undertaking* constituted under the law of a country or territory outside the *United Kingdom*, the *appropriate regulator* will ordinarily expect to reach agreement with the authority that regulates that *undertaking* for liquidity purposes in a number of areas, including agreement that:

- (1) it will notify the *appropriate regulator* of any material or persistent breaches by that *undertaking* of that authority's liquidity rules, or of risks that such breaches are imminent;
- (2) it is satisfied with the adequacy of the *parent undertaking's* arrangements for *liquidity risk* management;
- (3) it is satisfied as to the adequacy of the *parent undertaking's* liquidity resources including:
 - (a) the size and quality of its liquid assets buffer; and
 - (b) the size and quality of any liquidity resources that are held in the *United Kingdom* for the purpose of meeting the liabilities of an applicant *firm* as they fall due;
- (4) it does not object to any undertakings given by that *parent undertaking* in respect of an applicant *firm* to ensure that the *firm* has adequate liquidity resources; and
- (5) it will have due regard to the views of the *appropriate regulator* in its supervision of the liquidity position of that *parent undertaking*.

12.8.18

FCA PRA

G

In relation to an applicant *firm* wishing to rely on liquidity support from a *parent undertaking* constituted under the law of a country or territory outside the *United Kingdom*, the *appropriate regulator* will, before granting an *intra-group liquidity modification*, ordinarily expect to have reached agreement with that *parent undertaking* that:

- (1) it will make available liquidity resources at all times to that applicant *firm* if needed;
- (2) it will enter into an undertaking in a suitable form with an applicant *firm* committing it to provide liquidity support to that *firm* on the occurrence of certain defined events;
- (3) it will ensure that the applicant *firm* maintains liquidity resources of appropriate size and quality in the *United Kingdom* for the purposes of meeting the liquidity needs of that *firm*;
- (4) it will maintain arrangements, including having adequate liquidity resources, to ensure that it, the applicant *firm* and any other entities in its *group* to which it provides liquidity support are able to wind down their businesses in an orderly and controlled manner in circumstances where its, or their, businesses cease to be viable;
- (5) it will make available to the *appropriate regulator* information in an appropriate format on *group* liquidity; and
- (6) it will participate in the *appropriate regulator's* thematic supervisory work in relation to liquidity when requested to do so by the *appropriate regulator*.

12.8.19

FCA PRA

G

The *appropriate regulator* will wish to ensure that it has adequate data at the time of consideration of the *intra-group liquidity modification* application and, if the application is granted, on a continuing basis thereafter, about the liquidity position of any *group* entity on which the applicant *firm* proposes to rely for liquidity purposes. It is therefore likely that an applicant *firm* will be asked to provide as part of its application relevant liquidity *data items* populated by the entities on which the applicant *firm* proposes to rely. It is also likely that an applicant *firm* will be asked to ensure as a condition of the modification, if granted, that the entities on which it is given permission to rely for the purpose of meeting the *overall liquidity adequacy rule* provide completed relevant *data items* to the *appropriate regulator* on a continuing basis. The frequency of *data item* submission will be determined as part of the *appropriate regulator's* consideration of the applicant *firm's* case but is in any event likely to be reflective of the *appropriate regulator's* assessment of the *liquidity risk* profile of the entities on which liquidity support is permitted.

12.8.20

FCA PRA

G

In addition, the *appropriate regulator* will also wish to understand in relation to any *group* entity on which an applicant *firm* proposes to rely for liquidity support the legal structure of the *group* and the extent to which that structure, or any relevant legal principles, may restrict the provision of timely liquidity support in appropriate amounts to the applicant *firm* when required.

Ongoing requirements

12.8.21

FCA PRA

G

The *appropriate regulator* also anticipates that an *intra-group liquidity modification* would be made subject to a number of ongoing conditions and requirements. These are likely to include:

- (1) the *appropriate regulator* receiving annual confirmation from the authority that regulates an applicant *firm's parent undertaking* for liquidity purposes that it remains satisfied with the arrangements in respect of that *undertaking* for liquidity supervision and their operation; and

- (2) an annual meeting with the same authority to discuss liquidity supervision of that *undertaking*.

