controller

FCA PRA

(1) (in relation to a *firm* or other *undertaking* ("B"), other than a *non-directive firm*) a *person* ("A") who (whether acting alone or in concert):

(a) holds 10% or more of the *shares* in B or in a *parent undertaking* ("P") of B;

(b) holds 10% or more of the *voting power* in B or in P; or

(c) holds *shares* or *voting power* in B or P as a result of which A is able to exercise significant influence over the management of B.

(2) (in relation to a *non-directive firm* ("B")) a *person* ("A") who (whether acting alone or in concert):

(a) holds 20% or more of the *shares* in B or in a *parent undertaking* ("P") of B;

(b) holds 20% or more of the *voting power* in B or in P; or

(c) holds *shares* or *voting power* in B or P as a result of which A is able to exercise significant influence over the management of B.

(3) for the purposes of calculations relating to (1) and (2), the holding of *shares* or *voting power* by a *person* ("A1") includes any *shares* or *voting power* held by another ("A2") if A1 and A2 are acting in concert.

(4) *shares* and *voting power* that a *person* holds in a *firm* ("B") or in a *parent undertaking* of B ("P") are disregarded for the purposes of determining *control* in the following circumstances:

(a) *shares* held for the sole purposes of clearing and settling within a short settlement cycle;

(b) *shares* held by a *custodian* or its nominee in its custodian capacity are disregarded, provided that the *custodian* or nominee is only able to exercise *voting power* attached to the *shares* in accordance with instructions given in writing;

(c) *shares* representing no more than 5% of the total voting power in B or P held by an *investment firm*, provided that:

(i) it holds the *shares* in the capacity of a *market maker* (as defined in article 4.1(8) of MIFID);

(ii) it is authorised by its *Home State regulator* under MIFID; and

(iii) it does not intervene in the management of B or P nor exerts any influence on B or P to buy the *shares* or back the share price;

(d) *shares* held by a *credit institution* or *investment firm* in its *trading book* are disregarded, provided that:

(i) the *shares* represent no more than 5% of the total *voting power* in B or P; and

- (ii) the *credit institution* or *investment firm* ensures that the *voting power* is not used to intervene in the management of B or P;
- (e) *shares* held by a *credit institution* or an *investment firm* are disregarded, provided that:
- (i) the *shares* are held as a result of performing the *investment services* and activities of:
 - (A) underwriting share issues; or
 - (B) placing shares on a firm commitment basis in accordance with Annex I, section A.6 of MIFID; and
 - (ii) the *credit institution* or *investment firm*:
 - (A) does not exercise *voting power* represented by the *shares* or otherwise intervene in the management of the issuer; and
 - (B) retains the holding for a period of less than one year;
- (f) where a *management company* and its *parent undertaking* both hold *shares* or *voting power*, each may disregard holdings of the other, provided that each exercises its *voting power* independently of the other;
- (g) but (f) does not apply if the *management company*:
- (i) manages holdings for its *parent undertaking* or an *undertaking* in respect of which the *parent undertaking* is a *controller*;
 - (ii) has no discretion to exercise the *voting power* attached to such holdings; and
 - (iii) may only exercise the *voting power* in relation to such holdings under direct or indirect instruction from:
 - (A) its *parent undertaking*; or
 - (B) an *undertaking* in respect of which of the *parent undertaking* is a *controller*;
- (h) where an *investment firm* and its *parent undertaking* both hold *shares* or *voting power*, the *parent undertaking* may disregard holdings managed by the *investment firm* on a client by client basis and the *investment firm* may disregard holdings of the *parent undertaking*, provided that the *investment firm*:
- (i) has permission to provide *portfolio management*;
 - (ii) exercises its *voting power* independently from the *parent undertaking*; and
 - (iii) may only exercise the *voting power* under instructions given in writing, or has appropriate mechanisms in place for ensuring that individual portfolio management services are conducted independently of any other services.

(a) *designated investment business* carried on by a *firm* with or for:

(i) any *issuer*, holder or owner of *designated investments*, if that business relates to the *offer*, issue, underwriting, repurchase, exchange or redemption of, or the variation of the terms of, those *investments*, or any related matter;

(ii) any *eligible counterparty* or *professional client*, or other *body corporate*, *partnership* or supranational organisation, if that business relates to the manner in which, or the terms on which, or the *persons* by whom, any business, activities or undertakings relating to it, or any *associate*, are to be financed, structured, managed, controlled, regulated or reported upon;

(iii) any *person* in connection with:

(A) a proposed or actual *takeover or related operation* by or on behalf of that *person*, or involving *investments* issued by that *person* (being a *body corporate*), its *holding company*, *subsidiary* or *associate*; or

(B) a merger, de-merger, reorganisation or reconstruction involving any *investments* issued by that *person* (being a *body corporate*), its holding company, subsidiary or *associate*;

(iv) any shareholder or prospective shareholder of a *body corporate* established or to be established for the purpose of effecting a *takeover or related operation*, where that business is in connection with that *takeover or related operation*;

(v) any *person* who, acting as a *principal* for his own account:

(A) is involved in negotiations or decisions relating to the commercial, financial or strategic intentions or requirements of a business or prospective business; or

(B) (provided he is acting otherwise than solely in his capacity as an investor) assists the interests of another *person* with or for whom the *firm*, or another *authorised person* or *overseas person*, is undertaking business as specified in (a)(i), (ii), (iii) or (iv), by himself undertaking all or part of any transactions involved in such business;

(vi) any *person* undertaking business with or for a *person* as specified in (a)(i), (ii), (iii), (iv) or (v) in respect of activities described in those sub-paragraphs;

(b) *designated investment business* carried on by a *firm* as a *principal* for its own account where such business:

(i) is in the course of, or arises out of, activities undertaken in accordance with (a); and

(ii) does not involve transactions with or for, or *advice on investments* to, any other *person* who is a *retail client* in respect of such business;

(c) *designated investment business* carried on by a *firm* as *principal* for its own account if such business:

(i) is in the course of, or arises out of:

(A) the *offer*, issue, underwriting, repurchase, exchange or redemption of, or the variation of the terms of, *shares*, share warrants, *debentures* or debenture warrants issued by the *firm*, or any related matter; or

(B) a proposed or actual *takeover or related operation* by or on behalf of the *firm*, or involving *shares*, share warrants, *debentures* or debenture warrants issued by the *firm*; or

(C) a merger, de-merger, reorganisation or reconstruction involving any *shares*, share warrants, *debentures* or debenture warrants issued by the *firm*; and

(ii) does not involve *advice on investments* to any *person* who is a *retail client* ;

in this definition, "share warrants" and "debenture warrants" mean any *warrants* which relate to *shares* in the *firm* concerned or, as the case may be, *debentures* issued by the *firm*.

distance contract

FCA PRA

any contract concerning financial services concluded between a *supplier* and a *consumer* under an organised distance sales or service provision scheme run by the *supplier* which, for the purpose of that contract, makes exclusive use (directly or through an intermediary) of one or more means of distance communication (that is, any means which, without the simultaneous physical presence of the *supplier* or intermediary and the *consumer*, may be used for the distance marketing of a service between those parties) up to and including the time at which the contract is concluded.

A contract is not a distance contract if:

(a) making, performing or marketing it does not constitute or form part of a *regulated activity*; or

(b) it is entered into on a strictly occasional basis outside a commercial structure dedicated to the conclusion of distance contracts; or

(c) a *consumer*, and an intermediary acting for a product provider, are simultaneously physically present at some stage before the conclusion of the contract; or

(d) it is entered into to comply with the requirement in Part 1 of the Pensions Act 2008 to automatically enrol or re-enrol employees into an *automatic enrolment scheme*.

[Note: recitals 15 and 18 to, and articles 2(a) and (e) of, the *Distance Marketing Directive*]

FCA **PRA**

a *distance contract*, the making or performance of which constitutes, or is part of:

- (a) *advising on a regulated sale and rent back agreement*; or
- (b) *arranging (bringing about) a regulated sale and rent back agreement*; or
- (c) *making arrangements with a view to a regulated sale and rent back agreement*; or
- (d) *agreeing to carry on a regulated sale and rent back mediation activity* in (a) to (c).

distance selling contract

FCA **PRA**

(in *BCOBS*) has the same meaning as "distance contract" in the Consumer Protection (Distance Selling) Regulations 2000 (SI 2000/2334).

distribution account

FCA **PRA**

(in *COLL*) the account to which the amount of income of an *authorised fund* allocated to *classes of units* that distribute income must be transferred as at the end of each *annual accounting period* under ■ *COLL 6.8.3 R* (Income allocation and distribution) or ■ *COLL 8.5.15 R* (Income) .

distribution channels

FCA **PRA**

a channel through which information is, or is likely to become, publicly available. Information which is "likely to become publicly available" means information to which a large number of *persons* have access.

[Note: article 2(1) of the *MiFID implementing Directive*]

distribution of exposures

FCA **PRA**

(in accordance with Part 1 of Annex III of the *Banking Consolidation Directive* (Definitions) and for the purpose of **■ BIPRU 13** (The calculation of counterparty risk exposure values for financial derivatives, securities financing transactions and long settlement transactions)) the forecast of the probability distribution of market values that is generated by setting forecast instances of negative net market values equal to zero.

distribution of market values

FCA **PRA**

(in accordance with Part 1 of Annex III of the *Banking Consolidation Directive* (Definitions) and for the purpose of **■ BIPRU 13** (The calculation of counterparty risk exposure values for financial derivatives, securities financing transactions and long settlement transactions)) the forecast of the probability distribution of net market values of transactions within a *netting set* for some future date (the forecasting horizon), given the realised market value of those transactions up to the present time.

DLG by default

FCA **PRA**

(A) In the PRA Handbook:

(in relation to a *UK ILAS BIPRU firm* (a *group liquidity reporting firm*) and any reporting period under **■ SUP 16** (Reporting requirements)) the *firm* and each *person* identified in accordance with the following:

(a) (in a case in which the *firm* is the only *UK ILAS BIPRU firm* in its *group*) that *person* meets any of the following conditions for any part of that period:

(i) that *person* provides material support to the *firm* against *liquidity risk*; or

(ii) that *person* is committed to provide such support or would be committed to do so if that *person* were able to provide it; or

(iii) the *firm* has reasonable grounds to believe that that *person* would supply such support if asked or would do so if it were able to provide it; or

(iv) the *firm* provides material support to that *person* against *liquidity risk*; or

(v) the *firm* is committed to provide such support to that *person* or would be committed to do so if the *firm* were able to provide it; or

(vi) the *firm* has reasonable grounds to believe that that *person* would expect the *firm* to supply such support if asked or that the *firm* would do so if it were able to provide it; or

(b) (in a case in which the *firm* is not the only *UK ILAS BIPRU firm* in its *group*):

(i) each of those other *UK ILAS BIPRU firms*; and

(ii) each *person* identified by applying the tests in (a) separately to the *firm* and to each of those other *UK ILAS BIPRU firms*, so that applying (b) to the *firm* and to each of those *UK ILAS BIPRU firms* results in their having the same *defined liquidity group*;

(iii) no *DLG by default* exists where the group consists only of *UK ILAS BIPRU firms*.

The following provisions also apply for the purpose of this definition.

(c) A *person* is not a member of a firm's *DLG by default* unless it also satisfies one of the following conditions:

(i) it is a member of the *firm's group*; or

(ii) it is a *securitisation special purpose entity* or a *special purpose vehicle*; or

(iii) it is an *undertaking* whose main purpose is to raise funds for the *firm* or for a *group* to which that *firm* belongs.

(ca) In the case of a *group liquidity reporting firm* that is within paragraph (a) of the definition of *UK lead regulated firm* (it is not part of a group that is subject to consolidated supervision by the *FCA* or the *PRA* or any other *regulatory body*), paragraph (c)(i) of the definition of *DLG by default* is amended so that it only includes a member of the *firm's group* that falls into one of the following categories:

(i) it is a *credit institution*; or

(ii) it is an *investment firm* or *third country investment firm* authorised to *deal on own account*.

For these purposes:

(iii) *credit institution* has the meaning used in ■ SUP 16 (Reporting requirements), namely either of the following:

(A) a credit institution authorised under the *CRD*; or

(B) an institution which would satisfy the requirements for authorisation as a credit institution under the *CRD* if it had its registered office (or if it does not have a registered office, its head office) in an *EEA State*; and

(iv) a *person* is authorised to *deal on own account* if:

(A) it is a *firm* and its *permission* includes that activity; or

(B) it is an *EEA firm* and it is authorised by its *Home State regulator* to do that activity; or

(C) (if the carrying on of that activity is prohibited in a state or territory without an authorisation in that state or territory) that *person* has such an authorisation.

(d) *Group* has the meaning in paragraph (1) of the definition in the *Glossary* (the definition in section 421 of the *Act*).

(e) The conditions in (a) are satisfied even if the *firm* or *person* in question provides or is committed or expected to provide support for only part of the period. (f) In deciding for the purpose

(f) In deciding for the purpose of (a) or (b) whether the *firm* is the only *UK ILAS BIPRU firm* in its *group* and identifying which are the other *UK ILAS BIPRU firms* in its *group*, any *group* member that is a member of the *group* through no more than a *participation* is ignored.

(g) A *firm* has a *DLG by default* for a period even if it only has one during part of that period.

(h) Liquidity support may be supplied by or to the *firm* directly or indirectly.

(i) Support is material if it is material either by reference to the *person* giving it or by reference to the *person* receiving it.

(*Guidance* about this definition, and its inter-relation with other related definitions, is set out in ■ SUP 16 Annex 26 G (*Guidance on designated liquidity groups in* ■ SUP 16.12).)

(B) In the FCA Handbook:

(in relation to a *UK ILAS BIPRU firm* (a *group liquidity reporting firm*) and any reporting period under ■ SUP 16 (Reporting requirements)) the *firm* and each *person* identified in accordance with the following:

(a) (in a case in which the *firm* is the only *UK ILAS BIPRU firm* in its *group*) that *person* meets any of the following conditions for any part of that period:

(i) that *person* provides material support to the *firm* against *liquidity risk*; or

(ii) that *person* is committed to provide such support or would be committed to do so if that *person* were able to provide it; or

(iii) the *firm* has reasonable grounds to believe that that *person* would supply such support if asked or would do so if it were able to provide it; or

(iv) the *firm* provides material support to that *person* against *liquidity risk*; or

(v) the *firm* is committed to provide such support to that *person* or would be committed to do so if the *firm* were able to provide it; or

(vi) the *firm* has reasonable grounds to believe that that *person* would expect the *firm* to supply such support if asked or that the *firm* would do so if it were able to provide it; or

(b) (in a case in which the *firm* is not the only *UK ILAS BIPRU firm* in its *group*):

- (i) each of those other *UK ILAS BIPRU firms*; and
- (ii) each *person* identified by applying the tests in (a) separately to the *firm* and to each of those other *UK ILAS BIPRU firms*, so that applying (b) to the *firm* and to each of those *UK ILAS BIPRU firms* results in their having the same *defined liquidity group*;
- (iii) no *DLG by default* exists where the group consists only of *UK ILAS BIPRU firms*.

The following provisions also apply for the purpose of this definition.

(c) A *person* is not a member of a firm's *DLG by default* unless it also satisfies one of the following conditions:

- (i) it is a member of the *firm's group*; or
- (ii) it is a *securitisation special purpose entity* or a *special purpose vehicle*; or
- (iii) it is an *undertaking* whose main purpose is to raise funds for the *firm* or for a *group* to which that *firm* belongs.

(ca) In the case of a *group liquidity reporting firm* that is within paragraph (a) of the definition of *UK lead regulated firm* (it is not part of a group that is subject to consolidated supervision by the *FCA* or the *PRA* or any other *regulatory body*), paragraph (c)(i) of the definition of *DLG by default* is amended so that it only includes a member of the *firm's group* that falls into one of the following categories:

- (i) it is a *credit institution*; or
- (ii) it is an *investment firm* or *third country investment firm* authorised to *deal on own account*.

For these purposes:

- (iii) *credit institution* has the meaning used in ■ SUP 16 (Reporting requirements), namely either of the following:
 - (A) a credit institution authorised under the *CRD* or
 - (B) an institution which would satisfy the requirements for authorisation as a credit institution under the *CRD* if it had its registered office (or if it does not have a registered office, its head office) in an *EEA State*; and
- (iv) a *person* is authorised to *deal on own account* if:

(A) it is a *firm* and its *permission* includes that activity; or

(B) it is an *EEA firm* and it is authorised by its *Home State regulator* to do that activity; or

(C) (if the carrying on of that activity is prohibited in a state or territory without an authorisation in that state or territory) that *person* has such an authorisation.

(d) *Group* has the meaning in paragraph (1) of the definition in the *Glossary* (the definition in section 421 of the *Act*).

(e) The conditions in (a) are satisfied even if the *firm* or *person* in question provides or is committed or expected to provide support for only part of the period. (f) In deciding for the purpose

(f) In deciding for the purpose of (a) or (b) whether the *firm* is the only *UK ILAS BIPRU firm* in its *group* and identifying which are the other *UK ILAS BIPRU firms* in its *group*, any *group* member that is a member of the group through no more than a *participation* is ignored.

(g) A *firm* has a *DLG by default* for a period even if it only has one during part of that period.

(h) Liquidity support may be supplied by or to the *firm* directly or indirectly.

(i) Support is material if it is material either by reference to the *person* giving it or by reference to the *person* receiving it.

(*Guidance* about this definition, and its inter-relation with other related definitions, is set out in ■ SUP 16 Annex 26 G (Guidance on designated liquidity groups in ■ SUP 16.12).)

DLG by
modification

FCA PRA

(1) (except in relation to an *ICVC* and except for the purposes of ■ SYSC 12 (Group risk systems and controls requirement) and *LR*) as defined in section 421 of the *Act* (Group) (in relation to a *person* ("A")) A and any *person* who is:

- (a) a *parent undertaking* of A;
- (b) a *subsidiary undertaking* of A;
- (c) a *subsidiary undertaking* of a *parent undertaking* of A;
- (d) a *parent undertaking* of a *subsidiary undertaking* of A;
- (e) an *undertaking* in which A or an *undertaking* in (a) to (d) has a participating interest;
- (f) if A or an *undertaking* in (a) or (d) is a *building society*, an associated undertaking of that *building society*;
- (g) if A or an *undertaking* in (a) or (d) is an *incorporated friendly society*, a *body corporate* of which that *friendly society* has joint control (as defined in section 13(9)(c) or (cc) of the Friendly Societies Act 1992); in this definition:

(i) "participating interest" has the same meaning as in:

(A) Part VII of the Companies Act 1985 or Part VIII of the Companies (Northern Ireland) Order 1986, where these provisions are applicable; or

(B) paragraph 11(1) of Schedule 10 to the Large and Medium-sized Companies and Groups (Accounts and Reports)

Regulations 2008 (SI 2008/410) where applicable; or

(C) paragraph 8 of Schedule 7 to the Small Companies and Groups (Accounts and Directors' Report) Regulations 2008 (SI 2008/409) where applicable; or

(D) paragraph 8 of Schedule 4 to the Large and Medium-sized Limited Liability Partnerships (Accounts) Regulations 2008 (SI 2008/1913) where applicable; or

(E) paragraph 8 of Schedule 5 to the Small Limited Liability Partnerships (Accounts) Regulations 2008 (SI 2008/1912) where applicable;

In (A) to (E), the meaning also includes an interest held by an individual which would be a participating interest for the purposes of those provisions if he were an *undertaking*.

(ii) "associated undertaking" has the meaning given in section 119(1) of the Building Societies Act 1986.

(2) (in relation to an *ICVC*) a group as in (1) but (in *SYSC*) including also the *ICVC's authorised corporate director* (if any). (see also *immediate group*)

(3) (for the purposes of ■ *SYSC 12* (Group risk systems and controls requirement), ■ *SYSC 20* (Reverse stress testing) and ■ *GENPRU 1.2* (Adequacy of financial resources) and in relation to a *person "A"*) A and any *person*:

(a) who falls into (1);

(b) who is a member of the same *financial conglomerate* as A;

(a) who falls into (1);

(b) who is a member of the same *financial conglomerate* as A;

(c) who has a *consolidation Article 12(1) relationship* with A;

(d) who has a *consolidation Article 12(1) relationship* with any *person* in (3)(a);

(e) who is a *subsidiary undertaking* of a person in (3)(c) or (3)(d); or

(f) whose omission from an assessment of the risks to A of A's connection to any *person* coming within (3)(a)-(3)(e) or an assessment of the financial resources available to such *persons* would be misleading.

(3A) (for the purposes of ■ *SYSC 12* (Group risk systems and controls requirement) and ■ *SYSC 20* (Reverse stress testing), as applicable to an *IFPRU investment firm* and *IFPRU*) and in relation to a *person "A"*, A and any *person*:

(a) who falls into (1);

(b) who is a member of the same *financial conglomerate* as A;

(c) who has a *consolidation Article 12(1) relationship* with A;

(d) who has a *consolidation Article 12(1) relationship* with any *person* in (a);

(e) who is a *subsidiary* of a *person* in (c) or (d);

(f) whose omission from an assessment of the risks to A of A's connection to any *person* coming within (a) to (e) or an assessment of the financial resources available to such *persons* would be misleading.

(4) (in *LR*):

(a) (except in ■ *LR 6.1.19 R* and *LR 8.7.8R (10)*) an *issuer* and its *subsidiary undertakings* (if any); and

(b) in ■ *LR 6.1.19 R* and *LR 8.7.8R (10)*, as defined in section 421 of the Act.

(5) (in relation to a *common platform firm*) means the group of which that *firm* forms a part, consisting of a parent undertaking, its subsidiaries and the entities in which the parent undertaking or its subsidiaries hold a participation, as well as undertakings linked to each other by a relationship within the meaning of Article 12(1) of Directive 83/349/EEC on consolidated accounts.

(in accordance with article 63F(3) of the *Regulated Activities Order*) an arrangement comprised in one or more instruments or agreements which meets the following conditions at the time it is entered into:

- (a) the arrangement is one under which a *person* (the 'home purchase provider') buys a *qualifying interest in land* or an undivided share of a *qualifying interest in land*;
- (b) where an undivided share of a *qualifying interest in land* is bought, the interest is held on trust for the home purchase provider and the individual or trustees in (c) as beneficial tenants in common;
- (c) the arrangement provides for the obligation of an individual or trustees (the *home purchaser*) to buy the interest bought by the home purchase provider during the course of or at the end of a specified period; and
- (d) the *home purchaser* (if he is an individual) or an individual who is a beneficiary of the trust (if the *home purchaser* is a trustee), or a related person, is entitled under the arrangement to occupy at least 40% of the land in question as or in connection with a dwelling during that period and intends to do so;

in this definition "related person" means:

- (A) that *person's* spouse or civil partner;
- (B) a *person* (whether or not of the opposite sex) whose relationship with that *person* has the characteristics of the relationship between husband and wife; or
- (C) that *person's* parent, brother, sister, child, grandparent or grandchild.

(ii) in the case of trustees, are trustees of a trust a beneficiary of which is an individual described in (i).

(in accordance with article 63B(3) of the *Regulated Activities Order*) an arrangement comprised in one or more instruments or agreements which meets the following conditions at the time it is entered into:

(a) the arrangement is one under which a *person* (the *reversion provider*) buys all or part of a *qualifying interest in land* from an individual or trustees (the *reversion occupier*);

(b) the *reversion occupier* (if he is an individual) or an individual who is a beneficiary of the trust (if the *reversion occupier* is a trustee), or a related person, is entitled under the arrangement to occupy at least 40% of the land in question as or in connection with a dwelling and intends to do so; and

(c) the arrangement specifies that the entitlement to occupy will end on the occurrence of one or more of:

(i) a *person* in (b) becoming a resident of a care home;

(ii) a *person* in (b) dying; or

(iii) the end of a specified period of at least twenty years from the date the *reversion occupier* entered into the arrangement;

in this definition "related person" means:

(A) that *person's* spouse or civil partner;

(B) a *person* (whether or not of the opposite sex) whose relationship with that *person* has the characteristics of the relationship between husband and wife; or

(C) that *person's* parent, brother, sister, child, grandparent or grandchild.

Home State

FCA PRA

(A) In the PRA Handbook:

(1) (in relation to a *credit institution*) the *EEA State* in which the *credit institution* has been authorised in accordance with the CRD.

(2) (in relation to an *investment firm*):

(a) if the *investment firm* is a natural *person*, the *EEA State* in which his head office is situated;

(b) if the *investment firm* is a legal *person*, the *EEA State* in which its registered office is situated; or

(c) if the *investment firm* has, under its national law, no registered office, the *EEA State* in which its head office is situated.

[Note: article 4(1)(20) of *MiFID*]

(3) (in relation to a *UCITS management company*) the *EEA State* in which the management company's registered office is situated;

(4) (in relation to an *insurance undertaking* with an *EEA right*) the *EEA State* in which the registered office of the *insurance undertaking* is situated.

material currency

FCA PRA

(a) *Material currencies*, in respect of a *firm* at any time, are currencies determined in accordance with the following.

(b) First, the amount of its assets and the amount of its liabilities in each currency (ignoring the sign) are separately calculated. The figures are as shown in the most recent *data item* FSA054 submitted to the *appropriate regulator*.

(c) Then, each such amount is converted into the reporting currency for the *data item* referred to in (b).

(d) Each currency (which may include the reporting currency) that represents 20% or more of the total asset figure or 20% or more of the total liabilities figure is a *material currency*.

(e) A currency is also a *material currency* if it is identified by the *firm's* current:

- (i) *Individual Liquidity Adequacy Assessment*; or
- (ii) *Individual Liquidity Systems Assessment*; or
- (iii) *ILG* that has been accepted by the *firm*;

as being significant in the context of cross-currency *liquidity risk* (as referred to in *BIPRU 12.5* (Individual Liquidity Adequacy Standards)).

(f) The conversion rate for a currency into the reporting currency is the exchange rate on the date as of which the calculation is being made.

(g) The reporting currency means the currency in which the most recent *data item* FSA054 (as referred to in (b)) is reported.

(h) A currency is a *material currency* in relation to a *firm's branch* or a *defined liquidity group* of which it is a *group liquidity reporting firm* if it is identified as such in accordance with the procedures in the previous paragraphs of this definition except that the identification is carried out by reference to that *branch* or *defined liquidity group*. For these purposes, *data item* FSA054 for the *reporting level* concerned is used.

(1) (in accordance with section 420 of the *Act* (Parent and subsidiary undertaking) and section 1162 of the *Companies Act 2006* (Parent and subsidiary undertakings)):

(a) (in relation to whether an *undertaking*, other than an *incorporated friendly society*, is a *parent undertaking* and except for the purposes described in (c)) an *undertaking* which has the following relationship to another *undertaking* ("S"):

- (i) it holds a majority of the voting rights in S; or
- (ii) it is a member of S and has the right to appoint or remove a majority of its board of directors; or
- (iii) it has the right to exercise a dominant influence over S through:

(A) provisions contained in S's memorandum or articles; or

(B) a control contract; or

- (iv) it is a member of S and controls alone, under an agreement with other shareholders or members, a majority of the voting rights in S; or

(v)

(A) it has the power to exercise, or actually exercises, dominant influence or control over S; or

(B) it and S are managed on a unified basis; or

- (vi) it is a parent undertaking of a parent undertaking of S; or

(vii) (except in *REC* or for the purposes of the *rules* in *GENPRU* and *INSPRU* as they apply to *members* of the *Society* of Lloyd's or to the *Society* or *managing agents* in respect of *members*) he is an individual and would be a *parent undertaking* if he were an *undertaking*; or

(viii) (except in *REC* or for the purposes of *rules* in *GENPRU* and *INSPRU* as they apply to *members* of the *Society* of Lloyd's or to the *Society* or *managing agents* in respect of *members*) it is incorporated in or formed under the law of another *EEA State* and is a parent undertaking within the meaning of any rule of law in that State for purposes connected with implementation of the Seventh Company Law Directive;

in relation to (ii) and (iv); the *undertaking* will be treated as a member of S if any of its *subsidiary undertakings* is a member of S, or if any shares in S are held by a *person* acting on behalf of the *undertaking* or any of its *subsidiary undertakings*; the provisions of Schedule 7 to the Companies Act 2006 (Parent and subsidiary undertakings: supplementary provisions) explain the expressions used in and supplement paragraphs (i) to (vi);

(b) (in relation to whether an incorporated friendly society is a parent undertaking and except for the purposes escribed in (c)) an *incorporated friendly society* which has the following relationship to a *body corporate* ("S"):

Principles for Businesses

negative effect on confidence in the *UK financial system*. In considering whether to take regulatory action under these *Principles* in relation to activities carried on outside the *United Kingdom*, the *appropriate regulator* will take into account the standards expected in the market in which the *firm* is operating. *Principle 11* (Relations with regulators) applies to world-wide activities; in considering whether to take regulatory action under *Principle 11* in relation to cooperation with an overseas regulator, the *appropriate regulator* will have regard to the extent of, and limits to, the duties owed by the *firm* to that regulator. (*Principle 4* (Financial prudence) also applies to world-wide activities.)

1.1.6A

FCA PRA

G

■ PRIN 4 (Principles : MiFID Business) provides *guidance* on the application of the *Principles* to *MiFID business*.

Consequences of breaching the Principles

1.1.7

FCA PRA

G

Breaching a *Principle* makes a *firm* liable to disciplinary sanctions. In determining whether a *Principle* has been breached it is necessary to look to the standard of conduct required by the *Principle* in question. Under each of the *Principles* the onus will be on the *appropriate regulator* to show that a *firm* has been at fault in some way. What constitutes "fault" varies between different *Principles*. Under *Principle 1* (Integrity), for example, the *appropriate regulator* would need to demonstrate a lack of integrity in the conduct of a *firm's* business. Under *Principle 2* (Skill, care and diligence) a *firm* would be in breach if it was shown to have failed to act with due skill, care and diligence in the conduct of its business. Similarly, under *Principle 3* (Management and control) a *firm* would not be in breach simply because it failed to control or prevent unforeseeable risks; but a breach would occur if the *firm* had failed to take reasonable care to organise and control its affairs responsibly or effectively.

1.1.8

FCA

G

The *Principles* are also relevant to the *FCA's* powers of information-gathering, to vary a *firm's Part 4A permission*, and of investigation and intervention, and provide a basis on which the *FCA* may apply to a court for an *injunction* or restitution order or require a *firm* to make restitution. However, the *Principles* do not give rise to actions for damages by a *private person* (see ■ PRIN 3.4.4 R).

1.1.8A

PRA

G

The *Principles* are also relevant to the *PRA's* powers of information-gathering, to vary a *firm's Part 4A permission*, and of investigation and intervention, and provide a basis on which the *PRA* may apply to a court for an *injunction* or restitution order or require a *firm* to make restitution.

1.1.9

FCA PRA

G

Some of the other *rules* and *guidance* in the *Handbook* deal with the bearing of the *Principles* upon particular circumstances. However, since the *Principles* are also designed as a general statement of regulatory requirements applicable in new or unforeseen situations, and in situations in which there is no need for *guidance*, the *appropriate regulator's* other *rules* and *guidance* should not be viewed as exhausting the implications of the *Principles* themselves.

Responsibilities of providers and distributors under the Principles

1.1.10

FCA

G

RPPD contains *guidance* on the responsibilities of providers and distributors for the fair treatment of *customers* under the *Principles*.

1.2 Clients and the Principles

Characteristics of the client

1.2.1

FCA PRA

G

Principles 6 (Customers' interests), *7* (Communications with clients), *8* (Conflicts of interest), *9* (Customers: relationships of trust) and *10* (Clients' assets) impose requirements on *firms* expressly in relation to their *clients* or *customers*. These requirements depend, in part, on the characteristics of the *client* or *customer* concerned. This is because what is "due regard" (in *Principles 6* and *7*), "fairly" (in *Principles 6* and *8*), "clear, fair and not misleading" (in *Principle 7*), "reasonable care" (in *Principle 9*) or "adequate" (in *Principle 10*) will, of course, depend on those characteristics. For example, the information needs of a general insurance broker will be different from those of a retail general insurance *policyholder*.

FCA

G

Principles 6, *8* and *9* and parts of *Principle 7*, as qualified by ■ PRIN 3.4.1 R, apply only in relation to *customers* (that is, *clients* which are not *eligible counterparties*). The approach that a *firm* needs to take regarding categorisation of *clients* into *customers* and *eligible counterparties* will depend on whether the *firm* is carrying on *designated investment business* or other activities, as described in ■ PRIN 1.2.3 G .

1.2.3

FCA

- (1) In relation to the carrying on of *designated investment business*, a *firm's* categorisation of a *client* under the COBS *client* categorisation chapter (■ COBS 3) will be applicable for the purposes of *Principles 6*, *7*, *8* and *9*.
- (2) The *person* to whom a *firm* gives *basic advice* on a *stakeholder product* will be a *retail client* for all purposes, including the purposes of *Principles 6*, *7*, *8* and *9*.
- (3) In relation to carrying on activities other than *designated investment business* (for example, *general insurance business* or *accepting deposits*) the *firm* may choose to comply with *Principles 6*, *7*, *8* and *9* as if all its *clients* were *customers*. Alternatively, it may choose to distinguish between *eligible counterparties* and *customers* in complying with those *Principles*. If it chooses to make such a distinction, it must comply with ■ PRIN 1 Annex 1 R in determining whether that *client* is an *eligible counterparty* (see ■ PRIN 3.4.2 R). In doing so, the requirements in SYSC will apply, including the requirement to make and retain adequate records.
- (4) In relation to carrying on activities that fall within both (1) and (3) (for example, mixed *designated investment business* and *accepting deposits*), a

R

PRIN applies to every *firm*, except that:

- (1) for an *incoming EEA firm* or an *incoming Treaty firm*, the *Principles* apply only in so far as responsibility for the matter in question is not reserved by an *EU instrument* to the *firm's Home State regulator*;
- (2) for an *incoming EEA firm* which is a *CRD credit institution* without a *top-up permission*, *Principle 4* applies only in relation to the liquidity of a *branch* established in the *United Kingdom*;
- (3) for an *incoming EEA firm* which has *permission* only for *cross border services* and which does not carry on *regulated activities* in the *United Kingdom*, the *Principles* do not apply;
- (4) for a *UCITS qualifier* and *AIFM qualifier*, only *Principles 1, 2, 3, 7 and 9* apply, and only with respect to the activities in ■ PRIN 3.2.2 R (Communication and approval of financial promotions) ;
- (5) *PRIN* does not apply to an *incoming ECA provider* acting as such ; and
- (6) *PRIN* does not apply to a *firm* in relation to its carrying on of *auction regulation bidding*.

2.16A	R	(1) The <i>common platform requirements</i> referred to in Column A+ of Part 3 (below) apply to a <i>UK UCITS management company</i> in relation to <i>passport activities</i> carried on by it from a <i>branch</i> in another <i>EEA State</i> .
[FCA]		
		(2) Any other <i>common platform requirement</i> applies to a <i>UK UCITS management company</i> in relation to <i>passport activities</i> carried on by it from a <i>branch</i> in another <i>EEA State</i> to the extent that the requirement addresses matters within the scope of article 12 of the <i>UCITS Directive</i> .
2.16B	G	The matters referred to in paragraph 2.16AR of this Annex may also be subject to the rules of the <i>UK UCITS management company's Host State regulator</i> .
[FCA]		
2.16C	R	The <i>common platform requirements</i> apply to a <i>full-scope UK AIFM</i> in respect of its management of an <i>AIF</i> where carried on from an establishment in the <i>UK</i> .
[FCA]		
2.16D	R	The <i>common platform requirements</i> , except those which are <i>AIFMD host state requirements</i> , apply to a <i>full-scope UK AIFM</i> in respect of its management of an <i>EEA AIF</i> from a <i>branch</i> in another <i>EEA State</i> .
[FCA]		
2.16E	R	The <i>common platform requirements</i> apply to an <i>AIFM investment firm</i> which is a <i>full-scope UK AIFM</i> in respect of its <i>MiFID business</i> where carried on from an establishment in the <i>UK</i> .
[FCA]		
2.16F	R	The <i>common platform requirements</i> , except the <i>common platform requirements on financial crime</i> and the <i>common platform record-keeping requirements</i> , apply to an <i>AIFM investment firm</i> in respect of its <i>MiFID business</i> where carried on from a <i>branch</i> in another <i>EEA State</i> .
[FCA]		
2.17	R	The <i>common platform record-keeping requirements</i> apply to activities carried on by a <i>firm</i> from an establishment maintained in the <i>United Kingdom</i> , unless another applicable <i>rule</i> which is relevant to the activity has a wider territorial scope, in which case the <i>common platform record-keeping requirements</i> apply with that wider scope in relation to the activity described in that <i>rule</i> .
[FCA]		
[PRA]		
		[Note: article 13(9) of <i>MiFID</i>]
2.18	R	The <i>common platform organisational requirements</i> , except the <i>common platform requirements on financial crime</i> , also apply in a <i>prudential context</i>

[PRA]

3.2 G For a *common platform firm*, they apply in accordance with Column A in the table below.

[FCA]
[PRA]

3.2A G For a *management company*, they apply in accordance with Column A+ in the table below.

[FCA]

3.2B R For a *full-scope UK AIFM* of an *authorised AIF*, they apply in line with Column A++ in the table below.

[FCA]

[PRA]

3.3 G For all other *firms* apart from *insurers, managing agents, the Society* and *full-scope UK AIFMs* of *unauthorised AIFs*, they apply in accordance with Column B in the table below. For these *firms*, where a rule is shown modified in Column B as 'Guidance', it should be read as *guidance* (as if "should" appeared in that rule instead of "must") and should be applied in a proportionate manner, taking into account the nature, scale and complexity of the firm's business.

Chapter 4

General organisational requirements

4.1 General requirements

[Note: ESMA has also issued guidelines under article 16(3) of the ESMA Regulation covering certain aspects of the MiFID compliance function requirements. See <http://www.esma.europa.eu/content/Guidelines-certain-aspects-MiFID-compliance-function-requirements>.]

4.1.1 **R**
FCA PRA

(1) A *firm* must have robust governance arrangements, which include a clear organisational structure with well defined, transparent and consistent lines of responsibility, effective processes to identify, manage, monitor and report the risks it is or might be exposed to, and internal control mechanisms, including sound administrative and accounting procedures and effective control and safeguard arrangements for information processing systems.

(2) [deleted]

[Note: article 74 (1) of *CRD* , article 13(5) second paragraph of *MiFID* , article 12(1)(a) of the *UCITS Directive*, and article 18(1) of *AIFMD*]

4.1.1A **R**
FCA

A *full-scope UK AIFM* must comply with the *AIFM Remuneration Code*.

[Note: article 13(1) of *AIFMD*]

4.1.1B **R**
FCA

A *full-scope UK AIFM* must, in particular:

- (1) have rules for personal transactions by its *employees* or for the holding or management of investments it invests on its own account;
- (2) ensure that each transaction involving the *AIFs* may be reconstructed according to its origin, the parties to it, its nature, and the time and place at which it was effected; and
- (3) ensure that the assets of the *AIFs* managed by the *AIFM* are invested in accordance with the *instrument constituting the fund* and the legal provisions in force.

[Note: article 18(1) second paragraph of *AIFMD*]

- 4.1.1C** **R** A *BIPRU firm* and a *third country BIPRU firm* must comply with the *BIPRU Remuneration Code*.
FCA
- 4.1.2** **R** For a *common platform firm*, the arrangements, processes and mechanisms referred to in **■ SYSC 4.1.1 R** must be comprehensive and proportionate to the nature, scale and complexity of the risks inherent in the business model and of the *common platform firm's* activities and must take into account the specific technical criteria described in **■ SYSC 4.1.7 R**, **■ SYSC 5.1.7 R**, **■ SYSC 7** and (for a *firm* to which **■ SYSC 19A** applies) **■ SYSC 19A**.
FCA PRA
- [Note: article 74 (2) of *CRD*]
- 4.1.2A** **G** Other *firms* should take account of the comprehensiveness and proportionality *rule* (**■ SYSC 4.1.2 R**) as if it were *guidance* (and as if "should" appeared in that rule instead of "must") as explained in **■ SYSC 1 Annex 1.3.3 G** .
FCA PRA
- 4.1.2AA** **R** Where **■ SYSC 4.1.2 R** applies to a *BIPRU firm*, it must take into account the specific technical criteria described in **■ SYSC 19C**.
FCA
- 4.1.2B** **R** For a *management company* or a *full-scope UK AIFM* , the arrangements, processes and mechanisms referred to in **■ SYSC 4.1.1 R** and **■ SYSC 4.1.1A R** must also take account of the *UCITS schemes* and *EEA UCITS schemes* managed by the *management company* or the *AIFs* managed by the *full-scope UK AIFM*.
FCA
- [Note: article 12(1) second paragraph of the *UCITS Directive* and article 18(1) second paragraph of *AIFMD*]
- Resources for management companies and AIFMs**
- 4.1.2C** **R** A *management company*, a *full-scope UK AIFM* and an *incoming EEA AIFM branch* must have, and employ effectively, the resources and procedures that are necessary for the proper performance of its business activities.
FCA
- [Note: articles 12(1)(a) and 14(1)(c) of the *UCITS Directive* and article 12(1)(c) of *AIFMD*]
- 4.1.2D** **R** A *full-scope UK AIFM* must use, at all times, adequate and appropriate human and technical resources that are necessary for the proper management of *AIFs*.
FCA
- [Note: article 18(1) first paragraph of *AIFMD*]
- Subordinate measures relating to provisions implementing article 12(1) of AIFMD**
- 4.1.2E** **G** Articles 16 to 29 of the *AIFMD level 2 regulation* provide detailed rules supplementing the provisions of article 12(1) of *AIFMD*, articles 57 to 66 of the *AIFMD level 2 regulation* provide detailed rules supplementing articles 12 and 18 of *AIFMD*.

Mechanisms and procedures for a firm

4.1.3 **R**

[deleted]

4.1.4 **R**

FCA PRA

A *firm* (with the exception of a *sole trader* who does not employ any *person* who is required to be approved under section 59 of the *Act* (Approval for particular arrangements)) must, taking into account the nature, scale and complexity of the business of the *firm*, and the nature and range of the financial services and activities undertaken in the course of that business:

- (1) (if it is a *common platform firm* or a *management company*) establish, implement and maintain decision-making procedures and an organisational structure which clearly and in a documented manner specifies reporting lines and allocates functions and responsibilities;
- (2) establish, implement and maintain adequate internal control mechanisms designed to secure compliance with decisions and procedures at all levels of the *firm*;
- (3) (if it is a *common platform firm*) establish, implement and maintain effective internal reporting and communication of information at all relevant levels of the *firm*; and
- (4) (if it is a *management company*) establish, implement and maintain effective internal reporting and communication of information at all relevant levels of the *management company* as well as effective information flows with any third party involved.

[Note: articles 5(1) final paragraph, 5(1)(a), 5(1)(c) and 5(1)(e) of the *MiFID implementing Directive* and articles 4(1) final paragraph, 4(1)(a), 4(1)(c) and 4(1)(d) of the *UCITS implementing Directive*]

4.1.4A **G**

FCA PRA

A *firm* that is not a *common platform firm* or a *management company* should take into account the decision-making procedures and effective internal reporting *rules* (■ SYSC 4.1.4R (1), ■ (3) and ■ (4)) as if they were *guidance* (and as if "should" appeared in those rules instead of "must") as explained in ■ SYSC 1 Annex 1.3.3 G.

4.1.5 **R**

FCA PRA

A *MiFID investment firm* and a *management company* must establish, implement and maintain systems and procedures that are adequate to safeguard the security, integrity and confidentiality of information, taking into account the nature of the information in question.

[Note: article 5(2) of the *MiFID implementing Directive* and article 4(2) of the *UCITS implementing Directive*]

Business continuity

4.1.6

FCA PRA

R

A *common platform firm* must take reasonable steps to ensure continuity and regularity in the performance of its *regulated activities*. To this end the *common platform firm* must employ appropriate and proportionate systems, resources and procedures.

[Note: article 13(4) of *MiFID*]

4.1.7

FCA PRA

R

A *common platform firm* and a *management company* must establish, implement and maintain an adequate business continuity policy aimed at ensuring, in the case of an interruption to its systems and procedures, that any losses are limited, the preservation of essential data and functions, and the maintenance of its *regulated activities*, or, in the case of a *management company*, its *collective portfolio management* activities, or, where that is not possible, the timely recovery of such data and functions and the timely resumption of those activities.

[Note: article 5(3) of the *MiFID implementing Directive* , annex V paragraph 13 of the *Banking Consolidation Directive*, article 4(3) of the *UCITS implementing Directive* and article 85(2) of the *CRD*]

4.1.7A

FCA PRA

G

Other *firms* should take account of the business continuity *rules* (■ SYSC 4.1.6 R and ■ 4.1.7 R) as if they were *guidance* (and as if "should" appeared in those rules instead of "must") as explained in ■ SYSC 1 Annex 1.3.3 G.

4.1.8

FCA PRA

G

The matters dealt with in a business continuity policy should include:

- (1) resource requirements such as people, systems and other assets, and arrangements for obtaining these resources;
- (2) the recovery priorities for the *firm's* operations;
- (3) communication arrangements for internal and external concerned parties (including the *appropriate regulator*, *clients* and the press);
- (4) escalation and invocation plans that outline the processes for implementing the business continuity plans, together with relevant contact information;
- (5) processes to validate the integrity of information affected by the disruption; and
- (6) regular testing of the business continuity policy in an appropriate and proportionate manner in accordance with ■ SYSC 4.1.10 R.

Accounting policies

4.1.9

FCA PRA

R

A *common platform firm* and a *management company* must establish, implement and maintain accounting policies and procedures that enable it, at the request of the *appropriate regulator*, to deliver in a timely manner to the *appropriate regulator* financial reports which reflect a true and fair

view of its financial position and which comply with all applicable accounting standards and rules.

[Note: article 5(4) of the *MiFID implementing Directive* and article 4(4) of the *UCITS implementing Directive*]

Regular monitoring

4.1.10
FCA PRA

R

A *common platform firm* and a *management company* must monitor and, on a regular basis, evaluate the adequacy and effectiveness of its systems, internal control mechanisms and arrangements established in accordance with ■ SYSC 4.1.4 R to ■ SYSC 4.1.9 R and take appropriate measures to address any deficiencies.

[Note: article 5(5) of the *MiFID implementing Directive* and article 4(5) of the *UCITS implementing Directive*]

4.1.10A
FCA PRA

G

Other *firms* should take account of the regular monitoring *rule* (■ SYSC 4.1.10 R) as if it were *guidance* (and as if "should" appeared in that rule instead of "must") as explained in ■ SYSC 1 Annex 1.3.3 G, but ignoring the cross-reference to ■ SYSC 4.1.5 R and ■ 4.1.9 R.

Audit committee

4.1.11
FCA PRA

G

Depending on the nature, scale and complexity of its business, it may be appropriate for a *firm* to form an audit committee. An audit committee could typically examine management's process for ensuring the appropriateness and effectiveness of systems and controls, examine the arrangements made by management to ensure compliance with requirements and standards under the *regulatory system*, oversee the functioning of the internal audit function (if applicable) and provide an interface between management and external auditors. It should have an appropriate number of *non-executive directors* and it should have formal terms of reference.

Firms should also consider the additional *guidance* on risk-centric governance arrangements for effective risk management contained in ■ SYSC 21.

Apportionment of responsibilities: the role of the non-executive director

4.1.14
FCA PRA

G

The role undertaken by a *non-executive director* will vary from one *firm* to another. Where a *non-executive director* is an *approved person*, for example where the *firm* is a *body corporate*, his responsibility and therefore liability will be limited by the role that he undertakes.

4.1.15
FCA PRA

R

(1) A firm must have in place appropriate procedures for its employees to report breaches internally through a specific, independent and autonomous channel.

(2) The channel in (1) may be provided through arrangements provided for by social partners.

[Note: article 71 (3) of *CRD*]

4.2 Persons who effectively direct the business

4.2.1
FCA PRA

R

The *senior personnel* of a *common platform firm*, a *management company* a *full-scope UK AIFM*, or of the *UK branch* of a *non-EEA bank* must be of sufficiently good repute and sufficiently experienced as to ensure the sound and prudent management of the *firm*.

[Note: article 9(1) of *MiFID*, article 7(1)(b) of the *UCITS Directive* article 8(1)(c) of *AIFMD*, article 11(1) second paragraph of the *Banking Consolidation Directive* and article 13(1) of the *CRD*]

4.2.1A
FCA PRA

G

Other *firms* should take account of the *senior personnel rule* (■ SYSC 4.2.1 R) as if it were *guidance* (and as if "should" appeared in that rule instead of "must") as explained in ■ SYSC 1 Annex 1.3.3 G.

Responsibility of senior personnel of an AIFM

4.2.1B
FCA

R

For a *full-scope UK AIFM*, the *senior personnel* must, in complying with ■ SYSC 4.2.1 R, be sufficiently experienced in relation to the investment strategies pursued by the *AIFs* it manages.

[Note: article 8(1)(c) of *AIFMD*]

4.2.2
FCA PRA

R

A *common platform firm*, a *management company*, a *full-scope UK AIFM* and the *UK branch* of a *non-EEA bank* must ensure that its management is undertaken by at least two persons meeting the requirements laid down in ■ SYSC 4.2.1 R and, for a *full-scope UK AIFM*, ■ SYSC 4.2.7 R .

[Note: article 9(4) first paragraph of *MiFID*, article 7(1)(b) of the *UCITS Directive*, article 8(1)(c) of *AIFMD* and article 13(1) of *CRD*]

4.2.3
FCA PRA

G

In the case of a *body corporate*, the persons referred to in SYSC 4.2.2 R should either be executive *directors* or persons granted executive powers by, and reporting immediately to, the *governing body*. In the case of a *partnership*, they should be active *partners*.

4.2.4
FCA PRA

G

At least two independent minds should be applied to the formulation and implementation of the policies of a *common platform firm*, a *management company*, a *full-scope UK AIFM* and the *UK branch* of a *non-EEA bank* . Where a *firm* nominates

just two individuals to direct its business, the *appropriate regulator* will not regard them as both effectively directing the business where one of them makes some, albeit significant, decisions relating to only a few aspects of the business. Each should play a part in the decision-making process on all significant decisions. Both should demonstrate the qualities and application to influence strategy, day-to-day policy and its implementation. This does not require their day-to-day involvement in the execution and implementation of policy. It does, however, require involvement in strategy and general direction, as well as knowledge of, and influence on, the way in which strategy is being implemented through day-to-day policy.

4.2.5

FCA PRA

G

Where there are more than two individuals directing the business of a *common platform firm*, a *management company*, a *full-scope UK AIFM* or the UK branch of a *non-EEA bank*, the *appropriate regulator* does not regard it as necessary for all of these individuals to be involved in all decisions relating to the determination of strategy and general direction. However, at least two individuals should be involved in all such decisions. Both individuals' judgement should be engaged so that major errors leading to difficulties for the *firm* are less likely to occur. Similarly, each individual should have sufficient experience and knowledge of the business and the necessary personal qualities and skills to detect and resist any imprudence, dishonesty or other irregularities by the other individual. Where a single individual, whether a chief executive, managing *director* or otherwise, is particularly dominant in such a *firm* this will raise doubts about whether SYSC 4.2.2 R is met.

4.2.6

FCA PRA

R

If a *common platform firm*, (other than a *credit institution* or *AIFM investment firm*) or the UK branch of a *non-EEA bank*, is:

- (1) a natural person; or
- (2) a legal person managed by a single natural person;

it must have alternative arrangements in place which ensure sound and prudent management of the *firm*.

[Note: article 9(4) second paragraph of *MiFID*]

4.2.7

FCA

R

A *full-scope UK AIFM* must notify the *FCA* of the names of the *senior personnel* of the *firm* and of every person succeeding them in office.

[Note: article 8(1)(c) of *AIFMD*]

4.2.8

FCA

G

Where the *senior personnel* of a *full-scope UK AIFM* will carry out a *FCA governing function* and the *firm* has applied for the *FCA*'s approval under section 59 of the *Act*, this will be considered sufficient to comply with ■ SYSC 4.2.7 R.

4.3 Responsibility of senior personnel

4.3.1

FCA PRA

R

A *firm* (with the exception of a *sole trader* who does not employ any *person* who is required to be approved under section 59 of the *Act* (Approval for particular arrangements)), when allocating functions internally, must ensure that *senior personnel* and, where appropriate, the *supervisory function*, are responsible for ensuring that the *firm* complies with its obligations under the *regulatory system*. In particular, *senior personnel* and, where appropriate, the *supervisory function* must assess and periodically review the effectiveness of the policies, arrangements and procedures put in place to comply with the *firm's* obligations under the *regulatory system* and take appropriate measures to address any deficiencies.

Frequently asked questions about allocation of functions in ■ SYSC 4.4.5 R

Question	Answer
1 Does an individual to whom a function is allocated under SYSC 4.4.5 R need to be an <i>approved person</i> ?	An individual to whom a function is allocated under SYSC 4.4.5 R will be performing the <i>apportionment and oversight function</i> (CF 8, see SUP 10A.7.1 R) and an application must be made under section 59 of the <i>Act</i> for approval of the individual before the function is performed. There are exceptions from this in SUP 10A.1 (Approved persons - Application).
2 If the allocation is to more than one individual, can they perform the functions, or aspects of the functions, separately?	If the functions are allocated to joint <i>chief executives</i> under SYSC 4.4.5 R, column 2, they are expected to act jointly. If the functions are allocated to an individual under SYSC 4.4.5 R, column 2, in addition to individuals under SYSC 4.4.5 R, column 3, the former may normally be expected to perform a leading role in relation to the functions that reflects his position. Otherwise, yes.
3 What is meant by "appropriately allocate" in this context?	The allocation of functions should be compatible with delivering compliance with <i>Principle 3</i> , SYSC 4.4.3 R and SYSC 4.1.1 R. The <i>appropriate regulator</i> considers that allocation to one or two individuals is likely to be appropriate for most <i>firms</i> .
4 If a committee of management governs a <i>firm</i> or <i>group</i> , can the functions be allocated to every member of that committee?	Yes, as long as the allocation remains appropriate (see Question 3). If the <i>firm</i> also has an individual as <i>chief executive</i> , then the functions must be allocated to that individual as well under SYSC 4.4.5 R, column 2 (see Question 7).
5 Does the definition of <i>chief executive</i> include the possessor of equivalent responsibilities with another title, such as a managing <i>director</i> or managing <i>partner</i> ?	Yes.
6 Is it possible for a <i>firm</i> to have more than one individual as its <i>chief executive</i> ?	Although unusual, some <i>firms</i> may wish the responsibility of a <i>chief executive</i> to be held jointly by more than one individual. In that case, each of them will be a <i>chief executive</i> and the functions must be allocated to all of them under SYSC 4.4.5 R, column 2 (see also Questions 2 and 7).
7 If a <i>firm</i> has an individual as <i>chief executive</i> , must the functions be allocated to that individual?	Normally, yes, under SYSC 4.4.5 R, column 2. But if the <i>firm</i> is a <i>body corporate</i> and a member of a <i>group</i> , the functions may, instead of being allocated to the <i>firm's chief executive</i> , be allocated to a <i>director</i> or <i>senior manager</i> from the <i>group</i> responsible for the overall management of the <i>group</i> or of a relevant <i>group</i> division, so long as this is appropriate (see Question 3). Such individuals may

4

Question	Answer
	<p>nevertheless require approval under section 59 (see Question 1).</p> <p>If the <i>firm</i> chooses to allocate the functions to a <i>director</i> or <i>senior manager</i> responsible for the overall management of a relevant <i>group</i> division, the <i>FSA</i> would expect that individual to be of a seniority equivalent to or greater than a <i>chief executive</i> of the <i>firm</i> for the allocation to be appropriate.</p> <p>See also Question 14.</p>
<p>8 If a <i>firm</i> has a <i>chief executive</i>, can the functions be allocated to other individuals in addition to the <i>chief executive</i>?</p>	<p>Yes. SYSC 4.4.5 R, column 3, permits a <i>firm</i> to allocate the functions, additionally, to the <i>firm's</i> (or where applicable the <i>group's</i>) <i>directors</i> and <i>senior managers</i> as long as this is appropriate (see Question 3).</p>
<p>9 What if a <i>firm</i> does not have a <i>chief executive</i>?</p>	<p>Normally, the functions must be allocated to one or more individuals selected from the <i>firm's</i> (or where applicable the <i>group's</i>) <i>directors</i> and <i>senior managers</i> under SYSC 4.4.5 R, column 3.</p> <p>But if the <i>firm</i>:</p> <p>(1) is a <i>body corporate</i> and a member of a <i>group</i>; and</p> <p>(2) the <i>group</i> has a <i>director</i> or <i>senior manager</i> responsible for the overall management of the <i>group</i> or of a relevant <i>group</i> division;</p> <p>then the functions must be allocated to that individual (together, optionally, with individuals from column 3 if appropriate) under SYSC 4.4.5 R, column 2.</p>
<p>10 What do you mean by "<i>group</i> division within which some or all of the <i>firm's regulated activities</i> fall"?</p>	<p>A "division" in this context should be interpreted by reference to geographical operations, product lines or any other method by which the <i>group's</i> business is divided.</p> <p>If the <i>firm's regulated activities</i> fall within more than one division and the <i>firm</i> does not wish to allocate the functions to its <i>chief executive</i>, the allocation must, under SYSC 4.4.5 R, be to:</p> <p>(1) a <i>director</i> or <i>senior manager</i> responsible for the overall management of the <i>group</i>; or (2) a <i>director</i> or <i>senior manager</i></p>

Question	Answer
<p>11 How does the requirement to allocate the functions in SYSC 4.4.5 R apply to an <i>overseas firm</i> which is not an <i>incoming EEA firm</i>, <i>incoming Treaty firm</i> or <i>UCITS qualifier</i>?</p>	<p>responsible for the overall management of one of those divisions;</p> <p>together, optionally, with individuals from column 3 if appropriate. (See also Questions 7 and 9.)</p> <p>The <i>firm</i> must appropriately allocate those functions to one or more individuals, in accordance with SYSC 4.4.5 R, but:</p> <p>(1) The responsibilities that must be apportioned and the systems and controls that must be overseen are those relating to activities carried on from a <i>UK</i> establishment with certain exceptions (see SYSC 1 Annex 1.1.8R). Note that SYSC 1 Annex 1.1.10R does not extend the territorial scope of SYSC 4.4 for an <i>overseas firm</i>.</p> <p>(2) The <i>chief executive</i> of an <i>overseas firm</i> is the <i>person</i> responsible for the conduct of the <i>firm's</i> business within the <i>United Kingdom</i> (see the definition of "<i>chief executive</i>"). This might, for example, be the manager of the <i>firm's UK</i> establishment, or it might be the <i>chief executive</i> of the <i>firm</i> as a whole, if he has that responsibility.</p> <p>The <i>apportionment and oversight function</i> applies to such a <i>firm</i>, unless it falls within a particular exception from the <i>approved persons</i> regime (see Question 1).</p>
<p>12 How does the requirement to allocate the functions in SYSC 4.4.5 R apply to an <i>incoming EEA firm</i> or <i>incoming Treaty firm</i>?</p>	<p>SYSC 1 Annex 1.1.1R(2) and SYSC 1 Annex 1.1.8R restrict the application of SYSC 4.4.5 R for such a <i>firm</i>. Accordingly:</p> <p>(1) Such a <i>firm</i> is not required to allocate the function of dealing with apportionment in SYSC 4.4.5R (1).</p> <p>(2) Such a <i>firm</i> is required to allocate the function of oversight in SYSC 4.4.5R (2). However, the systems and controls that must be overseen are those relating to matters which the <i>appropriate regulator</i>, as <i>Host State regulator</i>, is entitled to regulate (there is <i>guidance</i> on this in SUP 13A Annex 2 G). Those are primarily, but not exclusively, the systems and controls relating to the conduct of the <i>firm's</i> activities carried on from its <i>UK branch</i>.</p>

Question	Answer
	<p>(3) Such a <i>firm</i> need not allocate the function of oversight to its <i>chief executive</i>; it must allocate it to one or more <i>directors</i> and <i>senior managers</i> of the <i>firm</i> or the <i>firm's group</i> under SYSC 4.4.5 R, row (2).</p> <p>(4) An <i>incoming EEA firm</i> which has provision only for <i>cross border services</i> is not required to allocate either function if it does not carry on <i>regulated activities</i> in the <i>United Kingdom</i>; for example if they fall within the overseas persons exclusions in article 72 of the <i>Regulated Activities Order</i>.</p> <p>See also Questions 1 and 15.</p>
<p>13 What about a <i>firm</i> that is a <i>partnership</i> or a <i>limited liability partnership</i>?</p>	<p>The <i>appropriate regulator</i> envisages that most if not all <i>partners</i> or members will be either <i>directors</i> or <i>senior managers</i>, but this will depend on the constitution of the <i>partnership</i> (particularly in the case of a <i>limited partnership</i>) or <i>limited liability partnership</i>. A <i>partnership</i> or <i>limited liability partnership</i> may also have a <i>chief executive</i> (see Question 5). A <i>limited liability partnership</i> is a <i>body corporate</i> and, if a member of a <i>group</i>, will fall within SYSC 4.4.5 R, row (1) or (2).</p>
<p>14 What if generally accepted principles of good corporate governance recommend that the <i>chief executive</i> should not be involved in an aspect of corporate governance?</p>	<p>The Note to SYSC 4.4.5 R provides that the <i>chief executive</i> or other executive director or <i>senior manager</i> need not be involved in such circumstances. For example, the <i>UK Corporate Governance Code</i> recommends that the board of a listed company should establish an audit committee of non-executive directors to be responsible for oversight of the audit. That aspect of the oversight function may therefore be allocated to the members of such a committee without involving the <i>chief executive</i>. Such individuals may require approval under section 59 in relation to that function (see Question 1).</p>
<p>15 What about <i>incoming electronic commerce activities</i> carried on from an <i>establishment</i> in another <i>EEA State</i> with or for a <i>person</i> in the <i>United Kingdom</i>?</p>	<p>SYSC does not apply to an <i>incoming ECA provider</i> acting as such.</p>

FCA PRA

G

Other *firms* should take account of the segregation of functions *rules* (■ SYSC 5.1.6 R and ■ SYSC 5.1.7 R) as if they were *guidance* (and as if should appeared in those rules instead of must) as explained in ■ SYSC 1 Annex 1.3.3 G.

5.1.8

FCA PRA

G

The effective segregation of duties is an important element in the *internal controls* of a *firm* in the *prudential context*. In particular, it helps to ensure that no one individual is completely free to commit a *firm's* assets or incur liabilities on its behalf. Segregation can also help to ensure that a *firm's governing body* receives objective and accurate information on financial performance, the risks faced by the *firm* and the adequacy of its systems.

5.1.9

FCA PRA

G

A *firm* should normally ensure that no single individual has unrestricted authority to do all of the following:

- (1) initiate a transaction;
- (2) bind the *firm*;
- (3) make payments; and
- (4) account for it.

5.1.10

FCA PRA

G

Where a *firm* is unable to ensure the complete segregation of duties (for example, because it has a limited number of staff), it should ensure that there are adequate compensating controls in place (for example, frequent review of an area by relevant *senior managers*).

5.1.11

FCA PRA

G

Where a *common platform firm* outsources its internal audit function, it should take reasonable steps to ensure that every individual involved in the performance of this service is independent from the individuals who perform its external audit. This should not prevent services from being undertaken by a *firm's* external auditors provided that:

- (1) the work is carried out under the supervision and management of the *firm's* own internal staff; and

- (2) potential conflicts of interest between the provision of external audit services and the provision of internal audit are properly managed.

Awareness of procedures

5.1.12

FCA PRA

R

A common platform firm and a management company must ensure that its relevant persons are aware of the procedures which must be followed for the proper discharge of their responsibilities.

[Note: article 5(1)(b) of the *MiFID implementing Directive* and article 4(1)(b) of the *UCITS implementing Directive*]

5.1.12A

FCA PRA

G

Other *firms* should take account of the *rule* concerning awareness of procedures (■ SYSC 5.1.12 R) as if it were *guidance* (and as if should appeared in that rule instead of must) as explained in ■ SYSC 1 Annex 1.3.3 G.

General

5.1.13

FCA PRA

R

The systems, internal control mechanisms and arrangements established by a *firm* in accordance with this chapter must take into account the nature, scale and complexity of its business and the nature and range of financial services and activities undertaken in the course of that business.

[Note: article 5(1) final paragraph of the *MiFID implementing Directive* and articles 4(1) final paragraph and 5(4) of the *UCITS implementing Directive*]

5.1.14

FCA PRA

R

A common platform firm and a management company must monitor and, on a regular basis, evaluate the adequacy and effectiveness of its systems, internal control mechanisms and arrangements established in accordance with this chapter, and take appropriate measures to address any deficiencies.

[Note: article 5(5) of the *MiFID implementing Directive* and articles 4(5) of the *UCITS implementing Directive*]

5.1.15

FCA PRA

G

Other *firms* should take account of the *rule* requiring monitoring and evaluation of the adequacy and effectiveness of systems (■ SYSC 5.1.14 R) as if it were *guidance* (and as if should appeared in that rule instead of must) as explained in ■ SYSC 1 Annex 1.3.3 G.

6.1.3

FCA PRA

R

A *common platform firm* and a *management company* must maintain a permanent and effective compliance function which operates independently and which has the following responsibilities:

- (1) to monitor and, on a regular basis, to assess the adequacy and effectiveness of the measures and procedures put in place in accordance with ■ SYSC 6.1.2 R, and the actions taken to address any deficiencies in the *firm's* compliance with its obligations; and
- (2) to advise and assist the *relevant persons* responsible for carrying out *regulated activities* to comply with the *firm's* obligations under the *regulatory system*.

[Note: article 6(2) of the *MiFID implementing Directive* and article 10(2) of the *UCITS implementing Directive*]

6.1.3A

FCA PRA

G

- (1) Other *firms* should take account of the compliance function *rule* (■ SYSC 6.1.3 R) as if it were *guidance* (and as if should appeared in that rule instead of must) as explained in ■ SYSC 1 Annex 1.3.3 G.
- (2) Notwithstanding ■ SYSC 6.1.3 R, as it applies under (1), depending on the nature, scale and complexity of its business, it may be appropriate for a *firm* to have a separate compliance function. Where a *firm* has a separate compliance function the *firm* should also take into account ■ SYSC 6.1.3 R and ■ SYSC 6.1.4 R as guidance.

6.1.4

FCA PRA

R

In order to enable the compliance function to discharge its responsibilities properly and independently, a *common platform firm* and a *management company* must ensure that the following conditions are satisfied:

- (1) the compliance function must have the necessary authority, resources, expertise and access to all relevant information;
- (2) a compliance officer must be appointed and must be responsible for the compliance function and for any reporting as to compliance required by ■ SYSC 4.3.2 R;
- (3) the *relevant persons* involved in the compliance functions must not be involved in the performance of services or activities they monitor;
- (4) the method of determining the remuneration of the *relevant persons* involved in the compliance function must not compromise their objectivity and must not be likely to do so.

[Note: article 6(3) first paragraph of the *MiFID implementing Directive* and article 10(3) of the *UCITS implementing Directive*]

6.1.4-A
FCA PRA

G

In setting the method of determining the *remuneration of relevant persons* involved in the compliance function:

- (1) *firms* that ■ SYSC 19A applies to will also need to comply with the *Remuneration Code*; and
- (2) *BIPRU firms* will also need to comply with the *BIPRU Remuneration Code*.

6.1.4A
FCA

R

(1) A *firm* which is not a *common platform firm* or *management company* and which carries on *designated investment business* with or for retail clients or professional clients must allocate to a *director* or *senior manager* the function of:

- (a) having responsibility for oversight of the *firm's* compliance; and
- (b) reporting to the *governing body* in respect of that responsibility.

(2) In ■ SYSC 6.1.4A R (1) compliance means compliance with the rules in:

- (a) *COBS* (Conduct of Business sourcebook);
- (b) *COLL* (Collective Investment Schemes sourcebook);
- (c) *CASS* (Client Assets sourcebook) ; and
- (d) *ICOBS* (Insurance: Conduct of Business sourcebook).

6.1.4-B
FCA

G

In setting the method of determining the *remuneration of relevant persons* involved in the compliance function, *full-scope UK AIFMs* will need to comply with the *AIFM Remuneration Code*.

6.1.5
FCA PRA

R

A *common platform firm* and a *management company* need not comply with ■ SYSC 6.1.4 R (3) or ■ SYSC 6.1.4 R (4) if it is able to demonstrate that in view of the nature, scale and complexity of its business, and the nature and range of financial services and activities, the requirements under those *rules* are not proportionate and that its compliance function continues to be effective.

[Note: article 6(3) second paragraph of the *MiFID implementing Directive* and article 10(3) second paragraph of the *UCITS implementing Directive*]

6.1.6
FCA PRA

G

Other *firms* should take account of the proportionality rule (■ SYSC 6.1.5 R) as if it were *guidance* (and as if should appeared in that rule instead of must) as explained in ■ SYSC 1 Annex 1.3.3 G.

6.1.7

FCA PRA

R

- (1) This rule applies to a *common platform firm* conducting *investment services and activities* from a *branch* in another *EEA State*.
- (2) References to the *regulatory system* in ■ SYSC 6.1.1R, ■ SYSC 6.1.2 R and ■ SYSC 6.1.3 R apply in respect of a *firm's branch* as if *regulatory system* includes a *Host State's* requirements under *MiFID* and the *MiFID implementing Directive* which are applicable to the *investment services and activities* conducted from the *firm's branch*.

[Note: article 13(2) of *MiFID*]

6.2 Internal audit

6.2.1

FCA PRA

R

A *common platform firm* and a *management company* must, where appropriate and proportionate in view of the nature, scale and complexity of its business and the nature and range of its financial services and activities, undertaken in the course of that business, establish and maintain an internal audit function which is separate and independent from the other functions and activities of the *firm* and which has the following responsibilities:

- (1) to establish, implement and maintain an audit plan to examine and evaluate the adequacy and effectiveness of the *firm's* systems, internal control mechanisms and arrangements;
- (2) to issue recommendations based on the result of work carried out in accordance with (1);
- (3) to verify compliance with those recommendations;
- (4) to report in relation to internal audit matters in accordance with ■ SYSC 4.3.2 R.

[Note: article 8 of the *MiFID implementing Directive* and article 11 of the *UCITS implementing Directive*]

6.2.1A

FCA PRA

G

Other *firms* should take account of the internal audit *rule* (■ SYSC 6.2.1 R) as if it were *guidance* (and as if should appeared in that rule instead of must) as explained in ■ SYSC 1 Annex 1.3.3 G.

6.2.2

FCA PRA

G

The term 'internal audit function' in ■ SYSC 6.2.1 R (and ■ SYSC 4.1.11 G) refers to the generally understood concept of internal audit within a *firm*, that is, the function of assessing adherence to and the effectiveness of internal systems and controls, procedures and policies. The internal audit function is not a *controlled function* itself, but is part of the *systems and controls function* (CF28).

Chapter 7

Risk control

7.1 Risk control

[Note: ESMA has also issued guidelines under article 16(3) of the ESMA Regulation covering certain aspects of the MiFID compliance function requirements. See <http://www.esma.europa.eu/content/Guidelines-certain-aspects-MiFID-compliance-function-requirements>.]

7.1.1 FCA PRA G ■ SYSC 4.1.1 R requires a *firm* to have effective processes to identify, manage, monitor and report the risks it is or might be exposed to.

7.1.2 FCA PRA R *A common platform firm* must establish, implement and maintain adequate risk management policies and procedures, including effective procedures for risk assessment, which identify the risks relating to the *firm's* activities, processes and systems, and where appropriate, set the level of risk tolerated by the *firm*.

[Note: article 7(1)(a) of the *MiFID implementing Directive*, article 13(5) second paragraph of *MiFID*]

7.1.2A FCA PRA G Other *firms* should take account of the risk management policies and procedures *rule* (■ SYSC 7.1.2 R) as if it were *guidance* (and as if should appear in that rule instead of must) as explained in ■ SYSC 1 Annex 1.3.3 G.

7.1.2B FCA G A *management company* should be aware that ■ COLL 6.11 contains requirements implementing article 12 of the *UCITS implementing Directive* in relation to risk control and internal reporting that will apply to it.

7.1.2C FCA G *Full-scope UK AIFMs* should be aware that ■ FUND 3.7 and articles 38 to 47 of the *AIFMD level 2 regulation* contain further requirements in relation to risk management.

7.1.3 FCA PRA R *A common platform firm* must adopt effective arrangements, processes and mechanisms to manage the risk relating to the *firm's* activities, processes and systems, in light of that level of risk tolerance.

[Note: article 7(1)(b) of the *MiFID implementing Directive*]

7.1.4 FCA PRA R The *management body* of a *common platform firm* must approve and periodically review the strategies and policies for taking up, managing,

monitoring and mitigating the risks the *firm* is or might be exposed to, including those posed by the macroeconomic environment in which it operates in relation to the status of the business cycle.

[Note: article 76(1) of CRD]

7.1.4A

FCA PRA

G

For a *common platform firm* included within the scope of ■ SYSC 20 (Reverse stress testing), the strategies, policies and procedures for identifying, taking up, managing, monitoring and mitigating the risks to which the *firm* is or might be exposed include conducting reverse stress testing in accordance with ■ SYSC 20. A *common platform firm* which falls outside the scope of ■ SYSC 20 should consider conducting reverse stress tests on its business plan as well. This would further *senior personnels* understanding of the *firm's* vulnerabilities and would help them design measures to prevent or mitigate the risk of business failure.

7.1.4B

FCA PRA

G

Other *firms* should take account of the risk management *rules* (■ SYSC 7.1.3 R and ■ SYSC 7.1.4 R) as if they were *guidance* (and as if "should" appeared in those rules instead of "must") as explained in ■ SYSC 1 Annex 1.3.3 G.

7.1.5

FCA PRA

R

A *common platform firm* must monitor the following:

- (1) the adequacy and effectiveness of the *firm's* risk management policies and procedures;
- (2) the level of compliance by the *firm* and its *relevant persons* with the arrangements, processes and mechanisms adopted in accordance with ■ SYSC 7.1.3 R;
- (3) the adequacy and effectiveness of measures taken to address any deficiencies in those policies, procedures, arrangements, processes and mechanisms, including failures by the *relevant persons* to comply with such arrangements or processes and mechanisms or follow such policies and procedures.

[Note: article 7(1)(c) of the *MiFID implementing Directive*]

7.1.6

FCA PRA

R

A *common platform firm* must, where appropriate and proportionate in view of the nature, scale and complexity of its business and the nature and range of the *investment services and activities* undertaken in the course of that business, establish and maintain a risk management function that operates independently and carries out the following tasks:

- (1) implementation of the policies and procedures referred to in ■ SYSC 7.1.2 R to ■ SYSC 7.1.5 R; and
- (2) provision of reports and advice to *senior personnel* in accordance with ■ SYSC 4.3.2 R.

Additional rules for CRR firms

7.1.16C **R** In ■ SYSC 7.1.18 R a '*CRR firm that is significant*' means a *significant IFPRU firm*.
FCA

- 7.1.17** **R**
- (1) The *management body* of a *CRR firm* has overall responsibility for risk management. It must devote sufficient time to the consideration of risk issues.
 - (2) The *management body* of a *CRR firm* must be actively involved in and ensure that adequate resources are allocated to the management of all material risks addressed in the rules implementing the *CRD* and in the *EU CRR* as well as in the valuation of assets, the use of external ratings and internal models related to those risks.
 - (3) A *CRR firm* must establish reporting lines to the *management body* that cover all material risks and risk management policies and changes thereof.
- FCA PRA**

[Note: article 76(2) of *CRD*]

7.1.18

FCA PRA

R

- (1) A *CRR firm* that is significant must establish a risk committee composed of members of the *management body* who do not perform any executive function in the firm. Members of the risk committee must have appropriate knowledge, skills and expertise to fully understand and monitor the risk strategy and the risk appetite of the *firm*.
- (2) The risk committee must advise the *management body* on the institution's overall current and future risk appetite and assist the *management body* in overseeing the implementation of that strategy by *senior management*.
- (3) The risk committee must review whether prices of liabilities and assets offered to clients take fully into account the *firm's* business model and risk strategy. Where prices do not properly reflect risks in accordance with the business model and risk strategy, the risk committee must present a remedy plan to the *management body*.

[Note: article 76(3) of CRD]

7.1.18A

PRA

G

In ■ SYSC 7.1.18 R a '*CRR firm* that is *significant*' means a deposit-taker or designated investment firm whose size, interconnectedness, complexity and business type gives it the capacity to cause some disruption to the UK financial system (and through that to economic activity more widely) by failing or by carrying on its business in an unsafe manner.

7.1.18AA

FCA

G

A *CRR firm* which is not a *significant IFPRU firm* may combine the risk committee with the audit committee.

[Note: article 76(3) of CRD]

7.1.18B

FCA

R

Members of the combined risk and audit committee must have the knowledge, skills and expertise required for both committees.

[Note: article 76(3) of CRD]

7.1.19

FCA PRA

R

- (1) A *CRR firm* must ensure that the *management body* in its supervisory function and, where a risk committee has been established, the risk committee have adequate access to information on the risk profile of the *firm* and, if necessary and appropriate, to the risk management function and to external expert advice.
- (2) The *management body* in its supervisory function and, where one has been established, the risk committee must determine the nature, the amount, the format, and the frequency of the information on risk which it is to receive.

[Note: article 76(4) of CRD]

7.1.20

FCA PRA

R

In order to assist in the establishment of sound remuneration policies and practices, the risk committee must, without prejudice to the tasks of the remuneration committee, examine whether incentives provided by the remuneration system take into consideration risk, capital, liquidity and the likelihood and timing of earnings.

[Note: article 76(4) of CRD]

7.1.21

FCA PRA

R

- (1) A *CRR firm's* risk management function (■ SYSC 7.1.6 R) must be independent from the operational functions and have sufficient authority, stature, resources and access to the *management body*.
- (2) The risk management function must ensure that all material risks are identified, measured and properly reported. It must be actively involved in elaborating the *firm's* risk strategy and in all material risk management decisions and it must be able to deliver a complete view of the whole range of risks of the *firm*.
- (3) A *CRR firm* must ensure that the risk management function is able to report directly to the *management body* in its supervisory function, independent from *senior management* and that it can raise concerns and warn the *management body*, where appropriate, where specific risk developments affect or may affect the *firm*, without prejudice to the responsibilities of the *management body* in its supervisory and/or managerial functions pursuant to the CRD and the CRR.

[Note: article 76(5) of CRD]

7.1.22

FCA PRA

R

The head of the risk management function must be an independent senior manager with distinct responsibility for the risk management function. Where the nature, scale and complexity of the activities of the *CRR firm* do not justify a specially appointed person, another senior person within the *firm* may fulfil that function, provided there is no conflict of interest. The head of the risk management function must not be removed without prior approval of the *management body* and must be able to have direct access to the *management body* where necessary.

[Note: article 76(5) of CRD]

activity, where a conflict of interest may arise in relation to those activities;

- (iv) measures to prevent or limit any *person* from exercising inappropriate influence over the way in which a *relevant person* carries out services or activities; and
- (v) measures to prevent or control the simultaneous or sequential involvement of a *relevant person* in separate services or activities where such involvement may impair the proper management of conflicts of interest.

- (3) If the adoption or the practice of one or more of those measures and procedures does not ensure the requisite level of independence, a *common platform firm* and a *management company* must adopt such alternative or additional measures and procedures as are necessary and appropriate for the purposes of paragraph (1)(b).

[Note: article 22(2) and (3) of *MiFID implementing Directive* and articles 18(2), 19(1) and 19(2) of the *UCITS implementing Directive*]

10.1.11A

FCA

G

Other *firms* should take account of the *rules* relating to *conflicts of interest policies* (see ■ SYSC 10.1.10 R and ■ SYSC 10.1.11 R) as if they were *guidance* (and as if "should" appeared in those rules instead of "must", as explained in ■ SYSC 1 Annex 1.3.3 G), except when they produce or arrange the production of *investment research* in accordance with ■ COBS 12.2, or produce or disseminate *non-independent research* in accordance with ■ COBS 12.3 (see ■ SYSC 10.1.16 R).

10.1.11B

PRA

G

Other *firms* should take account of the *rules* relating to *conflicts of interest policies* (see ■ SYSC 10.1.10 R and ■ SYSC 10.1.11 R) as if they were *guidance* (and as if "should" appeared in those rules instead of "must", as explained in ■ SYSC 1 Annex 1.3.3 G).

10.1.12

FCA PRA

G

In drawing up a *conflicts of interest policy* which identifies circumstances which constitute or may give rise to a conflict of interest, a *firm* should pay special attention to the activities of investment research and advice, proprietary trading, portfolio management and corporate finance business, including underwriting or selling in an offering of securities and advising on mergers and acquisitions. In particular, such special attention is appropriate where the *firm* or a *person* directly or indirectly linked by *control* to the *firm* performs a combination of two or more of those activities.

[Note: recital 26 of *MiFID implementing Directive*]

Corporate finance

10.1.13

FCA

G

This section is relevant to the management of a *securities* offering by any *firm*.

10.1.14

FCA

G

A *firm* will wish to note that when carrying on a mandate to manage an offering of *securities*, the *firm's* duty for that business is to its corporate finance *client* (in many cases, the corporate issuer or seller of the relevant *securities*), but that its responsibilities to provide services to its investment *clients* are unchanged.

10.1.15

FCA

G

Measures that a *firm* might wish to consider in drawing up its *conflicts of interest policy* in relation to the management of an offering of *securities* include:

- (1) at an early stage agreeing with its corporate finance *client* relevant aspects of the offering process such as the process the *firm* proposes to follow in order to determine what recommendations it will make about allocations for the offering; how the target investor group will be identified; how recommendations on allocation and pricing will be prepared; and whether the *firm* might place *securities* with its investment *clients* or with its own proprietary book, or with an associate, and how conflicts arising might be managed; and
- (2) agreeing allocation and pricing objectives with the corporate finance *client*; inviting the corporate finance *client* to participate actively in the allocation process; making the initial recommendation for allocation to *retail clients* of the *firm* as a single block and not on a named basis; having internal arrangements under which senior personnel responsible for providing services to *retail clients* make the initial allocation recommendations for allocation to *retail clients* of the *firm*; and disclosing to the *issuer* details of the allocations actually made.

[Note: The provisions in ■ SYSC 10.1 also implement articles 74(1) and 88 of the CRD and as applied under the discretion in the third paragraph of article 95(2) of the EU CRR, BCD Article 22 and BCD Annex V paragraph 1]

Application of conflicts of interest rules to non-common platform firms when producing investment research or non-independent research

10.1.16

FCA

R

The *rules* relating to:

- (1) types of conflict (see ■ SYSC 10.1.4 R);
- (2) records of conflicts (see ■ SYSC 10.1.6 R); and
- (3) *conflicts of interest policies* (see ■ SYSC 10.1.10 R and ■ SYSC 10.1.11 R);

also apply to a *firm* which is not a *common platform firm* when it produces, or arranges for the production of, *investment research* that is intended or likely to be subsequently disseminated to *clients* of the *firm* or to the public in accordance with ■ COBS 12.2, and when it produces or disseminates *non-independent research* in accordance with ■ COBS 12.3.

Additional requirements for a management company

10.1.17

FCA

R

A *management company*, when identifying the types of conflict of interests for the purposes of ■ SYSC 10.1.4 R, must take into account:

- (1) the interests of the *firm*, including those deriving from its belonging to a *group* or from the performance of services and activities, the interests of the *clients* and the duty of the *firm*

towards the *UCITS scheme* or *EEA UCITS scheme* it manages; and

- (2) where it manages two or more *UCITS schemes* or *EEA UCITS schemes*, the interests of all of them.

[Note: article 17(2) of the *UCITS implementing Directive*]

10.1.18

G

FCA

For a *management company*, references to client in ■ SYSC 10.1.4 R and in the other *rules* in this section should be construed as referring to any *UCITS scheme* or *EEA UCITS scheme* managed by that *firm* or which it intends to manage, and with or for the benefit of which the relevant activity is to be carried on.

Structure and organisation of a management company

10.1.19

R

FCA

A *management company* must be structured and organised in such a way as to minimise the risk of a *UCITS scheme's*, *EEA UCITS scheme's* or *client's* interests being prejudiced by conflicts of interest between the *management company* and its *clients*, between two of its *clients*, between one of its *clients* and a *UCITS scheme* or an *EEA UCITS scheme*, or between two such *schemes*.

A *management company* must try to avoid conflicts of interest and, when they cannot be avoided, ensure that the *UCITS schemes* and *EEA UCITS schemes* it manages are fairly treated.

- (1) Where the organisational or administrative arrangements made by a *management company* for the management of conflicts of interest are not sufficient to ensure, with reasonable confidence, that risks of damage to the interests of the *UCITS scheme* or *EEA UCITS scheme* it manages or of its *unitholders* will be prevented, the *senior personnel* or other competent internal body of the *firm* must be promptly informed in order for them to take any necessary decision to ensure that in all cases the *firm* acts in the best interests of the *scheme* and of its *unitholders*.

- (2) A *management company* must report situations referred to in (1) to the *unitholders* of the *UCITS scheme* or *EEA UCITS scheme* it manages by any appropriate *durable medium* and give reasons for its decision.

Collective portfolio management investment firms

A *collective portfolio management investment firm* which manages investments other than for an *AIF* or *UCITS* for which it has been appointed as manager, must obtain approval from its *client* before it invests all or part of the *client's* portfolio in *units* or *shares* of an *AIF* or *UCITS* it manages.

An *AIFM* must take all reasonable steps to identify conflicts of interest that arise, in the course of managing *AIFs*, between:

- (1) the *AIFM*, including its managers, *employees* or any person directly or indirectly linked to the *AIFM* by *control*, and an *AIF* managed by the *AIFM* or the investors in that *AIF*; or
- (2) an *AIF* or the investors in that *AIF*, and another *AIF* or the investors in that *AIF*; or
- (3) an *AIF* or the investors in that *AIF*, and another *client* of the *AIFM*; or
- (4) an *AIF* or the investors in that *AIF*, and a *UCITS* managed by the *AIFM* or the investors in that *UCITS*; or

An *AIFM* must:

- (1) maintain and operate effective organisational and administrative arrangements, with a view to taking all reasonable steps designed to identify, prevent, manage and monitor conflicts of interest in order to prevent them from adversely affecting the interests of the *AIFs* and their investors;
- (2) segregate, within its own operating environment, tasks and responsibilities which may be regarded as incompatible with each other or which may potentially generate systematic conflicts of interest; and

- (3) assess whether its operating conditions may involve any other material conflicts of interest and disclose them to the *AIF*'s investors.

10.2 Chinese walls

Application

10.2.1

FCA PRA

R

This section applies to any *firm*.

Control of information

10.2.2

FCA PRA

R

(1) When a *firm* establishes and maintains a *Chinese wall* (that is, an arrangement that requires information held by a *person* in the course of carrying on one part of the business to be withheld from, or not to be used for, *persons* with or for whom it acts in the course of carrying on another part of its business) it may:

- (a) withhold or not use the information held; and
- (b) for that purpose, permit *persons* employed in the first part of its business to withhold the information held from those employed in that other part of the business;

but only to the extent that the business of one of those parts involves the carrying on of *regulated activities*, *ancillary activities* or, in the case of *MiFID business*, the provision of *ancillary services*.

- (2) Information may also be withheld or not used by a *firm* when this is required by an established arrangement maintained between different parts of the business (of any kind) in the same *group*. This provision does not affect any requirement to transmit or use information that may arise apart from the *rules* in *COBS*.
- (3) For the purpose of this *rule*, "maintains" includes taking reasonable steps to ensure that the arrangements remain effective and are adequately monitored, and must be interpreted accordingly.
- (4) For the purposes of section 118A(5)(a) of the *Act*, behaviour conforming with paragraph (1) does not amount to market abuse.

Financial conglomerates

12.1.11

FCA PRA

R

Where this section applies with respect to a *financial conglomerate*, the risk management processes referred to in ■ SYSC 12.1.8 R (2) must include:

- (1) sound governance and management processes, which must include the approval and periodic review by the appropriate managing bodies within the *financial conglomerate* of the strategies and policies of the *financial conglomerate* in respect of all the risks assumed by the *financial conglomerate*, such review and approval being carried out at the level of the *financial conglomerate*;
- (2) adequate capital adequacy policies at the level of the *financial conglomerate*, one of the purposes of which must be to anticipate the impact of the business strategy of the *financial conglomerate* on its risk profile and on the capital adequacy requirements to which it and its members are subject;
- (3) adequate procedures for the purpose of ensuring that the risk monitoring systems of the *financial conglomerate* and its members are well integrated into their organisation;
- (4) adequate procedures for the purpose of ensuring that the systems and controls of the members of the *financial conglomerate* are consistent and that the risks can be measured, monitored and controlled at the level of the *financial conglomerate* ; and
- (5) arrangements in place to contribute to and develop, if required, adequate recovery and resolution arrangements and plans; a *firm* must update these arrangements regularly.

[Note: article 9(2) of the *Financial Groups Directive*]

12.1.12

FCA PRA

R

Where this section applies with respect to a *financial conglomerate*, the internal control mechanisms referred to in ■ SYSC 12.1.8 R (2) must include:

- (1) mechanisms that are adequate to identify and measure all material risks incurred by members of the *financial conglomerate* and appropriately relate capital in the *financial conglomerate* to risks; and
- (2) sound reporting and accounting procedures for the purpose of identifying, measuring, monitoring and controlling *intra-group transactions* and *risk concentrations*.

CRR firms and non-CRR firms that are parent financial holding companies in a Member State

If this *rule* applies under ■ SYSC 12.1.14 R to a *firm*, the *firm* must:

- (1) comply with ■ SYSC 12.1.8 R (2) in relation to any *UK consolidation group* or *non-EEA sub-group* of which it is a member, as well as in relation to its *group*; and
- (2) ensure that the risk management processes and internal control mechanisms at the level of any *consolidation group* or *non-EEA sub-group* of which it is a member comply with the obligations set out in the following provisions on a consolidated (or sub-consolidated) basis:
 - (a) ■ SYSC 4.1.1 R and ■ SYSC 4.1.2 R ;

[Note:
article 109(2) of *CRD*]

- (3) ensure that compliance with the obligations in (2) enables the *consolidation group* or the *non-EEA sub-group* to have arrangements, processes and mechanisms that are consistent and well integrated and that any data relevant to the purpose of supervision can be produced.

■ SYSC 12.1.13 R applies to a *firm* that is:

12.1.15 **R**
FCA PRA

In the case of a *firm* that:

- (1) is a *CRR firm*; and
- (2) has a *mixed-activity holding company* as a *parent undertaking*; the risk management processes and internal control mechanisms referred to in **SYSC 12.1.8 R** must include sound reporting and accounting procedures and other mechanisms that are adequate to identify, measure, monitor and control transactions between the *firm's parent undertaking mixed-activity holding company* and any of the *mixed-activity holding company's subsidiary undertakings*.

12.1.15A **R**
FCA

SYSC 12.1.13 R applies to a *BIPRU firm* as if it were a *CRR firm* but the reference to *Remuneration Code* is to the *BIPRU Remuneration Code*.

Insurance undertakings

12.1.16 **R**
PRA

In the case of an *insurer* that has a *mixed-activity insurance holding company* as a *parent undertaking*, the risk management processes and internal control mechanisms referred to in **SYSC 12.1.8 R** must include sound reporting and accounting procedures and other mechanisms that are adequate to identify, measure, monitor and control transactions between the *firm's parent undertaking mixed-activity insurance holding company* and any of the *mixed-activity insurance holding company's subsidiary undertakings*.

12.1.17 **G**
PRA

SYSC 12.1.16 R cannot apply to a *building society* as it cannot have a *mixed-activity holding company* as a *parent undertaking*. **SYSC 12.1.16 R** cannot apply to a *friendly society* as it cannot have a *mixed-activity insurance holding company* as a *parent undertaking*.

Nature and extent of requirements and allocation of responsibilities within the group

12.1.18 **G**
FCA PRA

Assessment of the adequacy of a *group's* systems and controls required by this section will form part of the *appropriate regulator's* risk management process.

12.1.19 **G**
FCA PRA

The nature and extent of the systems and controls necessary under **SYSC 12.1.8 R** (1) to address *group* risk will vary according to the materiality of those risks to the *firm* and the position of the *firm* within the *group*.

12.1.20 **G**
FCA PRA

In some cases the management of the systems and controls used to address the risks described in **SYSC 12.1.8 R** (1) may be organised on a *group-wide* basis. If the *firm* is not carrying out those functions itself, it should delegate them to the *group* members that are

carrying them out. However, this does not relieve the *firm* of responsibility for complying with its obligations under ■ SYSC 12.1.8 R (1). A *firm* cannot absolve itself of such a responsibility by claiming that any breach of that *rule* is caused by the actions of another member of the *group* to whom the *firm* has delegated tasks. The risk management arrangements are still those of the *firm*, even though personnel elsewhere in the *firm's group* are carrying out these functions on its behalf.

12.1.21

FCA PRA

G

■ SYSC 12.1.8 R (1) deals with the systems and controls that a *firm* should have in respect of the exposure it has to the rest of the *group*. On the other hand, the purpose of ■ SYSC 12.1.8 R (2) and the *rules* in this section that amplify it is to require *groups* to have adequate systems and controls. However a *group* is not a single legal entity on which obligations can be imposed. Therefore the obligations have to be placed on individual *firms*. The purpose of imposing the obligations on each *firm* in the *group* is to make sure that the *appropriate regulator* can take supervisory action against any *firm* in a *group* whose systems and controls do not meet the standards in this section. Thus responsibility for compliance with the *rules* for *group* systems and controls is a joint one.

12.1.22

FCA PRA

G

If both a *firm* and its *parent undertaking* are subject to ■ SYSC 12.1.8 R (2), the *appropriate regulator* would not expect systems and controls to be duplicated. In this case, the *firm* should assess whether and to what extent it can rely on its parent's *group* risk systems and controls.

Remuneration Code

19A.1 General application and purpose

Who? What? Where?

19A.1.1

FCA PRA

R

- (1) The *Remuneration Code* applies to :
- (a) a *building society*;
 - (b) a *bank*;
 - (c) an *investment firm*;
 - (d) an *overseas firm* that;
 - (i) is not an *EEA firm*;
 - (ii) has its head office outside the *EEA*; and
 - (iii) would be a *firm* referred to in (a), (b) or (c) if it had been a *UK domestic firm*, had carried on all of its business in the *UK* and had obtained whatever authorisations for doing so as are required under the Act.
- (2) In relation to a *firm* that falls under (1)(d), the *Remuneration Code* applies only in relation to activities carried on from an establishment in the *United Kingdom*.
- (3) Otherwise, the *Remuneration Code* applies to a *firm* within (1) in the same way as ■ SYSC 4.1.1 R (General Requirements).

19A.1.2

FCA PRA

G

Part 2 of ■ SYSC 1 Annex 1 provides for the application of ■ SYSC 4.1.1 R (General Requirements). In particular, and subject to the provisions on group risk systems and controls requirements in ■ SYSC 12, this means that:

- (1) in relation to what the *Remuneration Code* applies to, it:
- (a) applies in relation to *regulated activities*, activities that constitute *dealing in investments as principal* (disregarding the exclusion in article 15 of the *Regulated Activities Order* (Absence of holding out etc)), *ancillary activities* and (in relation to *MiFID business*) *ancillary services*;

- (b) applies with respect to the carrying on of *unregulated activities* in a *prudential context*; and
 - (c) takes into account activities of other *group* members; and
- (2) in relation to where the *Remuneration Code* applies, it applies in relation to:
- (a) a *firm's UK* activities;
 - (b) a *firm's passported activities* carried on from a *branch* in another *EEA State*; and
 - (c) a *UK domestic firm's* activities wherever they are carried on, in a *prudential context*.

When?

19A.1.3

R

FCA PRA

- (1) A *firm* must apply the *remuneration* requirements in ■ SYSC 19A.3 other than ■ SYSC 19A.3.44 R (3) and ■ SYSC 19A.3.44 R in relation to:
- (a) *remuneration* awarded, whether pursuant to a contract or otherwise, on or after 1 January 2011;
 - (b) *remuneration* due on the basis of contracts concluded before 1 January 2011 which is awarded or paid on or after 1 January 2011; and
 - (c) *remuneration* awarded, but not yet paid, before 1 January 2011, for services provided in 2010.

[Note: article 3(2) of the Third Capital Requirements Directive (Directive 2010/76/EU)]

- (2) A *firm* must apply the *remuneration* requirements in SYSC 19A.3.44R(3) and SYSC 19.3.44AR in relation to *remuneration* awarded for services provided or performance from the year 2014 onwards, whether due on the basis of contracts concluded before, on or after 31 December 2013.

19A.1.4

G

FCA PRA

Subject to the requirements of ■ SYSC 19A.1.5 R, in the *appropriate regulator's* view ■ SYSC 19A.1.3 R does not require a *firm* to breach requirements of applicable contract or employment law.

[Note: recital 14 of the Third Capital Requirements Directive (Directive 2010/76/EU)]

19A.1.5

R

FCA PRA

- (1) This *rule* applies to a *firm* that is unable to comply with the *Remuneration Code* because of an obligation it owes to a *Remuneration Code staff member* under a provision of an agreement made on or before 29 July 2010 (the "*provision*").

- (2) A *firm* must take reasonable steps to amend or terminate the provision referred to in (1) in a way that enables it to comply with the *Remuneration Code* at the earliest opportunity.
- (3) Until the provision referred to in (1) ceases to prevent the *firm* from complying with the *Remuneration Code*, the *firm* must adopt specific and effective arrangements, processes and mechanisms to manage the risks raised by the provision.

Purpose

19A.1.6

FCA PRA

G

- (1) The aim of the *Remuneration Code* is to ensure that *firms* have risk-focused *remuneration* policies, which are consistent with and promote effective risk management and do not expose them to excessive risk. It expands upon the general organisational requirements in ■ SYSC 4.
- (2) The *Remuneration Code* implements the main provisions of the *CRD* which relate to *remuneration*. The Committee of European Banking Supervisors published Guidelines on Remuneration Policies and Practices on 10 December 2010. Provisions of the Capital Requirements (Amendment) Regulations 2012 (SI 2012/917) together with the European Banking Authority's Guidelines to article 22(3) and (5) of the *Banking Consolidation Directive* relating to the collection of *remuneration* benchmarking information and *high earners* information have been implemented through SUP 16 Annex 33AR and SUP 16 Annex 34AR. The Guidelines can be found at <http://www.eba.europa.eu/cebs/media/Publications/Standards%20and%20Guidelines/2012/EBA-GL-2012-04--GL-4-on-remuneration-benchmarking-exercise-.pdf> and <http://www.eba.europa.eu/cebs/media/Publications/Standards%20and%20Guidelines/2012/EBA-GL-2012-05--GL-5-on-remuneration-data-collection-exercise-.pdf>.

Notifications to the appropriate regulator

19A.1.7

FCA PRA

G

- (1) The *Remuneration Code* does not contain specific notification requirements. However, general circumstances in which the *appropriate regulator* expects to be notified by *firms* of matters relating to their compliance with requirements under the *regulatory system* are set out in ■ SUP 15.3 (General notification requirements).
- (2) In particular, in relation to *remuneration* matters such circumstances should take into account *unregulated activities* as well as *regulated activities* and the activities of other members of a *group* and would include each of the following:
 - (a) significant breaches of the *Remuneration Code*, including any breach of a *rule* to which the detailed provisions on voiding and recovery in ■ SYSC 19A Annex 1 apply;
 - (b) any proposed *remuneration* policies, procedures or practices which could:
 - (i) have a significant adverse impact on the *firms* reputation; or

- (ii) affect the *firms* ability to continue to provide adequate services to its *customers* and which could result in serious detriment to a *customer* of the *firm*; or
 - (iii) result in serious financial consequences to the *financial system* or to other *firms*;
- (c) any proposed changes to *remuneration* policies, practices or procedures which could have a significant impact on the *firms* risk profile or resources;
- (d) fraud, errors and other irregularities described in ■ SUP 15.3.17 R which may suggest weaknesses in, or be motivated by, the *firms remuneration* policies, procedures or practices.
- (3) Such notifications should be made immediately the *firm* becomes aware, or has information which reasonably suggests such circumstances have occurred, may have occurred or may occur in the foreseeable future.

Individual guidance

19A.1.8

FCA

G

The *FCA*'s policy on individual *guidance* is set out in ■ SUP 9. *Firms* should in particular note the policy on what the *FCA* considers to be a reasonable request for *guidance* (see ■ SUP 9.2.5 G). For example, where a *firm* is seeking *guidance* on a proposed *remuneration* structure the *FCA* will expect the *firm* to provide a detailed analysis of how the structure complies with the *Remuneration Code*, including the general requirement for *remuneration* policies, procedures and practices to be consistent with and promote sound and effective risk management.

19A.2 General requirement

Remuneration policies must promote effective risk management

19A.2.1

FCA PRA

R

A *firm* must establish, implement and maintain *remuneration* policies, procedures and practices that are consistent with and promote sound and effective risk management.

[Note: article 74(1) of CRD]

19A.2.2

FCA PRA

G

- (1) If a *firm's remuneration* policy is not aligned with effective risk management it is likely that *employees* will have incentives to act in ways that might undermine effective risk management.
- (2) The *Remuneration Code* covers all aspects of *remuneration* that could have a bearing on effective risk management including salaries, bonuses, long-term incentive plans, options, hiring bonuses, severance packages and pension arrangements. In applying the *Remuneration Code*, a *firm* should have regard to applicable good practice on *remuneration* and corporate governance, such as guidelines on executive contracts and severance produced by the Association of British Insurers (ABI) and the National Association of Pension Funds (NAPF). In considering the risks arising from its *remuneration* policies, a *firm* will also need to take into account its statutory duties in relation to equal pay and non-discrimination.
- (3) As with other aspects of a *firm's* systems and controls, in accordance with ■ SYSC 4.1.2 R *remuneration* policies, procedures and practices must be comprehensive and proportionate to the nature, scale and complexity of the *common platform firm's* activities. What a *firm* must do in order to comply with the *Remuneration Code* will therefore vary. For example, while the *Remuneration Code* refers to a *firm's remuneration* committee and risk management function, it may be appropriate for the *governing body* of a smaller *firm* to act as the *remuneration* committee, and for the *firm* not to have a separate risk management function.
- (4) The principles in the *Remuneration Code* are used by the *appropriate regulator* to assess the quality of a *firm's remuneration* policies and whether they encourage excessive risk-taking by a *firm's employees*.
- (5) The *appropriate regulator* may also ask *remuneration* committees to provide the *appropriate regulator* with evidence of how well the *firm's remuneration* policies meet the *Remuneration Code's* principles, together with plans for improvement where there is a shortfall. The *appropriate regulator* also expects relevant *firms* to use the principles in assessing their exposure to

risks arising from their *remuneration* policies as part of the *internal capital adequacy assessment process (ICAAP)*.

- (6) The *Remuneration Code* is principally concerned with the risks created by the way *remuneration* arrangements are structured, not with the absolute amount of *remuneration*, which is generally a matter for *firms'* *remuneration* committees.

19A.2.3

FCA PRA

G

- (1) The specific *remuneration* requirements in this chapter may apply only in relation to certain categories of *employee*. But the *appropriate regulator* would expect *firms*, in complying with the *Remuneration Code general requirement*, to apply certain principles on a *firm-wide* basis.
- (2) In particular, the *appropriate regulator* considers that *firms* should apply the principle relating to guaranteed variable *remuneration* on a *firm-wide* basis (Remuneration Principle 12(c); ■ SYSC 19A.3.40 R to ■ SYSC 19A.3.43 G).
- (3) The *appropriate regulator* would also expect *firms* to apply at least the principles relating to risk management and risk tolerance (Remuneration Principle 1); supporting business strategy, objectives, values and long-term interests of the firm (Remuneration Principle 2); conflicts of interest (Remuneration Principle 3); governance (Remuneration Principle 4); risk adjustment (Remuneration Principle 8); pension policy (Remuneration Principle 9); personal investment strategies (Remuneration Principle 10); payments related to early termination (Remuneration Principle 12(e)) and deferral (Remuneration Principle 12(g)) on a *firm-wide* basis.

Record-keeping

19A.2.4

FCA PRA

G

In line with the record-keeping requirements in ■ SYSC 9, a *firm* should ensure that its *remuneration* policies, practices and procedures are clear and documented. Such policies, practices and procedures would include performance appraisal processes and decisions.

Interpretation of references to remuneration

19A.2.5

FCA PRA

R

- (1) In this chapter references to *remuneration* include *remuneration* paid, provided or awarded by any *person* to the extent that it is paid, provided or awarded in connection with *employment* by a *firm*.
- (2) Paragraph (1) is without prejudice to the meaning of *remuneration* elsewhere in the *Handbook*.

19A.2.6

FCA PRA

G

Remuneration includes, for example, payments made by a seconding organisation which is not subject to the *Remuneration Code* to a secondee in respect of their *employment* by a *firm* which is subject to the *Remuneration Code*.

19A.3 Remuneration principles for banks, building societies and investment firms

Application: groups

19A.3.1

FCA PRA

R

- (1) A *firm* must apply the requirements of this section at *group*, *parent undertaking* and *subsidiary undertaking* levels, including those *subsidiaries* established in a country or territory which is not an *EEA State*.
- (2) Paragraph (1) does not limit ■ SYSC 12.1.13 R (2)(dA) (which relates to the application of the *Remuneration Code* within *UK consolidation groups* and *non-EEA sub-groups*).

[Note: article 92(1) of *CRD*]

19A.3.2

FCA PRA

G

■ SYSC 12.1.13 R (2)(dA) requires the *firm* to ensure that the risk management processes and internal control mechanisms at the level of any *UK consolidation group* or *non-EEA sub-group* of which a *firm* is a member comply with the obligations set out in this section on a consolidated (or sub-consolidated) basis. In the *appropriate regulator's* view, the requirement to apply this section at *group*, *parent undertaking* and *subsidiary undertaking* levels (as provided for in ■ SYSC 19A.3.1 R (1)) is in line with the requirements in article 109(2) of *CRD* concerning the application of systems and controls requirements to *groups* (as implemented in ■ SYSC 12.1.13 R).

Application: categories of staff and proportionality

19A.3.3

FCA PRA

R

- (1) This section applies in relation to *Remuneration Code staff*, except as set out in (3).
- (2) When establishing and applying the total *remuneration* policies for *Remuneration Code staff*, a *firm* must comply with this section in a way and to the extent that is appropriate to its size, internal organisation and the nature, the scope and the complexity of its activities (the *remuneration principles proportionality rule*).
- (3) Paragraphs (1) and (2) do not apply to the requirement for significant *firms* to have a *remuneration* committee (■ SYSC 19A.3.12 R).

[Note: article 92(2) of *CRD*]

[Note: In addition to the *guidance* in this section which relates to the *remuneration principles proportionality rule*, the *FSA* gave guidance on the division of *firms* into categories for the purpose of providing a framework for the operation of the *remuneration principles proportionality rule*. This *guidance* has been adopted by the *FCA* and is available in the *FCA* website at <http://www.fca.org.uk/firms/markets/international-markets/remuneration-code>.]

19A.3.4

FCA PRA

R

Remuneration Code staff comprises categories of staff including senior management, risk takers, staff engaged in control functions and any *employee* receiving total remuneration that takes them into the same *remuneration* bracket as senior management and risk takers, whose professional activities have a material impact on the *firm's* risk profile.

A *firm* must:

- (1) maintain a record of its *Remuneration Code staff* in accordance with the general record-keeping requirements (■ SYSC 9); and
- (2) take reasonable steps to ensure that its *Remuneration Code staff* understand the implications of their status as such, including the potential for *remuneration* which does not comply with certain requirements of the *Remuneration Code* to be rendered void and recoverable by the *firm*.

FCA PRA

G

- (1) A *firm* should be able to demonstrate that its decisions are consistent with an assessment of its financial condition and future prospects. In particular, practices by which *remuneration* is paid for potential future revenues whose timing and likelihood remain uncertain should be evaluated carefully and the *governing body* or *remuneration* committee (or both) should work closely with the *firm's* risk function in evaluating the incentives created by its *remuneration* system.
- (2) The *governing body* and any *remuneration* committee are responsible for ensuring that the *firm's* *remuneration* policy complies with the *Remuneration Code* and where relevant should take into account relevant guidance, such as that issued by the Basel Committee on Banking Supervision, the International Association of Insurance Supervisors (IAIS) and the International Organization of Securities Commissions (IOSCO).
- (3) The periodic review of the implementation of the *remuneration* policy should assess compliance with the *Remuneration Code*.
- (4) Guidance on what the *supervisory function* might involve is set out in ■ SYSC 4.3.3 G.

Remuneration Principle 5: Control functions

19A.3.14
FCA PRA

R

A *firm* must ensure that *employees* engaged in control functions:

- (1) are independent from the business units they oversee;
- (2) have appropriate authority; and
- (3) are *remunerated*:
 - (a) adequately to attract qualified and experienced staff; and
 - (b) in accordance with the achievement of the objectives linked to their functions, independent of the performance of the business areas they control.

[Note: article 92(2)(e) of *CRD* and Standard 2 of the *FSB Compensation Standards*]

19A.3.15
FCA PRA

A

- (1) A *firm's* risk management and compliance functions should have appropriate input into setting the *remuneration* policy for other business areas. The procedures for setting *remuneration* should allow risk and compliance functions to have significant

input into the setting of individual *remuneration* awards where those functions have concerns about the behaviour of the individuals concerned or the riskiness of the business undertaken.

- (2) Contravention of (1) may be relied on as tending to establish contravention of the *rule* on *employees* engaged in control functions having appropriate authority (■ SYSC 19A.3.14 R (2)).

19A.3.16

FCA PRA

R

A firm must ensure that the *remuneration* of the senior officers in risk management and compliance functions is directly overseen by the *remuneration* committee referred to in ■ SYSC 19A.3.12 R, or, if such a committee has not been established, by the *governing body* in its *supervisory function*.

[Note: article 92(2)(f) of CRD]

19A.3.17

FCA PRA

G

- (1) This Remuneration Principle is designed to manage the conflicts of interest which might arise if other business areas had undue influence over the *remuneration* of *employees* within control functions. Conflicts of interest can easily arise when *employees* are involved in the determination of *remuneration* for their own business area. Where these could arise they need to be managed by having in place independent roles for control functions (including, notably, risk management and compliance) and human resources. It is good practice to seek input from a *firm's* human resources function when setting *remuneration* for other business areas.
- (2) The need to avoid undue influence is particularly important where *employees* from the control functions are embedded in other business areas. This Remuneration Principle does not prevent the views of other business areas being sought as an appropriate part of the assessment process.
- (3) The *appropriate regulator* would generally expect the ratio of the potential variable component of *remuneration* to the fixed component of *remuneration* to be significantly lower for *employees* in risk management and compliance functions than for *employees* in other business areas whose potential bonus is a significant proportion of their *remuneration*. *Firms* should nevertheless ensure that the total *remuneration* package offered to those *employees* is sufficient to attract and retain staff with the skills, knowledge and expertise to discharge those functions. The requirement that the method of determining the *remuneration* of *relevant persons* involved in the compliance function must not compromise their objectivity or be likely to do so also applies (see ■ SYSC 6.1.4 R (4)).

Remuneration Principle 6: Remuneration and capital

19A.3.18

FCA PRA

R

A firm must ensure that total variable *remuneration* does not limit the firm's ability to strengthen its capital base.

[Note: article 94(1)(c) of CRD and Standard 3 of the FSB Compensation Standards]

19A.3.19

FCA PRA

G

This Remuneration Principle underlines the link between a *firm's* variable *remuneration* costs and the need to manage its capital base, including forward-looking capital planning measures. Where a *firm* needs to strengthen its capital base, its variable *remuneration* arrangements should be sufficiently flexible to allow it to direct the necessary resources towards capital building.

19A.3.20
FCA PRA

R

Remuneration Principle 7: Exceptional government intervention

A *firm* that benefits from exceptional government intervention must ensure that:

- (1) variable *remuneration* is strictly limited as a percentage of net revenues when it is inconsistent with the maintenance of a sound capital base and timely exit from government support;
- (2) it restructures *remuneration* in a manner aligned with sound risk management and long-term growth, including when appropriate establishing limits to the *remuneration* of members of its *management body*; and
- (3) no variable *remuneration* is paid to members of its *management body* unless this is justified.

[Note: article 93 of *CRD* and Standard 10 of the *FSB Compensation Standards*]

19A.3.21
FCA PRA

G

The *appropriate regulator* would normally expect it to be appropriate for the ban on paying variable *remuneration* to members of the *management body* of a *firm* that benefits from exceptional government intervention to apply only in relation to members of the *management body* who were in office at the time that the intervention was required.

Remuneration Principle 8: Profit-based measurement and risk adjustment19A.3.22
FCA PRA

R

- (1) A *firm* must ensure that any measurement of performance used to calculate variable *remuneration* components or pools of variable *remuneration* components:
 - (a) includes adjustments for all types of current and future risks and takes into account the cost and quantity of the capital and the liquidity required; and
 - (b) takes into account the need for consistency with the timing and likelihood of the firm receiving potential future revenues incorporated into current earnings.
- (2) A *firm* must ensure that the allocation of variable *remuneration* components within the *firm* also takes into account all types of current and future risks.

[Note: article 94(1)(j), (k) of *CRD* and Standard 4 of the *FSB Compensation Standards*]

19A.3.23
FCA PRA

G

- (1) This Remuneration Principle stresses the importance of risk adjustment in measuring performance, and the importance within that process of applying judgment and common sense. A *firm* should ask the risk management function to validate and assess risk-adjustment techniques, and to attend a meeting of the *governing body* or *remuneration* committee for this purpose.
- (2) A number of risk-adjustment techniques and measures are available, and a *firm* should choose those most appropriate to its circumstances. Common measures include those based on economic profit or economic capital.

Whichever technique is chosen, the full range of future risks should be covered. The *appropriate regulator* expects a *firm* to be able to provide it with details of all adjustments that the *firm* has made under a formulaic approach.

- (3) The *appropriate regulator* expects that a *firm* will apply qualitative judgments and common sense in the final decision about the performance-related components of variable *remuneration* pools.
- (4) A *firm's governing body* (or *remuneration* committee where appropriate) should take the lead in determining the measures to be used. It should offer the appropriate checks and balances to prevent inappropriate manipulation of the measures used. It should consult closely and frequently with the *firm's* risk management functions, in particular those relating to operational, market, credit and liquidity risk.

19A.3.24

G

FCA PRA

- (1) Long-term incentive plans should be treated as pools of variable *remuneration*. Many common measures of performance for long-term incentive plans, such as earnings per *share* (EPS), are not adjusted for longer-term risk factors. Total shareholder return (TSR), another common measure, includes in its measurement dividend distributions, which can also be based on unadjusted earnings data. If incentive plans mature within a two to four year period and are based on EPS or TSR, strategies can be devised to boost EPS or TSR during the life of the plan, to the detriment of the true longer-term health of a *firm*. For example, increasing leverage is a technique which can be used to boost EPS and TSR. *Firms* should take account of these factors when developing risk-adjustment methods.
- (2) *Firms* that have long-term incentive plans should structure them with vesting subject to appropriate performance conditions, and at least half of the award vesting after not less than five years and the remainder after not less than three years.
- (3) Long-term incentive plan awards may be included in the calculation of the deferred portion of variable *remuneration* only if upside incentives are adequately balanced by downside adjustments. The valuation of the award should be based on its value when the award is granted, and determined using an appropriate technique.

19A.3.25

R

FCA PRA

Assessments of financial performance used to calculate variable *remuneration* components or pools of variable *remuneration* components must be based principally on profits.

19A.3.26

G

FCA PRA

- (1) Performance measures based primarily on revenues or turnover are unlikely to pay sufficient regard to the quality of business undertaken or services provided. Profits are a better measure provided they are adjusted for risk, including future risks not adequately captured by accounting profits.
- (2) Management accounts should provide profit data at such levels within the *firm's* structure as to enable a *firm* to see as accurate a picture of contributions of relevant staff to a *firm's* performance as is reasonably practicable. If revenue or turnover is used as a component in performance assessment, processes should be in place to ensure that the quality of business undertaken or services provided and their appropriateness for *clients* are taken into account.

19A.3.27 **R**
FCA PRA

A *firm* must ensure that its total variable *remuneration* is generally considerably contracted where subdued or negative financial performance of the *firm* occurs, taking into account both current *remuneration* and reductions in payouts of amounts previously earned, including through malus or clawback arrangements.

[Note: article 94(1)(n) of *CRD* and Standard 5 of the *FSB Compensation Standards*]

19A.3.28 **G**
FCA PRA

Where a *firm* makes a loss the *appropriate regulator* would generally expect no variable *remuneration* to be awarded. Variable *remuneration* may nevertheless be justified, for example, to incentivise *employees* involved in new business ventures which could be loss-making in their early stages.

Remuneration Principle 9: Pension policy

19A.3.29 **R**
FCA PRA

A *firm* must ensure that:

- (1) its pension policy is in line with its business strategy, objectives, values and long-term interests;
- (2) when an *employee* leaves the *firm* before retirement, any *discretionary pension benefits* are held by the *firm* for a period of five years in the form of instruments referred to in
 - SYSC 19A.3.47 R (1); and
- (3) when an *employee* reaches retirement, *discretionary pension benefits* are paid to the *employee* in the form of instruments referred to in ■ SYSC 19A.3.47 R (1) and subject to a five-year retention period.

[Note: article 94(1)(o) of *CRD*]

Remuneration Principle 10: Personal investment strategies

19A.3.30 **R**
FCA PRA

- (1) A *firm* must ensure that its *employees* undertake not to use personal hedging strategies or *remuneration-* or liability-related *contracts of insurance* to undermine the risk alignment effects embedded in their *remuneration* arrangements.
- (2) A *firm* must maintain effective arrangements designed to ensure that *employees* comply with their undertaking.

[Note: article 94(1)(p) of *CRD* and Standard 14 of the *FSB Compensation Standards*]

19A.3.31 **G**
FCA PRA

In the *appropriate regulator's* view, circumstances in which a *person* will be using a personal hedging strategy include entering into an arrangement with a third party under which the third party will make payments, directly or indirectly, to that *person* that are linked to or commensurate with the amounts by which the *person's remuneration* is subject to reductions.

19A.3.32
FCA PRA

Remuneration Principle 11: Non-compliance with the Remuneration Code

Remuneration Principle 12: Remuneration structures - introduction

Remuneration Principle 12 consists of a series of *rules*, *evidential provisions* and *guidance* relating to *remuneration* structures.

19A.3.34
FCA PRA

G

- (1) Taking account of the *remuneration principles proportionality rule*, the *appropriate regulator* does not generally consider it necessary for a *firm* to apply the *rules* referred to in (2) where, in relation to an individual ("X"), both the following conditions are satisfied:
 - (a) Condition 1 is that Xs variable *remuneration* is no more than 33% of total *remuneration*; and
 - (b) Condition 2 is that Xs total *remuneration* is no more than 500,000.
- (2) The *rules* referred to in (1) are those relating to:
 - (a) guaranteed variable *remuneration* (■ SYSC 19A.3.40 R);
 - (b) retained *shares* or other instruments (■ SYSC 19A.3.47 R);
 - (c) deferral (■ SYSC 19A.3.49 R); and
 - (d) performance adjustment (■ SYSC 19A.3.51 R).

[Note: The *FSA* also gave *guidance* on the application of certain *rules* on *remuneration* structures in relation to individuals who are *Remuneration Code staff* for only part of a given performance year. This guidance has been adopted by the FCA and is available in the FCA website at <http://www.fca.org.uk/firms/markets/international-markets/remuneration-code>.]

Remuneration Principle 12(a): Remuneration structures - general requirement19A.3.35
FCA PRA

R

A *firm* must ensure that the structure of an *employee's remuneration* is consistent with and promotes effective risk management.

19A.3.35A
FCA PRA

R

A *firm* must ensure that the *remuneration* policy makes a clear distinction between criteria for setting:

- (1) basic fixed *remuneration* that primarily reflects an *employee's* professional experience and organisational responsibility as set out in the *employee's* job description and terms of employment; and
- (2) variable *remuneration* that reflects performance in excess of that required to fulfil the *employee's* job description and terms of employment and that is subject to performance adjustment in accordance with the *Remuneration Code*.

19A.3.35B **R**
FCA

[Note: article 92(2)(g) of CRD]

A *firm* must ensure that the *remuneration* policy makes a clear distinction between criteria for setting:

- (1) basic fixed *remuneration* that primarily reflects an *employee's* professional experience and organisational responsibility as set out in the *employee's* job description and terms of employment; and
- (2) variable *remuneration* that reflects performance in excess of that required to fulfil the *employee's* job description and terms of employment and that is subject to performance adjustment in accordance with the *Remuneration Code*.

[Note: article 92(2)(g) of CRD]

Remuneration Principle 12(b): Remuneration structures - assessment of performance

19A.3.36 **R**
FCA PRA

A *firm* must ensure that where *remuneration* is performance-related:

- (1) the total amount of *remuneration* is based on a combination of the assessment of the performance of:
 - (a) the individual;
 - (b) the business unit concerned; and
 - (c) the overall results of the *firm*; and
- (2) when assessing individual performance, financial as well as non-financial criteria are taken into account.

[Note: article 94(1)(a) of CRD and Standard 6 of the FSB Compensation Standards]

19A.3.37 **G**
FCA PRA

Non-financial performance metrics should form a significant part of the performance assessment process and should include adherence to effective risk management and compliance with the *regulatory system* and with relevant overseas regulatory requirements. Poor performance as assessed by non-financial metrics such as poor risk management or other behaviours contrary to *firm* values can pose significant risks for a *firm* and should, as appropriate, override metrics of financial performance. The performance assessment process and the importance of non-financial assessment factors in the process should be clearly explained to relevant *employees* and implemented. A balanced scorecard can be a good technique.

19A.3.38 **R**
FCA PRA

A *firm* must ensure that the assessment of performance is set in a multi-year framework in order to ensure that the assessment process is based on longer-term performance and that the actual payment of performance-based components of *remuneration* is spread over a period which takes account of the underlying business cycle of the *firm* and its business risks.

[Note: article 94(1)(b) of CRD]

19A.3.39

G

FCA PRA

The requirement for assessment of performance to be in a multi-year framework reflects the fact that profits from a *firm's* activities can be volatile and subject to cycles. The financial performance of *firms* and individual *employees* can be exaggerated as a result. Performance assessment on a moving average of results can be a good way of meeting this requirement. However, other techniques such as good quality risk adjustment and deferral of a sufficiently large proportion of *remuneration* may also be useful.

Remuneration Principle 12(c): Remuneration structures - guaranteed variable remuneration

19A.3.40

R

FCA PRA

A *firm* must ensure that guaranteed variable *remuneration* is not part of prospective *remuneration* plans. A *firm* must not award, pay or provide guaranteed variable *remuneration* unless :

- (1) it is exceptional;
- (2) it occurs in the context of hiring new *Remuneration Code* staff;
- (3) the *firm* has a sound and strong capital base; and
- (4) it is limited to the first year of service.

[Note: article 94(1)(d) and (e) of CRD and Standard 11 of the *FSB Compensation Standards*]

19A.3.40A

R

FCA PRA

A *firm* must ensure that *remuneration* packages relating to compensation for, or buy out from, an *employee's* contracts in previous employment align with the long term interests of the *firm* and are subject to appropriate retention, deferral and performance and clawback arrangements.

[Note: article 94(1)(i) of CRD]

19A.3.41

A

FCA PRA

- (1) A *firm* should not award, pay or provide guaranteed variable *remuneration* in the context of hiring new *Remuneration Code* staff (X) unless:
 - (a) it has taken reasonable steps to ensure that the *remuneration* is not more generous in either its amount or terms (including any deferral or retention periods) than the variable *remuneration* awarded or offered by Xs previous employer; and
 - (b) it is subject to appropriate performance adjustment requirements.

- (2) Contravention of (1) may be relied on as tending to establish contravention of the *rule* on guaranteed variable *remuneration* (
 - SYSC 19A.3.40 R).

19A.3.42

G

FCA PRA

Guaranteed variable *remuneration* should be subject to the same deferral criteria as other forms of variable *remuneration* awarded by the *firm*.

19A.3.43
FCA PRA

G

In the *appropriate regulator's* view, variable *remuneration* can be awarded to *Remuneration Code staff* in the form of retention awards where it is compatible with the *Remuneration Code general requirement* to do so. The *appropriate regulator* considers this is likely to be the case only where a *firm* is undergoing a major restructuring and a good case can be made for retention of particular key staff members on prudential grounds. Proposals to give retention awards should form part of any notice of the restructuring proposals required in accordance with *Principle 11* and the general notification requirements in ■ SUP 15.3.

Remuneration Principle 12(d): Remuneration structures - ratios between fixed and variable components of total remuneration

19A.3.44
FCA PRA

R

A *firm* must set appropriate ratios between the fixed and variable components of total *remuneration* and ensure that:

- (1) fixed and variable components of total *remuneration* are appropriately balanced;
- (2) the fixed component represents a sufficiently high proportion of the total *remuneration* to allow the operation of a fully flexible policy on variable *remuneration* components, including the possibility to pay no variable *remuneration* component ; and
- (3) subject to ■ SYSC 19A.3.44A R, the ratio of the variable component of total *remuneration* to the fixed component does not exceed 1:1.

19A.3.44A
FCA PRA

R

A *firm* may set a ratio between the fixed and the variable components of total *remuneration* that exceeds 1:1 provided the ratio:

- (1) the *firm* must give reasonable notice to all shareholders or owners or members of the *firm* that the *firm* intends to seek approval of a ratio that exceeds 1:1;
- (2) the *firm* must make a detailed recommendation to all shareholders or owners or members of the *firm* giving the reasons for, and the scope of, the approval sought, including

the number of staff affected, their functions and the expected impact on the requirement to maintain a sound capital base;

- (3) the *firm* must, without delay, inform the *appropriate regulator* of the recommendation to its shareholders or owners or members, including the proposed ratio and the reasons therefor and must demonstrate to the *appropriate regulator* that the proposed higher ratio does not conflict with the *firm's* obligations under the *CRD* and the *CRR*, having regard in particular to the *firm's own funds* obligations;
- (4) the *firm* must ensure that *employees* who have an interest in the proposed higher ratio are not allowed to exercise, directly or indirectly, any voting rights they may have as shareholders or owners or members of the *firm* in respect of the approval sought; and
- (5) the higher ratio is approved by a majority of:
 - (a) at least 66% of shareholders or owners or members of the *firm*, provided that at least 50% of the shareholders or owners or members are represented; or

Remuneration Principle 12(e): Remuneration structures - payments related to early termination

19A.3.45

FCA PRA

R

A *firm* must ensure that payments relating to the early termination of a contract reflect performance achieved over time and are designed in a way that does not reward failure or misconduct.

Firms should review existing contractual payments related to termination of employment with a view to ensuring that these are payable only where there is a clear basis for concluding that they are consistent with the *Remuneration Code general requirement*.

[Note: Standard 12 of the *FSB Compensation Standards*]

Remuneration Principle 12(f): Remuneration structures - retained shares or other instruments

19A.3.47 **R**
FCA PRA

- (1) A *firm* must ensure that a substantial portion, which is at least 50%, of any variable *remuneration* consists of an appropriate balance of:
 - (a) *shares* or equivalent ownership interests, subject to the legal structure of the *firm* concerned, or *share*-linked instruments or equivalent non-cash instruments in the case of a non-listed *firm*; and
 - (b) where possible other instruments which are eligible as Additional Tier 1 instruments or are eligible as Tier 2 instruments or other instruments that can be fully converted to Common Equity Tier 1 instruments or written down, that in each case adequately reflect the credit quality of the *firm* as a going concern and are appropriate for use as variable remuneration.
- (2) The instruments in (1) must be subject to an appropriate retention policy designed to align incentives with the longer-term interests of the *firm*.
- (3) This *rule* applies to both the portion of the variable *remuneration* component deferred in accordance with ■ SYSC 19A.3.49 R and the portion not deferred.

[Note: article 94(1)(l) of *CRD* and Standard 8 of the *FSB Compensation Standards*]

19A.3.48 **G**
FCA PRA

- (1) The Committee of European Banking Supervisors has given guidance on the interpretation of the Directive provision transposed by ■ SYSC 19A.3.47 R (3). Its Guidelines provide that this requirement means that the 50% minimum threshold for instruments must be applied equally to the non-deferred and the deferred components; in other words, *firms* must apply the same chosen ratio between instruments and cash for their total variable *remuneration* to both the upfront and deferred components. (Guidelines on Remuneration Policies and Practices, 10 December 2010, paragraph 133.)
- (2) This simplified example illustrates the operation of (1). The variable remuneration of a material risk taker (X) is 100, and by ■ SYSC 19A.3.49 R (3) X is required to defer 60%. Xs upfront component is 40 and Xs deferred component is 60. At least 20 of Xs upfront component, and at least 30 of Xs deferred component, must be in instruments referred to in ■ SYSC 19A.3.47 R (1).

Remuneration Principle 12(g): Remuneration structures - deferral

19A.3.49 **R**
FCA PRA

- (1) A *firm* must not award, pay or provide a variable *remuneration* component unless a substantial portion of it, which is at least

40%, is deferred over a period which is not less than three to five years.

- (2) *Remuneration* under (1) must vest no faster than on a pro-rata basis.
- (3) In the case of a variable *remuneration* component:
 - (a) of a particularly high amount, or
 - (b) payable to a *director* of a *firm* that is significant in terms of its size, internal organisation and the nature, scope and complexity of its activities;

at least 60% of the amount must be deferred.
- (4) Paragraph (3)(b) does not apply to a *non-executive director*.
- (5) The length of the deferral period must be established in accordance with the business cycle, the nature of the business, its risks and the activities of the *employee* in question.

[Note: article 94(1)(m) of *CRD* and Standards 6 and 7 of the *FSB Compensation Standards*]

- (6) 500,000 is a particularly high amount for the purpose of (3)(a).
- (7) Paragraph (6) is without prejudice to the possibility of lower sums being considered a particularly high amount.

19A.3.50

G

FCA PRA

- (1) Deferred *remuneration* paid in *shares* or *share*-linked instruments should be made under a scheme which meets appropriate criteria, including risk adjustment of the performance measure used to determine the initial allocation of shares. Deferred *remuneration* paid in cash should also be subject to performance criteria.
- (2) The *appropriate regulator* would generally expect a *firm* to have a *firm*-wide policy (and *group*-wide policy, where appropriate) on deferral. The proportion deferred should generally rise with the ratio of variable *remuneration* to fixed *remuneration* and with the amount of variable *remuneration*. While any variable *remuneration* component of 500,000 or more paid to *Remuneration Code staff* must be subject to 60% deferral, *firms* should also consider whether lesser amounts should be considered to be 'particularly high' taking account, for example, of whether there are significant differences within *Remuneration Code staff* in the levels of variable *remuneration* paid.

Remuneration Principle 12(h): Remuneration structures - performance adjustment, etc.

A *firm* must ensure that any variable *remuneration*, including a deferred portion, is paid or vests only if it is sustainable according to the financial situation of the *firm* as a whole, and justified on the basis of the performance of the *firm*, the business unit and the individual concerned.

FCA PRA

[Note: article 94(1)(n) of *CRD* and Standards 6 and 9 of the *FSB Compensation Standards*]A *firm* must:

- (1) ensure that any of the total variable *remuneration* is subject to malus or clawback arrangements;
- (2) set specific criteria for the application of malus and clawback; and
- (3) ensure that the criteria for the application of malus and clawback in particular cover situations where the *employee*:
 - (a) participated in or was responsible for conduct which resulted in significant losses to the *firm*;

FCA PRA

- (1) A *firm* should reduce unvested deferred variable *remuneration* when, as a minimum:
 - (a) there is reasonable evidence of *employee* misbehaviour or material error; or
 - (b) the *firm* or the relevant business unit suffers a material downturn in its financial performance; or
 - (c) the *firm* or the relevant business unit suffers a material failure of risk management.
- (2) For performance adjustment purposes, awards of deferred variable *remuneration* made in *shares* or other non-cash instruments should provide the ability for the *firm* to reduce the number of *shares* or other non-cash instruments.
- (3) Contravention of (1) or (2) may be relied on as tending to establish contravention of the *rule* on performance adjustment (■ SYSC 19A.3.51 R).

19A.3.53

FCA PRA

- (1) Variable *remuneration* may be justified, for example, to incentivise *employees* involved in new business ventures which could be loss-making in their early stages.
- (2) The *governing body* (or, where appropriate, the *remuneration* committee) should approve performance adjustment policies, including the triggers under which adjustment would take place. The *appropriate regulator* may ask *firms* to provide a copy of their policies and expects *firms* to make adequate records of material decisions to operate the adjustments.

Effect of breaches of the Remuneration Principles

19A.3.53A

19A.3.54

R

(1) Subject to (1A) to (3), the *rules* in ■ SYSC 19A Annex 1.1R to 1.4R apply in relation to the prohibitions on *Remuneration Code staff* being *remunerated* in the ways specified in:

- (a) ■ SYSC 19A.3.40 R (guaranteed variable *remuneration*);
- (b) ■ SYSC 19A.3.49 R (non-deferred variable *remuneration*); and
- (c) ■ SYSC 19A Annex 1.7R (replacing payments recovered or property transferred).

(1A) Paragraph (1) applies only to those prohibitions as they apply in relation to a *firm* that satisfies at least one of the conditions set out in (1B) and (1D).

(1B) Condition 1 is that the *firm* is a *UK bank*, a *building society*, a *designated investment firm*, or a relevant *IFPRU 730k firm* that has relevant total assets exceeding £50 billion.

(1C) [deleted]

(1D) Condition 2 is that the *firm*:

- (a) is a *full credit institution*, a *designated investment firm*, a relevant *IFPRU 730k firm* or a relevant *third country IFPRU 730k firm*; and
- (b) is part of a *group* containing a *firm* that has relevant total assets exceeding £50 billion and that is a *UK bank*, a *building society*, a *designated investment firm* or a relevant *IFPRU 730k firm*.

(1E) In this rule:

- (a) a "relevant *IFPRU 730k firm*" is any *IFPRU 730k firm* that is not a *limited activity firm* or a *limited licence firm*;
- (b) a "relevant *third country IFPRU 730k firm*" is any *third country IFPRU 730k firm* that is not a *limited activity firm* or a *limited licence firm*; and
- (c) "relevant total assets" means the arithmetic mean of the *firm's* total assets as set out in its balance sheet on its last three *accounting reference dates*.

(2) This *rule* does not apply in relation to the prohibition on *Remuneration Code staff* being *remunerated* in the way specified

in ■ SYSC 19A.3.40 R (guaranteed variable *remuneration*) if both the conditions in paragraphs (2) and (3) of that *rule* are met.

- (3) This *rule* does not apply in relation to *Remuneration Code staff* (X) in respect of whom both the following conditions are satisfied:
- (a) Condition 1 is that Xs variable *remuneration* is no more than 33% of total *remuneration*; and
 - (b) Condition 2 is that Xs total *remuneration* is no more than 500,000.
- (4) In relation to (3):
- (a) references to *remuneration* are to *remuneration* awarded or paid in respect of the relevant performance year;
 - (b) the amount of any *remuneration* is:
 - (i) if it is money, its amount when awarded;
 - (ii) otherwise, whichever of the following is greatest: its value to the recipient when awarded; its market value when awarded; and the cost of providing it;
 - (c) where *remuneration* is, when awarded, subject to any condition, restriction or other similar provision which causes the amount of the *remuneration* to be less than it otherwise would be, that condition, restriction or provision is to be ignored in arriving at its value; and
 - (d) it is to be assumed that the member of *Remuneration Code staff* will remain so for the duration of the relevant performance year.

19A.3.55 G
FCA PRA

- (1) Sections 137H and 137I of the *Act* enables the *appropriate regulator* to make *rules* that render void any provision of an agreement that contravenes specified prohibitions in the *Remuneration Code*, and that provide for the recovery of any payment made, or other property transferred, in pursuance of such a provision. ■ SYSC 19A.3.53A R and ■ SYSC 19A.3.54 R (together with ■ SYSC 19A Annex 1) are such *rules* and render void provisions of an agreement that contravene the specified prohibitions on guaranteed variable *remuneration*, non-deferred variable *remuneration* and replacing payments recovered or property transferred. This is an exception to the general position set out in section 138E(2) of the *Act* that a contravention of a *rule* does not make any transaction void or unenforceable.

AIFM Remuneration Code

19B.1 Application

19B.1.1 **R** The *AIFM Remuneration Code* applies to a *full-scope UK AIFM* of:
FCA

- (1) a *UK AIF*;
- (2) an *EEA AIF*; and
- (3) a *non-EEA AIF*.

19B.1.1A **G**
FCA (1) *Full-scope UK AIFMs* are advised that *ESMA* published Guidelines on sound remuneration policies under the *AIFMD* on 3 July 2013, which *full-scope UK AIFMs* should comply with in applying the *rules* in this section. The Guidelines can be found at: http://www.esma.europa.eu/system/files/2013-232_aifmd_guidelines_on_remuneration_-_en.pdf

- (2) The *FCA* has provided additional *guidance* on the application of principles of proportionality to remuneration policies of *AIFM*. The *guidance* also addresses several other aspects of the *AIFM Remuneration Code* and the Guidelines. The *guidance* can be found at: [...]

Remuneration policies and practices

19B.1.2 **R** An *AIFM* must establish, implement and maintain *remuneration* policies and practices for *AIFM Remuneration Code staff* that are consistent with, and promote, sound and effective risk management and do not encourage risk-taking which is inconsistent with the risk profile of the *instrument constituting the fund* of the *AIFs* it manages.
FCA

19B.1.3 **R** *AIFM Remuneration Code staff* comprise those categories of staff whose professional activities have a material impact on the risk profiles of the *AIFMs* or of the *AIFs* the *AIFM* manages. This includes senior management, risk takers, control functions, and any *employees* receiving total *remuneration* that takes them into the same *remuneration* bracket as senior management and risk takers.

Part 2 of ■ SYSC 1 Annex 1 provides for the application of ■ SYSC 4.1.1 R and ■ SYSC 4.1.1C R (General Requirements). In particular, and subject to the provisions on group risk systems and controls requirements in ■ SYSC 12, this means that:

- (1) the *BIPRU Remuneration Code*:
 - (a) applies to *regulated activities*, *ancillary activities* and applicable *ancillary services*;
 - (b) applies to the carrying on of *unregulated activities* in a *prudential context*; and
 - (c) takes into account activities of other *group* members; and
- (2) where the *BIPRU Remuneration Code* applies, it applies to:
 - (a) a *firm's UK* activities;
 - (b) a *firm's passported activities* carried on from a *branch* in another *EEA State*; and
 - (c) a *UK domestic firm's* activities wherever they are carried on, in a *prudential context*.

R

- (1) This *rule* applies to a *firm* that is unable to comply with the *BIPRU Remuneration Code* because of an obligation it owes to a *BIPRU Remuneration Code staff member* under a provision of an agreement made on or before 29 July 2010.
- (2) A *firm* must take reasonable steps to amend or terminate the provision in (1) in a way that enables it to comply with the *BIPRU Remuneration Code* at the earliest opportunity.
- (3) Until the provision in (1) ceases to prevent the *firm* from complying with the *BIPRU Remuneration Code*, the *firm* must adopt specific and effective arrangements, processes and mechanisms to manage the risks raised by the provision.

Purpose

19C.1.6

FCA

G

The aim of the *BIPRU Remuneration Code* is to ensure that *firms* have risk-focused *remuneration* policies, which are consistent with and promote effective risk management and do not expose them to excessive risk. It expands upon the general organisational requirements in ■ SYSC 4.

Notifications to the FCA

19C.1.7

FCA

G

- (1) The *BIPRU Remuneration Code* does not contain specific notification requirements. However, general circumstances in which the FCA expects to be notified by *firms* of matters relating to their compliance with requirements under the *regulatory system* are set out in ■ SUP 15.3 (General notification requirements).
- (2) In particular, in relation to *remuneration* matters, such circumstances should take into account *unregulated activities* as well as *regulated activities* and the activities of other members of a *group* and would include each of the following:
 - (a) significant breaches of the *BIPRU Remuneration Code*;
 - (b) any proposed *remuneration* policies, procedures or practices which could:
 - (i) have a significant adverse impact on the *firm's* reputation; or
 - (ii) affect the *firm's* ability to continue to provide adequate services to its *customers* and which could result in serious detriment to a *customer* of the *firm*; or
 - (iii) result in serious financial consequences to the *financial system* or to other *firms*;

- (c) any proposed changes to *remuneration* policies, practices or procedures which could have a significant impact on the *firm's* risk profile or resources; and
 - (d) fraud, errors and other irregularities described in ■ SUP 15.3.17 R which may suggest weaknesses in, or be motivated by, the *firm's* *remuneration* policies, procedures or practices.
- (3) Such notifications should be made immediately the *firm* becomes aware of those circumstances, or has information which reasonably suggests that those circumstances have, or may have, occurred or may occur in the foreseeable future.

Individual guidance

19C.1.8

FCA

G

The FCA's policy on individual *guidance* is set out in ■ SUP 9. *Firms* should particularly note the policy on what the FCA considers to be a reasonable request for *guidance* (see ■ SUP 9.2.5 G). For example, where a *firm* is seeking *guidance* on a proposed *remuneration* structure, the FCA will expect the *firm* to provide a detailed analysis of how the structure complies with the *BIPRU Remuneration Code*, including the general requirement for *remuneration* policies, procedures and practices to be consistent with and promote sound and effective risk management.

19C.2 General requirement

Remuneration policies must promote effective risk management

19C.2.1

FCA

R

A *firm* must establish, implement and maintain *remuneration* policies, procedures and practices that are consistent with and promote sound and effective risk management.

19C.2.2

FCA

G

- (1) If a *firm's remuneration* policy is not aligned with effective risk management, it is likely that *employees* will have incentives to act in ways that might undermine effective risk management.
- (2) The *BIPRU Remuneration Code* covers all aspects of *remuneration* that could have a bearing on effective risk management including salaries, bonuses, long-term incentive plans, options, hiring bonuses, severance packages and pension arrangements. In applying the *BIPRU Remuneration Code*, a *firm* should have regard to applicable good practice on *remuneration* and corporate governance, such as guidelines on executive contracts and severance produced by the Association of British Insurers (ABI) and the National Association of Pension Funds (NAPF). In considering the risks arising from its *remuneration* policies, a *firm* will also need to take into account its statutory duties in relation to equal pay and non-discrimination.
- (3) As with other aspects of a *firm's* systems and controls, in line with ■ SYSC 4.1.2 R and SYSC 4.1.2ABR, *remuneration* policies, procedures and practices must be comprehensive and proportionate to the nature, scale and complexity of the *common platform firm's* activities. Therefore, what a *firm* must do to comply with the *BIPRU Remuneration Code* will vary. For example, while the *BIPRU Remuneration Code* refers to a *firm's remuneration* committee and risk management function, it may be appropriate for the *governing body* of a smaller *firm* to act as the *remuneration* committee, and for the *firm* not to have a separate risk management function.
- (4) The principles in the *BIPRU Remuneration Code* are used by the FCA to assess the quality of a *firm's remuneration* policies and whether they encourage excessive risk-taking by a *firm's employees*.
- (5) The FCA may also ask *remuneration* committees to provide the FCA with evidence of how well the *firm's remuneration* policies meet the *BIPRU Remuneration Code's* principles, together with plans for improvement where there is a shortfall. The FCA also expects relevant *firms* to use the principles in assessing their exposure to risks arising from their *remuneration* policies as part of the *internal capital adequacy assessment process (ICAAP)*.

19C.2.3

FCA

G

(6) The *BIPRU Remuneration Code* is principally concerned with the risks created by the way *remuneration* arrangements are structured, not with the absolute amount of *remuneration*, which is generally a matter for *firms'* *remuneration* committees.

(1) The specific *remuneration* requirements in this chapter may apply only to certain categories of *employee*. However, the *FCA* expects *firms*, in complying with the *BIPRU Remuneration Code general requirement*, to apply certain principles on a *firm-wide* basis.

(2) In particular, the *FCA* considers that *firms* should apply the principle relating to guaranteed variable *remuneration* on a *firm-wide* basis (Remuneration Principle 12(c); ■ SYSC 19C.3.40 R to ■ SYSC 19C.3.43 G.

(3) The *FCA* also expects *firms* to apply, as a minimum, the principles relating to risk management and risk tolerance (Remuneration Principle 1); supporting business strategy, objectives, values and long-term interests of the firm (Remuneration Principle 2); conflicts of interest (Remuneration Principle 3); governance (Remuneration Principle 4); risk adjustment (Remuneration Principle 8); pension policy (Remuneration Principle 9); personal investment strategies (Remuneration Principle 10); payments related to early termination (Remuneration Principle 12(e)) and deferral (Remuneration Principle 12(g)) on a *firm-wide* basis.

Record-keeping

19C.2.4

FCA

G

In line with the record-keeping requirements in ■ SYSC 9, a *firm* should ensure that its *remuneration* policies, practices and procedures are clear and documented. Such policies, practices and procedures would include performance appraisal processes and decisions.

Interpretation of references to remuneration

19C.2.5

FCA

R

(1) In this chapter, references to *remuneration* include *remuneration* paid, provided or awarded by any *person* to the extent that it is paid, provided or awarded in connection with *employment* by a *firm*.

(2) Paragraph (1) is without prejudice to the meaning of *remuneration* elsewhere in the *Handbook*.

19C.2.6

FCA

G

Remuneration includes, for example, payments made by a seconding organisation which is not subject to the *BIPRU Remuneration Code* to a secondee in respect of their *employment* by a *firm* which is subject to the *BIPRU Remuneration Code*.

19C.3 Remuneration principles

Application: groups

19C.3.1

FCA

R

- (1) A *firm* must apply the requirements of this section at *group, parent undertaking* and *subsidiary undertaking* levels, including those *subsidiaries* established in a country or territory which is not an *EEA State*.
- (2) Paragraph (1) does not limit ■ SYSC 12.1.13 R and ■ SYSC 12.1.15 R (which relate to the application of the *BIPRU Remuneration Code* within *UK consolidation groups* and *non-EEA sub-groups*).

19C.3.2

FCA

G

The effect of ■ SYSC 12.1.13 R (2)(dA) and ■ SYSC 12.1.15 R is that the *firm* is required to ensure that the risk management processes and internal control mechanisms at the level of any *consolidation group* or *non-EEA sub-group* of which a *firm* is a member comply with the obligations set out in this section on a consolidated (or sub-consolidated) basis.

Application: categories of staff and proportionality

19C.3.3

FCA

R

- (1) This section applies to *BIPRU Remuneration Code staff*, except as set out in (3).
- (2) When establishing and applying the total *remuneration* policies for *BIPRU Remuneration Code staff*, a *firm* must comply with this section in a way and to the extent that is appropriate to its size, internal organisation and the nature, scope and complexity of its activities (the *BIPRU remuneration principles proportionality rule*).
- (3) Paragraphs (1) and (2) do not apply to the requirement for significant *firms* to have a *remuneration* committee (■ SYSC 19C.3.12 R).

[Note: In addition to the *guidance* in this section which relates to the *BIPRU remuneration principles proportionality rule*, the *FCA* has published *guidance* on the operation of the *BIPRU remuneration principles proportionality rule*. This *guidance* is available at <http://www.fca.org.uk/firms/markets/international-markets/remuneration-code>.]

19C.3.4

FCA

R

BIPRU Remuneration Code staff comprises categories of staff including senior management, risk-takers, staff engaged in control functions and any

employee receiving total remuneration that takes them into the same *remuneration* bracket as senior management and risk-takers, whose professional activities have a material impact on the *firm's* risk profile.

19C.3.5

FCA

R

A *firm* must:

- (1) maintain a record of its *BIPRU Remuneration Code staff* in line with the general record-keeping requirements (■ SYSC 9); and
- (2) take reasonable steps to ensure that its *BIPRU Remuneration Code staff* understand the implications of their status, including the potential for *remuneration* which does not comply with certain requirements of the *BIPRU Remuneration Code* to be rendered void and recoverable by the *firm*.

19C.3.6

FCA

G

- (1) In the *FCA's* view:
 - (a) a *firm's* staff includes its *employees*;
 - (b) a *person* who performs a *significant influence function* for, or is a *senior manager* of, a *firm* would normally be expected to be part of the *firm's BIPRU Remuneration Code staff*;
 - (c) the table in (2) provides a non-exhaustive list of examples of key positions that should, subject to (d), be within a *firm's* definition of staff who are risk takers;
 - (d) *firms* should consider how the examples in the table in (2) apply to their own organisational structure (as the description of suggested business lines in the first row may be most appropriate to a *firm* which *deals on its own account* to a significant extent);
 - (e) *firms* may find it useful to set their own metrics to identify their risk takers based, for example, on trading limits; and
 - (f) a *firm* should treat a *person* as being *BIPRU Remuneration Code staff* in relation to *remuneration* in respect of a given performance year if they were *BIPRU Remuneration Code staff* for any part of that year.

[**Note:** The *FCA* has published *guidance* on the application of particular rules on *remuneration* structures in relation to individuals who are *BIPRU Remuneration Code staff* for only part of a given performance year. This *guidance* is available at <http://www.fca.org.uk/firms/markets/international-markets/remuneration-code>.]

Remuneration Principle 1: Risk management and risk tolerance

19C.3.7

FCA

R

A *firm* must ensure that its *remuneration* policy is consistent with and promotes sound and effective risk management, and does not encourage risk-taking that exceeds the level of tolerated risk of the *firm*.

Remuneration Principle 2: Supporting business strategy, objectives, values and long-term interests of the firm

19C.3.8

FCA

R

A *firm* must ensure that its *remuneration* policy is in line with the business strategy, objectives, values and long-term interests of the *firm*.

19C.3.9

FCA

R

Remuneration Principle 3: Avoiding conflicts of interest

A *firm* must ensure that its *remuneration* policy includes measures to avoid conflicts of interest.

Remuneration Principle 4: Governance

19C.3.10

FCA

R

A *firm* must ensure that its *governing body*, in its *supervisory function*, adopts and periodically reviews the general principles of the *remuneration* policy and is responsible for its implementation.

19C.3.11

FCA

R

A *firm* must ensure that the implementation of the *remuneration* policy is, at least annually, subject to central and independent internal review for compliance with policies and procedures for *remuneration* adopted by the *governing body* in its *supervisory function*.

19C.3.12

FCA

R

- (1) A *firm* that is significant in terms of its size, internal organisation and the nature, scope and complexity of its activities must establish a *remuneration* committee.
- (2) The *remuneration* committee must be constituted in a way that enables it to exercise competent and independent judgment on *remuneration* policies and practices and the incentives created for managing risk, capital and liquidity.
- (3) The chairman and the members of the *remuneration* committee must be members of the *governing body* who do not perform any executive function in the *firm*.
- (4) The *remuneration* committee must be responsible for the preparation of decisions regarding *remuneration*, including those which have implications for the risk and risk management of the *firm* and which are to be taken by the *governing body* in its *supervisory function*.
- (5) When preparing such decisions, the *remuneration* committee must take into account the long-term interests of shareholders, investors and other stakeholders in the *firm*.

[Note: The *guidance* referred to in the note to ■ SYSC 19C.3.3 R also gives *guidance* on proportionality in relation to *remuneration* committees]

19C.3.13

FCA

G

- (1) A *firm* should be able to demonstrate that its decisions are consistent with an assessment of its financial condition and future prospects. In particular, practices by which *remuneration* is paid for potential future revenues whose timing and likelihood remain uncertain should be evaluated carefully and the *governing body* or *remuneration* committee (or both) should work closely with the *firm's* risk function in evaluating the incentives created by its *remuneration* system.
- (2) The *governing body* and any *remuneration* committee are responsible for ensuring that the *firm's* *remuneration* policy complies with the BIPRU *Remuneration Code* and, where relevant, should take into account relevant

guidance, such as that issued by the International Organization of Securities Commissions (IOSCO).

- (3) The periodic review of the implementation of the *remuneration* policy should assess compliance with the *BIPRU Remuneration Code*.
- (4) Guidance on what the *supervisory function* might involve is set out in ■ SYSC 4.3.3 G.

Remuneration Principle 5: Control functions

19C.3.14

FCA

R

A firm must ensure that employees engaged in control functions:

- (1) are independent from the business units they oversee;
- (2) have appropriate authority; and
- (3) are *remunerated*:
 - (a) adequately to attract qualified and experienced staff; and
 - (b) in line with the achievement of the objectives linked to their functions, independent of the performance of the business areas they control.

19C.3.15

FCA

A

- (1) A firm's risk management and compliance functions should have appropriate input into setting the *remuneration* policy for other business areas. The procedures for setting *remuneration* should allow risk and compliance functions to have significant input into the setting of individual *remuneration* awards where those functions have concerns about the behaviour of the individuals concerned or the riskiness of the business undertaken.
- (2) Contravention of (1) may be relied on as tending to establish contravention of the *rule* on employees engaged in control functions having appropriate authority (■ SYSC 19C.3.14 R (2)).

19C.3.16

FCA

R

A firm must ensure that the remuneration of the senior officers in risk management and compliance functions is directly overseen by the remuneration committee referred to in ■ SYSC 19C.3.12 R, or, if such a committee has not been established, by the governing body in its supervisory function.

19C.3.17

FCA

G

- (1) This Remuneration Principle is designed to manage the conflicts of interest which might arise if other business areas had undue influence over the *remuneration* of employees within control functions. Conflicts of interest can easily arise when employees are involved in the determination of *remuneration* for their own business area. Where these do arise they need to be managed by having in place independent roles for control functions (including, notably, risk management and compliance) and human resources. It is good practice to seek input from a firm's human resources function when setting *remuneration* for other business areas.

- (2) The need to avoid undue influence is particularly important where *employees* from the control functions are embedded in other business areas. This Remuneration Principle does not prevent the views of other business areas being sought as an appropriate part of the assessment process.
- (3) The FCA generally expects the ratio of the potential variable component of *remuneration* to the fixed component of *remuneration* to be significantly lower for *employees* in risk management and compliance functions than for *employees* in other business areas whose potential bonus is a significant proportion of their *remuneration*. Firms should nevertheless ensure that the total *remuneration* package offered to those *employees* is sufficient to attract and retain staff with the skills, knowledge and expertise to discharge those functions. The requirement that the method of determining the *remuneration* of *relevant persons* involved in the compliance function must not compromise their objectivity or be likely to do so also applies (see ■ SYSC 6.1.4 R (4)).

Remuneration Principle 6: Remuneration and capital

19C.3.18 **R** A *firm* must ensure that total variable *remuneration* does not limit the
FCA *firm's* ability to strengthen its capital base.

19C.3.19 **G** This Remuneration Principle underlines the link between a *firm's* variable *remuneration*
FCA costs and the need to manage its capital base, including forward-looking capital planning measures. Where a *firm* needs to strengthen its capital base, its variable *remuneration* arrangements should be sufficiently flexible to allow it to direct the necessary resources towards capital building.

Remuneration Principle 7: Exceptional government intervention

19C.3.20 **R** A *firm* that benefits from exceptional government intervention must
FCA ensure that:

- (1) variable *remuneration* is strictly limited as a percentage of net revenues when it is inconsistent with the maintenance of a sound capital base and timely exit from government support;
- (2) it restructures *remuneration* in alignment with sound risk management and long-term growth, including when appropriate establishing limits to the *remuneration* of *senior personnel*; and
- (3) no variable *remuneration* is paid to its *senior personnel* unless justified.

19C.3.21 **G** The FCA would normally expect it to be appropriate for the ban on paying variable
FCA *remuneration* to *senior personnel* of a *firm* that benefits from exceptional government intervention to apply only in relation to *senior personnel* who were in office at the time that the intervention was required.

Remuneration Principle 8: Profit-based measurement and risk adjustment

19C.3.22 **R** (1) A *firm* must ensure that any measurement of performance used
FCA to calculate variable *remuneration* components or pools of variable *remuneration* components:

- (a) includes adjustments for all types of current and future risks, taking into account the cost and quantity of the capital and the liquidity required; and
- (b) takes into account the need for consistency with the timing and likelihood of the firm receiving potential future revenues incorporated into current earnings.

(2) A *firm* must ensure that the allocation of variable *remuneration* components within the *firm* also takes into account all types of current and future risks.

19C.3.23

G

FCA

- (1) This Remuneration Principle stresses the importance of risk adjustment in measuring performance, and the importance of applying judgment and common sense. A *firm* should ask the risk management function to validate and assess risk-adjustment techniques and to attend a meeting of the *governing body* or *remuneration* committee for this purpose.
- (2) A number of risk-adjustment techniques and measures are available, and a *firm* should choose those that are most appropriate to its circumstances. Common measures include those that are based on economic profit or economic capital. Whichever technique is chosen, the full range of future risks should be covered. The *FCA* expects a *firm* to be able to provide it with details of all adjustments that the *firm* has made under a formulaic approach.
- (3) The *FCA* expects a *firm* to apply qualitative judgments and common sense in the final decision about the performance-related components of variable *remuneration* pools.
- (4) A *firm's governing body* (or *remuneration* committee, where appropriate) should take the lead in determining the measures to be used. It should offer the appropriate checks and balances to prevent inappropriate manipulation of the measures used. It should consult closely and frequently with the *firm's* risk management functions, in particular those relating to operational, market, credit and liquidity risk.

19C.3.24

G

FCA

- (1) Long-term incentive plans should be treated as pools of variable *remuneration*. Many common measures of performance for long-term incentive plans, such as earnings per *share* (EPS), are not adjusted for longer-term risk factors. Total shareholder return (TSR) includes dividend distributions in its measurement, which can also be based on unadjusted earnings data. If incentive plans mature within a two- to four-year period and are based on EPS or TSR, strategies can be devised to boost EPS or TSR during the life of the plan, to the detriment of the longer-term health of a *firm*. For example, increasing leverage is a technique which can be used to boost EPS and TSR. *Firms* should take account of these factors when developing risk-adjustment methods.
- (2) *Firms* that have long-term incentive plans should structure them with vesting, subject to appropriate performance conditions, and at least half of the award vesting after not less than five years and the remainder after not less than three years.
- (3) Long-term incentive plan awards may be included in the calculation of the deferred portion of variable *remuneration* only if upside incentives are adequately

balanced by downside adjustments. The valuation of the award should be based on its value when the award is granted, and determined using an appropriate technique.

19C.3.25

FCA

R

Assessments of financial performance used to calculate variable remuneration components or pools of variable remuneration components must be based principally on profits.

19C.3.26

FCA

G

- (1) Performance measures based primarily on revenues or turnover are unlikely to pay sufficient regard to the quality of business undertaken or services provided. Profits are a better measure provided they are adjusted for risk, including future risks not adequately captured by accounting profits.
- (2) Management accounts should provide profit data at such levels within the *firm's* structure as to enable a *firm* to see as accurate a picture of contributions of relevant staff to a *firm's* performance, as reasonably practicable. If revenue or turnover is used as a component in performance assessment, processes should be in place to ensure that the quality of business undertaken or services provided and their appropriateness for *clients* are taken into account.

19C.3.27

FCA

R

A *firm* must ensure that its total variable remuneration is generally considerably contracted where subdued or negative financial performance of the *firm* occurs, taking into account both current remuneration and reductions in payouts of amounts previously earned.

[Note: Standard 5 of the *FSB Compensation Standards*]

19C.3.28

FCA

G

Where a *firm* makes a loss, the *FCA* generally expects no variable remuneration to be awarded. Variable remuneration may nevertheless be justified, for example to incentivise *employees* involved in new business ventures which could be loss-making in their early stages.

Remuneration Principle 9: Pension policy

19C.3.29

FCA

R

A *firm* must ensure that:

- (1) its pension policy is in line with its business strategy, objectives, values and long-term interests;
- (2) when an *employee* leaves the *firm* before retirement, any *discretionary pension benefits* are held by the *firm* for a period of five years in the form of instruments referred to in
 - SYSC 19C.3.47 R (1); and
- (3) when *employees* reach retirement, *discretionary pension benefits* are paid to the *employee* in the form of instruments in
 - SYSC 19C.3.47 R (1) and subject to a five-year retention period.

Remuneration Principle 10: Personal investment strategies

19C.3.30

R

FCA

(1) A *firm* must ensure that its *employees* undertake not to use personal hedging strategies or *remuneration-* or liability-related *contracts of insurance* to undermine the risk-alignment effects embedded in their *remuneration* arrangements.

(2) A *firm* must maintain effective arrangements designed to ensure that *employees* comply with their undertaking.

19C.3.31

G

FCA

Circumstances in which a *person* will be using a personal hedging strategy include entering into an arrangement with a third party under which the third party will make payments, directly or indirectly, to that *person* linked to, or commensurate with, the amounts by which the *person's remuneration* is subject to reductions.

Remuneration Principle 11: Avoidance of the Remuneration Code

19C.3.32

R

FCA

A *firm* must ensure that *variable remuneration* is not paid through vehicles or methods that facilitate the avoidance of the *BIPRU Remuneration Code*.

Remuneration Principle 12: Remuneration structures - introduction

19C.3.33

G

FCA

This Remuneration Principle consists of a series of *rules, evidential provisions* and *guidance* relating to *remuneration* structures.

19C.3.34

G

FCA

(1) Taking account of the *BIPRU remuneration principles proportionality rule*, the *FCA* does not generally consider it necessary for a *firm* to apply the *rules* in (2) where, in relation to an individual ("X"), both the following conditions are satisfied:

- (a) condition 1 requires that X's *variable remuneration* is no more than 33% of total *remuneration*; and
- (b) condition 2 requires that X's total *remuneration* is no more than 500,000.

(2) The *rules* referred to in (1) relate to:

- (a) guaranteed *variable remuneration* (■ SYSC 19C.3.40 R);
- (b) retained *shares* or other instruments (■ SYSC 19C.3.47 R);
- (c) deferral (■ SYSC 19C.3.49 R); and
- (d) performance adjustment (■ SYSC 19C.3.51 R).

[Note: The *FCA* has published *guidance* on the application of certain *rules* on *remuneration* structures in relation to individuals who are *BIPRU Remuneration Code* staff for only part of a given performance year. This *guidance* is available at <http://www.fca.org.uk/firms/markets/international-markets/remuneration-code>.]

Remuneration Principle 12(a): Remuneration structures - general requirement

19C.3.35

R

FCA

A *firm* must ensure that the structure of an *employee's remuneration* is consistent with, and promotes, effective risk management.

Remuneration Principle 12(b): Remuneration structures - assessment of performance

19C.3.36

FCA

R

A *firm* must ensure that where *remuneration* is performance-related:

- (1) the total amount of *remuneration* is based on a combination of the assessment of the performance of:
 - (a) the individual;
 - (b) the business unit concerned; and
 - (c) the overall results of the *firm*; and
- (2) when assessing individual performance, financial as well as non-financial criteria are taken into account.

19C.3.37

FCA

G

Non-financial performance metrics should form a significant part of the performance assessment process and should include adherence to effective risk management and compliance with the *regulatory system* and with relevant overseas regulatory requirements. Poor performance as assessed by non-financial metrics, such as poor risk management or other behaviours contrary to *firm* values, can pose significant risks for a *firm* and should, as appropriate, override metrics of financial performance. The performance assessment process and the importance of non-financial assessment factors in the process should be clearly explained to relevant *employees* and implemented. A balanced scorecard can be a good technique.

19C.3.38

FCA

R

A *firm* must ensure that the assessment of performance is set in a multi-year framework, to ensure that the assessment process is based on longer-term performance and that the actual payment of performance-based components of *remuneration* is spread over a period which takes account of the underlying business cycle of the *firm* and its business risks.

19C.3.39

FCA

G

The requirement for assessment of performance to be in a multi-year framework reflects the fact that profits from a *firm's* activities can be volatile and subject to cycles. The financial performance of *firms* and individual *employees* can be exaggerated as a result. Performance assessment on a moving average of results can be a good way of meeting this requirement. However, other techniques, such as good quality risk adjustment and deferral of a sufficiently large proportion of *remuneration*, may also be useful.

Remuneration Principle 12(c): Remuneration structures - guaranteed variable remuneration

19C.3.40

FCA

R

A *firm* must not award, pay or provide guaranteed variable *remuneration* unless it:

- (1) is exceptional;
- (2) occurs in the context of hiring new *BIPRU Remuneration Code staff*; and
- (3) is limited to the first year of service.

- 19C.3.41** **FCA** **A** (1) A *firm* should not award, pay or provide guaranteed variable remuneration in hiring new *BIPRU Remuneration Code staff* (X) unless:
- (a) it has taken reasonable steps to ensure that the *remuneration* is not more generous in its amount or terms (including any deferral or retention periods) than the variable *remuneration* awarded or offered by X's previous employer; and
 - (b) it is subject to appropriate performance adjustment requirements.
- (2) Contravention of (1) may be relied on as tending to establish contravention of the *rule* on guaranteed variable *remuneration* (**■** SYSC 19C.3.40 R).

19C.3.42 **FCA** **G** Guaranteed variable *remuneration* should be subject to the same deferral criteria as other forms of variable *remuneration* awarded by the *firm*.

19C.3.43 **FCA** **G** Variable *remuneration* can be awarded to *BIPRU Remuneration Code staff* in the form of retention awards where it is compatible with the *BIPRU Remuneration Code general requirement* to do so. The *FCA* considers this is likely to be the case only where a *firm* is undergoing a major restructuring and a good case can be made for retention of particular key staff members on prudential grounds. Proposals to give retention awards should form part of any notice of the restructuring proposals required in accordance with *Principle 11* and the general notification requirements in **■** SUP 15.3.

Remuneration Principle 12(d): Remuneration structures - ratios between fixed and variable components of total remuneration

19C.3.44 **FCA** **R** A *firm* must set appropriate ratios between the fixed and variable components of total *remuneration* and ensure that:

- (1) fixed and variable components of total *remuneration* are appropriately balanced; and
- (2) the fixed component represents a sufficiently high proportion of the total *remuneration* to allow the operation of a fully flexible policy on variable *remuneration* components, including the possibility to pay no variable *remuneration* component.

Remuneration Principle 12(e): Remuneration structures - payments related to early termination

19C.3.45 **FCA** **R** A *firm* must ensure that payments related to the early termination of a contract reflect performance achieved over time and are designed in a way that does not reward failure.

19C.3.46 **FCA** **G** *Firms* should review existing contractual payments related to termination of employment with a view to ensuring that these are payable only where there is a clear basis for concluding that they are consistent with the *BIPRU Remuneration Code general requirement*.

[Note: Standard 12 of the *FSB Compensation Standards*]

Remuneration Principle 12(f): Remuneration structures - retained shares or other instruments

19C.3.47

FCA

R

- (1) A *firm* must ensure that a substantial portion, at least 50%, of any variable *remuneration* consists of an appropriate balance of:
 - (a) *shares* or equivalent ownership interests, subject to the legal structure of the *firm* concerned, or *share-linked* instruments or equivalent non-cash instruments for a non-listed *firm*; and
 - (b) where appropriate, *capital instruments* which are eligible for inclusion at stage B1 of the calculation in the *capital resources table*, where applicable, adequately reflect the credit quality of the *firm* as a going concern.
- (2) The instruments in (1) must be subject to an appropriate retention policy designed to align incentives with the longer-term interests of the *firm*.
- (3) This *rule* applies to the portion of the variable *remuneration* component deferred, and not deferred, in line with
 - SYSC 19C.3.49 R.

[Note: Standard 8 of the *FSB Compensation Standards*]

19C.3.48

FCA

G

- (1) Regarding ■ SYSC 19C.3.47 R (3), the 50% minimum threshold for instruments must be applied equally to the non-deferred and the deferred components; in other words, *firms* must apply the same chosen ratio between instruments and cash for their total variable *remuneration* to both the upfront and deferred components.
- (2) This simplified example illustrates the operation of (1). The variable remuneration of a material risk taker (X) is 100, and by ■ SYSC 19C.3.49 R (3) X is required to defer 60%. X's upfront component is 40 and X's deferred component is 60. At least 20 of X's upfront component, and at least 30 of X's deferred component, must be in instruments referred to in
 - SYSC 19C.3.47 R (1).

Remuneration Principle 12(g): Remuneration structures - deferral

19C.3.49

FCA

R

- (1) A *firm* must not award, pay or provide a variable *remuneration* component unless a substantial portion of it, which is at least 40%, is deferred over a period of not less than three to five years.
- (2) *Remuneration* under (1) must vest no faster than on a pro-rata basis.
- (3) In the case of a variable *remuneration* component:

- (a) of a particularly high amount; or
- (b) payable to a *director* of a *firm* that is significant in its size, internal organisation and the nature, scope and complexity of its activities; at least 60% of the amount must be deferred.

- (4) Paragraph (3)(b) does not apply to a *non-executive director*.
- (5) The length of the deferral period must be established in line with the business cycle, the nature of the business, its risks and the activities of the *employee* in question.

[Note: Standards 6 and 7 of the *FSB Compensation Standards*]

- (6) 500,000 is a particularly high amount for the purpose of (3)(a).
- (7) Paragraph (6) is without prejudice to the possibility of lower sums being considered a particularly high amount.

19C.3.50

G

FCA

- (1) Deferred *remuneration* paid in *shares* or *share*-linked instruments should be made under a scheme which meets appropriate criteria, including risk adjustment of the performance measure used to determine the initial allocation of shares. Deferred *remuneration* paid in cash should also be subject to performance criteria.
- (2) The *FCA* generally expects a *firm* to have a *firm*-wide policy (and group-wide policy, where appropriate) on deferral. The proportion deferred should generally rise with the ratio of variable *remuneration* to fixed *remuneration* and with the amount of variable *remuneration*. While any variable *remuneration* component of 500,000 or more paid to *BIPRU Remuneration Code staff* must be subject to 60% deferral, *firms* should also consider whether lesser amounts should be considered to be 'particularly high' taking account, for example, of whether there are significant differences within *BIPRU Remuneration Code staff* in the levels of variable *remuneration* paid.

Remuneration Principle 12(h): Remuneration structures - performance adjustment, etc.

19C.3.51

R

FCA

A *firm* must ensure that any variable *remuneration*, including a deferred portion, is paid or vests only if it is sustainable according to the financial situation of the *firm* as a whole, and justified according to the performance of the *firm*, the business unit and the individual concerned.

[Note: Standards 6 and 9 of the *FSB Compensation Standards*]

19C.3.52

A

FCA

- (1) A *firm* should reduce unvested deferred variable *remuneration* when, as a minimum:
 - (a) there is reasonable evidence of *employee* misbehaviour or material error; or
 - (b) the *firm* or the relevant business unit suffers a material downturn in its financial performance; or

19C.3.53

FCA

G

- (c) the *firm* or the relevant business unit suffers a material failure of risk management.
- (2) For performance adjustment purposes, awards of deferred variable *remuneration* made in *shares* or other non-cash instruments should provide the ability for the *firm* to reduce the number of *shares* or other non-cash instruments.
- (3) Contravention of (1) or (2) may be relied on as tending to establish contravention of the *rule* on performance adjustment (■ SYSC 19C.3.51 R).
- (1) Variable *remuneration* may be justified, for example, to incentivise *employees* involved in new business ventures which could be loss-making in their early stages.
- (2) The *governing body* (or, where appropriate, the *remuneration* committee) should approve performance adjustment policies, including the triggers under which adjustment would take place. The *FCA* may ask *firms* to provide a copy of their policies and expects *firms* to make adequate records of material decisions to operate the adjustments.

Chapter 20

Reverse stress testing

20.1 Application and purpose

Application

- (1) ■ SYSC 20 applies to:
- (a) a which is:
 - (i) a *bank*; or
 - (ii) a *building society*; or
 - (iii) a *BIPRU investment firm* which meets any of the criteria set out in (2) on an individual basis, or in (3) on a consolidated basis; and
 - (b) an *insurer* unless it is:
 - (i) a *non-directive friendly society*; or
 - (ii) a *Swiss general insurer*; or
 - (iii) an *EEA-deposit insurer*; or
 - (iv) an *incoming EEA firm*; or
 - (v) an *incoming Treaty firm*.
- (2) Subject to (4), ■ SYSC 20 applies to a if:
- (a) it has assets under management or administration of at least £10 billion (or the equivalent amount in foreign currency); or
 - (b) the total annual *fee* and *commission* income arising from its *regulated activities* is at least £250 million (or the equivalent amount in foreign currency); or
 - (c) it has assets or liabilities of at least £2 billion (or the equivalent amount in foreign currency).
- (3) Subject to (4), where all of the *BIPRU investment firms* within the same *UK consolidation group* or *non-EEA sub-group*, taken together as if they were one *firm*, meet any of the criteria in (2),

20.1.1A

FCA

R

- SYSC 20 applies to each of those *BIPRU investment firms* as if it individually met the inclusion criteria in (2).
- (4) Any *BIPRU investment firm* which is included within the scope of ■ SYSC 20 in accordance with (2) or (3) in any given year will continue to be subject to ■ SYSC 20 for the following two years irrespective of whether or not it continues to meet the inclusion criteria in any of those subsequent years.
- (1) ■ SYSC 20 applies to:
- an *IFPRU investment firm*; and
 - a *BIPRU firm* which meets any of the criteria in (2) on an individual basis, or in (3) on a consolidated basis.
- (2) Subject to (4), ■ SYSC 20 applies to a *BIPRU firm* if:
- it has assets under management or administration of at least £10 billion (or the equivalent amount in foreign currency); or
 - the total annual fee and commission arising from regulated activities is at least £250 million (or the equivalent amount in foreign currency); or
 - it has assets or liabilities of at least £2 billion (or the equivalent amount in foreign currency).
- (3) Subject to (4), where all of the *BIPRU firms* within the same *UK consolidation group* or *non-EEA sub-group*, taken together, as if they were one *firm*, meet any of the criteria in (2), ■ SYSC 20 applies to each of those *BIPRU firms* as if it individually met the criteria in (2).
- (4) Any *BIPRU firm* which is included within the scope of ■ SYSC 20 in accordance with (2) or (3) in any given year will continue to be subject to ■ SYSC 20 for the following two years, irrespective of whether or not it continues to meet the inclusion criteria in any of those subsequent years.

Purpose

This chapter amplifies *Principle 2*, under which a *firm* must conduct its business with due skill, care and diligence, and *Principle 3*, under which a *firm* must take reasonable care to organise and control its affairs responsibly and effectively, with adequate risk management systems.

20.1.2

FCA PRA

G

PAGE
3

20.1.3

FCA PRA

G

This chapter contains *rules* on reverse stress testing, which require a *firm* to identify and assess events and circumstances that would cause its business model to become unviable. This chapter also requires the *firm's* senior management or *governing body* to review and approve the results of the reverse stress testing exercise. This should help the *firm's* senior

management to identify the *firm's* vulnerabilities and design a strategy to prevent or mitigate the risk of business failure.

20.1.4

PRA

G

The reverse stress testing requirements are an integral component of a *firm's* business planning and risk management under SYSC. For *BIPRU firms* as referred to in ■ SYSC 20.1.1R (1)(a), this chapter amplifies ■ SYSC 7.1.1 G to ■ SYSC 7.1.8 G on risk control. For *insurers* as referred to in ■ SYSC 20.1.1R (1)(b), this chapter amplifies ■ SYSC 14.1.17 G to ■ SYSC 14.1.25 G on business planning and risk management.

20.1.4A

FCA

G

The reverse stress testing requirements are an integral component of a *firms* business planning and risk management under SYSC. For *firms* as referred to in ■ SYSC 20.1.1 R (1)(a) and *IFPRU investment firms* as referred to in ■ SYSC 20.1.1 R (1)(a), this chapter amplifies ■ SYSC 7.1.1 G to ■ SYSC 7.1.8 G on risk control.

20

20.2 Reverse stress testing requirements

20.2.1

FCA PRA

R

As part of its business planning and risk management obligations under SYSC, a *firm* must reverse stress test its business plan; that is, it must carry out stress tests and scenario analyses that test its business plan to failure. To that end, the *firm* must:

- (1) identify a range of adverse circumstances which would cause its business plan to become unviable and assess the likelihood that such events could crystallise; and
- (2) where those tests reveal a risk of business failure that is unacceptably high when considered against the *firm's* risk appetite or tolerance, adopt effective arrangements, processes, systems or other measures to prevent or mitigate that risk.

20.2.2

FCA PRA

R

Where the *firm* is a member of:

- (1) an *insurance group*, in respect of which it is required to maintain group capital;
- (2) a *UK consolidation group*; or
- (3) a *non-EEA sub-group*;

it must conduct the reverse stress test on a solo basis as well as on a consolidated basis in relation to the *insurance group*, the *UK consolidation group* or the *non-EEA sub-group*, as the case may be.

20.2.3

FCA PRA

R

The design and results of a *firm's* reverse stress test must be documented and reviewed and approved at least annually by the *firm's* senior management or *governing body*. A *firm* must update its reverse stress test more frequently if it is appropriate to do so in the light of substantial changes in the market or in macroeconomic conditions.

20.2.4

FCA PRA

G

- (1) Business plan failure in the context of reverse stress testing should be understood as the point at which the market loses confidence in a *firm* and this results in the *firm* no longer being able to carry out its business activities. Examples of this would be the point at which all or a substantial portion of the *firm's* counterparties are unwilling to continue transacting with it or seek to terminate their contracts, or the point at which the *firm's* existing shareholders are

unwilling to provide new capital. Such a point may be reached well before the *firm's* financial resources are exhausted.

- (2) The *appropriate regulator* may request a *firm* to quantify the level of financial resources which, in the *firm's* view, would place it in a situation of business failure should the identified adverse circumstances crystallise.
- (3) In carrying out the stress tests and scenario analyses required by
 - SYSC 20.2.1 R, a *firm* should at least take into account each of the sources of risk identified in accordance with ■ GENPRU 1.2.30 R (2).

20.2.5

FCA PRA

G

Reverse stress testing should be appropriate to the nature, size and complexity of the *firm's* business and of the risks it bears. Where reverse stress testing reveals that a *firm's* risk of business failure is unacceptably high, the *firm* should devise realistic measures to prevent or mitigate the risk of business failure, taking into account the time that the *firm* would have to react to these events and implement those measures. As part of these measures, a *firm* should consider if changes to its business plan are appropriate. These measures, including any changes to the *firm's* business plan, should be documented as part of the results referred to in ■ SYSC 20.2.3 R.

20.2.6

FCA PRA

G

In carrying out its reverse stress testing, a *firm* should consider scenarios in which the failure of one or more of its major counterparties or a significant market disruption arising from the failure of a major market participant, whether or not combined, would cause the *firm's* business to fail.

20.2.7

FCA PRA

G

- (1) The *appropriate regulator* may request a *firm* to submit the design and results of its reverse stress tests and any subsequent updates as part of its risk assessment.
- (2) In the light of the results of a *firm's* reverse stress tests, the *appropriate regulator* may require the *firm* to implement specific measures to prevent or mitigate the risk of business failure where that risk is not sufficiently mitigated by the measures adopted by the *firm* in accordance with ■ SYSC 20.2.1 R, and the *firm's* potential failure poses an unacceptable risk to the *appropriate regulator's* statutory objectives.
- (3) The *appropriate regulator* recognises that not every business failure is driven by lack of financial resources and will take this into account when reviewing a *firm's* reverse stress test design and results.

Chapter 21

Risk control: additional guidance

21.1 Risk control: guidance on governance arrangements

Additional guidance on governance arrangements

21.1.1

FCA PRA

G

(1) This chapter provides additional guidance on risk-centric governance arrangements for effective risk management. It expands upon the general organisational requirements in ■ SYSC 2, ■ SYSC 3, ■ SYSC 4, ■ SYSC 7 and ■ FUND 3.7, and so applies to the same extent as ■ SYSC 3.1.1 R (for *insurers, managing agents* and the *Society*), ■ SYSC 4.1.1 R (for every other *firm*) and ■ FUND 3.7 (for a *full-scope UK AIFM* of an *authorised AIF*).

(2) *Firms* should, taking account of their size, nature and complexity, consider whether in order to fulfil the general organisational requirements in ■ SYSC 2, ■ SYSC 3, ■ SYSC 4, ■ SYSC 7 and (for a *full-scope UK AIFM* of an *authorised AIF*) ■ FUND 3.7 their risk control arrangements should include:

- (a) appointing a Chief Risk Officer; and
- (b) establishing a *governing body* risk committee.

The functions of a Chief Risk Officer and *governing body* risk committee are explained further in this section.

(3) The *appropriate regulator* considers that *banks* and *insurers* that are included in the FTSE 100 Index are examples of the types of *firm* that should structure their risk control arrangements in this way. However, this *guidance* will also be relevant to some similar sized *firms* (whether or not *listed*) and some smaller *firms*, by virtue of their risk profile or complexity.

Chief Risk Officer

21.1.2

FCA PRA

G

(1) A Chief Risk Officer should:

- (a) be accountable to the *firm's governing body* for oversight of *firm-wide* risk management;
- (b) be fully independent of a *firm's* individual business units;
- (c) have sufficient authority, stature and resources for the effective execution of his responsibilities;
- (d) have unfettered access to any parts of the *firm's* business capable of having an impact on the *firm's* risk profile;
- (e) ensure that the data used by the *firm* to assess its risks are fit for purpose in terms of quality, quantity and breadth;

- (f) provide oversight and challenge of the *firm's* systems and controls in respect of risk management;
 - (g) provide oversight and validation of the *firm's* external reporting of risk;
 - (h) ensure the adequacy of risk information, risk analysis and risk training provided to members of the *firm's governing body*;
 - (i) report to the *firm's governing body* on the *firm's* risk exposures relative to its risk appetite and tolerance, and the extent to which the risks inherent in any proposed business strategy and plans are consistent with the *governing body's* risk appetite and tolerance. The Chief Risk Officer should also alert the *firm's governing body* to and provide challenge on, any business strategy or plans that exceed the *firm's* risk appetite and tolerance;
 - (j) provide risk-focused advice and information into the setting and individual application of the *firm's remuneration* policy (Where the *Remuneration Code* applies, see in particular ■ SYSC 19A.3.15 E. Where the *BIPRU Remuneration Code* applies, see in particular ■ SYSC 19C.3.15 E).
- (2) *Firms* will need to seek the *appropriate regulator's* approval for a Chief Risk Officer to perform the *systems and controls function* (see ■ SUP 10 (Approved persons)).
 - (3) The *appropriate regulator* expects that where a *firm* is part of a *group* it will structure its arrangements so that a Chief Risk Officer at an appropriate level within the *group* will exercise functions in (1) taking into account *group-wide* risks.

Reporting lines of Chief Risk Officer

21.1.3

FCA PRA

G

- (1) The Chief Risk Officer should be accountable to a *firm's governing body*.
- (2) The *appropriate regulator* recognises that in addition to the Chief Risk Officers primary accountability to the *governing body*, an executive reporting line will be necessary for operational purposes. Accordingly, to the extent necessary for effective operational management, the Chief Risk Officer should report into a very senior executive level in the *firm*. In practice, the *appropriate regulator* expects this will be to the *chief executive*, the chief finance officer or to another executive *director*.

Appointment of Chief Risk Officer

21.1.4

FCA PRA

G

- (1) *Firms* should ensure that a Chief Risk Officers *remuneration* is subject to approval by the *firm's governing body*, or an appropriate sub-committee.
- (2) *Firms* should also ensure that the Chief Risk Officer may not be removed from that role without the approval of the *firm's governing body*.

Governing body risk committee

21.1.5

FCA PRA

G

- (1) The *appropriate regulator* considers that, while the *firm's governing body* is ultimately responsible for risk governance throughout the business, *firms* should consider establishing a *governing body* risk committee to provide focused support and advice on risk governance.

- (2) Where a *firm* has established a *governing body* risk committee, its responsibilities will typically include:
 - (a) providing advice to the *firm's governing body* on risk strategy, including the oversight of current risk exposures of the *firm*, with particular, but not exclusive, emphasis on prudential risks;
 - (b) development of proposals for consideration by the *governing body* in respect of overall risk appetite and tolerance, as well as the metrics to be used to monitor the *firm's* risk management performance;
 - (c) oversight and challenge of the design and execution of stress and scenario testing;
 - (d) oversight and challenge of the day-to-day risk management and oversight arrangements of the executive;
 - (e) oversight and challenge of due diligence on risk issues relating to material transactions and strategic proposals that are subject to approval by the *governing body*;
 - (f) provide advice to the *firm's remuneration committee* on risk weightings to be applied to performance objectives incorporated in the incentive structure for the executive;
 - (g) providing advice, oversight and challenge necessary to embed and maintain a supportive risk culture throughout the *firm*.

- (3) Where a *governing body* risk committee is established, its chairman should be a *non-executive director*, and while its membership should predominantly be non-executive it may be appropriate to include senior executives such as the chief finance officer.

21.1.6

FCA PRA

G

In carrying out their risk governance responsibilities, a *firm's governing body* and *governing body* risk committee should have regard to any relevant advice from its audit committee or internal audit function concerning the effectiveness of its current control framework. In addition, they should remain alert to the possible need for expert advice and support on any risk issue, taking action to ensure that they receive such advice and support as may be necessary to meet their responsibilities effectively.

FCA PRA

R

- (1) This *rule* applies to *Handbook* provisions made by both the *FCA* and the *PRA*. It may affect their application by the *FCA* to *PRA-authorised persons* and *PRA approved persons*, and may affect their application by the *PRA* to any *authorised person* or *approved person*.
- (2) Where a *Handbook* provision (or part of one) goes beyond the *FCA's* or *PRA's* powers or regulatory responsibilities, it is to be interpreted as applied by that regulator to the extent of that regulator's powers and regulatory responsibilities only.
- (3) The extent of a *Handbook* provision is to be interpreted as cut back under ■ GEN 2.2.23R (2) by the minimum degree necessary.

2.2.24

FCA PRA

G

The published Memorandum of Understanding between the *FCA* and the *PRA* describes their regulatory responsibilities.

2.2.25

FCA PRA

G

Examples of rules being interpreted as cut back by ■ GEN 2.2.23 R include the following:

- (1) [deleted]
- (2) ■ SYSC 6.1.1 R requires a *firm* to maintain adequate policies and procedures to ensure compliance with its obligations under the *regulatory system*; ■ SYSC 6.1.1 R should be interpreted:
 - (a) as applied by the *FCA* in respect of a *PRA-authorised person's* compliance with regulatory obligations that are the responsibility of the *FCA* (for example, in respect of a *bank* maintaining policies and procedures to ensure compliance with banking conduct requirements in *BCOBS*); and,
 - (b) as applied by the *PRA* in respect of a *PRA-authorised person's* compliance with those regulatory obligations that are the responsibility of the *PRA* (for example, in respect of a *bank* maintaining policies and procedures to ensure compliance with financial resources requirements in the *PRA* Rulebook and the *EU CRR*).
- (3) ■ COMP 5.2.1 R sets out types of *protected claims* to be covered by the *FSCS*. The powers of the *FCA* and the *PRA* to make this type of *rule* are set out in the order made under section 213(1A) of the *Act*. The *rule* must be read as applying

only to the extent of those powers. For example, the *PRA* has no power to make ■ COMP 5.2.1 R (3) creating *protected claims* in connection with *protected investment business*, and the *FCA* has no power to make ■ COMP 5.2.1 R (1) as creating *protected claims* for a *protected deposit*. As such, those provisions are to be interpreted as not applied by the *PRA* and *FCA*, respectively.

- (1) The appropriate authorisation or registration fee is an integral part of an application for, or an application for a variation of, a *Part 4A permission*, authorisation, registration or variation under the *Payment Services Regulations* or the *Electronic Money Regulations*, or notification or registration under the *AIFMD UK regulation*. Any application or notification received by the *appropriate regulator* without the accompanying appropriate fee, in full and without deduction (see **■ FEES 3.2.1 R**), will not be treated as an application or notification made, incomplete or otherwise, in accordance with section 55U(4), or section 55H or 55I (as the case may be), of the *Act* or regulation 5(3) or 12(3) of the *Payment Services Regulations* or regulation 5 or 12 of the *Electronic Money Regulations* or regulation 11(1) and 60(a) of the *AIFMD UK regulation*. Where this is the case, the *appropriate regulator* will contact the applicant to point out that the application cannot be progressed until the appropriate fee has been received. In the event that the appropriate authorisation fee, in full and without deduction, is not forthcoming, the application will be returned to the applicant and no application will have been made.
- (2) With the exception of *persons* seeking to become a *designated professional body*, all applications, notifications, requests for vetting or admission approval will be treated as incomplete until the relevant fee is fully paid and the *appropriate regulator* will not consider an application, notification, request for vetting or admission approval until the relevant fee is fully paid. *Persons* seeking to become a *designated professional body* have 30 days after the designation order is made to pay the relevant fee.

(1) Fee payer	(2) Fee payable	Due date
(a) Any applicant for <i>Part 4A permission</i> (including an <i>incoming firm</i> applying for <i>top-up permission</i>) which includes a <i>PRA-regulated activity</i>	(1) Unless (2) applies, in respect of a particular application, the highest of the tariffs set out in FEES 3 Annex 1 R part 1 which apply to that application. (2) In respect of a particular application which is: (i) a straightforward or moderately complex	On or before the application is made

	<p>case for the purposes of FEES 3 Annex 1 R part 1, and</p> <p>(ii) only involves a simple change of legal status as set out in FEES 3 Annex 1 R part 6, the fee payable is 50% of the tariff that would otherwise be payable in FEES 3 Annex 1 R part 1.</p>	
<p>(b) Any <i>Treaty firm</i> that wishes to exercise a <i>Treaty right</i> to qualify for <i>authorisation</i> under Schedule 4 to the <i>Act</i> (Treaty rights) in respect of <i>regulated activities</i> for which it does not have an <i>EEA right</i>, except for a <i>firm</i> providing <i>cross border services</i> only</p>	<p>(1) Where no certificate has been issued under paragraph 3(4) of Schedule 4 to the <i>Act</i> the fee payable is, in respect of a particular exercise, set out in FEES 3 Annex 1 R, part 4. (2) Where a certificate in (1) has been issued no fee is payable.</p>	<p>On or before the notice of exercise is given</p>
<p>(c) A <i>firm</i> applying for a variation of its <i>Part 4A permission</i> or an <i>FCA-authorised person</i> applying to carry on a <i>PRA-regulated activity</i></p>	<p>(1) Unless (2) or (3) applies, if the proposed new business of the <i>firm</i> would fall within one or more activity groups specified in Part 1 of FEES 4 Annex 1A R or Part 1 of FEES 4 Annex 1B R not applicable before the application, the fee is 50% of the highest of the tariffs set out in FEES 3 Annex 1 R which apply to that application.</p> <p>(2) If the only change is that the A.12 activity group tariff applied to the <i>firm's</i> business before the variation and the A.13 activity group</p>	<p>On or before the date the application is made</p>

will apply after variation, no fee is payable.

(3) If the *firm* is in the A.1 fee-block at the date of the application and the variation involves adding any of the *regulated activities of meeting of repayment claims or managing dormant account funds (including the investment of such funds)*, the fee is 50% of the fee in **FEES 3 Annex 1 R** that applies to that application.

(4) In all other cases, other than applications by *credit unions*, the fee payable is 125, unless the variation involves only the reduction (and no other increases) in the scope of a *Part 4A permission* in which case no fee is payable.

(d) Any *person* to which the Special Project Fee for restructuring applies under **FEES 3 Annex 9**. Special Project Fee for restructuring in accordance with **FEES 3 Annex 9**. 30 *days* of the date of the invoice.

Fees payable by a BIPRU firm for a permission or guidance on its availability in connection with the BCD and/or CAD

FCA

Part 1

In relation to a *BIPRU firm*, fees payable other than in relation to the counterparty credit risk internal model method.

(1) Paragraphs (2) and (3) deal with an application made to the *FCA* rather than a request for assistance under the *Capital Requirements Regulations 2006* (transposing parts of the *BCD* and *CAD*, as applicable under article 95(2) of the *EU CRR*).

(2) For *firms* falling into a group (Group 1) in which there are five or more significant overseas entities to which the application relates and the application is for permission to use one of the *advanced prudential calculation approaches* listed in Tables 1 or 2 or *guidance* on the availability of such a permission the fees in Table 1 are applicable.

(3) For all other *firms* the fees in Table 2 are applicable.

(4)

[deleted]

(5) If the application or request for assistance under the *Capital Requirements Regulations 2006* (transposing parts of the *BCD* and *CAD*, as applicable under article 95(2) of the *EU CRR*) is in relation to the use of the *advanced IRB approach* and the *FCA* (in the case of (2) or (3)) or the relevant *Home State regulator* (in the case of (4)) has already granted permission for the use of the *foundation IRB approach* at the time of the application then Table 3 applies.

(6) All fees are shown in £.

Part 1

Fees payable in relation to *internal approaches* that require permission under Part Three of the *EU CRR* other than the internal model method for counterparty credit risk.

(1) Subject to (3), for applications made to the *appropriate regulator* to authorise a new *internal approach*:

(i) where the application relates to *CRR firms* and to five or more significant overseas entities within the same group (Group 1) and the application is for a permission to use one of the internal approaches in Tables 1 or 2 or guidance on the availability of such a permission, the fees in Table 1 are applicable; and

(ii) for all other *CRR firms* the fees in Table 2 are applicable.

(2) Subject to (3), for applications made to the consolidating supervisor other than the *appropriate regulator* for a joint decision under article 20 of the *EU CRR* on the use of one of the internal approaches in Tables 1 or 2 and where the *appropriate regulator* is requested to assist the consolidating supervisor, the fees in Table 1 and Table 2 are applicable if the *CRR firm* concerned meets the following conditions:

(i) it is a *CRD credit institution*; and

(ii) the *firm* does not fall within Group 4 as defined in Table 2

(3) If however the application or request for assistance is in relation to the use of the Advanced IRB approach and the *appropriate regulator* (in the case of (1)) or the relevant consolidating supervisor (in the case of (2)) has already granted permission for the use of the Foundation IRB approach then table 3 applies.

(4) References to the *internal approaches* in Tables 1, 2 and 3 are to be construed as follows:

(i) Foundation IRB means the internal approach for credit risk referred to in article 143(1) of the *EU CRR*;

(ii) Advanced IRB means the internal approach for credit risk referred to in article 151(4) and (9) of the *EU CRR*; and

(iii) AMA means the internal approach for operational risk referred to in article 312(2) of the *EU CRR*.

Periodic fees in relation to the Disclosure and Transparency Rules for the period 1 April 2013 to 31 March 2014

FCA

Annual fees for the period 1 April 2013 to 31 March 2014

All non-listed *issuers* of shares, depositary receipts and securitised derivatives. Annual fees for listed *issuers* in respect of *Disclosure Rules* and *Transparency Rules* obligations are incorporated in the annual fee for listed *issuers* under the Listing Rules.

(1) For all non-listed *issuers* of securitised derivatives, depositary receipts and global depositary receipts the fees payable are set out in Table 1.

(2) For all other non-listed *issuers*, fees to be determined according to market capitalisation as set out in Table 2. The fee is calculated as follows:

(a) the relevant minimum fee; plus

(b) the cumulative total of the sums payable for each of the bands calculated by multiplying each relevant tranche of the *firm's* market capitalisation by the rate indicated for that tranche.

Fees from other fee schedules contained in other sections of the sourcebook may be applicable to a single submission.

6.6 Incoming EEA firms

6.6.1

FCA PRA

R

If an *incoming EEA firm*, which is a *CRD credit institution*, an *IMD insurance intermediary* or *MiFID investment firm*, is a *participant firm*, the *FSCS* must give the *firm* such discount (if any) as is appropriate on the share of any levy it would otherwise be required to pay, taking account of the nature of the levy and the extent of the compensation coverage provided by the firm's *Home State* scheme.

6.7 Payment of levies

- 6.7.1** **R** **FCA** **PRA** A *participant firm* must pay its share of any levy made by the *FSCS*:
- (1) in one payment; or
 - (2) where the *FSCS* agrees, quarterly, at the beginning of each quarter, by direct debit agreement.
- 6.7.2** **G** **FCA** **PRA** The amount paid under a direct debit arrangement will be adjusted on a continuous basis to take account of interim levies and other adjustments made during the course of the financial year.
- 6.7.3** **R** **FCA** **PRA** A *participant firm's* share of a levy to which **■ FEES 6.7.1 R (1)** applies is due on, and payable within 30 *days* of, the date when the invoice is issued.

 - (2) the *FSCS* may make one or more levies upon it (which may be before or after the *firm* has ceased to be a *participant firm* or carry out activities within one or more *classes*, but must be before it ceases to be an *authorised person*) for the costs which it would have been liable to pay had the *FSCS* made a levy on all *participant firms* or *firms* carrying out activities within that

Transitional arrangements in relation to amendments introduced by the Compensation Sourcebook (Investments by Large Unincorporated Associations and Certain Large Partnerships) Instrument 2013

FCA

9.1 Introduction

9.1.1 G *FEES* TP 9 deals with transitional arrangements relating to the calculation of *annual eligible income* under *FEES* 6.5.13 R in the light of the introduction of the Compensation Sourcebook (Investments by Large Unincorporated Associations and Certain Large Partnerships) Instrument 2013, which came into force on 13 December 2013 (the "Instrument").

9.1.2 G The definition of *annual eligible income* allows for it to be calculated in one of two ways from annual income: "(a) only include such annual income if it is attributable to business conducted with or for the benefit of *eligible claimants* and is otherwise attributable to compensatable business ["Method (a)"]; or (b) include all such annual income".

9.2 Scope

9.2.1 R *FEES* TP 9 applies to a participant firm providing a statement to the *FSCS* in accordance with *FEES* 6.5.13 R:

(a) in respect of the *participant firm's* financial year ended in the year to 31 December 2013; and

(b) which was a member of class C2, D1 and/or D2 in 2013; and

(c) which states its total amount of business in relation to those classes based on a calculation of its *annual eligible income* using Method (a).

9.3 Firms whose financial years end in the period 1 January 2013 to 12 December 2013

9.3.1 G A *participant firm*, whose financial year ended in the period 1 January 2013 to 12 December 2013, does not need to include in its calculation of *annual eligible income* the annual income attributable to business conducted with or for the benefit of *eligible claimants* who only became *eligible claimants* as a result of the Instrument.

9.4 Firms whose financial years end in the period 13 to 31 December 2013

- 9.4.1 R A *participant firm*, whose financial year ended in the period 13 to 31 December 2013, may calculate its *annual eligible income* by any of the following methods:
- (a) include the annual income attributable to business conducted with or for the benefit of *eligible claimants* who only became *eligible claimants* as a result of the Instrument;
 - (b) do not include the annual income attributable to business conducted with or for the benefit of *eligible claimants* who only became *eligible claimants* as a result of the Instrument; or
 - (c) include only that part of the annual income attributable to business conducted with or for the benefit of *eligible claimants* who became *eligible claimants* as a result of the Instrument that is attributable to the period from 13 December 2013 to the end of the *participant firm's* financial year.

Application

1.1 Application

1.1.1

FCA **PRA**

G

There is no overall application statement for *GENPRU*. Each chapter or section has its own application statement.

1.1.2

FCA

G

Broadly speaking however, *GENPRU* applies (except as provided in **■ GENPRU 1.1.2A G**) to:

- (1) an *insurer*;
- (2) [deleted]
- (3) [deleted]
- (4) a *BIPRU firm*; and
- (5) groups containing such *firms*.

1.1.2-AA

FCA

G

■ GENPRU 3 (Cross sector groups) applies to:

- (1) an *IFPRU investment firm*;
- (2) an *insurer*; and
- (3) a *group* containing both the *firms* in (1) and (2).

1.1.2-A

PRA

G

Further, *GENPRU* also broadly applies to:

- (1) an *insurer*;
- (2) groups containing an *insurer*.

1.1.2-B

FCA

G

GENPRU applies to a *collective portfolio management investment firm* that is a *BIPRU firm* in parallel with **■ IPRUINV link 11** (see **■ IPRUINV link 11.6**).

1.1.2A

FCA **PRA**

G

A firm should refer to **■ GEN 2.2.13A R** (cross-references in the Handbook) and **■ GEN 2.2.23 R** to **■ GEN 2.2.25 G** (cutover: application of provisions made by both the *FCA* and the *PRA*) when applying the rules and guidance in *GENPRU*. In particular,

many rules in *GENPRU* are made by both the *PRA* (in relation to *PRA-authorized persons*) and by the *FCA* (in relation to *BIPRU firms* that are *FCA-authorized persons*).

1.1.2B

FCA

G

As the *FCA* does not have the power to impose prudential rules and guidance on *PRA-authorized persons*, references to *PRA-authorized persons* or *PRA rules* that are included in *FCA GENPRU* provisions will not be relevant in the *FCA*'s application of that provision, unless otherwise stated.

Scope

1.1.3

FCA

PRA

R

GENPRU applies to a *firm* in relation to the whole of its business, except where a particular provision provides for a narrower scope.

This section applies to:

- (1) a *BIPRU firm*; and
- (2) an *insurer*, unless it is:
 - (a) a *non-directive friendly society*; or
 - (b) a *Swiss general insurer*; or
 - (c) an *EEA-deposit insurer*; or
 - (d) an *incoming EEA firm*; or
 - (e) an *incoming Treaty firm* .

1.2.11	G	The adequacy of a <i>firm's</i> financial resources needs to be assessed in relation to all the activities of the <i>firm</i> and the risks to which they give rise and so this section applies to a <i>firm</i> in relation to the whole of its business.
FCA PRA		
1.2.11A	G	In the case of a <i>collective portfolio management investment firm</i> , ■ GENPRU 1.2.11 G means that this section also applies to its activities in relation to the management of <i>AIFs</i> and/or <i>UCITS</i> .
FCA		
		Purpose
1.2.12	G	Adequate financial resources and adequate systems and controls are necessary for the effective management of prudential risks. This section therefore has requirements relating to both of these topics.
FCA PRA		
1.2.13	G	This section amplifies <i>Principle 4</i> , under which a <i>firm</i> must maintain adequate financial resources. It is concerned with the adequacy of the financial resources that a <i>firm</i> needs to hold in order to be able to meet its liabilities as they fall due. These resources include both capital and liquidity resources.
FCA PRA		
1.2.14	G	In the case of a <i>BIPRU firm</i> this section implements the third paragraph of article 95(2) of the <i>EU CRR</i> applying Article 34 of the <i>Capital Adequacy Directive</i> so far as that Article applies Article 123 of the <i>Banking Consolidation Directive</i> .
FCA		

1.2.15

FCA PRA

G

This section also has *rules* requiring a *firm* to identify and assess risks to its being able to meet its liabilities as they fall due, how it intends to deal with those risks, and the amount and nature of financial resources that the *firm* considers necessary.

■ GENPRU 1.2.60 R provides that a *firm* should document that assessment. The *appropriate regulator* will review that assessment as part of its own assessment of the adequacy of a *firm's* capital under its *supervisory review and evaluation process (SREP)*. When forming a view of any *individual capital guidance* to be given to the *firm*, the *appropriate regulator* will also review the regulator's risk assessment and any other issues arising from day-to-day supervision.

1.2.16

FCA PRA

G

This section also has *rules* requiring a *firm* to carry out appropriate stress tests and scenario analyses for the risks it has previously identified and to establish the amount of financial resources needed in each of the circumstances and events considered in carrying out the stress tests and scenario analyses. In the case of a *BIPRU firm*, the *appropriate regulator* will consider as part of its *SREP* whether the *BIPRU firm* should hold a *capital planning buffer* and, in such a case, the amount and quality of that buffer. The *capital planning buffer* is an amount separate, though related to, the *individual capital guidance*, insofar as its purpose is to ensure that a *BIPRU firm* is able to continue to meet the *overall financial adequacy rule* throughout the relevant capital planning period in the face of adverse circumstances, after allowing for realistic management actions. Therefore, when forming its view on a *BIPRU firm's capital planning buffer*, the *appropriate regulator* will take into account the assessment made in relation to the *firm's ICG*.

1.2.17

FCA PRA

G

The basic requirements in this section are drafted to apply to a *firm* on a solo basis. This section then goes on to describe when its requirements do and do not apply on a solo basis and on a consolidated basis (see ■ GENPRU 1.2.45 R to ■ GENPRU 1.2.47 R and ■ GENPRU 1.2.57 R to ■ GENPRU 1.2.58 R). It also sets out some details about how the solo requirements are adjusted when they are applied on a consolidated basis (see ■ GENPRU 1.2.48 R to ■ GENPRU 1.2.56 G and ■ GENPRU 1.2.29 G).

Outline of other related provisions

1.2.18

FCA PRA

G

■ GENPRU 2.1 sets out the minimum *capital resources requirements* for a *firm*.
 ■ GENPRU 2.2 sets out how *capital resources* are defined and measured for the purpose of meeting the requirements of ■ GENPRU 2.1.

1.2.19

FCA PRA

G

- (1) ■ BIPRU 2.2 (Internal capital adequacy standards) and ■ INSPRU 7.1 (Individual capital assessment) set out detailed *guidance* on how a *firm* should carry out the assessment referred to in ■ GENPRU 1.2.15 G. The more thorough, objective, and prudent a *firm's* assessment is, and can be demonstrated as being, the more reliance the *appropriate regulator* will be able to place on the results of that assessment.
- (2) ■ BIPRU 2.2 and ■ INSPRU 7.1 also have information on how the *appropriate regulator* will review and respond to the assessments referred to in ■ GENPRU 1.2.15 G and, in the case of *BIPRU firms*, in ■ GENPRU 1.2.16 G. In particular they deal with the giving of *individual capital guidance* to a *firm*, which is *guidance* about the amount and quality of capital resources that the *appropriate regulator* thinks a *firm* should hold at all times under the *overall financial adequacy rule* as it applies on a solo level and a consolidated

level. ■ BIPRU 2.2, also deals with the giving of a *capital planning buffer* to a BIPRU firm on a solo level and a consolidated level.

FCA

G

For a BIPRU firm using the *IRB approach* ■ BIPRU 4.3.39 R to ■ BIPRU 4.3.40 R set out a recession credit rating migration stress test that the *firm* should carry out. Further *rules* and *guidance* on such stress tests are set out in ■ BIPRU 2.2 (Internal capital adequacy standards).

Requirement to have adequate financial resources

1.2.26

FCA PRA

R

A firm must at all times maintain overall financial resources, including capital resources and liquidity resources, which are adequate, both as to amount and quality, to ensure that there is no significant risk that its liabilities cannot be met as they fall due.

1.2.26A

FCA

G

■ BIPRU 12 contains *rules* and *guidance* in relation to the adequacy of a *BIPRU firm's* liquidity resources. Consistent with ■ GENPRU 1.2.2A R, in assessing the adequacy of its liquidity resources, a *BIPRU firm* should do so by reference to the *overall liquidity adequacy rule*, rather than the *overall financial adequacy rule*.

1.2.27

FCA PRA

G

The liabilities referred to in the *overall financial adequacy rule* include a *firm's* contingent and prospective liabilities. They exclude liabilities that might arise from transactions that a *firm* has not entered into and which it could avoid, for example, by taking realistic management actions such as ceasing to transact new business after a suitable period of time has elapsed. They include liabilities or costs that arise both in scenarios where the *firm* is a going concern and those where the *firm* ceases to be a going concern. They also include claims that could be made against a *firm*, which ought to be paid in accordance with fair treatment of *customers*, even if such claims could not be legally enforced.

1.2.28

FCA PRA

G

A *firm* should therefore make its assessment of adequate financial resources on realistic valuation bases for assets and liabilities taking into account the actual amounts and timing of cash flows under realistic adverse projections.

1.2.29

FCA PRA

G

Risks may be addressed through holding capital to absorb losses that unexpectedly materialise. The ability to pay liabilities as they fall due also requires liquidity. Therefore, in assessing the adequacy of a *firm's* financial resources, both capital and liquidity needs should be considered. A *firm* should also consider the quality of its financial resources such as the loss-absorbency of different types of capital and the time required to liquidate different types of asset. ■ SYSC 11.1.24 E is an *evidential provision* relating to the *overall financial adequacy rule* concerning *contingency funding plans*.

Systems, strategies, processes and reviews

1.2.30

FCA PRA

R

A *firm* must have in place sound, effective and complete processes, strategies and systems:

- (1) to assess and maintain on an ongoing basis the amounts, types and distribution of financial resources, *capital resources* and internal capital that it considers adequate to cover:
 - (a) the nature and level of the risks to which it is or might be exposed;
 - (b) the risk in the *overall financial adequacy rule*; and
 - (c) the risk that the *firm* might not be able to meet its *CRR* in the future; and
- (2) that enable it to identify and manage the major sources of risks referred to in (1), including the major sources of risk in each of the following categories where they are relevant to the *firm* given the nature and scale of its business:
 - (a) credit risk;

- (b) *market risk*;
- (c) *liquidity risk*;
- (d) *operational risk*;
- (e) *insurance risk*;
- (f) *concentration risk*;
- (g) *residual risk*;
- (h) *securitisation risk*;
- (i) *business risk*;
- (j) *interest rate risk (including, in the case of a BIPRU firm, interest rate risk in the non-trading book)*;
- (k) *pension obligation risk* ; and
- (l) *group risk*.

1.2.31

R

FCA PRA

- (1) This *rule* defines some of the terms used in the *overall Pillar 2 rule*.
- (2) Residual risk means the risk that *credit risk mitigation* techniques used by the *firm* prove less effective than expected.
- (3) *Securitisation risk* includes the risk that the *capital resources* held by a *firm* in respect of assets which it has *securitised* are inadequate having regard to the economic substance of the transaction, including the degree of risk transfer achieved.
- (4) Business risk means any risk to a *firm* arising from changes in its business, including the risk that the *firm* may not be able to carry out its business plan and its desired strategy. It also includes risks arising from a *firm's remuneration policy* (see also the *Remuneration Code* which applies to *BIPRU firms* and the detailed application of which is set out in ■ SYSC 19A.1) .
- (5) Pension obligation risk is the risk to a *firm* caused by its contractual or other liabilities to or with respect to a pension scheme (whether established for its employees or those of a related *company* or otherwise). It also means the risk that the *firm* will make payments or other contribution to or with respect to a pension scheme because of a moral obligation or because the *firm* considers that it needs to do so for some other reason.

1.2.32

G

FCA PRA

- (1) This paragraph gives *guidance* on some of the terms used in the *overall Pillar 2 rule*.
- (2) Insurance risk refers to the inherent uncertainties as to the occurrence, amount and timing of insurance liabilities.

- (3) Interest rate risk in the *non-trading book* is explained in ■ BIPRU 2.3 (Interest rate risk in the non-trading book).
- (4) In a narrow sense, business risk is the risk to a *firm* that it suffers losses because its income falls or is volatile relative to its fixed cost base. However, in a broader sense, it is exposure to a wide range of macro-economic, geopolitical, industry, regulatory and other external risks that might deflect a *firm* from its desired strategy and business plan. ■ GENPRU 1.2.73 G provides further *guidance* on business risk.
- (5) Further material on pension obligation risk can be found in ■ GENPRU 1.2.79 G - ■ GENPRU 1.2.86 G.
- (6) Group risk is the risk that the financial position of a *firm* may be adversely affected by its relationships (financial or non-financial) with other entities in the same *group* or by risks which may affect the financial position of the whole *group*, for example reputational contagion. Further *guidance* on group risk can be found in ■ GENPRU 1.2.87 G to ■ GENPRU 1.2.91 G.

1.2.33

FCA PRA

R

- (1) This *rule* amplifies some of the obligations in the *overall Pillar 2 rule*.

- (3) As part of its obligations in respect of *market risk*, a *BIPRU firm* must consider whether the value adjustments and provisions taken for *positions* and portfolios in the *trading book* enable the *firm* to sell or hedge out its *positions* within a short period without incurring material losses under normal market conditions.

- (4) The processes, strategies and systems required by the *overall Pillar 2 rule* must take into account stress tests and scenario analyses that the *firm* is required to carry out under any other provision of the *Handbook*.

1.2.34

FCA PRA

G

In the *overall Pillar 2 rule*, internal capital refers to the financial resources of a *firm* which it treats as being held against the risks listed in the *overall Pillar 2 rule*. The obligation in that *rule* to assess the distribution of such capital refers, in relation to a *firm* making an assessment on a solo basis, for example, to the need to take account of circumstances where part of a *firm's* financial resources are held by a *branch* of that *firm* which are subject to restrictions on its ability to transfer that capital. An assessment of internal capital distribution might also take account of such of a *firm's* financial resources as may be ring-fenced in the event of its insolvency.

1.2.35

FCA PRA

R

The processes, strategies and systems required by the *overall Pillar 2 rule* must be comprehensive and proportionate to the nature, scale and complexity of the *firm's* activities.

1.2.36

FCA PRA

R

As part of its obligations under ■ GENPRU 1.2.30 R (1) (Main requirement relating to risk processes, strategies and systems), a *firm* must identify separately the amount of *tier one capital*, *tier two capital*, *tier three capital*, other capital eligible to form part of its *capital resources* and

each category of capital (if any) that is not eligible to form part of its *capital resources* which it considers adequate for the purposes described in

■ GENPRU 1.2.30 R (1).

1.2.37

FCA PRA

R

The processes and systems required by the *overall Pillar 2 rule* must:

- (1) include an assessment of how the *firm* intends to deal with each of the major sources of risk identified in accordance with ■ GENPRU 1.2.30 R (2);
- (2) take into account the impact of diversification effects and how such effects are factored into the *firm's* systems for measuring and managing risks; and
- (3) include an assessment of the *firm-wide* impact of the risks identified in accordance with ■ GENPRU 1.2.30R (2), to which end a *firm* must aggregate the risks across its various business lines and units, making appropriate allowance for the correlation between risks.

1.2.38

FCA PRA

G

Certain risks such as systems and controls weaknesses may not be adequately addressed by, for example, holding additional capital and a more appropriate response would be to rectify the weakness. In such circumstances, the amount of financial resources required to address these risks might be zero. However, a *firm* should consider whether holding additional capital might be an appropriate response until the identified weaknesses are rectified. A *firm*, should, in accordance with ■ GENPRU 1.2.60 R (Documentation of risk assessments), document the approaches taken to manage these risks.

1.2.39

FCA PRA

R

A *firm* must:

- (1) carry out regularly the assessments required by the *overall Pillar 2 rule*; and
- (2) carry out regularly assessments of the processes, strategies and systems required by the *overall Pillar 2 rule* to ensure that they remain compliant with ■ GENPRU 1.2.35 R.

1.2.40

FCA PRA

G

A *firm* should carry out assessments of the sort described in the *overall Pillar 2 rule* and ■ GENPRU 1.2.39 R at least annually, or more frequently if changes in the business, strategy, nature or scale of its activities or operational environment suggest that the current level of financial resources is no longer adequate. The appropriateness of the internal process, and the degree of involvement of senior management in the process, will be taken into account by the *appropriate regulator* when reviewing a *firm's* assessment as part of the *appropriate regulator's* own assessment of the adequacy of a *firm's* financial resources. The processes and systems should ensure that the assessment of the adequacy of a *firm's* financial resources is reported to its senior management as often as is necessary.

1.2.41

PRA

G

The assessments undertaken by *firms in run-off* may not need to be as comprehensive or frequent compared to a *firm* not in run off since this may better reflect the reduced nature and complexity of its business and reduced access to new capital. Whilst a *firm in run-off* will still need to carefully monitor the progress of the run off, a more comprehensive assessment may only be appropriate on commencement of the run off or when considering

a reduction in capital through the payment of a dividend or other capital distribution or if the *firm's* circumstances change materially.

Stress and scenario tests

1.2.42

FCA PRA

R

- (1) As part of its obligation under the *overall Pillar 2 rule*, a *firm* must, for the major sources of risk identified in accordance with ■ GENPRU 1.2.30 R (2), carry out stress tests and scenario analyses that are appropriate to the nature, scale and complexity of those major sources of risk and to the nature, scale and complexity of the *firm's* business.

 - (i) [deleted]
 - (ii) [deleted]
 - (iii) [deleted]

- (2) In carrying out the stress tests and scenario analyses in (1), a *firm* must identify an appropriate range of adverse circumstances of varying nature, severity and duration relevant to its business and risk profile and consider the exposure of the *firm* to those circumstances, including:
 - (a) circumstances and events occurring over a protracted period of time;
 - (b) sudden and severe events, such as market shocks or other similar events; and
 - (c) some combination of the circumstances and events described in (a) and (b), which may include a sudden and severe market event followed by an economic recession.
- (3) In carrying out the stress tests and scenario analyses in (1), the *firm* must estimate the financial resources that it would need in order to continue to meet the *overall financial adequacy rule* and the *CRR* in the adverse circumstances being considered.
- (4) In carrying out the stress tests and scenario analyses in (1), the *firm* must assess how risks aggregate across business lines or units, any material non-linear or contingent risks and how risk correlations may increase in stressed conditions.
- (5) As part of its obligation under the *overall Pillar 2 rule*, a *BIPRU firm* must also incorporate and take into account any stress tests and scenario analyses that it is required to carry out under

BIPRU. In particular, a *BIPRU firm* with an *IRB permission* must incorporate and take into account the stress test required to be carried out under ■ BIPRU 4.3.40 R (2).

1.2.42A

FCA PRA

G

In order to comply with the *general stress and scenario testing rule*, a *firm* should undertake a broad range of stress tests which reflect a variety of perspectives, including sensitivity analysis, scenario analysis and stress testing on an individual portfolio as well as a *firm-wide* level.

1.2.42B

FCA PRA

G

A *BIPRU firm* with an *IRB permission* which has any material credit *exposures* excluded from its *IRB* models should also include these *exposures* in its stress and scenario testing to meet its obligations under the *general stress and scenario testing rule*. A *BIPRU firm* without an *IRB permission*, or an *insurer* that has any material credit and counterparty credit risk exposures, should conduct analyses to assess risks to the credit quality of its counterparties, including any protection sellers, considering both on and off-balance sheet exposures.

1.2.42C

PRA

G

An *insurer* may choose to carry out its *ICA* through the use of stress testing and scenario analyses (see ■ INSPRU 7.1.10 G and ■ INSPRU 7.1.68 G). If it does so, in carrying out the stress tests and scenario analyses referred to in ■ GENPRU 1.2.42 R, an *insurer* should take into account the stress tests it uses for its *ICA*.

1.2.42D

FCA PRA

G

In carrying out the stress tests and scenario analyses required by ■ GENPRU 1.2.42R (1), a *firm* should also consider any impact of the adverse circumstances on its *capital resources*. In particular, a *firm* should consider the *capital resources gearing rules* where its *tier one capital* is eroded by the event.

1.2.42E

FCA PRA

G

A *firm* should assign adequate resources, including IT systems, to stress testing and scenario analysis, taking into account the stress testing techniques employed, so as to be able to accommodate different and changing stress tests at an appropriate level of granularity.

1.2.42F

FCA PRA

G

■ GENPRU 1.2.63 G to ■ GENPRU 1.2.78 G provide additional *guidance* on stress testing and scenario analyses. In particular, ■ GENPRU 1.2.73A G provides specific *guidance* on capital planning.

1.2.43

FCA PRA

G

Stress tests and scenario analyses should be carried out at least annually. A *firm* should, however, consider whether the nature of the major sources of risks identified by it in accordance with ■ GENPRU 1.2.30 R (2) (Main requirement relating to risk processes, strategies and systems) and their possible impact on its financial resources suggest that such tests and analyses should be carried out more frequently. For instance, a sudden change in the economic outlook may prompt a *firm* to revise the parameters of some of its stress tests and scenario analyses. Similarly, if a *firm* has recently become exposed to a particular sectoral concentration, it may wish to add some stress tests and scenario analyses in order to reflect that concentration. ■ SYSC 11.1.21 E is an *evidential provision* relating to the *general stress and scenario testing rule* concerning scenario analysis in relation to *liquidity risk*.

- (1) In accordance with the general principles in ■ GENPRU 1.2.48 R and ■ BIPRU 8 (Group risk - consolidation), for the purpose of the ICAAP rules as they apply on a consolidated basis:
- the firm must ensure that the relevant group as defined in (2) have the processes, strategies and systems required by the overall Pillar 2 rule;
 - the risks to which the overall Pillar 2 rule and the general stress and scenario testing rule refer are those risks as they apply to each member of the relevant group;
 - the reference in the overall Pillar 2 rule to amounts and types of financial resources, capital resources and internal capital (referred to in this rule as resources) must be read as being to the amounts and types that the firm considers should be held by the members of the relevant group as defined in (2);
 - other references to resources must be read as being to resources of the members of the relevant group as defined in (2);
 - references to the CRR are to the consolidated capital requirements applicable to the relevant group under ■ BIPRU 8 (Group risk - consolidation) or, as the case may be, ■ INSPRU 6 (Group risk: Insurance groups);
 - the reference in the overall Pillar 2 rule to the distribution of resources must be read as including a reference to the distribution between members of the relevant group as defined in (2); and
 - the reference in the overall Pillar 2 rule to the overall financial adequacy rule must be read as being to that rule as adjusted under ■ GENPRU 1.2.59 R (Application of the overall financial adequacy rule on a consolidated basis).
- (2) For the purpose of this rule the relevant group is the group referred to in ■ GENPRU 1.2.48 R and the members of that group are those undertakings that are included in the scope of consolidation with respect to the insurance group, UK consolidation group or, as the case may be, non-EEA sub-group in question.

■ GENPRU 1.2.49 R means that non-financial members of the firm's group are excluded from the group assessment. Notwithstanding the scope of ■ GENPRU 1.2.49 R, a firm should

nevertheless take account of risks arising from the activities of those excluded members in its overall assessment of risk.

1.2.51

- (1) This *rule* relates to the assessment of the amounts, types and distribution of financial resources, *capital resources* and internal capital (referred to in this *rule* as "resources") under the *overall Pillar 2 rule* as applied on a consolidated basis and to the assessment of diversification effects as referred to in ■ GENPRU 1.2.37 R (2) as applied on a consolidated basis.
- (2) A *firm* must be able to explain how it has aggregated the risks referred to in the *overall Pillar 2 rule* and the resources required by each member of the relevant group as referred to in ■ GENPRU 1.2.49 R (2) and how it has taken into account any diversification benefits with respect to the group in question.
- (3) In particular, to the extent that the transferability of resources affects the assessment in (2), a *firm* must be able to explain how it has satisfied itself that resources are transferable between members of the group in question in the stressed cases and the scenarios referred to in the *general stress and scenario testing rule*.

1.2.52

FCA PRA

- (1) A *firm* must allocate the total amount of financial resources, *capital resources* and internal capital identified as necessary under the *overall Pillar 2 rule* (as applied on a consolidated basis) between different parts of the relevant group (as defined in ■ GENPRU 1.2.49 R). ■ GENPRU 1.2.36 R (Identifying different tiers of capital) does not apply to this allocation.
- (2) The *firm* must carry out the allocation in (1) in a way that adequately reflects the nature, level and distribution of the risks to which the group is subject and the effect of any diversification benefits.

1.2.53

FCA PRA

R

A *firm* must also allocate the total amount of financial resources, *capital resources* and internal capital (referred to in this *rule* as "resources") identified as necessary under the *overall Pillar 2 rule* as applied on a consolidated basis between each *firm* which is a member of the relevant group (as defined in ■ GENPRU 1.2.49 R) on the following basis:

- (1) the amount allocated to each *firm* must be decided on the basis of the principles in ■ GENPRU 1.2.52 R (2); and
- (2) if the process in (1) were carried out for each group member, the total so allocated would equal the total amount of resources identified as necessary under the *overall Pillar 2 rule* as applied on a consolidated basis.

1.2.54

FCA PRA

G

A *firm* to which the ICAAP rules apply on a consolidated basis need not prepare a consolidated basis assessment if such an assessment has been prepared by another member of its *group*. Where that is the case, a *firm* may adopt such an assessment as its own. A *firm* nevertheless remains responsible for the assessment.

1.2.55

FCA PRA

G

The purpose of ■ GENPRU 1.2.51 R - ■ GENPRU 1.2.53 R is to enable the *appropriate regulator* to assess the extent, if any, to which a *firm's* assessment, calculated on a consolidated basis, is lower than it would be if each separate legal entity were to assess the amount of capital it would require to mitigate its risks (to the same level of confidence) were it not part of a group subject to consolidated supervision under ■ BIPRU 8 (Group risk - consolidation) or ■ INSPRU 6.1 (Group risk: Insurance groups). The reason the *appropriate regulator* wishes to make this assessment is so that individual capital *guidance* which it gives is fair and comparable as between different *firms* and groups. Group diversification benefits which a *firm* might assert exist can be a material consideration in a capital adequacy assessment. Understanding the methods used to aggregate the different risks (for example, the correlation assumptions) is crucial to a proper evaluation of such benefits.

1.2.56

FCA PRA

G

Whereas a single legal entity can generally use its capital to absorb losses wherever they arise, there are often practical and legal restrictions on the ability of a group to do so. For instance:

- (1) capital which is held by overseas regulated *firms* may not be capable of being remitted to a *firm* in the UK which has suffered a loss;
- (2) a *firm* which is insolvent or likely to become so may be obliged to look to the interests of its creditors first before transferring capital to other group *companies*; and
- (3) a parent *company* may have to balance the interests of its shareholders against the protection of the creditors of a *subsidiary undertaking* which is or might become insolvent and may, rationally, conclude that a *subsidiary undertaking* should be allowed to fail rather than provide capital to support it.

- (1) When the *overall financial adequacy rule* applies on a consolidated basis, the *firm* must ensure that at all times its group maintains overall financial resources, including capital resources and liquidity resources, which are adequate, both as to amount and quality, to ensure that there is no significant risk that the liabilities of any members of its group cannot be met as they fall due.
- (2) The group referred to in (1) is the relevant group as defined in ■ GENPRU 1.2.49 R.

- (3) The members of the group referred to in (1) must be identified in accordance with ■ GENPRU 1.2.49 R.

Documentation of risk assessments

1.2.60

FCA PRA

R

A *firm* must make a written record of the assessments required under this section. These assessments include assessments carried out on a consolidated basis and on a solo basis. In particular it must make a written record of:

- (1) the major sources of risk identified in accordance with ■ GENPRU 1.2.30 R (2) (Main requirement relating to risk processes, strategies and systems);
- (2) how it intends to deal with those risks; and
- (3) details of the stress tests and scenario analyses carried out, including any assumptions made in relation to scenario design, and the resulting financial resources estimated to be required in accordance with the *general stress and scenario testing rule*.

1.2.61

FCA PRA

A *firm* must retain the records of its assessments referred to in ■ GENPRU 1.2.60 R for at least three years.

1.2.62

FCA PRA

G

Where a *firm* assesses the adequacy of its *CRR* in its particular circumstances in accordance with ■ BIPRU 2.2 (Internal capital adequacy standards) and ■ INSPRU 7.1 (Individual capital assessment) as a basis for deciding what financial resources are adequate, it should include this in the documentation produced in accordance with ■ GENPRU 1.2.60 R.

Additional guidance on stress tests and scenario analyses

1.2.63

FCA PRA

G

The *general stress and scenario testing rule* requires a *firm* to carry out stress tests and scenario analyses as part of its obligations under the *overall Pillar 2 rule*. Both stress tests and scenario analyses are undertaken by a *firm* to further a better understanding of the vulnerabilities that it faces under adverse conditions. They are based on the analysis of the impact of a range of events of varying nature, severity and duration . These events can be financial, operational or legal or relate to any other risk that might have an economic impact on the *firm*.

1.2.64

FCA PRA

G

Stress testing typically refers to shifting the values of individual parameters that affect the financial position of a *firm* and determining the effect on the *firm's* financial position.

1.2.65

FCA PRA

G

Scenario analysis typically refers to a wider range of parameters being varied at the same time. Scenario analyses often examine the impact of adverse events on the *firm's* financial position, for example, simultaneous movements in a number of risk categories affecting all of a *firm's* business operations, such as business volumes, investment values and interest rate movements.

- 1.2.66**
FCA PRA G | There are three broad purposes of stress testing and scenario analysis. Firstly, it can be used as a means of quantifying how much capital might be absorbed if an adverse event or events occurred. As such it represents a simple 'what if' approach to estimating exposure to risks. This might be a proportionate approach to risk management for an unsophisticated business. Secondly, it can be used to provide a check on the outputs and accuracy of risk models; particularly, in identifying non-linear effects when aggregating risks. Thirdly, it can be used to explore the sensitivities in longer term business plans and how capital needs might change over time.
- 1.2.67**
G | [deleted]
- 1.2.68**
FCA PRA G | Subject to ■ GENPRU 1.2.76 G, the purpose of stress tests and scenario analyses under the *general stress and scenario testing rule* is to test the adequacy of overall financial resources. Scenarios need only be identified, and their impact assessed, in so far as this facilitates that purpose. In particular, the nature, depth and detail of the analysis depend, in part, upon the *firm's* capital strength and the robustness of its risk prevention and risk mitigation measures.
- 1.2.69**
FCA PRA G | Both stress testing and scenario analyses are forward-looking analysis techniques, which seek to anticipate possible losses that might occur if an identified risk crystallises. In applying them, a *firm* should decide how far forward to look. This should depend upon:
- (1) how quickly it would be able to identify events or changes in circumstances that might lead to a risk crystallising resulting in a loss; and
 - (2) after it has identified the event or circumstance, how quickly and effectively it could act to prevent or mitigate any loss resulting from the risk crystallising and to reduce exposure to any further adverse event or change in circumstance.
- 1.2.70**
FCA PRA G | Where a firm is exposed to *market risk*, the time horizon over which stress tests and scenario analyses should be carried out will depend on, among other things, the maturity and liquidity of the *positions* stressed. For example, for the *market risk* arising from the holding of investments, this will depend upon:
- (1) the extent to which there is a regular, open and transparent market in those assets, which would allow fluctuations in the value of the investment to be more readily and quickly identified; and
 - (2) the extent to which the market in those assets is sufficiently liquid (and would remain liquid in the changed circumstances contemplated in the stress test or scenario analysis) to allow the *firm*, if needed, to sell, hedge or otherwise mitigate the risks relating to its holding so as to prevent or reduce exposure to future price fluctuations. In devising stress tests and scenario analyses for *market risk*, a *BIPRU firm* should also take into account ■ BIPRU 7.1.17 R to ■ BIPRU 7.1.20 G.
- 1.2.71**
FCA PRA G | In identifying scenarios, and assessing their impact, a *firm* should take into account, where material, how changes in circumstances might impact upon:
- (1) the nature, scale and mix of its future activities; and

1.2.72

FCA PRA

G

In determining whether it would have adequate financial resources in the event of each identified realistic adverse scenario, a *firm* should:

- (2) the behaviour of *counterparties*, and of the *firm* itself, including the exercise of choices (for example, options embedded in financial instruments or *contracts of insurance*).

- (1) only include financial resources that could reasonably be relied upon as being available in the circumstances of the identified scenario; and
- (2) take account of any legal or other restriction on the use of financial resources.

Capital planning

1.2.73A

FCA PRA

G

- (1) In identifying an appropriate range of adverse circumstances and events in accordance with ■ GENPRU 1.2.42R (2):
 - (a) a *firm* will need to consider the cycles it is most exposed to and whether these are general economic cycles or specific to particular markets, sectors or industries;
 - (b) for the purposes of ■ GENPRU 1.2.42R (2)(a), the amplitude and duration of the relevant cycle should include a severe downturn scenario based on forward looking hypothetical events, calibrated against the most adverse movements in individual risk drivers experienced over a long historical period;
 - (c) the adverse scenarios considered should in general be acyclical and, accordingly, the scenario should not become more severe during a downturn and less severe during an upturn. However, the *appropriate regulator* does expect scenarios to be updated with relevant new economic data on a pragmatic basis to ensure that the scenario continues to be relevant; and
 - (d) the adverse scenarios considered should reflect a *firm's* risk tolerance of the adverse conditions through which it expects to remain a going concern.
- (2) In making the estimate required by ■ GENPRU 1.2.42R (3), a *firm* should project both its *capital resources* and its required *capital resources* over a time horizon of 3 to 5 years, taking account of its business plan and the impact of relevant adverse scenarios. In making the estimate, the *firm* should consider

both the *capital resources* required to meet its *CRR* and the *capital resources* needed to meet the *overall financial adequacy rule*. The *firm* should make these projections in a manner consistent with its risk management processes and systems as set out in ■ GENPRU 1.2.37 R.

- (3) In projecting its financial position over the relevant time horizon, the *firm* should:
 - (a) reflect how its business plan would "flex" in response to the adverse events being considered, taking into account factors such as changing consumer demand and changes to new business assumptions;
 - (b) consider the potential impact on its stress testing of dynamic feedback effects and second order effects of the major sources of risk identified in accordance with ■ GENPRU 1.2.30R (2);
 - (c) estimate the effects on the *firm's* financial position of the adverse event without adjusting for management actions;
 - (d) separately, identify any realistic management actions that the *firm* could and would take to mitigate the adverse effects of the stress scenario; and
 - (e) estimate the effects of the stress scenario on the *firm's* financial position after taking account of realistic management actions.
- (4) A *firm* should identify any realistic management actions intended to maintain or restore its capital adequacy. These could include ceasing to transact new business after a suitable period has elapsed, balance sheet shrinkage, restricting distribution of profits or raising additional capital. A *firm* should reflect management actions in its projections only where it could and would take such actions, taking account of factors such as market conditions in the stress scenario and any effects upon the *firm's* reputation with its counterparties and investors. The combined effect on capital and retained earnings should be estimated. In order to assess whether prospective management actions in a stress scenario would be realistic and to determine which actions the *firm* would and could take, the *firm* should take into account any preconditions that might affect the value of management actions as risk mitigants and analyse the difference between the estimates in (3)(c) and (3)(e) in sufficient detail to understand the implications of taking different management actions at different times, particularly where they represent a significant divergence from the *firm's* business plan.
- (5) The *firm* should document its stress testing and scenario analysis policies and procedures, as well as the results of its tests in accordance with ■ GENPRU 1.2.60 R. These records should be included within the *firm's* ICAAP or ICA submission document.
- (6) The *appropriate regulator* will review the *firm's* records referred to in (5) as part of its SREP. The purpose of examining these is to enable the *appropriate regulator* to judge whether a *firm* will be able to continue to meet its *CRR* and the *overall financial adequacy rule* throughout the projection period.
- (7) If, after taking account of realistic management actions, a *firm's* stress testing management plan shows that the *firm's* projected *capital resources* are less than those required to continue to meet its *CRR* or less than those needed to continue to meet the *overall financial adequacy rule* over the projection period, the *appropriate regulator* may require the *firm* to set out additional countervailing measures and off-setting actions to reduce such difference or to restore the *firm's* capital adequacy after the stress event.

(8) The *firm's* senior management or *governing body* should be actively involved and engaged in all relevant stages of the *firm's* stress testing and scenario analysis programme. This would include establishing an appropriate stress testing programme, reviewing the programme's implementation (including the design of scenarios) and challenging, approving and actioning the results of the stress tests.

The *appropriate regulator* may formulate macroeconomic and financial market scenarios which a *firm* may use as an additional input to its ICAAP or ICA submission. In addition, the *appropriate regulator* may also ask a *firm* to apply specific scenarios directly in its ICAAP or ICA submission.

1.2.73C

FCA PRA

For an *insurer*:

- (1) the treatment of new business when making capital projections is likely to be different from its ICA. In projecting its financial position, an *insurer* should take account of new business based on the *firm's* business plan, but flexed to take account of potential changes in trading conditions and strategy. When assessing its current capital adequacy under its ICA, an *insurer* should take account of the effects of closure to new business (see ■ GENPRU 1.2.27 G, ■ GENPRU 1.2.73AG (3) and ■ (4) and ■ INSPRU 7.1.16 G to ■ INSPRU 7.1.19 G). Also, an *insurer* may use methods that are more approximate than used for its ICA (for example, in projecting the *with-profits insurance capital component* for *realistic basis life firms* and the *capital resources* needed to meet the *overall financial adequacy rule*); and
- (2) where management discretion is exercised as a normal part of an *insurer's* business (for example, in changing bonus rates or *surrender values* in accordance with the PPFM for *with-profits business*), under ■ GENPRU 1.2.73AG (3)(c) the *insurer* does not need to estimate the effect of an adverse event on its financial position without adjusting for such changes. However, the effect on the financial position of varying such actions should be estimated and understood.

A *firm* may consider scenarios in which expected future profits will provide capital reserves against future risks. However, it would only be appropriate to take into account profits that can be foreseen with a reasonable degree of certainty as arising before the risk against which they are being held could possibly arise. FCA PRA

G

A *firm* should use the results of its stress testing and scenario analysis not only to assess capital needs, but also to decide if measures should be put in place to minimise the adverse effect on the *firm* if the risk covered by the stress or scenario test actually materialises. Such measures might be a contingency plan or might be more concrete risk mitigation steps.

FCA PRA

Additional *guidance* on stress tests and scenario analyses for the assessment of *capital resources* is available in ■ BIPRU 2.2 (Internal capital adequacy standards) and ■ INSPRU 7.1 (Individual capital assessment).

Additional *guidance* in relation to stress tests and scenario analysis for *liquidity risk* as that concept relates to an *insurer* is available in ■ SYSC 11 (Liquidity risk systems and controls).

1.2.78A

FCA

G

■ BIPRU 12 sets out the main *Handbook* provisions in relation to *liquidity risk* for a *BIPRU firm*.

Pension obligation risk

1.2.79

FCA PRA

G

■ GENPRU 1.2.80 G to ■ GENPRU 1.2.86 G contain *guidance* on the assessment required by ■ GENPRU 1.2.30 R (2)(k) for a *firm* exposed to pension obligation risk as defined in ■ GENPRU 1.2.31R (5).

1.2.80

FCA PRA

G

The pension scheme itself (i.e. the scheme's assets and liabilities) is not the focus of the risk assessment but rather the *firm's* obligations towards the pension scheme . A *firm* should include in its estimate of financial resources both its expected obligations to the pension scheme and any increase in obligations that may arise in a stress scenario.

1.2.81

FCA PRA

G

If a *firm* has a current funding obligation in excess of normal contributions or there is a risk that such a funding obligation will arise then, when calculating available capital resources, it should reverse out any accounting deficit and replace this in its capital adequacy assessment with its best estimate, calculated in discussion with the scheme's actuaries or trustees, of the cash that will need to be paid into the scheme in addition to normal contributions over the foreseeable future. This may differ from the approach taken in assessing pension scheme risks for the purposes of calculating resources to meet the *CRR*, where a *firm* may not need to consider funding obligations beyond the next five years.

1.2.82

FCA PRA

G

A *firm* should also assess the risks that may increase its current funding obligations towards the pension scheme and that might lead to the *firm* not being able to pay its other liabilities as they fall due.

1.2.83

FCA PRA

G

A *firm* may wish to consider the following scenarios:

- (1) one in which the *firm* gets into difficulties with an effect on its ability to fund the pension scheme; and
- (2) one in which the pension scheme position deteriorates (for example, because investment returns fall below expected returns or because of increases in life expectancy) with an effect on the *firm's* funding obligations; taking into account the management actions the *firm* could and would take.

1.2.83A

FCA PRA

G

A *firm* is expected to determine where the scope of any stress test impacts upon its pension obligation risk and estimate how the relevant measure of pension obligation risk will change in the scenario in question. For example, in carrying out stress tests under ■ GENPRU 1.2.42 R a *firm* must consider how a stress scenario, such as an economic recession, would impact on the *firm's* current obligations towards its pension scheme and any potential increase in those obligations. Risks such as interest rate risk or reduced investment returns may have a direct impact on a *firm's* financial position as well as an indirect impact resulting from an increase in the *firm's* pension scheme obligations. Both effects should be taken into account in a *firm's* estimate of financial resources under ■ GENPRU 1.2.30 R.

1.2.84

FCA PRA

G

Scenarios in which a *firm's* employees suffer a loss or members of a pension scheme suffer a loss do not necessarily affect the *firm's* ability to pay its liabilities as they fall due.

1.2.85

FCA PRA

G

A *firm* should consider issues such as:

- (1) the extent to which trustees of the pension scheme or a pension regulator (such as the one created under the Pensions Act 2004) can compel a certain level of contributions or a one-off payment in adverse financial situations or in order to meet the minimum legal requirements under the scheme's trust deed and rules or under the applicable laws relating to the pension scheme;
- (2) whether the valuation bases used to set pension scheme contribution rates are consistent with the *firm's* current business plans and anticipated changes in the workforce; and
- (3) which valuation basis is appropriate given the expected investment return on scheme assets and actions the *firm* can take if those returns do not materialise.

1.2.86

FCA PRA

G

A *firm* should carry out analyses only to a degree of sophistication and complexity which is commensurate with the materiality of its pension risks.

Group risk

1.2.87

FCA PRA

G

■ GENPRU 1.2.88G to ■ GENPRU 1.2.91G contain additional *guidance* on the assessment required by ■ GENPRU 1.2.30R (2)(I) (Group risk).

1.2.88

FCA PRA

G

A *firm* should include in the written record referred to in ■ GENPRU 1.2.60 R a description of the broad business strategy of the *insurance group*, the *UK consolidation group* or the *non-EEA sub-group* of which it is a member, the group's view of its principal risks and its approach to measuring, managing and controlling the risks. This description should include the role of stress testing, scenario analysis and contingency planning in managing risk at the solo and consolidated level.

1.2.89

FCA PRA

G

A *firm* should satisfy itself that the systems (including IT) of the *insurance group*, the *UK consolidation group* or the *non-EEA sub-group* of which it is a member are sufficiently sound to support the effective management and, where applicable, the quantification of the risks that could affect the *insurance group*, the *UK consolidation group* or the *non-EEA sub-group*, as the case may be.

1.2.90

FCA PRA

G

In performing stress tests and scenario analyses, a *firm* should take into account the risk that its *group* may have to bring back on to its consolidated balance sheet the assets and liabilities of off-balance sheet entities as a result of reputational contagion, notwithstanding the appearance of legal risk transfer.

1.2.91

FCA PRA

G

A *firm* should carry out stress tests and scenario analyses to a degree of sophistication which is commensurate with the complexity of its group and the nature of its *group* risk.

(2) This section of the *Handbook* also applies to a *UK ISPV*.

Purpose

1.3.2

FCA PRA

G

This section sets out, for the purposes of *GENPRU*, *BIPRU* and *INSPRU*, *rules* and *guidance* as to how a *firm* should recognise and value assets, liabilities, *exposures*, equity and income statement items.

1.3.3

FCA

- (1) In the case of a *BIPRU firm*, this section implements Articles 64(4) and 64(5) of the *Banking Consolidation Directive* (Own funds) and Article 33 and Part B of Annex VII of the *Capital Adequacy Directive*.
- (2) In the case of an *insurer*, ■ GENPRU 1.3.4 R implements the requirements of Articles 23.3(viii) and 24.2(iv) of the .

1.3.4

FCA PRA

R

General requirements: Accounting principles to be applied

Subject to ■ GENPRU 1.3.9 R to ■ GENPRU 1.3.10 R and ■ GENPRU 1.3.36 R, except where a *rule* in *GENPRU*, *BIPRU* or *INSPRU* provides for a different method of recognition or valuation, whenever a *rule* in *GENPRU*, *BIPRU* or *INSPRU* refers to an asset, liability, *exposure*, equity or income statement item, a *firm* must, for the purpose of that *rule*, recognise the asset, liability, *exposure*, equity or income statement item and measure its value in accordance with whichever of the following are applicable:

- (1) the *insurance accounts rules*, or the Friendly Societies (Accounts and Related Provisions) Regulations 1994;
- (2) Financial Reporting Standards and Statements of Standard Accounting Practice issued or adopted by the Accounting Standards Board;
- (3) Statements of Recommended Practice, issued by industry or sectoral bodies recognised for this purpose by the Accounting Standards Board;
- (4) [deleted]
- (5) *international accounting standards*;
- (6) the Companies Act 1985; and
- (7) the Companies Act 2006;

as applicable to the *firm* for the purpose of its external financial reporting (or as would be applicable if the *firm* was a company with its head office in the *United Kingdom*).

1.3.5

FCA PRA

G

Except where a *rule* in *GENPRU*, *BIPRU* or *INSPRU* makes different provision, ■ GENPRU 1.3.4 R applies whenever a *rule* in *GENPRU*, *BIPRU* or *INSPRU* refers to the value or amount of an asset, liability, *exposure*, equity or income statement item, including:

- (1) whether, and when, to recognise or de-recognise an asset or liability;
- (2) the amount at which to value an asset, liability, *exposure*, equity or income statement item; and
- (3) which description to place on an asset, liability, *exposure*, equity or income statement item.

PAGE

1.3.6

FCA PRA

G

In particular, unless an exception applies, ■ GENPRU 1.3.4 R should be applied for the purposes of *GENPRU*, *BIPRU* or *INSPRU* to determine how to account for:

- (1) netting of amounts due to or from the *firm*;
- (2) the securitisation of assets and liabilities (see also ■ GENPRU 1.3.7 G);

- (3) leased tangible assets;
- (4) assets transferred or received under a sale and repurchase or *stock lending* transaction; and
- (5) assets transferred or received by way of initial or variation margin under a *derivative* or similar transaction.

1.3.7

PRA

G

In the case of an *insurer* or a *UK ISPV*, where assets or liabilities are securitised, ■ GENPRU 1.3.4 R only permits de-recognition where Financial Reporting Standards (or, where applicable, International Accounting Standards) permit either de-recognition or the linked presentation. However, the *PRA* will consider granting a *waiver* to permit de-recognition in other circumstances provided that the *firm* can demonstrate that securitisation has effectively transferred risk

1.3.8

PRA

G

Articles 23.3(viii) and 24.2(iv) of the *Consolidated Life Directive* require assets of an *insurer* that are managed on its behalf by a *subsidiary undertaking* to be taken into account for the purposes of determining the *insurer's admissible assets* and its assets in excess of concentration limits. The application of ■ GENPRU 1.3.4 R will result in such assets remaining on the balance sheet of the *insurer*.

General requirements: Adjustments to accounting values

1.3.9

FCA PRA

R

For the purposes of *GENPRU*, *BIPRU* or *INSPRU*, except where a *rule* in *GENPRU*, *BIPRU* or *INSPRU* provides for a different method of recognition or valuation:

- (1) when a *firm*, upon initial recognition, designates its liabilities as at fair value through profit or loss, it must always adjust any value calculated in accordance with ■ GENPRU 1.3.4 R by subtracting any unrealised gains or adding back in any unrealised losses which are not attributable to changes in a benchmark interest rate;
- (2) in respect of a *defined benefit occupational pension scheme*:
 - (a) a *firm* must derecognise any *defined benefit asset*;
 - (b) a *firm* may substitute for a *defined benefit liability* the *firm's deficit reduction amount*.

1.3.10

FCA PRA

R

An election made under ■ GENPRU 1.3.9 R (2) must be applied consistently for the purposes of *GENPRU*, *BIPRU* or *INSPRU* in respect of any one financial year.

1.3.11

FCA PRA

G

A *firm* should keep a record of and be ready to explain to its supervisory contacts in the *appropriate regulator* the reasons for any difference between the *deficit reduction amount* and any commitment the *firm* has made in any public document to provide funding in respect of a *defined benefit occupational pension scheme*.

1.3.12

FCA PRA

G

The provisions of ■ GENPRU 1.3.9 R to ■ GENPRU 1.3.10 R and ■ GENPRU 1.3.36 R apply only to the extent that the items referred to in those paragraphs would otherwise be recognised under the accounting requirements applicable to the *firm*. Some of those requirements may only be relevant to a *firm* subject to *international accounting standards*.

1.3.13

FCA PRA

R

General requirements: Methods of valuation and systems and controls

- (1) Except to the extent that *GENPRU*, *BIPRU* or *INSPRU* provide for another method of valuation, ■ GENPRU 1.3.14 R to ■ GENPRU 1.3.34 R (Marking to market, Marking to model, Independent price verification, Valuation adjustments or, in the case of an insurer or a UK ISPV, valuation adjustments or reserves) apply:
 - (a) for the purposes set out in ■ GENPRU 1.3.41 R;
 - (b) for the purposes set out in ■ GENPRU 1.3.39 R; and
 - (c) to any balance sheet position measured at market value or fair value.
- (2) A *firm* must establish and maintain systems and controls sufficient to provide prudent and reliable valuation estimates.
- (3) Systems and controls under (2) must include at least the following elements:
 - (a) documented policies and procedures for the process of valuation, including clearly defined responsibilities of the various areas involved in the determination of the valuation, sources of market information and review of their appropriateness, frequency of independent valuation, timing of closing prices, procedures for adjusting valuations, month-end and ad-hoc verification procedures, and, in the case of a *BIPRU firm*, guidelines for the use of unobservable inputs reflecting the *firm's* assumptions of what market participants would use in pricing the *position*; and
 - (b) reporting lines for the department accountable for the valuation process that are:
 - (i) clear and independent of the front office; and
 - (ii) ultimately to a main board executive director.

General requirements: Marking to market

Wherever possible, a *firm* must use mark to market in order to measure the value of the investments and positions to which this *rule* applies under ■ GENPRU 1.3.13 R and ■ GENPRU 1.3.38 R to ■ GENPRU 1.3.41 R. Marking to market is valuation (on at least a daily basis in the case of the *trading*

1.3.14

book positions of a *BIPRU firm*) at readily available close out prices from independent sources.

1.3.15

FCA PRA

R

For the purposes of ■ GENPRU 1.3.14 R, examples of readily available close out prices include exchange prices, screen prices, or quotes from several independent reputable brokers.

1.3.16

FCA PRA

R

- (1) When marking to market, a *firm* must use the more prudent side of bid/offer unless the *firm* is a significant market maker in a particular position type and it can close out at the mid-market price.
- (2) When calculating the current *exposure* value of a credit risk *exposure* for *counterparty credit risk* purposes:
 - (a) a *firm* must use the more prudent side of bid/offer or the mid-market price and the *firm* must be consistent in the basis it chooses; and
 - (b) where the difference between the more prudent side of bid/offer and the mid-market price is material, the *firm* must consider making adjustments or, in the case of an *insurer* or a *UK ISPV*, making adjustments or establishing reserves.

General requirements: Marking to model

1.3.17

FCA PRA

R

Where marking to market is not possible, a *firm* must (in the case of a *BIPRU firm*, conservatively) use mark to model in order to measure the value of the investments and positions to which this *rule* applies under ■ GENPRU 1.3.13 R and ■ GENPRU 1.3.38 R to ■ GENPRU 1.3.41 R. Marking to model is any valuation which has to be benchmarked, extrapolated or otherwise calculated from a market input. ■ GENPRU 1.3.18 R to ■ GENPRU 1.3.25 R apply when marking to model.

1.3.18

FCA PRA

R

When the model used is developed by the *firm*, that model must be:

- (1) based on appropriate assumptions which have been assessed and challenged by suitably qualified parties independent of the development process;
- (2) independently tested, including validation of the mathematics, assumptions, and software implementation; and
- (3) (in the case of a *BIPRU firm*) developed or approved independently of the front office.

1.3.19

FCA PRA

R

A *firm* must ensure that its senior management are aware of the positions which are subject to mark to model and understand the materiality of the uncertainty this creates in the reporting of the performance of the business of the *firm* and the risks to which it is subject.

- 1.3.20 **R** A *firm* must source market inputs in line with market prices so far as possible and assess the appropriateness of the market inputs for the position being valued and the parameters of the model on a frequent basis.
FCA PRA
- 1.3.21 **R** A *firm* must use generally accepted valuation methodologies for particular products where these are available.
FCA PRA
- 1.3.22 **R** A *firm* must establish formal change control procedures, hold a secure copy of the model, and periodically use that model to check valuations.
FCA PRA
- 1.3.23 **R** A *firm* must ensure that its risk management functions are aware of the weaknesses of the models used and how best to reflect those in the valuation output.
FCA PRA
- 1.3.24 **R** A *firm* must periodically review the model to determine the accuracy of its performance.
FCA PRA
- 1.3.25 **R** Examples of periodical review are assessing the continued appropriateness of the assumptions, analysis of profit and loss versus risk factors and comparison of actual close out values to model outputs.
FCA PRA

General requirements: Independent price verification

- 1.3.26 **R** In addition to marking to market or marking to model, a *firm* must perform independent price verification. This is the process by which market prices or model inputs are regularly verified for accuracy and independence.
FCA PRA
- 1.3.27 **G** For independent price verification, where independent pricing sources are not available or pricing sources are more subjective (for example, only one available broker quote), prudent measures such as valuation adjustments may be appropriate.
FCA PRA
- 1.3.28 **R** In the case of the *trading book* positions of a *BIPRU firm*, while daily marking to market may be performed by dealers, verification of market prices and model inputs must be performed by a unit independent of the dealing room, at least monthly (or, depending on the nature of the market/trading activity, more frequently).
FCA PRA

General requirements: Valuation adjustments or, in the case of an insurer or a UK ISPV, valuation adjustments or reserves

- 1.3.29 **R** The recognition of any gains or losses arising from valuations subject to ■ GENPRU 1.3.13 R and ■ GENPRU 1.3.38 R to ■ GENPRU 1.3.41 R must be recognised for the purpose of calculating *capital resources* in accordance with ■ GENPRU 1.3.14 R to ■ GENPRU 1.3.34 R (Marking to market, Marking to model, Independent price verification, Valuation adjustments or, in the case of an insurer or a UK ISPV, valuation adjustments or reserves). However if *GENPRU*, *BIPRU* or *INSPRU* provide for another treatment of such gains or losses, that other treatment must be applied.
FCA PRA

1.3.30

FCA PRA

R

A *firm* must establish and maintain procedures for considering valuation adjustments or, in the case of an *insurer* or a *UK ISPV*, valuation adjustments or reserves. These procedures must be compliant with the requirements set out in ■ GENPRU 1.3.33 R.

1.3.31

FCA PRA

R

A *firm* using third-party valuations, or marking to model, must consider whether valuation adjustments are necessary.

1.3.32

FCA PRA

R

A *firm* must consider the need for making adjustments or, in the case of an *insurer* or a *UK ISPV*, establishing reserves for less liquid positions and, on an ongoing basis, review their continued appropriateness in accordance with the requirements set out in ■ GENPRU 1.3.33 R. Less liquid positions could arise from both market events and institution-related situations e.g. concentration positions and/or stale positions.

1.3.33

FCA PRA

R

- (1) This paragraph sets out the requirements referred to in ■ GENPRU 1.3.30 R and ■ GENPRU 1.3.32 R.
- (2) A *firm* must consider the following adjustments or, in the case of an *insurer* or a *UK ISPV*, adjustments or reserves: unearned credit spreads, close-out costs, operational risks, early termination, investing and funding costs, future administrative costs and, where appropriate, model risk.
- (3) (a) In the case of a *BIPRU firm*, a *firm* must establish and maintain procedures for calculating adjustments to the current valuation of less liquid positions. Those adjustments must, where necessary, be in addition to any changes to the value of the position required for financial reporting purposes and must be designed to reflect the illiquidity of the position.
 - (b) A *firm* must consider several factors when determining whether a valuation adjustment or, in the case of an *insurer* or a *UK ISPV*, valuation adjustment or reserve is necessary for less liquid positions. These factors include the amount of time it would take to hedge out the position/risks within the position; the average and volatility of bid/offer spreads; the availability of market quotes (number and identity of market makers); the average and volatility of trading volumes; market concentrations; the ageing of positions; the extent to which valuation relies on marking to model and the impact of other model risks.
- (4) With regard to complex products including, but not limited to, *securitisation exposures* and *nth-to-default credit derivatives*, a *BIPRU firm* must explicitly consider the need for valuation adjustments for model risk arising from using a valuation which

may be incorrect or the risk from using unobservable calibration parameters in the valuation model.

1.3.34

FCA PRA

R

If the result of making adjustments or, in the case of an *insurer* or a *UK ISPV*, making adjustments or establishing reserves under ■ GENPRU 1.3.29 R to ■ GENPRU 1.3.33 R is a valuation which differs from the fair value determined in accordance with ■ GENPRU 1.3.4 R, a *firm* must reconcile the two valuations.

1.3.35

FCA PRA

G

Reconciliation differences under ■ GENPRU 1.3.34 R should not be reflected in the valuations under ■ GENPRU 1.3 but should be disclosed to the *appropriate regulator* in prudential returns. *Firms* which are subject to the reporting requirement under ■ SUP 16.16 should disclose those reconciliation differences in the Prudent Valuation Return which they are required to submit to the *appropriate regulator* under ■ SUP 16.16.4 R.

 - (a) the fair value reserves related to gains or losses on cash flow hedges of financial instruments measured at amortised cost; or
 - (b) any unrealised gains or losses on debt instruments held, or formerly held, in the available-for-sale category.

PRA

R For the purposes of ■ GENPRU 1.3.47 R (1), the regulatory surplus value of an *undertaking* referred to in ■ GENPRU 1.3.43 R (1) or ■ GENPRU 1.3.43 R (3) is, subject to ■ GENPRU 1.3.49 R, the sum of:

- (1) the total capital after deductions of the *undertaking*; less
- (2) the *individual capital resources requirement* of the *undertaking*.

1.3.49

PRA

R (1) Subject to ■ GENPRU 1.3.50 R, for the purposes of ■ GENPRU 1.3.48 R, only the relevant proportion of the:

- (a) total capital after deductions of the *undertaking*; and
- (b) *individual capital resources requirement* of the *undertaking*; is to be taken into account.

(2) In (1), the relevant proportion is the proportion of the total number of *shares* issued by the *undertaking* held, directly or indirectly, by the *firm*.

1.3.50

PRA

R If the *individual capital resources requirement* of an *undertaking* in ■ GENPRU 1.3.43 R (1) that is a *subsidiary undertaking* exceeds total capital after deductions, then the full amount of the items referred to in ■ GENPRU 1.3.49 R (1) must be taken into account for the purposes of ■ GENPRU 1.3.48 R.

1.3.51

PRA

R For the purposes of ■ GENPRU 1.3.47 R to ■ GENPRU 1.3.50 R:

- (1) in relation to an *undertaking* referred to in ■ GENPRU 1.3.43 R (1):
 - (a) subject to (2), *individual capital resources requirement* has the meaning given by ■ INSPRU 6.1.34 R;
 - (b) total capital after deductions means:
 - (i) when used in relation to a *regulated related undertaking* that is subject to the *capital resources table*, the total capital after deductions (as calculated at stage M of the *capital resources table*) of the *undertaking*; and
 - (ii) when used in relation to a *regulated related undertaking* that is not subject to the *capital resources table*, the total capital after deductions calculated as if that *undertaking* were required to calculate its total capital after deductions in accordance with stage M of the calculation in the *capital resources table*, but with such adjustments being made to secure that the *undertaking's* calculation of its total capital after deductions complies with the relevant *sectoral rules* applicable to it; and

(c) ineligible surplus capital has the meaning given by
 ■ INSPRU 6.1.67 R;

- (2) in relation to an *undertaking* referred to in ■ GENPRU 1.3.43 R (3),
- (a) the *individual capital resources requirement* is zero; and
 - (b) the total capital after deductions means the total capital after deductions of the *undertaking* calculated as if the *undertaking* were an *insurance holding company* required to calculate its total capital resources in accordance with the *capital resources table* but with such adjustments being made to secure that the *undertaking's* calculation of its total capital after deductions complies with the *sectoral rules* for the *insurance sector*.

1.3.52
 PRA

G ■ GENPRU 1.3.47 R to ■ GENPRU 1.3.51 R set out several different valuation bases for an *insurer's shares* in *related undertakings*. The *regulatory surplus value* (defined in ■ GENPRU 1.3.48 R) measures the *related undertaking's* own capital surplus or deficit. This is used: (i) in ■ GENPRU 1.3.47 R as a basis for calculating the impact on the firm's position of its investments in *related undertakings*; and (ii) in ■ INSPRU 6.1 as a starting point for the calculation of ineligible surplus capital.

1.3.53
 PRA

G ■ GENPRU 1.3.47 R determines how, for the purposes of the solo capital adequacy calculation of an *insurer*, that *insurer's capital resources* should be adjusted to take into account its investments in *related undertakings*.

1.3.54
 PRA

G The *rules* that specify how, for the purposes of the adjusted solo capital calculation, an *insurer* should incorporate its *related undertakings* into its *capital resources* and *capital resources requirement* are set out in ■ INSPRU 6.1.

Insurance Special Purpose Vehicles

1.3.55
 PRA

R Except where a *rule* in *GENPRU* or *INSPRU* makes a different provision, an *insurer* must not place any value on amounts recoverable from an *ISPV* for the purposes of any *rule* in *GENPRU* or *INSPRU*.

1.3.56
 PRA

G An *insurer* may value amounts recoverable from an *ISPV* if it obtains a *waiver* of ■ GENPRU 1.3.55 R under section 138A of the *Act*. The conditions that will need to be met, in addition to the statutory tests under section 138A(4) of the *Act*, before the *PRA* will consider granting such a *waiver* are set out in ■ INSPRU 1.6.13 G to ■ INSPRU 1.6.18 G.

General insurance business: Community co-insurance operations -

PAGE 37
 1.3.57
 PRA

R Where a *relevant insurer* determines the amount of a liability in order to make provision for outstanding *claims* under a *Community co-insurance operation*, then, if the *leading insurer* has informed the *relevant insurer* of the amount of the provision made by the *leading insurer* for such *claims*, the amount determined by the *relevant insurer*:

- (1) must be at least as great as the amount of the provision made by the *leading insurer*; or
- (2) in a case where it is not the practice in the *United Kingdom* to make such provision separately, must be sufficient, when all liabilities are taken into account, to include provision at least as great as that made by the *leading insurer* for such *claims*,
due regard being had in either case to the proportion of the risk covered by the *relevant insurer* and by the *leading insurer* respectively.

1.4 Actions for damages

1.4.1

FCA

R

A contravention of the *rules* in GENPRU does not give rise to a right of action by a *private person* under section 138D of the *Act* (and each of those *rules* is specified under section 138D(3) of the *Act* as a provision giving rise to no such right of action).

1.5 Application of GENPRU 1 to Lloyd's

Application of GENPRU 1.2

1.5.1
PRA

R ■ GENPRU 1.2 applies to *managing agents* and to the *Society* in accordance with:

- (1) for *managing agents*, ■ INSPRU 8.1.4 R; and
- (2) for the *Society*, ■ INSPRU 8.1.2 R.

1.5.2
PRA

R ■ GENPRU 1.5.7 R applies to *members*, pursuant to the *insurance market direction* in ■ GENPRU 1.5.5 D.

Insurance market direction

1.5.3
PRA

G The *insurance market direction* in ■ GENPRU 1.5.5 D is given under section 316(1) of the *Act* (Direction by Authority) and applies to *members*.

1.5.4
PRA

G The purpose of the *insurance market direction* in ■ GENPRU 1.5.5 D is to enable the *PRA* to make the rule in ■ GENPRU 1.5.7 R applying to *members*, in order to:

- (1) protect *policyholders* against the risk that *members* may not have adequate financial resources to meet liabilities under or in respect of *contracts of insurance* as they fall due;
- (2) promote confidence in the market at Lloyd's by requiring *members* to maintain financial resources which are adequate to meet their liabilities.

1.5.5
PRA

D With effect from 1 January 2005, Part 9A of the *Act* (Rules and Guidance) applies to the *members* of the *Society* taken together in relation to the *insurance market activities* of *effecting and carrying out contracts of insurance* written at Lloyd's, for the purpose of applying the *rules and guidance* in ■ GENPRU 1.5.7 R to ■ GENPRU 1.5.9 G.

1.5.6
PRA

G Part 9A of the *Act* is a *core provision* specified in section 317(1) of the *Act* (The core provisions). Section 317(2) provides that references in an applied *core provision* to an *authorised person* are to be read as references to a *person* in the class to which the *insurance market direction* applies. From 1 January 2005, references in Part 9A of the *Act* are to be read as references to *members* for the purposes of ■ GENPRU 1.5.7 R to ■ GENPRU 1.5.9 G.

Members' obligation to maintain adequate financial resources

1.5.7
PRA

R

The *members* taken together must at all times maintain overall financial resources, including capital and liquidity resources, that are adequate, both as to amount and quality, to ensure that there is no significant risk that liabilities under or in respect of *contracts of insurance* written at Lloyd's will not be met as they fall due.

1.5.8
PRA

G

Under GENPRU:

- (1) *managing agents* must ensure that adequate financial resources are available to support the *insurance business* carried on through each *syndicate* that they manage; and
- (2) the *Society* must, having regard to the availability and value of the *central assets*, ensure that the financial resources supporting the *insurance business* of each *member* are adequate at all times.

1.5.9
PRA

G

In practice, compliance with the requirements described in ■ GENPRU 1.5.8 G is likely to have the effect that *members* comply with ■ GENPRU 1.5.7 R.

Application of GENPRU 1.3

1.5.10
PRA

R

■ GENPRU 1.3 applies to *managing agents* and to the *Society* in accordance with:

- (1) for *managing agents*, ■ INSPRU 8.1.4 R; and
- (2) for the *Society*, ■ INSPRU 8.1.2 R.

Amounts receivable but not yet received

1.5.11
PRA

R

When recognising and valuing assets that are available to meet liabilities arising from a *member's insurance business*, neither the *Society* nor *managing agents* may attribute any value to any amounts receivable but not yet received from that *member* or another *member*, except for:

- (1) timing differences provided that a corresponding amount has been deducted from *syndicate assets* or *funds at Lloyd's*;
- (2) the *Society's callable contributions*, which are valued according to ■ GENPRU 1.5.17 R to ■ GENPRU 1.5.18 R; and
- (3) debts owed by a *member* to another *member* of the *Society* where the debt is a liability arising out of the *insurance business* he carries on at Lloyd's.

Letters of credit, guarantees and life assurance policies

1.5.12
PRA

R

When recognising and valuing assets held as *members' funds at Lloyd's* the *Society* may, if the conditions in ■ GENPRU 1.5.13 R are satisfied,

attribute a value to letters of credit and guarantees that it holds in respect of a *member's insurance business*.

1.5.13
PRA

R The conditions referred to in ■ GENPRU 1.5.12 R are that letters of credit and guarantees must be:

- (1) in the form prescribed by the *Society* from time to time and notified to the *PRA*; and
- (2) issued by a *credit institution* or an *insurance undertaking*.

1.5.14
PRA

R When recognising and valuing assets held as *members' funds at Lloyd's* the *Society* may attribute a value to verifiable sums arising out of life assurance policies.

1.5.15
PRA

R The *Society* must value any letter of credit, guarantee or life assurance policy at its net realisable value. The *Society* must make all appropriate deductions, including those in respect of:

- (1) the expenses of realisation; and
- (2) any reduction in value that would be likely to occur if the asset needed to be realised at short notice to meet liabilities falling due earlier than expected.

1.5.16
PRA

R If a *member* relies on a value attributed to a letter of credit or guarantee to meet any applicable *capital resources requirement* and that letter of credit or guarantee will expire in less than one month, the *Society* must take appropriate steps to ensure that the applicable *capital resources requirement* will continue to be met, including taking steps to ensure that sums due under the letter of credit or guarantee are drawn down when due and carried to the appropriate *Lloyd's trust fund*.

The Society's callable contributions

1.5.17
PRA

R For the purposes of ■ GENPRU 1.5.15 R (2), the amount assumed to be callable from a *member* must not exceed the lower of:

- (1) the maximum *callable contribution* that *member* is or may be liable to make in that *financial year*; and
- (2) the amount by which the *member's own capital resources* exceed the *member's own capital resources requirement*.

1.5.18
PRA

R The *Society* must value *callable contributions* taking appropriate account of any legal, constructive or other limits on its ability to call for contributions from *members* or to realise the amount called.

1.5.19
PRA

R The *Society* must give the *PRA* adequate advance notice if it proposes to change the maximum amount of the *callable contribution* that *members* may be liable to make in any *financial year*.

1.5.20
PRA

G The *PRA* would normally expect not less than six months' notice under ■ GENPRU 1.5.19 R.

Liabilities

1.5.21
PRA

R Subject to ■ GENPRU 1.5.22 R, the *Society* must recognise and value all of a *member's* liabilities in respect of its *insurance business*.

1.5.22
PRA

R The *Society* need not recognise or value a *member's* liabilities that are recognised and valued at *syndicate* level by *managing agents* in accordance with ■ GENPRU 1.3.

1.5.23
PRA

R For the purposes of calculating a *member's capital resources*, when valuing a *member's funds at Lloyd's* the *Society* must deduct the value of a *member's* liabilities determined under ■ GENPRU 1.5.21 R.

1.5.24
PRA

G The liabilities to be valued under ■ GENPRU 1.5.21 R and deducted under ■ GENPRU 1.5.23 R include:

- (1) amounts owing to *members' agents*;
- (2) amounts owing to the *Society*;
- (3) an appropriate accrual for tax payable on any profits;
- (4) (where required under any applicable accounting principle in accordance with ■ GENPRU 1.3.4 R), any contingent liability relating to liabilities reinsured into Equitas Reinsurance Ltd; and
- (5) amounts apportioned to *members* in respect of the *credit equalisation provision* in ■ INSPRU 1.4.

1.5.25
PRA

R In recognising and valuing a *member's* liabilities, the *Society* and *managing agents* may, to the extent permitted by applicable accounting principles, leave out of account the liabilities in respect of 1992 and prior *general insurance business* reinsured by Equitas Reinsurance Limited.

1.5.26
PRA

G There may be contingent liabilities associated with the reinsurance into Equitas. ■ GENPRU 1.3 requires *managing agents* and the *Society* to treat those contingent liabilities in accordance with applicable accounting principles: see ■ GENPRU 1.3.4 R. Depending on the circumstances, *managing agents* or the *Society* may need to disclose or account for such a liability.

Capital

2.1 Calculation of capital resources requirements

Application

2.1.1

FCA

R

This section applies to:

- (1) a *BIPRU firm*; and
- (2) an *insurer*, unless it is:
 - (a) a *non-directive friendly society*; or
 - (b) a *Swiss general insurer*; or
 - (c) an *EEA-deposit insurer*; or
 - (d) an *incoming EEA firm*; or
 - (e) an *incoming Treaty firm*.

2.1.1A

PRA

R

Except as indicated in SUP 2.1.60R, this section applies to an *insurer*, unless it is:

- (1) a *non-directive friendly society*; or
- (2) a *Swiss general insurer*; or
- (3) an *EEA-deposit insurer*; or
- (4) an *incoming EEA firm*; or
- (5) an *incoming Treaty firm*.

2.1.2

FCA

PRA

G

The scope of application of this section is not restricted to *firms* that are subject to the relevant *EU Directives*.

2.1.3

FCA

PRA

R

- (1) This section applies to a *firm* in relation to the whole of its business, except where a particular provision provides for a narrower scope.

(2) Where an *insurer* carries on both *long-term insurance business* and *general insurance business*, except where a particular provision provides otherwise, this section applies separately to each type of business.

2.1.4 FCA PRA G The adequacy of a *firm's capital resources* needs to be assessed in relation to all the activities of the *firm* and the risks to which they give rise.

2.1.5 FCA PRA G The requirements in this section apply to a *firm* on a solo basis.

Purpose

2.1.6 FCA PRA G *Principle 4* requires a *firm* to maintain adequate financial resources. ■ GENPRU 2 sets out provisions that deal specifically with the adequacy of that part of a *firm's* financial resources that consists of *capital resources*. The adequacy of a *firm's capital resources* needs to be assessed both by that *firm* and the *appropriate regulator*. Through its *rules*, the *appropriate regulator* sets minimum *capital resources requirements* for *firms*. It also reviews a *firm's* own assessment of its capital needs, and the processes and systems by which that assessment is made, in order to see if the minimum *capital resources requirements* are appropriate (see ■ GENPRU 1.2 (Adequacy of financial resources), ■ BIPRU 2.2 (Internal capital adequacy standards) and ■ INSPRU 7.1 (Individual capital assessment)).

2.1.7 FCA PRA G This section sets *capital resources requirements* for a *firm*. ■ GENPRU 2.2 (Capital resources) sets out how, for the purpose of meeting *capital resources requirements*, the amounts or values of capital, assets and liabilities are to be determined. More detailed *rules* relating to capital, assets and liabilities are set out in ■ GENPRU 1.3 (Valuation) and, for an *insurer*, INSPRU and, for a BIPRU *firm*, BIPRU.

2.1.8 FCA G

(1) [deleted]

(2) This section also implements the third paragraph of article 95(2) of the *EU CRR* applying the provisions of the *Capital Adequacy Directive* and *Banking Consolidation Directive* concerning the level of *capital resources* which a BIPRU *firm* is required to hold. In particular it implements (in part) article 75 of the *Banking Consolidation Directive* and Articles 5, 9, 10 and 18 of the *Capital Adequacy Directive*.

(3) [deleted]

2.1.8A PRA G This section implements minimum EC standards for the *capital resources* required to be held by an *insurer* undertaking business that falls within the scope of the *Consolidated Life Directive* (2002/83/EC), the *Reinsurance Directive* (2005/68/EC) or the *First Non-Life Directive* (1973/239/EEC) as amended.

Monitoring requirements

2.1.9 FCA PRA R A *firm* must at all times monitor whether it is complying with ■ GENPRU 2.1.13 R (the main capital adequacy rule for *insurer*) or the *main*

2.1.10
FCA PRA

G

BIPRU firm Pillar 1 rules and be able to demonstrate that it knows at all times whether it is complying with those rules.

For the purposes of ■ GENPRU 2.1.9 R, a *firm* should have systems in place to enable it to be certain whether it has adequate *capital resources* to comply with ■ GENPRU 2.1.13 R and the *main BIPRU firm Pillar 1 rules* (as applicable) at all times. This does not necessarily mean that a *firm* needs to measure the precise amount of its *capital resources* and its *CRR* on a daily basis. A *firm* should, however, be able to demonstrate the adequacy of its *capital resources* at any particular time if asked to do so by the *appropriate regulator*.

2.1.11
FCA PRA

R

A firm must notify the appropriate regulator immediately of any breach, or expected breach, of ■ GENPRU 2.1.13 R (in the case of an insurer) or the main BIPRU firm Pillar 1 rules (in the case of a BIPRU firm).

Additional capital requirements

2.1.12
FCA PRA

G

The *appropriate regulator* may impose a higher capital requirement than the minimum requirement set out in this section as part of the *firm's Part 4A permission* (see ■ GENPRU 1.2 (Adequacy of financial resources), ■ BIPRU 2.2 (Internal capital adequacy standards) and ■ INSPRU 7.1 (Individual capital assessment)).

Main requirement: Insurers

2.1.13
PRA

R

- (1) Subject to (2), an *insurer* must maintain at all times *capital resources* equal to or in excess of its *capital resources requirement (CRR)*.
- (2) An *insurer* which is a *participating insurance undertaking* and, in relation to its own *group capital resources*, is in compliance with ■ INSPRU 6.1.9 R (Requirement to maintain group capital), is deemed to comply with this *rule*.

2.1.14
PRA

R

An insurer must comply with ■ GENPRU 2.1.13 R separately in respect of both its long-term insurance business and its general insurance business unless it is a pure reinsurer or a captive reinsurer which has a single MCR in respect of its entire business in accordance with ■ GENPRU 2.1.26 R.

2.1.15
PRA

G

In order to comply with ■ GENPRU 2.1.14 R, an *insurer* carrying on both *general insurance business* and *long-term insurance business* will need to allocate its *capital resources* between its *general insurance business* and *long-term insurance business* so that the *capital resources* allocated to its *general insurance business* are equal to or in excess of its *CRR* for its *general insurance business* and the *capital resources* allocated to its *long-term insurance business* are equal to or in excess of its *CRR* for its *long-term insurance business*. Whereas *long-term insurance assets* cannot be used towards meeting a *firm's CRR* for its *general insurance business*, surplus *general insurance assets* may be used towards meeting the *CRR* for its *long-term insurance business* (see ■ INSPRU 1.5.30 R to ■ INSPRU 1.5.32 G). ■ INSPRU 1.5 (Internal-contagion risk) sets out the detailed requirements for the separation of *long-term* and *general insurance business*.

2.1.16

PRA

G

Insurers commonly use different terminology for the various GENPRU requirements. For example, the MCR is traditionally known as the required minimum margin.

Calculation of the CRR for an insurer

2.1.17

PRA

R

The CRR for any *insurer* carrying on *general insurance business* is equal to the MCR in ■ GENPRU 2.1.24 R or, for a *pure reinsurer* or a *captive reinsurer* carrying on both *general insurance business* and *long-term insurance business*, in ■ GENPRU 2.1.26 R.

2.1.18

PRA

R

The CRR for any *insurer* to which this rule applies (see ■ GENPRU 2.1.19 R and ■ GENPRU 2.1.20 R) is the higher of:

- (1) the MCR in ■ GENPRU 2.1.24A R; and
- (2) the ECR in ■ GENPRU 2.1.38 R.

2.1.19

PRA

R

Subject to ■ GENPRU 2.1.20 R, ■ GENPRU 2.1.18 R applies to an *insurer* carrying on *long-term insurance business*, other than:

- (1) a *non-directive mutual*;
- (2) an *insurer* which has no *with-profits insurance liabilities*; and
- (3) an *insurer* which has *with-profits insurance liabilities* that are, and at all times since 31 December 2004 (the coming into force of ■ GENPRU 2.1.18 R) have remained, less than £500 million.

2.1.20

PRA

R

■ GENPRU 2.1.18 R also applies to an *insurer* of a type listed in ■ GENPRU 2.1.19 R (3) if:

- (1) the *insurer* makes an election that ■ GENPRU 2.1.18 R is to apply to it; and
- (2) that election is made by written notice given to the *appropriate regulator* in a way that complies with the requirements for written notice in ■ SUP 15.7 (Form and method of notification).

2.1.21

PRA

G

The effect of ■ GENPRU 2.1.19 R (3) is that an *insurer* to which ■ GENPRU 2.1.18 R applies because it has *with-profits insurance liabilities* of £500 million or more, will continue to be subject to ■ GENPRU 2.1.18 R even if its *with-profits insurance liabilities* fall below £500 million. However, if that happens, it may apply for a *waiver* from ■ GENPRU 2.1.18 R under section 138A of the *Act*. In exercising its discretion under section 138A of the *Act*, the *appropriate regulator* will have regard (among other factors) to whether there has been a material and permanent change to the *insurer's* business and to the prospects of it continuing to have *with-profits insurance liabilities* of less than £500 million.

2.1.22

PRA

G

An *insurer* that has always had *with-profits insurance liabilities* of less than £500 million since ■ GENPRU 2.1.18 R came into force may wish to "opt in" to ■ GENPRU 2.1.18 R and

therefore become a *realistic basis life firm*. By doing so, it becomes obliged to calculate a *with-profits insurance capital component* (see ■ GENPRU 2.1.38 R and ■ INSPRU 1.3 (With-profits insurance capital component)), but it also becomes entitled to certain modifications to the way that a *firm* is required to calculate its *mathematical reserves* (see ■ INSPRU 1.2.46 R (Future net premiums: adjustment for deferred acquisition costs) and ■ INSPRU 1.2.76 R (Persistency assumptions)). The *firm* is also then required to report its liabilities on a realistic basis (see IPRU(INS) rule 9.31R(b)). In order to "opt in", the *insurer* must make an election under ■ GENPRU 2.1.20 R that ■ GENPRU 2.1.18 R is to apply to it. If an *insurer* that has elected to calculate and report its *with-profits insurance liabilities* on a realistic basis subsequently decides that it no longer wishes to do so, it may seek to "opt out" by applying for a *waiver* from ■ GENPRU 2.1.18 R under section 138A of the *Act*. In exercising its discretion under section 138A of the *Act*, the *appropriate regulator* will have regard (among other factors) to whether there has been a material and permanent change to the *firm's* business and to whether it continues to have *with-profits insurance liabilities* of less than £500 million.

2.1.23

PRA

R The *CRR* for an *insurer* carrying on *long-term insurance business*, but to which ■ GENPRU 2.1.18 R does not apply, is equal to the *MCR* in ■ GENPRU 2.1.25 R or, for a *pure reinsurer* or a *captive reinsurer* carrying on both *general insurance business* and *long-term insurance business*, in ■ GENPRU 2.1.26 R.

Calculation of the MCR (Insurer only)

2.1.24

PRA

R Subject to ■ GENPRU 2.1.26 R, for an *insurer* carrying on *general insurance business* the *MCR* in respect of that business is the higher of:

- (1) the *base capital resources requirement* for *general insurance business* applicable to that *firm*; and
- (2) the *general insurance capital requirement*.

2.1.24A

PRA

R Subject to ■ GENPRU 2.1.26 R, for an *insurer* carrying on *long-term insurance business* to which ■ GENPRU 2.1.18 R applies the *MCR* in respect of that business is the higher of:

- (1) the *base capital resources requirement* for *long-term insurance business* applicable to that *firm*; and
- (2) the *long-term insurance capital requirement*.

2.1.25

PRA

R Subject to ■ GENPRU 2.1.26 R, for an *insurer* carrying on *long-term insurance business*, but to which ■ GENPRU 2.1.18 R does not apply, the *MCR* in respect of that business is the higher of:

- (1) the *base capital resources requirement* for *long-term insurance business* applicable to that *firm*; and
- (2) the sum of:
 - (a) the *long-term insurance capital requirement*; and

(b) the *resilience capital requirement*.

2.1.26

PRA

R

For a *pure reinsurer* or a *captive reinsurer* carrying on both *general insurance business* and *long-term insurance business*:

- (1) the MCR in respect of its *general insurance business* is the *general insurance capital requirement*; and
- (2) the MCR in respect of its *long-term insurance business* is the sum of:
 - (a) the *long-term insurance capital requirement*; and
 - (b) the *resilience capital requirement*;

unless the sum of:

- (3) the *general insurance capital requirement*; and
- (4) the sum of:
 - (a) the *long-term insurance capital requirement*; and
 - (b) the *resilience capital requirement*;

is lower than the *base capital resources requirement*, in which case the *firm* has a single MCR in respect of its entire business equal to the *base capital resources requirement*.

2.1.27

PRA

G

The MCR gives effect to the EU Directive minimum requirements. For *general insurance business*, the EU Directive minimum is the higher of the *general insurance capital requirement* and the relevant *base capital resources requirement*. For *long-term insurance business*, the EU Directive minimum is the higher of the *long-term insurance capital requirement* and the *base capital resources requirement*. For *pure reinsurers* and *captive reinsurers* carrying on both *general insurance business* and *long-term insurance business*, however, the *base capital resources requirement* is the EU Directive required minimum only when it is higher than the sum of the *general insurance capital requirement* and the *long-term insurance capital requirement*. The *base capital resources requirement* is the minimum guarantee fund for the purposes of article 29(2) of the *Consolidated Life Directive* (2002/83/EC), article 17(2) of the *First Non-Life Directive* (1973/239/EEC) as amended and article 40(2) of the *Reinsurance Directive* (2005/68/EC). The *resilience capital requirement* is a PRA minimum requirement for *long-term insurance business* for *regulatory basis only life firms* that is additional to the EU minimum requirement for *long-term insurance business*.

- (1) Under the *Insurance Directives* the amount of the *base capital resources requirement* specified in the last column of the table in ■ GENPRU 2.1.30 R for an *insurer* which is not a *Non-directive insurer* is subject to annual review. The relevant amounts will be increased by the percentage change in the European index of consumer prices (comprising all EU member states, as published by Eurostat) from 20 March 2002, to the relevant review date, rounded up to a multiple of €100,000, provided that where the percentage change since the last increase is less than 5%, no increase will take place.

- (2) Similar provisions for the index-linking of the *base capital resources requirement* are included in the *Reinsurance Directive*, although in that case the index-linking starts from 10 December 2005. However, to ensure consistency as between all *firms* affected by the index-linking of the *base capital resources requirement* under the *Insurance Directives* and the *Reinsurance Directive*, the PRA intends, so far as possible, to amend the amounts in ■ GENPRU 2.1.30 R for all such *firms* (and ■ GENPRU 2.3.9 R for the *base capital resources requirements* applying to Lloyd's) when an index-linked increase is required by the *Insurance Directives*. The PRA may, however, have to depart from this approach where the result would be that the *base capital resources requirement* required for any type of *firm* under ■ GENPRU 2.1.30 R is less than the increased amount resulting from the operation of an index-linking provision to which it is subject.

The purpose of the *base capital resources requirement* for a *BIPRU firm* is to act as a minimum capital requirement or floor. It has been written as a separate requirement as there are restrictions in ■ GENPRU 2.2 (Capital resources) on the types of capital that a *BIPRU firm* may use to meet the *base capital resources requirement* which do not apply to some other parts of the capital requirement calculation. In order to preserve the *base capital resources requirement's* role as a floor rather than an additional requirement, ■ GENPRU 2.2.60 R allows a *BIPRU firm* to meet the *base capital resources requirement* with capital that is also used to meet the variable capital requirements in ■ GENPRU 2.1.40 R.

- (1) does not provide the *ancillary service* of safekeeping and administration of *financial instruments* for the account of *clients*, including custodianship and related services such as cash/collateral management, and is not authorised to do so;
- (2) is not authorised to provide the following *investment services*:
 - (a) to deal in any *financial instruments* for its own account;
 - (b) to underwrite issues of *financial instruments* on a firm commitment basis;
 - (c) to place *financial instruments* without a firm commitment basis; and

- (d) to operate a *multilateral trading facility*;
- (3) is authorised to provide one or more of the following *investment services*:
 - (a) the execution of investors' orders for *financial instruments*; or
 - (b) the management of individual portfolios of investments in *financial instruments*;
- (4) may be authorised to provide one or more of the following *investment services*:
 - (a) reception and transmission of investors' orders for *financial instruments*; or
 - (b) investment advice; and
- (5) does not hold clients' money and/or securities and is not authorised to do so (it should have a *limitation* or *requirement* prohibiting the holding of client money and its permission should not include *safeguarding and administering investments*).

2.1.53

FCA

R

A *BIPRU firm* must calculate a *fixed overheads requirement*, an amount that is equal to one quarter of the *firm's* relevant fixed expenditure calculated in accordance with ■ GENPRU 2.1.54 R.

2.1.54

FCA

R

For the purpose of ■ GENPRU 2.1.53 R, and subject to ■ GENPRU 2.1.55 R to ■ GENPRU 2.1.57 R, a *BIPRU firm's* relevant fixed expenditure is the amount described as total expenditure in its most recent audited *annual report and accounts*, less the following items (if they are included within such expenditure):

- (1) staff bonuses, except to the extent that they are guaranteed;
- (2) employees' and directors' shares in profits, except to the extent that they are guaranteed;
- (3) other appropriations of profits;
- (4) shared commission and fees payable which are directly related to commission and fees receivable, which are included within total revenue;
- (5) interest charges in respect of borrowings made to finance the acquisition of the *firm's readily realisable investments*;
- (6) interest paid to customers on *client money*;
- (7) interest paid to counterparties;
- (8) fees, brokerage and other charges paid to *clearing houses*, exchanges and *intermediate brokers* for the purposes of *executing*, registering or clearing transactions;
- (9) foreign exchange losses; and
- (10) other variable expenditure.

2.1.55

FCA

R

The relevant fixed expenditure of a *firm* in the following circumstances is:

- (1) where its most recent audited *annual report and accounts* do not represent a twelve month period, an amount calculated in accordance with ■ GENPRU 2.1.54 R, pro-rated so as to produce an equivalent annual amount; and
- (2) where it has not completed twelve months' trading, an amount based on forecast expenditure included in the budget for the first

twelve months' trading, as submitted with its application for *authorisation*.

2.1.56
FCA

R

A *firm* must adjust its relevant fixed expenditure calculation so far as necessary if and to the extent that since the date covered by the most recent audited *annual report and accounts* or (if ■ GENPRU 2.1.55 R (2) applies) since the budget was prepared:

- (1) its level of fixed expenditure changes materially; or
- (2) its *regulated activities* comprised within its *permission* change.

2.1.57
FCA

R

If a *firm* has a material proportion of its expenditure incurred on its behalf by third parties and such expenditure is not fully recharged to that *firm* then the *firm* must adjust its relevant fixed expenditure calculation by adding back in the whole of the difference between the amount of the expenditure and the amount recharged.

2.1.58
FCA

G

For the purpose of ■ GENPRU 2.1.57 R, the FCA would consider as material 10% of a *firm's* expenditure incurred on its behalf by third parties.

2.1.59
FCA

G

For the purpose of ■ GENPRU 2.1.54 R to ■ 2.1.57 R, fixed expenditure is expenditure which is inelastic relative to fluctuations in a *firm's* levels of business. Fixed expenditure is likely to include most salaries and staff costs, office rent, payment for the rent or lease of office equipment, and insurance *premiums*. It may be viewed as the amount of funds which a *firm* would require to enable it to cease business in an orderly manner, should the need arise. This is not an exhaustive list of such expenditure and a *firm* will itself need to identify (taking appropriate advice where necessary) which costs amount to fixed expenditure.

Calculation of base capital resources requirement for banks authorised before 1993

- (1) This *rule* applies to a *bank* that meets the following conditions:
 - (a) on 31 December 2006 it had the benefit of IPRU(BANK) rule 3.3.12 (Reduced minimum capital requirement for a *bank* that is a *credit institution* which immediately before 1 January 1993 was authorised under the Banking Act 1987);
 - (b) the relevant amount (as referred to in IPRU(BANK) rule 3.3.12) applicable to it was below €5 million as at 31 December 2006; and
 - (c) on 1 January 2007 it did not comply with the *base capital resources requirement* as set out in the table in ■ GENPRU 2.1.48 R (€5 million requirement).
- (2) Subject to (3), the applicable *base capital resources requirement* as at any time (the "relevant time") is the higher of:

- (a) the relevant amount applicable to it under IPRU(BANK) rule 3.3.12 as at 31 December 2006 as adjusted under
 - GENPRU 2.1.62 R (2); and
 - (b) the highest amount of eligible *capital resources* which that *bank* has held between 1 January 2007 and the relevant time.
- (3) This *rule* ceases to apply when:
- (a) that *bank's* eligible *capital resources* at any time since 1 January 2007 equal or exceed €5 million; or
 - (b) a *person* (other than an existing controller) becomes the *parent undertaking* of that *bank*.
- (4) If this *rule* ceases to apply under (3)(a) it continues not to apply if the *bank's* eligible *capital resources* later fall below €5 million.

2.1.61

G

Where two or more *banks* merge, all of which individually have the benefit of ■ GENPRU 2.1.60 R, the *PRA* may agree in certain circumstances that the *base capital resources requirement* for the *bank* resulting from the merger may be the sum of the aggregate *capital resources* of the merged *banks*, calculated at the time of the merger, provided this figure is less than €5 million.

2.1.62

R

For the purpose of ■ GENPRU 2.1.60 R:

- (1) an existing controller of a *bank* means:
 - (a) a *person* who has been a *parent undertaking* of that *bank* since 31 December 2006 or earlier; or
 - (b) a *person* who became a *parent undertaking* of that *bank* after 31 December 2006 but who, when he became a *parent undertaking* of that *bank*, was a *subsidiary undertaking* of an existing controller of that *bank*;
- (2) the relevant amount of capital as referred to in
 - GENPRU 2.1.60 R (2)(a) is adjusted by identifying the time as of which the amount of capital it was obliged to hold under IPRU(BANK) rule 3.3.12 as referred to in ■ GENPRU 2.1.60 R (2)(a) was fixed and then recalculating the capital resources it held at that time in accordance with the definition of eligible *capital resources* (as defined in (3)); and
- (3) eligible *capital resources* mean *capital resources* eligible under ■ GENPRU 2.2 (Capital resources) to be used to meet the *base capital resources requirement*.

G

The *appropriate regulator* has divided its definition of capital into categories, or tiers, reflecting differences in the extent to which the *capital instruments* concerned meet the purpose and conform to the characteristics of capital listed in ■ GENPRU 2.2.9 G. The *appropriate regulator* generally prefers a *firm* to hold higher quality capital that meets the characteristics of permanency and loss absorbency that are features of *tier one capital*. *Capital instruments* falling into *core tier one capital* can be included in a *firm's* regulatory capital without limit. Typically, other forms of capital are either subject to limits (see the *capital resources gearing rules*) or, in the case of some specialist types of capital, may only be included with the express consent of the *appropriate regulator* (which takes the form of a *waiver* under section 138A of the *Act*). Details of the individual components of capital are set out in the *capital resources table*.

Tier one capital

2.2.9
FCA PRA

G

Tier one capital typically has the following characteristics:

- (1) it is able to absorb losses;
- (2) it is permanent or (in the case of a *BIPRU firm*) available when required;
- (3) it ranks for repayment upon winding up, administration or similar procedure after all other debts and liabilities; and
- (4) it has no fixed costs, that is, there is no inescapable obligation to pay dividends or interest.

2.2.10
FCA PRA

G

The forms of capital that qualify for *Tier one capital* are set out in the *capital resources table* and include, for example, *share capital*, reserves, partnership and *sole trader capital*, verified interim net profits and, for a *mutual*, the *initial fund* plus permanent members' accounts. *Tier one capital* is divided into :

- (1) in the case of an *insurer*, *core tier one capital*, perpetual non-cumulative *preference shares* and *innovative tier one capital*; and

- (2) in the case of a *BIPRU firm*, *core tier one capital* and *hybrid capital*. *Hybrid capital* is further divided into the different stages B1, B2 and C of the calculation in the *capital resources table*.

Upper and lower tier two capital

2.2.11

FCA PRA

G

Tier two capital includes forms of capital that do not meet the requirements for permanency and absence of fixed servicing costs that apply to *tier one capital*. *Tier two capital* includes, for example:

- (1) capital which is perpetual (that is, has no fixed term) but cumulative (that is, servicing costs cannot be waived at the issuer's option, although they may be deferred - for example, cumulative *preference shares*); only perpetual *capital instruments* may be included in *upper tier two capital*;
- (2) capital which is not perpetual (that is, it has a fixed term) or which may have fixed servicing costs that cannot generally be either waived or deferred (for example, most subordinated debt); such capital should normally be of a medium to long-term maturity (that is, an original maturity of at least five years); dated *capital instruments* are included in *lower tier two capital*;
- (3) (for *BIPRU firms*) certain revaluation reserves such as reserves arising from the revaluation of land and buildings, including any net unrealised gains for the fair valuation of equities held in the available-for-sale financial assets category; and
- (4) (for *BIPRU firms*) general/collective provisions.

Tier three capital

2.2.12

FCA PRA

G

Tier three capital consists of forms of capital conforming least well to the characteristics of capital listed in ■ GENPRU 2.2.9 G: either subordinated debt of short maturity (*upper tier three capital*) or net *trading book* profits that have not been externally verified (*lower tier three capital*).

Non-standard capital instruments

2.2.13

FCA PRA

G

There may be examples of *capital instruments* that, although based on a standard form, contain structural features that make the *rules* in this section difficult to apply. In such circumstances, a *firm* may seek individual *guidance* on the application of those *rules* to the *capital instrument* in question. See SUP 9 (Individual guidance) for the process to be followed when seeking individual *guidance*.

Deductions from capital

2.2.14

FCA PRA

G

Deductions should be made at the relevant stage of the calculation of *capital resources* to reflect capital that may not be available to the *firm* or assets of uncertain value (for example, holdings of intangible assets and assets that are inadmissible for an *insurer*).

2.2.15

FCA

G

Deductions should also be made, in the case of certain *BIPRU firms* for *illiquid assets* (see ■ GENPRU 2.2.19 R).

2.2.16 FCA PRA G A full list of deductions from *capital resources* is shown in the *capital resources table* applicable to the *firm*.

Which method of calculating capital resources applies to which type of firm

2.2.17 FCA R A *firm* must calculate its *capital resources* in accordance with the version of the *capital resources table* applicable to the *firm*, subject to the *capital resources gearing rules*. The version of the *capital resources table* that applies to a *firm* is specified in the table in ■ GENPRU 2.2.19 R.

2.2.18 FCA R In the case of a *BIPRU firm* the *capital resources table* also sets out how the *capital resources requirement* is deducted from *capital resources* in order to decide whether its *capital resources* equal or exceed its *capital resources requirement*.

<i>BIPRU firm with an investment firm consolidation waiver</i>	GENPRU 2 Annex 6 R (Deducts illiquid assets and material holdings)	A <i>firm</i> with an <i>investment firm consolidation waiver</i> must use this method. No other <i>BIPRU firm</i> may use it.

Calculation of capital resources: Which rules apply to BIPRU firms

2.2.20 FCA G ■ GENPRU 2.2.19 R sets out three different methods of calculating *capital resources* for *BIPRU firms*. The differences between the three methods relate to whether and how *material holdings* and *illiquid assets* are deducted when calculating *capital resources*. The method depends on whether a *firm* has an *investment firm consolidation waiver*. If a *firm* does have such a *waiver*, it should deduct *illiquid assets*, own *group material holdings* and certain contingent liabilities. If a *firm* does not have such a *waiver*, it should choose to deduct either *material holdings* or, subject to notifying the *FCA*, *illiquid assets*.

2.2.21

FCA

G

A consequence of a *firm* deducting all of its *illiquid assets* under ■ GENPRU 2 Annex 5 R is that it is allowed a higher limit on short term subordinated debt under ■ GENPRU 2.2.49 R.

Calculation of capital resources: Insurers

2.2.22

PRA

G

Capital resources for an *insurer* can be calculated either as the total of eligible assets less foreseeable liabilities (which is the approach taken in the *Insurance Directives*) or by identifying the components of capital. Both calculations give the same result for the total amount of *capital resources*. The approach taken in this section has been to specify the components of capital and the relevant deductions. This is set out in the *capital resources table*. A simple example, showing the reconciliation of the two methods, is given in the table in ■ GENPRU 2.2.23 G.

2.2.57

FCA

G

The gearing limit in ■ GENPRU 2.2.49 R (Combined tier two and tier three limits) requires that the *upper tier three capital* used to meet the market risk requirement does not exceed 250% of the relevant *tier one capital*.

2.2.58

FCA

G

In this example it is assumed that the maximum possible amount of *tier one capital* is carried forward to meet the market risk requirement. There are other options as to the allocation of *tier one capital* and *tier two capital* to the credit and counterparty risk requirement.

In order to calculate the relevant *tier one capital* for the *upper tier three* gearing limit in accordance with ■ GENPRU 2.2.49 R it is first necessary to allocate *tier one capital* and *tier two capital* to the individual credit and counterparty risk requirements. This allocation process underlies the calculation of the overall amount referred to in ■ GENPRU 2.2.48 R. The calculation in ■ GENPRU 2.2.49 R (3) and ■ GENPRU 2.2.49 R (4) then focuses on the *tier one* element of this earlier calculation.

In this worked example, if it is assumed that the counterparty risk requirement has been met by *tier one capital*, the relevant *tier one capital* for gearing is £50. This is because the deductions of £20 and the credit risk requirement of £90 have been met by *tier two capital* in the first instance. However, the total sum of deductions and credit risk requirement exceed the *tier two capital* amount of £80 by £30. Hence the £80 of *tier one capital* has been reduced by £30 to leave £50.

In practical terms, the same result is achieved for the relevant *tier one capital* for gearing by taking the amount carried forward to meet market risk of £40 and adding back the

£10 in respect of the counterparty risk requirement. Again, there are other options as to the allocation to credit and counterparty risk of the constituent elements of Stage N of the *capital resources table*.

The outcome of these calculations can be summarised as follows:

- (1) the relevant *tier one capital* for the gearing calculation is £50;
- (2) 250% of the relevant *tier one capital* is £125; and
- (3) the *upper tier three capital* used to meet market risk is £50.

2.2.59

FCA

G

The 250% gearing limit is met as the limit of £125 is greater than the *upper tier three capital* of £50 used in this example.

FCA PRA

R

This section applies to a *firm* intending to issue a *capital instrument* on or after 1 March 2012 for inclusion in its *capital resources*.

2.2.61B

FCA PRA

R

A *firm* must notify the *appropriate regulator* in writing of its intention to issue a *capital instrument* which it intends to include within its *capital resources* at least one *month* before the intended date of issue, unless there are exceptional circumstances which make it impracticable to give such a period of notice, in which event the *firm* must give as much notice as is practicable in those circumstances. When giving notice, a *firm* must:

- (1) provide details of the amount of capital the *firm* is seeking to raise through the intended issue and whether the capital is intended to be issued to external investors or within its *group*;
- (2) identify the stage of the *capital resources table* the *capital instrument* is intended to fall within;
- (3) include confirmation from a *senior manager* of the *firm* responsible for authorising the intended issue that the *capital instrument* complies with the *rules* applicable to instruments

included in the stage of the *capital resources table* identified in (2); and

- (4) provide a copy of the term sheet and details of any features of the *capital instrument* which are novel, unusual or different from a *capital instrument* of a similar nature previously issued by the *firm* or widely available in the market or not specifically contemplated by ■ GENPRU 2.2.

This rule does not apply to a *firm* which intends to issue a *capital instrument* listed in ■ GENPRU 2.2.61E R

2.2.61C

FCA PRA

R

A *firm* must provide a further notification to the *appropriate regulator* in writing including all the information required in ■ GENPRU 2.2.61BR (1) to ■ (4) as soon as it proposes any change to the intended date of issue, amount of issue, type of investors, stage of capital or any other feature of the *capital instrument* to that previously notified to the *appropriate regulator*.

2.2.61D

FCA PRA

R

If a *firm* proposes to establish a debt securities program for the issue of *capital instruments* for inclusion within its *capital resources*, it must:

- (1) notify the *appropriate regulator* of the establishment of the program; and
- (2) provide the information required by ■ GENPRU 2.2.61BR (1) to ■ (4) at least one *month* before the first proposed drawdown. Any changes must be notified to the *appropriate regulator* in accordance with ■ GENPRU 2.2.61C R.

2.2.61E

FCA PRA

R

The *capital instruments* to which ■ GENPRU 2.2.61B R does not apply are:

- (1) ordinary *shares* which:
 - (a) are the most deeply subordinated *capital instrument* issued by the *firm*;
 - (b) meet the criteria set out in ■ GENPRU 2.2.83R (2) and ■ (3) and, for a *BIPRU firm*, ■ GENPRU 2.2.83A R; and
 - (c) are the same as ordinary *shares* previously issued by the *firm*;
- (2) debt instruments issued from a debt securities program, provided that program was notified to the *appropriate regulator* prior to its first drawdown, in accordance with ■ GENPRU 2.2.61D R; and
- (3) *capital instruments* which are not materially different in terms of their characteristics and eligibility for inclusion in a particular tier of capital to *capital instruments* previously issued by the *firm*.

2.2.61F
FCA PRA

R

A *firm* must notify the *appropriate regulator* in writing, no later than the date of issue, of its intention to issue a *capital instrument* listed in ■ GENPRU 2.2.61E R which it intends to include within its *capital resources*. When giving notice, a *firm* must:

- (1) provide the information set out at ■ GENPRU 2.2.61BR (1) to ■ (3); and
- (2) confirm that the terms of the *capital instrument* have not changed since the previous issue by the *firm* of that type of *capital instrument*.

2.2.61G
FCA PRA

G

■ GENPRU 2.2.61B R provides that, in exceptional circumstances, a *firm* may provide less than one *month's* notice of the intended issue. The *appropriate regulator* is unlikely to consider circumstances to be exceptional unless they are such that there is a risk of a *firm's capital resources* falling below its *capital resources requirement* if a one-month notification period is observed. In such circumstances, a *firm* should notify the *appropriate regulator* as soon as it has resolved to issue further capital, and provide details of its circumstances and why it is not possible to provide one *month's* notice of the intended issue.

2.2.61H
FCA PRA

G

Details of the notification to be provided by a *BIPRU firm* in relation to *capital instruments* issued by another *undertaking* in its *group* for inclusion in its *capital resources* or the *consolidated capital resources* of its *UK consolidation group* or *non-EEA sub-group* are set out in ■ BIPRU 8.6.1A R to ■ BIPRU 8.6.1F R. Details of the notification to be provided by an *insurer* in relation to *capital instruments* issued by another *undertaking* in its *group* for inclusion in its *group capital resources* are set out in ■ INSPRU 6.1.43A R to ■ INSPRU 6.1.43F R.

Tier one capital: General

2.2.62
FCA PRA

R

A *firm* may not include a *capital instrument* in its *tier one capital resources* unless it complies with the following conditions:

- (1) it is included in one of the categories in ■ GENPRU 2.2.63 R;
- (2) it complies with the conditions set out in ■ GENPRU 2.2.64 R;
- (3) it is not excluded under ■ GENPRU 2.2.65 R (Connected transactions); and
- (4) it is not excluded by any of the *rules* in ■ GENPRU 2.2.

2.2.63
FCA PRA

R

The categories referred to in ■ GENPRU 2.2.62 R (1) are:

- (1) *permanent share capital*;
- (2) *eligible partnership capital*;
- (3) *eligible LLP members' capital*;

- (4) *sole trader* capital;
- (5) (in the case of an *insurer*) a perpetual non-cumulative *preference share*;
- (6) [deleted]
- (7) (in the case of an *insurer*) an *innovative tier one instrument*; and
- (8) (in the case of a *BIPRU firm*) *hybrid capital*.

General conditions for eligibility as tier one capital

2.2.64

R

FCA PRA

The conditions that an item of capital of a *firm* must comply with under ■ GENPRU 2.2.62 R (2) are as follows:

- (1) it is issued by the *firm*;
- (2) it is fully paid and the proceeds of issue are immediately and fully available to the *firm*;
- (3) it:
 - (a) cannot be redeemed at all or can only be redeemed on a winding up of the *firm*; or
 - (b) complies with the conditions in ■ GENPRU 2.2.70 R (Basic requirements for redeemability) and ■ GENPRU 2.2.76 R (Redeemable instrument subject to a *step-up*);
- (4) the item of capital meets the following conditions in relation to any *coupon*:
 - (a) the *firm* is under no obligation to pay a *coupon*; or
 - (b) (if the *firm* is obliged to pay the *coupon*) the *coupon* is payable in the form of an item of capital that is:
 - (i) in the case of a *BIPRU firm*, *core tier one capital*; and
 - (ii) in the case of an *insurer*, included in a *higher stage of capital* or the *same stage of capital* as that first item of capital;
- (5) any *coupon* is either:
 - (a) non-cumulative; or
 - (b) (if it is cumulative) it must, if deferred, be paid by the *firm* in the form of *tier one capital* complying with (4)(b);

- (6) it is able to absorb losses to allow the *firm* to continue trading and :
- (a) in the case of an *insurer*, in particular it complies with
 - GENPRU 2.2.80 R to ■ GENPRU 2.2.81 R (Loss absorption) and, in the case of an *innovative tier one instrument*, ■ GENPRU 2.2.116 R to ■ GENPRU 2.2.118 R (Other tier one capital: loss absorption); and
 - (b) in the case of a *BIPRU firm*, it does not, through appropriate mechanisms, hinder the recapitalisation of the *firm*, and in particular it complies with:
 - (i) ■ GENPRU 2.2.80 R to ■ GENPRU 2.2.81 R (Loss absorption);
 - (ii) in the case of *core tier one capital*, ■ GENPRU 2.2.83A R (9) to ■ GENPRU 2.2.83A R (10) (General conditions for eligibility of capital instruments as core tier one capital (BIPRU firm only)); and
 - (iii) in the case of *hybrid capital*, ■ GENPRU 2.2.116 R to ■ GENPRU 2.2.118 R (Other tier one capital: loss absorption);
- (7) the amount of the item included must be net of any foreseeable tax charge at the moment of its calculation or must be suitably adjusted in so far as such tax charges reduce the amount up to which that item may be applied to cover risks or losses;
- (8) it is available to the *firm* for unrestricted and immediate use to cover risks and losses as soon as these occur;
- (9) it ranks for repayment upon winding up, administration or any other similar process:
- (a) in the case of an *insurer*, no higher than a *share* of a company incorporated under the Companies Act 2006 (whether or not it is such a *share*); or
 - (b) in the case of a *BIPRU firm*, lower than any items of capital that are:
 - (i) eligible for inclusion within the *firm's tier two capital resources*; and
 - (ii) not eligible for inclusion within the *firm's tier one capital resources*; and
- (10) the description of its characteristics used in its marketing is consistent with the characteristics required to satisfy (1) to (9)

and, where it applies, ■ GENPRU 2.2.271 R (Other requirements: insurers carrying on with-profits business (Insurer only)).

2.2.65

FCA PRA

R

An item of capital does not qualify for inclusion as *tier one capital* if the issue of that item of capital by the *firm* is connected with one or more other transactions which, when taken together with the issue of that item, could result in that item of capital no longer displaying all of the characteristics set out in ■ GENPRU 2.2.64 R (1) to ■ GENPRU 2.2.64 R (9).

Guidance on certain of the general conditions for eligibility as tier one capital

2.2.66

FCA PRA

G

■ GENPRU 2.2.65 R is an example of the general principle in ■ GEN 2.2.1 R (Purposive interpretation). Its purpose is to emphasise that an item of capital does not meet the conditions for inclusion in *tier one capital* if in isolation it does meet those requirements but it fails to meet those requirements when other transactions are taken into account. Examples of such connected transactions might include guarantees or any other side agreement provided to the holders of the *capital instrument* by the *firm* or a connected party or a related transaction designed, for example, to enhance their security or to achieve a tax benefit, but which may compromise the loss absorption capacity or permanence of the original capital item.

2.2.67

FCA PRA

G

■ GENPRU 2.2.64 R (2) is stricter than the Companies Act definition of fully paid, which only requires an undertaking to pay.

2.2.67A

FCA PRA

G

The purpose of ■ GENPRU 2.2.64 R (4) is to ensure that a *firm* retains flexibility over the payment of *coupons* and can preserve cash in times of financial stress. However, a *firm* may include, as part of the capital instrument terms, a right to make payments of a *coupon* mandatory if an item of capital becomes ineligible to form part of its *capital resources* (e.g. through a change in the relevant *rules*) and the *firm* has notified the *appropriate regulator* that the instrument is ineligible.

2.2.68

FCA PRA

G

The *appropriate regulator* considers that dividend pushers diminish the quality of capital by breaching the principle of complete discretion over *coupons* set out in ■ GENPRU 2.2.64 R (4). A dividend pusher operates so that, in a given period of time, payments must be made on senior securities if payments have previously been made on junior securities or securities ranking *pari passu*. As such, dividend pushers may not be included in the terms of *tier one capital*, unless the *firm* has the option to fund the "pushed payment" in stock.

2.2.68A

FCA

R

A *BIPRU firm* must not include a *capital instrument* in its *tier one capital resources* if:

- (1) the *capital instrument* is affected by a dividend stopper; and
- (2) the dividend stopper operates in a way that hinders recapitalisation.

2.2.68B

FCA

G

A dividend stopper prevents the *firm* from paying any *coupon* on more junior or *pari passu* instruments in a period in which the *firm* omits payments to the holder of the *capital*

instrument containing the dividend stopper, and so may hinder the recapitalisation of the *firm* contrary to ■ GENPRU 2.2.64 R (6).

2

2.2.69
FCA PRA

G

An item of capital does not comply with ■ GENPRU 2.2.64 R (10) if it is marketed as a *capital instrument* that would only qualify for a lower level of capital or on the basis that investing in it is like investing in an instrument in a lower tier of capital. For example, an undated *capital instrument* should not be marketed as a dated *capital instrument* if the terms of the *capital instrument* include an option by the issuer to redeem the *capital instrument* at a specified date in the future.

Tier one capital: payment of coupons (BIPRU firm only)

2.2.69A
FCA

R

A *BIPRU firm* must not make a payment of a *coupon* on an item of *hybrid capital* if the *firm* has no distributable reserves.

2.2.69B
FCA

R

A *BIPRU firm* must cancel the payment of a *coupon* on an item of *hybrid capital* if the *BIPRU firm* does not meet its *capital resources requirement* or if the payment of that *coupon* would cause it to breach its *capital resources requirement*.

2.2.69C
FCA

R

A *BIPRU firm* must not pay a *coupon* on an item of *hybrid capital* in the form of *core tier one capital* in accordance with ■ GENPRU 2.2.64 R (4)(b) unless:

- (1) the *firm* meets its *capital resources requirement*; and
- (2) such a substituted payment preserves the *firm's* financial resources.

2.2.69D
FCA

G

The *appropriate regulator* considers that a *BIPRU firm's* financial resources are not preserved under ■ GENPRU 2.2.69C R (2) unless, among other things, the conditions of the substituted payment are that:

- (1) there is no decrease in the amount of the *firm's core tier one capital*;
- (2) the deferred *coupon* is satisfied without delay using newly issued *core tier one capital* that has an aggregate fair value no more than the amount of the *coupon*;
- (3) the *firm* is not obliged to find new investors for the newly issued instruments; and
- (4) if the holder of the newly issued instruments subsequently sells the instruments and the sale proceeds are less than the value of the *coupon*, the *firm* is not obliged to issue further new instruments to cover the loss incurred by the holder of the instruments.

2.2.69E
FCA

R

A *BIPRU firm* must cancel the payment of a *coupon* if circumstances arise whereby the payment of the *coupon* by newly issued instruments,

in accordance with ■ GENPRU 2.2.64 R (4)(b), does not comply with the requirements of ■ GENPRU 2.2.69C R.

2.2.69F

FCA

G

- (1) In relation to the cancellation or deferral of the payment of a *coupon* in accordance with ■ GENPRU 2.2.64 R (4) and ■ GENPRU 2.2.64 R (5), ■ GENPRU 2.2.68A R, or ■ GENPRU 2.2.69B R, the *appropriate regulator* expects that situations where a *coupon* may need to be cancelled or deferred will be resolved through analysis and discussion between the *firm* and the *appropriate regulator*. If the *appropriate regulator* and the *firm* do not agree on the cancellation or deferral of the payment of a *coupon*, then the *appropriate regulator* may consider using its powers under 55J of the *Act* to, on its own initiative, vary a *firm's Part 4A permission* to require it to cancel or defer a *coupon* in accordance with the *appropriate regulator's* view of the financial and solvency situation of the *firm*.
- (2) In considering a *firm's* financial and solvency situation, the *appropriate regulator* will normally take into account, among other things, the following:
 - (a) the *firm's* financial and solvency position before and after the payment of the *coupon*, in particular whether that payment, or other foreseeable internal and external events or circumstances, may increase the risk of the *firm* breaching its *capital resources requirement* or the *overall financial adequacy rule*;
 - (b) an appropriately stressed capital plan, covering 3-5 years, which includes the effect of the proposed payment of the *coupon*; and
 - (c) an evaluation of the risks to which the *firm* is or might be exposed and whether the level of *tier one capital* ensures the coverage of those risks, including stress tests on the main risks showing potential loss under different scenarios.
- (3) If the *BIPRU firm* is required to cancel or defer the payment of a *coupon* by the *appropriate regulator*, it may still be able to pay the *coupon* by way of newly issued *core tier one capital* in accordance with ■ GENPRU 2.2.64 R (4)(b) and ■ GENPRU 2.2.69C R. The *appropriate regulator* may consider using its powers under 55J of the *Act* to, on its own initiative, vary a *firm's Part 4A permission* to impose conditions on the use of such a mechanism or to require its cancellation, based on the factors outlined in this *guidance*.

Redemption of tier one instruments

A *firm* may not include a *capital instrument* in its *tier one capital resources*, unless its contractual terms are such that:

- (1) (if it is redeemable other than in circumstances set out in ■ GENPRU 2.2.64 R (3)(a) (redemption on a winding up)) it is redeemable only at the option of the *firm* or, in the case of a *BIPRU firm*, on the date of maturity;
- (2) the *firm* cannot exercise that redemption right:
 - (a) before the fifth anniversary of its date of issue;

2.2.70

FCA PRA

R

- (b) unless it has given notice to the *appropriate regulator* in accordance with ■ GENPRU 2.2.74 R; and
 - (c) unless at the time of exercise of that right it complies with ■ GENPRU 2.1.13 R (the main capital adequacy *rule* for *insurers*) or the *main BIPRU firm Pillar 1 rules* and will continue to do so after redemption ;
- (3) (in the case of a *BIPRU firm* and if it is undated) if it provides for a moderate incentive for the *BIPRU firm* to redeem it, that incentive does not occur before the tenth anniversary of its date of issue; and
- (4) (in the case of a *BIPRU firm* and if it is dated):
- (a) it has an original maturity date of at least 30 years after its date of issue; and
 - (b) it does not provide an incentive to redeem on any date other than its maturity date.

2.2.70A

FCA

G

In the case of a *BIPRU firm*, an incentive to redeem is a feature of a *capital instrument* that would lead a reasonable market participant to have an expectation that the *firm* will redeem the instrument. The *appropriate regulator* considers that interest rate step-ups and principal stock settlements, in conjunction with a call option, are incentives to redeem. Only instruments with moderate incentives to redeem are permitted as *tier one capital*, in accordance with the limited conversion ratio in ■ GENPRU 2.2.138 R and the *rule* on step-ups in ■ GENPRU 2.2.147 R.

2.2.71

FCA PRA

R

A *firm* may include a term in a *tier one instrument* allowing the *firm* to redeem it before the date in ■ GENPRU 2.2.70 R (2)(a) if the following conditions are satisfied:

- (1) the other conditions in ■ GENPRU 2.2.70 R are met;
- (2) the circumstance that entitles the *firm* to exercise that right is:
 - (a) (in the case of an *insurer*) a change in law or regulation in any relevant jurisdiction or in the interpretation of such law or regulation by any court or authority entitled to do so; and
 - (b) (in the case of a *BIPRU firm*) a change in the applicable tax treatment or regulatory classification of those instruments;
- (3) (a) (in the case of an *insurer*) it would be reasonable for the *firm* to conclude that it is unlikely that that circumstance will occur, judged at the time of issue or, if later, at the time that the term is first included in the terms of the *tier one instrument*; and

(b) (in the case of a *BIPRU firm*) the circumstance that entitles the *firm* to exercise that right was not reasonably foreseeable at the date of issue of the *tier one instrument*; and

(4) the *firm's* right is conditional on it obtaining the *appropriate regulator's* consent in the form of a *waiver* of ■ GENPRU 2.2.72 R.

2.2.72

FCA PRA

R

A *firm* must not redeem a *tier one instrument* in accordance with a term included under ■ GENPRU 2.2.71 R.

2.2.73

FCA PRA

G

The purpose of ■ GENPRU 2.2.71 R to ■ GENPRU 2.2.72 R is this. In general a *tier one instrument* should not be redeemable by the *firm* before its fifth anniversary. However there may be circumstances in which it would be reasonable for the *firm* to redeem it before then. ■ GENPRU 2.2.71 R allows the *firm* to include a right to redeem the instrument before the fifth anniversary in certain circumstances. A tax call is an example of a term that may be allowed. ■ GENPRU 2.2.71 R says that the terms of the *tier one instrument* should provide that the *firm* should not be able to exercise that right without the *appropriate regulator's* consent. Any such consent will be given in the form of a *waiver* allowing early repayment. Thus although a *firm* may include a right to redeem early in the terms of a *tier one instrument* without the need to apply for a *waiver* the actual exercise of that right will require a *waiver*.

2.2.74

FCA PRA

R

A *firm* must not redeem any *tier one instrument* that it has included in its *tier one capital resources* unless it has notified the *appropriate regulator* of its intention at least one month before it becomes committed to do so. When giving notice, the *firm* must provide details of its position after such redemption in order to show how it will:

- (1) meet its *capital resources requirement*;
- (2) have sufficient financial resources to meet the *overall financial adequacy rule* ; and
- (3) in the case of a *BIPRU firm*, not otherwise suffer any undue effects to its financial or solvency conditions.

2.2.74A

FCA PRA

G

The *appropriate regulator* considers that, in order to comply with ■ GENPRU 2.2.74 R, the *firm* should, at a minimum, provide the *appropriate regulator* with the following information:

- (1) a comprehensive explanation of the rationale for the redemption;
- (2) the *firm's* financial and solvency position before and after the redemption, in particular whether that redemption, or other foreseeable internal and external events or circumstances, may increase the risk of the *firm* breaching its *capital resources requirement*;
- (3) an appropriately stressed capital plan covering 3-5 years, which includes the effect of the proposed redemption; and

- (4) an evaluation of the risks to which the *firm* is or might be exposed and whether the level of *tier one capital* ensures the coverage of such risks including stress tests on the main risks showing potential loss under different scenarios.

2

2.2.74B

FCA

R

If a *BIPRU firm* does not comply with its *capital resources requirement* or if the redemption of any dated *tier one instrument* would cause it to breach its *capital resources requirement*, it must suspend the redemption of its dated *tier one instruments*.

2.2.75

FCA PRA

R

If a *firm* gives notice of the redemption or repayment of any *tier one instrument*, the *firm* must no longer include that instrument in its *tier one capital resources*.

Step-ups and redeemable tier one instruments: Insurer only

2.2.76

PRA

R

In the case of an *insurer*, in relation to an *innovative tier one instrument* which is redeemable and which satisfies the following conditions:

- (1) it is or may become subject to a *step-up*; and
- (2) a reasonable *person* would think that:
 - (a) the *firm* is likely to redeem it before the tenth anniversary of its date of issue; or
 - (b) the *firm* is likely to have an economic incentive to redeem it before the tenth anniversary of its date of issue;

the redemption date in ■ GENPRU 2.2.70 R (2)(a) is amended by replacing "fifth anniversary" with "tenth anniversary".

Meaning of redemption

2.2.77

FCA PRA

R

- (1) This *rule* applies to a *tier one instrument*, *tier two instrument* or *tier three instrument* (instrument A) that under its terms is exchanged for or converted into another instrument or is subject to a similar process.
- (2) This *rule* also applies to instrument A if under its terms it is redeemed out of the proceeds of the issue of new securities.
- (3) If the instrument with which instrument A is replaced is included in the *same stage of capital* or a *higher stage of capital* as instrument A, instrument A is treated as not having been redeemed or repaid for the purposes of GENPRU 2.2.
- (4) (3) does not apply to ■ GENPRU 2.2.114 R (Redeemable instrument likely to be repaid etc), ■ GENPRU 2.2.74 R (Notice of redemption of *tier one instruments*), ■ GENPRU 2.2.174 R (Notice of redemption of *tier two instruments*) or

■ GENPRU 2.2.245 R (so far as it relates to notice of redemption of *tier three instruments*).

(5) (3) only applies if it would be reasonable (taking into account the economic substance) to treat the original instruments as continuing in issue on the same or a more favourable basis. The question of whether that basis is more or less favourable must be judged from the point of view of the adequacy of the *firm's capital resources*.

2.2.78

FCA PRA

R

(1) A *share* is not redeemable for the purposes of this section merely because the Companies Act 1985, the Companies (Northern Ireland) Order 1986 or the Companies Act 2006 allows the *firm* that issued it to purchase it.

(2) A *capital instrument* is not redeemable for the purposes of this section merely because the *firm* that issued it has a right to purchase it similar to the right in (1).

2.2.79

FCA PRA

G

This section generally uses the term repay and redeem interchangeably.

Purchases of tier one instruments: BIPRU firm only

2.2.79A

FCA

R

A *BIPRU firm* must not purchase a *tier one instrument* that it has included in its *tier one capital resources* unless:

- (1) the *firm* initiates the purchase;
- (2) [deleted]
- (3) the *firm* has given notice to the *appropriate regulator* in accordance with ■ GENPRU 2.2.79G R; and
- (4) (in the case of *hybrid capital*) it is on or after the fifth anniversary of the date of issue of the instrument.

2.2.79B

FCA

G

In exceptional circumstances a *BIPRU firm* may apply for a *waiver* of ■ GENPRU 2.2.79AR (4) under section 138A (Modification or waiver of rules) of the *Act*.

2.2.79C

FCA

R

■ GENPRU 2.2.79AR (4) does not apply if:

- (1) the *firm* replaces the *capital instrument* it intends to purchase with a *capital instrument* that is included in a *higher stage of capital* or the *same stage of capital*; and
- (2) the replacement *capital instrument* has already been issued.

2.2.79D

FCA

R

■ GENPRU 2.2.79AR (4) does not apply if:

- (1) the *firm* intends to hold the purchased instrument for a temporary period as *market maker*; and
- (2) the purchased instruments held by the *firm* do not exceed the lower of:
 - (a) 10% of the relevant issuance; or
 - (b) 3% of the *firm's* total issued *hybrid capital*.

2.2.79E

FCA

G

In the circumstances provided for in ■ GENPRU 2.2.79D R, a *firm* would purchase the instrument and, instead of cancelling it, the *firm* would hold the instrument for a temporary period. In that case a *firm* should have in place adequate policies to take into account any relevant regulations and *rules*, which include those relating to market abuse.

2.2.79F

FCA

R

For the purposes of calculating its *tier one capital resources*, a *firm* must deduct the amount of any item of *hybrid capital* which it then holds.

2.2.79G

FCA

R

A *BIPRU firm* must not purchase a *tier one instrument* in accordance with ■ GENPRU 2.2.79A R unless it has notified the *appropriate regulator* of its intention at least one month before it becomes committed to doing so. When giving notice, the *firm* must provide details of its position after the purchase in order to show how, over an appropriate timescale, adequately stressed, and without planned recourse to the capital markets, it will:

- (1) meet its *capital resources requirement*; and
- (2) have sufficient financial resources to meet the *overall financial adequacy rule*.

2.2.79H

FCA

G

The *appropriate regulator* considers that:

- (1) in order to comply with ■ GENPRU 2.2.79G R, the *firm* should, at a minimum, provide the *appropriate regulator* with the following information:
 - (a) a comprehensive explanation of the rationale for the purchase;
 - (b) the *firm's* financial and solvency position before and after the purchase, in particular whether the purchase, or other foreseeable internal and external events or circumstances, may increase the risk of the *firm* breaching its *capital resources requirement* or the *overall financial adequacy rule*;
 - (c) an appropriately stressed capital plan covering 3-5 years, which includes the effect of the proposed purchase; and
 - (d) an evaluation of the risks to which the *firm* is or might be exposed and whether the level of *tier one capital* ensures the coverage of such risks including stress tests on the main risks showing potential loss under different scenarios; and

- (2) the proposed purchase should not be on the basis that the *firm* reduces capital on the date of the purchase and then plans to raise new external capital during the following 3-5 years to replace the purchased capital.

Core tier one capital: permanent share capital

2.2.83

FCA PRA

R

Permanent share capital means an item of capital which (in addition to satisfying ■ GENPRU 2.2.64 R) meets the following conditions:

- (1) it is:
 - (a) an ordinary *share*; or
 - (b) a *members' contribution*; or
 - (c) part of the *initial fund* of a *mutual*; or
 - (d) [deleted]
- (2) any *coupon* on it is not cumulative, the *firm* is under no obligation to pay a *coupon* in any circumstances and the *firm* has the right to choose the amount of any *coupon* that it pays;
- (3) the terms upon which it is issued do not permit redemption and it is otherwise incapable of being redeemed to at least the same degree as an ordinary *share* issued by a company incorporated under the Companies Act 2006 (whether or not it is such a *share*) ; and
- (4) (in the case of a *BIPRU firm*) it meets the conditions set out in ■ GENPRU 2.2.83A R (General conditions for eligibility of capital instruments as core tier one capital (*BIPRU firm* only)).

General conditions for eligibility of capital instruments as core tier one capital (BIPRU firm only)

2.2.83A

FCA

R

The conditions that a *BIPRU firm's permanent share capital* must comply with under ■ GENPRU 2.2.83A R (4) or that a *BIPRU firm's eligible partnership capital* or *eligible LLP members' capital* must comply with under ■ GENPRU 2.2.95 R are as follows:

- (1) it is undated;
- (2) the terms upon which it is issued do not give the holder a preferential right to the payment of a *coupon*;
- (3) the terms upon which it is issued do not indicate the amount of any *coupon* that may be payable nor impose an upper limit on the amount of any *coupon* that may be payable;
- (4) the *firm's* obligations under the instrument do not constitute a liability (actual, contingent or prospective) under section 123(2) of the Insolvency Act 1986 and the holder has no right to petition for the winding up or administration of the *firm* or for any similar procedure in relation to the *firm* arising from the

- non-payment of a *coupon* or any other sums payable under the instrument;
- (5) there is no contractual or other obligation arising out of the terms upon which it is issued that requires the *firm* to repay capital to the holders other than on a liquidation of the *firm*;
 - (6) the terms upon which it is issued do not include a dividend pusher or a dividend stopper;
 - (7) the *firm* is under no obligation to issue *core tier one capital* or to make a payment in kind in lieu of making a *coupon* payment and non-payment of a *coupon* is not an event of default on the part of the *firm*;
 - (8) it is simple and the terms upon which it is issued are clearly defined;
 - (9) it is able to fully and unconditionally absorb losses on a non-discretionary basis as soon as they arise to allow the *firm* to continue trading, and it absorbs losses before all *capital instruments* that are not eligible for inclusion in stage A of the *capital resources table* and equally and proportionately with all *capital instruments* that are eligible for inclusion in stage A of the *capital resources table*;
 - (10) it ranks for repayment on winding up, administration or any other similar process lower than all other items of capital, and on a liquidation of the *firm* the holders have a claim on the residual assets remaining after satisfaction of all prior claims that is proportional to their holding and do not have a priority claim or a fixed claim for the nominal amount of their holding;
 - (11) the *firm* has not provided the holder with a direct or indirect financial contribution specifically to pay for the whole or a part of its subscription or purchase;
 - (12) a reasonable person would not think that the *firm* is likely to redeem or purchase it because of the description of its characteristics used in its marketing and in its contractual terms of issue; and
 - (13) its issue is not connected with one or more other transactions which, when taken together with its issue, could result in it no longer displaying all of the characteristics set out in
 - GENPRU 2.2.83R (2), ■ GENPRU 2.2.83AR (1) to ■ (12) and (in the case of *permanent share capital*) ■ GENPRU 2.2.83R (3).

A *BIPRU firm* must not include in stage A of the *capital resources table* different classes of the same *share* type (for example "A ordinary shares"

and "B ordinary shares") that meet the conditions in ■ GENPRU 2.2.83 R and ■ GENPRU 2.2.83A R but have differences in voting rights, unless it has notified the *appropriate regulator* of its intention at least one month before the *shares* are issued or (in the case of existing issued *shares*) the differences in voting rights take effect.

2.2.83C

FCA

R

A BIPRU firm must not pay a *coupon* on a *tier one instrument* included in stage A of the *capital resources table* if it has no distributable reserves.

2.2.83D

FCA

G

A BIPRU firm may disclose its dividend policy, provided that the policy only reflects the current intention of the firm and does not undermine the firm's right to choose the amount of any *coupon* that it pays.

Core tier one capital: exception to eligibility criteria (building societies only)

2.2.83E

R

A *building society* may include in stage A of the *capital resources table* a *capital instrument* that includes in its terms of issue an upper limit on the amount of any *coupon* that may be payable and the prohibition on a *coupon* limit under ■ GENPRU 2.2.83AR (3) does not apply to that *capital instrument*, provided that:

- (1) the *capital instrument* satisfies all other conditions for eligibility as *core tier one capital* set out in ■ GENPRU 2.2.83 R to ■ GENPRU 2.2.83A R;
- (2) the *coupon* limit has been imposed by law or the constitutional documents of the *firm*;
- (3) the objective of the limit is to protect the capital reserves of the *firm*;
- (4) the *firm* continues to have the effective right to choose the amount of any *coupon* that it pays;
- (5) all other *capital instruments* issued by the *firm* and included in stage A of the *capital resources table*:
 - (a) meet the conditions set out in ■ GENPRU 2.2.83 R (2), ■ GENPRU 2.2.83 R (3) and ■ GENPRU 2.2.83A R (General conditions for eligibility of capital instruments as core tier one capital (BIPRU firm only)); and
 - (b) if subject to a *coupon* limit, are subject to the same *coupon* limit; and
- (6) any preferential *coupon* on a *capital instrument* included in stage A of the *capital resources table*, arising as a result of the inclusion of a *coupon* limit on another *capital instrument*, must be restricted to a fixed multiple of the *coupon* payment on the

capital instrument that is subject to the *coupon* limit.

■ GENPRU 2.2.83A R (2) to ■ (3) do not prevent a *capital instrument* from being included in stage A of the *capital resources table* if the only reason for those prohibitions not being met is that a preferential *coupon* arises, and is restricted, in the manner referred to in this paragraph (6).

2.2.83F

R

A *building society* must not issue a *capital instrument* that includes a *coupon* limit in its terms of issue in accordance with ■ GENPRU 2.2.83E R unless it has notified the *PRA* of its intention to do so at least one month before the intended date of issue.

2.2.83G

G

Under ■ GENPRU 2.2.83E R (4), an effective right means that in practice the *firm* has, and exercises, full discretion to choose the amount of *coupon* that it pays (for example, it has not fettered that discretion by indicating to instrument holders that the *coupon* limit is the standard level of *coupon* they will receive).

2.2.83H

G

The purpose of ■ GENPRU 2.2.83E R (6) is to limit the potential preferential rights that may arise on *capital instruments* that are not subject to a *coupon* limit. The *PRA* considers that "preferential" refers to both priority of *coupon* payment and level of *coupon* payment. Therefore the *PRA* considers that:

- (1) a *coupon* arising on a *capital instrument* which is not subject to an explicit *coupon* limit within its terms of issue is likely to be preferential to a *coupon* on a *capital instrument* included in the *same stage of capital* which is subject to a *coupon* limit; and
- (2) the preference so arising should be restricted so that it is not an unlimited preference.

Core tier one capital: additional information

2.2.84

FCA **PRA**

G

In the case of an *insurer*, ■ GENPRU 2.2.83 R (2) and ■ GENPRU 2.2.83 R (3) have the effect that the *firm* should be under no obligation to make any payment in respect of a *tier one instrument* if it is to form part of its *permanent share capital* unless and until the *firm* is wound up. A *tier one instrument* that forms part of *permanent share capital* should not therefore count as a liability before the *firm* is wound up. The fact that relevant company law permits the *firm* to make earlier repayment does not mean that the *tier one instruments* are not eligible. However, the *firm* should not be required by any contractual or other obligation arising out of the terms of that capital to repay *permanent share capital*. Similarly a *tier one instrument* may still qualify if company law allows dividends to be paid on this capital, provided the *firm* is not contractually or otherwise obliged to pay them. There should therefore be no fixed costs.

2.2.84A

FCA **PRA**

G

Under ■ GENPRU 2.2.83A R (13) a *tier one instrument* does not meet the conditions for inclusion as *core tier one capital* if in isolation it does meet those requirements but fails to meet those requirements when other transactions are taken into account. Examples of those transactions include guarantees, pledges of assets or other side agreements provided by the *firm* to the holder of a *tier one instrument* designed to enhance the legal or economic seniority of the *tier one instrument*.

Core tier one capital: valuation differences (insurer only)

2.2.104

PRA

R

■ GENPRU 2.2.104 R to ■ GENPRU 2.2.107 R only apply to an *insurer*.

2.2.105

PRA

R

Valuation differences are all differences between the valuation of assets and liabilities as valued in *GENPRU* and the valuation that the *insurer* uses for its external financial reporting purposes, except valuation differences which are dealt with elsewhere in the *capital resources table*. The sum of these valuation differences must either be added to (if positive) or deducted from (if negative) an *insurer's capital resources* in accordance with the *capital resources table*.

2.2.106

PRA

G

Additions to and deductions from *capital resources* will arise from the application of asset and liability valuation and admissibility *rules* (see ■ GENPRU 1.3 (Valuation), ■ GENPRU 2.2.251 R (Deductions from total capital: Inadmissible assets) and ■ GENPRU 2 Annex 7 R (Admissible assets in insurance)). Downward adjustments include *discounting of technical provisions for general insurance business* (which is optional for financial reporting but not permitted for regulatory valuation - see ■ GENPRU 2.2.107 R) and derecognition of any *defined benefit asset* in respect of a *defined benefit occupational pension scheme* (see ■ GENPRU 1.3.9 R (2) (General requirements: Adjustments to accounting values)). Details of valuation differences relating to *technical provisions* and liability adjustments for *long-term insurance business* are set out in ■ INSPRU 1.2 (Mathematical reserves). In particular, contingent loans or other arrangements which are not valued as a liability under ■ INSPRU 1.2.79 R (2) (Reinsurance) result in a positive valuation difference.

2.2.107

PRA

R

- (1) Subject to (3), this *rule* applies to an *insurer* that carries on *general insurance business* and which *discounts* or reduces its *technical provisions for claims* outstanding.
- (2) An *insurer* of a kind referred to in (1) must deduct from its *capital resources* the difference between the undiscounted *technical provisions* or *technical provisions* before deductions, and the discounted *technical provisions* or *technical provisions* after deductions. This adjustment must be made for all *general insurance business classes*, except for risks listed under *classes 1 and 2*. For *classes* other than 1 and 2, no adjustment needs to be made in respect of the discounting of annuities included

in *technical provisions*. For *classes 1 and 2* (other than annuities), if the expected average interval between the settlement date of the *claims* being discounted and the accounting date is not at least four years, the *insurer* must deduct:

- (a) the difference between the undiscounted *technical provisions* and the discounted *technical provisions*; or
 - (b) where it can identify a subset of *claims* such that the expected average interval between the settlement date of the *claims* and the accounting date is at least four years, the difference between the undiscounted *technical provisions* and the discounted *technical provisions* for the other claims.
- (3) This *rule* does not apply to a *pure reinsurer* which became a *firm in run-off* before 31 December 2006 and whose *Part 4A permission* has not subsequently been varied to add back the *regulated activity of effecting contracts of insurance*.

Core tier one capital: fund for future appropriations (insurer only)

2.2.108

PRA

R

In relation to an *insurer* the fund for future appropriations means the fund of the same name required by the *insurance accounts rules*, comprising all funds the allocation of which either to *policyholders* or to shareholders has not been determined by the end of the *financial year*, or the balance sheet items under *international accounting standards* which in aggregate represent as nearly as possible that fund.

Core tier one capital: deferred shares (building society only)

2.2.108A

R

A *building society* may include a *deferred share* at stage A of the calculation in the *capital resources table* if (in addition to satisfying all the other requirements in relation to *tier one capital*) it is *permanent share capital* and is otherwise equivalent to an ordinary *share* in terms of its capital qualities, taking into account the specific constitution of *building societies* under the Building Societies Act 1986.

2.2.108B

G

The other main provisions relevant to inclusion of a *deferred share* in *tier one capital* are ■ GENPRU 2.2.62 R (Tier one capital: General), ■ GENPRU 2.2.64 R (General conditions for eligibility as tier one capital), ■ GENPRU 2.2.65 R (Connected transactions) and ■ GENPRU 2.2.80 R (Loss absorption).

Other tier one capital: perpetual non-cumulative preference shares (insurer only)

2.2.109

PRA

In the case of an *insurer*, a perpetual non-cumulative *preference share* may be included at stage B of the calculation in the *capital resources table* if (in addition to satisfying all the other requirements in relation to *tier one capital*) it satisfies the following conditions:

- (1) any *coupon* on it is not cumulative, and the *firm* is under no obligation to pay a *coupon* in any circumstances; and
- (2) it is not an *innovative tier one instrument*.

2.2.110
PRA

G

The other main provisions relevant to the eligibility of a perpetual non-cumulative *preference share* for inclusion by an *insurer* in *tier one capital* are ■ GENPRU 2.2.62 R (Tier one capital: General), ■ GENPRU 2.2.64 R (General conditions for eligibility as tier one capital), ■ GENPRU 2.2.65 R (Connected transactions), ■ GENPRU 2.2.70 R to ■ GENPRU 2.2.75 R (Redemption of *tier one instruments*) and ■ GENPRU 2.2.80 R (Loss absorption). The *rules* about *innovative tier one capital* are also relevant as they may result in perpetual non-cumulative *preference shares* being treated as *innovative tier one capital*. Perpetual non-cumulative *preference shares* should be perpetual and redeemable only at the *firm's* option. Perpetual *preference shares* should be non-cumulative if they are to be included at stage B of the calculation in the *capital resources table*. Any feature that, in conjunction with a call, would make a *firm* more likely to redeem perpetual non-cumulative *preference shares* would normally result in classification as an *innovative tier one instrument*. Such features would include, but not be limited to, a *step-up*, bonus *coupon* on redemption or redemption at a premium to the original issue price of the *share*.

A BIPRU firm must not include a *capital instrument* at stage B1 of the calculation in the *capital resources table* unless (in addition to satisfying all the other requirements in relation to *tier one capital* and *hybrid capital*) its contractual terms are such that:

- (1) it cannot be redeemed in cash but can only be converted into *core tier one capital*;
- (2) it must be converted into *core tier one capital* by the firm during emergency situations;
- (3) the emergency situations referred to in (2):
 - (a) are clearly defined within the terms of the *capital instrument*, legally certain and transparent; and
 - (b) occur at the latest, and include, when the BIPRU firm does not meet its *capital resources requirement*;
- (4) the *appropriate regulator* may require its conversion into *core tier one capital* when the appropriate regulator considers it necessary;
- (5) it may be converted into *core tier one capital* by the firm or the holder of the instrument at any time; and
- (6) the maximum number of *capital instruments* which are *core tier one capital* into which it may be converted must:
 - (a) be determined at the date of its issue;
 - (b) be determined on the basis of the market value of those other instruments at the date of its issue;
 - (c) have an aggregate value equal to its par value; and
 - (d) not increase if the price of those other instruments decreases.

- (1) In respect of ■ GENPRU 2.2.115A R (4), the *appropriate regulator* may require the firm to convert the instrument into *core tier one capital* based on its financial and solvency situation. The *appropriate regulator* will take into account, among other things, the factors identified at ■ GENPRU 2.2.69F G (2), adjusted to take into account the effects of a conversion rather than payment of a *coupon*.

- (2) Even if a *firm* meets its *capital resources requirement*, the *appropriate regulator* may consider the amount or composition of the *firm's tier one capital* as inadequate to cover the financial and solvency risks of the *firm* in which event the *appropriate regulator* may require the *firm* to convert the instrument into *core tier one capital*.

A *BIPRU firm* may include a *capital instrument* at stage C of the calculation in the *capital resources table*, and must not include it in stage B1 or B2 of that calculation, if (in addition to satisfying all the other requirements in relation to *tier one capital* and *hybrid capital*) it either:

The effect of ■ GENPRU 2.2.116 R and ■ GENPRU 2.2.116A R is that if a *potential tier one instrument* does constitute a liability, this should only be the case when the *firm* is able to pay that liability but chooses not to do so. As *tier one capital resources* for an *insurer* should be undated, this will generally only be relevant on a solvent winding up of the *firm*. The holder should agree that the *firm* has no liability (including any contingent or prospective liability) to pay any amount to the extent to which that liability would cause the *firm* to become insolvent if it made the payment or to the extent that its liabilities exceed its assets or would do if the payment were made. - (1) is clearly defined and legally certain;
- (2) is disclosed and transparent to the market;
- (3) makes the recapitalisation of the *firm* more likely by adequately reducing the potential future outflows to a holder of the *capital instrument* at certain trigger points;
- (4) enables the *firm*, at and after the trigger points, to operate the mechanism; and
- (5) when initiated, operates in one of the following ways:
 - (a) the principal of the instrument is written down permanently; or
 - (b) the principal of the instrument is written down temporarily. During the write-down period any *coupon* payable on the instrument must be cancelled and any related dividend stoppers and pushers must operate in a way that does not hinder recapitalisation; or
 - (c) the instrument is converted into *core tier one capital*. The maximum number of *capital instruments* which are *core tier one capital* into which it must be converted must:
 - (i) be determined at the date of its issue;
 - (ii) be determined on the basis of the market value of those other instruments at the date of its issue;

- (iii) have an aggregate value no more than 150% of its par value; and

 - (a) before a breach of the *firm's capital resources requirement* and both:
 - (i) when the *firm's* losses lead to a significant reduction of the *firm's* retained earnings or other reserves which causes a significant deterioration of the *firm's* financial and solvency conditions; and

 - (b) there must be no obstacle to the *firm's* issue of new securities;
- (3) the conversion ratio in respect of the substitution described in (2) must be fixed when the *SPV* issues the *capital instrument*;
- (4) to the extent that investors have the benefit of an obligation by a *person* other than the *SPV*:
 - (a) that obligation must be one owed by a member of the *firm's* group; and

 - (b) it provides that if the issuer does not exercise that right or does not do so in specified circumstances the issuer must or may have to redeem it in whole or in part through the issue of *shares* eligible for inclusion in the *firm's tier one capital resources* or the instrument converts or may convert into such *shares*; and
 - (c) ■ GENPRU 2.2.77 R means that the obligation in (1)(b) is treated as not being inconsistent with ■ GENPRU 2.2.70 R (1)

(*Tier one capital* should not be redeemable at the option of the holder).

- (2) A *firm* must not include a *potential tier one instrument* to which this *rule* applies in its *tier one capital resources* if:
- (a) the conversion ratio as at the date of redemption may be greater than the conversion ratio as at the time of issue by more than:
 - (i) in the case of a *BIPRU firm*, 150%; and
 - (ii) in the case of an *insurer*, 200%; or
 - (b) the market price of the conversion instruments issued in relation to one unit of the original capital item (plus any cash element of the redemption) may be greater than the issue price of that original capital item.
- (3) All determinations under this *rule* are made as at the date of issue of the original capital item.

2.2.139

FCA PRA

R

In ■ GENPRU 2.2.138 R to ■ GENPRU 2.2.142 R:

- (1) the original capital item means the capital item that is being redeemed; and
- (2) the conversion instrument means the *tier one capital* to be issued on its redemption.

2.2.140

FCA PRA

R

In ■ GENPRU 2.2.138 R to ■ GENPRU 2.2.142 R, the conversion ratio means the ratio of:

- (1) the number of units of the conversion instrument that the *firm* must issue to satisfy its redemption obligation (so far as it is to be satisfied by the issue of conversion instruments) in respect of one unit of the original capital item; to
- (2) one unit of the original capital item.

2.2.141

FCA PRA

R

In ■ GENPRU 2.2.138 R to ■ GENPRU 2.2.142 R, the conversion ratio as at the date of issue of the original capital item is calculated as if the original capital item were redeemable at that time.

2.2.142

FCA PRA

R

If the conversion instruments or the original capital item are subdivided or consolidated or subject to any other occurrence that would otherwise result in like not being compared with like, the conversion ratio calculation in ■ GENPRU 2.2.138 R must be adjusted accordingly.

2.2.143

FCA PRA

G

- (1) The significance of the limitations on conversion in ■ GENPRU 2.2.138 R (2) can be seen in the example in this paragraph, which uses the conversion ratio applicable to an *insurer*.
- (2) An *insurer* issues innovative notes with a par value of £100 each. The terms of the instrument provide that if the instrument is not called at par at the first call date the notes convert into a variable number of ordinary *shares*.
- (3) If the market price of the ordinary *shares* is 400 pence per share on the day of issue of the innovative notes then the maximum number of ordinary *shares* (M) that a single £100 par value innovative note can be converted into is calculated as follows:
 - (a) $M = \text{Par value of innovative instrument} * 200\% / \text{market value of ordinary share}$;
 - (b) $M = £100 * 2 / £4 = 50 \text{ shares}$.
- (4) The practical effect is that conversion will result in the holder of an innovative capital note receiving ordinary *shares* equal to the par value of that note only when the market price of the ordinary *shares* remains above half the market price of the *shares* at the date of issue of the notes.
- (5) If the market price of the ordinary *shares* fell by half to 200 pence, the maximum permitted number of *shares* (50) would have to be issued in order to give an investor in the innovative note ordinary *shares* with a market value equal to £100. If the market price of the ordinary *shares* fell below 200 pence, the issue of the maximum permitted number of ordinary *shares* would have a market value below £100.

2.2.144

FCA PRA

G

- (1) In addition to the maximum conversion ratios of 200% for an *insurer* and 150% for a *BIPRU firm*, ■ GENPRU 2.2.138 R (2)(b) does not permit a *firm* to issue *shares* that would have a market value that exceeds the issue price of the instrument being redeemed.
- (2) In the example in ■ GENPRU 2.2.143 G, if the market value of the ordinary *shares* was 250 pence at the conversion date, the maximum number of ordinary *shares* that may be issued to satisfy the redemption of one of the £100 par value innovative notes would be 40 (= £100 / £2.5).

- (1) This *rule* applies to a *potential tier one instrument* of a *firm* where either:
 - (a) the redemption proceeds; or
 - (b) any *coupon* on that capital item;

can be satisfied by the issue of another *capital instrument*.

- (2) A *firm* may only include an item of capital to which this *rule* applies in its *tier one capital resources* if the *firm* has authorised

and unissued *capital instruments* of the kind in question (and the authority to issue them):

- (a) that are sufficient to satisfy all such payments then due; and
- (b) are of such amount as is prudent in respect of such payments that could become due in the future.

R

FCA PRA

- (1) Where a *rule* in this section says that a particular treatment applies to an item of capital that is subject to a *step-up* of a specified amount, the question of whether that *rule* is satisfied must be judged by reference to the cumulative amount of all *step-ups* since the issue of that item of capital rather than just by reference to a particular *step-up*.
- (2) Where a *step-up* arises through a change from paying a *coupon* on a debt instrument to paying a dividend on a *share* issued in settlement of the *coupon*, any net cost to the *firm* arising from the different tax treatment of the dividend compared to the tax treatment of interest may be ignored for the purpose of assessing the effect of that *step-up*.

Step-ups: Limits on the amount of step-ups on tier one and two capital

2.2.147

R

FCA PRA

- (1) A *firm* may not include in its *tier one capital resources* a *tier one instrument* that is or may be subject to a *step-up* that does not meet the definition of moderate in the press release of the Basle Committee on Banking Supervision of 27th October 1998 called "Instruments eligible for inclusion in Tier 1 capital".
- (2) For the purpose of (1) the words in that press release "than, at national supervisory discretion, either" are replaced by "than the higher of the following two amounts".
- (3) The calculations required by this *rule* and ■ GENPRU 2.2.151 R must be carried out as at the date of issue of the relevant instrument.
- (4) A *BIPRU firm* may not include a *capital instrument* in its *tier one capital resources* if it is redeemable and subject to more than one *step-up*.

2.2.148

G

FCA PRA

The effect of ■ GENPRU 2.2.147 R is that for inclusion in *tier one capital resources*, *step-ups* in instruments should be moderate. A moderate *step-up* for these purposes is one which results in an increase over the initial rate that is no greater than the higher of the following two amounts:

- (1) 100 basis points, less the swap spread between the initial index basis and the stepped-up index basis; or

- (2) 50% of the initial credit spread, less the swap spread between the initial index basis and the stepped-up index basis.

2.2.149

FCA PRA

G

If a *coupon* paid on an item of capital is initially set at a specified spread above an index (the initial index basis), and the *coupon* moves to being set relative to another index (the stepped up index basis), there will be an implied *step-up* (positive or negative) even if the specified spread does not change. This is because each index may itself include a spread relative to the risk free rate and this spread may differ between the two indexes. The deduction of the swap spread in ■ GENPRU 2.2.148 G (1) and ■ (2) above adjusts for this difference.

2.2.150

FCA PRA

G

Where the *step-up* involves a conversion from fixed to floating (or vice versa), or a switch in basis index, the swap spread should be fixed at pricing date, reflecting the differential in pricing between indices at the time. The significance of deducting the swap spread can be seen by the following example:

- (1) the pricing date:
- (a) 10 year gilts (G) = 5.5% (the initial index basis);
 - (b) 3 month LIBOR is the stepped up index basis and the 10 year mid swap rate (L) = 5.9%;
 - (c) initial fixed *coupon* rate = G + 200bp;
 - (d) swap spread = 0.4% (= 5.9% - 5.5%);
 - (e) initial fixed coupon rate = 7.5%;
 - (f) the swap spread shows that there is 40bps of spread in the stepped up index basis relative to the initial index basis; and
 - (g) the initial fixed coupon rate of 7.5% is equivalent to the mid swap rate + 160bp, or L + 200bp - the swap spread;
- (2) pricing of *stepped-up* rate at year 10 with *step-up* of 100bp without deducting swap spread:
- (a) *stepped-up* floating rate = L + 200 + 100bp step-up = 8.9%; and
 - (b) effective *step-up* from initial fixed rate of 140bp (= 8.9% - 7.5%); and
- (3) pricing of *stepped-up* rate at year 10 with step-up of 100bp with deduction of the swap spread:
- (a) *stepped-up* floating *coupon* rate = L + 200 less 40bp swap spread (difference between 5.5% and 5.9%) + 100bp step-up = 8.5%
 - (b) effective *step-up* from initial rate of 100bp (= 8.5% - 7.5%).

- (1) the instrument is fungible with other instruments (the "existing stock") that are included in the *firm's tier one capital resources* (in the case of ■ GENPRU 2.2.147 R) or *tier two capital resources* (in the case of ■ GENPRU 2.2.151 R);
- (2) (if there has been no more than one previous issue of the existing stock) the existing stock complied with those limits on its date of issue;
- (3) (if there has been more than one previous issue of the existing stock) the first such issue of the existing stock complied with those limits on its date of issue; and

- (2) A *firm* must not include in its *tier two capital resources* a *capital instrument* that is or may become subject to a *step-up* if that *step-up* can arise earlier than the fifth anniversary of the date of issue of that item of capital.

2.2.154 FCA PRA G Debt instruments containing embedded options, e.g. issues containing options for the interest rate after the *step-up* to be at a margin over the higher of two (or more) reference rates, or for the interest rate in the previous period to act as a floor, may affect the funding costs of the borrower and imply a *step-up*. In such circumstances, a *firm* may wish to seek individual *guidance* on the application of the *rules* relating to *step-ups* to the *capital instrument* in question. See ■ SUP 9 (Individual guidance) for the process to be followed when seeking individual *guidance*.

Deductions from tier one: Intangible assets

2.2.155 FCA PRA R A *firm* must deduct from its *tier one capital resources* the value of intangible assets.

2.2.156 FCA G Intangible assets include goodwill as defined in accordance with the requirements referred to in ■ GENPRU 1.3.4 R (General requirements: accounting principles to be applied) applicable to the *firm*. The treatment of deferred acquisition cost assets for *BIPRU firms* is dealt with in ■ GENPRU 1.3 (Valuation); they should not be deducted as an intangible asset.

2.2.156A G Intangible assets include goodwill as defined in accordance with the requirements referred to in ■ GENPRU 1.3.4 R (General requirements: accounting principles to be applied) applicable to the *firm*.

Tier two capital: General

2.2.157 FCA PRA G *Tier two capital resources* are split into upper and lower tiers. A major distinction between *upper* and *lower tier two capital* is that, except as provided by ■ GENPRU 2.2.26A R for *BIPRU firms*, only perpetual instruments may be included in *upper tier two capital* whereas dated instruments, such as fixed term *preference shares* and dated subordinated debt, may be included in *lower tier two capital*.

2.2.158 FCA PRA G *Tier two instruments* are *capital instruments* that combine the features of debt and equity in that they are structured like debt, but exhibit some of the loss absorption and funding flexibility features of equity.

General conditions for eligibility as tier two capital instruments

2.2.159 FCA PRA R A *capital instrument* must not form part of the *tier two capital resources* of a *firm* unless it meets the following conditions:

- (1) the claims of the creditors must rank behind those of all unsubordinated creditors;
- (2) the only events of default must be non-payment of any amount falling due under the terms of the *capital instrument* or the winding-up of the *firm* and any such event of default must not prejudice the subordination in (1);
- (3) to the fullest extent permitted under the laws of the relevant jurisdictions, the remedies available to the subordinated creditor in the event of non-payment or other breach of the terms of the

capital instrument must (subject to ■ GENPRU 2.2.161 R) be limited to petitioning for the winding-up of the *firm* or proving for the debt in the liquidation or administration;

- (4) any:
 - (a) remedy permitted by (3);
 - (b) remedy that cannot be excluded under the laws of the relevant jurisdictions as referred to in (3);
 - (c) remedy permitted by ■ GENPRU 2.2.161 R; and
 - (d) terms about repayment as referred to in (5);must not prejudice the matters in (1) and (2) and in particular any damages permitted by (b) or (c) and repayment obligation must be subordinated in accordance with (1);
- (5) without prejudice to (1), the debt must not become due and payable before its stated final maturity date (if any) except on an event of default complying with (2) or as permitted by ■ GENPRU 2.2.172 R (Repayment at the option of the issuer) or ■ GENPRU 2.2.194 R (2) (Repayment of *lower tier two capital* at the option of the holder) and any remedy described in (4)(a) to (c) must not prejudice this requirement;
- (6) the debt agreement or terms of the *capital instrument* are governed by the law of England and Wales, or of Scotland or of Northern Ireland;
- (7) to the fullest extent permitted under the laws of the relevant jurisdictions, creditors must waive their right to set off amounts they owe the *firm* against subordinated amounts included in the *firm's capital resources* owed to them by the *firm*;
- (8) the terms of the *capital instrument* must be set out in a written agreement that contains terms that provide for the conditions set out in (1) to (7);
- (9) the debt must be unsecured and fully paid up;
- (10) the description of its characteristics used in its marketing is consistent with the characteristics required to satisfy (1) to (9) and, where it applies, ■ GENPRU 2.2.271 R (Other requirements: insurers carrying on with-profits business (Insurer only));
- (11) the amount of the item included must be net of any foreseeable tax charge at the moment of its calculation or must be suitably adjusted in so far as such tax charges reduce the amount up to which that item may be applied to cover risks or losses; and

(12) the *firm* has obtained a properly reasoned independent legal opinion from an appropriately qualified individual stating that the requirements in (1) to (7) and (insofar as it relates to whether the *capital instrument* is unsecured) (9) have been met.

2.2.160 **R** A holder of a non-deferred share of a *building society* must be treated as a senior unsecured creditor of that *building society* for the purpose of ■ GENPRU 2.2.159 R.

**General conditions for eligibility as tier two capital instruments:
Additional remedies**

2.2.161 **R** A *capital instrument* may be included in a *firm's tier two capital resources* even though the remedies available to the subordinated creditor go beyond those referred to in ■ GENPRU 2.2.159 R (3), if the following conditions are satisfied:

FCA PRA

- (1) those remedies are not available for failure to pay any amount of principal, interest or expenses or in respect of any other payment obligation; and
- (2) those remedies do not in substance amount to remedies to recover payment of the amounts in (1).

2.2.162 **G** If damages are a remedy that cannot be excluded as referred to in ■ GENPRU 2.2.159 R (3) those damages should be subordinated in accordance with ■ GENPRU 2.2.159 R (1). Damages permitted by ■ GENPRU 2.2.161 R should also be subordinated in accordance with ■ GENPRU 2.2.159 R (1).

FCA PRA

**General conditions for eligibility as tier two capital instruments:
Alternative governing laws**

2.2.163 **R** ■ GENPRU 2.2.159 R (6) does not apply if the *firm* has obtained a properly reasoned independent legal opinion from an appropriately qualified individual confirming that the same degree of subordination has been achieved under the law that governs the debt and the agreement as that which would have been achieved under the laws of England and Wales, Scotland, or Northern Ireland.

FCA PRA

General conditions for eligibility as tier two capital instruments: Standard form documentation

2.2.164 **G** The *appropriate regulator* is more concerned that the subordination provisions listed in ■ GENPRU 2.2.159 R should be effective than that they should follow a particular form. The *appropriate regulator* does not, therefore, prescribe that the loan agreement or *capital instrument* should be drawn up in a standard form.

Guidance on the general conditions for eligibility as tier two capital instruments

2.2.165
FCA PRA

G

For the purposes of ■ GENPRU 2.2.159 R (5) the debt agreement or terms of the instrument should not contain any clause which might require early repayment of the debt (e.g. cross default clauses, negative pledges and restrictive covenants). A cross default clause is a clause which says that the loan goes into default if any of the borrower's other loans go into default. It is intended to prevent one creditor being repaid before other creditors, e.g. obtaining full repayment through the courts. A negative pledge is a clause which puts the loan into default if the borrower gives any further charge over its assets. A restrictive covenant is a term of contract that directly, or indirectly, could lead to early repayment of the debt. Some covenants, e.g. relating to the provision of management information or ownership restrictions, are likely to comply with ■ GENPRU 2.2.159 R (3) as long as monetary redress is ruled out, or any payments are covered by the subordination clauses.

2.2.166
FCA PRA

G

■ GENPRU 2.2.159 R (3) allows a *capital instrument* to form part of the *tier two capital resources* even though the laws of the relevant jurisdiction do not allow remedies to be limited in the way described there. For example it is not possible to limit certain remedies in the case of an issue in the United States that is SEC-registered and subject to the provisions of the Trust Indenture Act.

2.2.167
FCA PRA

G

The purpose of ■ GENPRU 2.2.159 R (7) is to ensure that all of the *firm's* assets are available to *consumers* ahead of subordinated creditors. The waiver should apply both before and during liquidation or administration.

A *firm* must not amend the terms of the capital or the documents referred to in ■ GENPRU 2.2.159 R (8) unless:

- (1) at least one *Month* before the amendment is due to take effect, the *firm* has given the *appropriate regulator* notice in writing of the

proposed amendment and the *appropriate regulator* has not objected; and

- (2) that notice includes confirmation that the legal opinions referred to in ■ GENPRU 2.2.159 R (12) and, if applicable,
 - GENPRU 2.2.163 R (General conditions for eligibility as tier two *capital instruments*: Alternative governing laws) and
 - GENPRU 2.2.181 R (Legal opinions for *upper tier two instruments*), continue in full force and effect in relation to the terms of the debt and documents after any proposed amendment.

Redemption of tier two instruments

2.2.172
FCA PRA

R A *tier two instrument* may be redeemable at the option of the *firm*, but any term of the instrument providing for the *firm* to have the right to exercise such an option must not provide for that right to be exercisable earlier than the fifth anniversary of the date of issue of the instrument.

2.2.173
FCA PRA

R ■ GENPRU 2.2.71 R to ■ GENPRU 2.2.73 G (*Tier one instruments* may be redeemed by the issuer before the fifth anniversary in limited circumstances) apply to ■ GENPRU 2.2.172 R in the same way as they do to ■ GENPRU 2.2.70 R (The issuer should not redeem *tier one capital* before the fifth anniversary).

2.2.174
FCA PRA

R In relation to a *tier two instrument*, a *firm* must notify the *appropriate regulator*:

- (1) in the case of an *insurer*, six *Months*; and
- (2) in the case of a *BIPRU firm*, one *Month*;

before it becomes committed to the proposed repayment (unless that *firm* intends to repay an instrument on its final maturity date) . When giving notice, the *firm* must provide details of its position after such repayment in order to show how it will:

- (3) meet its *capital resources requirement*; and
- (4) have sufficient financial resources to meet the *overall financial adequacy rule*.

2.2.177

R

FCA PRA

A *capital instrument* must (in addition to meeting the requirements of the *rules* about eligibility for inclusion in *tier two capital*) meet the following conditions before it can be included in a *firm's upper tier two capital resources*:

- (1) it must have no fixed maturity date;
- (2) the terms of the instrument must provide for the *firm* to have the option to defer any *coupon* on the debt, except that the *firm* need not have that right in the case of a *coupon* payable in the form of an item of capital that is included in the *same stage of capital* or a *higher stage of capital* as that first item of capital;
- (3) the terms of the instrument must provide for the loss-absorption capacity of the *capital instrument* and unpaid *coupons*, whilst enabling the *firm* to continue its business;
- (4) it meets the conditions in ■ GENPRU 2.2.169 R (Connected transactions) and ■ GENPRU 2.2.180 R (Loss absorption); and
- (5) the terms of the instrument are such that either the instrument or debt is not redeemable or repayable or it is repayable or redeemable only at the option of the *firm*.

2.2.178

- (1) The purpose of ■ GENPRU 2.2.177 R (2) is to ensure that a *firm* which issues an item of capital with a *coupon* retains flexibility over the payments of such *coupon* and can preserve cash in times of financial stress. However, a *firm* may include, as part of the capital instrument terms, a right to make payments of a *coupon* mandatory if an item of capital becomes ineligible to form part of its *capital resources* (for example, through a change in the relevant *rules*) and the *firm* has notified the *appropriate regulator* that the instrument is ineligible.
- (2) For the purpose of ■ GENPRU 2.2.177 R (2), ■ GENPRU 2.2.68 G (Dividend pushers) applies equally in relation to the inclusion of an instrument in *upper tier two capital resources*.
- (3) ■ GENPRU 2.2.26A R provides an exception, in the case of a *BIPRU firm*, to the *rule* that instruments must have no fixed maturity date to be eligible for *upper tier two capital resources*.

FCA PRA

R

Upper tier two capital: Loss absorption

- (1) do not constitute a liability (actual, contingent or prospective) under section 123(2) of the Insolvency Act 1986; or
- (2) do constitute such a liability but the terms of the instrument are such that:
 - (a) any such liability is not relevant for the purposes of deciding whether:
 - (i) the *firm* is, or is likely to become, unable to pay its debts; or
 - (ii) its liabilities exceed its assets;
 - (b) a *person* (including but not limited to a holder of the instrument) is not able to petition for the winding up or administration of the *firm* or for any similar procedure in relation to the *firm* on the grounds that the *firm* is or may become unable to pay any such liability; and
 - (c) the *firm* is not obliged to take into account such a liability for the purposes of deciding whether or not the *firm* is, or may become, insolvent for the purposes of section 214 of the Insolvency Act 1986 (wrongful trading).

- (1) This *rule* applies to a *BIPRU firm*.
- (2) A *BIPRU firm* must, in relation to equities held in the available-for-sale financial assets category:
 - (a) deduct any net losses at stage E of the calculation in the *capital resources table* (Deductions from tier one capital); and
 - (b) include any net gains (after deduction of deferred tax) in revaluation reserves at stage G of the calculation in the *capital resources table* (Upper tier two capital).

Lower tier two capital

2.2.194 **R** A *firm* may include a *capital instrument* in its *lower tier two capital resources* if (in addition to meeting the requirements of the *rules* about eligibility for inclusion in *tier two capital*) either the holder has no right to repayment or it satisfies either of the following conditions:

FCA

PRA

- (1) it has an original maturity of at least five years; or
- (2) it is redeemable on notice from the holder, but the period of notice of repayment required to be given by the holder is five years or more.

2.2.195

FCA PRA

G

A *firm* may include perpetual *capital instruments* that do not meet the conditions in ■ GENPRU 2.2.177 R (Eligibility conditions for *upper tier two capital*) in *lower tier two capital resources* if they meet the general conditions described in ■ GENPRU 2.2.159 R (General conditions for eligibility as tier two *capital instruments*).

2.2.196

FCA PRA

R

- (1) For the purposes of calculating the amount of a *lower tier two instrument* which may be included in a *firm's capital resources*:
 - (a) in the case of an instrument with a fixed maturity date, in the final five years to maturity; and
 - (b) in the case of an instrument with or without a fixed maturity date but where five years' or more notice of redemption or repayment has been given, in the final five years to the date of redemption or repayment;

the principal amount must be amortised on a straight line basis.
- (2) If a *firm* gives notice of the redemption or repayment of a *lower tier two instrument* and (1) does not apply, the *firm* must no longer include it in its *lower tier two capital resources*.

2.2.197

FCA PRA

G

If a *firm* wishes to include in *lower tier two capital resources* an instrument with or without a fixed maturity date but where less than five years' notice of redemption or repayment has been given, it should seek individual *guidance* from the *appropriate regulator*.

The effect of swaps on debt capital

FCA PRA

R

■ GENPRU 2.2.198 R to ■ GENPRU 2.2.201 R apply to a *tier one instrument*, *tier two instrument* or *tier three instrument* of a *firm* that is treated as a liability under the accounting framework to which it is subject as referred to in ■ GENPRU 1.3.4 R (General requirements: accounting principles to be applied) (a "debt instrument").

2.2.199

FCA PRA

R

A *firm* must recognise for the purpose of this section any effect that changes in exchange rates or interest rates have on a debt instrument (as defined in ■ GENPRU 2.2.198 R) under the accounting framework to which the *firm* is subject as referred to in ■ GENPRU 1.3.4 R (General requirements: accounting principles to be applied).

2.2.200

FCA PRA

R

A *firm* must recognise, in accordance with ■ GENPRU 2.2.201 R, the effect of a *foreign currency* hedge on a debt instrument (as defined in ■ GENPRU 2.2.198 R) denominated in a *foreign currency* or of an interest rate hedge on a fixed rate *coupon* debt instrument if:

- (1) the accounting framework to which the *firm* is subject as referred to in ■ GENPRU 1.3.4 R (General requirements: accounting principles to be applied) provides for a fair value hedge accounting relationship between a liability and its related hedge;
- (2) such a relationship exists under that accounting framework between that debt instrument and that hedge;
- (3) (if the debt instrument is a *tier one instrument*) the *firm's* obligations under that hedge comply with the conditions in ■ GENPRU 2.2.64 R to ■ GENPRU 2.2.65 R (General conditions for eligibility as tier one capital);
- (4) (if the debt instrument is a *tier two instrument* or an *upper tier three instrument*) the *firm's* obligations under that hedge comply with the conditions in ■ GENPRU 2.2.159 R to ■ GENPRU 2.2.169 R (General conditions for eligibility as tier two capital instruments) as modified, in the case of an *upper tier three instrument*, by ■ GENPRU 2.2.244 R (Application of *tier two capital rules* to *tier three capital debt*) except as follows:
 - (a) ■ GENPRU 2.2.159 R (9) only applies to the extent that it requires that hedge to be unsecured; and
 - (b) ■ GENPRU 2.2.159 R (12) (legal opinion) does not apply.

2.2.201
FCA PRA

R A *firm* must recognise the effect of a hedge as referred to in ■ GENPRU 2.2.200 R by including the net accounting fair value of the hedging instrument in the valuation of the debt instrument (as defined in ■ GENPRU 2.2.198 R).

Deductions from tiers one and two: Qualifying holdings (bank or building society only)

2.2.202

R ■ GENPRU 2.2.202 R to ■ GENPRU 2.2.207 R only apply to a *bank* or *building society*.

2.2.203

R A *qualifying holding* is a direct or indirect holding of a *bank* or *building society* in a non-financial *undertaking* which represents 10% or more of the capital or of the voting rights or which makes it possible to exercise a significant influence over the management of that *undertaking*.

2.2.204

R For the purpose of ■ GENPRU 2.2.203 R, a non-financial *undertaking* is an *undertaking* other than:

- (1) a *credit institution* or *financial institution*;
- (2) an *undertaking* whose exclusive or main activities are a direct extension of banking or concern services ancillary to banking,

such as leasing, factoring, the management of unit trusts, the management of data processing services or any other similar activity; or

(3) an *insurer*.

2.2.205 **R** The amount of *qualifying holdings* that a *bank* or *building society* must deduct in the calculation in the *capital resources table* is:

- (1) (if the *firm* has one or more *qualifying holdings* that exceeds 15% of its relevant *capital resources*) the sum of such excesses; and
- (2) to the extent not already deducted in (1), the amount by which the sum of each of that *firm's qualifying holdings* exceeds 60% of its relevant *capital resources*.

2.2.206 **R** The relevant *capital resources* of a *firm* mean for the purposes of this *rule* the sum of the amount of *capital resources* calculated at stages L (Total tier one capital plus tier two capital) and Q (Total tier three capital) of the calculation in the *capital resources table* as adjusted in accordance with the following:

- (1) the *firm* must not take into account the items referred to in any of the following:
 - (a) ■ GENPRU 2.2.190 R to ■ GENPRU 2.2.193 R (surplus provisions); or
 - (b) ■ GENPRU 2.2.236 R (*expected loss* amounts and other negative amounts); or
 - (c) ■ GENPRU 2.2.237 R (*securitisation positions*);
- (2) the *firm* must make the deductions to be made at stage S of the calculation in the *capital resources table* (Deductions from total capital); and
- (3) the *firm* need not deduct any *excess trading book position* under (2).

2.2.207 **R** The following are not included as *qualifying holdings*:

- (1) *shares* that are not held as investments; or
- (2) *shares* that are held temporarily during the normal course of underwriting; or
- (3) *shares* held in a *firm's* name on behalf of others.

Deductions from tiers one and two: Material holdings (BIPRU firm only)

FCA

(1) Subject to (2) and (3), a *material holding* is:

- (a) a *BIPRU firm's* holdings of *shares* and any other interest in the capital of an individual *credit institution* or *financial institution* (held in the *non-trading book* or the *trading book* or both) exceeding 10% of the *share* capital of the issuer, and, where this is the case, any holdings of subordinated debt of the same issuer are also included as a *material holding*; the full amount of the holding is a *material holding*; or
- (b) a *BIPRU firm's* holdings of *shares*, any other interest in the capital and subordinated debt in an individual *credit institution* or *financial institution* (held in the *non-trading book* or the *trading book* or both) not deducted under (a) if the total amount of such holdings exceeds 10% of that *firm's capital resources* at stage N (Total tier one capital plus tier two capital after deductions) of the calculation in the *capital resources table* (calculated before deduction of its *material holdings*); only the excess amount is a *material holding*; or
- (c) a *bank* or *building society's* aggregate holdings in the *non-trading book* of *shares*, any other interest in the capital, and subordinated debt in all *credit institutions* or *financial institutions* not deducted under (a) or (b) if the total amount of such holdings exceeds 10% of that *firm's capital resources* at stage N of the calculation in the *capital resources table* (calculated before deduction of its *material holdings*); only the excess amount is a *material holding*; or
- (d) a *material insurance holding*.

(2) If a *BIPRU firm* holds *shares* in the capital of Business Growth Fund plc or another *financial institution* which makes *venture capital investments* (in this section and its related annexes, a "Venture Capital Investor") and the following conditions are met:

- (a) the sole business of the Venture Capital Investor is the making of *venture capital investments* together with the performance of *ancillary activities* in relation to the administration of the *venture capital investments*;
- (b) none of the *venture capital investments* made by the Venture Capital Investor is an investment (direct or indirect) in:
 - (i) a *credit institution*; or

- (ii) a *financial institution* the principal activity of which is to perform any activity other than the acquisition of holdings in other *undertakings*;
- (c) the relevant proportion of the Venture Capital Investor is included in the *firm's UK consolidation group* in accordance with ■ BIPRU 8.5; and
- (d) the *firm* assigns a *risk weight* to its *exposure* to the Venture Capital Investor as if it were an *equity exposure* to which the simple *risk weight* approach is applied as set out in ■ BIPRU 4.7.9 R to ■ BIPRU 4.7.12 R (and in calculating its *capital resources requirement* the *firm* must assign a *risk weight* to that *exposure* in accordance with those *rules* and notwithstanding that those *rules* would not otherwise apply to that calculation);

the Venture Capital Investor may be ignored for the purposes of determining whether there is a *material holding*.

- (3) If a *BIPRU firm* holds *shares* in the capital of a *subsidiary undertaking* which is a *financial institution* solely by reason of its principal activity being the acquiring of holdings and which in turn holds (directly or indirectly) *shares* in the capital of a Venture Capital Investor (in this section and its related annexes, a "Venture Capital Holding Company") and the following conditions are met:
 - (a) the Venture Capital Investor meets the conditions in (2)(a) and (b);
 - (b) the Venture Capital Holding Company is included in the *firm's UK consolidation group* in accordance with ■ BIPRU 8.5;
 - (c) the proportion of the value of the Venture Capital Holding Company attributable to investment in Venture Capital Investors and the proportion of the value of the Venture Capital Holding Company attributable to investment in other investments can be identified and valued on a regular basis; and
 - (d) the *firm* assigns a *risk weight* to its *exposure* to the proportion of the Venture Capital Holding Company that represents the value of its investment in Venture Capital Investors as if it were an *equity exposure* to which the simple *risk weight* approach is applied as set out in ■ BIPRU 4.7.9 R to ■ BIPRU 4.7.12 R (and in calculating its *capital resources requirement* the *firm* must assign a *risk weight* to that *exposure* in accordance with those *rules* and notwithstanding that those *rules* would not otherwise apply to that calculation);

the proportion of the *firm's* investment in the Venture Capital Holding Company that represents the value of its investment in Venture Capital Investors may be ignored for the purposes of

- determining whether there is a *material holding*. The proportion of the *firm's* investment in the Venture Capital Holding Company that represents the value of other investments is a *material holding*.
- 2.2.210** **G** For the purpose of the definition of a *material holding*, *share capital* includes *preference shares*. *Share premium* should be taken into account when determining the amount of *share capital*.
FCA
- 2.2.211** **R** When calculating the size of its *material holdings* a *firm* must only include an actual holding (that is, a long cash position). A *firm* must not net such holdings with a short position.
FCA
- 2.2.212** **R** A *material insurance holding* means the holdings of a *BIPRU firm* of items of the type set out in ■ GENPRU 2.2.213 R in any:
FCA
- (1) *insurance undertaking*; or
 - (2) *insurance holding company*;
- that fulfils one of the following conditions:
- (3) it is a *subsidiary undertaking* of that *firm*; or
 - (4) that *firm* holds a *participation* in it.
- 2.2.213** **R** An item falls into this provision for the purpose of ■ GENPRU 2.2.212 R if it is:
FCA
- (1) an *ownership share*; or
 - (2) subordinated debt or another item of capital that falls into Article 16(3) of the *First Non-Life Directive* or, as applicable, Article 27(3) of the *Consolidated Life Directive*.
- 2.2.214** **R** The amount to be deducted with respect to each *material insurance holding* is the higher of:
FCA
- (1) the book value of the *material insurance holding*; and
 - (2) the *solo capital resources requirement* for the *insurance undertaking* or *insurance holding company* in question calculated in accordance with Part 3 of ■ GENPRU 3 Annex 1 R (Method 3 of the capital adequacy calculations for financial conglomerates).
- 2.2.215** **R** For the purpose of the definition of a *material holding*, holdings must be valued using the valuation method which the holder uses for its external financial reporting purposes.

- (1) This paragraph gives *guidance* on how the calculation under ■ GENPRU 2.2.214 R (1) should be carried out where an *insurance undertaking* is accounted for using the embedded value method.
- (2) On acquisition, any "goodwill" element (that is, the difference between the acquisition value according to the embedded value method and the actual investment) should be deducted from *tier one capital resources*.
- (3) The embedded value should be deducted from the total of *tier one capital resources* and *tier two capital resources*.
- (4) Post-acquisition, where the embedded value of the *undertaking* increases, the increase should be added to reserves, while the new embedded value is deducted from total *capital resources*.
- (5) This means that the net impact on the level of total *capital resources* is zero, although *tier two capital resources* headroom will increase with any increase in *tier one capital resources* reserves.
- (6) Embedded value is the value of the *undertaking* taking into account the present value of the expected future inflows from existing life assurance business.

- (1) This paragraph gives *guidance* as to the amount to be deducted at Part 2 of stage M (Deductions from the totals of tier one and two) of ■ GENPRU 2 Annex 2 R (Capital resources table for a bank) and ■ GENPRU 2 Annex 3 R (Capital resources table for a building society) in respect of investments in *subsidiary undertakings* and *participations* (excluding any amount which is already deducted as *material holdings* or *qualifying holdings*).
- (2) The effect of those *rules* is to achieve the deduction of all investments in *subsidiary undertakings* and *participations* for *banks* and *building societies* by ensuring that amounts not already deducted under other *rules* are accounted for at this stage of the calculation of *capital resources*, except where the investment has been made in:
 - (a) a Venture Capital Investor and the conditions in ■ GENPRU 2.2.209R (2) are met; or
 - (b) a Venture Capital Holding Company and the conditions in ■ GENPRU 2.2.209R (3) are met;
- (3) The following investments in *subsidiary undertakings* and *participations* should be deducted at this stage:
 - (a) those not deducted in Part 1 of stage M because of the operation of the thresholds in ■ GENPRU 2.2.205 R (on qualifying holdings) and ■ GENPRU 2.2.209 R (on material holdings); and
 - (b) those which do not meet the definition of *qualifying holding* or *material holding*, but excluding investments in Venture Capital Investors which are ignored in accordance with ■ GENPRU 2.2.209R (2) and investments in Venture Capital Holding Companies which are ignored in accordance with ■ GENPRU 2.2.209R (3), for the purposes of determining whether there is a *material holding*.

- (4) For example, an investment in an *undertaking* which is not a *qualifying holding* under ■ GENPRU 2.2.204 R (2) (on the definition of a non-financial undertaking), that is whose exclusive or main activities are a direct extension of banking or concern services ancillary to banking, such as leasing, factoring, the management of unit trusts, the management of data processing services or any other similar activity, should be deducted at this stage.

A *reciprocal cross-holding* means a holding of the *BIPRU firm* of *shares*, any other interest in the capital, and subordinated debt, whether in the *trading* or *non-trading* book, in:

- (1) a *credit institution*; or
- (2) a *financial institution*;

that satisfies the following conditions:

- (3) the holding is the subject of an agreement or arrangement between the *BIPRU firm* and either the issuer of the instrument in question or a member of a *group* to which the issuer belongs;
- (4) under the terms of the agreement or arrangement described in (3) the issuer invests in the *BIPRU firm* or in a member of the *group* to which that *BIPRU firm* belongs; and
- (5) the effect of that agreement or arrangement on the capital position of the *BIPRU firm*, the issuer, or any member of a *group* to which either belongs, under any relevant rules is significantly more beneficial than it is in economic terms, taking into account the agreement or arrangement as a whole.

Deductions from tiers one and two: Connected lending of a capital nature (bank only)

- 2.2.221 **R** (1) ■ GENPRU 2.2.221 R to ■ GENPRU 2.2.235 G only apply to a bank.
- (2) If a *firm* has elected to ignore an investment in a Venture Capital Investor or a Venture Capital Holding Company in accordance with ■ GENPRU 2.2.209R (2) or ■ (3), for the purposes of determining whether there is a *material holding*, ■ GENPRU 2.2.221 R to ■ GENPRU 2.2.233 R do not apply to any lending by the *firm* to that Venture Capital Investor or Venture Capital Holding Company, provided that any lending to the Venture Capital Holding Company is made to and deployed by the *firm* solely in connection with the Venture Capital Investor.
- 2.2.222 **R** *Connected lending of a capital nature* means all lending within ■ GENPRU 2.2.227 R or ■ GENPRU 2.2.229 R and guarantees within ■ GENPRU 2.2.231 R or ■ GENPRU 2.2.233 R.
- 2.2.223 **R** A *bank* must not deduct any item as *connected lending of a capital nature* to the extent that it falls to be deducted at Part 1 of stage M of the calculation in the *capital resources table* (Deductions for *material holdings*, *qualifying holdings* and certain other items) or as a *reciprocal cross-holding*.
- 2.2.224 **R** For the purpose of the *rules* in this section about *connected lending of a capital nature* and in relation to a *bank*, a connected party means another *person* ("P") who fulfils at least one of the following conditions and is not solo-consolidated with the *bank* under ■ BIPRU 2.1 (Solo consolidation):
- (1) P is *closely related* to the *bank*; or
 - (2) P is an *associate* of the *bank*; or
 - (3) the same *persons* significantly influence the *governing body* of P and the *bank*.
- 2.2.225 **R** For the purpose of ■ GENPRU 2.2.224 R, in relation to a *person* ("P") to which a *bank* has an *exposure* when P is acting on his own behalf and also an *exposure* to P when P acts in his capacity as a trustee, custodian or general partner of an investment trust, unit trust, venture capital or other investment fund, pension fund or similar fund (a "fund") the *bank* may choose to treat this latter *exposure* as an *exposure* to the fund, unless such treatment would be misleading.
- 2.2.226 **G** ■ BIPRU 10.3.13 G (*Guidance* on exposures to trustees) applies to ■ GENPRU 2.2.225 R .

- 2.2.227 **R** A loan is *connected lending of a capital nature* if:
- (1) it is made by the *bank* to a connected party; and
 - (2) it falls into ■ GENPRU 2.2.228 R.
- 2.2.228 **R** A loan falls into this *rule* for the purposes of ■ GENPRU 2.2.227 R (2) if, whether through contractual, structural, reputational or other factors:
- (1) based on the terms of the loan and the other knowledge available to the *bank*, the borrower would be able to consider it from the point of view of its characteristics as capital as being similar to *share* capital or subordinated debt; or
 - (2) the position of the lender from the point of view of maturity and repayment is inferior to that of the senior unsecured and unsubordinated creditors of the borrower.
- 2.2.229 **R** A loan is also *connected lending of a capital nature* if:
- (1) it funds directly or indirectly a loan to a connected party of the *bank* falling into ■ GENPRU 2.2.228 R or an investment in the capital of a connected party of the *bank*; and
 - (2) it falls into ■ GENPRU 2.2.228 R.
- 2.2.230 **G** It is likely that a loan is not *connected lending of a capital nature* if:
- (1) it is secured by collateral that is eligible for the purposes of *credit risk mitigation* under the *standardised approach* to credit risk as set out in ■ BIPRU 5.4 (Financial collateral) and ■ BIPRU 5.5 (Other funded credit risk mitigation); or
 - (2) it is repayable on demand (and should be treated as such for accounting purposes by the borrower and lender) and the *bank* can demonstrate that there are no potential obstacles to exercising the right to repay, whether contractual or otherwise.
- 2.2.231 **R** A guarantee is *connected lending of a capital nature* if it is a guarantee by the *bank* of a loan from a third party to a connected party of the *bank* and:
- (1) the loan meets the requirements of ■ GENPRU 2.2.228 R; or
 - (2) the rights that the *bank* would have against the borrower with respect to the guarantee meet the requirements of ■ GENPRU 2.2.228 R (2).

2.2.232 **R** A guarantee is also *connected lending of a capital nature* if it is a guarantee by the *bank* of a loan falling into ■ GENPRU 2.2.229 R (1); and

- (1) the loan meets the conditions in ■ GENPRU 2.2.228 R; or
- (2) the guarantee meets the conditions in ■ GENPRU 2.2.231 R (2).

2.2.233 **R** The amount of a guarantee that constitutes *connected lending of a capital nature* that a *firm* must deduct is the amount guaranteed.

2.2.234 **G** A loan may initially fall outside the definition of *connected lending of a capital nature* but later fall into it. For example, if the initial lending to a connected party is subsequently downstreamed to another connected party the relationship between the *bank* and the ultimate borrower may be such that, looking at the arrangements as a whole, the *undertaking* to which the *bank* lends is able to regard the loan to it as being capable of absorbing losses.

2.2.235 **G** Lending to a connected party will not normally be *connected lending of a capital nature* where that party:

- (1) is acting as a vehicle to pass funding to an unconnected party; and
- (2) has no other creditors whose claims could be senior to those of the lender.

Deductions from tiers one and two: Expected losses and other negative amounts (BIPRU firm only)

2.2.236 **R** A BIPRU firm calculating *risk weighted exposure amounts* under the IRB approach must deduct:

- (1) any negative amounts arising from the calculation in ■ BIPRU 4.3.8 R (Treatment of expected loss amounts); and
- (2) any *expected loss* amounts calculated in accordance with ■ BIPRU 4.7.12 R (*Expected loss* amounts under the simple risk weight approach to calculating *risk weighted exposure amounts* for *exposures* belonging to the *equity exposure IRB exposure class*) or ■ BIPRU 4.7.17 R (*Expected loss* amounts under the PD/LGD approach).

Deductions from tiers one and two: Securitisation positions (BIPRU firm only)

2.2.237 **R** A BIPRU firm calculating *risk weighted exposure amounts* under the IRB approach or the *standardised approach* to credit risk must deduct from its *capital resources* the following:

FCA

- (1) the exposure amount of *securitisation positions* which receive a *risk weight* of 1250% under ■ BIPRU 9 (Securitisation), unless the *firm* includes the *securitisation positions* in its calculation of *risk*

weighted exposure amounts (see ■ BIPRU 9.10 (Reduction in risk-weighted exposure amounts)); and

- (2) the exposure amount of *securitisation positions* in the *trading book* that would receive a *risk weight* of 1250% if they were in the *firm's non-trading book*.

Tier three capital: lower tier three capital resources (BIPRU firm only)

2.2.246

FCA

R

■ GENPRU 2.2.246 R to ■ GENPRU 2.2.249 R only apply to a *BIPRU firm*.

2.2.247

FCA

R

A *BIPRU firm's* net interim *trading book* profits mean its net *trading book* profits adjusted as follows:

- (1) they are net of any foreseeable charges or dividends and less net losses on its other business; and
- (2) a *firm* must not take into account items that have already been included in the calculation of *capital resources* as part of the calculation of the following items:
 - (a) interim net profits (see stage (A) of the *capital resources table*); or
 - (b) interim net losses or material interim net losses (see stage (A) of the *capital resources table*); or
 - (c) profit and loss and other reserves (see stage (A) of the *capital resources table*).

2.2.248

FCA

R

Trading book profits and losses, other than those losses to which ■ GENPRU 2.2.86 R (2) (Valuation adjustment and reserves) refers, originating from valuation adjustments or reserves as referred to in ■ GENPRU 1.3.29 R to ■ GENPRU 1.3.35A G (Valuation adjustments or

reserves) must be included in the calculation of net interim *trading book* profits and be added to or deducted from *tier three capital resources*.

2.2.249

FCA

R

Trading book valuation adjustments or reserves as referred to in ■ GENPRU 1.3.29 R to ■ GENPRU 1.3.35A G which exceed those made under the accounting framework to which a *firm* is subject must be treated in accordance with ■ GENPRU 2.2.248 R if not required to be treated under ■ GENPRU 2.2.86 R (2).

Deductions from total capital: Inadmissible assets (insurers only)

2.2.250

PRA

R

■ GENPRU 2.2.250 R to ■ GENPRU 2.2.253 G only apply to an *insurer*.

2.2.251

PRA

R

For the purposes of the *capital resources table*, an *insurer* which is not a *pure reinsurer* must deduct from total *capital resources* the value of any asset which is not an *admissible asset* as listed in ■ GENPRU 2 Annex 7 R (Admissible assets in insurance), unless the asset is held to cover *property-linked liabilities* or *index-linked liabilities* under ■ INSPRU 3.1.57 R or ■ INSPRU 3.1.58 R (Covering linked liabilities).

2.2.252

PRA

G

■ GENPRU 2.2.251 R does not apply to intangible assets which should be deducted from *tier one capital resources* under ■ GENPRU 2.2.155 R (Deductions from tier one: Intangible assets).

2.2.253

PRA

G

The list of *admissible assets* has been drawn with the aim of excluding assets:

- (1) for which a sufficiently objective and verifiable basis of valuation does not exist; or
- (2) whose realisability cannot be relied upon with sufficient confidence; or
- (3) whose nature presents an unacceptable custody risk; or
- (4) the holding of which may give rise to significant liabilities or onerous duties.

Deductions from total capital: Adjustments for related undertakings

2.2.254

PRA

R

■ GENPRU 2.2.254 R to ■ GENPRU 2.2.258 G only apply to an *insurer*.

2.2.255

PRA

R

An *insurer* must deduct from its *capital resources* the value of its investments in each of its *related undertakings* that is an *ancillary services undertaking*.

2.2.256

PRA

R

In relation to each of its *related undertakings* that is a *regulated related undertaking* (other than an *insurance undertaking*) an *insurer* must add to (if positive), at stage J in the *capital resources table* (Positive adjustments for related undertakings), or deduct from (if negative), at stage L in the *capital resources table* (Deductions from total capital), its *capital resources* the value of its *shares* in that *undertaking* calculated in accordance with ■ GENPRU 1.3.47 R (Shares in and debts due from related undertakings).

2.2.257
PRA

G

For the purposes of ■ GENPRU 2.2.255 R, investments must be valued at their accounting book value in accordance with ■ GENPRU 1.3.4 R (General requirements: accounting principles to be applied).

2.2.258
PRA

G

Related undertakings which are also *insurance undertakings* are not included in ■ GENPRU 2.2.256 R because an *insurer* that is a *participating insurance undertaking* is subject to the requirements of ■ INSPRU 6.1 (Group Risk: Insurance Groups).

Deductions from total capital: Illiquid assets (BIPRU investment firm only)

2.2.259
FCA

R

■ GENPRU 2.2.259 R to ■ GENPRU 2.2.262 G only apply to a *BIPRU firm*.

2.2.260
FCA

R

Illiquid assets means illiquid assets including

- (1) tangible fixed assets (except land and buildings if they are used by a *firm* as security for loans, but this exclusion is only up to the value of the principal outstanding on the loans); or
- (2) any holdings in the *capital resources* of *credit institutions* or *financial institutions*, except to the extent that:
 - (a) they have already been deducted as a *material holding*; or
 - (b) they are *shares* which are included in a *firm's trading book* and included in the calculation of the *firm's market risk capital requirement*; or
- (3) holdings of other *securities* which are not *readily realisable securities*; or
- (4) deficiencies of net assets in *subsidiary undertakings*; or
- (5) deposits which are not repayable within 90 days (except for payments in connection with margined *futures* or *options* contracts); or
- (6) loans and other amounts owed to a *firm* except where they are due to be repaid within 90 days; or
- (7) physical stocks except for *positions in physical commodities* which are included in the calculation of a *firm's commodity PRR*.

2.2.261
FCA

G

If a loan or other amount owing to a *firm* was originally due to be paid more than 90 days from the date of the making of the loan or the incurring of the payment obligation, as the case may be, it may be treated as liquid for the purposes of ■ GENPRU 2.2.260 R (6) where through the passage of time the remaining time to the contractual repayment date falls below 90 days.

2.2.262 FCA G If a loan or other amount is due to be paid within 90 days (whether measured by reference to original or remaining maturity), a *firm* should consider whether it can reasonably expect the amount owing to be paid within that period. If the *firm* cannot reasonably expect it to be paid within that period the *firm* should treat it as illiquid.

Deductions from total capital: Excess trading book position (bank or building society only)

2.2.263 R ■ GENPRU 2.2.263 R to ■ GENPRU 2.2.265 R only apply to a *bank* or *building society*.

2.2.264 R (1) The *excess trading book position* is the excess of:

- (a) a *bank* or *building society's* aggregate net long (including notional) *trading book positions in shares*, subordinated debt or any other interest in the capital of *credit institutions* or *financial institutions*;

over;

- (b) 25% of that *firm's capital resources* calculated at stage T (Total capital after deductions) of the *capital resources table* (calculated before deduction of the *excess trading book position*).

(2) Only the excess amount calculated under (1) must be deducted.

2.2.265 R The *standard market risk PRR rules* apply for establishing what is a net *position* and the amount and value of that *position* for the purposes of ■ GENPRU 2.2.264 R, ignoring *rules* which would otherwise exclude such *positions* from ■ BIPRU 7.2 (Interest rate PRR) or ■ BIPRU 7.3 (Equity PRR and basic interest rate PRR for equity derivatives) on the basis that they are to be deducted from a *bank* or *building society's capital resources*, or for any other reason.

Other capital resources: Unpaid share capital or initial funds and calls for supplementary contributions (Insurer only)

2.2.266 PRA G ■ GENPRU 2.2.266 G to ■ GENPRU 2.2.269 G only apply to an *insurer*.

2.2.267 PRA G Unpaid *share capital* or, in the case of a *mutual*, *unpaid initial funds* and calls for supplementary contributions are excluded from the *capital resources* of a *firm* except to the extent allowed in a *waiver* under section 138A of the *Act* (Modification or waiver of rules).

2.2.268 PRA G Subject to a *waiver*, under the *Insurance Directives* a maximum of one half of unpaid *share capital* or, in the case of a *mutual*, one half of the *unpaid initial fund* may be included in an *insurer's capital resources*, once the paid-up part amounts to 25% of that *share capital* or fund, up to 50% of total *capital resources*.

2.2.269

PRA

G

In the case of a *mutual* carrying on *general insurance business* and subject to a *waiver*, calls for supplementary contributions within the *financial year* may only be included in a *firm's capital resources* up to a maximum of 50% of the difference between the maximum contributions and the contributions actually called in, subject to a limit of 50% of total *capital resources*. In the case of a *mutual* carrying on *long-term insurance business*, the *Consolidated Life Directive* does not permit calls for supplementary contributions to be included in a *firm's capital resources*.

Other requirements: insurers carrying on with-profits business (Insurer only)

2.2.270

FCA PRA

R

■ GENPRU 2.2.270 R to ■ GENPRU 2.2.275 G only apply to an *insurer*.

2.2.270A

FCA PRA

G

■ GENPRU 2.2.271 R to ■ GENPRU 2.2.272 G and ■ GENPRU 2.2.274 G are made by both the *PRA* and *FCA* for the purpose of applying these provisions to *insurers* pursuant to the *statutory objectives*.

2.2.271

FCA PRA

R

An *insurer* carrying on *with-profits insurance business* must, in addition to the other requirements in respect of *capital resources* elsewhere in ■ GENPRU 2.2, meet the following conditions before a *capital instrument* can be included in that *insurer's capital resources*:

- (1) the *insurer* must manage the *with-profits fund* so that discretionary benefits under a *with-profits insurance contract* are calculated and paid disregarding, insofar as is necessary for its *customers* to be treated fairly, any liability the *firm* may have to make payments under the *capital instrument*;
- (2) the intention to manage the *with-profits fund* on the basis set out in (1) must be disclosed in the *firm's Principles and Practices of Financial Management*; and
- (3) no amounts, whether interest, principal, or other amounts, must be payable by the *firm* under the *capital instrument* if the *firm's* assets would then be insufficient to enable it to declare and pay under a *with-profits insurance contract* discretionary benefits that are consistent with the *firm's* obligations under the *FCA's Principle 6 (Customers' interests)*.

2.2.272

FCA PRA

G

The purpose of ■ GENPRU 2.2.271 R is to achieve practical subordination of *capital instruments* if they are to qualify as *capital resources* to the liabilities an *insurer* has to *with-profits policyholders*, including liabilities which arise from the regulatory duty (as regulated by the *FCA*) to treat *customers* fairly in setting discretionary benefits. (*FCA's Principle 6 (Customers' interests)* requires a *firm* to pay due regard to the interests of its customers and treat them fairly.) It is not sufficient for a *capital instrument* to be subordinated to such liabilities only on winding up of the *firm* because such liabilities to *policyholders* may have been reduced by the inappropriate use of management discretion to enable funds to be applied in repaying subordinated *capital instruments* before winding up proceedings commence.

2.2.273

PRA

G

■ GENPRU 2.2.271 R is an additional requirement to all other *rules* in this section concerning the eligibility of a *capital instrument* to count as a component of an *insurer's capital resources*. Subordinated debt instruments will be the main type of *capital instrument* to which this *rule* is relevant, including both *upper tier two* (undated) and *lower tier two* (dated) subordinated debt instruments. Subordinated debt instruments which are issued by a *related undertaking* are not intended to be covered by this *rule* and may be included in *group capital resources* as appropriate if the other eligibility criteria are met.

2.2.274

FCA PRA

G

■ GENPRU 2.2.64 R (10) and ■ GENPRU 2.2.159 R (10) contain provisions concerning the marketing of a *capital instrument*. In relation to a *firm* to which ■ GENPRU 2.2.271 R applies, in order to comply with ■ GENPRU 2.2.64 R (10) and ■ GENPRU 2.2.159 R (10), it should draw to the attention of subscribers the risk that payments may be deferred or cancelled in order to operate the *with-profits fund* so as to give priority to the payment of discretionary benefits to *with-profits policyholders*.

2.2.275

PRA

G

- (1) *Upper tier two instruments* should meet the requirements of ■ GENPRU 2.2.177 R (3) which goes beyond the requirement in ■ GENPRU 2.2.271 R (3) since it requires a *firm* to have the option to defer payments in all circumstances, not just if necessary to treat *customers* fairly. However, for *lower tier two instruments*, ■ GENPRU 2.2.271 R (3) represents an additional requirement since a failure to pay amounts of interest or principal on a due date must not constitute an event of default under ■ GENPRU 2.2.159 R (2) for *firms* carrying on *with-profits insurance business*.
- (2) For *firms* which are *realistic basis life firms* compliance with ■ GENPRU 2.2.271 R (3) would usually be achieved if the *capital instrument* provides that no amounts will be payable under it unless the *firm's capital resources* exceed its *capital resources requirement*. However, such *firms* should ensure that the terms of the *capital instrument* refer to *capital resources requirements* in force from time to time, including the current realistic reserving requirements and are not restricted to former minimum capital requirements based only on the *Insurance Directives'* required minimum margin of solvency. For *firms* which are not *realistic basis life firms*, compliance with ■ GENPRU 2.2.271 R (3) will probably require specific reference to be made to treating *customers* fairly in the terms of the *capital instrument*.

Public sector guarantees

2.2.276

FCA

R

A *BIPRU firm* may not include a guarantee from a state or public authority in its *capital resources*.

2.3 Application of GENPRU 2 to Lloyd's

Application of GENPRU 2.1

2.3.1 **R** ■ GENPRU 2.1 applies to the *Society* in accordance with ■ INSPRU 8.1.2 R.

PRA

2.3.2 **R** ■ GENPRU 2.1.38 R to ■ GENPRU 2.2.39 G apply to *managing agents* in accordance with ■ INSPRU 8.1.4 R.

PRA

2.3.3 **G** ■ GENPRU 2.1.13 R requires the *Society* to ensure, in relation to each *member's insurance business*, that *capital resources* equal to or in excess of the *member's capital resources* requirement (CRR) are maintained. ■ GENPRU 2.1 sets out the overall framework of the CRR. ■ INSPRU 1.1 sets out the calculation of the components of the *general insurance capital requirement* and the *long-term insurance capital requirement*.

PRA

2.3.4 **G** *Managing agents* are required to calculate the ECR for the purposes of carrying out *syndicate ICAs* under ■ INSPRU 7.1. As *with-profits insurance business* is not carried on through any *syndicate*, the calculation of the *with-profits insurance capital component* will not be applicable. ■ INSPRU 1.3 is not applied to Lloyd's.

PRA

Calculation of the MCR

2.3.5 **R** For the purposes of ■ GENPRU 2.1.24 R, the *Society* must calculate the MCR in respect of the *general insurance business* of each *member* as the higher of:

PRA

- (1) the *member's share* of the *base capital resources requirement* in respect of *general insurance business* for the *members* in aggregate; and
- (2) the *general insurance capital requirement* for the *members*, calculated according to ■ GENPRU 2.3.11 R.

2.3.6 **R** For the purposes of ■ GENPRU 2.3.5 R (1), the *Society* must determine the *member's share* by apportioning the *base capital resources requirement* in respect of *general insurance business* for the *members* in aggregate between *members* in proportion to the result for each *member* of ■ GENPRU 2.3.11 R.

PRA

2.3.7

PRA

R For the purposes of ■ GENPRU 2.1.25 R, the *Society* must calculate the MCR in respect of the *long-term insurance business* of each *member* as the higher of:

- (1) the *member's* share of the *base capital resources requirement* in respect of *long-term insurance business* for the *members* in aggregate; and
- (2) the sum of, for each *member*:
 - (a) the *long-term insurance capital requirement*; and
 - (b) the *resilience capital requirement*.

2.3.8

PRA

R For the purposes of ■ GENPRU 2.3.7 R (1), the *Society* must determine the *member's* share by applying to the aggregate long-term business *base capital resources requirement* the ratio of the result for the *member* of ■ GENPRU 2.3.7 R (2) to the aggregate of the results of ■ GENPRU 2.3.7 R (2) for all *members*.

Calculation of the base capital resources requirement

2.3.9

PRA

R The amount of the *base capital resources requirement* for the *members* in aggregate is:

- (1) for *general insurance business*, € 3.7 million; and
- (2) for *long-term insurance business*, € 3.7 million.

Calculation of the general insurance capital requirement

2.3.10

PRA

R For the purposes of ■ GENPRU 2.1.34 R, the *Society* must calculate the *general insurance capital requirement* for the *members* in aggregate as the higher of:

- (1) the aggregate for all *members* of the higher of, for each *member*, the result of the *premiums amount* and the *claims amount*; and
- (2) the *brought forward amount*.

2.3.11

PRA

R The *Society* must determine the *general insurance capital requirement* for each *member* by apportioning the result of ■ GENPRU 2.3.10 R between *members* on a fair and reasonable basis, provided that the *general insurance capital requirement* for a *member* must not be less than the higher of the result of the *premiums amount* and the *claims amount* for that *member*.

2.3.12

PRA

G The *Society* should calculate the *premiums amount* and the *claims amount* for each *member* on the basis of the *member's* own *general insurance business*, including *insurance business* that attaches to the reinsuring *member* for the purposes of GENPRU following an approved *reinsurance to close* (see ■ INSPRU 8.2.16 R).

2.3.13 **R** The *Society* must calculate the *general insurance capital requirement* it would have to determine under ■ GENPRU 2.1.34 R if it were an *insurer* carrying on all the *general insurance business* carried on by its *members*, but eliminating *inter-syndicate reinsurance* (the *Society GICR*).

2.3.14 **G** For the purpose of ■ GENPRU 2.3.13 R the *Society* may make appropriate approximations, taking reasonable care to avoid underestimating the *Society GICR*.

2.3.15 **R** The *Society* must determine each *member's* share of the *Society GICR* by allocating the *Society GICR* between the *members* in proportion to the result for each *member* of ■ GENPRU 2.3.11 R.

Application of GENPRU 2.2

2.3.16 **R** Subject to ■ GENPRU 2.3.18 R, ■ GENPRU 2.3.19 R and ■ GENPRU 2.3.21 R, ■ GENPRU 2.2 applies to *managing agents* and to the *Society* in accordance with:

- (1) for *managing agents*, ■ INSPRU 8.1.4 R; and
- (2) for the *Society*, ■ INSPRU 8.1.2 R.

2.3.17 **G** ■ GENPRU 2.1 sets out minimum *capital resources requirements* for a *firm* and for Lloyd's *members*. ■ GENPRU 2.2 sets out how, for the purpose of these requirements, *capital resources* are defined and measured. ■ GENPRU 2.2 applies:

- (1) to *managing agents* for their calculation of the *capital resources* managed by them in respect of each *syndicate* they manage (by reference, where there is a change in the underlying capital provision, to each open *syndicate* year); and
- (2) to the *Society* for its calculation of:
 - (a) each *member's capital resources*; and
 - (b) its own *capital resources*.

2.3.18 **R** ■ GENPRU 2.2.32 R to ■ GENPRU 2.2.41 R (Limits on the use of different forms of capital) do not apply to *managing agents*.

2.3.19 **R** ■ GENPRU 2.2.32 R to ■ GENPRU 2.2.41 R (Limits on the use of different forms of capital) do apply to the *Society* with respect to:

- (1) the *capital resources* requirements for the *members* in aggregate; and
- (2) the aggregate *capital resources* supporting the *insurance business* of all the *members*.

- 2.3.20 **R** ■ GENPRU 2.2.74 R does not apply to the *Society* or to *managing agents*.
PRA
- 2.3.21 **R** In this section (■ GENPRU 2.3), "the aggregate *capital resources* supporting the *insurance business* of all the *members*" are:
PRA
- (1) the aggregate of all the *members' capital resources* calculated under ■ GENPRU 2.3.25 R; and
 - (2) the *Society's capital resources* excluding callable contributions.
- Calculation of capital resources**

- 2.3.22 **R** The *capital resources table* applies with the modifications that:
PRA
- (1) *Core tier one capital* includes *Lloyd's members' contributions* in accordance with ■ GENPRU 2.3.34 R, subject, in the case of letters of credit, guarantees and verifiable sums arising out of life assurance policies, to compliance with ■ GENPRU 1.5.8 G to ■ GENPRU 1.5.12 R; and
 - (2) the *Society* may also recognise and value *callable contributions*, pursuant to ■ GENPRU 2.3.24 R.
- 2.3.23 **G** *Lloyd's member's contributions* are *admissible assets* under ■ GENPRU 2.3.34 R and include letters of credit, guarantees and verifiable sums arising out of life assurance policies held as *funds at Lloyd's*. Assets that may be valued as part of *capital resources* under PRU are not necessarily, however, permitted investments for *members* under the terms of any *Lloyd's trust deed*.
PRA
- 2.3.24 **R** In calculating its *capital resources*, the *Society* may, subject to ■ GENPRU 1.5.13 R to ■ GENPRU 1.5.14 R, recognise and value *callable contributions*.
PRA
- 2.3.25 **R** The *Society* must calculate each *member's capital resources* as the sum of:
PRA
- (1) a *member's* proportionate share of the *capital resources* held at *syndicate* level for each *syndicate* in which the *member* participates; and
 - (2) the value of a *member's funds at Lloyd's* after deducting liabilities in compliance with ■ GENPRU 1.5.18 R.
- 2.3.26 **R** In order to comply with ■ GENPRU 2.1.13 R the *Society* must ensure at all times that:
PRA
- (1) each *member's capital resources requirement* is covered by:
 - (a) that *member's capital resources*, calculated according to ■ GENPRU 2.3.25 R; and

(b) to the extent that (a) is insufficient, by the *Society's* own *capital resources*; and

(2) the *Society GICR* is covered by the aggregate *capital resources* supporting the *insurance business* of all the *members*.

2.3.27

PRA

R For the purposes of ■ GENPRU 2.3.26 R (1)(b), the *Society* must maintain at all times *capital resources* sufficient to meet the aggregate of, for each *member*, the amount, if any, by which the *member's capital resources* fall short of the *member's capital resources requirement*.

2.3.28

PRA

R The *Society* must calculate each *member's* share of the amount of *capital resources* required to comply with ■ GENPRU 2.2.33 R as the higher of:

(1) 1/3 of the *long-term insurance capital requirement* for the *members* in aggregate; and

(2) the *base capital resources requirement*;

allocated between the *members* in proportion to the result for each *member* of ■ GENPRU 2.3.7 R (2).

2.3.29

PRA

R For the purposes of ■ GENPRU 2.2.34 R, the *Society* must ensure that the aggregate *capital resources* supporting the *insurance business* of all the *members* meet the higher of:

(1) 1/3 of the *general insurance capital requirement* for the *members* in aggregate;

(2) 1/3 of the *Society GICR*; and

(3) the *base capital resources requirement*;

with the sum of the items listed in ■ GENPRU 2.2.34 R.

2.3.30

PRA

R The *Society* must calculate each *member's* share of the amount of *capital resources* required to comply with ■ GENPRU 2.2.34 R as the higher of:

(1) 1/3 of the *general insurance capital requirement* for the *members* in aggregate;

(2) 1/3 of the *Society GICR*; and

(3) the *base capital resources requirement*;

allocated between the *members* in proportion to the result for each *member* of ■ GENPRU 2.3.11 R.

Characteristics of tier one capital

2.3.31

PRA

R

A Lloyd's member's contribution may be included in tier one capital resources to the extent that:

- (1) the proceeds are immediately and fully available in respect of the member's insurance business at Lloyd's;
- (2) (except in relation to letters of credit), it complies with ■ GENPRU 2.2.64 R (3) or cannot be repaid to a member until all of the member's liabilities in respect of its insurance business at Lloyd's have been extinguished, covered or reinsured by an approved reinsurance to close;
- (3) it otherwise complies with ■ GENPRU 2.2.64 R (5) to ■ GENPRU 2.2.64 R (10).

Adjustments for related undertakings

2.3.32

PRA

R

■ GENPRU 2.2.256 R (Adjustment for regulated related undertakings other than insurance undertakings) applies to the Society with the modification that the Society must also value its insurance undertakings in accordance with ■ GENPRU 2.2.256 R.

2.3.33

PRA

R

If a related undertaking is an insurance undertaking which has a deficit in the capital resources available to cover its capital resources requirement, the Society must make provision for:

- (1) its proportionate share of that deficit; or
- (2) in the case of a subsidiary undertaking, the whole of that deficit.

Modification of GENPRU 2 Annex 7R for Lloyd's

2.3.34

PRA

R

In the case of members, Lloyd's members' contributions are included in ■ GENPRU 2 Annex 7 R and include:

- (1) letters of credit;
- (2) guarantees; and
- (3) verifiable sums arising out of life assurance policies;

held as funds at Lloyd's.

2.3.35

PRA

G

The effect of ■ GENPRU 2.3.34 R is that Lloyd's members' contributions, including letters of credit, guarantees and life assurance policies, are admissible assets.

Guidance on applications for waivers relating to Implicit items

PRA

G Implicit items under the Act

- 1 The *capital resources table* does not permit *implicit items* to be included in the calculation of a *firm's capital resources*, except subject to a *waiver* under section 138A of the *Act*. Article 27(4) of the *Consolidated Life Directive* states that *implicit items* can be included in the calculation of a *firm's capital resources*, within limits, provided that the supervisory authority agrees. Certain *implicit items*, however, are not eligible for inclusion beyond 31 December 2009 (see paragraph 5). The *PRA* may be to grant a *waiver* from the *capital resources table* to allow *implicit items*, in line with the purpose of the *Consolidated Life Directive*, and provided the conditions as set out in article 27(4) of the *Consolidated Life Directive* are met. Such a *waiver* would allow an *implicit item* to count towards the *firm's capital resources* available to count against its *capital resources requirement (CRR)* set out for *realistic basis life firms* in GENPRU 2.1.18 R and for *regulatory basis only life firms* in GENPRU 2.1.23 R. An *implicit item* may potentially count as *tier one capital* (but not *core tier one capital*) or *tier two capital*. Where a *waiver* is granted allowing an *implicit item* as *tier one capital*, the value of the *implicit item* so allowed must be included at stage B of the *capital resources table*. If the application of the value of the *implicit item* is restricted by GENPRU 2.2.29 R, which requires that at least 50% of a *firm's tier one capital resources* must be accounted for by *core tier one capital*, the remainder may be included at stage G of the calculation in the *capital resources table*, subject to GENPRU 2.2.31 G. An *implicit item* treated as *tier two capital* will also be included at stage G of the calculation, again subject to GENPRU 2.2.81 R. Article 29(1) of the *Consolidated Life Directive* requires that *implicit items* be excluded from the capital eligible to cover the *guarantee fund*. Under GENPRU 2.2.33 R a *firm* must meet the *guarantee fund* from the sum of the items listed at stages A, B, G and H of the *capital resources table* less the sum of the items listed at stage E of the *capital resources table*. The *PRA* will only grant an *implicit items waiver* if the *waiver* includes a modification to GENPRU 2.2.33 R to ensure that the *implicit item* does not count towards meeting the *guarantee fund*.
- 2 Under section 138A of the *Act*, the *PRA* may, on the application of a *firm*, grant a *waiver* from *PRU*. There are general requirements that must be met before any *waiver* can be granted. As explained in SUP 8, the *PRA* may not give a *waiver* unless the *PRA* is satisfied that:
 - (1) compliance by the *firm* with the *rules* will be unduly burdensome, or would not achieve the purpose for which the *rules* were made; and
 - (2) the *waiver* would adversely affect the advancement of any of the *appropriate regulator's objectives*
- 3 The appropriate regulator *PRA* will assess compliance with the requirements in the light of all the relevant circumstances. This will include consideration of the costs incurred by compliance with a particular *rule* or whether a *rule* is framed in a way that would make compliance difficult in view of the *firm's* circumstances. For example, the *firm* may demonstrate that if an *implicit item* were not allowed, the *firm* would either have to suffer increased (and unwarranted) costs in injecting further *capital resources* or operate with a lower equity backing ratio (see case studies in paragraph 43). Even if a *firm* can demonstrate a case for an *implicit item waiver*, it should not assume that the appropriate regulator *PRA* will grant the *waiver* requested, or that any *waiver* will be granted for the full amount of the *implicit item* which could be granted, as set out in this annex. The appropriate regulator *PRA* will consider each application on its own merits, and taking into account all relevant circumstances, including the financial situation and business prospects of the *firm*.

4 *Implicit items* are economic reserves which are contained within the long-term insurance business provisions. Article 27(4) of the *Consolidated Life Directive* identifies three types of *implicit item*, in respect of: future profits, *zillmerisation* and hidden reserves. This annex is intended to amplify the *guidance* in SUP 8 relating to the granting of *waivers* for *implicit items* and to provide *guidance* on other aspects. Whilst this *guidance* applies to applications for *waivers* for *implicit items* generally, for a *realistic basis life firm*, to the extent that an *implicit item* is allocated to a *with-profits fund*, this *guidance* relates to *implicit items* for the purposes of determining the *regulatory value of assets* (see INSPRU 1.4.24 R).

5 The *Consolidated Life Directive* (reflecting the changes introduced by the Solvency 1 Directive) requires member states to end a *firm's* ability to take into account future profits *implicit items* by (at the latest) 31 December 2009. Until then, the maximum amount of the *implicit item* relating to future profits permitted under the *Consolidated Life Directive* is limited to 50% of the product of the estimated annual profits and the average period to run (not exceeding six years) on the *policies* in the portfolio. The *Consolidated Life Directive* further limits the maximum amount of these economic reserves that can be counted to 25% of the lesser of the available solvency margin and the required solvency margin. The changes introduced by the *Solvency 1 Directive* take effect for financial years beginning on or after 1 January 2004. However, the *Consolidated Life Directive* allows for a transitional period of five years, which runs from 20 March 2002 (the publication date of the *Solvency 1 Directive*), for *Firms* to become fully compliant with these new requirements. *Firms* will need to consider the potential impact of these changes when engaging in future capital planning. When applying for an *implicit item waiver* a *firm* should provide the *PRA* with a plan showing how the *firm* intends to maintain its capital adequacy over the period to 31 December 2009. *Firms* should also be aware that the *PRA* will typically only grant *waivers* for a maximum of 12 months.

Future Profits

6 The future profits *implicit item* allows *firms* to take credit for margins in the *mathematical reserves* to the extent that these are expected to emerge from in force business. The future profit from in force business should be assessed, in the first instance, on prudent assumptions, to demonstrate that there is an 'economic reserve'. Having demonstrated that it exists, the amount should be limited to an amount calculated using a formula that takes into account the actual profit which has emerged over the last five years (see paragraph 28).

Zillmerisation

7 *Zillmerisation* is an allowance for acquisition costs that are expected, under prudent assumptions, to be recoverable from future *premiums*. *Firms* can make a direct adjustment to their reserves for *zillmerisation*, subject to the *rules* on *mathematical reserves*. However, where no such adjustment has been made, the *PRA* will consider an application for a *waiver* to take into account an *implicit item*.

Hidden reserves

8 Hidden reserves are reserves resulting from the underestimation of assets (other than *mathematical reserves*).

Process for applying for a waiver, including limits applicable when a waiver is granted

9 This annex sets out the procedures to be followed and the form of calculations and data which should be submitted by *firms* to the appropriate regulator *PRA*. This *guidance* should also be read in conjunction with the general requirements relating to the *waiver* process described in SUP 8. The *PRA* expects that applications for *waivers* in respect of future profits and *zillmerising* will not normally be considered to pass the "would not adversely affect the advancement of any of the *PRA's* objectives" test unless the relevant criteria set out in this *guidance* have been satisfied and an application for such a *waiver* may require further criteria to be satisfied for this test to be passed. As set out below, *waivers* in respect of either *zillmerising* or hidden reserves will not normally be given except in very exceptional circumstances.

Timing

- 10 *A long-term insurer may apply to the PRA for a waiver in respect of implicit items. A waiver will not apply retrospectively (see SUP 8.3.6 G). Consequently, applications intended for a particular accounting reference date will normally need to be made well before that reference date. Applications by firms must be made to the PRA in writing and include the relevant details specified under SUP 8.3.3 D. Given the uncertainty in predicting the future, waivers will normally be granted for a maximum of 12 months at a time and any further applications will need to be made accordingly.*
- 11 *The information that will be required to enable an application to be considered as set out below, should normally include a demonstration of how the capital resources requirement is to be met, with and without the waiver. Clearly, up-to-date information may not be available before the financial year-end. In some cases information from the previous year-end's return may be used, as long as any known significant changes in the structure of the firm, or the assumptions used, have been taken into account.*
- 12 *If the application for a waiver is granted, when a firm submits its next return the amount of the implicit item shown should not exceed that supported by the firm's calculations as at the valuation date. In the event that the amount of the future profits item calculated by the firm based on these updated assumptions is less than the amount calculated at the time of the firm's waiver application, the lower figure should be used in the return.*
- 13 *An implicit item waiver in respect of zillmerising or hidden reserves is related to the basis on which liabilities or assets have been valued. In the case of hidden reserves, as explained below, the granting of a waiver will be dependent on the overall capital resources of the firm. Waivers in respect of these implicit items will, therefore, only be made in relation to the position shown in a particular set of returns and it will be essential for firms to submit applications to the appropriate regulator PRA well in advance of the latest date for the submission of the relevant return.*
- 14 *Waivers may be withdrawn by the PRA at any time (e.g. where the PRA considers the amount in respect of which a waiver has been given can no longer be justified). This may be as a result of changes in the firm's position or as a result of queries arising on scrutiny of the returns.*
- Information to be submitted
- 15 *An application for a capital resources waiver (which includes an application for an extension to or other variation of a waiver) should be prepared using the standard application form for a waiver (see SUP 8 Annex 2 D). In addition, the application should be accompanied by full supporting information to enable the PRA to arrive at a decision on the merits of the case. In particular, the application should state clearly the nature and the amounts of the implicit items that a firm wishes to count against its capital resources requirement and whether it proposes to treat the implicit item as tier one capital or tier two capital. In order to assess an application, the PRA needs information as to the make-up of the firm's capital resources, the quality of the capital items which have been categorised into each tier of capital and a breakdown of capital both within and outside the firm's long-term insurance fund or funds and between the firm's with-profits funds and non-profit funds. An explanation as to the appropriateness of the proposed treatment of the implicit item under the capital resources table should also be provided, including a demonstration that, in allowing for implicit items, there has been no double counting of future margins and that the basis for valuing such margins is prudent.*
- 16 *The PRA recognises that the assessment of the insurance technical provisions reflects the contractual obligations of the firm. Implicit items are therefore margins over and above an economic assessment in these technical provisions only. Non-contractual "constructive" obligations arising from a firm's regulatory duty (as regulated by the FCA) to treat customers fairly e.g. regarding future terminal bonuses, are not fully captured by the technical provisions. A firm must instead be satisfied that it has sufficient capital resources at all times to meet its obligations under the FCA's Principle 6. The granting of a waiver for an implicit item does not in any way detract from this requirement and a firm will need to be satisfied that this condition is still met.*
- 17 *As a minimum, applications for a future profits implicit item waiver should be supported by the information contained in Forms 13, 14, 18, 19, 40, 41, 42, 48, 49, the answers to questions 1 to 12 of the abstract of the valuation report, Appendix 9.4 of IPRU(INS), the abstract of the valuation report for the realistic valuation, Appendix 9.4A of IPRU(INS) and Forms 51, 52, 53, 54 and 58.*

For a *zillmerisation implicit item waiver*, only those items noted above forming part of the abstract valuation report will normally be needed. Applications for a *waiver* in respect of a hidden reserves *implicit item* will normally be considered only if accompanied by the information which is contained in the annual regulatory *returns*. In particular, the balance sheet forms, *long-term insurance business* revenue accounts, and abstract of the valuation report as set out in Appendices 9.1, 9.3 and 9.4 of *IPRU(INS)* should be provided. This is not to say that a full regulatory *return* must be provided in the specified format, simply that the information contained in these forms should be provided. Where appropriate, the information may be summarised.

- 18 The following supporting information relating to the calculation of the amounts claimed should be supplied for each type of *implicit item* in respect of which a *waiver* is sought: Future profits: in addition to information related to the prospective calculation and retrospective calculation described below, the profits reported in each of the last five *financial years* up to the date of the most recent available valuation under *rule 9.4* of *IPRU(INS)* which has been submitted to the *PRA* prior to, or together with, the application, and the amounts and nature of any exceptional items left out of account; the method used for calculating the average period to run and the results for each of the main categories of business, both before and after allowing for premature termination (where the calculation has been made in two stages); and the basis on which this allowance has been made. *Zillmerising*: the categories of contracts for which an item has been calculated and the percentages of the *relevant capital sum* in respect of which an adjustment has been made. Hidden reserves: particulars, with supporting evidence, of the undervaluation of assets for which recognition is sought.

Continuous monitoring by firms

- 19 *Firms* should take into account any material changes in financial conditions or other relevant circumstances that may have an impact on the level of future profits that can prudently be taken into account. *Firms* should also re-evaluate whether an application to vary an *implicit item waiver* should be made whenever circumstances have changed. In the event that circumstances have changed such that an amendment is appropriate, the *firm* must contact the *PRA* as quickly as possible in accordance with Principle 11. (See *SUP 8.5.1 R*). In this context, the *PRA* would expect notice of any matter that materially impacts on the *firm's* financial condition, or any *waivers* granted.

Future profits - factors to take into account when submitting calculations to support waiver applications

- 20 Where an application is made in respect of a *firm* which has separate *with-profits funds* and *non-profit funds*, the *firm* should ensure that the *capital resources requirement* in respect of the *non-profit fund* is not covered by future profits attributable to *policyholders* arising in the *with-profits fund*. Furthermore, for a *realistic basis life firm* the amount of the *implicit item* allocated to each *with-profits fund* should be calculated separately, as the amount allocated to each *with-profits fund* will be taken into consideration in the calculation of the *with-profits insurance capital component* (see *INSPRU 1.4.24 R*).
- 21 *Firms* need to assess prospective future profit (i.e. how much can reasonably be expected to arise) and compare this to maximum limits (in article 27(4) of the *Consolidated Life Directive*), which relate to past profits.

Future profits - prospective calculation

- 22 The application for a *waiver* should be supported by details of a prospective calculation of future profits arising from in-force business. The information supplied to the *PRA* should include a description of the method used in the calculation and of the assumptions made, together with the results arising. From 31 December 2009 at the latest, future profits *implicit items* will no longer be permitted under the *Consolidated Life Directive*. Where a *firm* first applies for an *implicit item waiver* after *GENPRU 2.2* comes into effect, under the prospective calculation a *firm* should only take into consideration future profits that are expected to emerge in the period up to 31 December 2009. *Implicit item waivers* granted before *GENPRU 2.2* comes into effect will continue to operate under the terms of those *waivers*, but an application to vary the terms of such a *waiver*, for example to extend the effective period, is an application for a new *waiver* for which a *firm* should usually

only take into consideration future profits that are expected to emerge in the period up to 31 December 2009.

Assumptions

23 The assumptions made should be prudent, rather than best estimate, assumptions of future experience (that is, the prudent assumptions should allow for the fair market price for assuming that risk including associated expenses). In particular, it would not normally be considered appropriate for the projected return on any asset to be taken to be higher than the risk-free yield (that is, assessed by reference to the yield arrived at using a model of future risk free yields properly calibrated from the forward gilts market). It may also be appropriate to bring future withdrawals into account on a suitably prudent basis. For *with-profits business*, the assumptions for future investment returns should not capitalise future bonus loadings except where the with-profits *policyholders* share in risks other than the investment performance of the fund. Furthermore, the rate at which future profits are discounted should include an appropriate margin over a risk free rate of return. Calculations should also be carried out to demonstrate that the prospective calculation of the future profits arising from the in-force business supporting the application for the *implicit item waiver* would be sufficient to support the amount of the *implicit item* under each scenario described for use in determining the *resilience capital requirement* - where the *waiver* relates to an *implicit item* allocated to more than one fund, this should be demonstrated separately for that element of the *implicit item* allocated to each fund. For an *implicit item* allocated to a *with-profits fund*, proper allowance should be made for any shareholder transfers to ensure that the *implicit item* is not supported by future profits which will be required to support those transfers. To the extent, if any, that future profits are dependent on the levying of explicit expense related charges (for example as in the case of unit-linked business) the documentation submitted should include a demonstration of the prudence of the assumptions made as to the level at which future charges will be levied and expenses incurred.

Other limitations on the extent to which waivers for implicit items will be granted to a realistic basis life firm

24 Where a *waiver* in respect of an *implicit item* is granted to a *realistic basis life firm* additional limits may apply by reference to a comparison of *realistic excess capital* and *regulatory excess capital* including allowance for the effect of the *waiver*. Where the *capital resources waiver* relates to an *implicit item* allocated partly or entirely to a *with-profits fund*, the *waiver* will contain a limitation to the effect that the *regulatory excess capital* for that *with-profits fund*, allowing for the effect of the *waiver*, may not exceed that fund's *realistic excess capital*. This limitation will apply on an ongoing basis so that, for example, in the case of an *implicit item* allocated to a *with-profits fund*, the amount of the *implicit item* would be limited to zero whenever the *regulatory excess capital* exceeded the *realistic excess capital* of that fund.

Other charges to future profits

25 To avoid double counting, no account should be taken of any future surplus arising from assets corresponding to explicit items which have been counted towards the *capital resources requirement* such as shareholders funds, surplus carried forward or investment reserves. Deductions should be made in the calculation of future surpluses for the impact of any other arrangements which give rise to a charge over future surplus emerging (e.g. financial *reinsurance* arrangements, subordinated loan capital or contingent loan agreements). Deductions should also be made to the extent that any credit has been taken for the purposes of INSPRU 1.4.45 R (2) for the present value of future profits relating to non-profit business written in a *non-profit fund*. The information supplied to the *PRA* should identify the amount and reason for any adjustments made to the calculation of the prospective amount of future profits.

26 The *firm* should confirm to the *PRA* that the calculations have been properly carried out and that there are no other factors that should be taken into account.

Future profits - retrospective calculation

Overriding limit

27 The maximum amount of the *implicit item* relating to future profits permitted under the *Consolidated Life Directive* is 50% of the product of the estimated annual profit and the average period to run (not exceeding six years (ten years during the transitional period referred to in paragraph

5)) on the *policies* in the portfolio. Article 27(4) of the *Consolidated Life Directive* also imposes a further limit on the amount of the *implicit item* equal to 25% of the lower of:

- (1) the *firm's capital resources*; and
- (2) the higher of its *base capital resources requirement for long-term insurance business* and its *long-term insurance capital requirement*.

Once the transitional period set out in article 71(1) of the *Consolidated Life Directive* has expired in 2007 (see paragraph 5), the appropriate regulator will not allow a *capital resources* for more than the amount permitted by article 27(4) of the Directive.

Definition of profits

28 The estimated annual profit should be taken as the average annual surplus arising in the *long-term insurance fund* over the last five *financial years* up to the date of the most recent available valuation which has been submitted to the *PRA* prior to, or together with, the application. For this purpose, deficiencies arising should be treated as negative surpluses. Where a *firm's financial year* has altered, the surplus arising in a period falling partly outside the relevant five year period should be assumed to accrue uniformly over the period in question for the purpose of estimating the profits arising within the five year period. When there has been a transfer of a block of business into the *firm* (or out of the *firm*) during the period, surplus arising from the transferred block should be included (or excluded) for the full five year period. Where a portion of a block of business is transferred, the surplus included (or excluded) should be a reasonable estimate of the surplus arising from the portion transferred.

29 Where a *firm* has been carrying on *long-term insurance business* for less than 5 years, the total profits made during the past five years should be taken to be the aggregate of any surpluses that have arisen during the period in which *long-term insurance business* has been carried on less any deficiencies that may have arisen during that period. The resulting total should still be divided by five to obtain the estimated annual profit.

Exceptional items

30 Substantial items of an exceptional nature should be excluded from the calculation of the estimated annual profit. Such items include profits arising from an exceptional change in the value at which assets are brought into account, where this is not reflected in a similar change in the amount of the liabilities, and profits arising from a change in the overall valuation approach between one year and another. An exceptional loss (i.e. a reduction of an exceptional nature in the surplus arising) may be excluded from the calculation only to the extent that it can be set against a profit or profits up to the amount of the loss and arising from a similar cause. It is not intended, however, that any adjustment should be made for the effect on surplus of a net strengthening of reserves for costs associated with an expansion of the business or for special capital expenditure, such as the purchase of computer systems.

Double counting

31 The inclusion of investment income arising from the assets representing the explicit components of *capital resources* (as part of the estimated annual profit for the purpose of determining the future profits *implicit item*) would result in double-counting. If those assets were required to meet the effects of adverse developments, this would automatically result in the cessation of the contribution to profits from the associated investment income. It would clearly not be appropriate for the *PRA* to grant a *capital resources waiver* which would enable a *firm* to meet the *capital resources requirement* on the basis of counting both the capital values of the assets and the value of the income flow which they can be expected to generate.

32 The definition of the estimated annual profit as the surplus arising in the *long-term insurance fund* ensures that any contribution to surplus arising from transfers from the profit and loss account, including investment income on shareholders' assets, is not included in the estimated annual profit. Thus double-counting should not arise in respect of shareholders' assets. Double-counting may arise, however, in respect of the investment income from the assets representing the explicit components of *capital resources* carried within the *long-term insurance fund* (e.g. surplus carried

forward or investment reserves), but the amount of such investment income is not separately identified in the *return*.

- 33 Where there is reason to suspect that the elimination of any such double-counting would reduce a *firm's capital resources* to close to or below the required level, or would otherwise be significant, the *PRA* will request this information with a view to taking account of this factor in determining the amount of the *implicit item*. Additional information concerning investment income should be furnished with an application for a *waiver*, if a *firm* believes that any double-counting would fall into one of the categories mentioned above.

Average period to run

- 34 The average number of years remaining to run on *policies* should be calculated on the basis of the weighted average of the periods for individual *contracts of insurance*, using as weights the actuarial present value of the benefits payable under the contracts. A separate weighted average should be calculated for each of the various categories of contract and the results combined to obtain the weighted average for the portfolio as a whole. Approximate methods of calculation, which the *firm* considers will give results similar to the full calculation, will be accepted. In particular, the *PRA* will normally accept the calculation of an average period to run for a specific category of contract on the basis of the average valuation factor for future benefits derived from data contained in the abstract of the valuation report in the regulatory *returns*. A *firm* will be asked to demonstrate the validity of the method adopted only where an abnormal distribution of the business in force gives grounds for doubt about its accuracy.

- 35 Calculations will normally be requested only for the main categories of *insurance business*, accounting for not less than 90% of the *mathematical reserves*, except where there are grounds for expecting that the exclusion of certain categories of *policies* under this provision might have a significant effect on the resulting average period to run. Detailed calculations will not be required where a *waiver* is sought in respect of a low multiple of the annual profits, well within the average period to run for the *firm*.

- 36 Where, for a particular category of business, a method of valuation is used which does not involve the calculation of the value of future benefits and which is significant for the *firm* in question, the calculation of the average period to run should be based on estimates of the value of future benefits.

Premature termination of contracts

- 37 Allowance should be made for the premature termination of *contracts of insurance*, based on the actual experience of the *firm* over the last five years, or other appropriate period, and taking into account specific features of contracts such as options which can be expected to lead to premature termination (e.g. guaranteed surrender values on income bonds written as *long-term insurance contracts* and option dates on flexible whole-life contracts). The adjustment should be made separately for each of the main categories of business. The use of industry-wide rates of termination will be acceptable where a *firm* is satisfied that this will result in sufficient allowance being made having regard to the *firm's* own experience. Methods of calculation that involve a degree of approximation will be permitted.

- 38 For certain types of contract, where the period left to run is most naturally defined as the term to a fixed maturity or expiry date, the allowance for premature termination should also take into account terminations resulting from death.

Overall limit

- 39 The overall average period left to run calculated as described above should be limited to a maximum of six years under article 27(4) of the *Consolidated Life Directive* (or a maximum of ten years during the transitional period referred to in paragraph 5) before applying it to the estimated annual profit in order to determine the maximum value of the future profits *implicit item*.

Definition of period to run

- 40 The definition of the period to run and the basis of the allowance for early termination should clearly be considered together. For certain types of contracts (e.g. pension contracts with a range of retirement ages or other options), there is inherent uncertainty about the likely term to run. In such circumstances any estimate for determining the amount of the future profits *implicit item*

for which a *waiver* is sought should be based on prudent assumptions tending, if anything, to underestimate the average period to run.

Zillmerising

- 41 The *PRA* does not normally expect to grant a *waiver* permitting *implicit items* due to *zillmerisation* except in very exceptional circumstances. *Zillmerisation* is an allowance for acquisition costs that are expected, under prudent assumptions, to be recoverable from future *premiums*. *Firms* can make a direct adjustment to their reserves for *zillmerisation*, subject to the requirements on *mathematical reserves* set out in INSPRU 1.3.43 R, and this is the usual approach. However, where no such adjustment has been made, or where the maximum adjustment has not been made in the *mathematical reserves*, the *PRA* will consider an application for an *implicit item waiver*, if the amount is consistent with the amount that would have been allowed as an adjustment to *mathematical reserves* under INSPRU 1.3.43 R.

Hidden reserves

- 42 The *PRA* will grant *waivers* permitting *implicit items* due to hidden reserves only in very exceptional circumstances. These items relate to hidden reserves resulting from the underestimation of assets. The *rules* for the valuation of assets and liabilities (see GENPRU 1.3) which apply to assets and liabilities other than *mathematical reserves* are based on the valuation used by the *firm* for the purposes of its external accounts, with adjustments for regulatory prudence such as concentration limits for large holdings, and would not normally be expected to contain hidden reserves.

Case studies on "unduly burdensome"

- 43 Some examples of situations where the existing *rules* might be considered to be unduly burdensome are given below:
- A *firm* writes *with-profits business*. The *firm's* investment policy is affected by its published financial position. Application of the *rules* without an *implicit item waiver* would result in the *firm* adopting a lower equity backing ratio. It may be possible to demonstrate that, in the circumstances, it would be unduly burdensome to require the *firm* to incur costs (which might prejudice *policyholders*) resulting from the lower equity backing ratio, rather than take allowance for an *implicit item*.
 - A *firm* has purchased a block of in-force business, on which the future profits may be reasonably estimated. However, this asset is given no value under the *rules*. It may be possible to demonstrate that it is unduly burdensome for the *firm* to recognise the cost of acquiring the assets whilst giving no value to the asset acquired.
 - A *firm* has a block of in-force business, on which the future profits may be reasonably estimated. Application of the *rules* without an *implicit item waiver* would result in a need to obtain additional capital. It may be possible to demonstrate that it is unduly burdensome, having regard to the particular circumstances of the *firm*, to require it to incur the costs involved in the injection of further capital rather than take allowance for an *implicit item*.
 - A *firm* has purchased matching assets for guaranteed annuity liabilities. The operation of the asset and liability valuation *rules* leads to statutory losses in certain circumstances in spite of good matching of assets and liabilities on a realistic basis of assessment. It may be possible to demonstrate that it is unduly burdensome to require the *firm* to incur the costs involved in the injection of further capital rather than take allowance for an *implicit item*.

Conditions which will typically be applied to implicit items waivers

Limits

- 44 Where *implicit items waivers* are granted, the value cannot exceed (and will normally be less than) the monetary limits described in paragraph 27, except that during the transitional period the pre-Solvency I limits will apply. In addition, time limits will apply and *waivers* will normally only last for 12 months.

Publicity

45

The *PRA* will publish the *waiver* (see SUP 8.6 and SUP 8.7). Public disclosure is standard practice unless the *PRA* is satisfied that publication is inappropriate or unnecessary (see section 138AB of the *Act*). Any request that a direction not be published should be made to the *PRA* in writing with grounds in support, as set out in SUP 8.6. Disclosure of a *waiver* will normally be required in the *firm's* annual *returns*.

Introduction: identifying a financial conglomerate

- (1) In general the process in (2) to (8) applies for identifying *financial conglomerates*.
- (2) *Competent authorities* that have authorised *regulated entities* should try to identify any *consolidation group* that is a *financial conglomerate*. If a *competent authority* is of the opinion that a *regulated entity* authorised by that *competent authority* is a member of a *consolidation group* which may be a *financial conglomerate* it should communicate its view to the other *competent authorities* concerned.
- (3) A *competent authority* may start (as described in (2)) the process of deciding whether a group is a *financial conglomerate* even if it would not be the *coordinator*.
- (4) A member of a group may also start that process by notifying one of the *competent authorities* that have authorised group members that its group may be a *financial conglomerate*, for example by notification under ■ SUP 15.9.
- (5) If a group member gives a notification in accordance with (4), that does not automatically mean that the group should be treated as a *financial conglomerate*. The process described in (6) to (9) still applies.
- (6) The *competent authority* that would be *coordinator* will take the lead in establishing whether a group is a *financial conglomerate* once the process has been started as described in (2) and (3).
- (7) The process of establishing whether a group is a *financial conglomerate* will normally involve discussions between the *financial conglomerate* and the *competent authorities* concerned.
- (8) A *financial conglomerate* should be notified by its *coordinator* that it has been identified as a *financial conglomerate* and of the appointment of the *coordinator*. The notification should be given to the *parent undertaking* at the head of the group or, in the absence of a *parent undertaking*, the *regulated entity* with the largest balance sheet total in the *most important financial sector*. That notification does not of itself make a group into a *financial conglomerate*; whether or not a group is a *financial conglomerate* is governed by the definition of *financial conglomerate* as set out in ■ GENPRU 3.1.
- (9) ■ GENPRU 3 Annex 3 G is a questionnaire (together with its explanatory notes) that the *appropriate regulator* asks groups that may be *financial conglomerates* to fill out in order to decide whether or not they are.
- (10) If a *mixed financial holding company* is subject to equivalent provisions under ■ BIPRU 8 (Group risk consolidation) and under ■ GENPRU 3 (Cross sector groups) and the *appropriate regulator* is the *coordinator*, the *appropriate regulator* may, on application by a *firm* and after consulting other *competent authorities* responsible for the supervision of subsidiaries, disapply such provisions of ■ BIPRU 8 with regard to the *mixed financial holding company* and apply only the relevant provisions of ■ GENPRU 3 to the *mixed financial holding company*.

3.1.3A

FCA

G

If a *mixed financial holding company* is subject to equivalent provisions under this Chapter and under *EEA prudential sectoral legislation* in relation to the *insurance sector* as implemented in the *United Kingdom* and the *FCA* is the *coordinator*, the *FCA* may, on

application by the *firm* and after consulting other *relevant competent authorities*, disapply such provisions of the *EEA prudential sectoral legislation* as implemented in the *United Kingdom* with regard to that undertaking which are considered by the *FCA* as equivalent to those applying to the *firm* under ■ GENPRU 3.1.

[Note: article 120(2) of *CRD*]

Introduction: The role of other competent authorities

3.1.4

FCA PRA

G

A lead supervisor (called the *coordinator*) is appointed for each *financial conglomerate*. Article 10 of the *Financial Groups Directive* describes the criteria for deciding which *competent authority* is appointed as *coordinator*. Article 11 of the *Financial Groups Directive* sets out the tasks of the *coordinator*.

Definition of financial conglomerate: basic definition

3.1.5

FCA PRA

R

A *financial conglomerate* means a *consolidation group* that is identified as a *financial conglomerate* in accordance with the decision tree in ■ GENPRU 3 Annex 4 R.

Definition of financial conglomerate: sub-groups

3.1.6

FCA PRA

R

A *consolidation group* is not prevented from being a *financial conglomerate* because it is part of a wider:

- (1) *consolidation group*; or
- (2) *financial conglomerate*; or
- (3) group of persons linked in some other way.

Definition of financial conglomerate: the financial sectors: general

3.1.7

FCA PRA

R

For the purpose of the definition of *financial conglomerate*, there are two *financial sectors* as follows:

- (1) the *banking sector* and the *investment services sector*, taken together; and
- (2) the *insurance sector*.

3.1.8

FCA PRA

R

- (1) This *rule* applies for the purpose of the definition of *financial conglomerate* and the *financial conglomerate definition decision tree*.
- (2) Any *mixed financial holding company* is considered to be outside the *overall financial sector* for the purpose of the tests set out in the boxes titled Threshold Test 1, Threshold Test 2 and Threshold Test 3 in the *financial conglomerate definition decision tree*.

- (3) Determining whether the tests set out in the boxes titled Threshold Test 2 and Threshold Test 3 in the *financial conglomerate definition decision tree* are passed is based on considering the consolidated and/or aggregated activities of the members of the *consolidation group* within the *insurance sector* and the consolidated and/or aggregated activities of the members of the *consolidation group* within the *banking sector* and the *investment services sector*.

Definition of financial conglomerate: adjustment of the percentages

3.1.9

FCA PRA

R

Once a *financial conglomerate* has become a *financial conglomerate* and subject to supervision in accordance with the *Financial Groups Directive*, the figures in the *financial conglomerate definition decision tree* are altered as follows:

- (1) the figure of 40% in the box titled Threshold Test 1 is replaced by 35%;
- (2) the figure of 10% in the box titled Threshold Test 2 is replaced by 8%; and
- (3) the figure of six billion Euro in the box titled Threshold Test 3 is replaced by five billion Euro.

3.1.10

FCA PRA

R

The alteration in ■ GENPRU 3.1.9 R only applies to a *financial conglomerate* during the period that:

- (1) begins when the *financial conglomerate* would otherwise have stopped being a *financial conglomerate* because it does not meet one of the unaltered thresholds referred to in ■ GENPRU 3.1.9 R; and
- (2) covers the three years following that date.

Definition of financial conglomerate: balance sheet totals

3.1.11

FCA PRA

R

The calculations referred to in the *financial conglomerate definition decision tree* regarding the balance sheet must be made on the basis of the aggregated balance sheet total of the members of the *consolidation group*, according to their annual accounts. For the purposes of this calculation, *undertakings* in which a *participation* is held must be taken into account as regards the amount of their balance sheet total corresponding to the aggregated proportional share held by the *consolidation group*. However, where consolidated accounts are available, they must be used instead of aggregated accounts.

Definition of financial conglomerate: solvency requirement

Definition of financial conglomerate: discretionary changes to the definition

Articles 3(3) to 3(6), Article 5(4) and Article 6(5) of the *Financial Groups Directive* allow *competent authorities*, on a case by case basis, to:

- (1) change the definition of *financial conglomerate* and the obligations applying with respect to a *financial conglomerate* (which would include, where the *appropriate regulator* would be the *coordinator* under ■ GENPRU 3.1.3 G (6), permitting *firms* to apply, on an annual basis and subject to publication and notification to the *relevant competent authorities*, for a group of which it is a member not to be regarded as a *financial conglomerate* on the basis of Article 3(3) of the *Financial Groups Directive* (for a group that, in terms of the tests in ■ GENPRU 3 Annex 4 R, does not meet Threshold Test 2 but meets Threshold Test 3) or Article 3(3a) of the *Financial Groups Directive* (for a group that, in terms of the tests in ■ GENPRU 3 Annex 4 R, meets Threshold Test 2 but not Threshold Test 3);
- (2) apply the scheme in the *Financial Groups Directive* to *EEA regulated entities* in specified kinds of group structures that do not come within the definition of *financial conglomerate*; and
- (3) exclude a particular entity in the scope of capital adequacy requirements that apply with respect to a *financial conglomerate*.

Capital adequacy requirements: introduction

The capital adequacy provisions of ■ GENPRU 3.1 are designed to be applied to *EEA-based financial conglomerates*.

3.1.15

FCA PRA

G

■ GENPRU 3.1.25 R is a high level capital adequacy *rule*. It applies whether or not the *appropriate regulator* is the *coordinator* of the *financial conglomerate* concerned.

3.1.16

FCA PRA

G

■ GENPRU 3.1.29 R to ■ GENPRU 3.1.31 R and ■ GENPRU 3 Annex 1 R implement the detailed capital adequacy requirements of the *Financial Groups Directive*. They only deal with a *financial conglomerate* for which the *appropriate regulator* is the *coordinator*. If another *competent authority* is *coordinator* of a *financial conglomerate*, those *rules* do not apply with respect to that *financial conglomerate* and instead that *coordinator* will be responsible for implementing those detailed requirements.

3.1.17 FCA PRA G Annex I of the *Financial Groups Directive* lays down three methods for calculating capital adequacy at the level of a *financial conglomerate*. Those three methods are implemented as follows:

- (1) Method 1 calculates capital adequacy using accounting consolidation. It is implemented by ■ GENPRU 3.1.29 R to ■ GENPRU 3.1.31 R and Part 1 of ■ GENPRU 3 Annex 1 R.
- (2) Method 2 calculates capital adequacy using a deduction and aggregation approach. It is implemented by ■ GENPRU 3.1.29 R to ■ GENPRU 3.1.31 R and Part 2 of ■ GENPRU 3 Annex 1 R.
- (3) [deleted]
- (4) Method 3 consists of a combination of Methods 1 and 2 from Annex I of the *Financial Groups Directive* and would be implemented by means of a *requirement*.

3.1.18 FCA PRA G [deleted]

3.1.19 FCA PRA G Paragraph 5.7 of ■ GENPRU 3 Annex 1 R (Capital adequacy calculations for financial conglomerates) deals with a case in which there are no capital ties between entities in a *financial conglomerate*. In particular, the *appropriate regulator* , after consultation with the other *relevant competent authorities* and in accordance with Annex I of the *Financial Groups Directive*, will determine which proportional share of a solvency deficit in such an entity will have to be taken into account, bearing in mind the liability to which the existing relationship gives rise.

3.1.20 FCA PRA G (1) [deleted]
(2) [deleted]

3.1.21 FCA PRA G The Annex I method to be applied may be decided by the *coordinator* after consultation with the *relevant competent authorities* and the *financial conglomerate* itself. Where the *appropriate regulator* acts as *coordinator*, the *financial conglomerate* itself may choose which of Method 1 or Method 2 from Annex I it will apply, unless the *firm* is subject to a *requirement* obliging the *firm* to apply a particular method.

Capital adequacy requirements: use of requirement to apply Annex I of the Financial Groups Directive

3.1.30
FCA PRA

R If ■ GENPRU 3.1.29 R (application of Method 1 or 2 from Annex I of the Financial Groups Directive) applies to a *firm* with respect to the *financial conglomerate* of which it is a member, then with respect to the *firm* and the *financial conglomerate*:

- (1) the definitions of *conglomerate capital resources* and *conglomerate capital resources requirement* that apply for the purposes of that *rule* are the ones from whichever of Part 1 or Part 2 of ■ GENPRU 3 Annex 1 R the *firm* has indicated to the *appropriate regulator* it will apply, unless the *firm* is subject to a *requirement* obliging the *firm* to apply a specific part of ■ GENPRU 3 Annex 1 R, in which case ■ GENPRU 3.1.31 R will apply; and

Risk concentration and intra-group transactions: introduction

3.1.32

FCA PRA

G

■ GENPRU 3.1.35 R implements Article 7(4) and Article 8(4) of the *Financial Groups Directive*, which provide that where a *financial conglomerate* is headed by a *mixed financial holding company*, the *sectoral rules* regarding *risk concentration* and *intra-group transactions* of the *most important financial sector* in the *financial conglomerate*, if any, shall apply to that sector as a whole, including the *mixed financial holding company*.

3.1.33

FCA PRA

G

Articles 7(3) (Risk concentration) and 8(3) (Intra-group transactions) and Annex II (Technical application of the provisions on intra-group transactions and risk concentration) of the *Financial Groups Directive* say that Member States may apply at the level of the *financial conglomerate* the provisions of the *sectoral rules* on *risk concentrations* and *intra-group transactions*. ■ GENPRU 3.1 does not take up that option, although the *appropriate regulator* may impose such obligations on a case by case basis.

Risk concentration and intra-group transactions: application

3.1.34

FCA PRA

R

■ GENPRU 3.1.35 R applies to a *firm* with respect to a *financial conglomerate* of which it is a member if:

- (1) the condition in Articles 7(4) and 8(4) of the *Financial Groups Directive* is satisfied (the *financial conglomerate* is headed by a *mixed financial holding company*); and
- (2) that *financial conglomerate* is a *UK regulated EEA financial conglomerate*.

Risk concentration and intra group transactions: the main rule

3.1.35

FCA PRA

A *firm* must ensure that the *sectoral rules* regarding *risk concentration* and *intra-group transactions* of the *most important financial sector* in the *financial conglomerate* referred to in ■ GENPRU 3.1.34 R are complied with with respect to that *financial sector* as a whole, including the *mixed financial holding company*. The financial sectors: asset management companies and alternative investment fund managers

3.1.39 **R**
FCA PRA

- (1) In accordance with Articles 30 and 30a of the *Financial Groups Directive* (Asset management companies and Alternative investment fund managers), this *rule* deals with the inclusion of an *asset management company* or an *alternative investment fund manager* that is a member of a *financial conglomerate* in the scope of regulation of *financial conglomerates*.
- (2) An *asset management company* or an *alternative investment fund manager* is in the *overall financial sector* and is a *regulated entity* for the purpose of:

- (a) ■ GENPRU 3.1.29 R to ■ GENPRU 3.1.36 R;
 - (b) ■ GENPRU 3 Annex 1 R (Capital adequacy calculations for financial conglomerates) and ■ GENPRU 3 Annex 2 R (Prudential rules for third country groups); and
 - (c) any other provision of the *Handbook* or *PRA Rulebook* relating to the supervision of *financial conglomerates*.
- (3) In the case of a *financial conglomerate* for which the *appropriate regulator* is the *coordinator*, all *asset management companies* and all *alternative investment fund managers* must be allocated to one *financial sector* to which they belong for the purposes in (2), being either the *investment services sector* or the *insurance sector*. But if that choice has not been made in accordance with (4) and notified to the *appropriate regulator* in accordance with (4)(d), an *asset management company* or an *alternative investment fund manager* must be allocated to the smallest *financial sector*.
- (4) The choice in (3):
- (a) must be made by the *undertaking* in the *financial conglomerate* holding the position referred to in Article 4(2) of the *Financial Groups Directive* (group member to whom notice must be given that the group has been found to be a *financial conglomerate*);
 - (b) applies to all *asset management companies* and all *alternative investment fund managers* that are members of the *financial conglomerate* from time to time;
 - (c) cannot be changed; and
 - (d) must be notified to the *appropriate regulator* as soon as reasonably practicable after the notification in (4)(a).
- (5) This *rule* applies even if:
- (a) a *UCITS management company* is an *IFPRU investment firm*;
or
 - (b) an *asset management company* or *alternative investment fund manager* is an *investment firm*.

3.2 Third-country groups

Application

3.2.1

FCA PRA

R

■ GENPRU 3.2 applies to every *firm* that is a member of a *third-country group*. But it does not apply to:

- (1) an *incoming EEA firm*; or
- (2) an *incoming Treaty firm*; or
- (3) a *UCITS qualifier*; or
- (4) an *ICVC*.

Purpose

3.2.2

FCA PRA

G

■ GENPRU 3.2 implements in part Article 18 of the *Financial Groups Directive* and Article 127 of the *CRD*.

Equivalence

3.2.3

FCA PRA

G

The first question that must be asked about a *third-country financial group* is whether the *EEA regulated entities* in that *third-country group* are subject to supervision by a *third-country competent authority*, which is equivalent to that provided for by the *Financial Groups Directive* (in the case of a *financial conglomerate*) or the *EEA prudential sectoral legislation* for the *banking sector* or the *investment services sector* (in the case of a *banking and investment group*). Article 18(1) of the *Financial Groups Directive* sets out the process for establishing equivalence with respect to *third-country financial conglomerates* and Article 127(1) and (2) of the *CRD* does so with respect to *third-country banking and investment groups*.

Other methods: General

3.2.4

FCA PRA

G

If the supervision of a *third-country group* by a *third-country competent authority* does not meet the equivalence test referred to in ■ GENPRU 3.2.3 G, the methods set out in the *CRD* and *EU CRR* will apply or *competent authorities* may apply other methods that ensure appropriate supervision of the *EEA regulated entities* in that *third-country group* in accordance with the aims of supplementary supervision under the *Financial Groups Directive* or consolidated supervision under the applicable *EEA prudential sectoral legislation*.

Supervision by analogy: introduction

3.2.5

FCA PRA

G

If the supervision of a *third-country group* by a *third-country competent authority* does not meet the equivalence test referred to in ■ GENPRU 3.2.3 G, a *competent authority* may, rather than take the measures described in ■ GENPRU 3.2.4 G, apply, by analogy, the provisions concerning supplementary supervision under the *Financial Groups Directive* or, as applicable, consolidated supervision under the applicable *EEA prudential sectoral legislation*, to the *EEA regulated entities* in the *banking sector*, *investment services sector* and (in the case of a *financial conglomerate*) *insurance sector*.

3.2.6

FCA PRA

G

The *appropriate regulator* believes that it will only be right to adopt the option in ■ GENPRU 3.2.5 G in response to very unusual group structures.

3.2.7

FCA PRA

G

■ GENPRU 3.2.8 R and ■ GENPRU 3.2.9 R and ■ GENPRU 3 Annex 2 R set out *rules* to deal with the situation covered in ■ GENPRU 3.2.5 G. Those *rules* do not apply automatically. Instead, they can only be applied with respect to a particular *third-country group* through the *Part 4A permission* of a *firm* in that *third-country group*.

Supervision by analogy: rules for third-country conglomerates

3.2.8

FCA PRA

R

If the *Part 4A permission* of a *firm* contains a *requirement* obliging it to comply with this *rule* with respect to a *third-country financial conglomerate* of which it is a member, it must comply, with respect to that *third-country financial conglomerate*, with the *rules* in Part 1 of ■ GENPRU 3 Annex 2 R, as adjusted by Part 3 of that annex.

Supervision by analogy: rules for third-country banking and investment groups

3.2.9

FCA PRA

R

If the *Part 4A permission* of a *firm* contains a *requirement* obliging it to comply with this *rule* with respect to a *third-country banking and investment group* of which it is a member, it must comply, with respect to that *third-country banking and investment group*, with the *rules* in Part 2 of ■ GENPRU 3 Annex 2 R, as adjusted by Part 3 of that annex.

- (2) If there is an *EEA regulated entity* at the head of the *financial conglomerate*, then:
 - (a) if that entity is in the *banking sector* or the *investment services sector*, the *financial conglomerate* is a *banking and investment services conglomerate*; or
 - (b) if that entity is in the *insurance sector*, the *financial conglomerate* is an *insurance conglomerate*.
- (3) If (2) does not apply and the *most important financial sector* is the *banking and investment services sector*, it is a *banking and investment services conglomerate*.
- (4) If (2) and (3) does not apply, it is an *insurance conglomerate*.

(2) it results from any inappropriate intra-group creation of capital.

Cross sectoral capital 5.3

In accordance with the second sub-paragraph of paragraph 2(ii) of Section I of Annex I of the *Financial Groups Directive* (Other technical principles and insofar as not already required in Parts 1-3):

- (1) the solvency requirements for each different *financial sector* represented in a *financial conglomerate* required by GENPRU 3.1.29 R must be covered by own funds elements in accordance with the corresponding *applicable sectoral rules*; and
- (2) if there is a deficit of own funds at the *financial conglomerate* level, only cross sectoral capital (as referred to in that sub-paragraph) shall qualify for verification of compliance with the additional solvency requirement required by GENPRU 3.1.29 R.

Application of sectoral 5.4 rules: General

The following adjustments apply to the *applicable sectoral rules* as they are applied by the *rules* in this annex.

- (1) The scope of those *rules* will be extended to cover any *mixed financial holding company* and each other member of the *overall financial sector*.
- (2) If any of those *rules* would otherwise not apply to a situation in which they are applied by GENPRU 3 Annex 1 R, those *rules* nevertheless still apply (and in particular, any of those *rules* that would otherwise have the effect of disapplying consolidated supervision (or, in the case of the *insurance sector*, supplementary supervision) do not apply).
- (3) (If it would not otherwise have been included) an *ancillary insurance services undertaking* is included in the *insurance sector*.
- (4) The scope of those *rules* is amended so as to remove restrictions relating to where members of the *financial conglomerate* are incorporated or have their head office, so that the scope covers every member of the *financial conglomerate* that would have been included in the scope of those *rules* if those members had their head offices in an *EEA State*.
- (5) (For the purposes of Parts 1 to 3) those *rules* must be adjusted, if necessary, when calculating the capital resources, capital resources requirements or solvency requirements for a particular *financial sector* to exclude those for a member of another *financial sector*.
- (6) Any *waiver* granted to a member of the *financial conglomerate* under those *rules* does not apply for the purposes of this annex.

**Application of sectoral 5.5
rules: Insurance sector**

(1) This *rule* applies an adjustment to the *applicable sectoral rules* for the *insurance sector* as they are applied by the *rules* in this annex.

(2) To the extent that:

- (a) those *rules* merely require a report on whether or not a specified level of solvency is met (a soft limit); or
- (b) the requirements in those *rules* concern having certain net assets of an amount at or above certain levels;

those requirements are restated so as to include an obligation at all times actually to have capital at or above that level (a hard limit), thereby turning a soft limit into a hard limit and turning a limit drafted by reference to assets and liabilities into a requirement that the level of capital be maintained at or above a specified level. If those *rules* apply both a hard and a soft limit, and the level of the soft limit is higher, that soft limit is applied under this annex, but translated into a hard limit in accordance with the earlier provisions of this *rule*.

**Application of sectoral 5.6
rules: Banking sector
and investment ser-
vices sector**

In relation to a *BIPRU firm* that is a member of a *financial conglomerate* where there are no *credit institutions* or *investment firms*, the following adjustments apply to the *applicable sectoral rules* for the *banking sector* and the *investment services sector* as they are applied by the *rules* in this annex.

(1) References in those *rules* to *non-EEA sub-groups* do not apply.

(2) [deleted]

(3) Any *investment firm consolidation waivers* granted to members of the *financial conglomerate* do not apply.

(4) (For the purposes of Part 3), without prejudice to the application of requirements in **BIPRU 8** preventing the use of an *advanced prudential calculation approach* on a consolidated basis, any *advanced prudential calculation approach permission* that applies for the purpose of **BIPRU 8** does not apply.

(5) (For the purposes of Part 3), **BIPRU 8.5.9 R** and **BIPRU 8.5.10 R** do not apply.

(6) (For the purposes of Part 3), where the *financial conglomerate* does not include a *credit institution*, the method in **GENPRU 2 Annex 4 R** must be used for calculating the capital resources and **BIPRU 8.6.8 R** does not apply.

(Other than as above) the *EU CRR* apply for the *banking sector* and the *investment services sector*.

No capital ties 5.7

(1) This *rule* deals with a *financial conglomerate* in which some of the members are not linked by capital ties at the time of the notification referred to in **GENPRU 3.1.29A R**

(Capital adequacy requirements: Application of Method 1 or 2 from Annex I of the Financial Groups Directive).

(a) [deleted]

(b) **GENPRU 3.1.29 R** (Capital adequacy requirements: Application of Method 1 or 2 from Annex I of the Financial Groups Directive) applies with respect to a *financial conglomerate* falling into (1);

then:

(c) the treatment of the links in (1) (including the treatment of any *solvency deficit*) is as provided for in whichever of Part 1 or Part 2 of **GENPRU 3 Annex 1 R** the *firm* has, under **GENPRU 3.1.30 R**, indicated to the *appropriate regulator* it will apply or, if applicable, in the *requirement* referred to in **GENPRU 3.1.31 R**; and

(d) **GENPRU 3.1.29 R** applies even if the *applicable sectoral rules* do not deal with how *undertakings* not linked by capital ties are to be dealt with for the purposes of consolidated supervision (or, in the case of the *insurance sector*, supplementary supervision).

Defining the financial 6.1
sectors

For the purposes of Parts 1 and 2 of this annex:

(1) an *asset management company* is allocated in accordance with **GENPRU 3.1.39 R**;

(2) an *alternative investment fund manager* is allocated in accordance with **GENPRU 3.1.39 R**; and

(3) a *mixed financial holding company* must be treated as being a member of the *most important financial sector*.

Solo capital resources 6.2
requirement: Banking
sector and investment
service sector

(1) The *solo capital resources requirement* of an *undertaking* in the *banking sector* or the *investment services sector* must be calculated in accordance with this *rule*, subject to paragraphs 6.5 and 6.6.

(2) The *solo capital resources requirement* of a *building society* is its *own funds requirements*.

(3) The *solo capital resources requirement* of an *electronic money institution* is the capital resources requirement that applies to it under the *Electronic Money Regulations*.

(4) If there is a *credit institution* in the *financial conglomerate*, the *solo capital resources requirement* for any *undertaking* in the *banking sector* or the *investment services sector* is,

subject to (2) and (3), calculated in accordance with the *EU CRR* for calculating the *own funds requirements* of a .

(5) If:

- (a) the *financial conglomerate* does not include a *credit institution*;
- (b) there is at least one *investment firm* in the *financial conglomerate*; and
- (c) all the *investment firm* in the *financial conglomerate* are *limited licence firms* or *limited activity firms*;

the *solo capital resources requirement* for any *undertaking* in the *banking sector* or the *investment services sector* is calculated in accordance with the *EU CRR* for calculating the *own funds requirements* of:

- (i) (if there is a *limited activity firm* in the *financial conglomerate*), an *IFPRU limited activity firm*; or
- (ii) (in any other case), an *IFPRU limited licence firm*.

(6) If:

- (a) the *financial conglomerate* does not include a *credit institution*; and
- (b) (5) does not apply;

the *solo capital resources requirement* for any *undertaking* in the *banking sector* or the *investment services sector* is calculated in accordance with the *EU CRR* for calculating the *own funds requirement* of a *full-scope IFPRU investment firm*.

(7) In relation to a *BIPRU firm* that is a member of a *financial conglomerate* where there are no *credit institutions* or *investment firms*, any *capital resources requirements* calculated under a *BIPRU TP* may be used for the purposes of the *solo capital resources requirement* in this rule in the same way that the *capital resources requirements* can be used under **BIPRU 8**.

Solo capital resources requirement: application of rules 6.3

Any exemption that would otherwise apply under any *rules* applied by paragraph 6.2 do not apply for the purposes of this Annex.

Solo capital resources requirement: Insurance sector 6.4

(1) The *solo capital resources requirement* of an *undertaking* in the *insurance sector* must be calculated in accordance with this rule.

(2) Subject to (3), the *solo capital resources requirement* of an *undertaking* in the *insurance sector* is the capital resources requirement identified in **INSPRU 6.1.34 R** (1) to (8) as applying to that *undertaking*.

(3) **INSPRU 6.1.34 R** (1)(b) does not apply for the purposes of this annex.

Prudential rules for third country groups (GENPRU 3.2.8R to GENPRU 3.2.9R)

FCA **PRA**

1 Table: PART 1: Third-country financial conglomerates

- 1.1 This Part of this annex sets out the *rules* with which a *firm* must comply under GENPRU 3.2.8 R with respect to a *financial conglomerate* of which it is a member.
- 1.2 A *firm* must comply, with respect to the *financial conglomerate* referred to in paragraph 1.1, with GENPRU 3.1.29 R as applied under paragraph 1.3.
- 1.3 For the purposes of paragraph 1.2:
- (1) [deleted]
- (2) the definitions of *conglomerate capital resources* and *conglomerate capital resources requirement* that apply for the purposes of that rule are the ones from whichever of Part 1 or Part 2 of GENPRU 3 Annex 1 R is specified in the *requirement* referred to in GENPRU 3.2.8 R ; and
- (3) the *rules* so applied (including those in GENPRU 3 Annex 1 R) are adjusted in accordance with paragraph 3.1.
- 1.4 If the condition in Articles 7(4) and 8(4) of the *Financial Groups Directive* is satisfied (the *financial conglomerate* is headed by a *mixed financial holding company*) with respect to the *financial conglomerate* referred to in paragraph 1.1 the *firm* must also comply with GENPRU 3.1.35 R (as adjusted in accordance with paragraph 3.1) with respect to that *financial conglomerate*.
- 1.5 A *firm* must comply with the following with respect to the *financial conglomerate* referred to in paragraph 1.1:
- (1) SYSC 12 (as it applies to *financial conglomerates* and as adjusted under paragraph 3.1); and
- (2) GENPRU 3.1.25 R.

2 Table: PART 2: Third-country banking and investment groups

- 2.1 This Part of this annex sets out the *rules* with which a *firm* must comply under GENPRU 3.2.9 R with respect to a *third-country banking and investment group* of which it is a member.
- 2.2 A *firm* must comply with one of the sets of *rules* specified in paragraph 2.3 as adjusted under paragraph 3.1 with respect to the *third-country banking*

	<i>and investment group</i> referred to in paragraph 2.1.
2.3	The <i>rules</i> referred to in paragraph 2.2 are :
	(1) the <i>applicable sectoral consolidation rules</i> in paragraph 6.10 of GENPRU 3 Annex 1 R.
2.4	The set of <i>rules</i> from paragraph 2.3 that apply with respect to a particular <i>third-country banking and investment group</i> (as referred to in paragraph 2.1) are those that would apply if they were adjusted in accordance with paragraph 3.1.
2.5	The <i>sectoral rules</i> applied by Part 2 of this annex cover all prudential <i>rules</i> applying on a consolidated basis including those relating to large exposures.
2.6	A <i>firm</i> must comply with SYSC 12 (as it applies to <i>banking and investment groups</i> and as adjusted under paragraph 3.1) with respect to the <i>third-country banking and investment group</i> referred to in paragraph 2.1.

3 Table: PART 3: Adjustment of scope

3.1	The adjustments that must be carried out under this paragraph are that the scope of the <i>rules</i> referred in Part 1 or Part 2 of this annex, as the case may be, are amended:
	(1) so as to remove any provisions disapplying those <i>rules</i> for <i>third-country groups</i> ;
	(2) so as to remove all limitations relating to where a member of the <i>third-country group</i> is incorporated or has its head office; and
	(3) so that the scope covers every member of the <i>third-country group</i> that would have been included in the scope of those <i>rules</i> if those members had their head offices in, and were incorporated in, an <i>EEA State</i> .

Guidance Notes for Classification of Groups

FCA **PRA**

This annex consists only of one or more forms. Forms are to be found through the following address:

Classification of Groups (GENPRU 3.1.3 G) - genpru_ch3_annex3G.pdf

Purpose and scope

The form is designed to identify groups and sub-groups that are likely to be financial conglomerates under the Financial Groups Directive. A group may be a financial conglomerate if it contains both insurance and banking/investment businesses and meets certain threshold tests. The *appropriate regulator* needs to identify conglomerates with their head offices in the EEA and those with their head offices outside the EEA, although this does not necessarily mean that the latter will be subject to EEA conglomerate supervision.

This form's purpose is to enable the *appropriate regulator* to obtain sufficient information so as to be able to determine how likely a group/sub-group is to be a financial conglomerate. In certain cases this can only be determined after consultation with the other EU relevant competent authorities. A second purpose of the form is therefore to identify any groups and sub-groups that may need such consultation so that this can be made as soon as possible. This should allow firms time to prepare to comply.

The third purpose of the form is to gain information from firms on the most efficient way to implement the threshold calculations in detail (consistently with the directive). We have, therefore, asked for some additional information in part 4 of the form.

A copy of this form will can be found on the *appropriate regulator's* Financial Groups Website with current contact details.

Please include workings showing the method employed to determine the percentages in part 2 (for the threshold conditions) and giving details of all important assumptions / approximations made in doing the calculations.

The definition of financial conglomerate includes not only conventional groups made up of parent-subsidiary relationships but groups linked by control and "consolidation Article 12(1) relationships". If this is the case for your group, please submit along with this form a statement that this is the case. Please include in that statement an explanation of how you have included group members not linked by capital ties in the questionnaire calculations.

A consolidation Article 12(1) relationship arises between undertakings in the circumstances set out in Article 12(1) of the Seventh Company Law Directive. These are set out in the Handbook Glossary (in the definition of consolidation Article 12(1) relationship). Broadly speaking, undertakings come within this definition if they do not form a conventional group but:

- (a) are managed on a unified basis; or
- (b) have common management.

General guidance

We would like this to be completed based on the most senior parent in the group, and, if applicable, for the company heading the most senior conglomerate group in the EEA. If appropriate, please also attach a list of all other likely conglomerate sub-groups.

Please use the most recent accounts for the top level company in the group together with the corresponding accounts for all subsidiaries and participations that are included in the consolidated accounts. Please indicate the names of any significant subsidiaries with a different year-end from the group's year-end.

Please note the following:

- (a) Branches should be included as part of the parent entity.
- (b) Include in the calculations overseas entities owned by the relevant group or sub-group.
- (c) There are only two sectors for this purpose: banking/investment and insurance.
- (d) You will need to assign non-regulated financial entities to one of these sectors:
 - **banking/investment** activities are listed in - Annex 1 to the Capital Requirements Directive 2013/36/EU
 - **insurance** activities are listed in - IPRU Insurers Annex 11.1 and 11.2 .
 - Any **operator of a UCITS scheme, insurance intermediary, mortgage broker and mixed financial holding company** does not fall into the directive definitions of either financial sector or insurance sector and should be treated for these purposes as being outside the financial sector. They should therefore be ignored for the purposes of these calculations.

Threshold tests

For the purpose of completing section 2 of the form relating to the threshold tests, the following guidance should be used. However, if you consider that for your group there is a more appropriate calculation then you may use this calculation so long as the method of computation is submitted with the form.

Calculating balance sheet totals

Generally, use total (gross) assets for the balance sheet total of a group/entity. However, investments in other entities that are part of the group will need to be deducted from the sector that has made the investment and the balance sheet total of the entity is added to the sector in which it operates.

Our expectation of how this may be achieved efficiently is as follows:

- (i) Off-balance-sheet items should be excluded.
- (ii) Where off-balance sheet treatment of **funds under management** and on-balance sheet treatment of **policy holders' funds** may distort the threshold calculation, groups should consult the appropriate regulator on the appropriateness of using other measures under article 3.5 of the Financial Groups Directive.
- (iii) If consolidated accounts exist for a sub-group consisting of financial entities from only one of the two sectors, these consolidated accounts should be used to measure the balance-sheet total of the sub-group (i.e. total assets less investments in entities in the other sector). If consolidated accounts do not exist, intra-group balances should be netted out when calculating the balance sheet total of a single sector (but cross-sector intra-group balances should not be netted out).
- (iv) Where consolidated accounts are used, minority interests should be excluded and goodwill should be included.
- (v) Where accounting standards differ between entities, groups should consult the *appropriate regulator* if they believe this is likely materially to affect the threshold calculation.
- (vi) Where there is a subsidiary or participation in the opposite sector from its parent (i.e. insurance sector for a banking/investment firm parent and vice versa), the balance sheet amount of the subsidiary or participation should be allocated to its sector using its individual accounts.
- (vii) The balance-sheet total of the parent entity/sub-group is measured as total assets of the parent/sub-group less the book value of its subsidiaries or participations in the other sector (i.e. the value of the subsidiary or participation in the parent's consolidated accounts is deducted from the parent's consolidated assets).