Whole-firm liquidity modification: general

12.8.22

FCA PRA

G

In relation to an *incoming EEA firm* or *third country BIPRU firm*, the *overall liquidity adequacy rule* provides that, for the purpose of complying with that *rule*, a *firm* may not, in relation to its *UK branch*, include liquidity resources other than those which satisfy the conditions in ■ BIPRU 12.2.3 R. Those conditions seek to ensure that a *firm* of this kind has a reserve of liquidity for operational purposes that is under the control of, and available for use by, that *firm's UK branch*. Further *guidance* is given in ■ BIPRU 12.5.39 G in relation to the local operational liquidity reserve. In addition, ■ BIPRU 12.9.10 G explains how the *appropriate regulator* will approach the giving of *individual liquidity guidance* to an *incoming EEA firm* or *third country BIPRU firm*. The *appropriate regulator* does, however, recognise that there are circumstances in which it may be appropriate for a *UK branch* to rely on the availability of liquidity resources from elsewhere within the *firm*. A *firm* wishing to rely on support of this kind for its *UK branch* may apply for a modification to the *overall liquidity adequacy rule* where it considers that the statutory tests in section 138A of the *Act* are met.

12.8.23

FCA PRA

G

Although an *incoming EEA firm* or *third country BIPRU firm* may apply to modify the *overall liquidity adequacy rule* and other *rules* in ■ BIPRU 12, in relation to its *UK branch*, the *appropriate regulator* anticipates that many such *firms* will wish to apply for a modification in the form which the *appropriate regulator* defines as a *whole-firm liquidity modification*. In the *appropriate regulator's* view, a modification to the *overall liquidity adequacy rule* for a *firm* of this kind will tend to be appropriate where an applicant *firm* manages its liquidity on an integrated, *whole-firm* basis. Where that is the case, and having regard to the matters outlined in the *guidance* in this section, the *appropriate regulator* is likely to consider it more appropriate for the *UK branch* to be subject, in large part, to the same regulatory liquidity regime which applies to the rest of the *firm*. In granting a *whole-firm liquidity modification* the *appropriate regulator* therefore recognises that in certain circumstances a *UK branch* can have adequate liquidity resources in circumstances where the liquidity resources upon which the *firm* seeks to rely do not meet the criteria set out in ■ BIPRU 12.2.3 R.

12.8.24

FCA PRA

G

Accordingly, a *whole-firm liquidity modification* envisages:

- (1) a modification to the *overall liquidity adequacy rule* so as to permit reliance by the *firm*, in relation to its *UK branch*, on liquidity resources wherever held in the *firm* for the purposes of meeting that *rule*; and
- (2) a *waiver* of the remainder of the substantive *rules* in ■ BIPRU 12, with the effect that the *UK branch* of the applicant *firm* becomes subject for the purpose of day-to-day liquidity supervision to the liquidity regime of the *Home State regulator* or *third country competent authority* in question.

12.8.25

FCA PRA

G

The effect of a *whole-firm liquidity modification* is that the *appropriate regulator* will in its supervision of the liquidity of the *UK branch* place reliance on the liquidity regime of the *Home State regulator* or *third country competent authority* in question. The *appropriate regulator* will wish to ensure that it has adequate data at the time of consideration of the *whole-firm liquidity modification* application and, if the application is granted, on a continuing basis thereafter, about the liquidity position of the *firm* as a whole. It is therefore likely that an applicant *firm* will be asked to provide as part

of its application relevant liquidity *data items* covering the liquidity position of the *firm* as a whole. It is also likely that an applicant *firm* will be asked, as part of its application, to provide an appropriately detailed account as to the activities conducted by its *UK branch* as at the date of the application. In addition, the *appropriate regulator* anticipates that an applicant *firm* will be asked to ensure as a condition of the modification, if granted, that it provides relevant *data items*, covering the whole-*firm* liquidity position, to the *appropriate regulator* on a continuing basis at a frequency to be determined as part of the *appropriate regulator's* consideration of the applicant *firm's* case but in any event likely to be reflective of the *appropriate regulator's* assessment of the *liquidity risk* profile of the *firm*.

Consideration of an application for a whole-firm liquidity modification

12.8.26

FCA PRA

G

In relation to the *Home State regulator's* or *third country competent authority's* regime of liquidity regulation, the *appropriate regulator* will, before granting a *whole-firm liquidity modification*, ordinarily expect to be satisfied that:
